

SIERRA BANCORP
Form 10-K
March 12, 2015

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d)

of the Securities Exchange Act of 1934

For the fiscal year ended December 31, 2014

Commission file number: 000-33063

SIERRA BANCORP

(Exact name of registrant as specified in its charter)

California **33-0937517**
(State of incorporation) (I.R.S. Employer Identification No.)

86 North Main Street, Porterville, California 93257
(Address of principal executive offices) (Zip Code)

(559) 782-4900

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, No Par Value	The NASDAQ Stock Market LLC (NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements

Edgar Filing: SIERRA BANCORP - Form 10-K

incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer " Accelerated filer
Non-accelerated filer " (Do not check if a smaller reporting company) Smaller reporting company "

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

" Yes No

As of June 30, 2014, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the voting stock held by non-affiliates of the registrant was approximately \$190 million, based on the closing price reported to the registrant on that date of \$15.80 per share. Shares of Common Stock held by each officer and director and each person or control group owning more than ten percent of the outstanding Common Stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of shares of common stock of the registrant outstanding as of February 27, 2015 was 13,676,849.

Documents Incorporated by Reference: Portions of the definitive proxy statement for the 2015 Annual Meeting of Shareholders to be filed with the Securities and Exchange Commission pursuant to SEC Regulation 14A are incorporated by reference in Part III, Items 10-14.

Item 1. Business

General

The Company

Sierra Bancorp (the “Company”) is a California corporation headquartered in Porterville, California, and is a registered bank holding company under federal banking laws. The Company was formed to serve as the holding company for Bank of the Sierra (the “Bank”), and has been the Bank’s sole shareholder since August 2001. The Company exists primarily for the purpose of holding the stock of the Bank and of such other subsidiaries it may acquire or establish. At the present time, the Company’s only other direct subsidiaries are Sierra Statutory Trust II and Sierra Capital Trust III, which were formed in March 2004 and June 2006, respectively, solely to facilitate the issuance of capital trust pass-through securities (“TRUPS”). Pursuant to the Financial Accounting Standards Board’s guidance on the consolidation of variable interest entities, these trusts are not reflected on a consolidated basis in the financial statements of the Company. References herein to the “Company” include Sierra Bancorp and its consolidated subsidiary, the Bank, unless the context indicates otherwise. At December 31, 2014, the Company had consolidated assets of \$1.637 billion, gross loans of \$971 million, deposits of \$1.367 billion and shareholders’ equity of \$187 million. The Company’s liabilities include \$31 million in debt obligations due to Sierra Statutory Trust II and Sierra Capital Trust III, related to TRUPS issued by those entities.

The Bank

The Bank is a California state-chartered bank headquartered in Porterville, California, which opened for business in January 1978 and has since become the largest independent bank headquartered in the South San Joaquin Valley. We offer a full range of retail and commercial banking services primarily in Tulare, Kern, Fresno, and Kings Counties in Central California, and, in Southern California, in the rich agricultural corridor stretching from Santa Paula to Santa Clarita. The Bank’s growth has primarily been organic, but includes two acquisitions: Sierra National Bank in 2000, and Santa Clara Valley Bank (“SCVB”) in 2014. See the following section, Recent Developments, for details on the SCVB acquisition.

Our chief products and services are related to the business of lending money and accepting deposits. The Bank’s lending activities include real estate, commercial (including small business), mortgage warehousing, agricultural, and

consumer loans. The bulk of our real estate loans are secured by commercial, professional office, and agricultural properties which are predominantly owner occupied, and we also offer a complete line of construction loans for residential and commercial development, permanent mortgage loans, land acquisition and development loans, and multifamily credit facilities. Secondary market services for residential mortgage loans are provided through the Bank's affiliations with Freddie Mac, Fannie Mae and certain non-governmental institutions. As of December 31, 2014, the percentage of our total loan and lease portfolio for each of the principal types of credit we extend was as follows: (i) loans secured by real estate (72.6%); (ii) agricultural production loans (2.9%); (iii) commercial and industrial loans and leases (including SBA loans and direct finance leases) (11.7%); (iv) mortgage warehouse loans (10.9%); and (v) consumer loans (1.9%). Interest, fees, and other income on real-estate secured loans, which is by far the largest segment of our portfolio, totaled \$33.5 million, or 49% of net interest plus other income in 2014, and \$31.2 million, or 48% of net interest plus other income in 2013.

In addition to loans, we offer a wide range of deposit products for individuals and businesses including checking accounts, savings accounts, money market demand accounts, time deposits, retirement accounts, and sweep accounts. The Bank's deposit accounts are insured by the Federal Deposit Insurance Corporation (the "FDIC") up to maximum insurable amounts. We have also been in the Certificate of Deposit Account Registry Service ("CDARS") network since its inception, and through CDARS are able to offer full FDIC insurance coverage on multi-million dollar deposits up to specified limits. We attract deposits throughout our market area with direct-mail campaigns, a customer-oriented product mix, competitive pricing, convenient locations, drive-through banking, and a multitude of alternative delivery channels, and we strive to retain our deposit customers by providing a consistently high level of service. At December 31, 2014 we had 99,200 deposit accounts totaling \$1.367 billion, compared to 95,700 deposit accounts totaling \$1.174 billion at December 31, 2013.

We currently operate 28 full service branch offices throughout our geographic footprint, including the three branches that were added in November 2014 via the acquisition of Santa Clara Valley Bank. The Bank has received regulatory approval for another branch in Bakersfield, California, which is expected to commence operations in the latter part of 2015. The locations of the Bank’s current offices are as follows:

Porterville:	Administrative Headquarters Main Office	West Olive Branch	
	86 North Main Street	90 North Main Street	1498 West Olive Avenue

In addition to our full-service branches the Bank has specialized lending units which include a real estate industries center, an agricultural credit center, and an SBA lending unit. We also have ATMs at all branch locations and offsite ATMs at six different non-branch locations. Furthermore, the Bank is a member of the Allpoint network, which provides our customers with surcharge-free access to over 43,000 ATMs across the nation and another 12,000 ATMs in foreign countries, and our customers have access to electronic point-of-sale payment alternatives nationwide via the Pulse EFT network. To ensure that account access preferences are addressed for all customers, we provide the following options: an internet branch which provides the ability to open deposit accounts online; an online banking option with bill-pay and mobile banking capabilities, including mobile check deposit; a customer service center that is accessible by toll-free telephone during business hours; and an automated telephone banking system that is usually accessible 24 hours a day, seven days a week. We offer a multitude of other banking products and services to complement and support our lending and deposit products, including remote deposit capture and automated payroll services for business customers.

We have not engaged in any material research activities related to the development of new products or services during the last two fiscal years. However, our officers and employees are continually searching for ways to increase public convenience, enhance customer access to payment systems, and enable us to improve our competitive position. The cost to the Bank for these development, operations, and marketing activities cannot be calculated with any degree of certainty. We hold no patents or licenses (other than licenses required by appropriate bank regulatory agencies), franchises, or concessions. Our business has a modest seasonal component due to the heavy agricultural orientation of the Central Valley, but as our branches in more metropolitan areas have expanded we have become less reliant on the agriculture-related base. We are not dependent on a single customer or group of related customers for a material portion of our core deposits, but for loans we do have what could be considered to be industry concentrations in loans to the dairy industry (10% of total loans), and to mortgage companies in the form of mortgage warehouse loans (11% of total loans). Our efforts to comply with government and regulatory mandates on consumer protection and privacy, anti-terrorism, and other initiatives have resulted in significant ongoing expense to the Bank, including staffing additions and costs associated with compliance-related software. However, as far as can be determined there has been no material effect upon our capital expenditures, earnings, or competitive position as a result of environmental regulation at the Federal, state, or local level.

Recent Developments

In July 2014 the Bank entered into a definitive agreement to acquire Santa Clara Valley Bank, a community bank with branches in Santa Paula, Santa Clarita, and Fillmore, California. Subsequent to the receipt of requisite regulatory and shareholder approvals, the deal closed on November 14, 2014. As part of the transaction, cash consideration of \$12.3 million, or \$6.00 per share, was paid to SCVB common shareholders, and \$3.0 million was paid to SCVB preferred shareholders to retire outstanding preferred stock and associated warrants. One-time acquisition costs added \$2.1 million to the Company's pre-tax non-interest expense in 2014. The SCVB acquisition contributed approximately \$62 million to the Company's outstanding loan balances, \$44 million to investment securities, and \$108 million to total deposits.

Recent Accounting Pronouncements

Information on recent accounting pronouncements is contained in Note 2 to the consolidated financial statements.

Competition

The banking business in California in general, and specifically in many of our market areas, is highly competitive. The industry continues to consolidate, particularly with the relatively large number of FDIC-assisted takeovers of failed banks and other acquisitions of troubled banks in recent years. There are also many unregulated companies competing for business in our markets with financial products targeted at profitable customer segments. Many of those companies are able to compete across geographic boundaries and provide meaningful alternatives to significant banking products and services. These competitive trends are likely to continue.

With respect to commercial bank competitors, the business is dominated by a relatively small number of major banks that operate a large number of offices within our geographic footprint. Based on June 30, 2014 FDIC market share data for the 20 cities within which the Company maintains branches, the largest portion of deposits belongs to Wells Fargo Bank with 23.6% of total combined deposits, followed by Bank of America (16.2%), JPMorgan Chase (7.3%), and Union Bank (6.8%). Bank of the Sierra, including SCVB branches, ranks fifth on the 2014 market share list with 5.8% of total deposits. In Tulare County, however, where the Bank was originally formed, we rank first for deposit market share with 18.2% of total deposits and have the largest number of branch locations (12, including our online branch). The larger banks noted above have, among other advantages, the ability to finance wide-ranging advertising campaigns and to allocate their resources to regions of highest yield and demand. They can also offer certain services that we do not provide directly but may offer indirectly through correspondent institutions, and by virtue of their greater capitalization those banks have legal lending limits that are substantially higher than ours. For loan customers whose needs exceed our legal lending limits, we typically arrange for the sale, or participation, of some of the balances to financial institutions that are not within our geographic footprint.

In addition to other banks, our competitors include savings institutions, credit unions, and numerous non-banking institutions such as finance companies, leasing companies, insurance companies, brokerage firms, asset management groups, mortgage banking firms and internet-based companies. Technological innovations have lowered traditional barriers of entry and enabled many of these companies to offer services that previously were considered traditional banking products, and we have witnessed increased competition from companies that circumvent the banking system by facilitating payments via the internet, wireless devices, prepaid cards, and other means.

Strong competition for deposits and loans among financial institutions and non-banks alike affects interest rates and other terms on which financial products are offered to customers. Mergers between financial institutions have created additional pressures within the industry to remain competitive by streamlining operations, reducing expenses, and increasing revenues. Competition is also impacted by federal and state interstate banking laws which permit banking organizations to expand into other states. The relatively large California market has been particularly attractive to out-of-state institutions. Competitive conditions were further intensified in the year 2000 by the enactment of the Financial Modernization Act, which made it possible for full affiliations to occur between banks and securities firms, insurance companies, and other financial companies.

For years we have countered rising competition by offering a broad array of products with flexibility in structure and terms that cannot always be matched by our competitors. We also offer our customers community-oriented, personalized service, and rely on local promotional activity and personal contact by our employees. As noted above, layered onto our traditional personal-contact banking philosophy are technology-driven initiatives that improve customer access and convenience.

Employees

As of December 31, 2014 the Company had 349 full-time and 88 part-time employees. On a full-time equivalent basis staffing stood at 420 at December 31, 2014, up from 389 at December 31, 2013 due primarily to the acquisition of Santa Clara Valley Bank.

Regulation and Supervision

Banks and bank holding companies are heavily regulated by federal and state laws and regulations. Most banking regulations are intended primarily for the protection of depositors and the deposit insurance fund and not for the benefit of shareholders. The following is a summary of certain statutes, regulations and regulatory guidance affecting the Company and the Bank. This summary is not intended to be a complete explanation of such statutes, regulations and guidance, all of which are subject to change in the future, nor does it fully address their effects and potential effects on the Company and the Bank.

Regulation of the Company Generally

The Company is a legal entity separate and distinct from the Bank and its other subsidiaries. As a bank holding company, the Company is regulated under the Bank Holding Company Act of 1956 (the “BHC Act”), and is subject to supervision, regulation and inspection by the Federal Reserve Board. The Company is also under the jurisdiction of the SEC and is subject to the disclosure and regulatory requirements of the Securities Act of 1933 and the Securities Exchange Act of 1934, each administered by the SEC. The Company’s common stock is listed on the NASDAQ Global Select market (“NASDAQ”) under the trading symbol “BSRR” and the Company is, therefore, subject to the rules of NASDAQ for listed companies.

The Company is a bank holding company within the meaning of the BHC Act and is registered as such with the Federal Reserve Board. A bank holding company is required to file annual reports and other information with the Federal Reserve regarding its business operations and those of its subsidiaries. In general, the BHC Act limits the business of bank holding companies to banking, managing or controlling banks and other activities that the Federal Reserve has determined to be so closely related to banking as to be a proper incident thereto, including securities brokerage services, investment advisory services, fiduciary services, and management advisory and data processing services, among others. A bank holding company that also qualifies as and elects to become a “financial holding company” may engage in a broader range of activities that are financial in nature or complementary to a financial activity (as determined by the Federal Reserve or Treasury regulations), such as securities underwriting and dealing, insurance underwriting and agency, and making merchant banking investments. The Company has not elected to become a financial holding company but may do so at some point in the future if deemed appropriate in view of opportunities or circumstances at the time.

The BHC Act requires the prior approval of the FRB for the direct or indirect acquisition of more than five percent of the voting shares of a commercial bank or its parent holding company. Acquisitions by the Bank are subject instead to the Bank Merger Act, which requires the prior approval of an acquiring bank’s primary federal regulator for any merger with or acquisition of another bank.

The Company and the Bank are deemed to be “affiliates” of each other and thus are subject to Sections 23A and 23B of the Federal Reserve Act as well as related Federal Reserve Regulation W which impose both quantitative and qualitative restrictions and limitations on transactions between affiliates. The Bank is also subject to laws and regulations requiring that all loans and extensions of credit to our executive officers, directors, principal shareholders and related parties must, among other things, be made on substantially the same terms and follow credit underwriting procedures no less stringent than those prevailing at the time for comparable transactions with persons not related to the Bank.

Under certain conditions, the Federal Reserve has the authority to restrict the payment of cash dividends by a bank holding company as an unsafe and unsound banking practice, and may require a bank holding company to obtain the

prior approval of the Federal Reserve prior to purchasing or redeeming its own equity securities, unless certain conditions are met. The Federal Reserve also has the authority to regulate the debt of bank holding companies.

A bank holding company is required to act as a source of financial and managerial strength for its subsidiary banks and must commit resources as necessary to support such subsidiaries. In this connection, the Federal Reserve may require a bank holding company to contribute additional capital to an undercapitalized subsidiary bank and may disapprove of the payment of dividends to the shareholders if the Federal Reserve Board believes the payment of such dividends would be an unsafe or unsound practice.

Regulation of the Bank Generally

As a state chartered bank, the Bank is subject to broad federal regulation and oversight extending to all its operations by the FDIC and to state regulation by the California Department of Business Oversight (the “DBO”). The Bank is also subject to certain regulations of the Federal Reserve Board.

Capital Adequacy Requirements

The Company and the Bank are subject to the regulations of the Federal Reserve Board and the FDIC, respectively, governing capital adequacy. These agencies have adopted risk-based capital guidelines to provide a systematic analytical framework which makes regulatory capital requirements sensitive to differences in risk profiles among banking organizations, considers off-balance sheet exposures in evaluating capital adequacy, and minimizes disincentives to holding liquid, low-risk assets. Capital levels, as measured by these standards, are also used to categorize financial institutions for purposes of certain prompt corrective action regulatory provisions.

Prior to January 1, 2015, the guidelines included a minimum required ratio of qualifying Tier 1 plus Tier 2 capital to total risk weighted assets of 8% (“Total Risk-Based Capital Ratio”), and a minimum required ratio of Tier 1 capital to total risk weighted assets of 4% (“Tier 1 Risk-Based Capital Ratio”). The guidelines also provided for a minimum ratio of Tier 1 capital to average assets, or “leverage ratio,” of 3% for institutions having the highest regulatory rating, and 4% for all other institutions. Tier 1 capital is generally defined as the sum of core capital elements, less goodwill and other intangible assets, accumulated other comprehensive income, disallowed deferred tax assets, and certain other deductions. The following items are defined as core capital elements: (i) common shareholders’ equity; (ii) qualifying non-cumulative perpetual preferred stock and related surplus (and, in the case of holding companies, senior perpetual preferred stock issued to the U.S. Treasury Department pursuant to the Troubled Asset Relief Program); (iii) minority interests in the equity accounts of consolidated subsidiaries; and (iv) “restricted” core capital elements (which include qualifying trust preferred securities) up to 25% of all core capital elements. Tier 2 capital includes the following supplemental capital elements: (i) allowance for loan and lease losses (but not more than 1.25% of an institution’s risk-weighted assets); (ii) perpetual preferred stock and related surplus not qualifying as core capital; (iii) hybrid capital instruments, perpetual debt and mandatory convertible debt instruments; and, (iv) term subordinated debt and intermediate-term preferred stock and related surplus. The maximum amount of Tier 2 capital is capped at 100% of Tier 1 capital.

As of December 31, 2014 and 2013, the Bank’s and the consolidated Company’s regulatory capital ratios all far exceeded regulatory requirements. See Part II, Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operation – Capital Resources.

In July 2013, the Federal Reserve and other federal banking agencies approved final rules implementing the Basel Committee on Banking Supervision’s capital guidelines for all U.S. banks and bank holding companies with greater than \$500 million in assets. Under these final rules, minimum requirements for both the quantity and quality of capital held by the Company and the Bank increased effective January 1, 2015. The rules include a new common equity Tier 1 capital ratio of 4.5%, a minimum Tier 1 capital ratio of 6.0%, a total capital ratio of 8.0%, and a minimum leverage ratio of 4.0%. The final rules also require a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets which is in addition to the other minimum risk-based capital standards in the rule. The capital buffer requirement will be phased in over three years beginning in 2016, and will effectively raise the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5%, and the total capital ratio to 10.5% on a fully phased-in basis. Institutions that do not maintain the required capital buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in dividends or used for stock repurchases, and on the payment of discretionary bonuses to executive management.

The final rules also increase the required capital for certain categories of assets, including higher-risk construction real estate loans, certain past-due or nonaccrual loans, and certain exposures related to securitizations. The final rules adopt the same risk weightings for residential mortgages that existed under previous risk-based capital rules. Similarly, the final rules permanently grandfather non-qualifying capital instruments (such as trust preferred securities and cumulative perpetual preferred stock) issued before May 19, 2010 for inclusion in the Tier 1 capital of banking organizations with total consolidated assets of less than \$15 billion at December 31, 2009, subject to a limit of 25% of Tier 1 capital. As all of the Company’s trust preferred securities were issued prior to that date, they will continue to qualify as Tier 1 capital under the new rules.

These new minimum capital ratios became effective for us on January 1, 2015, and the capital buffers will be fully phased in by January 1, 2019. Based on existing capital levels at December 31, 2014, the Company and the Bank meet all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis.

For more information on the Company's capital, see Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation – Capital Resources. Risk-based capital ratio requirements are discussed in greater detail in the following section.

Prompt Corrective Action Provisions

Federal law requires each federal banking agency to take prompt corrective action to resolve the problems of insured financial institutions, including but not limited to those that fall below one or more prescribed minimum capital ratios. The federal banking agencies have by regulation defined the following five capital categories: “well capitalized” (Total Risk-Based Capital Ratio of 10%; Tier 1 Risk-Based Capital Ratio of 6%; and Leverage Ratio of 5%); “adequately capitalized” (Total Risk-Based Capital Ratio of 8%; Tier 1 Risk-Based Capital Ratio of 4%; and Leverage Ratio of 4%, or 3% if the institution receives the highest rating from its primary regulator); “undercapitalized” (Total Risk-Based Capital Ratio of less than 8%; Tier 1 Risk-Based Capital Ratio of less than 4%; or Leverage Ratio of less than 4%, or 3% if the institution receives the highest rating from its primary regulator); “significantly undercapitalized” (Total Risk-Based Capital Ratio of less than 6%; Tier 1 Risk-Based Capital Ratio of less than 3%; or Leverage Ratio less than 3%); and “critically undercapitalized” (tangible equity to total assets less than 2%). A bank may be treated as though it were in the next lower capital category if, after notice and the opportunity for a hearing, the appropriate federal agency finds an unsafe or unsound condition or practice so warrants, but no bank may be treated as “critically undercapitalized” unless its actual capital ratio warrants such treatment. As of December 31, 2014 and 2013, both the Company and the Bank were deemed to be well capitalized for regulatory capital purposes.

At each successively lower capital category, an insured bank is subject to increased restrictions on its operations. For example, a bank is generally prohibited from paying management fees to any controlling persons or from making capital distributions if to do so would make the bank “undercapitalized.” Asset growth and branching restrictions apply to undercapitalized banks, which are required to submit written capital restoration plans meeting specified requirements (including a guarantee by the parent holding company, if any). “Significantly undercapitalized” banks are subject to broad regulatory authority, including among other things capital directives, forced mergers, restrictions on the rates of interest they may pay on deposits, restrictions on asset growth and activities, and prohibitions on paying bonuses or increasing compensation to senior executive officers without FDIC approval. Even more severe restrictions apply to “critically undercapitalized” banks. Most importantly, except under limited circumstances, not later than 90 days after an insured bank becomes critically undercapitalized the appropriate federal banking agency is required to appoint a conservator or receiver for the bank.

In addition to measures taken under the prompt corrective action provisions, insured banks may be subject to potential actions by the federal regulators for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation or any condition imposed in writing by the agency or any written agreement with the agency. Enforcement actions may include the issuance of cease and desist orders, termination of insurance of deposits (in the case of a bank), the imposition of civil money penalties, the issuance of directives to increase capital, formal and informal agreements, or removal and prohibition orders against “institution-affiliated” parties.

Safety and Soundness Standards

The federal banking agencies have also adopted guidelines establishing safety and soundness standards for all insured depository institutions. Those guidelines relate to internal controls, information systems, internal audit systems, loan underwriting and documentation, compensation, and liquidity and interest rate exposure. In general, the standards are designed to assist the federal banking agencies in identifying and addressing problems at insured depository institutions before capital becomes impaired. If an institution fails to meet the requisite standards, the appropriate federal banking agency may require the institution to submit a compliance plan and could institute enforcement proceedings if an acceptable compliance plan is not submitted or adhered to.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

The implementation and impact of legislation and regulations enacted since 2008 in response to the U.S. economic downturn and financial industry instability continued in 2013 and 2014 as modest recovery returned to many institutions in the banking sector. Certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank”), which was enacted in 2010, are now effective and have been fully implemented, including revisions in the deposit insurance assessment base for FDIC insurance and a permanent increase in coverage to \$250,000; the permissibility of paying interest on business checking accounts; the removal of barriers to interstate branching and required disclosure and shareholder advisory votes on executive compensation. Action in 2013 to implement the final Dodd-Frank provisions included (i) final new capital rules, (ii) a final rule to implement the so called Volcker rule restrictions on certain proprietary trading and investment activities and (iii) final rules and increased enforcement action by the Consumer Finance Protection Bureau (discussed further below in connection with consumer protection).

Many aspects of Dodd-Frank are still subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company, its customers or the financial services industry more generally. However, certain provisions of Dodd-Frank will significantly impact, or already are affecting, our operations and expenses, including but not limited to changes in FDIC assessments, the permitted payment of interest on demand deposits, and enhanced compliance requirements. Some of the rules and regulations promulgated or yet to be promulgated under Dodd-Frank will apply directly only to institutions much larger than ours, but could indirectly impact smaller banks, either due to competitive influences or because certain required practices for larger institutions may subsequently become expected “best practices” for smaller institutions. We expect that we may need to devote even more management attention and resources to evaluate and make any changes necessary to comply with statutory and regulatory requirements under Dodd-Frank.

Deposit Insurance

The Bank’s deposits are insured up to maximum applicable limits under the Federal Deposit Insurance Act, and the Bank is subject to deposit insurance assessments to maintain the FDIC’s Deposit Insurance Fund (the “DIF”). In October 2010, the FDIC adopted a revised restoration plan to ensure that the DIF’s designated reserve ratio (“DRR”) reaches 1.35% of insured deposits by September 30, 2020, the deadline mandated by the Dodd-Frank Act. However, financial institutions like Bank of the Sierra with assets of less than \$10 billion are exempted from the cost of this increase. Furthermore, the restoration plan proposed an increase in the DRR to 2% of estimated insured deposits as a long-term goal for the fund. The FDIC also proposed future assessment rate reductions in lieu of dividends, when the DRR reaches 1.5% or greater.

As noted above, the Dodd-Frank Act provided for a permanent increase in FDIC deposit insurance per depositor from \$100,000 to \$250,000 retroactive to January 1, 2008. Furthermore, the FDIC redefined its deposit insurance premium assessment base from an institution’s total domestic deposits to its total assets less tangible equity, effective in the second quarter of 2011. The changes to the assessment base necessitated changes to assessment rates, which became effective April 1, 2011. The revised assessment rates are lower than prior rates but the assessment base is larger, so approximately the same amount of assessment revenue is being collected by the FDIC. We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures or if the FDIC otherwise determines, we may be required to pay even higher FDIC premiums, which may have a material adverse effect on our earnings and could have a material adverse effect on the value of, or market for, our common stock.

In addition to DIF assessments, banks must pay quarterly assessments that are applied to the retirement of Financing Corporation bonds issued in the 1980’s to assist in the recovery of the savings and loan industry. The assessment amount fluctuates, but was 0.62 basis points of insured deposits for the fourth quarter of 2014. Those assessments will continue until the Financing Corporation bonds mature in 2019.

Community Reinvestment Act

The Bank is subject to certain requirements and reporting obligations involving Community Reinvestment Act (“CRA”) activities. The CRA generally requires federal banking agencies to evaluate the record of a financial institution in meeting the credit needs of its local communities, including low and moderate income neighborhoods. The CRA further requires the agencies to consider a financial institution’s efforts in meeting its community credit needs when evaluating applications for, among other things, domestic branches, mergers or acquisitions, or the formation of holding companies. In measuring a bank’s compliance with its CRA obligations, the regulators utilize a performance-based evaluation system under which CRA ratings are determined by the bank’s actual lending, service, and investment performance, rather than on the extent to which the institution conducts needs assessments, documents community outreach activities or complies with other procedural requirements. In connection with its assessment of CRA performance, the FDIC assigns a rating of “outstanding,” “satisfactory,” “needs to improve” or “substantial noncompliance.” The Bank most recently received a “satisfactory” CRA assessment rating in August 2013.

Privacy and Data Security

The Gramm-Leach-Bliley Act, also known as the Financial Modernization Act of 1999 (the “Financial Modernization Act”), imposed requirements on financial institutions with respect to consumer privacy. Financial institutions, however, are required to comply with state law if it is more protective of consumer privacy than the Financial Modernization Act. The Financial Modernization Act generally prohibits disclosure of consumer information to non-affiliated third parties unless the consumer has been given the opportunity to object and has not objected to such disclosure. The statute also directed federal regulators, including the Federal Reserve and the FDIC, to establish standards for the security of consumer information, and requires financial institutions to disclose their privacy policies to consumers annually.

Overdrafts

The Electronic Funds Transfer Act, as implemented by the Federal Reserve’s Regulation E, governs transfers initiated through automated teller machines (“ATMs”), point-of-sale terminals, and other electronic banking services. Regulation E prohibits financial institutions from assessing an overdraft fee for paying ATM and one-time point-of-sale debit card transactions, unless the customer affirmatively opts in to the overdraft service for those types of transactions. The opt-in provision establishes requirements for clear disclosure of fees and terms of overdraft services for ATM and one-time debit card transactions. The rule does not apply to other types of transactions, such as check, automated clearinghouse (“ACH”) and recurring debit card transactions. Additionally, in November 2010, the FDIC issued its Overdraft Guidance on automated overdraft service programs to ensure that a bank mitigates the risks associated with offering automated overdraft payment programs and complies with all consumer protection laws and regulations. The procedural changes and fee adjustments necessitated by those regulatory changes resulted in lower overdraft income for the Company, and could further adversely impact non-interest income in the future.

Consumer Financial Protection and Financial Privacy

Dodd-Frank created the Consumer Finance Protection Bureau (the “CFPB”) as an independent entity with broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards. The CFPB’s functions include investigating consumer complaints, conducting market research, rulemaking, supervising and examining bank consumer transactions, and enforcing rules related to consumer financial products and services. CFPB regulations and guidance apply to all financial institutions, including the Bank, although only banks with \$10 billion or more in assets are subject to examination by the CFPB. Banks with less than \$10 billion in assets, including the Bank, will continue to be examined for compliance by their primary federal banking agency.

In January 2013, the CFPB issued final regulations governing primarily consumer mortgage lending. One rule imposes additional requirements on lenders, including rules designed to require lenders to ensure borrowers' ability to repay their mortgages. The CFPB also finalized a rule on escrow accounts for higher priced mortgage loans and a rule expanding the scope of the high-cost mortgage provision in the Truth in Lending Act. The CFPB also issued final rules implementing provisions of the Dodd-Frank Act that relate to mortgage servicing. In November 2013, the CFPB issued a final rule on integrated mortgage disclosures under the Truth in Lending Act and the Real Estate Settlement Procedures Act, compliance with which is required by August 1, 2015.

The CFPB also has broad rulemaking authority for a wide range of consumer financial laws that apply to all banks, including, among other things, the authority to prohibit "unfair, deceptive or abusive" acts and practices. Abusive acts or practices are defined as those that materially interfere with a consumer's ability to understand a term or condition of a consumer financial product or service or take unreasonable advantage of a consumer's: (i) lack of financial savvy, (ii) inability to protect himself in the selection or use of consumer financial products or services, or (iii) reasonable reliance on a covered entity to act in the consumer's interests.

The Bank continues to be subject to numerous other federal and state consumer protection laws that extensively govern its relationship with its customers. These laws include the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Truth in Lending Act, the Truth in Savings Act, the Electronic Fund Transfer Act, the Expedited Funds Availability Act, the Home Mortgage Disclosure Act, the Fair Housing Act, the Real Estate Settlement Procedures Act, the Fair Debt Collection Practices Act, the Right to Financial Privacy Act, the Service Members Civil Relief Act, and respective state-law counterparts to these laws, as well as state usury laws and laws regarding unfair and deceptive acts and practices. These and other federal laws, among other things, require disclosures of the cost of credit and terms of deposit accounts, provide substantive consumer rights, prohibit discrimination in credit transactions, regulate the use of credit report information, provide financial privacy protections, prohibit unfair, deceptive and abusive practices, restrict the Company's ability to raise interest rates and subject the Company to substantial regulatory oversight.

In addition, the Bank, like all other financial institutions, is required to maintain the privacy of its customers' non-public, personal information. Such privacy requirements direct financial institutions to: (i) provide notice to customers regarding privacy policies and practices; (ii) inform customers regarding the conditions under which their non-public personal information may be disclosed to non-affiliated third parties; and (iii) give customers an option to prevent disclosure of such information to non-affiliated third parties.

Interstate Banking and Branching

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (the "Interstate Act") together with Dodd-Frank relaxed prior interstate branching restrictions under federal law by permitting, subject to regulatory approval, state and federally chartered commercial banks to establish branches in states where the laws permit banks chartered in such states to establish branches. The Interstate Act requires regulators to consult with community organizations before permitting an interstate institution to close a branch in a low-income area. Federal banking agency regulations prohibit banks from using their interstate branches primarily for deposit production and the federal banking agencies have implemented a loan-to-deposit ratio screen to ensure compliance with this prohibition. Dodd-Frank effectively eliminated the prohibition under California law against interstate branching through de novo establishment of California branches. Interstate branches are subject to certain laws of the states in which they are located. The Bank presently does not have any interstate branches.

USA Patriot Act of 2001

The impact of the USA Patriot Act of 2001 (the "Patriot Act") on financial institutions of all kinds has been significant and wide ranging. The Patriot Act substantially enhanced existing anti-money laundering and financial transparency laws, and required certain regulatory authorities to adopt rules that promote cooperation among financial institutions, regulators, and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. Under the Patriot Act, financial institutions are subject to prohibitions regarding specified financial transactions and

account relationships, as well as enhanced due diligence and “know your customer” standards in their dealings with foreign financial institutions and foreign customers. The Patriot Act also requires all financial institutions to establish anti-money laundering programs. The Bank expanded its Bank Secrecy Act compliance staff and intensified due diligence procedures concerning the opening of new accounts to fulfill the anti-money laundering requirements of the Patriot Act, and also implemented systems and procedures to identify suspicious banking activity and report any such activity to the Financial Crimes Enforcement Network.

Incentive Compensation

In June 2010, the FRB and the FDIC issued comprehensive final guidance on incentive compensation policies intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The guidance, which covers all employees that have the ability to materially affect the risk profile of an organization, either individually or as part of a group, is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors. These three principles are incorporated into proposed joint compensation regulations under the Dodd-Frank Act that would prohibit incentive-based payment arrangements at specified regulated entities having at least \$1 billion in total assets that encourage inappropriate risks. The FRB will review, as part of its regular, risk-focused examination process, the incentive compensation arrangements of banking organizations, such as the Company, that are not “large, complex banking organizations.” While the final regulations have not yet been adopted, the Company believes it is in compliance with the regulations as currently proposed.

Sarbanes-Oxley Act of 2002

The Company is subject to the Sarbanes-Oxley Act of 2002 (“Sarbanes-Oxley”) which addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. Among other things, Sarbanes-Oxley mandates chief executive and chief financial officer certifications of periodic financial reports, additional financial disclosures concerning off-balance sheet items, and accelerated share transaction reporting for executive officers, directors and 10% shareholders. In addition, Sarbanes-Oxley increased penalties for non-compliance with the Exchange Act. SEC rules promulgated pursuant to Sarbanes-Oxley impose obligations and restrictions on auditors and audit committees intended to enhance their independence from management, and include extensive additional disclosure, corporate governance and other related rules.

Commercial Real Estate Lending Concentrations

As a part of their regulatory oversight, the federal regulators have issued guidelines on sound risk management practices with respect to a financial institution’s concentrations in commercial real estate (“CRE”) lending activities. These guidelines were issued in response to the agencies’ concerns that rising CRE concentrations might expose institutions to unanticipated earnings and capital volatility in the event of adverse changes in the commercial real estate market. The guidelines identify certain concentration levels that, if exceeded, will expose the institution to additional supervisory analysis with regard to the institution’s CRE concentration risk. The guidelines are designed to promote appropriate levels of capital and sound loan and risk management practices for institutions with a concentration of CRE loans. In general, the guidelines establish two concentration levels: first, if the institution’s total construction, land development and other land loans represent 100 percent or more of total risk-based capital; and second, if total loans for construction, land development and other land and loans secured by multifamily and non-owner occupied non-farm residential properties (excluding loans secured by owner-occupied properties) represent 300 percent or more of total risk-based capital and the institution’s commercial real estate loan portfolio has increased by 50 percent or more during the prior 36 month period. The Bank believes that the guidelines are applicable to it, as it has a relatively high concentration in CRE loans. The Bank and its board of directors have discussed the guidelines and believe that the Bank’s underwriting policies, management information systems, independent credit administration process, and monitoring of real estate loan concentrations are sufficient to address the guidelines.

Other Pending and Proposed Legislation

Other legislative and regulatory initiatives which could affect the Company, the Bank and the banking industry in general are pending, and additional initiatives may be proposed or introduced before the United States Congress, the California legislature and other governmental bodies in the future. Such proposals, if enacted, may further alter the structure, regulation and competitive relationship among financial institutions, and may subject the Bank to increased regulation, disclosure and reporting requirements. In addition, the various banking regulatory agencies often adopt

new rules and regulations to implement and enforce existing legislation. It cannot be predicted whether, or in what form, any such legislation or regulations may be enacted or the extent to which the business of the Company or the Bank would be affected thereby.

Item 1A. RISK FACTORS

You should carefully consider the following risk factors and all other information contained in this Annual Report before making investment decisions concerning the Company's common stock. The risks and uncertainties described below are not the only ones the Company faces. Additional risks and uncertainties not presently known to the Company, or that the Company currently believes are immaterial, may also adversely impact the Company's business. If any of the events described in the following risk factors occur, the Company's business, results of operations and financial condition could be materially adversely affected. In addition, the trading price of the Company's common stock could decline due to any of the events described in these risks.

Risks Relating to the Bank and to the Business of Banking in General

Our business has been and may in the future be adversely affected by volatile conditions in the financial markets and unfavorable economic conditions generally. From December 2007 through June 2009, the U.S. economy was officially in recession. Business activity across a wide range of industries and regions in the U.S. was greatly reduced during the recession and in the ensuing years, and remains at subdued levels in many parts of the Country today. The financial markets and the financial services industry in particular suffered unprecedented disruption, causing a large number of institutions to fail or to require government intervention to avoid failure.

As a result of the adverse financial and economic conditions noted in the previous paragraph, many lending institutions, including our Company, experienced significant declines in the performance of their loans, particularly construction, development and land loans, and unsecured commercial and consumer loans. Our nonperforming assets and credit costs (primarily our loan loss provision, net costs associated with other real estate owned, legal expense, and appraisal costs) increased significantly during and after the recession. We achieved material improvement in credit quality during 2013 and 2014, but nonperforming assets still totaled \$24.7 million, or 2.53% of total loans plus foreclosed assets at the end of 2014, relative to only \$689,000, or 0.08% of total loans and foreclosed assets at the end of 2006, prior to the recession. California's San Joaquin Valley, where the Company is headquartered and has most of its branch locations, was particularly hard hit by the recession. Unemployment levels have always been relatively high in the San Joaquin Valley, including Tulare County which is our geographic center, but recessionary conditions pushed unemployment rates to exceptionally high levels. The unemployment rate for Tulare County reached a high of 19.3% during the most recent economic cycle, in March 2010. It reflects a steady downward trend since 2010 and had declined to 12.7% by December 2014, but is still well above the 6.7% aggregate unemployment rate reported for California in December 2014. In addition, as discussed below in connection with challenges to the agricultural industry, if the current drought in California continues it could have a significant negative impact on unemployment rates in our market areas. Furthermore, the recent precipitous drop in oil prices could also negatively impact unemployment rates, particularly in Kern County.

There are indications of improving economic conditions, and the real estate sector appears to have stabilized in many of our local markets. However unemployment remains relatively high, as noted above, and many local governments and businesses are still experiencing difficulties due to reduced consumer spending and a drop in tax revenues. Additional adverse market developments could further depress consumer confidence levels and payment patterns, which could cause real estate values to resume their unfavorable trends and lead to additional loan delinquencies and increased default rates.

If business and economic conditions deteriorate, the ensuing economic weakness could have one or more of the following undesirable effects on our business:

- a lack of demand for loans, or other products and services offered by us;
- a decline in the value of our loans or other assets secured by residential or commercial real estate;
- a decrease in deposit balances due to increased pressure on the liquidity of our customers;

an impairment of our investment securities; or
an increase in the number of borrowers who become delinquent, file for protection under bankruptcy laws or default on their loans or other obligations to us, which in turn could result in a higher level of nonperforming assets, net charge-offs and provision for credit losses.

Challenges in the agricultural industry could have an adverse effect on our customers and their ability to make payments to us, particularly in view of the current drought in California. While the Company's nonperforming assets are currently comprised mainly of loans secured by non-agricultural real estate and other real estate owned ("OREO"), the drivers behind high levels of nonperforming assets in previous economic cycles include difficulties experienced by the agricultural industry. This is due to the fact that a considerable portion of our borrowers are involved in, or are impacted to some extent by, the agricultural industry. While a great number of our borrowers are not directly involved in agriculture, they would likely be impacted by difficulties in the agricultural industry since many jobs in our market areas are ancillary to the regular production, processing, marketing and sale of agricultural commodities.

The markets for agricultural products can be adversely impacted by increased supply from overseas competition, a drop in consumer demand, and numerous other factors. The ripple effect of any resulting drop in commodity prices could lower borrower income and depress collateral values. Weather patterns are also of critical importance to row crop, tree fruit, and citrus production. A degenerative cycle of weather has the potential to adversely affect agricultural industries as well as consumer purchasing power, and could lead to further unemployment throughout the San Joaquin Valley. The state of California is currently experiencing the worst drought in recorded history, and it is not possible to predict at present how long the drought may last. Another looming issue that could have a major impact on the agricultural industry involves water availability and distribution rights. If the amount of water available to agriculture becomes increasingly scarce due to drought and/or diversion to other uses, farmers may not be able to continue to produce agricultural products at a reasonable profit, which has the potential to force many out of business. Such conditions have affected and may continue to adversely affect our borrowers and, by extension, our business, and if general agricultural conditions decline our level of nonperforming assets could increase.

The recent drop in oil prices could have an adverse impact on our customers and their ability to make payments to us, particularly in areas such as Kern County where oil production is a significant economic driver. Kern County, which is home to about three quarters of California's oil production, declared a fiscal emergency in January 2015 after projecting a material budget gap resulting from declining oil prices. With oil prices down substantially over the past year, County officials expect a related decline in oil property values and a material decline in property taxes. Kern County currently has ample reserves that it can access and it also plans to cut expenses to help address the issue, thus industry observers do not expect the County to file bankruptcy. However, economic multipliers to a contracting oil industry include the prospects of a depressed residential housing market and a drop in commercial real estate values. The Company's direct exposure to the oil industry is not material, but if our borrowers are indirectly impacted and/or non-oil property values decline, our level of nonperforming assets and loan charge-offs could increase.

Concentrations of real estate loans have negatively impacted our performance in the past, and could subject us further risks in the event of another real estate recession or natural disaster. Our loan portfolio is heavily concentrated in real estate loans, particularly commercial real estate. At December 31, 2014, 73% of our loan portfolio consisted of real estate loans, and a sizeable portion of the remaining loan portfolio has real estate collateral as a secondary source of repayment or as an abundance of caution. Real estate loans on commercial buildings represented approximately 50% of all real estate loans, while construction/development and land loans were 4%, loans secured by residential properties accounted for 26%, and loans secured by farmland were 21% of real estate loans. The Company's \$24.7 million balance of nonperforming assets at December 31, 2014 includes nonperforming real estate loans totaling \$19.0 million, and \$4.0 million in foreclosed assets comprised primarily of OREO.

The Central Valley residential real estate market experienced significant deflation in property values during 2008 and 2009, and foreclosures occurred at relatively high rates during and after the recession. While residential real estate values in our market areas currently appear to be stabilized or slightly increasing, if they were to slide further, or if commercial real estate values decline materially, the Company could experience additional migration into nonperforming assets. An increase in nonperforming assets could have a material adverse effect on our financial condition and results of operations by reducing our income and increasing our expenses. Deterioration in real estate values might also further reduce the amount of loans the Company makes to businesses in the construction and real

estate industry, which could negatively impact our organic growth prospects. Similarly, the occurrence of a natural disaster like those California has experienced in the past, including earthquakes, fires, and flooding, could impair the value of the collateral we hold for real estate secured loans and negatively impact our results of operations.

In addition, banking regulators give commercial real estate loans extremely close scrutiny due to risks relating to the cyclical nature of the real estate market and related risks for lenders with high concentrations of such loans. The regulators have required banks with relatively high levels of CRE loans to implement enhanced underwriting standards, internal controls, risk management policies and portfolio stress testing, which has resulted in higher allowances for possible loan losses. Expectations for higher capital levels have also materialized. Any required increase in our allowance for loan losses could adversely affect our net income, and any requirement that we maintain higher capital levels could adversely impact financial performance measures such as earnings per share.

Our concentration of commercial real estate, construction and land development, and commercial and industrial loans exposes us to increased lending risks. Commercial real estate, construction and land development, and commercial and industrial loans and leases (including agricultural production loans), which comprised approximately 53% of our total loan portfolio as of December 31, 2014, expose the Company to a greater risk of loss than residential real estate and consumer loans, which comprised a smaller percentage of the total loan portfolio. Commercial real estate and land development loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to residential loans. Consequently, an adverse development with respect to one commercial loan or credit relationship exposes us to greater risk of loss than an adverse development with respect to one residential mortgage loan.

Repayment of our commercial loans is often dependent on the cash flows of the borrowers, which may be unpredictable, and the collateral securing these loans may fluctuate in value. At December 31, 2014, we had \$142 million or 15% of total loans in commercial loans and leases (including agricultural production loans). Commercial lending involves risks that are different from those associated with real estate lending. Real estate lending is generally considered to be collateral based lending with loan amounts based on predetermined loan to collateral values and liquidation of the underlying real estate collateral being viewed as the primary source of repayment in the event of borrower default. Our commercial loans are primarily made based on the cash flows of the borrowers and secondarily on any underlying collateral provided by the borrowers. A borrower's cash flows may be unpredictable, and collateral securing those loans may fluctuate in value. Although commercial loans are often collateralized by equipment, inventory, accounts receivable, or other business assets, the liquidation of collateral in the event of default is often an insufficient source of repayment because accounts receivable may be uncollectible and inventories may be obsolete or of limited use, among other things.

Nonperforming assets adversely affect our results of operations and financial condition, and can take significant time to resolve. Our nonperforming loans may remain at current elevated levels or could increase, which will negatively impact earnings and could have a substantial adverse impact if conditions deteriorate. We do not record interest income on non-accrual loans, thereby adversely affecting our level of interest income. Furthermore, when we receive collateral through foreclosures and similar proceedings, we are required to record the collateral at its fair market value less estimated selling costs, which may result in write-downs or losses. Additionally, while 2014 was favorably impacted by significant gains on the sale of OREO, our non-interest expense was relatively high in prior years due to the costs of reappraising adversely classified assets, write-downs on foreclosed assets incidental to declining property values, operating costs related to foreclosed assets, legal and other costs associated with loan collections, and various other expenses that would not typically be incurred in a more normal operating environment. A relatively high level of nonperforming assets also increases our risk profile and may impact the capital levels our regulators believe is appropriate in light of such risks. We utilize various techniques such as loan sales, workouts and restructurings to manage our problem assets. Deterioration in the value of these problem assets, the underlying collateral, or in the borrowers' performance or financial condition, could adversely affect our business, results of operations and financial condition. In addition, the resolution of nonperforming assets requires a significant commitment of time from management and staff, which can be detrimental to their performance of other responsibilities. There can be no assurance that we will avoid further increases in nonperforming loans in the future.

We may experience loan and lease losses in excess of our allowance for such losses. We endeavor to limit the risk that borrowers might fail to repay; nevertheless, losses can and do occur. We have established an allowance for estimated loan and lease losses in our accounting records based on estimates of:

- historical experience with our loans;
- evaluation of economic conditions;
- regular reviews of the quality, mix and size of the overall loan portfolio;
- a detailed cash flow analysis for nonperforming loans;
- regular reviews of delinquencies; and
- the quality of the collateral underlying our loans.

We maintain our allowance for loan and lease losses at a level that we believe is adequate to absorb specifically identified probable losses as well as any other losses inherent in our loan portfolio at a given date. While we strive to carefully monitor credit quality and to identify loans that may become nonperforming, at any given time there are loans in the portfolio that could result in losses but have not been identified as nonperforming or potential problem loans. We cannot be sure that we will identify deteriorating loans before they become nonperforming assets, or that we will be able to limit losses on those loans that have been so identified. Changes in economic, operating and other conditions which are beyond our control, including interest rate fluctuations, deteriorating values in underlying collateral, and changes in the financial condition of borrowers, may lead to an increase in our estimate of probable losses or cause actual loan losses to exceed our current allowance. In addition, the FDIC and the DBO, as part of their supervisory functions, periodically review our allowance for loan and lease losses. Such agencies may require us to increase our provision for loan and lease losses or to recognize further losses based on their judgment, which may be different from that of our management. Any such increase in the allowance required by the FDIC or the DBO could also hurt our business.

Our use of appraisals in deciding whether to make a loan on or secured by real property does not ensure the value of the collateral. In considering whether to make a loan secured by real property, we generally require an appraisal of the property. However, an appraisal is only an estimate of the value of the property at the time the appraisal is made, and an error in fact or judgment could adversely affect the reliability of an appraisal. In addition, events occurring after the initial appraisal may cause the value of the real estate to decrease. As a result of any of these factors the value of collateral backing a loan may be less than supposed, and if a default occurs we may not recover the entire outstanding balance of the loan.

Our expenses could increase as a result of increases in FDIC insurance premiums or other regulatory assessments. The FDIC, absent extraordinary circumstances, must establish and implement a plan to restore the deposit insurance reserve ratio to 1.35% of estimated insured deposits or the comparable percentage of the assessment base at any time the reserve ratio falls below that level. Bank failures during and after the recent recession depleted the deposit insurance fund balance, which was in a negative position from the end of 2009 through the first quarter of 2011. The balance had increased to \$54.3 billion with a resulting reserve ratio of 0.89% as of September 30, 2014. The FDIC currently has until September 30, 2020 to bring the reserve ratio back to the statutory minimum. As noted above under “Regulation and Supervision – Deposit Insurance”, the FDIC has implemented a restoration plan that adopted a new assessment base and established new assessment rates starting with the second quarter of 2011. The FDIC also imposed a special assessment in 2009, and required the prepayment of three years of estimated FDIC insurance premiums at the end of 2009. It is generally expected that assessment rates will remain relatively high in the near term due to the significant cost of bank failures in recent years. Any further premium increases or special assessments could have a material adverse effect on our financial condition and results of operations.

We may not be able to continue to attract and retain banking customers, and our efforts to compete may reduce our profitability. The banking business in our current and intended future market areas is highly competitive with respect to virtually all products and services, which may limit our ability to attract and retain banking customers. In California generally, and in our service areas specifically, branches of major banks dominate the commercial banking industry. Such banks have substantially greater lending limits than we have, offer certain services we cannot offer directly, and often operate with economies of scale that result in relatively low operating costs. We also compete

with numerous financial and quasi-financial institutions for deposits and loans, including providers of financial services over the internet. Recent technology advances and other changes have allowed parties to effectuate financial transactions that previously required the involvement of banks. For example, consumers can maintain funds in brokerage accounts or mutual funds that would have historically been held as bank deposits. Consumers can also complete transactions such as paying bills and transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as “disintermediation,” could result in the loss of fee income, as well as the loss of customer deposits and the income generated by those deposits. The loss of these revenue streams and access to lower cost deposits as a source of funds could have a material adverse effect on our financial condition and results of operations.

Furthermore, with the large number of bank failures in the past decade, customers have become more concerned about the extent to which their deposits are insured by the FDIC. Customers may withdraw deposits in an effort to ensure that the amount they have on deposit with their bank is fully insured. Decreases in deposits may adversely affect our funding costs and net income. Ultimately, competition can and does increase our cost of funds, reduce loan yields and drive down our net interest margin, thereby reducing profitability. It can also make it more difficult for us to continue to increase the size of our loan portfolio and deposit base, and could cause us to rely more heavily on wholesale borrowings which are generally more expensive than deposits.

If we are not able to successfully keep pace with technological changes affecting the industry, our business could be hurt. The financial services industry is constantly undergoing technological change, with the frequent introduction of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better service clients and reduce costs. Our future success depends, in part, upon our ability to respond to the needs of our clients by using technology to provide desired products and services and create additional operating efficiencies. Some of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our clients. Failure to successfully keep pace with technological change in the financial services industry could have a material adverse impact on our business and, in turn, on our financial condition and results of operations.

Unauthorized disclosure of sensitive or confidential customer information, whether through a cyber-attack, other breach of our computer systems or otherwise, could severely harm our business. In the normal course of business we collect, process and retain sensitive and confidential customer information. Despite the security measures we have in place, our facilities and systems may be vulnerable to cyber-attacks, security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors, or other similar events.

Information security risks for financial institutions have increased recently in part because of new technologies, the use of the Internet and telecommunications technologies (including mobile devices) to conduct financial and other business transactions, and the increased sophistication and activities of organized crime, perpetrators of fraud, hackers, terrorists and others. In addition to cyber-attacks or other security breaches involving the theft of sensitive and confidential information, hackers recently have also engaged in denial of service attacks, designed to disrupt key business services such as customer-facing web sites. While to date such attacks have primarily involved very large financial institutions, insurance companies and other huge corporations, it is impossible to predict whether smaller institutions such as our bank could become a target. Although we employ detection and response mechanisms designed to identify, contain and mitigate security incidents, early detection may be thwarted by sophisticated attacks and malware designed to avoid detection.

We also face risks related to cyber-attacks and other security breaches in connection with debit card transactions that typically involve the transmission of sensitive information regarding our customers through various third parties. Some of these parties have in the past been the target of security breaches and cyber-attacks, and because the transactions involve third parties and environments that we do not control or secure, future security breaches or

cyber-attacks affecting any of these third parties could impact us through no fault of our own, and in some cases we may have exposure and suffer losses for breaches or attacks relating to them. We also rely on third party service providers to conduct certain other aspects of our business operations, and face similar risks relating to them. While we regularly conduct security assessments on these third parties, we cannot be sure that their information security protocols are sufficient to withstand a cyber-attack or security breach.

Any cyber-attack or other security breach involving the misappropriation, loss or other unauthorized disclosure of confidential customer information could severely damage our reputation, erode confidence in the security of our systems, products and services, expose us to the risk of litigation and liability, disrupt our operations, and have a material adverse effect on our business.

If our information systems were to experience a system failure, our business and reputation could suffer. We rely heavily on communications and information systems to conduct our business. The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to minimize service disruptions by protecting our computer equipment, systems, and network infrastructure from physical damage due to fire, power loss, telecommunications failure or a similar catastrophic event. We have protective measures in place to prevent or limit the effect of the failure or interruption of our information systems, and will continue to upgrade our security technology and update procedures to help prevent such events. However, if such failures or interruptions were to occur, they could result in damage to our reputation, a loss of customers, increased regulatory scrutiny, or possible exposure to financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

We are subject to a variety of operational risks, including reputational risk, legal risk, compliance risk, the risk of fraud or theft by employees or outsiders, and the risk of clerical or record-keeping errors, which may adversely affect our business and results of operations. If personal, non-public, confidential or proprietary customer information in our possession were to be mishandled or misused, we could suffer significant regulatory consequences, reputational damage and financial loss. This could occur, for example, if information was erroneously provided to parties who are not permitted to have the information, either by fault of our systems, employees, or counterparties, or where such information is intercepted or otherwise inappropriately taken by third parties.

Because the nature of the financial services business involves a high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully remediated. Our necessary dependence upon automated systems to record and process transactions and our large transaction volume may further increase the risk that technical flaws or employee tampering or manipulation of those systems could result in losses that are difficult to detect. We also may be subject to disruptions of our operating systems arising from events that are wholly or partially beyond our control (for example, computer viruses or electrical or telecommunications outages, or natural disasters, disease pandemics or other damage to property or physical assets) which may give rise to disruption of service to customers and to financial loss or liability. We are further exposed to the risk that our external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their employees) and to the risk that our (or our vendors') business continuity and data security systems prove to be inadequate. The occurrence of any of these risks could result in a diminished ability to operate our business (for example, by requiring us to expend significant resources to correct the defect), as well as potential liability to clients, reputational damage and regulatory intervention, which could adversely affect our business, financial condition and results of operations, perhaps materially.

Previously enacted and potential future financial regulatory reforms could have a significant impact on our business, financial condition and results of operations. The Dodd-Frank Wall Street Reform and Consumer Protection Act was enacted in July 2010. Dodd-Frank is having a broad impact on the financial services industry, including significant regulatory and compliance changes. Many of the requirements called for in Dodd-Frank will be implemented over time, and most will be facilitated by the enactment of regulations over the course of several years. Given the uncertainty associated with the manner in which the provisions of Dodd-Frank will be implemented, the full extent to which they will impact our operations is unclear. The changes resulting from Dodd-Frank may impact the profitability of business activities, require changes to certain business practices, impose more stringent capital, liquidity and leverage requirements or otherwise adversely affect our business. In particular, the potential impact of Dodd-Frank on our operations and activities, both currently and prospectively, include, among others:

- an increase in our cost of operations due to greater regulatory oversight, supervision and examination of banks and bank holding companies, and higher deposit insurance premiums;
- the limitation of our ability to expand consumer product and service offerings due to more stringent consumer protection laws and regulations;
- a material negative impact on our cost of funds when market interest rates increase, since financial institutions can now pay interest on business checking accounts;
- a potential reduction in fee income, due to limits on interchange fees applicable to larger institutions which could ultimately lead to a competitive-driven reduction in the fees we charge; and
- a potential increase in competition due to the elimination of remaining barriers to de novo interstate branching.

Further, we may be required to invest significant management attention and resources to evaluate and make any changes necessary to comply with new statutory and regulatory requirements under the Dodd-Frank Act, which may negatively impact results of operations and financial condition. We cannot predict whether there will be additional laws or reforms that would affect the U.S. financial system or financial institutions, when such changes may be adopted, how such changes may be interpreted and enforced or how such changes may affect us. However, the costs of complying with any additional laws or regulations could have a material adverse effect on our financial condition and results of operations.

We may be adversely affected by the financial stability of other financial institutions. Our ability to engage in routine funding transactions could be adversely affected by the actions and liquidity of other financial institutions. Financial institutions are often interconnected as a result of trading, clearing, counterparty, or other business relationships. We have exposure to many different industries and counterparties, and routinely execute transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, and other institutional clients. Many of these transactions expose us to credit risk in the event of a default by a counterparty or client. Even if the transactions are collateralized, credit risk could exist if the collateral held by us cannot be liquidated at prices sufficient to recover the full amount of the credit or derivative exposure due to us. Any such losses could adversely affect our business, financial condition or results of operations.

Changes in interest rates could adversely affect our profitability, business and prospects. Net interest income, and therefore earnings, can be adversely affected by differences or changes in the interest rates on, or the re-pricing frequency of, our financial instruments. In addition, fluctuations in interest rates can affect the demand of customers for products and services, and an increase in the general level of interest rates may adversely affect the ability of certain borrowers to make variable-rate loan payments. Accordingly, changes in market interest rates could materially and adversely affect the Company's asset quality, loan origination volume, financial condition, results of operations, and cash flows. This interest rate risk can arise from Federal Reserve Board monetary policies, as well as other economic, regulatory and competitive factors that are beyond our control.

We depend on our executive officers and key personnel to implement our business strategy, and could be harmed by the loss of their services. We believe that our continued growth and success depends in large part upon the skills of our management team and other key personnel. The competition for qualified personnel in the financial services industry is intense, and the loss of key personnel or an inability to attract, retain or motivate key personnel could adversely affect our business. If we are not able to retain our existing key personnel or attract additional qualified personnel, our business operations would be hurt. None of our executive officers have employment agreements.

The value of the securities in our investment portfolio may be negatively affected by disruptions in securities markets. The market for some of the investment securities held in our portfolio has experienced volatility and disruption in recent years. Market conditions may have a detrimental effect on the value of our securities, such as reduced valuations because of the perception of heightened credit risks or illiquid markets. There can be no assurance that any declines in market value associated with these disruptions will not result in other-than-temporary impairments of these investments, which would lead to accounting charges that could have a material adverse effect on our results of operations and capital levels.

We are exposed to the risk of environmental liabilities with respect to properties to which we obtain title. Approximately 73% of our loan portfolio at December 31, 2014 consisted of real estate loans. In the normal course of business we may foreclose and take title to real estate collateral, and could be subject to environmental liabilities with respect to those properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental

contamination, or may be required to investigate or clean up hazardous or toxic substances, or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. These costs and claims could adversely affect our business and prospects.

Risks Related to our Common Stock

You may not be able to sell your shares at the times and in the amounts you want if the price of our stock fluctuates significantly or the trading market for our stock is not active. The trading price of our common stock could be impacted by a number of factors, many of which are outside our control. Although our stock has been listed on NASDAQ for many years, trading in our stock does not consistently occur in high volumes and the market for our stock cannot always be characterized as active. Thin trading in our common stock may exaggerate fluctuations in the stock's value, leading to price volatility in excess of that which would occur in a more active trading market. In addition, the stock market in general is subject to fluctuations that affect the share prices and trading volumes of many companies, and these broad market fluctuations could adversely affect the market price of our common stock. Factors that could affect our common stock price in the future include but are not necessarily limited to the following:

- actual or anticipated fluctuations in our reported operating results and financial condition;
- changes in revenue or earnings estimates or publication of research reports and recommendations by financial analysts;
- failure to meet analysts' revenue or earnings estimates;
- speculation in the press or investment community;
- strategic actions by us or our competitors, such as acquisitions or restructurings;
- actions by shareholders;
- sales of our equity or equity-related securities, or the perception that such sales may occur;
- fluctuations in the trading volume of our common stock;
- fluctuations in the stock prices, trading volumes, and operating results of our competitors;
- general market conditions and, in particular, market conditions for the financial services industry;
- proposed or adopted regulatory changes or developments;
- regulatory action against us;
- anticipated or pending investigations, proceedings, or litigation that involve or affect us; and
- domestic and international economic factors unrelated to our performance.

The stock market and, in particular, the market for financial institution stocks, has experienced significant volatility in the past. As a result, the market price of our common stock has at times been volatile, and could be in the future, as well. The capital and credit markets have also experienced volatility and disruption over the past several years, at times reaching unprecedented levels. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to the issuers' underlying financial strength.

We may pursue additional capital in the future, which may not be available on acceptable terms or at all, could dilute the holders of our outstanding common stock, and may adversely affect the market price of our common stock. Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at the time, which are outside of our control, and our financial performance. Furthermore, any capital raising activity could dilute the holders of our outstanding common stock, and may adversely affect the market price of our common stock and our performance measures such as return on equity and earnings per share.

The Company relies heavily on the payment of dividends from the Bank. Other than \$2.8 million in cash available at the holding company level at December 31, 2014, the Company's ability to meet debt service requirements and to pay dividends depends on the Bank's ability to pay dividends to the Company, as the Company has no other source of significant income. However, the Bank is subject to regulations limiting the amount of dividends it may pay. For example, the payment of dividends by the Bank is affected by the requirement to maintain adequate capital pursuant to the capital adequacy guidelines issued by the Federal Deposit Insurance Corporation. If (i) any capital ratio requirements are increased; (ii) the total risk-weighted assets of the Bank increase significantly; and/or (iii) the Bank's income declines significantly, the Bank's Board of Directors may decide or be required to retain a greater portion of the Bank's earnings to achieve and maintain the required capital or asset ratios. This would reduce the amount of funds available for the payment of dividends by the Bank to the Company. Further, one or more of the Bank's regulators could prohibit the Bank from paying dividends if, in their view, such payments would constitute unsafe or unsound banking practices. The Bank's ability to pay dividends to the Company is also limited by the California Financial Code. Whether dividends are paid, and the frequency and amount of such dividends will also depend on the financial condition and performance of the Bank and the decision of the Bank's Board of Directors. Information concerning the Company's dividend policy and historical dividend practices is set forth in Item 5 below under "Dividends." However, no assurance can be given that our future performance will justify the payment of dividends in any particular year.

Your investment may be diluted because of our ability to offer stock to others, and from the exercise of stock options. The shares of our common stock do not have preemptive rights. This means that you may not be entitled to buy additional shares if shares are offered to others in the future. We are authorized to issue 24,000,000 shares of common stock, and as of December 31, 2014 we had 13,689,181 shares of our common stock outstanding. Except for certain limitations imposed by NASDAQ, nothing restricts our ability to offer additional shares of stock for fair value to others in the future. Any issuances of common stock would dilute our shareholders' ownership interests and may dilute the per share book value of our common stock. In addition, when our directors and officers exercise in-the-money stock options your ownership in the Company is diluted. As of December 31, 2014, there were outstanding options to purchase an aggregate of 631,800 shares of our common stock with an average exercise price of \$15.34 per share. At the same date there were an additional 788,620 shares available for grant under our 2007 Stock Incentive Plan.

Shares of our preferred stock issued in the future could have dilutive and other effects on our common stock. Our Articles of Incorporation authorize us to issue 10,000,000 shares of preferred stock, none of which is presently outstanding. Although our Board of Directors has no present intent to authorize the issuance of shares of preferred stock, such shares could be authorized in the future. If such shares of preferred stock are made convertible into shares of common stock, there could be a dilutive effect on the shares of common stock then outstanding. In addition, shares of preferred stock may be provided a preference over holders of common stock upon our liquidation or with respect to the payment of dividends, in respect of voting rights or in the redemption of our common stock. The rights, preferences, privileges and restrictions applicable to any series or preferred stock would be determined by resolution of our Board of Directors.

The holders of our debentures have rights that are senior to those of our shareholders. In 2004 we issued \$15,464,000 of junior subordinated debt securities due March 17, 2034, and in 2006 we issued an additional \$15,464,000 of junior subordinated debt securities due September 23, 2036 in order to supplement regulatory capital. These junior subordinated debt securities are senior to the shares of our common stock. As a result, we must make interest payments on the debentures before any dividends can be paid on our common stock, and in the event of our bankruptcy, dissolution or liquidation, the holders of debt securities must be paid in full before any distributions may be made to the holders of our common stock. In addition, we have the right to defer interest payments on the junior subordinated debt securities for up to five years, during which time no dividends may be paid to holders of our common stock. In the event that the Bank is unable to pay dividends to us, then we may be unable to pay the amounts due to the holders of the junior subordinated debt securities and, thus, we would be unable to declare and pay any dividends on our common stock.

Provisions in our articles of incorporation could delay or prevent changes in control of our corporation or our management. Our articles of incorporation contain provisions for staggered terms of office for members of the board of directors; no cumulative voting in the election of directors; and the requirement that our board of directors consider the potential social and economic effects on our employees, depositors, customers and the communities we serve as well as certain other factors, when evaluating a possible tender offer, merger or other acquisition of the Company. These provisions make it more difficult for another company to acquire us, which could cause our shareholders to lose an opportunity to be paid a premium for their shares in an acquisition transaction, and reduce the current and future

market price of our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

Item 2. Properties

The Company's administrative headquarters is in a 37,000 square foot, three-story office building located at 86 North Main Street, Porterville, California, and our main office consists of a one-story brick building located at 90 N. Main Street, Porterville, California, adjacent to our administrative headquarters. Both of those buildings are situated on unencumbered property owned by the Company. The Company also owns unencumbered property on which 15 of our other offices are located, namely the following branches: Porterville West Olive, Bakersfield Ming, California City, Dinuba, Exeter, Farmersville, Fresno Shaw, Hanford, Lindsay, Santa Paula, Tehachapi Downtown, Tehachapi Old Town, Three Rivers, Tulare, and Visalia Mooney. The remaining branches, as well as our technology center in Porterville and our six remote ATM locations, are leased from unrelated parties. While limited branch expansion is planned, management believes that existing back-office facilities are adequate to accommodate the Company's operations for the immediately foreseeable future.

Item 3. Legal Proceedings

From time to time the Company is a party to claims and legal proceedings arising in the ordinary course of business. After taking into consideration information furnished by counsel to the Company as to the current status of these claims or proceedings to which the Company is a party, management is of the opinion that the ultimate aggregate liability represented thereby, if any, will not have a material adverse affect on the financial condition of the Company.

Item 4. RESERVED**PART II****Item 5. Market for REGISTRANT'S Common Equity, Related Shareholder Matters AND ISSUER PURCHASES OF EQUITY SECURITIES****(a) Market Information**

Sierra Bancorp's Common Stock trades on the NASDAQ Global Select Market under the symbol BSRR, and the CUSIP number for our stock is #82620P102. Trading in the Company's Common Stock has not consistently occurred in high volumes, and such trading activity cannot always be characterized as constituting an active trading market. The following table summarizes trades of the Company's Common Stock, setting forth the approximate high and low sales prices and volume of trading for the periods indicated, based upon information available via public sources.

Calendar Quarter Ended	Sale Price of the Company's Common Stock (per share)		Approximate Trading Volume In Shares
	High	Low	
March 31, 2013	\$ 13.35	\$ 11.45	1,115,428
June 30, 2013	\$ 14.93	\$ 12.01	1,365,473
September 30, 2013	\$ 17.04	\$ 13.74	1,375,776
December 31, 2013	\$ 19.89	\$ 15.77	1,274,075
March 31, 2014	\$ 17.00	\$ 14.86	1,853,833
June 30, 2014	\$ 16.25	\$ 14.68	1,830,309
September 30, 2014	\$ 17.95	\$ 14.66	1,423,854
December 31, 2014	\$ 18.00	\$ 15.53	1,303,554

(b) Holders

As of January 31, 2015 there were an estimated 4,375 shareholders of the Company's Common Stock. There were 543 registered holders of record on that date, and per Broadridge, an investor communication company, there were also 3,832 beneficial holders with shares held under a street name, including "objecting beneficial owners" whose names and addresses are unavailable.

(c) Dividends

The Company paid cash dividends totaling \$4.8 million, or \$0.34 per share in 2014, and \$3.7 million, or \$0.26 per share in 2013. This represents 31% of annual net earnings for dividends paid in 2014 and 28% in 2013. The Company's general dividend policy is to pay cash dividends within the range of typical peer payout ratios, provided that such payments do not adversely affect the Company's financial condition and are not overly restrictive to its growth capacity. However, in the recent past when many of our peers elected to suspend dividend payments, the Company's Board concluded that we should maintain the payment of a certain level of dividend as long as our core operating performance was adequate and policy or regulatory restrictions did not preclude such payments, without regard to peer payout ratios. While we have paid a consistent level of quarterly dividends in the past few years, no assurance can be given that our financial performance in any given year will justify the continued payment of a certain level of cash dividend, or any cash dividend at all.

As a bank holding company that currently has no significant assets other than its equity interest in the Bank, the Company's ability to declare dividends depends upon cash on hand as supplemented by dividends from the Bank. The Bank's dividend practices in turn depend upon the Bank's earnings, financial position, regulatory standing, current and anticipated capital requirements, and other factors deemed relevant by the Bank's Board of Directors. The power of the Bank's Board of Directors to declare cash dividends is also subject to statutory and regulatory restrictions. Under California banking law, the Bank may declare dividends in an amount not exceeding the lesser of its retained earnings or its net income for the last three years (reduced by dividends paid during such period) or, with the prior approval of the California Commissioner of Business Oversight, in an amount not exceeding the greatest of (i) the retained earnings of the Bank, (ii) the net income of the Bank for its last fiscal year, or (iii) the net income of the Bank for its current fiscal year. The payment of any cash dividends by the Bank will depend not only upon the Bank's earnings during a specified period, but also on the Bank meeting certain regulatory capital requirements.

The Company's ability to pay dividends is also limited by state law. The California General Corporation Law allows a California corporation to pay dividends if the company's retained earnings equal at least the amount of the proposed dividend. If a California corporation does not have sufficient retained earnings available for the proposed dividend, it may still pay a dividend to its shareholders if immediately after the dividend the sum of the company's assets (exclusive of goodwill and deferred charges) would be at least equal to 125% of its liabilities (not including deferred taxes, deferred income and other deferred liabilities) and the current assets of the company would be at least equal to its current liabilities, or, if the average of its earnings before income taxes and before interest expense for the two preceding fiscal years was less than the average of its interest expense for the two preceding fiscal years, at least equal to 125% of its current liabilities. In addition, during any period in which the Company has deferred payment of interest otherwise due and payable on its subordinated debt securities, it may not make any dividends or distributions with respect to its capital stock (see "Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources").

(d) Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of December 31, 2014 with respect to options outstanding and available under our 2007 Stock Incentive Plan and the now-terminated 1998 Stock Option Plan, which are our only equity compensation plans other than an employee benefit plan meeting the qualification requirements of Section 401(a) of the Internal Revenue Code:

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options	Weighted-Average Exercise Price of Outstanding Options	Number of Securities Remaining Available for Future Issuance
Equity compensation plans approved by security holders	631,800	\$ 15.34	788,620

(e) Performance Graph

Below is a five-year performance graph comparing the cumulative total return on the Company's common stock to the cumulative total returns of the NASDAQ Composite Index (a broad equity market index), the SNL Bank Index, and the SNL \$1 billion to \$5 billion Bank Index (the latter two qualifying as peer bank indices), assuming a \$100 investment on December 31, 2009 and the reinvestment of dividends.

Index	<i>Period Ending</i>					
	12/31/09	12/31/10	12/31/11	12/31/12	12/31/13	12/31/14
Sierra Bancorp	100.00	143.59	120.42	160.21	229.53	255.76
NASDAQ Composite	100.00	118.15	117.22	138.02	193.47	222.16
SNL Bank \$1B-\$5B	100.00	113.35	103.38	127.47	185.36	193.81
SNL Bank	100.00	112.05	86.78	117.11	160.79	179.74

(f) Stock Repurchases

The Company's current stock repurchase plan became effective July 1, 2003 and has no expiration date. The plan was effectively dormant from April 2008 until January 2013, at which time the Company's Board decided to reactivate the stock repurchase plan and increase the number of shares authorized and available for repurchase to a total of 700,000 shares. The reactivation does not provide assurance that a specific quantity of shares will be repurchased.

While the Company generally has ultimate discretion with regard to potential share repurchases based upon market conditions and any other relevant considerations, all of the Company's repurchases of its common stock during 2014 were executed pursuant to plans established by the Company in accordance with SEC Rule 10b5-1. This has enabled us to continue to repurchase stock through the trading blackout for insiders, but imposed volume restrictions and limited our ability to change pricing and other parameters outlined in our 10b5-1 plans. The following table provides information concerning the Company's stock repurchase transactions during the fourth quarter of 2014:

	October	November	December
Total shares purchased	64,155	65,732	42,114
Average per share price	\$16.88	\$17.05	\$16.49
Number of shares purchased as part of publicly announced plan or program	64,155	65,732	42,114
Maximum number of shares remaining for purchase under a plan or program	184,498	118,766	76,652

Item 6. Selected Financial Data

The following table presents selected historical financial information concerning the Company, which should be read in conjunction with our audited consolidated financial statements, including the related notes and “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” included elsewhere herein. The selected financial data as of December 31, 2014 and 2013, and for each of the years in the three year period ended December 31, 2014, is derived from our audited consolidated financial statements and related notes which are included in this Annual Report. The selected financial data presented for earlier years is derived from our audited financial statements which are not included in this Annual Report. Throughout this Annual Report, information is for the consolidated Company unless otherwise stated.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion presents Management's analysis of the Company's financial condition as of December 31, 2014 and 2013, and the results of operations for each of the years in the three-year period ended December 31, 2014. The discussion should be read in conjunction with the Company's consolidated financial statements and the notes related thereto presented elsewhere in this Form 10-K Annual Report (see Item 8 below).

Statements contained in this report or incorporated by reference that are not purely historical are forward looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 as amended, including the Company's expectations, intentions, beliefs, or strategies regarding the future. All forward-looking statements concerning economic conditions, growth rates, income, expenses, or other values which are included in this document are based on information available to the Company on the date noted, and the Company assumes no obligation to update any such forward-looking statements. It is important to note that the Company's actual results could materially differ from those in such forward-looking statements. Risk factors that could cause actual results to differ materially from those in forward-looking statements include but are not limited to those outlined previously in Item 1A.

Critical Accounting Policies

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States. The financial information and disclosures contained within those statements are significantly impacted by Management's estimates and judgments, which are based on historical experience and incorporate various assumptions that are believed to be reasonable under current circumstances. Actual results may differ from those estimates under divergent conditions.

Critical accounting policies are those that involve the most complex and subjective decisions and assessments, and have the greatest potential impact on the Company's stated results of operations. In Management's opinion, the Company's critical accounting policies deal with the following areas: the establishment of the allowance for loan and lease losses, as explained in detail in Note 2 to the consolidated financial statements and in the "Provision for Loan Losses" and "Allowance for Loan and Lease Losses" sections of this discussion and analysis; the valuation of impaired loans and foreclosed assets, as discussed in Note 2 to the consolidated financial statements; income taxes and deferred tax assets and liabilities, especially with regard to the ability of the Company to recover deferred tax assets as discussed in the "Provision for Income Taxes" and "Other Assets" sections of this discussion and analysis; and goodwill and other intangible assets, which are evaluated annually for impairment and for which we have determined that no impairment exists, as discussed in Note 2 to the consolidated financial statements and in the "Other Assets" section of this discussion and analysis. Critical accounting areas are evaluated on an ongoing basis to ensure that the Company's financial statements incorporate the most recent expectations with regard to those areas.

Summary of Performance

The Company recognized net income of \$15.240 million in 2014, relative to \$13.369 million in 2013 and \$8.185 million in 2012. Net income per diluted share was \$1.08 in 2014, as compared to \$0.94 in 2013 and \$0.58 for 2012. The Company's return on average assets and return on average equity were 1.03% and 8.18%, respectively, in 2014, as compared to 0.96% and 7.56%, respectively, in 2013, and 0.59% and 4.74%, respectively, for 2012. The Company's financial performance improved in 2014 relative to recent years, due in part to better economic conditions that contributed to reductions in nonperforming assets, lower credit costs, increased lending activity, and strong core deposit growth. Those trends were evident to a lesser extent in 2013, but for several years prior to that our financial performance was materially impacted by adverse economic conditions. Certain regions of California, including Kern County, have shown strong economic improvement over the past couple of years, although the recovery has been slower to take hold in many of our other markets. Despite the improvement in 2014, net income remains well below levels achieved in pre-recession years as competitive pressures continue to take their toll on loan rates and net interest income, and certain elements of non-interest income are also lower in response to industry-wide regulatory pressures.

The following are some of the major factors impacting the Company's results of operations for the years presented in the consolidated financial statements.

Our loan loss provision totaled only \$350,000 in 2014, relative to \$4.350 million in 2013 and \$14.210 million in 2012. During the recession and for several years thereafter, our loan loss provision was unusually high due to the establishment of specific reserves for impaired loans, the replenishment of reserves subsequent to loan charge-offs, and the buildup of general reserves for performing loans due to higher historical loss factors. The reduction of \$4.000 million in the loan loss provision in 2014 had the single largest impact on our improvement in net income, and was enabled by a lower level of impaired loans, reduced loan losses, and declining general reserves for non-impaired loans consistent with improved credit quality.

Net interest income increased by 8% in 2014 due to growth in average interest-earning assets that was funded primarily by low-cost non-maturity deposits, but net interest income fell by 4% in 2013 relative to 2012 due to net interest margin compression. Average interest-earning assets were up in 2014 due to strong growth in the average balance of real estate loans and additions to our investment portfolio. The Company's net interest margin has been declining in recent periods, however, due in large part to competitive pressures on loan yields and disproportionate increases in lower-yielding investment balances.

Non-interest income fell by \$1.232 million, or 7%, in 2014 relative to 2013, and was down \$1.063 million, or 6%, in 2013 compared to 2012. The largest unfavorable variances within this category in 2014 include a drop in overdraft income and certain other deposit fee income, lower income on bank-owned life insurance ("BOLI") associated with deferred compensation plans, and lower merchant fees. Non-recurring life insurance proceeds received in 2013 also contributed to the drop in non-interest income in 2014. These unfavorable changes were partially offset by \$667,000 in gains on the sale of investment securities in 2014, relative to only \$6,000 in gains in 2013. The most significant factor in the drop in non-interest income in 2013 was investment gains totaling \$1.762 million in 2012.

Operating expense had been trending down due to lower costs associated with other real estate owned ("OREO") and other credit-related expenses, but was up by \$1.560 million, or 3%, in 2014 relative to 2013 mainly as a result of non-recurring acquisition costs. Direct costs incurred or accrued in conjunction with our acquisition of SCVB totaled \$2.070 million in 2014, and other significant unfavorable non-interest expense variances include higher personnel costs, ongoing and non-recurring costs associated with our core system conversion, and costs associated with our rebranding project. These increases were partially offset by net gains on the sale of OREO. The drop of \$1.841 million, or 4%, in total operating expense in 2013 is mainly due to lower net costs on foreclosed assets, partially offset by higher salaries and benefits.

The Company had tax provisions of \$6.191 million, or 29% of pre-tax income in 2014, and \$3.093 million, or 19% of pre-tax income in 2013, and a tax benefit of \$344,000 in 2012. The higher tax provisioning rate in 2014 and 2013 was due to higher taxable income relative to the Company's available tax credits, and the tax benefit in 2012 was primarily the result of lower taxable income relative to the Company's available tax credits.

The Company's assets totaled \$1.637 billion at December 31, 2014, relative to total assets of \$1.410 billion at December 31, 2013. Total liabilities were \$1.450 billion at the end of 2014 compared to \$1.229 billion at the end of 2013, and shareholders' equity totaled \$187 million at December 31, 2014 relative to \$182 million at December 31, 2013. The acquisition of Santa Clara Valley Bank ("SCVB") in November 2014 had a significant impact on balance sheet growth for the year, including increases in loans, investments, and deposits as noted below, as well as the addition of a \$1.064 million core deposit intangible and an increase of \$1.364 million in goodwill. The following is a summary of key balance sheet changes during 2014.

Total assets increased by \$227 million, or 16%. The increase in total assets resulted from higher loan balances and growth in investments, partially offset by reductions in foreclosed assets, balances due from the Federal Reserve Bank, and cash.

Gross loans and leases were up \$167 million, or 21%, for the year in 2014. Loan growth was favorably impacted by the purchase of \$33 million in residential mortgage loans, strong organic growth in agricultural real estate loans, mortgage warehouse loans, commercial real estate loans, and commercial loans, and \$62 million in loans from our acquisition of SCVB. Growth in performing loan balances in 2014 was partially offset by a \$17 million reduction in nonperforming loans. In 2013, loan volume was negatively impacted by a \$97 million decline in mortgage warehouse loans resulting from lower credit line utilization, and a \$16 million reduction in nonperforming loans.

Nonperforming assets ended 2014 at \$25 million, representing a reduction of \$21 million, or 46%, for the year. The net decline during 2014 is comprised of a \$17 million reduction in loans on non-accrual status and a \$4 million reduction in foreclosed assets. The Company's ratio of nonperforming assets to loans plus foreclosed assets fell to 2.53% at December 31, 2014, from 5.62% at December 31, 2013.

Our allowance for loan and lease losses totaled \$11.2 million as of December 31, 2014, a decline of \$429,000, or 4%, relative to year-end 2013. The drop during 2014 was due to lower general reserves on performing loans, consistent with improvement in asset quality. The allowance fell to 1.16% of total loans at December 31, 2014 from 1.45% of total loans at December 31, 2013 due to credit quality improvement in the existing portfolio, rigorous underwriting standards for newly-originated loans, and the fact that SCVB loans were recorded on our books at their fair values.

Deposits reflect an increase of \$193 million, or 16%, during 2014, but experienced no net growth in 2013. For 2014, the increase includes \$108 million in deposits from the acquisition of SCVB and strong organic growth in core non-maturity deposits. In 2013, growth in non-maturity deposits was offset by the maturity of a brokered time deposit and the runoff of other time deposits managed by our Treasury Department.

Total capital increased by \$5 million, or 3%, to \$187 million at December 31, 2014. Despite the higher level of capital, risk-based capital ratios declined as capital was leveraged during the year to acquire SCVB and grow risk-adjusted assets. At December 31, 2014, the consolidated Company's Total Risk-Based Capital Ratio was 18.44%, its Tier One Risk-Based Capital Ratio was 17.39%, and its Tier One Leverage Ratio was 12.99%.

Results of Operations

Net income was \$15.240 million in 2014, an increase of \$1.871 million, or 14%, relative to 2013. The Company earns income from two primary sources. The first is net interest income, which is interest income generated by earning assets less interest expense on deposits and other borrowed money. The second is non-interest income, which primarily consists of customer service charges and fees but also comes from non-customer sources such as bank-owned life insurance. The majority of the Company's non-interest expense is comprised of operating costs that relate to providing a full range of banking services to our customers.

Net Interest Income and Net Interest Margin

Net interest income was \$52.325 million in 2014, compared to \$48.564 million in 2013 and \$50.581 million in 2012. This represents an increase of 8% in 2014, but a decline of 4% in 2013. The level of net interest income recognized in any given period depends on a combination of factors including the average volume and yield for interest-earning assets, the average volume and cost of interest-bearing liabilities, and the mix of products which comprise the Company's earning assets, deposits, and other interest-bearing liabilities. Net interest income is also impacted by the

reversal of interest for loans placed on non-accrual status during the reporting period, and the recovery of interest on loans that had been on non-accrual and were paid off, sold or returned to accrual status.

The following table shows, for each of the past three years, average balances for significant balance sheet categories and the amount of interest income or interest expense associated with each applicable category for the noted periods. The table also displays calculated yields on each major component of the Company's investment and loan portfolios, average rates paid on each key segment of the Company's interest-bearing liabilities, and our net interest margin.

(1) Average balances are obtained from the best available daily or monthly data and are net of deferred fees and related direct costs.

(2) Yields and net interest margin have been computed on a tax equivalent basis.

Loans are gross of the allowance for possible loan losses. Net loan fees have been included in the calculation of interest income. Net loan Fees and loan acquisition FMV amortization were \$(731,316), \$(10,967) and \$5,476 for the years ended December 31, 2014, 2013, and 2012 respectively.

(4) Non-accrual loans are slotted by loan type and have been included in total loans for purposes of total interest earning assets.

(5)

Net interest margin represents net interest income as a percentage of average interest-earning assets (tax-equivalent).

The Volume and Rate Variances table below sets forth the dollar difference for the comparative periods in interest earned or paid for each major category of interest-earning assets and interest-bearing liabilities, and the amount of such change attributable to fluctuations in average balances (volume) or differences in average interest rates. Volume variances are equal to the increase or decrease in average balance multiplied by prior period rates, and rate variances are equal to the increase or decrease in rate times the prior period's average balances. Variances attributable to both rate and volume changes, calculated by multiplying the change in rate by the change in average balance, have been allocated to the rate variance.

⁽¹⁾ Yields on tax exempt income have not been computed on a tax equivalent basis.

The volume variance calculated for 2014 over 2013 was a favorable \$7.108 million, due primarily to a \$101 million increase in the average balance of interest-earning assets. The volume variance was enhanced by relatively strong growth in the average balances of lower-cost non-maturity deposits and higher-yielding real estate loans, although a disproportionate increase in lower-yielding investments offset that to some extent.

The impact of interest rate changes resulted in an unfavorable rate variance of \$3.347 million in net interest income for 2014 relative to 2013. Our weighted average yield on interest-earning assets fell six basis points, due to a 31 basis point decline in loan yields stemming from continued competition for quality loans that was partially offset by a higher investment portfolio yield. Investment yields were up due to favorable trends in prepayment rates on mortgage-backed securities, which impacted the amortization of premiums and accretion of discounts. The weighted average cost of interest-bearing liabilities was eight basis points lower in 2014, primarily because of a drop in deposit rates. Even though this was larger than the decline in our yield on earning assets, the year-over-year rate variance was still unfavorable due to the volume differential between our interest-earning assets and interest-bearing liabilities. That differential averaged \$395 million for 2013, the base period for the rate variance calculation, thus the decrease in our earning asset yield was applied to a much higher balance than the rate decrease for interest-bearing liabilities and had a greater impact on net interest income. Partially alleviating the negative pressures on our rate variance was non-recurring interest income such as interest recovered on non-accrual loans and prepayment penalties, which, net of interest reversals for loans placed on non-accrual status, totaled \$505,000 in 2014 relative to \$330,000 in 2013.

The Company's net interest margin, which is tax-equivalent net interest income as a percentage of average interest-earning assets, is affected by the same factors discussed above relative to rate and volume variances. Our net interest margin was 4.01% in 2014, an increase of one basis point relative to 2013. The principal developments favorably impacting our net interest margin in 2014 include a higher level of non-recurring interest income, an increase in investment yields, lower deposit rates, a shift from higher-cost time deposits into lower-cost non-maturity deposits, and the shift into higher-yielding real estate loans. Competitive pressures on loan yields largely offset those favorable factors.

Net interest income declined in 2013 relative to 2012 due to a drop of 20 basis points in our net interest margin, with the margin decline partially offset by growth of \$13 million in average interest-earning assets. The principle negative factors impacting our net interest margin in 2013 were competitive pressures on loan yields and an increase in low-yielding average balances at the FRB. Partially offsetting the negative developments were a shift in average balances from non-deposit borrowings and higher-cost time deposits into lower-cost non-maturity deposits, an increase in the average balance of non-interest bearing demand deposits, and net interest recoveries in 2013 relative to net interest reversals in 2012.

Provision for Loan and Lease Losses

Credit risk is inherent in the business of making loans. The Company sets aside an allowance for loan and lease losses, a contra-asset account, through periodic charges to earnings that are reflected in the income statement as the provision for loan and lease losses. The Company's loan loss provision has been sufficient to maintain the allowance for loan and lease losses at a level that, in management's judgment, is adequate to absorb probable loan losses related to specifically-identified impaired loans as well as probable incurred losses in the remaining loan portfolio. Specifically identifiable and quantifiable loan losses are immediately charged off against the allowance, while principal recoveries on previously charged-off balances are credited back to the allowance.

Our loan loss provision was \$350,000 for 2014, representing a reduction of \$4.000 million, or 92%, relative to 2013. The provision was lower in 2014 due in part to a lower level of net charge-offs. Our net charge-offs were \$779,000 in 2014 relative to \$6.546 million in 2013, for a reduction of \$5.767 million, or 88%. Over \$3 million in principal recoveries on previously charged-off balances contributed to the drop in net charge-offs in 2014. Additional factors which helped reduce our need for building reserves via the loan loss provision in 2014 include the fact that the credit quality of our performing loan portfolio continues to improve, as newer loans have been underwritten utilizing more stringent criteria than older vintage loans.

The Company's policies for monitoring the adequacy of the allowance and determining loan amounts that should be charged off, and other detailed information with regard to changes in the allowance, are discussed below under "Allowance for Loan and Lease Losses." The process utilized to establish an appropriate allowance for loan and lease losses can result in a high degree of variability in the Company's loan loss provision, and consequently in our net earnings.

Non-interest Revenue and Operating Expense

The table below sets forth the major components of the Company's non-interest revenue and operating expense, along with relevant ratios, for the years indicated:

Non-Interest Income/Expense

(dollars in thousands)

	Year Ended December 31,						
	2014	% of Total	2013	% of Total	2012	% of Total	
NON-INTEREST INCOME:							
Service charges on deposit accounts	\$8,275	52.27	% \$9,022	52.87	% \$9,676	53.38	%

The Company's results reflect reductions in total non-interest income of \$1.232 million, or 7%, in 2014 relative to 2013, and \$1.063 million, or 6%, for 2013 over 2012. While the primary reasons for declining non-interest income are discussed in greater detail below, several items of a non-recurring nature have had a significant impact over the past few years. In 2014, non-recurring income was comprised primarily of \$667,000 in gains on the sale of investments. For 2013, non-recurring income items include \$397,000 in life insurance proceeds and a \$100,000 non-recurring signing incentive received in conjunction with our merchant processing vendor conversion. In 2012, we realized \$1.762 million in gains on the sale of investments, had non-recurring accrual adjustments to costs associated with tax credit investments and other limited partnership investments, and received life insurance proceeds totaling \$87,000. Variability in income on BOLI associated with deferred compensation plans also contributed to the year-to-year changes in total non-interest income.

The principal component of the Company's non-interest revenue, namely service charges on deposit accounts, fell by \$747,000, or 8%, in 2014 relative to 2013. The primary reason for the drop was lower fees received from customer overdrafts and returned items, but certain other service charges were also down due in part to fees waived in the course of our core system conversion in the first quarter of 2014. Deposit service charges also declined by \$654,000, or 7%, in 2013 relative to 2012, mainly as the result of certain debit card interchange fees that were included with service charges on deposits in 2012 but which were reclassified to other service charges in 2013. The Company's ratio of service charge income to average transaction account balances was 1.2% in 2014, down from 1.4% in 2013 and 1.7% in 2012.

The next line item under other operating income is credit card fees, which consist primarily of credit card interchange fees. Despite the sale of all credit card balances in 2007, we still receive a portion of the interchange and interest income from credit cards issued in our name. Credit card fees did not change materially in 2014 over 2013, but increased by \$72,000, or 18%, in 2013 relative to 2012. Checkcard fees, which represent interchange fees from electronic funds transactions ("EFTs"), increased by \$159,000, or 4%, in 2014 over 2013, and by \$962,000, or 35%, in 2013 over 2012. The increase in 2014 can be explained by growth in our deposit account base, while the increase in 2013 includes the impact of the aforementioned reclassification of debit card interchange fees.

Other service charges and fees also constitute a relatively large portion of non-interest income, with the principal components consisting of ATM fees from transactions not associated with deposit customers (also referred to as foreign ATM fees), dividends on restricted stock, check printing fees, currency order fees, and other fees for merchant services. For 2014, fees on merchant accounts declined, including the impact of a \$100,000 non-recurring incentive received in conjunction with our conversion to a new merchant processing vendor in the first quarter of 2013, but that drop was largely offset by increases in other areas, including dividends received on restricted stock. The increase of \$312,000, or 15%, in 2013 over 2012 was also due in large part to higher dividends received on restricted stock.

Bank-owned life insurance income fell by \$509,000, or 28%, in 2014 relative to 2013, but increased by \$367,000, or 26%, in 2013 over 2012, due mainly to fluctuations in income on BOLI associated with deferred compensation plans. The Company owns and derives income from two basic types of BOLI: "general account" and "separate account." At December 31, 2014 the Company had \$38.3 million invested in single-premium general account BOLI, including \$2.1 million from the acquisition of SCVB. This BOLI generates income that is used to fund expenses associated with

executive salary continuation plans, director retirement plans and other employee benefits. Interest credit rates on general account BOLI do not change frequently and the income is typically fairly consistent, but rate reductions have led to slightly reduced income levels in recent periods. The SCVB BOLI added toward the end of 2014 should help mitigate the impact of any rate reductions in 2015. In addition to general account BOLI the Company had \$4.7 million invested in separate account BOLI at December 31, 2014, which produces income that helps offset deferred compensation accruals for certain directors and senior officers. These deferred compensation BOLI accounts have returns pegged to participant-directed investment allocations that can include equity, bond, or real estate indices, and are thus subject to gains or losses which often contribute to significant fluctuations in income (and associated expense accruals). There was a gain on separate account BOLI totaling \$315,000 in 2014 relative to a gain of \$770,000 in 2013, for a year over year decrease of \$455,000 in deferred compensation BOLI income. There was also a gain on separate account BOLI totaling \$339,000 in 2012, for an increase of \$431,000 in 2013 over 2012. As noted, gains and losses on separate account BOLI are related to expense accruals or reversals associated with participant gains and losses on deferred compensation balances, thus their impact on taxable income tends to be neutral.

Gains on the sale of loans dropped to immaterial levels in 2014 since the Company has been retaining almost all of the loans it originates. Loan servicing income has likewise dropped to insignificant levels in recent periods. We did, however, realize \$667,000 in gains on the sale of investments in 2014 relative to only \$6,000 for 2013. Investment gains totaled \$1.762 million in 2012, due to the sale of approximately \$49 million in mortgage-backed and municipal securities to provide additional liquidity for loan growth.

The next line item reflects pass-through losses associated with our investments in low-income housing tax credit funds and other limited partnership investments. Those costs, which are netted out of revenue, increased by \$98,000, or 9%, in 2014 over 2013, and by \$668,000, or 169%, in 2013 over 2012. Costs were lower in 2012 due to cumulative accrual adjustments that are not expected to be repeated.

Other non-interest income includes gains and losses on the disposition of assets other than OREO, rent on bank-owned property other than OREO, life insurance proceeds, and other miscellaneous income. Other non-interest income was down \$525,000 in 2014 relative to 2013 but increased by \$356,000 in 2013 over 2012, due primarily to life insurance proceeds of \$397,000 received in 2013. There was also a reduction of \$71,000 in non-recurring gains on the disposition of equipment and other fixed assets in 2014. Income generated through the Company's alliance with Investment Centers of America ("ICA") has been included in this line item, but the Company terminated its affiliation with ICA effective July 31, 2014 so related income was down \$52,000 in 2014. While non-interest income will continue to be negatively impacted in future periods, certain expenses associated with our ICA relationship will also be eliminated and the net financial impact on the Company is not expected to be material.

Total operating expense, or non-interest expense, increased by \$1.560 million, or 3%, in 2014 over 2013, but declined by \$1.841 million, or 4%, in 2013 relative to 2012. The increase in 2014 is centered in non-recurring acquisition costs, expenses associated with our core system conversion, and compensation costs, partially offset by substantial gains on the sale of foreclosed assets. The drop in 2013 was primarily due to lower net costs associated with foreclosed assets, partially offset by higher compensation costs. Non-interest expense includes the following items of a non-recurring nature: direct acquisition costs totaling \$2.070 million in 2014; certain marketing expenses related to our acquisition and the rebranding initiative in 2014; a net OREO expense reversal of \$1.420 million in 2014 due to gains on the sale of OREO; commissions totaling \$290,000 paid with regard to the sale of certain nonperforming loans in 2014; credits totaling \$155,000 received in 2014 for incorrect telecommunications billings in prior periods; net OREO expense of \$1.529 million for 2013 and \$4.914 million in 2012; and a \$75,000 non-recurring expense offset in 2012 in conjunction with the renewal of our contract for debit transaction processing. Due to a higher level of earning assets in 2014, non-interest expense declined to 3.45% of average earning assets for 2014 from 3.60% in 2013 and 3.79% in 2012.

The largest component of operating expense, namely salaries and employee benefits, was up by \$1.006 million, or 5%, in 2014 over 2013, and by \$1.186 million, or 6%, in 2013 over 2012. In 2014, compensation expense was impacted by regular annual salary increases, as well as staffing associated with our acquisition which is ultimately expected to add around \$2 million to annual compensation expense. Furthermore, increases in our accrual for officer bonuses, group health insurance premiums, and the Company's matching contribution to its 401(k) plan added to

expenses in 2014, as did approximately \$190,000 in non-recurring overtime costs related to our core conversion, acquisition, and rebranding initiative. Those increases were partially offset by lower stock option expense in 2014. For 2013, the increase includes normal annual salary adjustments and strategic staff additions, and a higher accrual for officer bonuses. Additional components of compensation expense that can experience significant variability and are typically difficult to predict include salaries associated with successful loan originations, which are accounted for in accordance with Financial Accounting Standards Board (“FASB”) guidelines on the recognition and measurement of non-refundable fees and origination costs for lending activities, and accruals associated with employee deferred compensation plans. Loan origination salaries that were deferred from current expense for recognition over the life of related loans totaled \$2.673 million for 2014, \$2.804 million in 2013, and \$2.745 million in 2012, with the fluctuations due to variability in successful organic loan origination activity. Employee deferred compensation expense accruals totaled \$239,000 in 2014, relative to \$451,000 in 2013 and \$188,000 in 2012. As noted above in our discussion of BOLI income, employee deferred compensation plan accruals are related to separate account BOLI income and losses, as are directors deferred compensation accruals that are included in “other professional services,” and the net income impact of all income/expense accruals related to deferred compensation is usually minimal. Salaries and benefits increased to 49.44% of total operating expense in 2014, from 48.91% in 2013 and 44.44% in 2012. The number of full-time equivalent staff employed by the Company totaled 420 at the end of 2014, 389 at the end of 2013, and 399 at the end of 2012. The increase in 2014 is due primarily to the addition of Santa Clara Valley Bank staff.

Total rent and occupancy expense, including furniture and equipment costs, increased by \$70,000, or 1%, in 2014 over 2013, but dropped by \$107,000, or 2%, in 2013 relative to 2012. In 2014, premises costs were higher due primarily to higher utilities expense and costs associated with our newly-acquired branches. Occupancy expense was favorably impacted in 2013 by lower depreciation expense on furniture and equipment.

Advertising and marketing costs were up by \$245,000, or 13%, in 2014 over 2013, and by \$189,000, or 11%, in 2013 over 2012. The increase in 2014 was due to non-recurring costs incurred in conjunction with our 2014 rebranding efforts and the acquisition, as well as an \$83,000 increase in charitable donations. The increase in 2013 was due to the enhancement of our direct-mail marketing campaign for deposits and an increase in image advertising, and certain expenses incurred in the fourth quarter of 2013 in connection with our 2014 rebranding initiative. We anticipate that marketing costs will be about the same in 2015 as in 2014, despite the elimination of non-recurring costs, due to expenses likely to be incurred in our new market areas.

Data processing costs increased by \$1.154 million, or 74%, in 2014 over 2013, and by \$244,000, or 19%, in 2013 over 2012. The increase in 2014 can be attributed to incremental ongoing costs stemming from our core banking system conversion and upgrades in the first quarter, and the acquisition in the fourth quarter. Costs were up in 2013 due in part to software that was purchased to facilitate more efficient loan origination and processing, including loan document imaging.

Deposit services costs increased by \$182,000, or 8%, in 2014 over 2013, but dropped by \$350,000, or 13%, in 2013 relative to 2012. As with data processing costs, most of the increase in deposit costs in 2014 is the result of ongoing costs associated with our software conversion and the acquisition. The drop in deposit costs in 2013 is due to lower electronic banking costs, lower costs for debit card processing, and smaller reductions in a few other areas.

Loan services costs are comprised of loan processing costs and net costs associated with foreclosed assets. Loan processing costs, which include expenses for property appraisals and inspections, loan collections, demand and foreclosure activities, loan servicing, loan sales, and other miscellaneous lending costs, increased by \$114,000, or 11%, in 2014 over 2013, but declined slightly in 2013 relative to 2012. If not for \$290,000 in non-recurring commissions paid in conjunction with the sale of certain nonperforming loans in 2014, loan processing costs would have improved due to expense reductions in various other categories. Net expenses on foreclosed assets, comprised of write-downs taken subsequent to re-appraisals, OREO operating expense (including property taxes), and losses on the sale of foreclosed assets, net of rental income on OREO properties and gains on the sale of foreclosed assets, actually reflect an overall expense reversal for 2014 due to relatively large gains on the sale of OREO. This line item thus reflects an absolute difference of \$2.949 million in 2014 relative to 2013, and was also down by \$3.385 million, or 69%, for 2013 relative to 2012. In 2014, the largest impact came from a net gain of \$2.253 million on the sale of OREO relative to a net loss of \$223,000 in 2013. OREO write-downs and OREO operating expense were also down in 2014 relative to 2013, by \$277,000 and \$227,000, respectively. For 2013 relative to 2012, we also saw significant reductions in OREO operating expense due to declining levels of OREO and fewer losses on the sale of OREO. Foreclosed asset expenses have been trending down in recent years as real estate values in our markets have improved and real estate sales activity has increased, but we do not expect a recurrence of large gains on the sale of OREO such

as those realized in 2014.

35

The “other operating costs” category includes telecommunications expense, postage, and other miscellaneous costs. Telecommunications expense was reduced by \$330,000, or 20%, in 2014 relative to 2013, but increased by \$64,000, or 4%, in 2013. The reduction in 2014 was due in part to \$155,000 in credits received in 2014 for prior-period overpayments, and also includes the impact of new contract rates and the incorporation of infrastructure efficiencies. The increase in 2013 was due to rate increases as well as costs associated with the addition and enhancement of data circuits. Postage expense increased by \$62,000, or 9%, in 2014 over 2013, but was about the same in 2013 as in 2012. The increase in 2014 is the result of additional mailings to customers in conjunction with our core banking system conversion, the rebranding initiative, and the acquisition. Other miscellaneous costs increased by \$32,000, or 5%, in 2014, but fell by \$83,000, or 11%, in 2013. The increase in 2014 is primarily due to staff travel and meal costs, which were higher than normal during the conversion and the acquisition. The drop in 2013 was due to lower depreciation on operating leases, partially offset by higher recruiting and training costs.

Legal and accounting costs were down \$444,000, or 26%, in 2014 relative to 2013, but increased by \$436,000, or 35%, in 2013 over 2012. The drop in 2014 is due primarily to lower loan review costs and a drop in lending-related legal expense incidental to our improvement in credit quality, as well as lower external audit expense. The increase in 2013 resulted mainly from an increase in legal costs associated with loan collections and higher loan review costs.

Acquisition costs include one-time expenses directly attributable to our acquisition of Santa Clara Valley Bank, which totaled \$2.070 million in 2014. Those expenses are comprised primarily of financial advisor fees, legal costs, severance and retention amounts paid or expected to be paid to SCVB employees, the write-off of furniture, fixtures and equipment that will not be utilized by the Company, software conversion costs, and termination fees on certain SCVB contracts for redundant services.

Other professional services costs include FDIC assessments and other regulatory costs, directors’ costs, certain insurance costs, and professional recruiting fees among other things. This category fell by \$344,000, or 14%, in 2014, but increased by \$253,000, or 11%, in 2013. The drop in 2014 includes a \$71,000 reduction in regulatory assessments, but for both 2014 and 2013 the variances were primarily caused by fluctuations in directors deferred compensation expense, which totaled \$197,000 in 2014, \$482,000 in 2013 and \$187,000 in 2012. As with deferred compensation accruals for employees, directors’ deferred fee accruals are related to separate account BOLI income and losses, and the net income impact of all income/expense accruals related to deferred compensation is usually minimal.

Stationery and supply costs increased by \$535,000, or 81%, in 2014 over 2013, but were reduced by \$81,000, or 11%, in 2013 relative to 2012. Some of the increase in 2014 was due to the rebranding initiative and the conversion, but the bulk of the increase represents recurring costs incidental to our core system conversion. Our utilization of forms and supplies has not materially increased, but prior to the conversion the cost of certain forms and supplies was included with data processing costs. The post-conversion process facilitates the separation of those costs, which are now reflected more properly with stationery and supplies. The reduction in 2013 was due primarily to a change in vendors, and would have been even greater if not for the write-off of certain stationery and supplies in anticipation of the rebranding initiative.

Sundry and teller costs increased by \$156,000, or 44%, in 2014, due to an increase in debit card losses and other operations-related charge-offs. These costs were reduced by \$166,000, or 32%, in 2013 relative to 2012 due to a high level of debit card fraud in 2012.

The Company's tax-equivalent overhead efficiency ratio increased slightly, to 66.75% in 2014 relative to 66.08% in 2013 and 66.39% in 2012. The overhead efficiency ratio represents total non-interest expense divided by the sum of fully tax-equivalent net interest and non-interest income, with the provision for loan losses, investment gains/losses, OREO gains/losses, acquisition costs and certain other non-recurring items excluded from the equation.

Income Taxes

The Company sets aside a provision for income taxes on a monthly basis. As indicated in Note 10 to the consolidated financial statements, the amount of that provision is determined by first applying the Company's statutory income tax rates to estimated taxable income, which is pre-tax book income adjusted for permanent differences between book and taxable income, and then subtracting available tax credits. Permanent differences include but are not limited to tax-exempt interest income, BOLI income, tax credits, and certain book expenses that are not allowed as tax deductions. Because of the relatively high portion of the Company's pretax income that consists of tax-exempt interest income and BOLI income, and the level of tax credits available in relation to our pre-credit tax liability as calculated for book purposes, our tax accrual rate is very sensitive to changes in pretax income.

Our income tax provision for 2014 was \$6.191 million, or 29% of pre-tax income. The Company's income tax provision was \$3.093 million, or 19% of pre-tax income in 2013, and we had a tax benefit of \$344,000 in 2012. The higher income tax provisioning rate in 2014 is due to an increase in taxable income, and the loss of certain California state income tax credits and deductions. The negative provision in 2012 was primarily the result of lower taxable income relative to the Company's available tax credits.

The Company's investments in state, county and municipal bonds provided \$2.936 million in federal tax-exempt income in 2014, \$2.737 million in 2013, and \$2.703 million in 2012. Our bank-owned life insurance also generated \$1.278 million in tax-exempt income in 2014, relative to \$1.787 million in 2013 and \$1.420 million in 2012. Tax credits currently include California state tax employment credits, as well as those generated by our investments in low-income housing tax credit funds. We had a total of \$5.8 million invested in low-income housing tax credit funds as of December 31, 2014, which are included in other assets rather than in our investment portfolio. Those investments have generated substantial tax credits over the past few years, with about \$1.0 million in credits available for the 2014 tax year and \$1.3 million in tax credits utilized in 2013. The credits are dependent upon the occupancy level of the housing projects and income of the tenants, and cannot be projected with certainty. Furthermore, our capacity to utilize them will continue to depend on our ability to generate sufficient pre-tax income. Because we have not invested in additional tax credit funds for the past few years, the level of low-income housing tax credits available for future years will taper off until they are substantially utilized by the end of 2018. That means that even if taxable income stayed at the same level through 2018, our tax accrual rate would gradually increase. Effective January 1, 2014, changes in California tax law eliminated certain state tax credits and deductions, which had a negative impact on our tax accrual rate.

Financial Condition

Assets totaled \$1.637 billion at the end of 2014, reflecting an increase of \$227 million, or 16%, for the year due to growth in gross loan balances and investments, partially offset by reductions in foreclosed assets and balances due from the Federal Reserve Bank. As noted above and outlined in further detail below, the acquisition of Santa Clara Valley Bank in November 2014 had a material impact on balance sheet growth for the year. Loan volume was favorably impacted by \$62 million in SCVB loans, the purchase of \$33 million in residential mortgage loans, and strong organic growth. Total nonperforming assets continue to trend down, and our allowance for loan and lease losses was reduced in 2014 due to the improvement in asset quality. Investment balances were up due to the addition of \$44 million in SCVB investment securities, and the purchase of mortgage-backed securities as we deployed excess liquidity. Total deposits experienced a strong increase in 2014, as a result of the acquisition as well as strong customer deposit growth in our branches. Non-deposit borrowings also increased during 2014, due in part to the addition of SCVB's longer-term Federal Home Loan Bank borrowings.

We have maintained a very strong capital position throughout the recession and in the ensuing years, due to our registered direct offering in 2010 and private placement in 2009 combined with increases in retained earnings in the normal course of business. Furthermore, our liquidity position has been exceptionally strong for the past few years due to robust growth in customer deposits and the runoff of a large volume of wholesale-sourced brokered deposits and

other borrowings, in addition to a substantial increase in unpledged liquid investments. Our healthy capital position and access to liquidity resources position us to take advantage of potential growth opportunities, although no assurance can be provided in that regard. The major components of the Company's balance sheet are individually analyzed below, along with information on off-balance sheet activities and exposure.

Loan and Lease Portfolio

The Company's loan and lease portfolio represents the single largest portion of invested assets, substantially greater than the investment portfolio or any other asset category, and the quality and diversification of the loan and lease portfolio are important considerations when reviewing the Company's financial condition. The Company is not involved with chemicals or toxins that might have an adverse effect on the environment, thus its primary exposure to environmental legislation is through its lending activities. The Company's lending procedures include steps to identify and monitor this exposure in an effort to avoid any related loss or liability. The Selected Financial Data table in Item 6 above reflects the amount of loans and leases outstanding at December 31st for each year from 2010 through 2014, net of deferred fees and origination costs and the allowance for loan and lease losses. The Loan and Lease Distribution table that follows sets forth by loan type the Company's gross loans and leases outstanding, and the percentage distribution in each category at the dates indicated. The balances for each loan type include nonperforming loans, if any, but do not reflect any deferred or unamortized loan origination, extension, or commitment fees, or deferred loan origination costs. Although not reflected in the loan totals below and not currently comprising a material part of our lending activities, the Company occasionally originates and sells, or participates out portions of, loans to non-affiliated investors.

	100.00	%	100.00	%	100.00	%	100.00	%	100.00	%

Excluding the fluctuations caused by variability in outstanding balances on mortgage warehouse lines, the Company experienced limited growth or runoff in loan and lease balances from 2010 through 2013 due to reductions associated with the resolution of impaired loans, weak loan demand, stringent underwriting standards, and intense competition. In 2014, however, net growth in outstanding balances totaled \$167 million, or 21%, with only \$33 million of that growth coming from mortgage warehouse loans. The Company's loan growth in 2014 includes \$62 million in SCVB loans, the purchase of \$33 million in residential mortgage loans, and strong organic growth in agricultural real estate loans, commercial real estate loans, and commercial loans. Reclassifications made in the course of our core conversion contributed to the increase in real estate loans but understate the true increase in commercial loans.

Real estate loans classified as 1-4 family closed-end loans increased \$27 million, or 31%, due to the aforementioned purchase of well-underwritten, newer vintage residential mortgage loans which had an expected average life of about eight years at the time of purchase. Management views the loan purchase primarily as a liquidity deployment strategy rather than a loan growth strategy. Residential construction loans were up \$4 million and multi-family residential loans increased \$10 million, but equity lines fell by \$4 million, or 7%, in 2014. Aggregate commercial real estate loans, which is the principal loan category impacted by the SCVB acquisition, increased \$58 million, or 20%. We are also benefiting from escalating commercial real estate activity in certain markets in our footprint, and as previously noted this category was favorably impacted by the reclassification of \$11 million in loans as “real estate” from “commercial and industrial” in the course of our core conversion. Real estate loans secured by farmland increased \$37 million, or 34%, due to continued strong agricultural activity. Agricultural production loans were also up \$3 million, or 10%. The commercial and industrial loan category, which also gained balances via the acquisition, reflects an increase of \$11 million, or 10%, and would have increased even more if not for the conversion-related reclassifications. Outstanding balances on mortgage warehouse lines were up \$33 million, or 44%, since utilization on lines increased to 47% at December 31, 2014 from 26% at December 31, 2013. Mortgage lending activity is strongly correlated to interest rates and refinancing activity and has historically been subject to significant fluctuations, so no assurance can be provided with regard to our ability to maintain or grow mortgage warehouse balances. Consumer loans have been trending down due to weak demand and tightened credit criteria, and this category again experienced net runoff of \$5 million, or 20%, in 2014. While not reflected in the loan totals above and not currently comprising a material segment of our lending activities, the Company occasionally originates and sells, or participates out portions of, loans to non-affiliated investors.

Loan and Lease Maturities

The following table shows the maturity distribution for total loans and leases outstanding as of December 31, 2014, including non-accruing loans, grouped by remaining scheduled principal payments:

Loans and Lease Maturity

(dollars in thousands)

	As of December 31, 2014				Total	Floating rate: due after one year	Fixed rate: due after one year
	Three months or less	Three months to twelve months	One to five years	Over five years			
Real Estate	\$29,337	\$37,412	\$84,085	\$553,396	\$704,230	\$377,402	\$260,079
Agricultural	4,347	19,515	1,962	1,922	27,746	1,583	2,301

Edgar Filing: SIERRA BANCORP - Form 10-K

Commercial and Industrial	6,270	34,245	24,414	48,842	113,771	24,112	49,144
Mortgage warehouse lines	-	106,021	-	-	106,021	-	-
Consumer Loans	1,025	1,311	5,874	10,675	18,885	899	15,650
Total	\$40,979	\$ 198,504	\$ 116,335	\$ 614,835	\$970,653	\$ 403,996	\$ 327,174

For a comprehensive discussion of the Company’s liquidity position, balance sheet re-pricing characteristics, and sensitivity to interest rates changes, refer to the “Liquidity and Market Risk” section of this discussion and analysis.

Off-Balance Sheet Arrangements

The Company makes commitments to extend credit to its customers in the normal course of business, as long as there are no violations of conditions established in contractual arrangements. The effect on the Company’s revenues, expenses, cash flows and liquidity from unused portions of commitments to provide credit cannot be reasonably predicted, because there is no certainty that lines of credit will ever be fully utilized. Unused commitments to extend credit totaled \$367 million at December 31, 2014, as compared to \$421 million at December 31, 2013. The reduction during 2014 was primarily due to a drop in undisbursed commitments on mortgage warehouse lines, resulting from increased line utilization. Unused commitments fell to 38% of gross loans and leases outstanding at December 31, 2014, from 52% at December 31, 2013. In addition to unused loan commitments, the Company had undrawn letters of credit totaling \$14 million at December 31, 2014 and \$17 million at December 31, 2013. Off-balance sheet obligations pose potential credit risk to the Company, and a \$304,000 reserve for unfunded commitments is reflected as a liability in our consolidated balance sheet at December 31, 2014. For more information regarding the Company’s off-balance sheet arrangements, see Note 11 to the consolidated financial statements in Item 8 herein.

Contractual Obligations

At the end of 2014, the Company had contractual obligations for the following payments, by type and period due:

Contractual Obligations

(dollars in thousands)

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long-term debt obligations	\$36,928	\$ 4,000	\$ 2,000	\$ -	\$ 30,928
Operating lease obligations	7,829	1,143	2,099	1,499	3,088
Other long-term obligations	914				914
Total	\$45,671	\$ 5,143	\$ 4,099	\$ 1,499	\$ 34,930

Nonperforming Assets

Nonperforming assets (“NPAs”) are comprised of loans for which the Company is no longer accruing interest, and foreclosed assets including mobile homes and OREO. If the Company grants a concession to a borrower in financial difficulty the loan falls into the category of a troubled debt restructuring (“TDR”), which may be classified as either nonperforming or performing depending on the loan’s accrual status. The following table presents comparative data for the Company’s nonperforming assets and performing TDRs as of the dates noted:

Nonperforming Assets and Performing TDRs

Performing TDRs ⁽¹⁾	\$12,359	\$15,239	\$18,652	\$36,058	\$12,465
Nonperforming loans as a % of total gross loans and leases	2.13 %	4.66 %	6.03 %	7.41 %	5.70 %
Nonperforming assets as a % of total gross loans and leases and foreclosed assets	2.53 %	5.62 %	8.10 %	9.25 %	8.07 %

⁽¹⁾ Performing TDRs are not included in nonperforming loans above, nor are they included in the numerators used to calculate the ratios disclosed in this table.

At the end of 2006, prior to the recession, NPAs totaled less than \$1 million and comprised only 0.08% of total loans and leases plus foreclosed assets. They subsequently escalated to as high as \$80 million, or close to 9% of total loans and leases plus foreclosed assets at September 30, 2009, due to deterioration in economic conditions and the associated negative impact on our borrowers. By the end of 2014 total NPAs had declined to \$24.7 million, or less than 3% of gross loans and leases plus foreclosed assets, in response to better economic conditions and our concerted efforts to improve credit quality. This contraction in NPAs includes a drop of \$21 million, or 46%, during 2014, comprised of a \$17 million reduction in nonperforming loans and a \$4 million reduction in foreclosed assets. The balance of nonperforming loans at December 31, 2014 includes \$4.8 million in TDRs and other loans that were paying as agreed under modified terms or forbearance agreements but were still classified as nonperforming. We also had \$12.4 million in loans classified as performing TDRs for which we were still accruing interest at December 31, 2014, a reduction of \$2.9 million, or 19%, relative to performing TDRs at December 31, 2013. Notes 2 and 4 to the consolidated financial statements provide a more comprehensive disclosure of TDR balances and activity within recent periods.

Non-accruing loan balances secured by real estate comprised \$19.0 million of total nonperforming loans at December 31, 2014, down \$14.3 million, or 43%, since December 31, 2013. The gross reduction in nonperforming real estate loans totaled \$21.7 million during 2014, due in part to the sale of \$10 million in nonperforming loans and a material pay-down on one of our largest nonperforming loans, but reductions were partially offset by the migration of \$7.4 million in real estate loans to non-accrual status. Nonperforming ag production loans were down \$470,000, to a balance of zero at year-end 2014. Nonperforming commercial loans declined by \$1.8 million, or 69%, in 2014, ending the period at \$821,000. Nonperforming consumer loans, which are largely unsecured, declined by \$166,000, or 17%, to a balance of \$826,000 at December 31, 2014.

As noted above, foreclosed assets were reduced by \$4.2 million, or 51%, in 2014, due to OREO sold or written down to current fair values during the year. At December 31, 2014 foreclosed assets had an aggregate carrying value of \$4.0 million, comprised of 24 properties classified as OREO and 3 mobile homes. Much of our OREO at year-end 2014 consisted of vacant lots or land, but there were also two residential properties totaling \$386,000 and 8 commercial properties with a combined book balance of \$1.2 million. At the end of 2013 foreclosed assets totaled \$8.2 million, comprised of 33 properties in OREO and five mobile homes. All foreclosed assets are periodically evaluated and written down to their fair value less expected disposition costs, if lower than the then-current carrying value.

An action plan is in place for each of our non-accruing loans and foreclosed assets and they are all being actively managed or marketed. Collection efforts are continuously pursued for all nonperforming loans, but no assurance can be provided that they will be resolved in a timely manner or that nonperforming balances will not increase further.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses, a contra-asset, is established through a provision for loan and lease losses. It is maintained at a level that is considered adequate to absorb probable losses on specifically identified impaired loans, as well as probable incurred losses inherent in the remaining loan portfolio. Specifically identifiable and quantifiable losses are immediately charged off against the allowance; recoveries are generally recorded only when cash payments are received subsequent to the charge off. Note 2 to the consolidated financial statements provides a more comprehensive discussion of the accounting guidance we conform to and the methodology we use to determine an appropriate allowance for loan and lease losses.

The Company's allowance for loan and lease losses was \$11.2 million as of December 31, 2014, down slightly from the \$11.7 million balance at December 31, 2013. Due to loan growth and credit quality improvement, and the fact that Santa Clara Valley Bank loans were acquired at their fair values, the overall allowance declined to 1.16% of total loans at December 31, 2014 from 1.45% at December 31, 2013. Because of the reduction in nonperforming loans, the ratio of the allowance to nonperforming loans increased to 54.40% at December 31, 2014, from 31.21% at December 31, 2013. In addition to our allowance for loan and lease losses, a \$304,000 allowance for potential losses inherent in unused commitments is included in other liabilities as of December 31, 2014.

The table that follows summarizes the activity in the allowance for loan and lease losses for the periods indicated:

Net Loan and Lease Charge-offs to Average Loans and Leases	0.09	%	0.81	%	2.23	%	2.06	%	2.26	%
Allowance for Loan and Lease Losses to Gross Loans and Leases at End of Period	1.16	%	1.45	%	1.58	%	2.28	%	2.63	%
Allowance for Loan Losses to Non-Performing Loans	54.40	%	31.21	%	26.13	%	30.80	%	46.00	%
Net Loan and Lease Charge-offs to Allowance for Loan Losses at End of Period	6.93	%	56.06	%	127.01	%	91.74	%	91.10	%
Net Loan Charge-offs to Provision for Loan and Lease Losses	222.57	%	150.48	%	124.00	%	132.13	%	115.45	%

As shown in the table immediately above, the Company's provision for loan and lease losses, which is credited to the allowance, was decreased by \$4.000 million, or 92%, in 2014 relative to 2013. The dollar volume of net loan losses charged off against the allowance also declined by \$5.767 million, or 88%. Our allowance for loan and lease losses is maintained at a level to cover probable losses on specifically identified loans as well as probable incurred losses in the remaining loan portfolio, and any shortfall in the allowance identified pursuant to our analysis of probable losses is covered by the end of each reporting period. Our allowance for probable losses on specifically identified impaired loans increased slightly during 2014 due to loss reserves established for loans migrating from non-impaired to impaired status during the year, partially offset by the charge-off of losses against the allowance. The allowance for probable losses inherent in non-impaired loans declined by \$527,000, despite higher loan balances, as a reflection of continued improvement in the credit quality of non-impaired loans. Additional details on our provision for loan and lease losses and its relationship to actual charge-offs is contained above in the "Provision for Loan and Lease Losses" section.

Provided below is a summary of the allocation of the allowance for loan and lease losses for specific loan categories at the dates indicated. The allocation presented should not be viewed as an indication that charges to the allowance will be incurred in these amounts or proportions, or that the portion of the allowance allocated to a particular loan category represents the total amount available for charge-offs that may occur within that category.

(2) Includes mortgage warehouse lines

The Company's allowance for loan and lease losses at December 31, 2014 represents management's best estimate of probable losses in the loan portfolio as of that date, but no assurance can be given that the Company will not experience substantial losses relative to the size of the allowance. Furthermore, fluctuations in credit quality, changes in economic conditions, updated accounting or regulatory requirements, and/or other factors could induce us to augment or reduce the allowance.

Investments

The Company's investments consist of debt and marketable equity securities (together, the "investment portfolio"), investments in the time deposits of other banks, surplus interest-earning balances in our Federal Reserve Bank account, and overnight fed funds sold. Surplus FRB balances and fed funds sold to correspondent banks represent the investment of temporary excess liquidity. The Company's investments serve several purposes: 1) they provide liquidity to even out cash flows from the loan and deposit activities of customers; 2) they provide a source of pledged assets for securing public deposits, bankruptcy deposits and certain borrowed funds which require collateral; 3) they constitute a large base of assets with maturity and interest rate characteristics that can be changed more readily than the loan portfolio, to better match changes in the deposit base and other funding sources of the Company; 4) they are an alternative interest-earning use of funds when loan demand is light; and 5) they can provide partially tax exempt income. Aggregate investments totaled \$514 million, or 31% of total assets at December 31, 2014, compared to \$452 million, or 32% of total assets at December 31, 2013.

We had no fed funds sold at December 31, 2014 or 2013, and interest-bearing balances held at other banks dropped to \$2 million at December 31, 2014 from \$27 million at December 31, 2013 as excess liquidity was invested in higher-yielding longer-term bonds. The Company's investment securities reflect an increase of \$87 million, or 20%, during 2014, due to \$44 million in bonds added via the Santa Clara Valley Bank acquisition and the purchase of mortgage-backed securities as we deployed excess liquidity. The Company carries investments on its books at their fair market values. Although the Company currently has the intent and the ability to hold the securities in its investment portfolio to maturity, the securities are all marketable and are classified as "available for sale" to allow maximum flexibility with regard to interest rate risk and liquidity management.

The following Investment Portfolio table reflects the amortized cost and fair market values for each primary category of investments for the past three years:

Investment Portfolio-Available for Sale

(dollars in thousands)

	As of December 31,		2013		2012	
	2014		Amortized	Fair Market	Amortized	Fair Market
	Cost	Value	Cost	Value	Cost	Value
US Government Agencies	\$26,959	\$ 27,270	\$5,395	\$ 5,304	\$2,987	\$ 2,973
Mortgage-backed securities	378,339	381,442	320,223	320,721	298,806	301,389
State and political subdivisions	98,056	100,949	97,361	96,563	70,736	73,986
Equity securities	1,210	2,222	1,336	2,456	1,336	1,840
Total securities	\$504,564	\$ 511,883	\$424,315	\$ 425,044	\$373,865	\$ 380,188

The net unrealized gain on our investment portfolio, or the difference between the fair market value and amortized cost, was \$7.319 million at December 31, 2014, up from a net unrealized gain of \$729,000 at December 31, 2013 due to higher market values resulting from a drop in longer-term interest rates in 2014. The rate decline had a sizeable impact on the carrying values of our mortgage-backed securities and municipal bonds, in particular. All of the bonds from the acquisition of SCVB in November 2014 were booked at their fair values as of the acquisition date, with no unrealized gain or loss at the time.

The value of U.S. Government agency securities increased by \$22 million, or 414%, during 2014, due primarily to bonds from the acquisition. Mortgage-backed securities increased by \$61 million, or 19%, due to the acquisition, bond purchases, and higher market values. New purchases also pushed the balance of municipal bonds up by \$4 million, or 5%, due to bond purchases and higher market values. It should be noted that all newly purchased municipal bonds have strong underlying ratings, and all municipal bonds in our portfolio are evaluated quarterly for potential

impairment. None of the securities from SCVB were municipal bonds. We sold one of our equity positions for a realized gain of \$238,000 in the fourth quarter of 2014, thus the market value of our equity securities reflects a drop of \$234,000, or 10%, for the year.

Investment securities pledged as collateral for FHLB borrowings, repurchase agreements, public deposits and for other purposes as required or permitted by law totaled \$141 million at December 31, 2014 and \$164 million at December 31, 2013, leaving \$369 million in unpledged debt securities at December 31, 2014 and \$258 million at December 31, 2013. Securities pledged in excess of actual pledging needs and thus available for liquidity purposes, if necessary, totaled \$25 million at December 31, 2014 and \$67 million at December 31, 2013.

The investment maturities table below summarizes contractual maturities for the Company's investment securities and their weighted average yields at December 31, 2014. The actual timing of principal payments may differ from remaining contractual maturities, because obligors may have the right to prepay certain obligations.

Maturity and Yield of Available for Sale Investment Portfolio

(dollars in thousands)

	December 31, 2014

Cash and Due from Banks

Cash on hand and non-interest bearing balances due from correspondent banks totaled \$48 million, or 3% of total assets at December 31, 2014, and \$51 million, or 4% of total assets at December 31, 2013. The actual balance of cash and due from banks at any given time depends on the timing of collection of outstanding cash items (checks), among other things, and is subject to significant fluctuation in the normal course of business. While cash flows are normally predictable within limits, those limits are fairly broad and the Company manages its short-term cash position through the utilization of overnight loans to and borrowings from correspondent banks, the Federal Reserve Bank and the Federal Home Loan Bank. Should a large “short” overnight position persist for any length of time, the Company typically raises money through focused retail deposit gathering efforts or by adding brokered time deposits. If a “long” position is prevalent, the Company will let brokered deposits or other wholesale borrowings roll off as they mature, or might invest excess liquidity in higher-yielding, longer-term bonds. Because of frequent balance fluctuations, a more accurate gauge of cash management efficiency is the average balance for the period. Our \$39 million average for non-earning cash and due from banks in 2014 is slightly higher than the average for 2013, and the average is expected to increase again in 2015 due to cash needed for the SCVB branches added in November 2014.

Premises and Equipment

Premises and equipment are stated on our books at cost, less accumulated depreciation and amortization. The cost of furniture and equipment is expensed as depreciation over the estimated useful life of the related assets, and leasehold improvements are amortized over the term of the related lease or the estimated useful life of the improvements, whichever is shorter. The following premises and equipment table reflects the original cost, accumulated depreciation and amortization, and net book value of fixed assets by major category, for the years noted:

Premises and Equipment

(dollars in thousands)

	As of December 31, 2014			2013			2012		
	Cost	Accumulated Depreciation and Ammortization	Net Book Value	Cost	Accumulated Depreciation and Ammortization	Net Book Value	Cost	Accumulated Depreciation and Ammortization	Net Book Value
Land	\$3,019	\$ -	\$ 3,019	\$2,607	\$ -	\$ 2,607	\$2,607	\$ -	\$ 2,607
Buildings	16,348	8,105	8,243	15,818	7,689	8,129	15,720	7,259	8,461
Furniture and equipment	18,397	13,919	4,478	17,829	14,487	3,342	20,476	16,562	3,914
Leasehold improvements	10,850	4,784	6,066	10,536	4,226	6,310	10,496	3,652	6,844
Construction in progress	47	-	47	5	-	5	4	-	4
Total	\$48,661	\$ 26,808	\$ 21,853	\$46,795	\$ 26,402	\$ 20,393	\$49,303	\$ 27,473	\$ 21,830

Net premises and equipment increased by \$1.5 million, or 7%, in 2014, due mainly to fixed assets added via the acquisition of SCVB and new equipment purchased in conjunction with our core system conversion. The net book value of the Company's premises and equipment was 1.3% of total assets at December 31, 2014, and 1.4% at December 31, 2013. Depreciation and amortization included in occupancy and equipment expense was \$2.1 million for both 2014 and 2013.

Other Assets

The Company's goodwill and other intangible assets totaled \$8.0 million at December 31, 2014 relative to \$5.5 million at December 31, 2013. The balance at December 31, 2013 consists solely of goodwill that was generated in connection with our acquisition of Sierra National Bank in 2000, while the increase during 2014 represents the goodwill and core deposit intangible created by our acquisition of Santa Clara Valley Bank. The Company's goodwill and other intangible assets are evaluated annually for potential impairment. Because the estimated fair value of the Company exceeded its book value (including goodwill and intangible assets) as of the measurement date and no impairment was indicated, no further testing was deemed necessary and it was determined that goodwill and other intangible assets were not impaired.

The net cash surrender value of the Company's bank-owned life insurance increased to \$43.0 million at December 31, 2014 from \$39.4 million at December 31, 2013, due to \$2.1 million in BOLI from SCVB and the addition of BOLI income to the outstanding net cash surrender value during the course of the year. Refer to the the "Non-Interest Revenue and Operating Expense" section above for a more detailed discussion of BOLI and the income it generates.

The line item for "other assets" on the Company's balance sheet totaled \$37.5 million at December 31, 2014, relative to \$40.5 million at December 31, 2013. The \$3.0 million decrease is primarily due to lower prepaid current taxes and a declining level of tax credit funds, partially offset by a higher balance of restricted stock and a higher level of accrued interest receivable. At year-end 2014, other assets included as its largest components a net deferred tax asset of \$12.8 million, a \$7.0 million investment in restricted stock, accrued interest receivable totaling \$5.9 million, a \$5.8 million investment in low-income housing tax credit funds, and a \$1.5 million investment in a small business investment corporation. Restricted stock is comprised primarily of Federal Home Loan Bank of San Francisco ("FHLB") stock held in conjunction with our FHLB borrowings, and is not deemed to be marketable or liquid. Our net deferred tax asset is evaluated as of every reporting date pursuant to FASB guidance, and we have determined that no impairment exists.

Deposits

Deposits are another key balance sheet component impacting our net interest margin and other profitability metrics. Deposits provide liquidity to fund growth in earning assets, and the Company's net interest margin is improved to the extent that growth in deposits is concentrated in less volatile and typically less costly non-maturity deposits such as demand deposit accounts, NOW accounts, savings accounts, and money market demand accounts. Information concerning average balances and rates paid on deposits by deposit type for the past three fiscal years is contained in the Distribution, Rate, and Yield table located in the previous section under Results of Operations—Net Interest Income and Net Interest Margin. A distribution of the Company's deposits showing the balance and percentage of total deposits by type is presented for the noted periods in the following table:

Deposit Distribution

Total	100.00	%	100.00	%	100.00	%	100.00	%	100.00	%

Total deposit balances increased by \$193 million, or 16%, during 2014, due to \$108 million in deposits added through the acquisition of SCVB and strong organic growth in core non-maturity deposits. Non-maturity deposits were up \$197 million, or 23%, for the year, including over \$90 million in non-maturity deposits from the acquisition. The growth in non-maturity deposits during 2014 occurred in the following categories: transaction accounts, comprised of demand deposits and NOW accounts, which increased \$129 million, or 20%; savings deposits, which increased \$23 million, or 16%; and money market balances, which were up \$45 million, or 61%. Of note, about \$40 million in non-interest bearing account balances were transitioned to interest-bearing transaction accounts in the course of our core conversion in February 2014, thus impacting the variances within transaction accounts. Aggregate customer time deposits, including CDARs deposits which are primarily sourced from customers in our market areas, were static for the year, while wholesale-sourced brokered deposits were reduced by \$5 million, or 50%. Excluding the boost provided by SCVB deposits, time deposits have been trending down due in large part to the intentional non-renewal of deposits managed by our Treasury Department. Management is of the opinion that a relatively high level of core customer deposits is one of the Company's key strengths and we continue to strive for retention and growth, although no assurance can be provided with regard to core deposit growth or potential runoff.

The scheduled maturity distribution of the Company's time deposits at the end of 2014 was as follows:

Deposit Maturity Distribution

(dollars in thousands)

	As of December 31, 2014					Total
	Three months or less	Three to six months	Six to twelve months	One to three years	Over three years	
CDAR's	\$9,055	\$ 1,346	\$ 898	\$ -	\$ -	\$11,299

Total	\$222,280	\$ 43,463	\$ 29,356	\$ 6,672	\$ 2,131	\$303,902

Other Borrowings

The Company's non-deposit borrowings may, at any given time, include fed funds purchased from correspondent banks, borrowings from the Federal Home Loan Bank, advances from the Federal Reserve Bank, securities sold under agreement to repurchase, and/or junior subordinated debentures. The Company uses short-term FHLB advances and fed funds purchased on uncommitted lines to support liquidity needs created by seasonal deposit flows, to temporarily satisfy funding needs from increased loan demand, and for other short-term purposes. The FHLB line is committed, but the amount of available credit depends on the level of pledged collateral.

Total non-deposit interest-bearing liabilities increased by \$25 million, or 69%, in 2014, due to an increase in overnight borrowings from the Federal Home Loan Bank to support strong loan growth and longer-term FHLB borrowings originated by SCVB. We had \$18 million in overnight FHLB borrowings and \$6 million in long-term FHLB borrowings at December 31, 2014, both up from zero at December 31, 2013. Repurchase agreements totaled \$7 million at December 31, 2014, relative to \$6 million at December 31, 2013. Repurchase agreements represent "sweep accounts", where commercial deposit balances above a specified threshold are transferred at the close of each business day into non-deposit accounts secured by investment securities. We had no fed funds purchased and no advances from the FRB on our books at December 31, 2014 or December 31, 2013. The Company had junior subordinated debentures totaling \$31 million at December 31, 2014 and December 31, 2013, in the form of long-term borrowings from trust subsidiaries formed specifically to issue trust preferred securities.

The details of the Company's short-term borrowings are presented in the table below, for the years noted:

Short-term Borrowings

(dollars in thousands)

	Year Ended December 31,					
	2014	2013	2012			
Repurchase Agreements						
Balance at December 31	\$7,251	\$5,974	\$1,419

Average interest rate for the year	N/A	N/A	N/A			
FHLB advances						
Balance at December 31	\$18,200	\$-	\$36,650			
Average amount outstanding	3,502	3,497	15,234			
Maximum amount outstanding at any month end	25,180	58,500	66,520			
Average interest rate for the year	0.11 %	0.17 %	0.24 %			

Other Non-Interest Bearing Liabilities

Other liabilities are principally comprised of accrued interest payable, other accrued but unpaid expenses, and certain clearing amounts. Other liabilities increased by \$4 million, or 21%, to \$21 million at December 31, 2014 from \$17 million at December 31, 2013, due primarily to an increase in our accrued liability for income taxes and accrued but unpaid acquisition costs.

Capital Resources

At December 31, 2014, the Company had total shareholders' equity of \$187.1 million, comprised of common stock, additional paid-in capital, retained earnings, and accumulated other comprehensive income. Total shareholders' equity at the end of 2013 was \$181.7 million. The \$5.4 million increase during 2014 was due in part to an increase in retained earnings resulting from the addition of \$15.2 million in net earnings, less \$4.8 million in dividends paid and a

\$7.3 million reduction incidental to stock repurchases. Equity was also augmented by a \$3.9 million increase in accumulated other comprehensive income in 2014, which represents the increase in the unrealized gain on our investment securities net of the tax effect. Changes in common stock and additional paid-in capital are related to stock repurchases, stock option exercises, and the expensing of unvested stock options.

The Company uses a variety of measures to evaluate its capital adequacy, including risk-based capital and leverage ratios that are calculated separately for the Company and the Bank. Management reviews these capital measurements on a quarterly basis and takes appropriate action to help ensure that they meet or surpass established internal and external guidelines. The following table sets forth the Company's and the Bank's regulatory capital ratios as of the dates indicated:

	December 31, 2014		December 31, 2013	
Sierra Bancorp				
Total Capital to Total Risk-weighted Assets	18.44	%	21.67	%
Tier 1 Capital to Total Risk-weighted Assets	17.39	%	20.39	%
Tier 1 Leverage Ratio	12.99	%	14.37	%
Bank of the Sierra				
Total Capital to Total Risk-weighted Assets	18.02	%	21.35	%
Tier 1 Capital to Total Risk-weighted Assets	17.01	%	20.11	%
Tier 1 Leverage Ratio	12.72	%	14.18	%

We estimate that the acquisition of SCVB reduced our total risk-based capital ratios by approximately 150 basis points, with the remainder of the drop in 2014 resulting from organic growth in risk-adjusted assets and the utilization of capital via stock repurchases. As of the end of 2014, the Company and the Bank were both classified as “well capitalized,” the highest rating of the categories defined under the Bank Holding Company Act and the Federal Deposit Insurance Corporation Improvement Act of 1991. We do not foresee any circumstances that would cause the Company or the Bank to be less than well capitalized, although no assurance can be given that this will not occur. For additional details on risk-based and leverage capital guidelines, requirements, and calculations and for a summary of changes to risk-based capital calculations which were recently approved by federal banking regulators, see “Item 1, Business – Supervision and Regulation – Capital Adequacy Requirements” and “Item 1, Business – Supervision and Regulation – Prompt Corrective Action Provisions” herein.

Liquidity and Market Risk Management

Liquidity

Liquidity refers to the Company’s ability to maintain cash flows that are adequate to fund operations and meet other obligations and commitments in a timely and cost-effective manner. Detailed cash flow projections are reviewed by management on a monthly basis, with various scenarios applied to assess our ability to meet liquidity needs under adverse conditions. Liquidity ratios are also calculated and reviewed on a regular basis. While those ratios are merely indicators and are not measures of actual liquidity, they are closely monitored and we are focused on maintaining adequate liquidity resources to draw upon should unexpected needs arise.

The Company, on occasion, experiences cash needs as the result of loan growth, deposit outflows, asset purchases or liability repayments. To meet short-term needs, the Company can borrow overnight funds from other financial institutions, draw advances via Federal Home Loan Bank lines of credit, or solicit brokered deposits if deposits are not immediately obtainable from local sources. Availability on lines of credit from correspondent banks and the FHLB

totaled \$243 million at December 31, 2014. An additional \$161 million in credit is available from the Federal Home Loan Bank if the Company pledges sufficient additional collateral and maintains the required amount of FHLB stock. The Company is also eligible to borrow approximately \$53 million at the Federal Reserve Discount Window, if necessary, based on pledged assets at December 31, 2014. Furthermore, funds can be obtained by drawing down the Company's correspondent bank deposit accounts, or by liquidating unpledged investments or other readily saleable assets. In addition, the Company can raise immediate cash for temporary needs by selling under agreement to repurchase those investments in its portfolio which are not pledged as collateral. As of December 31, 2014, unpledged debt securities plus pledged securities in excess of current pledging requirements comprised \$394 million of the Company's investment balances, up from \$325 million at December 31, 2013. Other forms of balance sheet liquidity include but are not necessarily limited to any outstanding fed funds sold and vault cash. The Company has a higher level of actual balance sheet liquidity than might otherwise be the case, since we utilize a letter of credit from the FHLB rather than investment securities for certain pledging requirements. The FHLB letter of credit, which is backed by loans that are pledged to the FHLB by the Company, totaled \$88 million at December 31, 2014. Management is of the opinion that available investments and other potentially liquid assets, along with the standby funding sources it has arranged, are more than sufficient to meet the Company's current and anticipated short-term liquidity needs.

The Company's net loans to assets and available investments to assets ratios were 59% and 24%, respectively, at December 31, 2014, as compared to internal policy guidelines of "less than 78%" and "greater than 3%." Other liquidity ratios reviewed periodically by management and the Board include net loans to total deposits and wholesale funding to total assets (including ratios and sub-limits for the various components comprising wholesale funding), which were well within policy guidelines at December 31, 2014. Strong growth in core deposits and relatively high levels of potentially liquid investments have had a positive impact on our liquidity position in recent periods, although no assurance can be provided that our liquidity will continue at current robust levels.

The holding company's primary uses of funds are ordinary operating expenses, shareholder dividends and stock repurchases, and its primary source of funds is dividends from the Bank since the holding company does not conduct regular banking operations. Management anticipates that there will be sufficient earnings at the Bank to provide dividends to the holding company to meet its funding requirements for the foreseeable future. Both the holding company and the Bank are subject to legal and regulatory limitations on dividend payments, as outlined in Item 5(c) Dividends in this Form 10-K.

Interest Rate Risk Management

Market risk arises from changes in interest rates, exchange rates, commodity prices and equity prices. The Company does not engage in the trading of financial instruments, nor does it have exposure to currency exchange rates. Our market risk exposure is primarily that of interest rate risk, and we have established policies and procedures to monitor and limit our earnings and balance sheet exposure to changes in interest rates. The principal objective of interest rate risk management is to manage the financial components of the Company's balance sheet in a manner that will optimize the risk/reward equation for earnings and capital under a variety of interest rate scenarios. To identify areas of potential exposure to interest rate changes, we perform earnings simulations and calculate the Company's market value of portfolio equity under varying interest rate scenarios every month.

We use commercially-available modeling software to simulate the effects of potential interest rate changes on our net interest income. The model imports relevant information for the Company's financial instruments and incorporates management's assumptions on pricing, duration, and optionality for anticipated new volumes. Various rate scenarios, consisting of key rate and yield curve projections, are then applied in order to calculate the expected effect of a given interest rate change on projected interest income and interest expense. The rate projections can be shocked (an immediate and parallel change in all base rates, up or down), ramped (an incremental increase or decrease in rates over a specified time period), economic (based on current trends and econometric models) or stable (unchanged from current actual levels).

We use eight standard interest rate scenarios in conducting our simulations: "stable," upward shocks of 100, 200, 300 and 400 basis points, and downward shocks of 100, 200, and 300 basis points. Pursuant to policy guidelines, we typically attempt to limit the projected 12-month decline in net interest income relative to the stable rate scenario to no

more than 5% for a 100 basis point (bp) shock, 10% for a 200 bp shock, 15% for a 300 bp shock, and 20% for a 400 bp shock in interest rates. As of December 31, 2014 the Company had the following estimated net interest income sensitivity profile, without factoring in any potential negative impact on spreads resulting from competitive pressures or credit quality deterioration:

Immediate Change in Rate

	-300 bp	-200 bp	-100 bp	+100 bp	+200 bp	+300 bp	+400 bp
Change in Net Int. Inc. (in \$000's)	\$-14,296	\$-10,248	\$-5,481	\$+918	\$+1,827	\$+2,561	\$+3,142
% Change	-25.01 %	-17.93 %	-9.59 %	+1.61 %	+3.20 %	+4.48 %	+5.50 %

Our current simulations indicate that the Company has an asset-sensitive profile, meaning that net interest income increases in rising interest rate scenarios but a drop in interest rates could have a negative impact. The Company's increasing balance of lower-cost non-maturity deposits would typically lead to further improvement in net interest income in rising rate scenarios, but that impact has been counteracted in recent periods by a growing proportion of fixed-rate assets.

If there were an immediate and sustained downward adjustment of 100 basis points in interest rates, all else being equal, net interest income over the next twelve months would likely be around \$5.481 million lower than in a stable interest rate scenario, for a negative variance of 9.59%. The unfavorable variance increases when rates drop 200 or 300 basis points, due to the fact that certain deposit rates are already relatively low (on NOW accounts and savings accounts, for example), and will hit a natural floor of close to zero while some variable-rate loan yields continue to drop. This effect is exacerbated by accelerated prepayments on fixed-rate loans and mortgage-backed securities when rates decline, although rate floors on some of our variable-rate loans partially offset other negative pressures. While we view declining interest rates as highly unlikely, the potential percentage reduction in net interest income exceeds our internal policy guidelines in declining interest rate scenarios and we will continue to monitor our interest rate risk profile and take corrective action as deemed appropriate.

Net interest income would likely improve by \$918,000, or 1.61%, if interest rates were to increase by 100 basis points relative to a stable interest rate scenario, with the favorable variance expanding the higher interest rates rise. The initial increase in rising rate scenarios will be limited to some extent by the fact that many of our variable-rate loans are currently at rate floors, resulting in a re-pricing lag while variable rates are increasing to floored levels, but the Company still appears well-positioned to benefit from an upward shift in the yield curve.

In recent periods we have added scenarios to our net interest income simulations to model the possibility of no growth, the potential runoff of “surge” core deposits which flowed into the Bank in the most recent economic cycle, and potential unfavorable shifts in deposit rates. Even though net interest income will naturally be lower under static growth assumptions, the changes under declining and rising rates relative to a base case of flat rates are similar to the changes noted above for our standard projections. If a certain level of deposit runoff is assumed, projected net interest income in declining rate and flat rate scenarios does not change materially relative to standard growth projections, but the benefit we would otherwise experience in rising rate scenarios is muted. When unfavorable rate changes on deposits are factored into the model, net interest income remains relatively flat even in rising interest rate scenarios.

The economic value (or “fair value”) of financial instruments on the Company’s balance sheet will also vary under the interest rate scenarios previously discussed, and potential variances are modeled using the same software that is utilized for net interest income simulations. The difference between the projected fair value of the Company’s financial assets and the fair value of its financial liabilities is referred to as the economic value of equity (“EVE”), and changes in EVE under different interest rate scenarios are effectively a gauge of the Company’s longer-term exposure to interest rate risk. Fair values for financial instruments are estimated by discounting projected cash flows (principal and interest) at projected replacement interest rates for each account type, while the fair value of non-financial accounts is assumed to equal their book value for all rate scenarios. An economic value simulation is a static measure utilizing balance sheet accounts at a given point in time, and the measurement can change substantially over time as the characteristics of the Company’s balance sheet evolve and interest rate and yield curve assumptions are updated.

The change in economic value under different interest rate scenarios depends on the characteristics of each class of financial instrument, including stated interest rates or spreads relative to current or projected market-level interest rates or spreads, the likelihood of principal prepayments, whether contractual interest rates are fixed or floating, and

the average remaining time to maturity. As a general rule, fixed-rate financial assets become more valuable in declining rate scenarios and less valuable in rising rate scenarios, while fixed-rate financial liabilities gain in value as interest rates rise and lose value as interest rates decline. The longer the duration of the financial instrument, the greater the impact a rate change will have on its value. In our economic value simulations, estimated prepayments are factored in for financial instruments with stated maturity dates, and decay rates for non-maturity deposits are projected based on historical patterns and management's best estimates. We have found that model results are highly sensitive to changes in assumed decay rates for non-maturity deposits, in particular. The table below shows estimated changes in the Company's EVE as of December 31, 2014, under different interest rate scenarios relative to a base case of current interest rates:

Immediate Change in Rate

	-300 bp	-200 bp	-100 bp	+100 bp	+200 bp	+300 bp
Change in EVE (in \$000's)	\$ -62,271	\$ -84,444	\$ -39,600	\$ +68,093	\$ +105,899	\$ +138,036
% Change	-17.71 %	-24.01 %	-11.26 %	+19.36%	+30.11%	+39.25%

The table shows that our EVE will generally deteriorate in declining rate scenarios, but should benefit from a parallel shift upward in the yield curve. While still negative relative to the base case, we see a favorable swing in EVE as interest rates drop more than 200 basis points. This is due to the relative durations of our fixed-rate assets and liabilities, combined with the optionality inherent in our balance sheet. As noted previously, however, management is of the opinion that the potential for a significant rate decline is low.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The information concerning quantitative and qualitative disclosures of market risk called for by Item 305 of Regulation S-K is included as part of Item 7 above. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Market Risk Management".

Item 8. Financial Statements and Supplementary Data

The following financial statements and independent auditors' reports listed below are included herein:

Report of Independent Registered Public Accounting Firm

Board of Directors

Sierra Bancorp and Subsidiary

Porterville, California

We have audited the accompanying consolidated balance sheets of Sierra Bancorp and Subsidiary (the “Company”) as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sierra Bancorp and Subsidiary as of December 31, 2014 and 2013, and the results of its operations, changes in its shareholders' equity, and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 12, 2015 expressed an unqualified opinion thereon.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. THE BUSINESS OF SIERRA BANCORP

Sierra Bancorp (the “Company”) is a California corporation registered as a bank holding company under the Bank Holding Company Act of 1956, as amended, and is headquartered in Porterville, California. The Company was incorporated in November 2000 and acquired all of the outstanding shares of Bank of the Sierra (the “Bank”) in August 2001. The Company’s principal subsidiary is the Bank, and the Company exists primarily for the purpose of holding the stock of the Bank and of such other subsidiaries it may acquire or establish. The Company’s only other direct subsidiaries are Sierra Statutory Trust II, which was formed in March 2004 solely to facilitate the issuance of capital trust pass-through securities, and Sierra Capital Trust III, which was formed in June 2006 for the same purpose.

The Bank operates twenty-eight full service branch offices, an online branch, a real estate industries group, an agricultural credit division, and an SBA lending unit. The Bank’s deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to applicable legal limits. The Bank maintains a diversified loan portfolio comprised of agricultural, commercial, consumer, real estate construction and mortgage loans. Loans are made primarily within the market area of the South Central San Joaquin Valley of California, specifically, Tulare, Fresno, Kern, Kings, and Madera counties, however, the Bank recently expanded into the Southern California corridor stretching from Santa Paula to Santa Clarita in the counties of Ventura and Los Angeles. These areas have diverse economies with principal industries being agriculture, real estate and light manufacturing.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of the Company and the consolidated accounts of its wholly-owned subsidiary, Bank of the Sierra. All significant intercompany balances and transactions have been eliminated. Certain reclassifications have been made to prior years' balances to conform to classifications used in 2014. The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (U.S. GAAP) and prevailing practices within the banking industry.

In accordance with U.S. GAAP, the Company's investments in Sierra Statutory Trust II and Sierra Capital Trust III are not consolidated and are accounted for under the equity method and included in other assets on the consolidated balance sheet. The subordinated debentures issued and guaranteed by the Company and held by the trusts are reflected on the Company's consolidated balance sheet.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and actual results could differ.

Material estimates that are particularly susceptible to significant changes in the near-term relate to the determination of the allowance for loan and lease losses and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans. In connection with the determination of the allowances for loan and lease losses and other real estate, management obtains independent appraisals for significant properties, evaluates the overall loan portfolio characteristics and delinquencies and monitors economic conditions.

Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include cash and deposits with other financial institutions with maturities fewer than 90 days, and federal funds sold. Net cash flows are reported for customer loan and deposit transactions, interest bearing deposits in other financial institutions, and fed funds purchased and repurchase agreements.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Securities

Debt securities may be classified as held to maturity and carried at amortized cost when management has the positive ability and intent to hold them to maturity. Debt securities are classified as available for sale when they might be sold before maturity. Equity securities with readily determinable fair values are classified as available for sale. Securities available for sale are carried at fair value with unrealized holding gains and losses reported in other comprehensive income, net of tax.

Interest income includes amortization of purchase premium or discount. Premiums or discounts on securities are amortized on the level-yield method without anticipating prepayments. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

Management determines the appropriate classification of its investments at the time of purchase and may only change the classification in certain limited circumstances. All transfers between categories are accounted for at fair value. Although the Company currently has the intent and the ability to hold the securities in its investment portfolio to maturity, the securities are all marketable and are currently classified as “available for sale” to allow maximum flexibility with regard to interest rate risk and liquidity management.

Management evaluates securities for other-than-temporary impairment (“OTTI”) on at least a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. For securities in an unrealized loss position, management considers the extent and duration of the unrealized loss and the financial condition and near-term prospects of the issuer. Management also assesses whether it intends to sell, or it is more likely than not that it will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For debt securities that do not meet the aforementioned criteria, the amount of the impairment is split into two components as follows: 1) OTTI related to credit loss, which must be

recognized in the income statement and 2) OTTI related to other factors, which is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis. For equity securities, the entire amount of impairment is recognized through earnings.

Loans Held for Sale

The Company periodically originates loans intended to be sold on the secondary market. Loans originated and intended for sale in the secondary market are carried at cost which approximates fair value since these loans are typically sold shortly after origination. The loan's cost basis includes unearned deferred fees and costs, and premiums and discounts. If loans held for sale remain on our books for an extended period of time the fair value of those loans is determined using quoted secondary market prices. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings.

Loans held for sale by the Company consist entirely of residential real estate loans. Loans classified as held for sale are disclosed in Note 4 of these Consolidated Financial Statements.

Gains and losses on sales of loans are recognized at the time of sale and are calculated based on the difference between the selling price and the allocated book value of loans sold. Book value allocations are determined in accordance with U.S. GAAP. Any inherent risk of loss on loans sold is transferred to the buyer at the date of sale.

The Company has issued various representations and warranties associated with the sale of loans. These representations and warranties may require the Company to repurchase loans with underwriting deficiencies as defined per the applicable sales agreements and certain past due loans within 90 days of the sale. The Company did not experience losses during the years ended December 31, 2014, 2013 or 2012 regarding these representations and warranties.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Loans and Leases (Financing Receivables)

Our credit quality classifications of Loans and Leases include Pass, Special Mention, Substandard and Impaired. These classifications are defined in Note 4 (Loans and Leases) to our consolidated financial statements.

Loans and leases that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of deferred loan fees and costs, purchase premiums and discounts, write-downs, and an allowance for loan and lease losses. Loan and lease origination fees, net of certain deferred origination costs, and purchase premiums and discounts are recognized in interest income as an adjustment to yield of the related loans and leases over the contractual life of the loan using both the effective interest and straight line methods without anticipating prepayments.

Interest income for all performing loans, regardless of classification (Pass, Special Mention, Substandard and Impaired), is recognized on an accrual basis, with interest accrued daily. Costs associated with successful loan originations are netted from loan origination fees, with the net amount (net deferred loan fees) amortized over the contractual life of the loan in interest income. If a loan has scheduled periodic payments, the amortization of the net deferred loan fee is calculated using the effective interest method over the contractual life of the loan. If the loan does not have scheduled payments, such as a line of credit, the net deferred loan fee is recognized as interest income on a straight line basis over the contractual life of the loan. Fees received for loan commitments are recognized as interest income over the term of the commitment. When loans are repaid, any remaining unamortized balances of deferred fees and costs are accounted for through interest income.

Generally, the Company places a loans or lease on nonaccrual status and ceases recognizing interest income when it has become delinquent more than 90 days and/or when Management determines that the repayment of principal and collection of interest is unlikely. The Company may decide that it is appropriate to continue to accrue interest on certain loans more than 90 days delinquent if they are well-secured by collateral and collection is in process. When a

loan is placed on nonaccrual status, any accrued but uncollected interest for the loan is reversed out of interest income in the period in which the loan's status changed. For loans with an interest reserve, i.e., where loan proceeds are advanced to the borrower to make interest payments, all interest recognized from the inception of the loan is reversed when the loan is placed on non-accrual. Once a loan is on non-accrual status subsequent payments received from the customer are applied to principal, and no further interest income is recognized until the principal has been paid in full or until circumstances have changed such that payments are again consistently received as contractually required. Generally, loans and leases are not restored to accrual status until the obligation is brought current and has performed in accordance with the contractual terms for a reasonable period of time, and the ultimate collectability of the total contractual principal and interest is no longer in doubt.

Impaired loans are classified as either nonaccrual or accrual, depending on individual circumstances regarding the collectability of interest and principal according to the contractual terms.

Purchased Credit Impaired Loans

The Company purchases individual loans and groups of loans, some of which show evidence of credit deterioration since origination. These purchased credit impaired ("PCI") loans are recorded at the amount paid, since there is no carryover of the seller's allowance for loan losses. After acquisition, losses are recognized by an increase in the allowance for loan losses.

Such PCI loans are accounted for individually or aggregated into pools of loans based on common risk characteristics. The Company estimates the amount and timing of expected cash flows for the loan or pool, and the expected cash flows in excess of amount paid is recorded as interest income over the remaining life of the loan or pool (accretable yield). The excess of the loan's or pool's contractual principal and interest over expected cash flows is not recorded (nonaccretable difference).

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Over the life of the loan or pool, expected cash flows continue to be estimated. If the present value of expected cash flows is less than the carrying amount, a loss is recorded as a provision for loan and lease losses. If the present value of expected cash flows is greater than the carrying amount, it is recognized as part of future interest income

Loans Modified in a Troubled Debt Restructuring

Loans are considered to have been modified in a troubled debt restructuring (“TDR”) when due to a borrower’s financial difficulties the Company makes certain concessions to the borrower that it would not otherwise consider. Modifications may include interest rate reductions, principal or interest forgiveness, forbearance, and other actions intended to minimize economic loss and to avoid foreclosure or repossession of collateral. Generally, a non-accrual loan that has been modified in a TDR remains on non-accrual status for a period of six months to demonstrate that the borrower is able to meet the terms of the modified loan. However, performance prior to the modification, or significant events that coincide with the modification, are included in assessing whether the borrower can meet the new terms and may result in the loan being returned to accrual status at the time of loan modification or after a shorter performance period. If the borrower’s ability to meet the revised payment schedule is uncertain, the loan remains on non-accrual status.

A TDR is generally considered to be in default when it appears likely that the customer will not be able to repay all principal and interest pursuant to the terms of the restructured agreement.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses is maintained at a level which, in management’s judgment, is adequate to absorb loan and lease losses inherent in the loan and lease portfolio. The allowance for loan and lease losses is

increased by a provision for loan and lease losses, which is charged to expense, and reduced by principal charge-offs, net of recoveries. The amount of the allowance is based on management's evaluation of the collectability of the loan and lease portfolio, changes in its risk profile, credit concentrations, historical trends, and economic conditions. This evaluation also considers the balance of impaired loans and leases. A loan or lease is impaired when it is probable that the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan or lease agreement. The impairment on certain individually identified loans or leases is measured based on the present value of expected future cash flows discounted at the original effective interest rate of the loan or lease. As a practical expedient, impairment may be measured based on the loan's or lease's observable market price or the fair value of collateral if the loan or lease is collateral dependent. The amount of impairment, if any, is recorded through the provision for loan and lease losses and is added to the allowance for loan and lease losses, with any changes over time recognized as additional bad debt expense in our provision for loan losses. Impaired loans with homogenous characteristics, such as one-to-four family residential mortgages and consumer installment loans, may be subjected to a collective evaluation for impairment, considering delinquency and repossession statistics, historical loss experience, and other factors.

General reserves cover non-impaired loans and are based on historical net loss rates for each portfolio segment by call report code, adjusted for the effects of qualitative or environmental factors that are likely to cause estimated credit losses as of the evaluation date to differ from the portfolio segment's historical loss experience. Qualitative factors include consideration of the following: changes in lending policies and procedures; changes in international, national, regional, and local economic and business conditions and developments; changes in nature and volume of the portfolio; changes in the experience, ability and depth of lending management and staff; changes in the volume and severity of past due, nonaccrual and other adversely graded loans; changes in quality of the loan review system; changes in the value of the underlying collateral for collateral-dependent loans; concentrations of credit; and the effect of the other external factors such as competition and legal and regulatory requirements.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Most of the Company's business activity is with customers located in California within the Southern Central San Joaquin Valley and the corridor stretching between Santa Paula and Santa Clarita, therefore the Company's exposure to credit risk is significantly affected by changes in the economy in that region. The Company considers this concentration of credit risk when assessing and assigning qualitative factors in the allowance for loan losses. Portfolio segments identified by the Company include Direct Financing leases, Agricultural, Commercial and Industrial, Real Estate, Small Business Administration, and Consumer loans. Relevant risk characteristics for these portfolio segments generally include debt service coverage, loan-to-value ratios and financial performance on non-consumer related loans; and credit scores, debt-to-income ratios, collateral type and loan-to-value ratios for consumer related loans.

Though management believes the allowance for loan and lease losses to be adequate, ultimate losses may vary from their estimates. However, estimates are reviewed periodically, and as adjustments become necessary they are reported in earnings during the periods they become known. In addition, the FDIC and the California Department of Business Oversight, as an integral part of their examination processes, review the allowance for loan and lease losses. These agencies may require additions to the allowance for loan and lease losses based on their judgment about information available at the time of their examinations.

Reserve for Off-Balance Sheet Commitments

In addition to the exposure to credit loss from outstanding loans, the Company is also exposed to credit loss from certain off-balance sheet commitments such as unused commitments from revolving lines of credit, mortgage warehouse lines of credit, unused commitments on construction loans and commercial and standby letters of credit. Because the available funds have not yet been disbursed on these commitments the estimated losses are not included in the calculation of ALLL. The reserve for off-balance sheet commitments is an estimated loss contingency which is included in other liabilities on the Consolidated Balance Sheets. The adjustments to the reserve for off-balance sheet commitments are reported as a noninterest expense. This reserve is for estimated losses that could occur when the Company is contractually obligated to make a payment under these instruments and must seek repayment from a party that may not be as financially sound in the current period as it was when the commitment was originally made.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The useful lives of premises range between twenty-five to thirty-nine years. The useful lives of furniture, fixtures and equipment range between three to twenty years. Leasehold improvements are amortized over the life of the asset or the term of the related lease, whichever is shorter. When assets are sold or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized in income for the period. The cost of maintenance and repairs is charged to expense as incurred.

Impairment of long-lived assets is evaluated by management based upon an event or changes in circumstances surrounding the underlying assets which indicate long-lived assets may be impaired.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Foreclosed Assets

Foreclosed assets include real estate and other property acquired in full or partial settlement of loan obligations. Upon acquisition, any excess of the recorded investment in the loan balance over the appraised fair market value, net of estimated selling costs, is charged against the allowance for loan and lease losses. A valuation allowance for losses on foreclosed assets is maintained to provide for temporary declines in value. The allowance is established through a provision for losses on foreclosed assets which is included in other non-interest expense. Subsequent gains or losses on sales or write-downs resulting from permanent impairments are recorded in other non-interest income or expense as incurred. Operating costs after acquisition are expensed.

Goodwill and Other Intangible Assets

The Company acquired Sierra National Bank in 2000. Goodwill resulting from business combinations prior to January 1, 2009 represents the amount by which the purchase price exceeded the fair value of the net assets.

The Company acquired Santa Clara Valley Bank in 2014. Goodwill resulting from business combinations after January 1, 2009 is generally determined as the excess of the fair value of the consideration transferred, plus the fair value of any noncontrolling interests in the acquiree, over the fair value of the net assets acquired and liabilities assumed as of the acquisition date.

Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually or more frequently if events and circumstances exist which indicate that an impairment test should be performed. The Company selected December 31, 2014 as the date to perform the annual impairment test for 2014. Goodwill is the only intangible asset with an

indefinite life on our balance sheet. There was no impairment recognized for the years ended December 31, 2014, 2013, and 2012.

Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. The Company's other intangible assets consist solely of core deposit intangible assets arising from the acquisition of Santa Clara Valley Bank, which are being amortized on a straight line basis over eight years.

Loan Commitments and Related Financial Instruments

Financial instruments include off-balance sheet credit instruments, such as commitments to make loans and commercial letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss, before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded. Details regarding these commitments and financial instruments are discussed in detail in Note 12 to our consolidated financial statements.

Income Taxes

The Company files its income taxes on a consolidated basis with its subsidiary. The allocation of income tax expense represents each entity's proportionate share of the consolidated provision for income taxes.

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax basis of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

A tax position is recognized as a benefit only if it is “more likely than not” that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely to be realized on examination. For tax positions not meeting the “more likely than not” test, no tax benefit is recorded. We have determined that as of December 31, 2014 all tax positions taken to date are highly certain and, accordingly, no accounting adjustment has been made to the financial statements.

The Company recognizes interest and penalties related to uncertain tax positions as part of income tax expense.

Salary Continuation Agreements and Directors’ Retirement Plan

The Company has entered into agreements to provide members of the Board of Directors and certain key executives, or their designated beneficiaries, with annual benefits for up to fifteen years after retirement or death. The Company accrues for these future benefits from the effective date of the plan until the director’s or executive’s expected retirement date in a systematic and rational manner. At the consolidated balance sheet date, the amount of accrued benefits equals the then present value of the benefits expected to be provided to the director or employee, any beneficiaries, and covered dependents in exchange for the director’s or employee’s services to that date.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available for sale, net of an adjustment for the effects of realized gains and losses and any applicable tax. Comprehensive income is a more inclusive financial reporting methodology that includes disclosure of other comprehensive income that historically has not been recognized in the calculation of net income. Unrealized gains and losses on the Company’s available for sale securities are included in other

comprehensive income after adjusting for the effects of realized gains and losses. Total comprehensive income and the components of accumulated other comprehensive income (loss) are presented in the consolidated statements of comprehensive income.

Stock-Based Compensation

At December 31, 2014, the Company had one stock-based compensation plan, the Sierra Bancorp 2007 Stock Incentive Plan (the “2007 Plan”), which was adopted by the Company’s Board of Directors on March 15, 2007 and approved by the Company’s shareholders on May 23, 2007. The 2007 Plan originally covered 1,500,000 shares of the Company’s authorized but unissued common stock, subject to adjustment for stock splits and dividends, and provides for the issuance of both “incentive” and “nonqualified” stock options to salaried officers and employees, and of “nonqualified” stock options to non-employee directors. The 2007 Plan also provides for the issuance of restricted stock awards to these same classes of eligible participants. We have not issued, nor do we currently have plans to issue, restricted stock awards. The 2007 plan supersedes the Company’s 1998 Stock Option plan (“1998 Plan”) which was terminated. The outstanding options issued under the 1998 Plan were not affected by this termination.

Compensation cost and director’s expense is recognized for stock options issued to employees and directors and is recognized over the required service period, generally defined as the vesting period. The Company is using the Black-Scholes model to value stock options. The “multiple option” approach is used to allocate the resulting valuation to actual expense for current period. Expected volatility is based on historical volatility of the Company’s common stock. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding, which takes into account that the options are not transferable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. The fair value of each option is estimated on the date of grant using the following assumptions:

Recent Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board (FASB) issued ASU 2013-02, Comprehensive Income (Topic 220) which amended existing guidance related to reporting amounts reclassified out of accumulated other comprehensive income. These amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements. These amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income, by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional details about those amounts. For public entities, this update became effective prospectively for reporting periods beginning after December 15, 2012. We adopted ASU 2013-2 commencing with our report on Form 10-Q filed for the first quarter of 2013.

In January 2014, the FASB issued ASU 2014-01, Investments—Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects, to provide additional flexibility with regard to accounting for investments in qualified affordable housing projects. ASU 2014-01 modifies the conditions that must be met to present the pretax impact and related tax benefits of such investments as a component of income taxes (“net” within income tax expense), to enable more investors to elect to use a “net” presentation for those investments. Investors that do not qualify for “net” presentation under the new guidance will continue to account for such investments under the equity method or cost method, which results in losses recognized in pretax income and tax benefits recognized in income taxes (“gross” presentation of investment results). For investments that qualify for the “net” presentation of investment performance, ASU 2014-01 introduces a “proportional amortization method” that can be elected to amortize the investment basis. If elected, the method is required for all eligible investments in qualified affordable housing projects. ASU 2014-01 also requires enhanced recurring disclosures for all investments in qualified affordable housing projects, regardless of the accounting method used for those investments. It is effective for interim and annual periods beginning after December 15, 2014, and early adoption is permitted. The Company currently expects to adopt ASU 2014-01 as of the first quarter of 2015. We will likely continue to account for our low-income housing tax credit

investments using the equity method subsequent to our adoption of ASU 2014-01 and thus do not expect any impact on our income statement or balance sheet, but our disclosures with regard to low-income housing tax credit investments will be updated to reflect the new requirements.

In January 2014, the FASB issued ASU 2014-04, Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure, to resolve diversity in practice with respect to a creditor’s reclassification of a collateralized consumer mortgage loan to other real estate owned (OREO). Current US GAAP requires a loan to be reclassified to OREO upon a troubled debt restructuring that is “in substance a repossession or foreclosure”, where the creditor receives “physical possession” of the debtor’s assets regardless of whether formal foreclosure proceedings take place. The terms “in substance a repossession or foreclosure” and “physical possession” are not defined in US GAAP; therefore, questions have arisen about when a creditor should reclassify a collateralized mortgage loan to OREO. ASU 2014-04 requires a creditor to reclassify a collateralized consumer mortgage loan to real estate property upon obtaining legal title to the real estate collateral, or when the borrower voluntarily conveys all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. ASU 2014-04 is effective for public business entities for interim and annual periods beginning after December 15, 2014. It will be adopted by the Company for the first quarter of 2015, and we do not expect any impact upon our financial statements or operations upon adoption.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606). This ASU is the result of a joint project initiated by the FASB and the International Accounting Standards Board (IASB) to clarify the principles for recognizing revenue, and to develop a common revenue standard and disclosures for U.S. and international accounting standards that would: (1) remove inconsistencies and weaknesses in revenue requirements; (2) provide a more robust framework for addressing revenue issues; (3) improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; (4) provide more useful information to users of financial statements through improved disclosure requirements; and (5) simplify the preparation of financial statements by reducing the number of requirements to which an entity must refer. The guidance affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets. The core principle is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance provides steps to follow to achieve the core principle. An entity should disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. Qualitative and quantitative information is required with regard to contracts with customers, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. This ASU is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The Company is currently evaluating the potential effects of this guidance on its financial statements and disclosures.

In June 2014, the FASB issued ASU 2014-12 which amended existing guidance related to the accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period. These amendments require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in Topic 718, Compensation – Stock Compensation, as it relates to awards with performance conditions that affect vesting to account for such awards. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to vest and should be adjusted to reflect those awards that ultimately vest. The requisite period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. ASU 2014-12 is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. It will be adopted by the Company for the first quarter of 2016, and we do not expect any impact upon our financial statements or operations upon adoption.

In August 2014, the FASB issued ASU 2014-14 which amended existing guidance related to the classification of certain government-guaranteed mortgage loans, including those guaranteed by the FHA and the VA, upon foreclosure. It requires that a mortgage loan be derecognized and a separate other receivable be recognized upon foreclosure if the following conditions are met: 1) The loan has a government guarantee that is not separable from the loan before foreclosure; 2) At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim; and 3) At the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. ASU 2014-14 is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2014. It will be adopted by the Company for the first quarter of 2015, and we do not expect any impact upon our financial statements or operations upon adoption.

Equity securities	-	-	-	-

Total \$(1,195) \$ 30,459 \$ (4,206) \$ 164,320

The Company has reviewed all sectors and securities in the portfolio for impairment. During the year ended December 31, 2014 the Company realized gains through earnings from the sale of 59 debt securities for \$502,000 and one equity position for \$238,000. The securities were sold with seven other debt securities, for which a \$72 thousand loss was realized, to manage the various risks in the portfolio. During the year ended December 31, 2013, the Company realized slight gains and no losses from the sale of three debt securities which were sold to improve the credit quality of the portfolio by minimizing securities on our Municipal Bond Watch List.

The Company has concluded as of December 31, 2014 that all remaining securities, currently in an unrealized loss position, are not other-than-temporarily-impaired. This assessment was based on the following factors: 1) the Company has the ability to hold the security, 2) the Company does not intend to sell the security, 3) the Company does not anticipate it will be required to sell the security before recovery, 4) and the Company expects to eventually recover the entire amortized cost basis of the security.

3. SECURITIES AVAILABLE-FOR-SALE (Continued)

The amortized cost and estimated fair value of securities available-for-sale at December 31, 2014 by contractual maturity are shown below. Expected maturities will differ from contractual maturities because the issuers of the securities may have the right to call or prepay obligations with or without penalties.

	Amortized Cost	Fair Value
	(dollars in thousands)	
Maturing within one year	\$ 686	\$ 694
Maturing after one year through five years	222,081	225,415
Maturing after five years through ten years	97,949	99,583
Maturing after ten years	54,531	55,705
Securities not due at a single maturity date:		
U.S Government agencies collateralized by mortgage obligations	128,107	128,264
Other securities	1,210	2,222
	\$ 504,564	\$ 511,883

Securities available-for-sale with amortized costs totaling \$137,160,000 and estimated fair values totaling \$140,611,000 were pledged to secure other contractual obligations and short-term borrowing arrangements at December 31, 2014 (see Note 9).

Securities available-for-sale with amortized costs totaling \$162,393,000 and estimated fair values totaling \$164,390,000 were pledged to secure public deposits, other contractual obligations and short-term borrowing arrangements at December 31, 2013 (see Note 9).

At December 31, 2014, the Company's investment portfolio included securities issued by 268 different government municipalities and agencies located within 27 states with a fair value of \$98.1 million. The largest exposure to any single municipality or agency was a \$3.8 million (fair value) bond issued for water utility improvements by the Arizona State Water Infrastructure Finance Authority, to be repaid by future water revenue.

The Company's investments in bonds issued by states, municipalities and political subdivisions are evaluated in accordance with Supervision and Regulation Letter 12-15 (SR 12-15) issued by the Board of Governors of the Federal Reserve System, "Investing in Securities without Reliance on Nationally Recognized Statistical Rating Organization Ratings", and other regulatory guidance. Credit ratings are considered in our analysis only as a guide to the historical default rate associated with similarly-rated bonds. There have been no significant differences in our internal analyses compared with the ratings assigned by the third party credit rating agencies.

Allowance for loan and lease losses	(11,248)	(11,677)
Loans, net	\$961,056	\$793,087

The Company monitors the credit quality of loans on a continuous basis using the regulatory and accounting classifications of pass, special mention, substandard and impaired to characterize and qualify the associated credit risk. Loans classified as “loss” are immediately charged-off. The Company uses the following definitions of risk classifications:

Pass – Loans listed as pass include larger non-homogeneous loans not meeting the risk rating definitions below and smaller, homogeneous loans not assessed on an individual basis.

Special Mention – Loans classified as special mention have the potential weakness that deserves management’s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution’s credit position and some future date.

Substandard – Loans classified as substandard are those loans with clear and well-defined weaknesses such as a highly leveraged position, unfavorable financial operating results and/or trends, or uncertain repayment sources or poor financial condition, which may jeopardize ultimate recoverability of the debt.

Impaired – A loan is considered impaired, when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Additionally, all loans classified as troubled debt restructurings are considered impaired.

4. LOANS AND LEASES (Continued)

Loans may or may not be collateralized, and collection efforts are continuously pursued. Loans or leases may be restructured by management when a borrower has experienced some change in financial status causing an inability to meet the original repayment terms and where the Company believes the borrower will eventually overcome those circumstances and make full restitution. Loans and leases are charged off when they are deemed to be uncollectible, while recoveries are generally recorded only when cash payments are received subsequent to the charge-off.

The following tables present the activity in the allowance for loan losses and the recorded investment in loans and impairment method by portfolio segment for each of the years ending December 31, 2014, 2013 and 2012 (dollars in thousands):

⁽¹⁾ Included in Total Financing Receivables⁽²⁾ As of December 31, 2013 there were no loans over 90 days past due and still accruing.

Generally, the Company places a loan or lease on nonaccrual status and ceases recognizing interest income when it has become delinquent more than 90 days and/or when Management determines that the repayment of principal and collection of interest is unlikely. The Company may decide that it is appropriate to continue to accrue interest on certain loans more than 90 days delinquent if they are well-secured by collateral and collection is in process. When a loan is placed on nonaccrual status, any accrued but uncollected interest for the loan is reversed out of interest income in the period in which the loan's status changed. Subsequent payments received from the customer are applied to principal, and no further interest income is recognized until the principal has been paid in full or until circumstances have changed such that payments are again consistently received as contractually required.

4. LOANS AND LEASES (Continued)

Included in loans above are troubled debt restructurings that were classified as impaired. The Company had \$2,592,000 and \$3,714,000 in commercial loans, \$21,302,000 and \$32,960,000 in real estate secured loans and \$2,640,000 and \$3,250,000 in consumer loans, which were modified as troubled debt restructurings and consequently classified as impaired at December 31, 2014 and 2013, respectively.

Additional commitments to existing customers with restructured loans totaled \$0 and \$250,000 at December 31, 2014 and 2013 respectively.

Interest income recognized on impaired loans was \$1,056,000, \$1,220,000, and \$1,394,000 for the years ended December 31, 2014, 2013 and 2012 respectively. There was no interest income recognized on a cash basis on impaired loans for the years ended December 31, 2014, 2013 and 2012 respectively.

The following is a summary of interest income from non-accrual loans in the portfolio at year-end that was not recognized (dollars in thousands):

	Years Ended December 31,		
	2014	2013	2012
Interest that would have been recorded under the loans' original terms	\$ 1,666	\$ 3,209	\$ 4,084
Less gross interest recorded	389	304	2,088
Foregone interest	\$ 1,277	\$ 2,905	\$ 1,996

Certain loans have been pledged to secure short-term borrowing arrangements (see Note 9). These loans totaled \$475,979,000 and \$413,369,000 at December 31, 2014 and 2013, respectively.

Salaries and employee benefits totaling \$2,673,000, \$2,804,000, and \$2,745,000, have been deferred as loan and lease origination costs to be amortized over the estimated lives of the related loans and leases for the years ended December 31, 2014, 2013 and 2012, respectively.

In the tables above, the TDRs that subsequently defaulted increased the allowance for loan and lease losses by \$51,000 and \$660,000 for the years ended December 31, 2014 and 2013. The total allowance for loan and lease losses specifically allocated to the balances that were classified as TDRs during the year ended December 31, 2014 and 2013 is \$2,714,000 and \$3,321,000, respectively.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

4. LOANS AND LEASES (Continued)

Interest income for all performing loans, regardless of class (Pass, Special Mention, Substandard and Impaired), is recognized on an accrual basis, with interest accrued daily. Costs associated with successful loan originations are netted from loan origination fees, with the net amount (net deferred loan fees) amortized over the contractual life of the loan in interest income. If a loan has scheduled periodic payments, the amortization of the net deferred loan fee is calculated using the effective interest method over the contractual life of the loan. If the loan does not have scheduled payments, such as a line of credit, the net deferred loan fee is recognized as interest income on a straight line basis over the contractual life of the loan. Fees received for loan commitments are recognized as interest income over the term of the commitment. When loans are repaid, any remaining unamortized balances of deferred fees and costs are accounted for through interest income.

Loan Servicing

The Company originates mortgage loans for sale to investors. During the years ended December 31, 2014, 2013, and 2012, all mortgage loans that were sold by the Company were sold without retention of related servicing. The Company's servicing portfolio at December 31, 2014, 2013 and 2012 totaled \$770,000, \$1,585,000 and \$2,596,000 respectively. At December 31, 2014, loans were principally serviced for one investor.

Purchased Credit Impaired Loans

As part of the acquisition described in Note 21 *Business Combination*, the Company acquired on November 14, 2014, a portfolio of loans, some of which have shown evidence of credit deterioration since origination and it was probable at acquisition that all contractually required payments would not be collected. The carrying amount and unpaid principal balance of those loans are as follows (dollars in thousands):

Edgar Filing: SIERRA BANCORP - Form 10-K

December 31, 2014

	Unpaid Principal Balance	Carrying Value
Real estate secured	\$ 1,222	\$ 228
Commercial and industrial	92	-
Consumer	1	-
Total purchased credit impaired loans	\$ 1,315	\$ 228

No ALLL was recorded on purchased credit impaired loans as of December 31, 2014. Purchased credit impaired loans acquired during that the year ended December 31, 2014 for which it was probable at acquisition that not all contractually required payments would be collected are as follows (dollars in thousands):

November 14, 2014

Contractually required payments including interest	\$ 1,447	
Non-accretable difference	(1,221)
Cash flows expected to be collected	226	
Accretable difference	-	
Fair value at acquisition	\$ 226	

Discount accretion on PCI loans was \$0 for the year ended December 31, 2014.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

5. PREMISES AND EQUIPMENT

Premises and equipment at cost consisted of the following (dollars in thousands):

	December 31,	
	2014	2013
Land	\$3,019	\$2,607
Buildings and improvements	16,348	15,818
Furniture, fixtures and equipment	18,397	17,829
Leasehold improvements	10,850	10,536
	48,614	46,790
Less accumulated depreciation and amortization	26,808	26,402
Construction in progress	47	5
	\$21,853	\$20,393

Depreciation and amortization included in occupancy and equipment expense totaled \$2,107,000, \$2,119,000, and \$2,289,000, for the years ended December 31, 2014, 2013 and 2012, respectively.

Operating Leases

The Company leases certain of its branch properties under non-cancelable operating leases. Rental expense included in occupancy and equipment expense totaled \$1,017,000, \$1,001,000 and \$1,011,000 and for the years ended December 31, 2014, 2013 and 2012, respectively.

Rent commitments, before considering renewal options that generally are present, were as follows:

Year Ending December 31,	
2015	\$1,143,000
2016	1,095,000
2017	1,004,000
2018	751,000
2019	748,000
Thereafter	3,088,000
	\$7,829,000

The Company has options to renew its branch facilities after the initial leases expire. The renewal options range from one to ten years and are not included in the payments reflected above.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

6. GOODWILL AND INTANGIBLE ASSETSGoodwill

The change in goodwill during the year is as follows (dollars in thousands):

	Years Ended December 31,		
	2014	2013	2012
Balance at January 1	\$ 5,544	\$ 5,544	\$ 5,544
Acquired goodwill	1,364	-	-
Impairment	-	-	-
Balance at December 31	\$ 6,908	\$ 5,544	\$ 5,544

Impairment exists when a reporting unit's carrying value of goodwill exceeds its fair value. Bank of the Sierra (the "Bank") is the only subsidiary of the Company that meets the materiality criteria necessary to be deemed an operating segment, and because the Company exists primarily for the purpose of holding the stock of the Bank we have determined that only one unified operating segment (the consolidated Company) exists. At December 31, 2014, the Company had positive equity and the Company elected to perform a qualitative assessment to determine if it was more likely than not that the fair value of the Company exceeded its carrying value, including goodwill. The qualitative assessment indicated that it was more likely than not that the fair value of the reporting unit exceeded its carrying value, resulting in no impairment.

Acquired Intangible Assets

Acquired intangible assets were as follows at year-end (dollars in thousands):

Years Ended December 31,

	2014		2013	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Core deposit intangibles	\$1,075	\$11	\$-	\$-

Aggregate amortization expense was \$11,000, \$0 and \$0 for 2014, 2013 and 2012.

Estimated amortization expense for each of the next five years and thereafter (dollars in thousands):

2015	\$132
2016	\$132
2017	\$132
2018	\$132
2019	\$132
Thereafter	\$404
	\$1,064

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

7. OTHER ASSETS

Other assets consisted of the following (dollars in thousands):

	December 31,	
	2014	2013
Accrued interest receivable	\$5,852	\$4,990
Deferred tax assets	12,810	12,286
Prepaid taxes	-	2,787
Investment in limited partnerships	7,276	9,204
Federal Home Loan Bank stock, at cost	6,631	5,581
Other	4,912	5,613
	\$37,481	\$40,461

The Company has invested in limited partnerships that operate qualified affordable housing projects to receive tax benefits in the form of tax deductions from operating losses and tax credits. The Company accounts for these investments under the cost method and management analyzes these investments annually for potential impairment. The Company had no remaining capital commitments to these partnerships at December 31, 2014.

The Company holds certain equity investments that are not readily marketable securities and thus are classified as “other assets” on the Company’s balance sheet. These include investments in Pacific Coast Bankers Bancshares, California Economic Development Lending Initiative, and the Federal Home Loan Bank (“FHLB”). The largest of these is the Company’s \$6,631,000 investment in FHLB stock, carried at cost. Quarterly, the FHLB evaluates and adjusts the Company’s minimum stock requirement based on the Company’s borrowing activity and membership requirements. Any stock deemed in excess is automatically repurchased by the FHLB at cost.

	\$9,438	\$25,451		\$6,373	\$5,974		

At year end, long-term borrowings consisted of the following (dollars in thousands):

	2014		Weighted	2013		Weighted
	Amount	Fixed rate	average interest rate	Amount	Fixed rate	average interest rate
As of December 31:						
Federal Home Loan Bank advances, maturing 2015	\$4,000	0.29 %		\$-	-	
Federal Home Loan Bank advances, maturing 2016	2,000	0.54 %		-	-	
	\$6,000		0.37	% \$-		-

Each advance is payable at its maturity date, with a prepayment penalty for fixed rate advances. The advances were collateralized by \$380,494,000 of first mortgage loans under a blanket lien arrangement at year end 2014. Based on

this collateral and the Company's holdings of FHLB stock, the Company was eligible to borrow up to the total of \$244,424,000 at year-end 2014, with a remaining borrowing capacity of \$167,076,000 if sufficient additional collateral was pledged.

The Company had unsecured lines of credit with its correspondent banks which, in the aggregate, amounted to \$70,000,000 at December 31, 2014 and 2013, respectively, at interest rates which vary with market conditions. There was \$0 outstanding under these lines of credit at December 31, 2014 and December 31, 2013, respectively.

10. INCOME TAXES (Continued)

The expense for income taxes differs from amounts computed by applying the statutory Federal income tax rates to income before income taxes. The significant items comprising these differences consisted of the following (dollars in thousands):

	Year Ended December 31,		
	2014	2013	2012
Income tax expense at Federal statutory rate	\$7,501	\$5,597	\$2,666
Increase (decrease) resulting from:			
State franchise tax expense, net of Federal tax effect	1,116	414	-
Tax exempt income	(1,018)	(920)	(1,388)
Affordable housing tax credits	(1,006)	(1,257)	(1,639)
Other	(402)	(741)	17
	\$6,191	\$3,093	\$(344)
Effective tax rate	28.9 %	18.8 %	(4.4 %)

The Company is subject to federal income tax and income tax of the state of California. Our federal income tax returns for the years ended December 31, 2011, 2012 and 2013 are open to audit by the federal authorities and our California state tax returns for the years ended December 31, 2010, 2011, 2012 and 2013 are open to audit by the state authorities.

The Company has net operating loss carry forwards of approximately \$1.2 million for federal income and approximately \$500 thousand for California franchise tax purposes. Net operating loss carry forwards, to the extent not used will begin to expire in 2029. Net operating loss carry forwards available from acquisitions are substantially limited by Section 382 of the Internal Revenue Code and benefits not expected to be realized due to the limitation have been excluded from the deferred tax asset and net operating loss carry forward amounts noted above.

There were no recorded interest or penalties related to uncertain tax positions as part of income tax for the years ended December 31, 2014, 2013, and 2012, respectively. We do not expect the total amount of unrecognized tax benefits to significantly increase or decrease within the next twelve months.

11. SUBORDINATED DEBENTURES

Sierra Statutory Trust II (“Trust II”) and Sierra Capital Trust III (“Trust III”), (collectively, the “Trusts”) were formed by the Company for the sole purpose of issuing trust preferred securities fully and unconditionally guaranteed by the Company. For financial reporting purposes, the Trusts are not consolidated and the Floating Rate Junior Subordinated Deferrable Interest Debentures (the “Subordinated Debentures”) held by the Trusts and issued and guaranteed by the Company are reflected in the Company’s consolidated balance sheet in accordance with provisions of ASC Topic 810. Under applicable regulatory guidance, the amount of trust preferred securities that is eligible as Tier 1 capital is limited to twenty-five percent of the Company’s Tier 1 capital on a pro forma basis. At December 31, 2014, all \$30,000,000 of the Company’s trust preferred securities qualified as Tier 1 capital.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

11. SUBORDINATED DEBENTURES (Continued)

During the first quarter of 2004, Sierra Statutory Trust II issued 15,000 Floating Rate Capital Trust Pass-Through Securities (TRUPS II), with a liquidation value of \$1,000 per security, for gross proceeds of \$15,000,000. The entire proceeds of the issuance were invested by Trust II in \$15,464,000 of Subordinated Debentures issued by the Company, with identical maturity, re-pricing and payment terms as the TRUPS II. The Subordinated Debentures, purchased by Trust II, represent the sole assets of the Trust II. Those Subordinated Debentures mature on March 17, 2034, bear a current interest rate of 2.99% (based on 3-month LIBOR plus 2.75%), with re-pricing and payments due quarterly.

Those Subordinated Debentures are currently redeemable by the Company, subject to receipt by the Company of prior approval from the Federal Reserve Bank, on any March 17th, June 17th, September 17th, or December 17th. The redemption price is par plus accrued and unpaid interest, except in the case of redemption under a special event which is defined in the debenture.

The TRUPS II are subject to mandatory redemption to the extent of any early redemption of the related Subordinated Debentures and upon maturity of the Subordinated Debentures on March 17, 2034.

Trust II has the option to defer payment of the distributions for a period of up to five years, as long as the Company is not in default on the payment of interest on the Subordinated Debentures. The TRUPS II issued in the offering were sold in private transactions pursuant to an exemption from registration under the Securities Act of 1933, as amended. The Company has guaranteed, on a subordinated basis, distributions and other payments due on the TRUPS II.

During the second quarter of 2006, Sierra Capital Trust III issued 15,000 Floating Rate Capital Trust Pass-Through Securities (TRUPS III), with a liquidation value of \$1,000 per security, for gross proceeds of \$15,000,000. The entire proceeds of the issuance were invested by Trust III in \$15,464,000 of Subordinated Debentures issued by the Company, with identical maturity, repricing and payment terms as the TRUPS III. The Subordinated Debentures, purchased by Trust III, represent the sole assets of the Trust III. Those Subordinated Debentures mature on September

23, 2036, bear a current interest rate of 1.63% (based on 3-month LIBOR plus 1.40%), with repricing and payments due quarterly.

Those Subordinated Debentures are redeemable by the Company, subject to receipt by the Company of prior approval from the Federal Reserve Bank, on any March 23rd, June 23rd, September 23rd, or December 23rd. The redemption price is par plus accrued and unpaid interest, except in the case of redemption under a special event which is defined in the debenture. The TRUPS III are subject to mandatory redemption to the extent of any early redemption of the related Subordinated Debentures and upon maturity of the Subordinated Debentures on September 23, 2036.

Trust III has the option to defer payment of the distributions for a period of up to five years, as long as the Company is not in default on the payment of interest on the Subordinated Debentures. The TRUPS III issued in the offering were sold in private transactions pursuant to an exemption from registration under the Securities Act of 1933, as amended. The Company has guaranteed, on a subordinated basis, distributions and other payments due on the TRUPS III.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

12. COMMITMENTS AND CONTINGENCIES

Letter of Credit

The Company holds two letters of credit with the Federal Home Loan Bank of San Francisco totaling \$87,600,000. A \$80,000,000 letter of credit is pledged to secure public deposits at December 31, 2014 and an \$7,600,000 standby letter of credit was obtained on behalf of one of our customers to guarantee financial performance. Should the standby letter of credit be drawn upon, the customer would reimburse the Company from an existing line of credit.

Federal Reserve Requirements

Banks are required to maintain reserves with the Federal Reserve Bank equal to a specified percentage of their reservable deposits less vault cash. The reserve balances maintained at the Federal Reserve Bank at December 31, 2014 and 2013 were \$0 and \$41,761,000, respectively.

Financial Instruments with Off-Balance-Sheet Risk

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business. These financial instruments consist of commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet.

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and letters of credit as it does for loans included on the balance sheet.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

12. COMMITMENTS AND CONTINGENCIES (Continued)

The following financial instruments represent off-balance-sheet credit risk (dollars in thousands):

	December 31,	
	2014	2013
Fixed-rate commitments to extend credit	\$83,416	\$64,148
Variable-rate commitments to extend credit	\$283,493	\$356,559
Standby letters of credit	\$6,787	\$8,703
Commercial and similar letters of credit	\$7,602	\$8,070

Commitments to extend credit consist primarily of the unused or unfunded portions of the following: home equity lines of credit; commercial real estate construction loans, where disbursements are made over the course of construction; commercial revolving lines of credit; mortgage warehouse lines of credit; unsecured personal lines of credit; and formalized (disclosed) deposit account overdraft lines. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to extend credit are made at both fixed and variable rates of interest as stated in the table above. Standby letters of credit are generally unsecured and are issued by the Company to guarantee the performance of a customer to a third party, while commercial letters of credit represent the Company's commitment to pay a third party on behalf of a customer upon fulfillment of contractual requirements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

Concentration in Real Estate Lending

At December 31, 2014, in management's judgment, a concentration of loans existed in real estate related loans. At that date, approximately 73% of the Company's loans were real estate related. Balances secured by commercial buildings and construction and development loans represented 53% of all real estate loans, while loans secured by non-construction residential properties accounted for 26%, and loans secured by farmland were 21% of real estate

loans. Although management believes the loans within these concentrations have no more than the normal risk of collectability, a further decline in the performance of the economy in general or a further decline in real estate values in the Company's primary market areas, in particular, could have an adverse impact on collectability.

Concentration by Geographic Location

The Company grants commercial, real estate mortgage, real estate construction and consumer loans to customers primarily in the South Central San Joaquin Valley of California, specifically Tulare, Fresno, Kern, Kings and Madera counties and the Southern California corridor between Santa Paula and Santa Clarita in the counties of Ventura and Los Angeles. The ability of a substantial portion of the Company's customers to honor their contracts is dependent on the economy in these areas. Although the Company's loan portfolio is diversified, there is a relationship in those regions between the local agricultural economy and the economic performance of loans made to non-agricultural customers.

Contingencies

The Company is subject to legal proceedings and claims which arise in the ordinary course of business. In the opinion of management, the amount of ultimate liability with respect to such actions will not materially affect the consolidated financial position or results of operations of the Company.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

13. SHAREHOLDERS' EQUITYShare Repurchase Plan

At December 31, 2014, the Company had a stock repurchase plan which has no expiration date. During the year ended December 31, 2014, the Company repurchased 623,348 shares. The total number of shares available for repurchase at December 31, 2014 was 76,652. Repurchases are generally made in the open market at market prices.

Earnings Per Share

A reconciliation of the numerators and denominators of the basic and diluted earnings per share computations is as follows:

	For the Years Ended December 31,		
	2014	2013	2012
Basic Earnings Per Share			
Net income (dollars in thousands)	\$ 15,240	\$ 13,369	\$ 8,185
Weighted average shares outstanding	14,001,958	14,155,927	14,103,805
Basic earnings per share	\$ 1.09	\$ 0.94	\$ 0.58
Diluted Earnings Per Share			
Net income (dollars in thousands)	\$ 15,240	\$ 13,369	\$ 8,185
Weighted average shares outstanding	14,001,958	14,155,927	14,103,805

Effect of dilutive stock options	134,528	134,223	16,508
Weighted average shares outstanding	14,136,486	14,290,150	14,120,313
Diluted earnings per share	\$1.08	\$0.94	\$0.58

Stock Options

In June 1998, Bank of the Sierra adopted the 1998 Stock Option Plan (the “1998 Plan”) for which shares were reserved for issuance to employees and directors under incentive and non-statutory agreements. The 1998 Plan was assumed by the Company effective August 10, 2001. Effective May 23, 2007, the 1998 Plan was terminated and no further options may be granted thereunder, but options granted under the 1998 Plan which were outstanding as of the termination date were not affected by this termination. As of December 31, 2014, options granted under the 1998 Plan covering 112,000 shares were still outstanding.

On March 15, 2007 the Board of Directors approved and adopted the Company’s 2007 Stock Incentive Plan (the “2007 Plan”), which was approved by the Company’s shareholders on May 23, 2007. The 2007 Plan provides for the issuance of both “incentive” and “nonqualified” stock options to officers and employees, and of “nonqualified” stock options to non-employee directors, of the Company and its subsidiaries. The 2007 Plan also provides for the issuance of restricted stock awards to these same classes of eligible participants, which awards may be granted on such terms and conditions as are established by the Board of Directors or the Compensation Committee in its discretion. We have not issued, nor do we currently have plans to issue, restricted stock awards.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

13. SHAREHOLDERS' EQUITY (Continued)

The maximum number of shares subject to issuance under the 2007 Plan was originally 1,500,000 shares of the Company's authorized but unissued common stock, covering both restricted stock awards and stock options. The number subject to issuance under the 2007 Plan had declined to 788,620 at December 31, 2014, due to stock options already granted under the plan net of any canceled options that were returned to the pool available for issuance.

All options granted under the 2007 Plan have been or will be granted at an exercise price of not less than 100% of the fair market value of the stock on the date of grant, exercisable in installments as provided in individual stock option agreements. In the event of a "Change in Control" as defined in the 2007 Plan, all outstanding options shall become exercisable in full (subject to certain notification requirements), and shall terminate if not exercised within a specified period of time unless such options are assumed by the successor corporation or substitute options are granted. Options also terminate in the event an optionee ceases to be employed by or to serve as a director of the Company or its subsidiaries, and the vested portion thereof must be exercised within 30 days after such cessation of employment or service.

A summary of the Company's stock option activity, including options from the 1998 Plan, follows (shares in thousands, except exercise price):

	2014			2013		2012	
	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value ⁽¹⁾	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding, beginning of year	746	\$ 14.65		927	\$ 14.16	810	\$ 14.97
Exercised	(95)	\$ 11.28		(111)	\$ 9.87	(5)	\$ 9.45
Granted	50	\$ 16.35		-	\$ -	189	\$ 10.21
Canceled	(69)	\$ 14.20		(70)	\$ 15.75	(67)	\$ 13.08
Outstanding, end of year	632	\$ 15.34	\$ 2,850	746	\$ 14.65	927	\$ 14.16

Exercisable, end of year ⁽²⁾	530	\$ 16.25	\$ 2,122	542	\$ 16.30	504	\$ 16.07
--	-----	----------	----------	-----	----------	-----	----------

⁽¹⁾The aggregate intrinsic value of stock option in the table above represents the total pre-tax intrinsic value (the amount by which the current market value of the underlying stock exceeds the exercise price of the option) that would have been received by the option holders had all option holders exercised their options on December 31, 2014. This amount changes based on changes in the market value of the Company's stock.

⁽²⁾The weighted average remaining contractual life of stock options outstanding and exercisable on December 31, 2014 was 5.40 years and 5.07 years, respectively.

Information related to stock options during each year follows:

	2014	2013	2012
Weighted-average grant-date fair value per share	\$2.67	\$-	\$3.86
Total intrinsic value of stock options exercised	\$468,000	\$605,000	\$9,000
Total fair value of stock options vested	\$367,000	\$583,000	\$517,000

Cash received from the exercise of 95,330 shares was \$1,076,000 for the period ended December 31, 2014 with a related tax benefit of \$164,000.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

13. SHAREHOLDERS' EQUITY (Continued)

The Company is using the Black-Scholes model to value stock options. In accordance with U.S. GAAP, charges of \$181,000, \$268,000 and \$487,000 are reflected in the Company's income statements for the years ended December 31, 2014, 2013 and 2012, respectively, as pre-tax compensation and directors' expense related to stock options. The related tax benefit of these options is \$63,000, \$110,000 and \$200,000 for the years ended December 31, 2014, 2013 and 2012, respectively.

Unamortized compensation expense associated with unvested stock options outstanding at December 31, 2014 was \$99,000, which will be recognized over the next 2.9 years.

14. REGULATORY MATTERS

The Company and the Bank are subject to certain regulatory requirements administered by the Board of Governors of the Federal Reserve System and the FDIC. Failure to meet these minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets. Each of these components is defined in the regulations. Management believes that the Company and the Bank met all of their capital adequacy requirements as of December 31, 2014 and 2013. In addition, as of December 31, 2014 and 2013, notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that

Edgar Filing: SIERRA BANCORP - Form 10-K

management believes have changed the Bank's category. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and leverage capital ratios as set forth below (dollars in thousands):

	2014 Capital Amount	Ratio	2013 Capital Amount	Ratio
Leverage Ratio				
Sierra Bancorp and subsidiary	\$199,853	12.99%	\$198,216	14.37%
Minimum requirement for "Well-Capitalized" institutions	76,926	5.0 %	68,969	5.0 %
Minimum regulatory requirement	61,541	4.0 %	55,175	4.0 %
Bank of the Sierra				
Bank of the Sierra	\$195,174	12.72%	\$195,001	14.18%
Minimum requirement for "Well-Capitalized" institutions	76,706	5.0 %	68,765	5.0 %
Minimum regulatory requirement	61,365	4.0 %	55,012	4.0 %

Minimum regulatory requirement	91,791	8.0 %	77,565	8.0 %

Under current rules of the Federal Reserve Board, qualified trust preferred securities are one of several "restricted" core capital elements which may be included in Tier 1 capital in an aggregate amount limited to 25% of all core capital elements, net of goodwill less any associated deferred tax liability. Amounts of restricted core capital elements in excess of these limits generally may be included in Tier 2 capital. Since the Company had less than \$15 billion in assets at December 31, 2014, under the Dodd-Frank Act the Company will be able to continue to include its existing trust preferred securities in Tier 1 Capital to the extent permitted by FRB guidelines.

Dividend Restrictions

The Company's ability to pay cash dividends is dependent on dividends paid to it by the Bank, and is also limited by state corporation law. The California General Corporation Law allows a California corporation to pay dividends if the Company's retained earnings equal at least the amount of the proposed dividend. If the Company does not have sufficient retained earnings available for the proposed dividend, it may still pay a dividend to its shareholders if immediately after giving effect to the dividend the sum of the company's assets (exclusive of goodwill and deferred charges) would be at least equal to 125% of its liabilities (not including deferred taxes, deferred income and other deferred liabilities) and the current assets of the company would be at least equal to its current liabilities, or, if the average of its earnings before taxes on income and before interest expense for the two preceding fiscal years was less than the average of its interest expense for the two preceding fiscal years, at least equal to 125% of its current liabilities.

Dividends from the Bank to the Company are restricted under California law to the lesser of the Bank's retained earnings or the Bank's net income for the latest three fiscal years, less dividends previously declared during that period, or, with the approval of the Department of Business Oversight, to the greater of the retained earnings of the Bank, the net income of the Bank for its last fiscal year, or the net income of the Bank for its current fiscal year. As of December 31, 2014, the maximum amount available for dividend distribution under this restriction was approximately \$20,618,000.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

15. BENEFIT PLANS

Salary Continuation Agreements, Directors' Retirement and Officer Supplemental Life Insurance Plans

The Company has entered into salary continuation agreements with its executive officers, and has established retirement plans for qualifying members of the Board of Directors. The plans provide for annual benefits for up to fifteen years after retirement or death. The benefit obligation under these plans totaled \$5,159,000 and \$4,952,000 and was fully accrued for the years ended December 31, 2014 and 2013, respectively. The expense recognized under these arrangements totaled \$320,000 and \$288,000, and \$292,000 for the years ended December 31, 2014, 2013 and 2012, respectively. Salary continuation benefits paid to former directors or executives of the Company or their beneficiaries totaled \$112,000 for the year ended December 31, 2014 and \$83,000 for each of the years ended December 31, 2013 and 2012. The Company also provides benefits to former executives of Sierra National Bank under salary continuation plans that were in effect at the time Sierra National Bank was merged into Bank of the Sierra. The benefit obligation under these plans totaled \$0, \$89,000 and \$145,000, and was fully accrued for the years ended December 31, 2014, and 2013, respectively. Benefits paid to former executives of SNB under this plan totaled \$83,000 for the year ended December 31, 2014 and \$67,000, for each of the years ended December 31, 2013, and 2012, respectively. Certain officers of the Company have supplemental life insurance policies with death benefits available to the officers' beneficiaries.

In connection with these plans the Company has purchased, or acquired through the merger, single premium life insurance policies with cash surrender values totaling \$38,303,000 and \$35,250,000 at December 31, 2014 and 2013, respectively.

Officer and Director Deferred Compensation Plan

The Company has established a deferred compensation plan for certain members of the management group and a deferred fee plan for directors for the purpose of providing the opportunity for participants to defer compensation. The Company bears the costs for the plan's administration and the interest earned on participant deferrals. The related

administrative expense was not material for the years ended December 31, 2014, 2013 and 2012. In connection with this plan, life insurance policies with cash surrender values totaling \$4,686,000 and \$4,174,000 at December 31, 2014 and 2013, respectively, are included on the consolidated balance sheet in other assets.

401(k) Savings Plan

The 401(k) savings plan (the "Plan") allows participants to defer, on a pre-tax basis, up to 15% of their salary (subject to Internal Revenue Service limitations) and accumulate tax-deferred earnings as a retirement fund. The Bank may make a discretionary contribution to match a specified percentage of the first 6% of the participants' contributions annually. The amount of the matching contribution was 75%, 60% and 50% for the years ended December 31, 2014, 2013 and 2012 respectively. The matching contribution is discretionary, vests over a period of five years from the participants' hire date, and is subject to the approval of the Board of Directors. The Company contributed \$477,000, \$360,000 and \$302,000 to the Plan in 2014, 2013 and 2012, respectively.

16. NON-INTEREST REVENUE

The major grouping of non-interest revenue on the consolidated income statements includes several specific items: service charges on deposit accounts, gains on the sale of loans, credit card fees, check card fees, the net gain (loss) on sales and calls of investment securities available for sale, and the net increase (decrease) in the cash surrender value of life insurance.

Non-interest revenue also includes one general category of “other income” of which the following are major components (dollars in thousands):

	Year Ended December 31,		
	2014	2013	2012
Included in other income:			
Loss on limited partnerships	\$(1,161)	\$(1,063)	\$(395)
Dividends on Equity Investments	453	356	67
Rental income on leases	-	46	102
Other	1,957	2,569	2,134
Total other non-interest income	\$1,249	\$1,908	\$1,908

17. OTHERNON-INTEREST EXPENSE

Other non-interest expense consisted of the following (dollars in thousands):

Year Ended December 31,

Edgar Filing: SIERRA BANCORP - Form 10-K

	2014	2013	2012

18. RELATED PARTY TRANSACTIONS

During the normal course of business, the Bank enters into loans with related parties, including executive officers and directors. These loans are made with substantially the same terms, including rates and collateral, as loans to unrelated parties. The following is a summary of the aggregate activity involving related party borrowers (dollars in thousands):

	Year Ended December 31,		
	2014	2013	2012
Balance, beginning of year	\$ 566	\$ 629	\$ 2,471
Disbursements	13,843	543	625
Amounts repaid	(12,006)	(606)	(2,467)
Balance, end of year	\$ 2,403	\$ 566	\$ 629
Undisbursed commitments to related parties	\$ 1,428	\$ 460	\$ 330

Deposits from related parties held by the Bank at December 31, 2014 and 2013 amounted to \$6,070,000 and \$7,523,000, respectively.

SIERRA BANCORP AND SUBSIDIARY

19. FAIR VALUE

Fair value is defined by U.S. GAAP as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

§ Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

§ Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

§ Level 3: Significant unobservable inputs that reflect a company's own assumptions about the factors that market participants would use in pricing an asset or liability.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

19. FAIR VALUE (Continued)

The Company used the following methods and significant assumptions to estimate fair values for each category of financial asset noted below:

Securities: The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges or by matrix pricing, which is a mathematical technique used widely in the industry to value debt securities by relying on their relationship to other benchmark quoted securities.

Collateral-dependent impaired loans: A specific loss allowance is created for collateral dependent impaired loans, representing the difference between the face value of the loan and its current appraised value less estimated disposition costs.

Foreclosed assets: Repossessed real estate (OREO) and other assets are carried at the lower of cost or fair value. Fair value is the appraised value less expected selling costs for OREO and some other assets such as mobile homes, and for all other assets fair value is represented by the estimated sales proceeds as determined using reasonably available sources. Foreclosed assets for which appraisals can be feasibly obtained are periodically measured for impairment using updated appraisals. Fair values for other foreclosed assets are adjusted as necessary, subsequent to a periodic re-evaluation of expected cash flows and the timing of resolution. If impairment is determined to exist, the book value of a foreclosed asset is immediately written down to its estimated impaired value through the income statement, thus the carrying amount is equal to the fair value and there is no valuation allowance.

20. DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

Disclosures include estimated fair values for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented. The following methods and assumptions were used by the Company to estimate the fair value of its financial instruments at December 31, 2014 and 2013:

Cash and cash equivalents, and fed funds sold: For cash and cash equivalents and fed funds sold, the carrying amount is estimated to be fair value.

Securities: The fair values of investment securities are determined by obtaining quoted prices on nationally recognized securities exchanges or by matrix pricing, which is a mathematical technique used widely in the industry to value debt securities by relying on their relationship to other benchmark quoted securities when quoted prices for specific securities are not readily available.

Loans and leases: For variable-rate loans and leases that re-price frequently with no significant change in credit risk or interest rate spread, fair values are based on carrying values. Fair values for other loans and leases are estimated by discounting projected cash flows at interest rates being offered at each reporting date for loans and leases with similar

terms, to borrowers of comparable creditworthiness.

Loans held for sale: Since loans designated by the Company as available-for-sale are typically sold shortly after making the decision to sell them, realized gains or losses are usually recognized within the same period and fluctuations in fair values are thus not relevant for reporting purposes. If available-for-sale loans stay on our books for an extended period of time, the fair value of those loans is determined using quoted secondary-market prices.

Cash surrender value of life insurance policies: The fair values are based on current cash surrender values at each reporting date provided by the insurers.

Investment in limited partnerships: The fair values of our investments in limited partnerships are estimated using quarterly indications of value provided by the general partner. The fair values of undisbursed capital commitments are assumed to be the same as their book values.

Other investments: Included in other assets are certain long-term investments carried at cost, which approximates estimated fair value, unless an impairment analysis indicates the need for adjustments.

Deposits: Fair values for non-maturity deposits are equal to the amount payable on demand at the reporting date, which is the carrying amount. Fair values for fixed-rate certificates of deposit are estimated using a cash flow analysis, discounted at interest rates being offered at each reporting date by the Bank for certificates with similar remaining maturities.

Short-term borrowings: The carrying amounts approximate fair values for federal funds purchased, overnight FHLB advances, borrowings under repurchase agreements, and other short-term borrowings maturing within ninety days of the reporting dates. Fair values of other short-term borrowings are estimated by discounting projected cash flows at the Company's current incremental borrowing rates for similar types of borrowing arrangements.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

20. DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

Long-term borrowings: The fair values of the Company's long-term borrowings are estimated using projected cash flows discounted at the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Subordinated debentures: The fair values of subordinated debentures are determined based on the current market value for like instruments of a similar maturity and structure.

Commitments to extend credit and letters of credit: If funded, the carrying amounts for currently unused commitments would approximate fair values for the newly created financial assets at the funding date. However, because of the high degree of uncertainty with regard to whether or not those commitments will ultimately be funded, fair values for loan commitments and letters of credit in their current undisbursed state cannot reasonably be estimated, and only notional values are disclosed in the table below.

Carrying amount and estimated fair values of financial instruments were as follows (dollars in thousands):

	Year Ended December 31, 2014				Total

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

21. BUSINESS COMBINATION

On November 14, 2014, the Company acquired 100% of the outstanding common and preferred shares of Santa Clara Valley Bank (SCVB) in exchange for \$15,300,000. Under the terms of the acquisition, SCVB common shareholders received \$12,300,000 or \$6.00 per share and SCVB preferred shareholders received \$3,000,000 to retire outstanding preferred stock and associated warrants. Included in the \$12,300,000 was \$700,000 which the Company paid to cash out existing in-the-money warrants. SCVB results of operations were included in the Company's results beginning November 14, 2014. Acquisition related costs of \$2,070,000 are included in other operating expense in the Company's income statement for the year ended December 31, 2014.

In accordance with GAAP, the Company recorded \$1,364,000 of goodwill and \$1,075,000 of core deposit intangibles. Goodwill represents the excess of the consideration transferred (cash) at the acquisition date over the fair values of the identifiable net assets acquired. The core deposit intangible is being amortized using a straight line basis over eight years. For tax purposes goodwill and core deposit intangibles are both non-deductible.

The acquisition offers the Company an opportunity to expand its market presence further south into the Santa Clara Valley. Synergies and cost savings resulting from the combined operations along with the introduction of the Company's existing products and services into the new region are expected to provide growth opportunities and increase profitability.

The following table summarizes the consideration paid for SCVB and the amounts of the assets acquired and liabilities assumed recognized at the acquisition date (dollars in thousands):

Consideration	
Cash	\$ 15,338
Equity Instruments	-

(Continued)

21. BUSINESS COMBINATION (Continued)

In many cases, the fair values of assets acquired and liabilities assumed were determined by estimating the cash flows expected to result from those assets and liabilities and discounting them at appropriate market rates. The most significant category of assets for which this procedure was used was that of acquired loans. The excess of expected cash flows above the fair value of the majority of loans will be accreted to interest income over the remaining lives of the loans in accordance with FASB Accounting Standards Codification (ASC) 310-20 (formerly SFAS 91). The Company believes that all contractual cash flows related to these loans will be collected. As such, these loans were not considered impaired at the acquisition date and were not subject to the guidance relating to purchased credit impaired loans, which have shown evidence of credit deterioration since origination. Loans acquired that were not subject to these requirements had a fair value and gross contractual amounts receivable of \$61,345,000 and \$71,470,000 as of the date of acquisition.

Certain loans, for which specific credit-related deterioration, since origination, was identified, are recorded at fair value, reflecting the present value of the amounts expected to be collected. Income recognition on these “purchase credit-impaired” loans is based on a reasonable expectation about the timing and amount of cash flows to be collected. Acquired loans deemed impaired and considered collateral dependent, with the timing of the sale of loan collateral indeterminate, remain on non-accrual status and have no accretable yield. These loans are discussed in further detail in Note 4 *Purchased Credit Impaired Loans*.

In accordance with GAAP, there was no carryover of the allowance for loan losses that had been previously recorded by SCVB.

The Company recorded a deferred income tax asset of \$2,300,000 related to SCVB’s net operating loss carry-forward, as well as other tax attributes of SCVB, along with the effects of fair value adjustments resulting from applying the acquisition method of accounting.

The fair value of savings and transaction deposit accounts acquired from SCVB were assumed to approximate their carry value, as these accounts have no stated maturity and are payable on demand.

The following table presents unaudited pro forma information as if the acquisition had occurred at the beginning of 2012. The unaudited pro forma information included adjustments for interest income on loans and securities acquired, amortization of intangibles arising from the transaction, depreciation expense on property acquired, interest expense on deposits acquired, and the related income tax effects. The unaudited pro forma financial information is not necessarily indicative of the results of operations that would have occurred had the transactions been effected on the assumed dates (dollars in thousands):

Item 9. Changes in and Disagreements with Accountants on Accounting And Financial Disclosure

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and its Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13(a)–15(e) as of the end of the period covered by this report (the "Evaluation Date") have concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were adequate and effective to ensure that material information relating to the Company and its consolidated subsidiaries would be made known to them by others within those entities, particularly during the period in which this annual report was being prepared.

Disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized, and reported within the time periods specified by the SEC.

Management's Report on Internal Control over Financial Reporting

Management of the Company is responsible for the preparation, integrity, and reliability of the consolidated financial statements and related financial information contained in this annual report. The consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America and, as such, include some amounts that are based on judgments and estimates of management.

Management has established and is responsible for maintaining effective internal control over financial reporting. The Company's internal control over financial reporting includes those policies and procedures that:

(i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

(iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal control can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time. The system contains monitoring mechanisms, and actions are taken to correct deficiencies identified.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. This assessment was based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2014.

Management is responsible for compliance with the federal and state laws and regulations concerning dividend restrictions and federal laws and regulations concerning loans to insiders designated by the FDIC as safety and soundness laws and regulations. Management assessed compliance by the Company's insured financial institution, Bank of the Sierra, with the designated laws and regulations relating to safety and soundness. Based on this assessment, management believes that Bank of the Sierra complied, in all significant respects, with the designated laws and regulations related to safety and soundness for the year ended December 31, 2014.

Our assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by Vavrinek, Trine, Day & Co., LLP, an independent registered public accounting firm, as stated in their report appearing below.

Changes in Internal Control

There were no significant changes in the Company's internal control over financial reporting or in other factors in the fourth quarter of 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Sierra Bancorp and Subsidiary

Porterville, California

We have audited Sierra Bancorp and Subsidiary's (the Company's) internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in conformity with U.S. generally accepted accounting principles. Because management's assessment and our audit were conducted to also meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management's assessment and our audit of the Company's internal control over financial reporting included controls over the preparation of financial statements in accordance with instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C). A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and the receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board, the consolidated balance sheets of the Company as of December 31, 2014 and 2013, and the related consolidated statements of income, shareholders' equity and comprehensive income and cash flows for each of the years in the three year period ended December 31, 2014, and our report dated March 12, 2015 expressed an unqualified opinion on those financial statements.
