NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Petroleum & Resources Corporation (the Corporation) is registered under the Investment Company Act of 1940 as a non-diversified investment company. The Corporation's investment objectives as well as the nature and risk of its investment transactions are set forth in the Corporation's registration statement.

Security Valuation Investments in securities traded on national security exchanges are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options) are valued at amortized cost. Purchased and written options are valued at the last quoted asked price.

Security Transactions and Investment Income Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

2. FEDERAL INCOME TAXES

The Corporation's policy is to distribute all of its taxable income to its shareholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities, including options, at March 31, 2004 was \$386,337,274, and net unrealized appreciation aggregated \$193,235,271, of which the related gross unrealized appreciation and depreciation were \$208,618,221 and \$15,382,950, respectively.

Distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, annual reclassifications are made within the Corporation's capital accounts to reflect income and gains available for distribution under income tax regulations.

3. INVESTMENT TRANSACTIONS

The Corporation's investment decisions are made by a committee, and no one person is primarily responsible for making recommendations to that committee.

Purchases and sales of portfolio securities, other than options and short-term investments, during the three months ended March 31, 2004 were \$19,774,316 and \$15,433,964, respectively. Options may be written (sold) or purchased by the Corporation. The Corporation, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. The risk associated with purchasing an option is limited to the premium originally paid. A schedule of outstanding option contracts as of March 31, 2004 can be found on page 10.

The Corporation has an employee incentive stock option and stock appreciation rights plan which provides for the

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

issuance of options and stock appreciation rights for the purchase of up to 895,522 shares of the Corporation's Common Stock at 100% of the fair market value at date of grant. Options are exercisable beginning not less than one year after the date of grant and extend and vest over ten years from the date of grant. Stock appreciation rights are exercisable beginning not less than two years after the date of grant and extend over the period during which the option is exercisable. The stock appreciation rights allow the holders to surrender their rights to exercise their options and receive cash or shares in an amount equal to the difference between the option price and the fair market value of the Common Stock at the date of surrender.

Under the plan, the exercise price of the options and related stock appreciation rights is reduced by the per share amount of capital gain paid by the Corporation during subsequent years. At the beginning of 2004, there were 129,447 options outstanding at a weighted average exercise price of \$18.35 per share. During the three months ended March 31, 2004, the Corporation granted options including stock appreciation rights for 14,767 shares of Common Stock with an original exercise price of \$23.02. At March 31, 2004, there were 264,847 shares available for future option grants.

5. RETIREMENT PLANS

The Corporation's non-contributory qualified defined benefit pension plan covers substantially all full-time employees with at least one year of service. Benefits are based on length of service and compensation during the last five years of employment. The Corporation's policy is to contribute annually to the plan only those amounts that can be deducted for federal income tax purposes, plus additional amounts as the Corporation deems appropriate in order to provide assets sufficient to meet benefits to be paid to plan participants. As of March 31, 2004, no contributions to the plan have been made. The Corporation anticipates making a contribution to the plan in 2004. The amount of the contribution is contingent on the outcome of pending legislation and, therefore, cannot yet be determined.

In addition, the Corporation has a nonqualified defined benefit plan which provides eligible employees with retirement benefits to supplement the qualified plan.

The following table aggregates the components of the plans' net periodic pension cost for the three months ended March 31:
