Mitsubishi Tokyo Financial Group, Inc.

Integration and reorganization of asset management subsidiaries

Tokyo, January 29, 2004 --- Mitsubishi Tokyo Financial Group, Inc. (MTFG) today announced that, subject to regulatory and other approvals, it intends to integrate and reorganize the operations of its asset management subsidiaries, Tokyo-Mitsubishi Asset Management Ltd (TMAM) and Mitsubishi Trust Asset Management Co., Ltd. (MTAM). This integration and reorganization is part of MTFG's ongoing measures to shift to more consolidated and integrated Group management, and is intended to facilitate the provision of higher quality asset management services to customers.

1. Outline of integration and reorganization

- i. Merger of TMAM and MTAM
- ii. Integration of the investment advisory and discretionary management operations of TMAM into The Mitsubishi Trust and Banking Corporation (MTBC)

2. Aim of integration and reorganization

Although the market for asset management services is forecast to grow, competition within the sector is expected to increase, and asset management companies need to strengthen their asset management capabilities and increase business efficiency. MTFG's decision to integrate and reorganize its asset management subsidiaries is aimed at creating a structure that can respond flexibly to such changes in the market environment.

By drawing on the strengths of MTBC and the newly merged asset management subsidiary, MTFG will construct a strong asset management capability and efficient business structure that can provide customers with higher quality value-added services.

3. Asset management services under the new structure

The existing asset management operations of MTBC are highly rated by customers, as evidenced by rankings such as its top market share of corporate pension assets. Under the planned integration and reorganization, MTBC's asset management infrastructure and resources, such as its research functions, will be utilized jointly throughout the Group to improve asset management capabilities and boost business efficiency.

Growth in the markets for publicly and privately offered investment trusts, variable annuities and defined contribution pension funds is expected, and in these and other areas MTFG aims to create a comprehensive product line up through which it can meet the broadest range of customer needs, while at the same time increasing customer service and convenience. This can be achieved by combining the corporate pension fund management experience of MTBC with the investment trust and investment advisory and discretionary management expertise of TMAM and MTAM.

Asset management services currently provided to customers by each company will continue after the planned integration and reorganization.

4. Schedule

Edgar Filing: MITSUBISHI TOKYO FINANCIAL GROUP INC - Form 6-K

It is planned to complete the merger of TMAM and MTAM, along with the integration of the investment advisory and discretionary management operations of TMAM into MTBC, by October 2004. A planning committee will be established to determine matters such as the name, ownership structure and management of the newly merged asset management subsidiary.

MTFG will pursue further synergies between the high quality products and services and the strong customer bases of The Bank of Tokyo-Mitsubishi, Ltd. (BTM) and MTBC. MTFG will also seek to further improve business efficiency and consolidate its position as a leading asset management Group.
