**PART III - NARRATIVE**

State below in reasonable detail why Forms 10-K, 20-F, 11-K, 10-Q, 10-D, N-SAR, N-CSR, or the transition report or portion thereof, could not be filed within the prescribed time period.

Hungarian Telephone and Cable Corp. (the "Company") is unable to file its Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2007 by August 9, 2007, without unreasonable effort and expense. The Company recently determined that it made some clerical calculation errors in 2006 related to the application of Statement of Financial Accounting Standards (SFAS) No. 133 "Accounting for Derivative Instruments and Hedging Activities", as amended, with respect to some embedded derivatives that are contained in certain operating contracts that the Company's subsidiaries entered into which are settled in euros. The Company has informed its former independent public accounting firm about this matter. The Company is working to determine the effect of such errors on the Company's prior financial statements. At this point, the Company estimates that the cumulative effect through December 31, 2006 would be a non-cash corrective charge of approximately \$2.0 million. The Company expects to file its Quarterly Report on Form 10-Q on, or before, August 14, 2007.

**Part IV(3) Explanation**

Due to the completion of the Company's acquisition of Invitel on April 27, 2007, the Company's Income from Operations for the second quarter 2007 will be significantly impacted by the inclusion of Invitel's results of operations for two months. The Company estimates that its income from operations for the second quarter 2007 will be approximately \$9.5 million.

In addition, the Company expects to report a significant increase in its net loss for the second quarter 2007 as compared to the second quarter 2006, primarily as a result of (i) an increase in interest expense due to the additional debt associated with the Invitel transaction and (ii) a non-cash charge for changes in the unrealized fair value of certain hedges entered into in connection with the Invitel acquisition. The Company estimates that the second quarter interest expense will be approximately \$14 million and the non-cash charge for losses on derivative financial instruments will be approximately \$22 million.

The Company engages in foreign currency and interest rate hedging activities to reduce the risk that changes in exchange rates and interest rates will adversely affect the eventual net cash flows resulting from its debt obligations. The Company does not expect to enter into financial instruments for trading or speculative purposes.

In January 2007 the Company entered into six foreign currency and interest rate hedges in order to reduce the exposure to the value of the Hungarian currency and the level of interest rates that would arise upon the completion of the acquisition of Invitel. The Company hedged (i) the Floating Rate Senior Notes that were issued to finance the Invitel transaction and (ii) the Invitel Debt that the Company assumed upon closing. These items are non-cash items until they either mature or are unwound.

To limit the variability of interest rates on existing and projected debt, the Company entered into interest rate swap agreements to manage fluctuations in cash flows resulting from interest rate risk. Under the terms of the interest rate swaps, the Company receives variable interest rate payments from the hedging counterparty and makes fixed interest rate payments, thereby creating the equivalent of fixed rate debt.

To limit the impact of fluctuations between the Company's Hungarian subsidiaries' functional currency, the Hungarian forint, and the euro, the Company entered into currency swap agreements and forward agreements, to receive euros and pay forints, thereby creating the equivalent of forint debt obligations.

The objective of these contracts is to neutralize the impact of exchange rate and interest rate movements on our cash flows. However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, there can be no assurance that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates.
