Yes: No:

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-_____

Enclosures: Telefónica Móviles quarterly results. July-September 2004.

Increased commercial activity in the main markets of operation, amid strong and growing competitive pressure:

Net adds¹ reached almost 3MM customers in 3Q04, 74% higher than that obtained in 3Q03 and 9.2% higher than in 2Q04 figures².

Positive evolution of the contract segment, with a 47% increase in contract net adds in 3Q04 over 2Q04. Outstanding performance in Latin America, where contract net adds increased threefold over 2Q04.

Telefónica Móviles managed customer base rose to 58.8MM in September 2004 (+23% vs. 3Q03).

Including the customers of the Latin American operators of BellSouth³, the total managed customer base would be over 71.9MM.

Growing commercial efforts by Telefónica Móviles España, which maintains its leadership in the Spanish market despite intensified competition:

High level of commercial activity in the quarter, both in customer acquisition and retention, especially in high-value customers and in segments with high growth potential.

Net adds of nearly 270,000 lines in the contract segment (residential and corporate) in 3Q04.

Positive performance of usage metrics, both in voice traffic and data services.

Improvement in the year-over-year growth rate in service revenues over the previous quarter reaching 8.0% vs. 3Q03 and 9.3% in 9M04.

EBITDA margin of 52.9% in 9M04, maintaining a solid operating efficiency in spite of greater commercial efforts and growing competitive pressure.

Vivo maintains its leadership position in the Brazilian market, leading the acquisition of new customers in the country:

The Brazilian market continues its strong expansion, in a context of growing commercial aggressiveness by competitors.

Vivo reached 24.6MM customers, with an estimated market share of 53% in its areas of operation, in September 2004. Net adds in 3Q04 exceeded 1.1MM customers.

EBITDA margin performance was impacted by the high commercial activity and by increased competition. Excluding the effect of commercial activity, Vivo obtained an adjusted⁴ EBITDA margin of 61% in 9M04 (57.6% in 9M03).

Greater commercial activity at Telefónica Móviles México, which reached 4.5MM customers in September:

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

Improved market position after achieving net adds of 415 thousand customers in 3Q04 (+35% vs. 2Q04 and double the amount obtained in 3Q03).

Change of the trend in contract segment performance, with positive net adds in the quarter, as a result of the Company's new commercial offer.

Increase in GSM coverage up to a level of population which accounts for 74% of the national GDP.

In spite of strong commercial efforts, the Company's cost efficiency allowed for containment of EBITDA losses in the quarter.

¹ Net adds for all managed Companies.

² 2Q04 figures exclude the impact of the 1.3MM inactive prepaid SIM cards adjusted in Telefónica Móviles España's reported customer base as of April 2004.

³ Including 13.1MM subscribers for BellSouth's Latin American operators, at the end of August 2004, last month of 3Q04 for BellSouth.

⁴ EBITDA margin excluding commercial and advertising costs, over service revenues. For comparison purposes, 9M03 includes TCO from 1 January 2003.

Year-over-year growth of 12.8% in consolidated operating revenues, to 8,236.4MM in 9M04:

Excluding the impact of the incorporation of Telefónica Móviles Chile into the Group's consolidation perimeter, and assuming constant exchange rates, revenue growth would have reached 14.3% in 9M04.

Service revenues totalled 7,282MM in 9M04, with a year-over-year increase of 10.5%, and of 10.2% in 3Q04 vs. 3Q03, with an improvement in the rate of growth with respect to 2Q04.

Impact of greater commercial activity and of intense competition on consolidated EBITDA, which grew 4.7% vs. 9M03, to 3,528MM.

Excluding the incorporation of Telefónica Móviles Chile into the Group's consolidation perimeter, and assuming constant exchange rates, EBITDA growth would have been 4.6% in 9M04.

EBITDA margin for 9M04 stood at 42.8%, practically unchanged from 1H04, in spite of increased commercial activity and of the greater competitive pressure in most of our markets.

Reduction of 7.4% in consolidated net financial debt in the past 12 months, in spite of the impact of acquisitions carried out during the period.

Consolidated net income of 1,357MM in 9M04, with a year-over-year increase of 7.9%.

Excluding extraordinary items, net income would have totalled 1,379 MM, with a 10.2% increase vs. 9M03.

Telefónica Móviles' priority remains to preserve its leadership position in Spain, encompassed with a best in class operating efficiency, which will allow it to continue being a reference in Europe. At the same time, the Company will seek to capture the strong growth opportunities of the different Latin American markets.

This implies higher commercial efforts, both in customer acquisition and retention initiatives, which has led the Company to review its outlook for full-year 2004. Assuming constant exchange rates and excluding changes in the consolidation perimeter with respect to December, 2003, that is, excluding the impact of the consolidation of Telefónica Móvil Chile from 1 August 2004 and of the Latin American assets purchased from BellSouth in 4Q04:

The Company estimates that growth in consolidated operating revenue in 2004 will be around 12%-13%.

The Company estimates that year on year growth of consolidated EBITDA in 2004 will be around 3%.

Consolidated capex is expected to be slightly above 1,500MM, compared to the 1,600MM initially foreseen.

As regards comparative information and changes in the consolidated Group, we would highlight the following:

Tele Centro Oeste Celular Participações, S.A. (TCO) has been integrated within Telefónica Móviles consolidation perimeter since 1 May 2003, so it only impacted results for five months during 9M03, compared to nine months during 2004.

In October 2003, TCP increased its shareholding in TCO to 86.58% of ordinary shares which represents 28.87% of total share capital (not including treasury stock).

The sale of 100% of Telefónica Mobile Solutions to TS Telefónica Sistemas SA, a company belonging to Telefónica Group, took place in June 2003, with effect from 31 March 2003. Since that date, it is not integrated within Telefónica Móviles consolidation perimeter.

In July 2003 Medi Telecom carried out a capital increase, as a result of which Telefónica Móviles increased its stake to 32.18%.

In December, 2003, Telefónica Móviles sold its Austrian subsidiary, 3G Mobile Telecommunications GmbH, to the mobile operator Mobilkom Austria. As of that date, this subsidiary no longer forms part of the consolidation perimeter of the Group.

In Brazil, in March 2004, the tax credits used by Tele Leste, TCO, CRT and Tele Sudeste as a result of the existing goodwill in those companies were capitalized. This capitalization has not resulted in any cash outflow for Brasilcel, but has led to an increase in the shareholdings in these companies.

In June 2004 the company acquired an additional 13.95% in Mobipay Internacional, and now holds a 50% stake in the company. The percentage increase prompted a change in how Mobipay Internacional is consolidated, from the equity method to the proportional method.

At the end of June 2004 Brasilcel acquired from NTT DoCoMo and Itochu Corporation a total 10.5% of the share capital of Sudestelcel Participações, the holding company controlling a stake in Tele Sudeste Celular Participações. Through this operation, Brasilcel now controls 100% of Sudestelcel Participações.

The acquisition of 100% of the shares of Telefónica Móvil Chile, the mobile telephone operator in Chile, to Telefónica CTC (company belonging to Telefónica Group) took place on July 23rd 2004. Since that date, Telefónica Móvil Chile is integrated within Telefónica Móviles consolidation perimeter through the full consolidation method. The total amount paid for the acquisition stands at 1,089MM.

For an easier understanding of Telefónica Móviles' financial statements, the economic stakes held by the Company in each of its subsidiaries, along with the consolidation method used in its consolidated financial statements in each period, are provided.

¹ Free Cash Flow = EBIT (1 - t) + Amortization - Capex - Capitalized opex

² Free Cash Flow per share

During the third quarter of 2004 the Group's operators made a strong commercial effort in their markets, in a context of sustained and even intensified competitive pressure from the other players, compared with the previous quarter.

The high level of commercial activity has translated into managed net adds of almost 3MM customers in 3Q04, an increase of 74% vs. 3Q03 and 9.2% vs. 2Q04⁵. We would point out the strong increase in net adds in the contract segment, which grew 47% in 3Q04 vs. 2Q04, and especially in Latin America (where they tripled from 2Q04).

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

The Group has increased its managed customer base by close to 7MM since the start of the year to 58.8MM customers at the end of September (+23% vs. 9M03). Of this total, 37.5MM correspond to the Latin American operators and 18.7MM to TME.

Including the customers from BellSouth's Latin American operators whose acquisition was agreed in March, Telefónica Móviles would have over 71.9MM managed customers, 50.6MM of which correspond to Latin America.

Key aspects of the 9M04 results are as follows:

⁵ 2Q04 figures exclude the impact of the 1.3MM inactive prepaid SIM cards adjusted in Telefónica Móviles España's reported customer base as of April 2004.

⁶ Including 13.1MM subscribers for BellSouth's Latin American operators, at the end of August 2004, last month of 3Q04 for BellSouth.

Year-over-year growth of 12.8% in operating revenues to 8,236.4MM in 9M04. The incorporation of Telefónica Móvil Chile into the Group's consolidation perimeter contributed 0.9 p.p. to revenue growth in 9M04, while exchange rate fluctuations led to a 2.4 p.p. decline in the growth of operating revenues in 9M04.

By components, service revenues totalled 7,282MM in 9M04, a year-over-year increase of 10.5% and of 10.2% in 3Q04 vs. 3Q03, with improved growth rates in 3Q04 vs. 2Q04. Handset sales (954MM in 9M04) registered year-over-year growth of 34%.

By companies, TME obtained operating revenues of 6,043MM in 9M04 (+10.5% vs. 9M03).

Consolidated Latin American operators contributed 2,195MM of operating revenues in 9M04, with growth in euro terms of 20.0%. Excluding the impact of Telefónica Móviles Chile's incorporation into the Group's consolidation perimeter and of exchange rates fluctuations, these revenues would have shown growth of 26.1% vs. 9M03.

Greater commercial activity and increased competitive pressure impacted consolidated EBITDA, which grew 4.7% vs. 9M03 to 3,528MM. The incorporation of Telefónica Móviles Chile into the Group's consolidation perimeter contributed 0.5 p.p. to EBITDA growth in 9M04, while exchange rate fluctuations led to an 0.3 p.p. decline in the growth of EBITDA in 9M04.

The EBITDA margin was 42.8% in 9M04, virtually unchanged compared with 1H04, despite the increase in commercial activity and greater commercial efforts in most markets, which translated into an increase in per unit commercial costs in the main markets.

In Spain, TME's EBITDA reached 3,196MM in 9M04 (+7.7% vs. 9M03), leaving an EBITDA margin of 52.9%.

EBITDA for the Group's consolidated Latin American subsidiaries, in euros, fell by 16.6% vs. 9M03, affected by the commercial efforts made to lead growth in the markets in which the Group is present. Nonetheless, we would highlight a slight containment of the erosion in EBITDA margins vs. previous quarters, despite the increased commercial activity, especially in Mexico.

Assuming constant exchange rates and excluding Telefónica Móvil Chile's contribution to the consolidated results in 9M04, these companies EBITDA would have declined 17.5% vs. 9M03.

As regards the rest of the main items, we would highlight the following:

Improvement in income from associated companies, as net losses from companies consolidated by the equity method declined by 47% (- 30MM vs. - 57MM in 9M03). Losses attributable to the Group through its stake in Médi Telecom showed a year-over-year decrease of 60% whilst losses attributable to IPSE 2000 decreased by more than 30% compared with 9M03.

The 9.3% year-over-year decrease in negative net financial results vs. 9M03 was due mostly to lower net financial expenses derived from the decrease in average net debt.

Consolidated net financial debt at the end of September 2004 stood at 5,270MM, posting a decrease of 7.4% in the last 12 months. The increase vs. 2Q04 (+8.5%) is due to the impact of the acquisition of Telefónica Móvil Chile at the end of July.

Proportionate net financial debt at the end of September 2004 stood at 5,972MM (-7.5% vs. September 2003).

The 20% decrease in goodwill amortization vs. 9M03, due primarily to the allocation in 4Q03 of part of the goodwill at Telefónica Móviles México as higher value of the

operator's license. Also, in 2Q04, and after finalising the analysis of TCO's assets & liabilities, part of the goodwill arising from the TCO acquisition was recorded as an increase in the value of the company's assets, mostly licenses and telephone installations. 3Q04 includes two months of amortization of the goodwill arising from the acquisition of Telefónica Móvil Chile.

Net extraordinary losses of 23MM vs. 6MM of extraordinary profits in 9M03.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

Consolidated net income totalled 1,357MM in 9M04 with a year-on-year increase of 7.9%. Excluding extraordinary items, net income would have been 1,379MM (+10.2% over 9M03).

In 9M04, consolidated capex amounted to 1,029MM, a 59% year-over-year increase, due to higher investments in the main markets (the rollout of TME's UMTS network and GSM networks in Argentina and Mexico, as well as the increase in capacity in Brazil) and the impact of the incorporation of Telefónica Móvil Chile. Capex committed at the end of September was 1,437MM.

Consolidated free cash flow generation⁷ in 9M04 was 1,646MM, a decrease of 14.2% vs. the same period of 2003 due to higher capex this year.

⁷ Consolidated Free Cash Flow = EBIT (1-t) + Depreciation - Capex - Capitalized Opex.

2004 July-September

6

OUTLOOK FOR 2004 IN THE CURRENT OPERATING ENVIRONMENT

In the increasingly mature Spanish market, there have been since the beginning of the year significant changes in the competitive environment, with strong commercial pressure from competitors, both in number portability and in prices. This has prompted the Company to increase customer loyalty actions and traffic promotions and has led to strong pressure on prices in the corporate segment.

On the other hand, the commercial performance observed during the first nine months of the year and at the start of the fourth quarter shows a strong dynamism in the major Latin American markets. This is driven by increased competition derived from more aggressive commercial policies by existing operators and the entry, in some countries or regions, of new players and by the macroeconomic stability in the region, which has translated into significant year-on-year growth in the total number of wireless users. This growth, which in most cases has surpassed the most optimistic forecasts, has prompted an upward revision of the growth potential of these markets, both by the Company and by third parties (regulators, investments banks, etc).

In this context, **Telefónica Móviles** priority remains to preserve its leadership position in Spain, encompassed with a best in class operating efficiency, which will allow it to continue being a reference in Europe. At the same time, the Company will seek to capture the strong growth opportunities in the different Latin American markets.

All this translates into greater commercial efforts, both in customer acquisition and retention initiatives, with an impact on both commercial expenses and operating revenues (greater traffic promotions and loyalty points, accounted as for lower revenues). This has led the Company to review its outlook for full-year 2004.

REVENUES

The Company estimates that growth in consolidated operating revenues in 2004 will be around 12%-13%⁸.

In Spain, considering the factors already mentioned, along with lower growth in the active customer base, the higher number of gross adds without handsets and the impact of the 12% reduction in mobile termination rates recently approved by the regulator to take effect from 1 November **growth rate in both operating and service revenues is expected to exceed 8% in 2004.**

EBITDA

The Company estimates the year over year growth of consolidated EBITDA in 2004 will be around 3%⁸.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

In Spain, in spite of greater commercial costs over 2003, **Telefónica Móviles España reiterates its target of maintaining an EBITDA margin of over 50% for full-year 2004**, which will allow it to continue being a reference in Europe.

In Brazil, the stronger growth of the total market and the increasing aggressiveness of competitors, compared to the Company's initial expectations, have prompted Vivo to increase its commercial objectives for 2004. **In this scenario, the Company expects to reach an EBITDA margin for full-year 2004, after management fees, of 30%-35%. In spite of the downward revision of margins for the short term, the Company reiterates its goal of achieving EBITDA margins of above 40% in the medium term, once the pace of market growth starts to ease from maximum levels.**

In Argentina, higher economic growth and the launch of the GSM network are allowing a significant expansion of the customer base. This leads the Company to expect strong commercial activity in the coming months, which logically should have a significant impact on margins for the full year. Therefore, **the Company does not expect any significant contribution from its operations in Argentina to Group EBITDA in 2004.**

⁸ Assuming constant exchange rates and excluding changes in the consolidation perimeter with respect to December, 2003. Excludes the impact of consolidation of Telefónica Móvil Chile from 1 August 2004 and the assets acquired from BellSouth in Latin America in the fourth quarter of the year.

CAPEX

The Group estimates consolidated capex⁹ of just over 1,500 million for full-year 2004, vs. its initial forecast of 1,600 million.

Of the total, about 650MM will correspond to Telefónica Móviles España. In Mexico, the Company expects to invest slightly above 400MM in 2004 to continue expanding its GSM network across the country. In Brazil, capex corresponding to 50% of Vivo will stand at about 250MM, driven by the strong growth in the customer base. In Argentina, capex forecast by TCP Unifón for 2004 stands at 130MM and will be used to roll out the new GSM network.

⁹ Excludes the impact of consolidation of Telefónica Móvil Chile from 1 August 2004 and the assets acquired from BellSouth in Latin America in the fourth quarter of the year.

The following significant events took place during the last few months:

In October, Telefónica Móviles has closed the acquisition of BellSouth's operators in Colombia, Ecuador, Guatemala, Nicaragua, Panama, Peru, Uruguay and Venezuela.

The company expects to acquire the rest of the operators (in Argentina and Chile) over the course of 2004, once it obtains the required authorisations from the regulators.

The voluntary cash tender offers launched by Brasilcel and its subsidiary Telesp Celular Participações (TCP), for part of the outstanding shares of some of its subsidiaries concluded in mid-October. As a result of the offers, Brasilcel's stake in its subsidiaries has increased to the following percentages:

Brasilcel's stakes in:	ON	PN	Total
TSD	91.7%	90.3%	90.9%
TBE	68.7%	40.9%	50.6%
CRT	91.0%	49.7%	67.0%
TCP's stakes in:	ON	PN	Total
TCO	86.2%	32.8%	50.6%

In aggregate, the cash tender offers represented a total expenditure of approximately R\$607MM for Brasilcel and approximately R\$902MM for TCP.

Additionally, TCP's Board of Directors approved a capital increase of approximately R\$2,054MM. The use of proceeds of the rights issue will be to (i) repay a bridge loan related to the tender offer for a portion shares of TCO and (ii) to repay other short-term debt. The capital increase will improve TCP's capital structure, providing it with financial flexibility to carry out its capex program.

Business performance by geographic region

Spain

Leadership in the Spanish market maintained, in spite of intensified competition.

High commercial activity during the quarter, both in customer acquisition and retention, mainly in high-value customers and segments with high growth potential.

Positive performance of usage metrics, both in voice traffic and data services.

Improvement in service revenues year-over-year growth rate vs. 2Q04.

Solid operating efficiency in spite of greater commercial efforts and intensified competitive pressure.

Market conditions during the third quarter of 2004 were the same as those observed in the first half of the year, with growing commercial pressure from competitors, mainly focused on number portability actions and on more aggressive pricing in the corporate segment.

In the current market environment, TME's commercial strategy has continued to focus primarily on high-value segments and certain niches with strong growth potential, for which several new commercial initiatives have been launched during the quarter.

TME ended September with a total customer base of 18.7MM, after reaching 58 thousand net adds in 3Q04. This figure was driven by nearly 270,000 net adds in the contract segment (residential and corporate), which was partly offset by the loss of customers in the prepaid segment partly explained by number portability actions. The weight of the contract segment over the total customer base now stands at 47.5%, 8.2 p.p. higher than at the end of September 2003. Such performance is boosted by ongoing prepaid to contract migrations, with levels over 200,000 migrations per quarter and approximately 780,000 in the

Business performance by geographic region

year to date, similar to the figure registered in 9M03.

Meanwhile, in line with the Company's customer loyalty strategy, handset upgrades reached close to 2.7MM in the first nine months of the year, which reflects the healthy handset upgrade pace achieved through ongoing initiatives.

Taking into account all its commercial initiatives (gross additions, migrations and handset upgrades), commercial activity in 9M04 grew 7% vs. 9M03.

In recent months the Company has launched several initiatives aimed at increasing traffic on TME's networks, among which we would highlight the specific summer promotion *Mis Favoritos* (where a 3 subscription fee entitled any TME customer to choose two telephone numbers with whom to speak and send SMS and MMS for just 0.01/min.). The Company has also launched the *Número Internacional Activa* initiative to meet the communication needs of the growing number of foreign residents in Spain. Finally, the *Sub-26* rate was launched, offering very attractive terms for customers under the age of 26.

Thanks to these initiatives and the overall increase in customer usage, traffic carried on TME's networks increased by 12% in 3Q04 vs. 3Q03 and 5% over 2Q04, with an accumulated increase of 14% in 9M04.

MOU for 9M04 was 128 minutes (138 in 3Q04).

Regarding data services, customer usage continues to increase: more than 2.8MM customers used web browsing with GPRS technology in September, more than 800 thousand customers carried multimedia messages (MMS) and half a million used its i-mode service.

Also of note is the Ring-Back Tones service, launched during the second quarter as a pioneer service in Spain, under the commercial name *Ya Voy*, which at the end of September already had close to 700 thousand users, who pay a monthly fee to maintain the service.

New data and content services launched recently include a new Single European Data Tariff for Internet, Intranet and WAP traffic via GPRS within the SET (Single European Tariff) zone, which comprises most western European countries, and also allows for a single voice tariff for TME customers using Roaming services.

It is also worth highlighting the launch of other new services in Spain, such as *SMS Sorpresa* and multimedia soccer services (videos and photos of goals, live scores from the Spanish league, etc.). TME has also launched pioneering telesurveillance and remote control services allowing users to watch on their handset online images captured with a webcam. Also worth noting is the collaboration between TME and ONCE, the Spanish National Organization for the Blind, to launch a lottery service based on GPRS handsets, a service already available nationwide with more than 6,000 GPRS mobile handsets managed through TME's network.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

All these factors have led to a healthy growth in data revenues to 721MM in 9M04 (+15% vs. 9M03). Data ARPU totalled 4.2 in 9M04.

ARPU performed positively, reaching 32.4 in 9M04 and 35.0 in 3Q04.

Highlights of TME's financial results in the period are as follows:

Operating revenues rose 7.1% year-over-year in 3Q04 to 2,139MM, with a 10.5% increase in 9M04 vs. 9M03.

By components, service revenues (1,953MM in 3Q04) showed a slight improvement in its year-over-year growth rate, with a 8.0% increase vs. 3Q03 (+7.1% in 2Q04 vs. 2Q03). Total service revenues for 9M04 stood at 5,433MM, 9.3% higher than in 9M03.

Handset sale revenues stood at 186MM in 3Q04, slightly below 3Q03, but were up 23% year-over-year in 9M04.

Due to the stronger commercial activity in the market and the TME's greater focus on subscriber acquisition and retention initiatives, the weight of subscriber acquisition and retention costs over operating revenues stood at 8.3% in 3Q04 (+1.5 p.p. vs. 3Q03) and 8.2% in 9M04 (+1.3 p.p. vs. 9M03). This increased effort was primarily driven by the increasing weight of number portability initiatives, which bear a high commercial cost, and the efforts made in subscriber acquisition and retention activities this summer.

EBITDA in 3Q04 was 1,137MM, an increase of 4.2% vs. 3Q03. EBITDA in 9M04 was 3,196MM (+7.7% vs. 9M03).

The EBITDA margin was 53.2% in 3Q04 and 52.9% in 9M04 (-1.4 p.p. vs. 9M03), despite the Company's greater commercial activity.

2004 July-September

12

Business performance by geographic region

Once again this quarter, we note that since March 1st 2004, the fee for using the UMTS spectrum has no longer been capitalised, nor have the other expenses related to this technology. Additionally, UMTS-related expenses capitalised up to now have started being depreciated, with an 31MM impact on depreciation.

Capex in 9M04 totalled 439MM, driven by the rollout of the UMTS network which accounted for nearly one third of total capex in 9M04.

Morocco

Increased commercial activity in 3Q04.

Sustained growth in operating results.

Médi Telecom ended September with 2.572MM customers, an increase of 38% year-over-year and 20% vs. 2Q04

3Q04 featured stronger commercial activity as a result of the launch of new packs and the summer campaigns. Net adds in the quarter amounted to 424 thousand customers, 4 times higher than in 2Q04 and 3Q03.

As for financial results, revenues and EBITDA continued to advance, driven by customer and traffic growth. In 9M04 operating revenues, in euro terms, grew 23% year-over-year to 248MM (100MM in 3Q04). EBITDA in 9M04 was 103MM, 51% higher than in 9M03 (38MM in 3Q04, once again marking an improvement on the previous quarter).

3Q04 EBITDA margin is affected by the high level of commercial activity in the quarter, standing at 38% (41.5% in 9M04).

Thanks to this performance and the capex containment, operating cash flow reached 66MM in 9M04, double the total for all of 2003.

2004 July-September

14

Business performance by geographic region

In spite of the seasonality of the period following the strong commercial campaigns for Mothers' Day and Valentine's Day in 2Q04, the Brazilian cellular market continued to post strong growth rates for another quarter.

Wireless penetration rate reached over 33% at the end of September, compared to 30% in June (with 35% penetration in Vivo's areas of operation).

In a context of a rapidly expanding market, with increased commercial efforts by all operators, Vivo maintains its leadership positioning, ending September 2004 with a total customer base of 24.6MM (+33% compared with September 2003 and 5% compared with June 2004). Net adds in the quarter stood at more than 1.1MM customers, driven by the Father's Day campaign in August (although below the 1.6MM in 2Q04 due to the aforementioned seasonality of 3Q, and compared with 0.95MM in 3Q03).

At the end of 3Q04 Vivo's estimated average market share was 42% for Brazil as a whole and 53% in its areas of operation.

As for customer usage, blended MOU in 3Q04 was 87 minutes, while blended ARPU was 32 reais.

MOU and ARPU's year-over-year performance was shaped by the sharp growth in the total customer base -mostly in the prepaid segment- increased traffic promotions and the impact on incoming traffic of the blocking of fixed-to-mobile calls by fixed line operators. Prepaid customers accounted for 80% of total customers at the end of September 2004, vs. 74% in 3Q03. Comparison with 2Q04 is also affected by the higher weight of the prepaid segment in the customer base.

Regarding Vivo's financial results, accumulated operating revenues in 9M04 showed a 21% year-over-year increase in local currency, driven by higher service revenues and the growth of the customer base. Excluding TCO's contribution during the first 4 months of 2004, operating revenues would have grown 11.5% vs. 9M03 in local currency. The impact of the competitive environment on the growth of revenues, with a higher volume of traffic promotions in 2004, must be taken into account, as well as the impact of the migration to SMP from July 2003.

EBITDA year-over-year growth in 9M04 stood at 8.7% in local currency. Excluding TCO's contribution during the first 4 months of 2004, EBITDA would have decreased 1.6% in local currency, on the back of greater commercial activity vs. 9M03 and a tougher competitive environment.

As a result, the EBITDA margin after management fees was 31.9% in 3Q04 and 34.4% in 9M04. The almost stable margin in 3Q04 vs. 2Q04, despite lower net adds, is due to the increase in per unit subscriber acquisition costs deriving from tougher competition.

Excluding the impact of higher commercial costs, the performance of adjusted¹² margin (60.7% in 9M04 vs. 57.6% in 9M03) reflects the improvement in operating efficiency and the economies of scale from the integration of the different operators under the single Vivo umbrella.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

Finally, total capex in 9M04 stood at 169MM, driven by investments to boost the capacity of the operators' networks in order to meet the growth of the customer base and by the further rollout of Vivo's 1XRTT networks.

¹² EBITDA margin excluding commercial and advertising costs, over service revenues. For comparison purposes 9M03 includes TCO from 1 January 2003

2004 July-September

15

Business performance by geographic region

Mexico

Improved competitive positioning, with more than 415 thousand net adds in the quarter.

Change in trend in the contract segment, with growth in the customer base vs. 2Q04.

Containment of EBITDA losses, despite strong commercial activity and tougher competition in the market.

Rollout of the GSM network continues, up to a level of population coverage of 74% of the national GDP.

T. Móviles México

	January - September		%	% change	July - September		%
	2004	2003			Change	in local currency	
Financial Data							
Operating revenues	456.8	380.8	20.0%	38.2%	155.4	114.7	35.4%
EBITDA	-101.0	-50.4	100.2%	130.6%	-22.1	-33.8	-34.7%
EBITDA Margin	-22.1%	-13.2%	-8.9 p.p	-8.9 p.p	-14.2%	-29.4%	15.2 p.p

As a result of Telefónica Móviles México (TMM) s efforts to extend its distribution network and improve its efficiency, and to expand the coverage of its GSM network, the Company continued to make progress in capturing new customers. In 3Q04 net adds reached 415 thousand, a sharp increase vs. 2Q04 (+35%) and more than double net adds in 3Q03.

TMM s total customer base at the end of September was close to 4.5MM, with growth accelerating compared with previous quarters (+8% in 2Q04 vs. 1Q04 and +10% in 3Q04 vs. 2Q04).

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

Note also the positive results in the contract segment, with a clear change in trend. This is the first quarter with positive net adds (an increase of 20% in the customer base vs. 2Q04), driven by the good acceptance of the new commercial offers for the residential and corporate segments.

As for traffic, MOU in 3Q04 was 60 minutes (-2.2% vs. 2Q04) and ARPU was 172 Mexican pesos (stable from 2Q04).

Regarding financial results, we would highlight the positive performance of operating revenues in local currency in 3Q04 vs. 2Q04 (+5.6%) boosted by the improvement in service revenues, which were up 8.4% over 2Q04, driven by the growth of the customer base.

Despite the more intense commercial activity vs. 2Q04, EBITDA losses were 22MM in 3Q04, a 30% decline vs. 2Q04 thanks to the Company's cost control policies. In 9M04, TMM posted an EBITDA loss of 101MM.

Total capex in the first nine months of 2004 was 287MM. TMM's GSM network now reaches 189 cities, a level of population that represents 74% of the national GDP.

Meanwhile, at the beginning of October TMM sought authorisation from the Mexican telecommunications authorities (COFETEL) to bid for the new PCS frequencies.

2004 July-September

16

Business performance by geographic region

Argentina

Sharp increase in net adds, driven by the good reception of the GSM offer and by the contract segment.

Improved MOU and ARPU despite the strong increase in the customer base.

EBITDA Margin	8.2%	29.8%	-21.7 p.p	-21.7 p.p	-1.9%	27.9%	-29.8 p.p

The Argentine cellular market continued to show rapid growth in 3Q04, driven by increased commercial activity from all operators and the rollout of GSM networks. The estimated penetration rate at the end of 3Q04 was 29%, compared with 25% in June 2004 and 19% in 3Q03.

In line with the Company's strategy to improve its competitive positioning and as a result of the increase in the number of points of sale, the marketing campaigns directed to capturing the growth in the market and the rollout of GSM in new cities, Unifón recorded net adds of 417 thousand customers in 3Q04, double the figure obtained in 2Q04 and five times higher than in 3Q03.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

At the end of September 2004, Unifón's customer base stood at 2.6MM, a year-over-year increase of 54% and 19% more than in 2Q04. Growth was driven by GSM customers, which accounted for 17% of the total customer base at the end of 3Q04. We would also highlight the advance in the contract segment, which accounted for more than 36% of Unifón's customer base at the end of September (31% in 3Q03).

Continuing with the trend seen in previous quarters, and underpinned by campaigns aimed at boosting the usage of voice and data services, customer usage ratios are improving despite the significant growth in the customer base. MOU increased by 28% vs. 3Q03, fuelled by growth in both incoming and outgoing traffic, leading ARPU to increase by 19% vs. 3Q03 and 8% vs. 2Q04 to 45 Argentinean pesos.

In terms of financial results, in 9M04 Unifón recorded a 54.3% year-over-year increase in operating revenues, in pesos, driven by growth in its customer base, higher traffic and the increase in handset sales.

The higher commercial activity, the increased competitive pressure and those costs associated with GSM, have led the company post an EBITDA loss in 3Q04. EBITDA in local currency in 9M04 was 58% lower than in 9M03 and EBITDA margin was 8.2% in 9M04 (29.8% in 9M03).

As for capex, the company has continued the roll out of its GSM network in 3Q04, which now reaches a population coverage of 80% of the national GDP. Total capex through September was 71MM.

2004 July-September

17

Business performance by geographic region

Peru

Acceleration in customer acquisition, leading the market growth.

Sharp growth in outgoing and on-net traffic.

EBITDA margin improved in 3Q04 despite stronger commercial activity.

EBITDA	48.2	66.1	-27.2%	-22.9%	17.5	21.7	-19.3%	
EBITDA Margin	26.2%	36.2%	-10.0 p.p	-10.0 p.p	26.7%	35.4%	-8.7 p.p	

TM Perú continued to lead the strong growth of the Peruvian cellular market in 3Q04, with net adds of 171 thousand customers (+6% vs. 2Q04 and 2.7x higher than in 3Q03).

The strong rate of commercial activity has continued in the quarter, with an acceleration in the growth of the customer base both in the contract (+15% vs. 3Q03) and the prepaid segment (+52% vs. 3Q03). TM Perú ended September 2004 with 1.97MM customers, with year-over-year growth of 43.8%.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

As regards financial results, TM Perú's operating revenues in local currency grew 6.5% in 9M04 vs. 9M03, driven by the increase in the customer base and growth in outgoing and on-net traffic. These were partly offset by the lower interconnection revenues due to the decline in traffic from fixed networks and the reduction of fixed to mobile tariffs.

It is worth noting that despite the more intense commercial activity in 3Q04, the EBITDA margin for the quarter stood at 26.7%, higher than the margin registered in previous quarters thanks to cost control policies.

As a result of the intense commercial activity, operating expenses increased, leading to 22.9% decline in EBITDA vs. 9M03 in local currency. EBITDA margin in 9M04 stood at 26.2% vs. 36.2% in 9M03.

2004 July-September

¹ TM Chile was incorporated to the consolidation perimeter in July 23rd. In 2003, Telefónica Móviles only managed the company.

² Figures since the incorporation of TM Chile to the consolidated Income Statement in August 2004.

The acquisition of 100% of Telefónica Móvil Chile, which was already managed by Telefónica Móviles, was completed on July 23rd.

In a context of a sharp growth in the Chilean market, the Company continued to lead customer acquisition in 3Q04, obtaining net adds of 263 thousand customers vs. 86 thousand in 3Q03 and 238 thousand in 2Q04. Once again, it is worth highlighting the steady increase in the GSM

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

customer base, which already accounts for 39% of the total customer base, with nearly 1.2MM customers.

As regards financial results, the increase in the customer base and in outgoing traffic drove revenue growth in local currency vs. 9M03, more than offsetting lower interconnection revenues due to the reduction in mobile interconnection tariffs. EBITDA growth was underpinned by the strong commercial activity compared with the previous year .

As for TM Chile 's contribution to Group results in 2004, which includes the months of August and September, it amounted to 63MM in operating revenues and 15.7MM in EBITDA, with an EBITDA margin of 24.8%.

The total customer base managed by Telefónica Móviles operators in Guatemala and El Salvador at the end of September 2004 stood at 632 thousand (298 thousand in Guatemala and 335 thousand in El Salvador), a year-over-year increase of 70.5%.

The acceleration in customer acquisition has continued in both countries in 3Q04, with combined net adds of 101 thousand customers in the quarter, (71 thousand in 2Q04 and 12 thousand in 3Q03) driven by the prepaid segment.

Regarding financial results, 9M04 total operating revenues for both companies grew by 19.6% in constant euros as a result of the larger customer base. The EBITDA margin is impacted by the increased commercial activity, resulting in a 13.9% reduction in constant euros in 9M04 EBITDA.

Puerto Rico

Intense commercial activity by all market players continues.

MoviStar Puerto Rico ended 3Q04 with close to 158 thousand customers, after achieving positive net adds of 3 thousand customers for the first time this year. Once again, the evolution of the customer base in the quarter reflected the strong competition in the market.

Once Telefónica Móviles' s management contract has been cancelled, the Company' s board of directors, controlled by Clearcomm, will shortly present a business plan for the operator. On the basis of this information, the value of Telefónica Móviles' investment will be reviewed.

Telefónica Móviles' s current exposure for its operations in Puerto Rico includes: i) 50.3MM corresponding to convertible notes (principal and interests); ii) 49.9MM corresponding to a counter guarantee¹³ for a bridge loan granted by ABN AMRO; and iii) 9.2MM in notes used to repay a portion of the FCC debt. In total, the Company' s exposure stands at approximately 109.4MM.

On the other hand, Telefónica Móviles has recorded in its income statement revenues of 4.9MM corresponding to management fees and technology transfer.

¹³ Off-balance sheet commitment.

Glossary

ARPU (Average Revenue per User): Average monthly revenue per customer. This includes revenues from fees, monthly subscriber fees, traffic without discounting traffic promotions, outgoing roaming and interconnection fees. It excludes handset sales and revenues from incoming roaming. Loyalty programs are not considered as lower revenues in the ARPU calculation

The ARPU figures appearing in this report refer to average ARPU for the quarter.

The average quarterly customer base is calculated as the average of the average customers bases of the three months in the quarter.

For the Brazilian operators, ARPU is calculated as service revenues (operating revenues less handset sales) divided by average customer base.

MOU (Minutes of Usage): Average airtime minutes per customer per month. Airtime minutes include outgoing traffic (mobile to fixed, on-net mobile and mobile to other mobile operators) and incoming traffic (fixed to mobile and other mobile operators to mobile).

Churn: Disconnection rate. This is calculated as the number of disconnections during the period among the average customer base for the period.

Commercial actions: Includes gross additions, migrations and handset changes.

Active MMS user: Any user who has sent or received an MMS in the last month, other than those who only receive promotional MMS messages.

Active I-mode user: Any user who has accessed i-mode content in the last month during an internet browsing session.

Consolidated net financial debt: Includes the financial debt of all the companies consolidated by the proportional and full consolidation method.

Net financial debt is defined as: Long-term debt + Short-term financial debt, including current maturities less Short-term investments less Cash and banks.

Edgar Filing: TELEFONICA MOBILE INC - Form 6-K

Proportionate net financial debt: Includes the net financial debt of the companies in which Telefónica Móviles Group has an economic stake and a significant influence in the management, weighted in each case by the economic ownership.
