BLACK HILLS CORPORATION

Notes to Condensed Consolidated Financial Statements (unaudited) (Reference is made to Notes to Consolidated Financial Statements included in the Company's 2011 Annual Report on Form 10-K)

(1) MANAGEMENT'S STATEMENT

The unaudited Condensed Consolidated Financial Statements included herein have been prepared by Black Hills Corporation together with our subsidiaries (the "Company," "us," "we," or "our"), pursuant to the rules and regulations of the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations; however, we believe that the footnotes adequately disclose the information presented. These Condensed Consolidated Financial Statements should be read in conjunction with the consolidated financial statements and the notes thereto included in our 2011 Annual Report on Form 10-K filed with the SEC.

Accounting methods historically employed require certain estimates as of interim dates. The information furnished in the accompanying Condensed Consolidated Financial Statements reflects all adjustments, including accruals, which are, in the opinion of management, necessary for a fair presentation of the June 30, 2012, December 31, 2011 and June 30, 2011 financial information and are of a normal recurring nature. Certain industries in which we operate are highly seasonal and revenue from, and certain expenses for, such operations may fluctuate significantly among quarterly periods. Demand for electricity and natural gas is sensitive to seasonal cooling, heating and industrial load requirements, as well as changes in market price. In particular, the normal peak usage season for gas utilities is November through March and significant earnings variances can be expected between the Gas Utilities segment's peak and off-peak seasons. Due to this seasonal nature, our results of operations for the three and six months ended June 30, 2012 and June 30, 2011, and our financial condition as of June 30, 2012, December 31, 2011, and June 30, 2011 are not necessarily indicative of the results of operations and financial condition to be expected as of or for any other period. All earnings per share amounts discussed refer to diluted earnings per share unless otherwise noted.

On February 29, 2012, we sold our Energy Marketing segment, which resulted in this segment being classified as discontinued operations. For comparative purposes, all prior periods presented have been restated to reflect the classification of this segment as discontinued operations. For further information see Note 18.

Certain prior year data presented in the financial statements has been reclassified to conform to the current year presentation. Specifically, the Company has reclassified deferred financing cost amortization into a separate line on the Condensed Consolidated Statements of Cash Flows. This reclassification had no effect on total assets, net income, cash flows or earnings per share.

(2) RECENTLY ADOPTED AND RECENTLY ISSUED ACCOUNTING STANDARDS AND LEGISLATION

Recently Adopted Accounting Standards and Legislation

Other Comprehensive Income: Presentation of Comprehensive Income, ASU 2011-05 and ASU 2011-12

FASB issued an accounting standards update amending ASC 220, Comprehensive Income, to improve the comparability, consistency and transparency of reporting of comprehensive income. It amends existing guidance by

allowing only two options for presenting the components of net income and other comprehensive income: (1) in a single continuous financial statement, statement of comprehensive income or (2) in two separate but consecutive financial statements, consisting of an income statement followed by a separate statement of other comprehensive income. Also, items that are reclassified from other comprehensive income to net income must be presented on the face of the financial statements. ASU 2011-05 requires retrospective application, and it is effective for the fiscal years, and interim periods within those years beginning after December 15, 2011. In December 2011, FASB issued ASU 2011-12, which indefinitely deferred the provisions of ASU 2011-05 requiring the presentation of reclassification adjustments on the face of the financial statements for items reclassified from other comprehensive income to net income.

At December 31, 2011, we elected to early adopt the provisions of ASU 2011-05 as amended by ASU 2011-12. The adoption changed our presentation of certain financial statements and provided additional details in the notes to the financial statements, but did not have any other impact on our financial statements.

Fair Value Measurement: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements, ASU 2011-04

In May 2011, FASB issued an accounting standards update amending ASC 820, Fair Value Measurements and Disclosures, to achieve common fair value measurement and disclosure requirements between GAAP and IFRS. Additional disclosure requirements in the update include: (1) for Level 3 fair value measurements - quantitative information about unobservable inputs used, a description of the valuation processes used by the entity, and a qualitative discussion about the sensitivity of the measurements to changes in the unobservable inputs; (2) for an entity's use of a non-financial asset that is different from the asset's highest and best use - the reason for the difference; (3) for financial instruments not measured at fair value but for which disclosure of fair value is required - the fair value hierarchy level in which the fair value measurements were determined; and (4) the disclosure of all transfers between Level 1 and Level 2 of the fair value hierarchy. ASU 2011-04 is effective for fiscal years, and interim periods within those years, beginning after December 31, 2011. The amendment required additional details in notes to financial statements, but did not have any other impact on our financial statements. Additional disclosures are included in Notes 14 and 15.

Intangibles - Goodwill and Other: Testing Goodwill for Impairment, ASU 2011-08

In September 2011, the FASB issued an amendment to ASC 350, Intangibles - Goodwill and Other, to provide an option to perform a qualitative assessment to determine whether further impairment testing of goodwill is necessary. Specifically, an entity has the option to first assess qualitative factors to determine whether it is necessary to perform the current two-step test. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test is required. Otherwise, no further testing is required. This standard is effective for annual and interim goodwill impairment testing performed for fiscal years beginning after December 15, 2011. We perform our annual impairment testing in November of each year. The adoption of this standard will not have an impact on our financial statements.

Recently Issued Accounting Standards and Legislation

Balance Sheet: Disclosure about Offsetting Assets and Liabilities, ASU 2011-11

In December 2011, the FASB issued revised accounting guidance to amend ASC 210, Balance Sheet, related to the existing disclosure requirements for offsetting financial assets and liabilities to enhance current disclosures, as well as to improve comparability of balance sheets prepared under GAAP and IFRS. The revised disclosure guidance affects all companies that have financial instruments and derivative instruments that are either offset in the balance sheet (i.e., presented on a net basis) or subject to an enforceable master netting and/or similar arrangement. In addition, the revised guidance requires that certain enhanced quantitative and qualitative disclosures are made with respect to a company's netting arrangements and/or rights of offset associated with its financial instruments and/or derivative instruments. The revised disclosure guidance is effective on a retrospective basis for interim and annual periods beginning January 1, 2013. The adoption of this standard will not have an impact on our financial position, results of operations or cash flows.

Intangible - Goodwill and Other: Testing Indefinite Lived Intangible Assets for Impairment, ASU 2012-02

In July 2012, the FASB issued an amendment to ASC 350, Intangibles - Goodwill and Other, to provide an option to perform a qualitative assessment to determine whether further impairment testing of indefinite lived intangible assets

is necessary. This ASU aligns the impairment testing for intangible assets with that of goodwill as amended by ASU 2011-11. This guidance is effective for interim and annual periods beginning after September 15, 2012, with early adoption permitted. The adoption of this standard will not have an impact on our financial statements, results of operations or cash flows.

Total materials, supplies and fuel	\$61,455	\$84,064	\$61,104

(5) ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS

Accounts receivable consists primarily of customer trade accounts. The Gas Utilities' accounts receivable balance fluctuates primarily due to seasonality. We maintain an allowance for doubtful accounts that reflects our best estimate of probable uncollectible trade receivables. We regularly review our trade receivable allowances by considering such factors as historical experience, credit worthiness, the age of the receivable balances and current economic conditions that may affect our ability to collect.

Following is a summary of receivables (in thousands) as of:

	Accounts	Unbilled	Less Allowance f	or Accounts
June 30, 2012	Receivable, Trade	Revenue	Doubtful Accour	nts Receivable, net
Electric Utilities	\$36,336	\$25,726	\$(620)\$61,442

(6) NOTES PAYABLE

Our credit facility and debt securities contain certain restrictive financial covenants. As of June 30, 2012, we were in compliance with all of these covenants.

We had the following short-term debt outstanding as of the Condensed Consolidated Balance Sheet dates (in thousands):

	June 30, 2012		December 31, 2011		June 30, 2011	
	Balance	Letters of	Balance	Letters of	Balance	Letters of
	Outstanding	Credit	Outstanding	Credit	Outstanding	Credit
Revolving Credit Facilit	y\$75,000	\$36,256	\$195,000	\$43,700	\$130,000	\$43,000
Term Loan due 2011 ^(a)		_		_	100,000	
Term Loan due 2013 (b)	150,000	_	150,000	_	150,000	
Total	\$225,000	\$36,256	\$345,000	\$43,700	\$380,000	\$43,000

⁽a) The short-term loan was renegotiated to a longer term note, maturing on September 30, 2013.

Revolving Credit Facility

On February 1, 2012, we entered into a new \$500 million Revolving Credit Facility expiring February 1, 2017. The facility contains an accordion feature allowing us, with the consent of the administrative agent, to increase the capacity of the facility to \$750 million. The Revolving Credit Facility can be used for the issuance of letters of credit, to fund working capital needs and for other corporate purposes. Borrowings are available under a base rate option or a Eurodollar option. The cost of borrowings or letters of credit is determined based upon our credit ratings. At current credit ratings, the margins for base rate borrowings, Eurodollar borrowings and letters of credit were 0.50%, 1.50% and 1.50%, respectively, at June 30, 2012. The facility contains a commitment fee that is charged on the unused amount of the Revolving Credit Facility. Based upon current credit ratings, the fee is 0.25%.

⁽b) In June 2012, this short-term loan was extended for one year. See discussion below.

Deferred financing costs on the new facility of \$2.8 million are being amortized over the estimated useful life of the Revolving Credit Facility and are included in Interest expense on the accompanying Condensed Consolidated Statements of Income and Comprehensive Income. Upon entering into the new facility, \$1.5 million of deferred financing costs relating to the previous credit facility were written off through Interest expense.

Term Loan due 2013

On June 24, 2012, we extended the term of the \$150 million term loan to June 24, 2013. The cost of borrowing is based on 1.10% over LIBOR.

Debt Covenants

Certain debt obligations require compliance with the following covenants at the end of each quarter (dollars in thousands):

,	As of				
	June 30, 2012		Covenant Requirement		
Consolidated Net Worth	\$1,196,285		Greater than	\$892,283	
Recourse Leverage Ratio	56.8	%	Less than	65.0	%

(7) LONG TERM DEBT

On May 15, 2012, Black Hills Power repaid its 4.8% Pollution Control Refund Revenue Bonds in full for \$6.5 million principal and interest. These bonds were originally due to mature on October 1, 2014.

(8) EARNINGS PER SHARE

Basic income (loss) per share from continuing operations is computed by dividing Income (loss) from continuing operations by the weighted-average number of common shares outstanding during the period. Diluted income (loss) per share is computed by including all dilutive common shares potentially outstanding during a period.

A reconciliation of share amounts used to compute earnings (loss) per share is as follows (in thousands):

	Three Months Ended June 30,		Six Months Ende June 30,	
	2012	2011	2012	2011
Income (loss) from continuing operations	\$(12,323)\$3,706	\$22,948	\$32,774
Weighted average shares - basic	43,799	39,109	43,765	39,084
Dilutive effect of: Restricted stock	_	148	150	140
Stock options	_	20	15	20
Equity forward instruments		533		496
Other dilutive effects		13	54	53
Weighted average shares - diluted	43,799	39,823	43,984	39,793

Below is a discussion of our potentially dilutive shares that were not included in the computation of diluted earnings per share as their effect would have been anti-dilutive.

Due to our net loss for the quarter ended June 30, 2012, potentially dilutive securities, consisting of outstanding stock options, restricted common stock, restricted stock units, non-vested performance-based share awards and warrants, were excluded from the diluted loss per share calculation due to their anti-dilutive effect. In computing diluted net loss per share, 13,081 options to purchase shares of common stock, 152,318 vested and non-vested restricted stock shares, 34,248 warrants and other performance shares were excluded from the computations for the three months ended June 30, 2012.

In addition to these potentially dilutive shares excluded due to our net loss for second quarter of 2012, the following outstanding securities were also excluded in the computation of diluted income (loss) per share from continuing operations as their inclusion would have been anti-dilutive (in thousands):

	Three Months Ended			ths Ended	
	June 30,		June 30,		
	2012	2011	2012	2011	
Stock options	99	102	113	81	
Restricted stock	66	24	48	16	
Other stock	42	31	29	15	
Anti-dilutive shares	207	157	190	112	

(9) COMPREHENSIVE INCOME (LOSS)

The following table presents the components of our comprehensive income (loss) (in thousands):

The female wing there presents are compensate of our comprehensi	(1000)	(111 0110 015011105).

Ending Balance June 30, 2011	\$(13,729)\$(11,142)\$(24,871)

(10) COMMON STOCK

Other than the following transactions, we had no material changes in our common stock during the six months ended June 30, 2012 from the amount reported in Note 11 of the Notes to Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

Equity Compensation Plans

We granted 66,690 target performance shares to certain officers and business unit leaders for the January 1, 2012 through December 31, 2014 performance period during the six months ended June 30, 2012. Actual shares are issued after the end of the performance period. Performance shares are awarded based on our total stockholder return over the designated performance period as measured against a selected peer group and can range from 0% to 200% of target. In addition, certain stock price performance must be achieved for a payout to occur. The final value of the performance shares will vary according to the number of shares of common stock that are ultimately granted based upon the actual level of attainment of the performance criteria. The performance awards are paid 50% in cash and 50% in shares of common stock. The grant date fair value was \$32.26 per share.

We granted 145,787 shares of restricted common stock and restricted stock units during the six months ended June 30, 2012. The pre-tax compensation cost related to the awards of restricted stock and restricted stock units of approximately \$5.1 million will be recognized over the vesting period.

Stock options totaling 41,206 shares of common stock were exercised during the six months ended June 30, 2012 at a weighted-average exercise price of \$28.28 per share, providing \$1.2 million of proceeds.

We issued 3,690 shares of common stock under our short-term incentive compensation plan during the six months ended June 30, 2012. Pre-tax compensation cost related to the awards was approximately \$0.1 million, which was expensed in 2011.

Stock-based compensation expense for the three months ended June 30, 2012 and 2011 was \$1.5 million and \$0.9 million, respectively, and for the six months ended June 30, 2012 and 2011 was \$3.3 million and \$3.1 million, respectively.

As of June 30, 2012, total unrecognized compensation expense related to non-vested stock awards was \$10.3 million and is expected to be recognized over a weighted-average period of 2.2 years.

Dividend Reinvestment and Stock Purchase Plan

We have a DRIP under which stockholders may purchase additional shares of common stock through dividend reinvestment and/or optional cash payments at 100% of the recent average market price. We have the option of issuing new shares or purchasing the shares on the open market. We are currently issuing new shares. We issued 52,247 new shares at a weighted-average price of \$32.70 during the six months ended June 30, 2012. Unissued common stock totaling 401,017 shares was available for future offering under the DRIP at June 30, 2012.

Dividend Restrictions

Our Revolving Credit Facility and other debt obligations contain restrictions on the payment of cash dividends upon a default or event of default. As of June 30, 2012, we were in compliance with these covenants.

Due to our holding company structure, substantially all of our operating cash flows are provided by dividends paid or distributions made by our subsidiaries. The cash to pay dividends to our stockholders is derived from these cash flows. As a result, certain statutory limitations or regulatory or financing agreements could affect the levels of distributions allowed to be made by our subsidiaries. The following restrictions on distributions from our subsidiaries existed at June 30, 2012:

Our utilities are generally limited to the amount of dividends allowed to be paid to us as a utility holding company under the Federal Power Act and settlement agreements with state regulatory jurisdictions. As of June 30, 2012, the restricted net assets at our Utilities Group were approximately \$215.1 million.

As required by the covenant in the Black Hills Wyoming project financing, Black Hills Non-regulated Holdings has maintained restricted equity of at least \$100.0 million.

(11) EMPLOYEE BENEFIT PLANS

Defined Benefit Pension Plans

We have three non-contributory defined benefit pension plans (the "Pension Plans"). One covers certain eligible employees of Black Hills Service Company, Black Hills Power, WRDC and BHEP, one covers certain eligible employees of Cheyenne Light, and one covers certain eligible employees of Black Hills Energy. The Pension Plan benefits are based on years of service and compensation levels.

The components of net periodic benefit cost for the Pension Plans were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,		
	2012	2011	2012	2011	
Service cost	\$1,430	\$1,356	\$2,860	\$2,711	
Interest cost	3,687	3,732	7,374	7,464	
Expected return on plan assets	(4,084)(4,239)(8,168)(8,478)
Prior service cost	22	25	44	50	
Net loss (gain)	2,408	1,135	4,816	2,270	
Net periodic benefit cost	\$3,463	\$2,009	\$6,926	\$4,017	

Non-pension Defined Benefit Postretirement Healthcare Plans

We sponsor the following retiree healthcare plans (the "Healthcare Plans"): the Black Hills Corporation Postretirement Healthcare Plan, the Healthcare Plan for Retirees of Cheyenne Light, and the Black Hills Energy Postretirement Healthcare Plan. Employees who participate in the Healthcare Plans and who retire on or after meeting certain eligibility requirements are entitled to postretirement healthcare benefits.

The components of net periodic benefit cost for the Healthcare Plans were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,		
	2012	2011	2012	2011	
Service cost	\$402	\$375	\$804	\$750	
Interest cost	523	542	1,046	1,084	
Expected return on plan assets	(19) (41)(38)(82)
Prior service cost (benefit)	(125)(120)(250)(240)
Net loss (gain)	222	169	444	338	
Net periodic benefit cost	\$1,003	\$925	\$2,006	\$1,850	

Supplemental Non-qualified Defined Benefit Plans

We have various supplemental retirement plans for key executives (the "Supplemental Plans"). The Supplemental Plans are non-qualified defined benefit plans.

The components of net periodic benefit cost for the Supplemental Plans were as follows (in thousands):

	Three Months Ended June 30,		Six Months End	
			June 30,	
	2012	2011	2012	2011
Service cost	\$246	\$257	\$492	\$514
Interest cost	331	325	662	649
Prior service cost	1	1	2	2
Net loss (gain)	202	128	404	255
Net periodic benefit cost	\$780	\$711	\$1,560	\$1,420

Contributions

We anticipate that we will make contributions to the benefit plans during 2012 and 2013. Contributions to the Pension Plans will be made in cash, and contributions to the Healthcare Plans and the Supplemental Plans are expected to be made in the form of benefit payments. Contributions are as follows (in thousands):

	Contributions Contributions		Additional	
	Made	Made	Auditional	
	Three Months	Six Months	Contributions	Contributions
	Ended June 30	Ended June	Anticipated	Anticipated
	2012	30, 2012	for 2012	for 2013
Defined Benefit Pension Plans	\$ —	\$25,000	\$ —	\$4,500
Non-pension Defined Benefit Postretirement Healthcare Plans	\$1,063	\$2,126	\$2,125	\$4,380
Supplemental Non-qualified Defined Benefit Plans	\$278	\$556	\$555	\$1,090

(12) BUSINESS SEGMENTS INFORMATION

Our reportable segments are based on our method of internal reporting, which generally segregates the strategic business groups due to differences in products, services and regulation. All of our operations and assets are located within the United States.

On February 29, 2012, we sold our Energy Marketing segment, Enserco, which resulted in this segment being classified as discontinued operations. For comparative purposes, all prior periods presented have been restated to reflect the classification of this segment as discontinued operations. Indirect corporate costs and inter-segment interest expense related to Enserco that have not been classified as discontinued operations have been reclassified to our Corporate segment. For further information see Note 18.

We conduct our operations through the following five reportable segments:

Utilities Group —

Electric Utilities, which supplies electric utility service to areas in South Dakota, Wyoming, Colorado and Montana and natural gas utility service to Cheyenne, Wyoming and vicinity; and

Gas Utilities, which supplies natural gas utility service to areas in Colorado, Iowa, Kansas and Nebraska.

Non-regulated Energy Group —

Oil and Gas, which acquires, explores for, develops and produces crude oil and natural gas interests located in the Rocky Mountain region and other states;

Power Generation, which produces and sells power and capacity to wholesale customers from power plants located in Wyoming and Colorado; and

Coal Mining, which engages in the mining and sale of coal from our mine near Gillette, Wyoming.

Segment information follows the accounting policies described in Note 1 of the Notes to Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

Segment information included in the accompanying Condensed Consolidated Statements of Income and Comprehensive Income and Condensed Consolidated Balance Sheets was as follows (in thousands):

Total assets	\$3,774,280	\$4,127,083	\$3,817,160	

The PPA under which the new generating facility was constructed at our Pueblo Airport Generation site by Colorado IPP to support Colorado Electric customers is accounted for as a capital lease. Therefore, commencing December 31, 2011, assets previously recorded at Power Generation are now accounted for at Colorado Electric as a capital lease.

(13) RISK MANAGEMENT ACTIVITIES

Our activities in the regulated and non-regulated energy sectors expose us to a number of risks in the normal operation of our businesses. Depending on the activity, we are exposed to varying degrees of market risk and credit risk. To manage and mitigate these identified risks, we have adopted the Black Hills Corporation Risk Policies and Procedures as discussed in our 2011 Annual Report on Form 10-K.

Market Risk

Market risk is the potential loss that might occur as a result of an adverse change in market price or rate. We are exposed to the following market risks:

Commodity price risk associated with our natural long position with crude oil and natural gas reserves and production, fuel procurement for certain of our gas-fired generation assets and variability in revenue due to changes in gas usage at our regulated segment; and

Interest rate risk associated with our variable rate credit facility, project financing floating rate debt and our derivative instruments.

Our exposure to these market risks is affected by a number of factors including the size, duration, and composition of our energy portfolio, the absolute and relative levels of interest rates and commodity prices, the volatility of these prices and rates, and the liquidity of the related interest rate and commodity markets.

Credit Risk

Credit risk is the risk of financial loss resulting from non-performance of contractual obligations by a counterparty.

⁽b) Assets of the Corporate segment were restated due to deferred taxes that were not classified as discontinued operations.

⁽c) See Note 18 for further information relating to discontinued operations.

For production and generation activities, we attempt to mitigate our credit exposure by conducting business primarily with investment grade companies and credit quality municipalities and electric cooperatives, setting tenor and credit limits commensurate with counterparty financial strength, obtaining master netting agreements, and mitigating credit exposure with less creditworthy counterparties through parental guarantees, prepayments, letters of credit, and other security agreements.

We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history and the customer's current creditworthiness, as determined by review of their current credit information. We maintain a provision for estimated credit losses based upon historical experience and any specific customer collection issue that is identified.

As of June 30, 2012, our credit exposure (exclusive of retail customers of the regulated utilities) was concentrated primarily among investment grade companies, municipal cooperatives and federal agencies. Credit exposure with non-investment grade or non-rated counterparties, was supported partially through letters of credit, prepayments or parental guarantees.

We actively manage our exposure to certain market and credit risks as described in Note 3 of the Notes to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K. Our derivative and hedging activities included in the accompanying Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Income and Comprehensive Income are detailed below and within Note 14.

Oil and Gas Exploration and Production

We produce natural gas and crude oil through our exploration and production activities. Our natural "long" positions, or unhedged open positions, result in commodity price risk and variability to our cash flows.

We hold a portfolio of swaps and options to hedge portions of our crude oil and natural gas production. We elect hedge accounting on those OTC swaps and options. These transactions were designated at inception as cash flow hedges, documented under accounting for derivatives and hedging, and initially met prospective effectiveness testing. Effectiveness of our hedging position is evaluated at least quarterly.

The derivatives are marked to fair value and are recorded as Derivative assets or Derivative liabilities on the accompanying Condensed Consolidated Balance Sheets. The effective portion of the gain or loss on these derivatives for which we have elected cash flow hedge accounting is reported in Accumulated other comprehensive income (loss) and the ineffective portion, if any, is reported in Revenue.

We had the following derivatives and related balances for our Oil and Gas segment (dollars in thousands) as of:

Crude Oil Swaps Natural Gas Swaps Swaps Options Swaps Options Notional (a) Natural Gas Swaps Options Swaps Options Swaps Options Swaps Options Swaps Options Swaps Swaps Swaps Swaps Swaps Swaps Swaps Options Swaps Options Swaps Options Swaps Swaps Options		June 30, 2012		December 31, 2011		June 30, 2011

- (a) Crude oil in Bbls, gas in MMBtus
- (b) Refers to the term of the derivative instrument. Assets and liabilities are classified as current or non-current based on the term of the hedged transaction and the corresponding settlement of the derivative instruments.
- (c) Represents the amortization of put premiums.

Based on June 30, 2012 market prices, a \$4.5 million gain would be reclassified from AOCI during the next 12 months. Estimated and actual realized gains will change during future periods as market prices fluctuate.

Utilities

Our utility customers are exposed to the effect of volatile natural gas prices; therefore, as allowed or required by state utility commissions, we have entered into certain natural gas futures, options and basis swaps to reduce our customers' underlying exposure to these fluctuations. These transactions are considered derivatives and in accordance with accounting standards for derivatives and hedging, mark-to-market adjustments are recorded as Derivative assets or Derivative liabilities on the accompanying Condensed Consolidated Balance Sheets. Gains and losses, as well as option premiums and commissions on these transactions are recorded as Regulatory assets or Regulatory liabilities in accordance with accounting standards for regulated utility operations. Accordingly, the hedging activity is recognized in the Condensed Consolidated Statements of Income and Comprehensive Income when the related costs are recovered through our rates.

The contract or notional amounts and terms of the natural gas derivative commodity instruments held at our Utilities were as follows as of:

	June 30, 2012		December 3	1, 2011	June 30, 2011	
	Notional (MMBtus)	Latest Expiration (months)	Notional (MMBtus)	Latest Expiration (months)	Notional (MMBtus)	Latest Expiration (months)
Natural gas futures purchased	12,440,000	78	14,310,000	84	7,820,000	21
Natural gas options purchased	2,840,000	9	1,720,000	3	1,560,000	9
Natural gas basis swaps purchased	7,270,000	78	7,160,000	60		

We had the following derivative balances related to the hedges in our Utilities (in thousands) as of:

	June 30,	December 31	, June 30,
	2012	2011	2011
Derivative assets, current	\$9,726	\$ 9,844	\$2,935
Derivative assets, non-current	\$199	\$ 52	\$53
Derivative liabilities, non-current	\$6,453	\$ 7,156	\$175
Net unrealized (gain) loss included in Regulatory assets or liabilities	\$13,691	\$ 17,556	\$4,229
Included in Derivatives:			
Cash collateral receivable (payable)	\$15,925	\$ 19,416	\$6,254
Option premiums and commissions	\$1,238	\$ 880	\$760

Financing Activities

We have entered into floating-to-fixed interest rate swap agreements to reduce our exposure to interest rate fluctuations associated with our floating rate debt obligations. Our interest rate swaps and related balances were as follows (dollars in thousands) as of:

	June 30, 2012			December 31, 2011			June 30, 2011					
	Designated	l	De-design	atec	l Designate	Designated De-designated		l Designated		De-designated		
	Interest Ra	te	Interest Ra	ate	Interest R	ate	Interest Ra	te	Interest R	ate	Interest Ra	ate
	Swaps		Swaps*		Swaps		Swaps*		Swaps		Swaps*	
Notional	\$150,000		\$ 250,000		\$150,000		\$ 250,000		\$150,000		\$ 250,000	
Weighted average fixed interest rate	5.04	%	5.67	%	5.04	%	5.67	%	5.04	%	5.67	%
Maximum terms in years	4.50		1.50		5.00		2.00		5.50		0.50	
Derivative liabilities, current	\$6,766		\$ 78,001		\$6,513		\$ 75,295		\$6,900		\$ 56,342	
Derivative liabilities, non-current	\$18,976		\$ 15,336		\$20,363		\$ 20,696		\$15,788		\$—	
Pre-tax accumulated other comprehensive income (loss)	\$(25,742)	\$—		\$(26,876)	\$ <i>—</i>		\$(22,688)	\$ <i>—</i>	
Pre-tax gain (loss)	\$ —		\$ (3,507)	\$ —		\$ (42,010)	\$ —		\$ (2,362)
Cash collateral receivable (payable) included in derivative	\$		\$ 6,160		\$—		\$—		\$—		\$—	

Maximum terms in years reflect the amended early termination dates. If the early termination dates are not extended, the swaps will require cash settlement based on the swap value on the termination date. If extended, de-designated swaps totaling \$100 million notional terminate in 6.5 years and de-designated swaps totaling \$150 million notional terminate in 16.5 years.

Collateral requirements based on our corporate credit rating apply to \$50 million of our de-designated swaps. At our current credit ratings, we are required to post collateral for any amount by which the swaps' negative mark-to-market fair value exceeds \$20 million. If our senior unsecured credit rating drops to BB+ or below by S&P, or to Ba1 or below by Moody's, we would be required to post collateral for the entire amount of the swaps' negative mark-to-market fair value.

Based on June 30, 2012 market interest rates and balances related to our designated interest rate swaps, a loss of approximately \$6.8 million would be reclassified from AOCI during the next 12 months. Estimated and realized losses will change during future periods as market interest rates change.

(14) FAIR VALUE MEASUREMENTS

Derivative Financial Instruments

Assets and liabilities carried at fair value are classified and disclosed in one of the following categories:

Level 1 — Unadjusted quoted prices available in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities. This level primarily consists of financial instruments such as exchange-traded securities or listed derivatives.

Level 2 — Pricing inputs include quoted prices for identical or similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 — Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs reflect management's best estimate of fair value using its own assumptions about the assumptions a market participant would use in pricing the asset or liability.

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy levels. We record transfers, if necessary, between levels at the end of the reporting period for all of our financial instruments.

Transfers into Level 3, if any, occur when significant inputs used to value the derivative instruments become less observable such as a significant decrease in the frequency and volume in which the instrument is traded, negatively impacting the availability of observable pricing inputs. Transfers out of Level 3, if any, occur when the significant inputs become more observable such as the time between the valuation date and the delivery date of a transaction becomes shorter, positively impacting the availability of observable pricing inputs.

Valuation Methodologies

Oil and Gas Segment:

The commodity option contracts for the Oil and Gas segment are valued under the market approach and include calls and puts. Fair value was derived using quoted prices from third party brokers for similar instruments as to quantity and timing. The prices are then validated through multiple sources and therefore support Level 2 disclosure.

The commodity basis swaps for the Oil and Gas segment are valued under the market approach using the instrument's current forward price strip hedged for the same quantity and date and discounted based on the three-month LIBOR. We utilize observable inputs which support Level 2 disclosure.

Utilities Segment:

The commodity contracts for the Utilities, valued using the market approach, include exchange-traded futures, options and basis swaps (Level 2) and OTC basis swaps (Level 3) for natural gas contracts. For Level 2 assets and liabilities, fair value was derived using broker quotes validated by the Chicago Mercantile Exchange pricing for similar instruments. For Level 3 assets and liabilities, fair value was derived using average price quotes from the OTC contract broker and an independent third party market participant.

Corporate Segment:

The interest rate swaps are valued using the market valuation approach. We establish fair value by obtaining price quotes directly from the counterparty which are based on the floating three-month LIBOR curve for the term of the contract. The fair value obtained from the counterparty is then validated by utilizing a nationally recognized service that obtains observable inputs to compute fair value for the same instrument. In addition, the fair value for the interest rate swap derivatives includes a CVA component. The CVA considers the fair value of the interest rate swap and the probability of default based on the life of the contract. For the probability of a default component, we utilize observable inputs supporting Level 2 disclosure by using our credit default spread, if available, or a generic credit default spread curve that takes into account our credit ratings.

Recurring Fair Value Measurements

There have been no significant transfers between Level 1 and Level 2 derivative balances. The following tables set forth by level within the fair value hierarchy our assets and liabilities that were accounted for at fair value on a recurring basis (in thousands):

	As of Jun	e 30, 2012						
	Level 1	Level 2		Level 3		Counterparty Netting	Cash Collateral	Total
Assets:								
Commodity derivatives — Oil and Ga	ıs							
Options Oil	\$ —	\$1,014		\$ —		\$ —	\$—	\$1,014
Basis Swaps Oil	_	2,785		_				2,785

Basis Swaps Gas	_	230		_		_	553	783
Commodity derivatives — Utilities	_	6,453		_		_	_	6,453
Interest rate swaps	_	125,239					(6,160)	119,079
Total	\$ —	\$132,747		\$ —		\$ —	\$(4,994)	\$127,753

⁽a) Level 1 assets and liabilities are described in Note 15.

⁽b) The significant unobservable inputs used in the fair value measurement of the long-term OTC contracts are based on the average of price quotes from an independent third party market participant and the OTC contract broker. The unobservable inputs are long-term natural gas prices. Significant changes to these inputs along with the contract term would impact the derivative asset/liability and regulatory asset/liability, but will not impact the results of operations until the contract is settled under the original terms of the contract. The contracts will be classified as Level 2 once settlement is within 60 months of maturity and quoted market prices from a market exchange are available.

	As of December 31, 2011						
	Level 1	Level 2	Level 3		Counterparty Netting	Cash Collateral	Total
Assets:					1 (Johnson	0011410141

Total	\$ —	\$132,230	\$1,165	(a)	\$5	\$ —	\$133,400

⁽a) Of the net beginning balance included as Level 3 for Options - Oil, transfers out of Level 3 included approximately \$(0.5) million due to gain (loss) within AOCI and approximately \$0.9 million transferred due to the related inputs becoming more observable. Previously, we utilized pricing methodologies developed by our Energy Marketing segment to value our Oil and Gas derivatives. Oil and Gas now obtains available observable inputs including quoted prices traded on active exchanges from multiple sources to value our options. Therefore, options in the Oil and Gas segment have been reclassified from Level 3 to Level 2.

Fair Value Measures

As required by accounting standards for derivatives and hedges, fair values within the following tables are presented on a gross basis and do not reflect the netting of asset and liability positions permitted in accordance with accounting standards for offsetting and under terms of our master netting agreements. Further, the amounts do not include net cash collateral on deposit in margin accounts at June 30, 2012, December 31, 2011, and June 30, 2011, to collateralize certain financial instruments, which are included in Derivative assets and/or Derivative liabilities. Therefore, the gross balances are not indicative of either our actual credit exposure or net economic exposure. Additionally, the amounts below will not agree with the amounts presented on our Condensed Consolidated Balance Sheets, nor will they correspond to the fair value measurements presented in Note 13.

The following tables present the fair value and balance sheet classification of our derivative instruments (in thousands):

(15) FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair values of our financial instruments are as follows (in thousands) as of:

	June 30, 2012		December 31, 2011		June 30, 2011		
	Carrying	Carrying Fair Value C		Fair Value	Carrying	Fair Value	
	Amount	Tan value	Amount	ran value	Amount	raii value	
Cash and cash equivalents (a)	\$40,110	\$40,110	\$21,628	\$21,628	\$21,971	\$21,971	
Restricted cash and equivalents (a)	\$4,772	\$4,772	\$9,254	\$9,254	\$3,710	\$3,710	
Notes payable (a)	\$225,000	\$225,000	\$345,000	\$345,000	\$380,000	\$380,000	
Long-term debt, including current maturities (b)	\$1,272,481	\$1,460,723	\$1,282,882	\$1,464,289	\$1,187,196	\$1,313,052	

⁽a) Fair value approximates carrying value due to short-term maturities and therefore is classified in Level 1 in the fair value hierarchy.

The following methods and assumptions were used to estimate the fair value of each class of our financial instruments.

Cash and Cash Equivalents

Included in cash and cash equivalents are cash, overnight repurchase agreement accounts, money market funds and term deposits. As part of our cash management process, excess operating cash is invested in overnight repurchase agreements with our bank. Repurchase agreements are not deposits and are not insured by the U.S. Government, the FDIC or any other government agency and involve investment risk including possible loss of principal. We believe however, that the market risk arising from holding these financial instruments is minimal. The carrying amount for cash and cash equivalents approximates fair value due to the short-term maturity of these instruments.

Restricted Cash and Equivalents

Restricted cash and equivalents represent cash and uninsured term deposits.

Notes Payable

The carrying amounts of our notes payable approximate fair value due to their variable interest rates with short reset periods.

Long-term Debt

Our debt instruments are marked to fair value using the market valuation approach. The fair value for our fixed rate debt instruments is estimated based on quoted market prices and yields for debt instruments having similar maturities and debt ratings. The carrying amounts of our variable rate debt approximate fair value due to the variable interest rates with short reset periods.

(16) COMMITMENTS AND CONTINGENCIES

⁽b) Long-term debt is valued based on observable inputs available either directly or indirectly for similar liabilities in active markets and therefore is classified in Level 2 in the fair value hierarchy.

There have been no significant changes to commitments and contingencies from those previously disclosed in Note 19 of our Notes to the Consolidated Financial Statements in our 2011 Annual Report on Form 10-K.

(17) IMPAIRMENT OF LONG-LIVED ASSETS

Under the full cost method of accounting used by our Oil and Gas segment to account for exploration, development, and acquisition of crude oil and natural gas reserves, all costs attributable to these activities are capitalized. These capitalized costs, less accumulated amortization and related deferred income taxes, are subject to a ceiling test that limits the pooled costs to the aggregate of the discounted value of future net revenue attributable to proved natural gas and crude oil reserves using a discount rate defined by the SEC plus the lower of cost or market value of unevaluated properties. Any costs in excess of the ceiling are written off as a non-cash charge.

As a result of continued low commodity prices during the second quarter of 2012, we recorded a \$26.9 million non-cash impairment of oil and gas assets included in our Oil and Gas segment. In determining the ceiling value of our assets, we utilized the average of the quoted prices from the first day of each month from the previous 12 months. For natural gas, the average NYMEX price was \$3.15 per Mcf, adjusted to \$2.66 per Mcf at the wellhead; for crude oil, the average NYMEX price was \$95.67 per barrel, adjusted to \$85.36 per barrel at the wellhead.

(18) DISCONTINUED OPERATIONS

On February 29, 2012, we sold the outstanding stock of our Energy Marketing segment, Enserco. The transaction was completed through a stock purchase agreement and certain other ancillary agreements. Net cash proceeds on the date of the sale were approximately \$166.3 million, subject to final post-closing adjustments. The proceeds represent \$108.8 million received from the buyer and \$57.5 million cash retained from Enserco prior to closing.

Pursuant to the provisions of the Stock Purchase Agreement, the buyer requested purchase price adjustments totaling \$7.2 million. We contested this proposed adjustment and estimated the amount owed at \$1.3 million, which is accrued for in the accompanying financial statements. If we do not reach a negotiated agreement with the buyer regarding the purchase price adjustment, resolution would occur through the dispute resolution provision of the Stock Purchase Agreement.

The accompanying Condensed Consolidated Financial Statements have been classified to reflect Enserco as discontinued operations. For comparative purposes, all prior periods presented have been restated to reflect the classification.

Operating results of the Energy Marketing segment included in Income (loss) from discontinued operations, net of tax on the accompanying Condensed Consolidated Statements of Income and Comprehensive Income were as follows (in thousands):

			For the Six Mon		
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011	
Revenue	\$ —	\$12,476	\$(604)\$14,941

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We are an integrated energy company operating principally in the United States with two major business groups — Utilities and Non-regulated Energy. We report our business groups in the following financial segments:

Business Group Financial Segment

Utilities Electric Utilities

Gas Utilities

Non-regulated Energy* Oil and Gas

Power Generation Coal Mining

Our Utilities Group consists of our Electric and Gas Utilities segments. Our Electric Utilities segment generates, transmits and distributes electricity to approximately 201,500 customers in South Dakota, Wyoming, Colorado and Montana and includes the operations of Cheyenne Light and its approximately 34,800 natural gas customers in Wyoming. Our Gas Utilities serve approximately 528,800 natural gas customers in Colorado, Iowa, Kansas and Nebraska. Our Non-regulated Energy Group consists of our Oil and Gas, Power Generation and Coal Mining segments. Our Power Generation segment produces electric power from our generating plants and sells the electric capacity and energy principally to other utilities under long-term contracts. Our Coal Mining segment produces coal at our coal mine near Gillette, Wyoming and sells the coal primarily to on-site, mine-mouth power generation facilities. Our Oil and Gas segment principally engages in exploration, development and production of crude oil and natural gas, primarily in the Rocky Mountain region.

Certain industries in which we operate are highly seasonal, and revenue from, and certain expenses for, such operations may fluctuate significantly among quarterly periods. Demand for electricity and natural gas is sensitive to seasonal cooling, heating and industrial load requirements, as well as changes in market prices. In particular, the normal peak usage season for gas utilities is November through March, and significant earnings variances can be expected between the Gas Utilities segment's peak and off-peak seasons. Due to this seasonal nature, our results of operations for the three and six months ended June 30, 2012 and 2011, and our financial condition as of June 30, 2012, December 31, 2011, and June 30, 2011 are not necessarily indicative of the results of operations and financial condition to be expected as of or for any other period.

See Forward-Looking Information in the Liquidity and Capital Resources section of this Item 2, beginning on Page <u>62</u>.

The following business group and segment information does not include intercompany eliminations. Minor differences in amounts may result due to rounding. All amounts are presented on a pre-tax basis unless otherwise indicated. Information has been revised to remove information related to the operations of our Energy Marketing segment, now classified as discontinued operations, as a result of the sale of Enserco on February 29, 2012.

^{*}In February 2012, we sold the stock of Enserco, our Energy Marketing segment, through a stock purchase agreement to a third party buyer and therefore we now classify the segment as discontinued operations.

Results of Operations

Executive Summary, Significant Events and Overview

Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011. Loss from continuing operations for the three months ended June 30, 2012 was \$12.3 million, or \$0.28 per share, compared to Income from continuing operations of \$3.7 million, or \$0.09 per share, reported for the same period in 2011. The 2012 Loss from continuing operations included a \$10.1 million non-cash after-tax unrealized mark-to-market loss on certain interest rate swaps and a non-cash after-tax ceiling test impairment of \$17.3 million relating to our Oil and Gas segment. The 2011 Income from continuing operations included a \$5.1 million after-tax unrealized mark-to-market gain on the same interest rate swaps.

Net loss for the three months ended June 30, 2012 was \$13.5 million, or \$0.31 per share, compared to Net income of \$7.8 million, or \$0.19 per share, for the same period in 2011.

Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011. Income from continuing operations for the six months ended June 30, 2012 was \$22.9 million, or \$0.52 per share, compared to Income from continuing operations of \$32.8 million, or \$0.82 per share, reported for the same period in 2011. The 2012 Income from continuing operations included a \$2.3 million non-cash after-tax unrealized mark-to-market loss on certain interest rate swaps, a non-cash after-tax ceiling test impairment of \$17.3 million, and an after-tax write-off of \$1.0 million of deferred financing costs related to the previous Revolving Credit Facility. The 2011 Income from continuing operations included a \$1.5 million after-tax unrealized mark-to-market loss on the same interest rate swaps.

Net income for the six months ended June 30, 2012 was \$16.3 million, or \$0.37 per share, compared to \$34.7 million, or \$0.87 per share, for the same period in 2011.

Net income (loss) for 2012 includes a \$17.3 million non-cash after-tax ceiling test impairment. See Note 17 of the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

Business Group highlights for 2012 include:

Utilities Group

On June 18, 2012, the WPSC approved a stipulation and agreement for Cheyenne Light resulting in an annual revenue increase of \$2.7 million for electric customers and \$1.6 million for gas customers effective July 1, 2012. The settlement included a return on equity of 9.6% with a capital structure of 54% equity and 46% debt.

Year-to-date utility results were unfavorably impacted by warm weather, particularly at the Gas Utilities. During 2012, we experienced the warmest March on record for our jurisdictions. Heating degree days year-to-date were 17% and 22% lower than weighted average norms for our Electric and Gas Utilities, respectively. When compared to colder than normal weather during the same period in 2011, heating degree days were 24% and 26% lower than the same period in 2011 for our Electric Utilities and our Gas Utilities, respectively. The warm weather continued into the

Financial results of our Energy Marketing segment have been classified as discontinued operations. Certain indirect corporate costs and inter-segment expenses previously charged to our Energy Marketing segment are reclassified to continuing operations and are included in the Corporate segment. See Note 18 of the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

summer months, and cooling degree days quarter-to-date for our Electric Utilities were on average 109% greater than weighted average normal weather for the quarter ended June 30, 2012 and on average 81% higher than the same period in the prior year.

Colorado Electric's new \$230 million, 180 MW power plant near Pueblo, Colorado began commercial operations and started serving utility customers on January 1, 2012. New rates were effective January 1, 2012, providing an additional \$20.5 million in gross margins at Colorado Electric for the six months ended June 30, 2012.

On July 31, 2012, Cheyenne Light and Black Hills Power received approval from the WPSC for a CPCN authorizing the construction, operation and maintenance of a new \$237 million, 132 megawatt natural gas-fired electric generating facility and related gas and electric transmission in Cheyenne, Wyoming. On July 13, 2012, a Stipulation and Agreement among the joint applicants and the intervenor was filed with the WPSC including provisions for a construction work-in-progress rate rider. Use of the CWIP rider would allow a rate of return during construction, eliminating the usual allowance for funds used during construction, and reducing the total construction cost from \$237 million to \$222 million. The WPSC noted the Stipulation and Agreement in the CPCN hearing on July 31, 2012, without approving the CWIP rider and indicating its preference to consider the rider and total construction cost in a separate proceeding.

Colorado Electric is progressing on construction of a 29 MW wind turbine project as part of its plan to meet Colorado's Renewable Energy Standard. Colorado Electric's 50% share of this project will cost approximately \$26.5 million and the project is expected to begin serving Colorado Electric customers no later than December 31, 2012. Our 50% share of the total expenditures on the project was \$20.1 million as of June 30, 2012.

On April 13, 2012, the CPUC issued its final order denying Colorado Electric's request for a CPCN to construct a third utility-owned, 88 MW natural gas-fired turbine at the existing Pueblo Airport generating location. Colorado Electric retains the right under the Colorado Clean Air – Clean Jobs Act to own the 42 megawatts of replacement generation for the W.N. Clark plant that is required to be retired on or before December 13, 2013. Colorado Electric filed an electric resource plan on July 30, 2012 that proposed building a 40 MW, simple-cycle, gas-fired turbine as the alternative replacement resource for the W.N. Clark plant. We have not yet filed a CPCN requesting approval to construct this gas-fired facility.

Colorado Gas filed a request with the CPUC on June 4, 2012 for an increase in annual gas revenues of \$1.0 million to recover capital investments made in its gas system since January 2008.

Non-regulated Energy Group

Our Coal Mining segment received all necessary permits and approval for a revised mine plan which will relocate mining operations to an area in the mine with lower overburden, reducing overall mining costs for the next several years. The new mine plan went into effect during the second quarter of 2012.

In the second quarter of 2012, our Oil and Gas segment recorded a \$26.9 million non-cash ceiling test impairment loss as a result of continued low commodity prices.

Colorado IPP's new \$261 million, 200 MW power plant near Pueblo, Colorado began serving customers on January 1, 2012, with its output sold under a 20-year power purchase agreement to Colorado Electric.

Corporate

On June 24, 2012, we extended for one year our \$150 million term loan under favorable terms of 1.10% over LIBOR.

On February 1, 2012, we entered into a new \$500 million Revolving Credit Facility expiring February 1, 2017 at favorable terms. Deferred financing costs of \$1.5 million relating to the previous credit facility were written off during the first quarter of 2012.

We recognized a non-cash unrealized mark-to-market loss related to certain interest rate swaps of \$3.5 million for the six months ended June 30, 2012 compared to a \$2.4 million unrealized mark-to-market loss on these swaps for the same period in 2011.

Discontinued Operations

On February 29, 2012, we sold the outstanding stock of our Energy Marketing segment, Enserco. The transaction was completed through a stock purchase agreement and certain other ancillary agreements. Net cash proceeds on the date of the sale were approximately \$166.3 million, subject to final post-closing adjustments.

Pursuant to the provisions of the Stock Purchase Agreement, the buyer requested purchase price adjustments totaling \$7.2 million. We contested this proposed adjustment and estimated the amount owed at \$1.3 million, which is accrued for in the accompanying financial statements. If we do not reach a negotiated agreement with the buyer regarding the purchase price adjustment, resolution would occur through the dispute resolution provision of the Stock Purchase Agreement.

Utilities Group

We report two segments within the Utilities Group: Electric Utilities and Gas Utilities. The Electric Utilities segment includes the electric operations of Black Hills Power, Colorado Electric and the electric and natural gas operations of Cheyenne Light. The Gas Utilities segment includes the regulated natural gas utility operations of Black Hills Energy in Colorado, Iowa, Kansas and Nebraska.

Off-system sales revenue during 2011 was deferred until a sharing mechanism was approved by the CPUC in December 2011, and recognition of 25% of the revenue commenced January 2, 2012. As a result, Colorado Electric deferred \$3.5 million and \$6.4 million in off-system revenue during the three and six months ended June 30, 2011.

Results of Operations for the Electric Utilities for the Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011: Income from continuing operations for the Electric Utilities was \$14.2 million for the three months ended June 30, 2012 compared to \$8.6 million for the three months ended June 30, 2011 as a result of:

Gross margin increased primarily due to a \$10.9 million increase related to rate adjustments that include a return on significant capital investments at Colorado Electric, increased retail margins of \$2.5 million on higher quantities sold driven by warmer weather, an increase of \$1.8 million from wholesale and transmission margins as a result of increased pricing, and a \$0.5 million increase from an Environmental Improvement Cost Recovery Adjustment rider at Black Hills Power.

Operations and maintenance increased primarily due to operating the new generating facility in Pueblo, Colorado and associated increased corporate allocations, and an increase in major maintenance costs from our generating facilities.

Depreciation and amortization increased primarily due to a higher asset base associated with the 180 MW generating facility constructed in Pueblo, Colorado and the capital lease assets associated with the 200 MW generating facility providing capacity and energy from Colorado IPP.

Interest expense, net increased primarily due to interest associated with the financing of the Pueblo generating facility completed in December 2011.

Other income (expense), net was comparable to the same period in the prior year.

Income tax benefit (expense): The effective tax rate was comparable to the same period in the prior year.

Results of Operations for the Electric Utilities for the Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011: Income from continuing operations for the Electric Utilities was \$22.9 million for the six months ended June 30, 2012 compared to \$18.9 million for the six months ended June 30, 2011 as a result of:

Gross margin increased primarily due to a \$20.4 million increase related to rate adjustments that include a return on significant capital investments at Colorado Electric, a \$2.7 million increase from wholesale and transmission margins from increased pricing, a \$0.6 million increase in off-system sales mainly from higher volumes, a \$1.2 million increase from an Environmental Improvement Cost Recovery Adjustment rider at Black Hills Power and increased retail margins as a result of a higher quantities sold driven by warmer weather.

Operations and maintenance increased primarily due to costs associated with operating the new generating facility in Pueblo, Colorado and associated increased corporate allocations.

Depreciation and amortization increased primarily due to a higher asset base associated with the 180 MW generating facility constructed in Pueblo, Colorado and the capital lease assets associated with the 200 MW generating facility providing capacity and energy from Colorado IPP.

Interest expense, net increased primarily due to interest associated with financing of the Pueblo generating facility completed in December 2011.

Other income (expense), net was comparable to the same period in the prior year.

Income tax benefit (expense): The effective tax rate increased due to unfavorable state income tax true-up adjustments and the impact of research and development credits not being renewed.

Our Gas Utilities are highly seasonal, and sales volumes vary considerably with weather and seasonal heating and industrial loads. Over 70% of our Gas Utilities' revenue and margins are expected in the first and fourth quarters of each year. Therefore, revenue for and certain expenses of these operations fluctuate significantly among quarters. Depending upon the state in which our Gas Utilities operate, the winter heating season begins around November 1 and ends around March 31.

Results of Operations for the Gas Utilities for the Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011: Income from continuing operations for the Gas Utilities was \$1.2 million for the three months ended June 30, 2012 compared to Income from continuing operations of \$4.4 million for the three months ended June 30, 2011 as a result of:

Gross margin decreased primarily due to a \$2.0 million impact from milder weather compared to the same period in the prior year. Heating degree days were 33% lower for the three months ended June 30, 2012 compared to the same period in the prior year and 31% lower than normal. A reclassification accounting adjustment was made in the current year recording \$1.3 million against gross margin that in prior year is included in operations and maintenance.

Operations and maintenance is comparable to the prior year reflecting that the same period in the prior year included a favorable property tax true up adjustment of \$0.8 million offset by a reclassification accounting adjustment that was made in the current year recording \$1.3 million of operating costs in gross margin.

Depreciation and amortization was comparable to the same period in the prior year.

Interest expense, net decreased primarily due to lower interest rates.

Colorado

Nebraska

Kansas (a)

Combined (b)

Iowa

Other income (expense), net was comparable to the same period in the prior year.

Income tax benefit (expense): The effective tax rate decreased as a result of a favorable true-up adjustment that had a more pronounced impact due to significantly lower pre-tax net income when compared to 2011. Prior year also realized a favorable true up adjustment, but its impact on the effective tax rate was less pronounced due to significantly higher pre-tax net income when compared to 2012.

Results of Operations for the Gas Utilities for the Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011: Income from continuing operations for the Gas Utilities was \$16.4 million for the six months ended June 30, 2012 compared to Income from continuing operations of \$23.7 million for the six months ended June 30, 2011 as a result of:

Gross margin decreased primarily due to a \$9.3 million impact from milder weather compared to the same period in the prior year. Heating degree days were 28% lower for the six months ended June 30, 2012 compared to the same period in the prior year and 22% lower than normal. A reclassification accounting adjustment was made in the current year recording \$4.0 million against gross margin that in prior year is included in operations and maintenance.

Operations and maintenance decreased primarily due to lower bad debt costs and cost efficiencies and a reclassification accounting adjustment that was made in the current year recording \$4.0 million of operating costs in gross margin.

Depreciation and amortization was comparable to the same period in the prior year.

Interest expense, net decreased primarily due to lower interest rates.

Other income (expense), net was comparable to the same period in the prior year.

Income tax benefit (expense): The effective tax rate increased as a result of an unfavorable state true-up adjustment. Additionally, the 2011 period was favorably impacted as a result of federal income tax related research and development credits and a flow-through tax adjustment involving Iowa Gas.
