PRESS RELEASE

SES SELECTS GILAT FOR THE DELIVERY OF CONSUMER KA-BAND EQUIPMENT
FOR ASTRA2CONNECT

Gilat will provide user terminals enabling download speeds of up to 20 Mbit/s

Luxembourg / Israel, 1st August 2011 – SES S.A. (Euronext Paris and Luxembourg Stock Exchange: SESG) and Gilat Satellite Networks Ltd. (NASDAQ: GILT) today announced that they have signed an agreement for the delivery of network equipment and Ka-band end user terminals for SES's satellite-based Internet service ASTRA2Connect.

The use of Gilat's Ka-band platform will allow SES to deliver significantly faster Internet and Voice-over-IP services to private households and small businesses across Europe. Currently serving over 80,000 ASTRA2Connect end users, SES today operates the largest satellite-based broadband network in Europe.

The use of Ka-band end user terminals supporting download speeds of up to 20 Mbit/s is part of SES's strategy to bring its successful ASTRA2Connect service to the next level. Starting in the fourth quarter of 2012, SES will further increase the performance of its ASTRA2Connect service by using additional multiple spot beam Ka-band capacity onboard its ASTRA 2F, 2E and 2G spacecraft to be launched between 2012 and 2014 and located at 28.2 degrees East.

"This is an important milestone for Gilat and a strong acknowledgement of our Ka-band technology. The use of Ka-band technology represents a significant shift in the satellite market. This agreement represents an important opportunity for Gilat to be at the forefront of next-generation satellite services, while providing consumers and businesses across Europe with valuable improvements in their day to day broadband services", said Amiram Levinberg, Gilat's CEO. "Gilat's innovative technology will set a new price performance level in the consumer and Small Office/Home Office (SoHo) market."

"We are continuously enhancing our service offerings by providing satellite internet services at speeds comparable to standard terrestrial and terrestrial wireless networks such as DSL, cable, and LTE technologies." said Patrick Biewer, Managing Director of ASTRA Broadband Services. "Gilat's advanced VSAT technology featuring high data rates and cost effective terminal technology will allow us to further optimize our service proposition for the end-consumer market and to increase the competitive advantage of our satellite-based Internet service ASTRA2Connect."

About ASTRA Broadband Services S. A.

ASTRA Broadband Services is a 100% owned subsidiary of SES ASTRA operating SES ASTRA's satellite broadband access ASTRA2Connect.

ASTRA2Connect is a bi-directional satellite broadband service, providing households and businesses in regions without terrestrial broadband networks a reliable and low-cost access to the broadband internet. Apart from an access to the internet, ASTRA2Connect provides VoIP telephony and the reception of all digital and analogue TV and radio channels on ASTRA.

ASTRA2Connect is today available in 23 European countries and has already more than 80,000 customers. With speeds of up to 6 Mb/s in download and easily installable hardware components (80cm satellite dish, iLNB and satellite modem), ASTRA2Connect has become the most successful satellite-based residential broadband network in Europe. Based on this success, SES ASTRA has also expanded its distribution network to East, West and Central Africa and the Middle East. ASTRA2Connect is also used by the maritime market for low-cost access to the broadband internet and for SCADA applications.

About SES

SES (Euronext Paris and Luxembourg Stock Exchange: SESG) wholly owns the market-leading satellite operators SES ASTRA and SES WORLD SKIES and participations in Ciel in Canada and QuetzSat in Mexico, as well as a strategic participation in satellite infrastructure start-up O3b Networks. SES provides outstanding satellite communications solutions via a global fleet of 45 satellites. For further information: www.ses.com

About Gilat

Gilat Satellite Networks Ltd. is a leading provider of products and professional services for satellite-based broadband communications networks worldwide. Gilat was founded in 1987 and has shipped over 750,000 Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 22 sales and service offices worldwide. Gilat develops and markets an expansive range of broadband satellite solutions including high-performance VSATs under the SkyEdge™ and SkyEdge II brands, low-profile antennas for satcom-on-the-move, under the RaySat Antenna Systems and the StealthRay™ brands and next generation solid-state power amplifiers for mission-critical defense and broadcast satellite communications systems under the Wavestream brand. Gilat's wholly-owned subsidiary, Spacenet Inc., is a leading provider of managed services in North America to the business and government segments. Visit Gilat at www.gilat.com.
