Item 2.02 Results of Operations and Financial Condition.

On October 26, 2011, First BanCorp. (the “Corporation”) issued a press release announcing its unaudited results of operations for the third quarter ended September 30, 2011. A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

The Corporation has included in this release the following financial measures that are not recognized under generally accepted accounting principles, which are referred to as non-GAAP financial measures: (i) the calculation of net interest income, interest rate spread and net interest margin rate on a tax-equivalent basis and excluding changes in the fair value of derivative instruments and certain financial liabilities; (ii) the calculation of the tangible common equity ratio and the tangible book value per common share; (iii) the Tier 1 common equity to risk-weighted assets ratio; and (iv) the adjusted pre-tax, pre-provision income. Investors should be aware that non-GAAP measures have inherent limitations and should be read only in conjunction with the Corporation’s consolidated financial data prepared in accordance with GAAP.

Net interest income, interest rate spread and net interest margin are reported on a tax-equivalent basis and excluding changes in the fair value of derivative instruments and financial liabilities elected to be measured at fair value (“valuations”). The presentation of net interest income excluding valuations provides additional information about the Corporation’s net interest income and facilitates comparability and analysis. The changes in the fair value of derivative instruments and unrealized gains and losses on liabilities measured at fair value have no effect on interest due or interest earned on interest-bearing liabilities or interest-earning assets, respectively. The tax-equivalent adjustment to net interest income recognizes the income tax savings when comparing taxable and tax-exempt assets and assumes a marginal income tax rate, as described in Exhibit A — Tables 2 and 3 of the press release attached hereto as Exhibit 99.1. Income from tax-exempt earning assets is increased by an amount equivalent to the taxes that would have been paid if this income had been taxable at statutory rates. Management believes that it is a standard practice in the banking industry to present net interest income, interest rate spread and net interest margin on a fully tax-equivalent basis. This adjustment puts all earning assets, most notably tax-exempt securities and certain loans, on a common basis that facilitates comparison of the Corporation’s results to results of its peers.

The following table reconciles the non-GAAP financial measure “net interest income on a tax-equivalent basis and excluding fair value changes” with net interest income calculated and presented in accordance with GAAP. The table also reconciles the non-GAAP financial measures “net interest spread and margin on a tax-equivalent basis and excluding fair value changes” with net interest spread and margin calculated and presented in accordance with GAAP.

The tangible common equity ratio and tangible book value per common share are non-GAAP measures generally used by the financial community to evaluate capital adequacy. Tangible common equity is total equity less preferred equity, goodwill and core deposit intangibles. Tangible assets are total assets less goodwill and core deposit intangibles. Management and many stock analysts use the tangible common equity ratio and tangible book value per common share in conjunction with more traditional bank capital ratios to compare the capital adequacy of banking organizations with significant amounts of goodwill or other intangible assets, typically stemming from the use of the purchase accounting method of accounting for mergers and acquisitions. Neither tangible common equity nor tangible assets, or related measures should be considered in isolation or as a substitute for stockholders' equity, total assets or any other measure calculated in accordance with GAAP. Moreover, the manner in which the Corporation calculates its tangible common equity, tangible assets and any other related measures may differ from that of other companies reporting measures with similar names. The following table is a reconciliation of the Corporation's tangible common equity and tangible assets:

The Tier 1 common equity to risk-weighted assets ratio is calculated by dividing (a) tier 1 capital less non-common elements including qualifying perpetual preferred stock and qualifying trust preferred securities by (b) risk-weighted assets, which assets are calculated in accordance with applicable bank regulatory requirements. The Tier 1 common equity ratio is not required by GAAP or on a recurring basis by applicable bank regulatory requirements. However, this ratio was used by the Federal Reserve in connection with its stress test administered to the 19 largest U.S. bank holding companies under the Supervisory Capital Assessment Program, the results of which were announced on May 7, 2009. Management is currently monitoring this ratio, along with the other ratios discussed above, in evaluating the Corporation's capital levels and believes that, at this time, the ratio may be of interest to investors.

The following table reconciles stockholders' equity (GAAP) to Tier 1 common equity:

1- Tier 1 capital excludes net unrealized gains (losses) on available-for-sale debt securities and net unrealized gains on available-for-sale equity securities with readily determinable fair values, in accordance with regulatory risk-based capital guidelines. In arriving at Tier 1 capital, institutions are required to deduct net unrealized losses on available-for-sale equity securities with readily determinable fair values, net of tax.

2- Approximately \$12 million of the Corporation's deferred tax assets at September 30, 2011 (June 30, 2011 - \$11 million; March 31, 2011 - \$12 million December 31, 2010 - \$13 million; September 30, 2010 - \$64 million) was included without limitation in regulatory capital pursuant to the risk-based capital guidelines, while approximately \$0.3 million of such assets at June 30, 2011 (March 31, 2011 - \$1 million; December 31, 2010 - \$0.8 million; September 30, 2010 - \$44 million; June 30, 2010 - \$38 million) exceeded the limitation imposed by these guidelines and, as "disallowed deferred tax assets," was deducted in arriving at Tier 1 capital. According to regulatory capital guidelines, the deferred tax assets that are dependent upon future taxable income are limited for

inclusion in Tier 1 capital to the lesser of: (i) the amount of such deferred tax asset that the entity expects to realize within one year of the calendar quarter end-date, based on its projected future taxable income for that year, or (ii) 10% of the amount of the entity's Tier 1 capital. Approximately \$7 million of the Corporation's other net deferred tax liability at September 30, 2011 (June 30, 2011 - \$5 million; March 31, 2011 - \$5 million; December 31, 2010 - \$5 million; September 30, 2010 - \$7 million) represented primarily the deferred tax effects of unrealized gains and losses on available-for-sale debt securities, which are permitted to be excluded prior to deriving the amount of net deferred tax assets subject to limitation under the guidelines.

One non-GAAP performance metric that management believes is useful in analyzing underlying performance trends, particularly in times of economic stress, is adjusted pre-tax, pre-provision income. Adjusted pre-tax, pre-provision income, as defined by management, represents net (loss) income excluding income tax expense (benefit), the provision for loan and lease losses, gains on sale and OTTI of investment securities, as well as certain items identified as unusual, non-recurring or non-operating.

From time to time, revenue and expenses are impacted by items judged by management to be outside of ordinary banking activities and/or by items that, while they may be associated with ordinary banking activities, are so unusually large that management believes them to be nonrecurring. These items result from factors originating outside the Corporation such as regulatory actions or assessments, and may result from unusual management decisions, such as the early extinguishment of debt.

The following table reconciles (loss) income before income taxes (GAAP) to adjusted pre-tax, pre-provision income:

Pre-Tax, Pre-Provision Income (Dollars in thousands)	Quarter Ended

**Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers**

On October 27, 2011, the Board of Directors of the Corporation elected Thomas M. Hagerty, subject to regulatory approval, and Michael P. Harmon to serve as directors on the Corporation's Board of Directors.

Mr. Hagerty is a Managing Director at Thomas H. Lee Partners, L.P. (“THL”) and has been with that firm since 1988. THL, which owns 24.82% of the Corporation’s common stock, designated Mr. Hagerty to serve as its Board representative pursuant to THL’s investment agreement with the Corporation. Under this agreement, THL purchased from the Corporation shares of common stock having an aggregate price of \$174.1 million. Upon receipt of regulatory approval, Mr. Hagerty will serve on the Board’s Corporate Governance and Nominating Committee.

Mr. Harmon is a Managing Director at Oaktree Capital Management, L.P. where he has been responsible for sourcing, evaluating and managing private equity investments since 1997. Two funds managed by Oaktree Capital Management, L.P. (together, “Oaktree”), which collectively own 50,684,485 shares of the Corporation’s common stock or approximately 24.82% of the outstanding common stock of the Corporation, designated Mr. Harmon to serve as their Board representative pursuant to Oaktree’s investment agreement with the Corporation. Under this agreement, Oaktree purchased from the Corporation shares of common stock for an aggregate purchase price of \$174.1 million. Mr. Harmon will serve on the Board’s Compensation and Benefits Committee.

The rights of each of THL and Oaktree to designate a person to serve on the Board will remain in effect as long as each own in the aggregate at least 25% of the shares of common stock that each currently owns.
