Securities are written down to fair value when a decline in fair value is not considered temporary. In estimating other-than-temporary losses, management considers many factors, including: (1) the length of time and the extent to

which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the Company has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The Company doesn't intend to sell or expect to be required to sell these securities, and the decline in fair value is largely due to changes in market interest rates, therefore, the Company does not consider these securities to be other-than-temporarily impaired. All mortgage-backed securities in the Company's portfolio are guaranteed by government sponsored entities, are investment grade, and are performing as expected.

The Company held a minority interest in American Community Bancorp, Inc., prior to the acquisition on January 1, 2011 (see Note 9 for further discussion). For the nine months ended September 30, 2011, the Company recognized a gain of \$1.045 million on the stock held of American Community Bancorp, Inc. as a result of the acquisition. No gains or losses were recognized during the three months ended September 30, 2011. No gains or losses were recognized during the quarter or nine months ended September 30, 2010.
