1. Interim Report For The 108th Business Term From January 1,2008 to June 30,2008 Canon Inc.
-

To Our Shareholders

We are pleased to present our report for the summary of the first half of our 108th business term (from January 1, 2008 to June 30, 2008).

Reviewing conditions in both the Japanese and overseas economies during the first half of the current business term, the U.S. economy decelerated due to depressing residential investment in the wake of the subprime loan issue, and with soaring crude oil prices weighing on corporate profits and stifling personal consumption. European economies also slowed down under the impact from the U.S. economic situation. Asian economies sustained high growth centered in China, although growth rates diminished due to the sluggish EU and U.S. economies. Meanwhile, there was stagnation in the Japanese economy due to factors such as a stalling of exports from the global economic slowdown, a squeeze on corporate profits from soaring prices of crude oil and raw materials, and weak consumer spending due to inflation. In foreign exchange markets, compared with the first half of the previous fiscal year, the yen rose substantially against the U.S. dollar and rose slightly against the euro.

As to the conditions of the markets in which the Canon Group operates, demand for digital cameras grew steadily for both single lens reflex (SLR) and compact types, while demand for color laser beam printers also continued to grow. For networked multifunctional devices, demand continued to shift from black-and-white to color machines. In the area of inkjet printers, rising demand for multifunction devices covered for a decline in single-function devices, leaving overall demand unchanged. Demand for mirror projection mask aligners for LCDs improved substantially due to recovered capital expenditures at LCD panel manufacturers, but demand for semiconductor production equipment was sluggish as memory device manufacturers restrained new capital investment.

Under these business conditions, facing the third year of Phase III (2006 to 2010) of our Excellent Global Corporation Plan, to enable the manufacture of attractive products at a low cost and timely market introduction, the Canon

Group worked to reduce costs and raise operational efficiency by continuing to move forward with various measures in each area of development, procurement, production and sales, and also strengthened operating frameworks by newly establishing an Executive Officer System.

As to the earnings for the first half of the current business term, on a consolidated basis, we recorded net sales of 2,113.4 billion yen (down 2.5% from the first half of 2007), income before taxes and minority interests of 339.2 billion yen (down 16.5%), and net income of 214.5 billion yen (down 15.9%). Also on a non-consolidated basis, we recorded net sales of 1,395.3 billion yen (up 1.8%), ordinary profit of 256.2 billion yen (down 15.2%), and net income of 168.4 billion yen (down 16.2%).

For the interim dividend, we have decided to pay 55.0 yen per share from August 26.

For the second half of the current business term, amid uncertainty over prices of natural resources, interest rates and foreign exchange rates, we expect a continued slowdown in global economic growth, and with competition intensifying more and more, business conditions for the Canon Group will remain extremely severe. Despite these adverse circumstances, the Canon Group is committed to making all necessary efforts to achieve improved results in the second half of the fiscal year.

We look forward to your continued support and encouragement in the future.

August 2008

Fujio Mitarai
Chairman & CEO
Tsuneji Uchida

n Business Machines Operations

Office Imaging Products

In the imageRUNNER series of office-use digital networked multifunctional devices, we launched seven new models for four types of color machines in the Japanese market to accommodate to the market shift from black-and-white to color machines. We strengthened our product range especially by launching our affordable iR C3580F/C3080F with their printing speeds enhanced but without compromising their energy conservation and space-saving features, as well as the iR C2550F which offers the same basic functions at a lower price. Meanwhile, our top-line iR C5185 continued to perform well in the U.S. In black-and-white devices, we worked to increase sales of the high-speed iR5075N/5065N multifunctional devices. Moreover, we promoted our solutions business by proposing printing environments adjusted to customers' business formats and needs by using the Multifunctional Embedded Application Platform (MEAP) capable of expanding the range of functions installed on our imageRUNNER series.

In the imagePRESS series of printers for digital commercial printing, the imagePRESS C7000VP was chosen for the Best 10 New Products Award presented by the Nikkan Kogyo Shimbun and concurrently received the Masuda Award which is given to products of special excellence. Additionally, we expanded our product range with the launch of the imagePRESS C6000 which is capable of printing 60 pages per minute in both color and black-and-white.

In the multifunctional black-and-white machines for individuals and small-business owners, we launched two new products such as the Satera MF4270 which combines four functions (copier, printer, color scanner and fax) and an automated double-sided printing function in a compact body while offering a printing speed of 20 pages per minute, and worked to expand sales of these products.

As a result of these activities, sales for this segment fell by 5.3% on a consolidated basis and by 7.4% on a non-consolidated basis, both in comparison to the first half of 2007.

Change in Sales
100 MILLIONS OF YEN

Non-Consolidated

Computer Peripherals

In the inkjet printers market, there was a moderate yet definite tendency towards a decline in prices, and market conditions remained severe. At the same time, the shift from single-function to multifunctional devices continued. Under this environment, in multifunctional devices, we launched the PIXUS MX7600 suited for office-use and equipped with our newly developed PgR technology enabling high-grade printing on regular paper, and the home-use

PIXUS MX850 equipped with a duplex Auto Document Feeder, and worked to promote sales of these products. In single-function devices, we expanded our product range with the launch of the PIXUS iP2600, an entry model featuring slim form and stylish design, and the compact PIXUS iP100 photo printer which offers five color ink, minimum 1pl ink drop size, and high-quality resolution printing of 9600 dpi. As a result, we were able to substantially increase unit sales of inkjet printers despite the sluggish market. Meanwhile, sales of consumables including ink cartridges were also strong.

Regarding laser beam printers, OEM-brand products continued robust expansion in color products. In black-and-white products, the growth of multifunctional devices sustained strong but single-function devices slowed down. For Canon-brand products, in color machines, we launched the Satera LBP5050/5050N which features a compact body, only 262mm in height, and a color printing speed of 8 pages per minute, and worked to promote sales of these products. In black-and-white machines, we launched five models including the Satera LBP3980 capable of printing 35 pages per minute and up to A3 size, and the Satera LBP3310 capable of printing A4 size and equipped with an automatic duplexing capability as standard. Additionally, we worked to expand our solutions business utilizing the MEAP-Lite function expansion system.

As a result of these activities, sales for this segment fell by 2.3% on a consolidated basis and by 2.4% on a non-consolidated basis, both in comparison to the first half of 2007.

Business Information Products

The office-use document scanners market continued to grow due to document digitization becoming widespread. Demand has been rising especially for low-priced compact products due to corporations carrying out upgrades of their internal PC and network environments. Under these conditions, in the image FORMULA series handled by Canon Electronics Inc., we launched the DR-X10C as a new version of the flagship model and promoted the compact and affordable DR-2510C and DR-2010C, achieving a steady growth in unit sales as a result.

Regarding calculators handled by Canon Electronics Business Machines (H.K.) Co., Ltd., we launched in the Japanese market the FN-600 equipped with financial calculator functions such as loan calculations and worked to expand sales. Regarding electronic dictionaries handled by the same company, we launched the wordtank V903 which offers rich Chinese language content for learners of Chinese, and the wordtank C36 for high-school students, and worked to expand sales. Despite these efforts, sales of electronic dictionaries declined.

Sales of servers and personal computers handled by Canon Marketing Japan Inc. declined as that company focused on its shift from sales of single products to the solutions business.

As a result of these activities, sales for this segment fell by 12.6% on a consolidated basis in comparison to the first half of 2007. For this segment, there were no sales on a non-consolidated basis.

n Camera Operations

In digital cameras, demand for SLR models continued to grow. Under these conditions, in the EOS Kiss series which has been widely popular in the market, we expanded our product range with the launch of the affordable EOS Kiss X2 which accomplishes an even higher image quality owing to its 12.2 mega pixel CMOS sensor, and its sibling model, the EOS Kiss F for first-time users of SLR. Furthermore, as we worked to promote sales of the EOS 40D for advanced amateur photographers and other products, sales of SLR models developed positively. Consequently, sales of our EF lens series, dedicated flashes and other products also marked sound sales increases.

Regarding compact digital cameras, in our stylishly designed IXY DIGITAL series, we launched four models including the IXY DIGITAL 20 IS which features an enhanced image stabilization and a 3x zoom function with upgraded color variation, and the IXY DIGITAL 820 IS which boasts a optical 5x zoom function. Additionally, in the PowerShot series with its ample product range for a variety of photographic styles, we launched three new products including the PowerShot A590 IS which realized a combination of high performance with ease of use by loading Easy mode that enables easy shots of beautiful photographs and features optical 4x zoom function. Sales of digital compact cameras increased as a result.

In compact photo printers, in the dye sublimation SELPHY series, we strengthened our range of products by launching two new models including the CP770 based on a new concept targeting mothers with small children.

In digital video cameras, we increased our share of the market for HD video cameras by launching new products such as the iVIS HF10 which enables recording up to twelve hours by loading double memory comprised of an internal flash memory and an SD card slot as recording medium.

As a result of these activities, sales for this segment grew by 1.9% on a consolidated basis and by 12.2% on a non-consolidated basis, both in comparison to the first half of 2007.

12

n Optical and Other Products Operations

In mirror projection mask aligners for LCDs, the market improved substantially as panel manufacturers made proactive capital investment in reaction to the improved demand and supply situation for large-size LCD panels and rising panel prices. Under these conditions, as we worked to promote sales of our MPAsp-H710, the eighth-generation mirror projection mask aligners for LCDs and other products, sales resulted in significant sales growth.

In semiconductor production equipment, we experienced lower sales amid sustained severe market conditions due to falling demand caused by semiconductor manufacturers curbing capital investment in reaction to slumping semiconductor prices.

Regarding large-format inkjet printers, in the imagePROGRAF series, we launched the imagePROGRAF iPF720 capable of printing A0-plus paper for businesses that use CAD drawings for architecture or design, and the imagePROGRAF iPF605 capable of printing A1-plus paper. Sales posted solid growth as a result. Additionally, we launched PosterArtist 2008, a software application for the easy production of professional quality posters.

Regarding broadcast-use television lenses, we promoted sale of television lenses including DIGISUPER 86AF equipped with an autofocus function adaptive to high definition television.

In medical equipment, we launched CR-1, a non-mydratic digital retinal camera capable of producing high-quality images for medical examinations at two-thirds less flash intensity than before.

Sale of die bonders handled by Canon Machinery Inc. and magnetic head film deposition equipment handled by Canon ANELVA Corporation were depressed amid sluggish market conditions.

As a result of these activities, sales for this segment fell by 2.8% on a consolidated basis and grew by 19.7% on a non-consolidated basis, both in comparison to the first half of 2007.

----------------------	------------

Standard for Allowances

(Accrued long service rewards for employees)

Accrued long service rewards is maintained based on expected amounts to cover the rewards payable under the byelaw applied to long-service employee.

Note to change in Accounting Policy

The Company has a byelaw for Refresh Leave to grant long service reward and refresh leave at a regular period to the employees who have been serving the Company for long years in order to refresh mind and body as well as generating new energy.

As the significance of amounts rose due to the increase in numbers of employees, and reinforcement of attendance record systems enabled to estimate the rational amounts of reward payable, the Company changed the accounting policy for long service reward from the expense of the term in which the reward was paid, to recognition of accrued long service reward based on expected amounts under the byelaw from this interim accounting period, in order to calculate periodical profit and loss more appropriately.

As a result, operating profit, ordinary profit and income before income taxes have decreased by 1,232 million yen, and net income has decreased by 739 million yen for the interim accounting period ended June 30, 2008.

Transfer to reserve for deferral of capital gain on property					
Reversal of reserve for deferral of capital gain on property					
Dividends from surplus					
Net income					
Purchase of treasury stock					
Disposal of treasury stock			(5)		
Net change of items other than stockholders equity					
Total changes in the term	38	37	(5)		(1,777)
Balance at June 30, 2008	174,736	306,262	20	22,114	5,917

Notes:

1. Number of shares issued as of June 30, 2008 1,333,711,360 shares
2. Classes and number of treasury stock

Classes of stock	Balance as of December 31, 2007	Increase	Decrease	Balance as of June 30, 2008
Common stock	72,588,428 shares	10,315 shares	3,869 shares	72,594,874 shares

(Reason for change)

The increase reflects the purchase of 10,315 shares based on the shareholders' request for purchase of shares less-than-one-unit. The decrease reflects the sale of 3,869 shares based on the shareholders' request for the sale of shares less-than-one-unit.
