FOR IMMEDIATE RELEASE

MACAO (June 10, 2014) - Deswell Industries, Inc. (Nasdaq: DSWL) today announced its financial results for the fiscal fourth quarter ended March 31, 2014.

Net sales for the fourth quarter ended March 31, 2014 were \$7.9 million, a decrease of 16.5% compared to net sales of \$9.5 million for the same quarter ended March 31, 2013. Net sales decreased by 27.4% to \$3.5 million in the Company's plastic segment and decreased by 5.3% to \$4.4 million in the electronic and metallic segment. The operating loss in the fourth quarter was \$3.0 million, compared to an operating loss of \$2.7 million for the same quarter of fiscal 2013.

Total gross margin decreased to 2.5% in the fourth quarter ended March 31, 2014 compared to 3.5% in the same quarter last year. Gross profit margin in the plastic segment increased to 13.1% of net sales for the fourth quarter of fiscal 2014 compared to 2.2% of net sales for the same quarter of last fiscal year. The increase in gross profit and margin in the plastic segment was mainly due to the decreases in labor costs and factory overhead, offsetting an increase in raw materials cost as a percentage of sales. Gross margin in the electronic and metallic segment decreased to negative 5.9% of net sales for the fourth quarter ended March 31, 2014 compared to 4.8% of net sales for the year-ago quarter. The decrease in gross profit and margin in the electronic and metallic segment was mainly attributed to increases in raw materials and labor costs as well as in factory overheads.

The Company reported a net loss of \$3.1 million for the fourth quarter ended March 31, 2014 compared to a net loss of \$2.0 million for the quarter ended March 31, 2013. Deswell reported a basic and diluted loss per share of (\$0.19) for the fourth quarter of fiscal 2014 (based on 16,257,000 and 16,257,000 weighted average shares outstanding, respectively), compared to a basic and diluted loss per share of (\$0.12) (based on 16,794,000 and 16,810,000 weighted average shares outstanding, respectively), for the quarter ended March 31, 2013.

Net sales for the year ended March 31, 2014 were \$40.9 million, a decrease of 24.3%, compared to sales of \$54.1 million for the corresponding period in fiscal 2013. Operating loss for the year ended March 31, 2014 was \$7.2 million, compared to operating loss of \$3.7 million for fiscal 2013. The Company reported a net loss of \$7.5 million in fiscal 2014, compared to net loss of \$2.0 million for the year ended March 31, 2013. Deswell reported basic and diluted net loss per share of (\$0.46) for fiscal 2014, (based on 16,186,000 and 16,186,000 weighted average share outstanding, respectively), compared to basic and diluted loss per share of (\$0.12) (based on 16,468,000 and 16,560,000 weighted average shares outstanding, respectively), for the prior fiscal year.

The Company's balance sheet remained strong at the end of the fourth quarter of fiscal 2014, with \$23.3 million in cash and cash equivalents at March 31, 2014 compared to \$32.0 million at March 31, 2013. Working capital totaled \$50.9 million as of March 31, 2014, versus \$58.3 million as of March 31, 2013. Furthermore, the Company has no long-term or short-term borrowings as of March 31, 2014.

Mr. Edward So, Chief Executive Officer, commented, "While the global economic environment continues to be challenging, we are focused on growing our business by providing our customers the tools they need to remain

competitive, such as product design assistance to reduce development costs and accelerate time to market. We are investing in new equipment and developing new capabilities to increase automation and quality assurance and we've introduced ongoing initiatives to streamline internal processes using Six Sigma and Lean manufacturing to reduce waste and increase operational efficiency. Another priority is developing our ability to leverage our existing strengths to gain exposure to related market segments to enhance our reach and drive new business growth. We are pleased to have maintained our strong balance sheet with \$23 million in cash and no debt.”

Forward-Looking Statements

Statements in this press release that are "forward-looking statements" are based on current expectations and assumptions that are subject to risks and uncertainties. For example, our statements regarding our expected growth in sales from the electronic and metallic division in the coming year and our efforts to reduce overhead costs in our plastic division are forward-looking statements. Actual results could differ materially because of the following factors, among others, which may cause revenues and income to fall short of anticipated levels or our overhead expenses to increase: our dependence on a few major customers; vigorous competition forcing product price reductions or discounts; the timing and amount of significant orders from our relatively few significant customers; continuing increases in resin prices that cannot be passed on to customers; unexpected production delays; obsolete inventory or product returns; losses resulting from fraudulent activity of our customers or employees; labor shortages that increase labor and costs; changes in the mix of products we manufacture and sell; adverse currency fluctuations in the renminbi and Hong Kong dollar when translated to US dollars; potential new accounting pronouncements; and the effects of travel restrictions and quarantines associated with major health problems, such as the Severe Acute Respiratory Syndrome, on general economic activity.

For further information regarding risks and uncertainties associated with the Company’s business, please refer to the “Risk Factors” section of Company’s Annual Report on Form 20-F, copies of which may be obtained from the Website maintained by the Securities and Exchange Commission at <http://www.sec.gov>.

All information in this release is made as of the date of this press release. Deswell undertakes no duty to update any forward-looking statement to conform the statement to actual results or changes in Deswell’s expectations.

The basic net income per share is computed by dividing income available to common holders by the weighted average number of common shares outstanding during the period. Diluted net income per share gives effect to all potentially dilutive common shares outstanding during the period.

The weighted average number of common shares outstanding is adjusted to include the number of additional common shares that would have been outstanding if the potentially dilutive common shares had been issued. In computing the dilutive effect of potential common shares, the average stock price for the period is used in determining the number of treasury shares assumed to be purchased with the proceeds from the exercise of options.

The net income (loss) for the years ended March 31, 2014 and 2013 were both from the Company's continuing operations.

6. Stock Buyback Plan

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Results of Operations

General

The Company's revenues are derived from the manufacture and sale of (i) injection-molded plastic parts and components, (ii) electronic products and subassemblies and (iii) metallic parts and components and distribution sales of audio equipment. The Company carries out all of its manufacturing operations in southern China, where it is able to take advantage of the lower overhead costs and less expensive labor rates as compared with Hong Kong.

Quarter Ended March 31, 2014 Compared to Quarter Ended March 31, 2013

Net Sales - The Company's net sales for the quarter ended March 31, 2014 were \$7,944,000, a decrease of \$1,573,000, or 16.5%, as compared to the corresponding period in fiscal 2013. The decrease in sales was mainly related to the decrease in sales of \$1,323,000 in our plastic segment and of \$250,000 in our electronic and metallic segment. These represent decreases of 27.4% and 5.3% respectively, as compared with the net sales from these segments in the corresponding period of the prior fiscal year.

The decrease in net sales in our plastic segment was mainly due to a decrease in orders from existing customers of \$1,708,000 mainly for printing equipment, motor vehicle, tooling and baby cutlery products, offsetting an increase in orders from other existing customers of \$384,000, mainly for office and tooling equipment. The decrease of net sales in the electronic and metallic segment was largely due to a decrease in orders of \$1,183,000 from existing customers for professional audio equipment, home entertainment and vending machine products, offsetting an increase of \$933,000 in sales for professional audio equipment with other existing customers.

Gross Profit - The gross profit for the quarter ended March 31, 2014 was \$199,000, representing a gross profit margin of 2.5%. This compares with the overall gross profit and gross profit margin of \$331,000 or 3.5% for the quarter ended March 31, 2013.

Gross profit in the plastic segment increased by \$355,000 to \$459,000 or 13.1% of net sales, for the quarter ended March 31, 2014, as compared to \$104,000 or 2.2% of net sales, for the quarter ended March 31, 2013. The increase in gross margin in the plastic segment was mainly attributed to the combined effect of decreases in labor costs and factory overheads, offsetting an increase in raw materials cost as a percentage of sales, as compared to the same quarter in the prior year.

Gross profit in the electronic and metallic segment decreased by \$487,000 to a gross loss of \$260,000, or negative 5.9% of net sales, for the quarter ended March 31, 2014, as compared to gross profit of \$227,000 or 4.8% of net sales, for the same period of the last fiscal year. The decrease in gross margin was mainly attributed to increases in raw materials and labor costs, as well as factory overhead, as compared to the same quarter of last fiscal year.

Selling, General and Administrative Expenses – SG&A expenses for the quarter ended March 31, 2014 were \$2,239,000, as compared to \$3,054,000 for the corresponding period of last year. As a percentage of sales, the SG&A expenses were 28.2% for the quarter ended March 31, 2014, as compared to 32.1% for the same quarter of last fiscal year.

The SG&A expenses in the plastic segment decreased by \$666,000 to \$1,539,000, or 43.9% of net sales, for the quarter ended March 31, 2014, as compared to \$2,205,000, or 45.6% of net sales for the corresponding period in fiscal 2013. The decrease in SG&A expenses was due to decreases of \$539,000 in staff and welfare costs, \$52,000 in selling expenses and \$41,000 in depreciation expense, as compared with the year-ago quarter.

SG&A expenses in the electronic and metallic segment decreased by \$149,000 to \$700,000, or 15.8% of net sales for the quarter ended March 31, 2014, compared to \$849,000, or 18.1% of net sales for the corresponding period in fiscal 2013. The decrease in SG&A expenses for the quarter ended March 31, 2014 was mainly due to the decrease of \$198,000 in staff cost, offsetting the increase of \$63,000 in selling expenses, as compared with the corresponding quarter in the prior fiscal year.

Other expense - Other expense was \$946,000 for the quarter ended March 31, 2014, as compared to other income of \$55,000 for the quarter ended March 31, 2013.

On a segment basis, other expense attributable to the plastic segment was \$807,000 as compared to other expense of \$241,000 for the same quarter last year. The increase in other expense for the quarter ended March 31, 2014 was mainly due to an exchange loss of \$247,000 and charges of \$490,000 for impairment of property, plant and equipment, and \$235,000 for write-down of goodwill, as compared to an exchange loss of \$39,000 and charges of \$197,000 for impairment of property, plant and equipment in the corresponding year-ago quarter.

Other expense attributable to the electronic and metallic segment was \$139,000 for the quarter ended March 31, 2014, as compared to other income of \$296,000 for the year-ago quarter. The decrease in other income for the quarter ended March 31, 2014 was mainly due to an exchange loss of \$50,000 and a loss on disposal of fixed assets of \$155,000, offsetting other income of \$31,000, as compared to reversals of provisions of \$113,000 for local government taxes and other receivables, and \$157,000 for the write-off of long-term accounts payables in the corresponding quarter of the prior fiscal year.

Operating loss - Operating loss was \$2,986,000 for the quarter ended March 31, 2014, as compared with operating loss of \$2,668,000 for the corresponding quarter in the prior fiscal year.

On a segment basis, the operating loss in the plastic division was \$1,887,000 or negative 53.8% of net sales in the quarter ended March 31, 2014 compared to an operating loss of \$2,342,000 or negative 48.5% of net sales in the corresponding period of fiscal 2013. The decrease in operating loss as a percentage of net sales in the plastic division was mainly due to an increase in gross margin as described above.

Operating loss in the electronic and metallic segment was \$1,099,000, or negative 24.8% of net sales in the quarter ended March 31, 2014 compared to operating loss of \$326,000 or negative 7.0% of net sales in the corresponding period of fiscal 2013. The increase in operating loss in the electronic and metallic segment was mainly due to decreases in gross margin and other income as described above.

Non-operating income – Non-operating income was \$128,000 for the quarter ended March 31, 2014 as compared to non-operating income of \$772,000 for the year-ago quarter. The decrease in non-operating income is mainly attributable to a decrease of \$128,000 in income from securities investments and a decrease of \$532,000 on the fair value of marketable securities, as compared to the year-ago quarter.

Income Taxes – Income tax for the quarter ended March 31, 2014 was comprised of an income tax expense of \$84,000 and a deferred tax provision of \$179,000, as compared to an income tax expense of \$19,000 and a deferred tax provision of \$84,000 in the corresponding quarter of the prior fiscal year.

On a segment basis, there was an income tax expense of \$11,000 and a deferred tax benefit of \$16,000 in the plastic segment for the quarter ended March 31, 2014, as compared to a credit adjustment of \$10,000 to income tax and a deferred tax provision of \$87,000 in the year-ago quarter.
