KNIGHT TRADING GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31, 2005

(Unaudited)

1. Organization and Description of the Business

Knight Trading Group, Inc. and its subsidiaries (the Company) have two operating business segments, Asset Management and Equity Markets, and a Corporate segment. The Company s operating business segments from continuing operations comprise the following operating subsidiaries:

Asset Management

Deephaven Capital Management LLC (Deephaven) is the investment manager and sponsor of the Deephaven investment funds (the Deephaven Funds). Deephaven also has a U.K. registered investment advisor subsidiary, which is regulated by the Financial Services Authority (FSA) in the U.K.

Equity Markets

Knight Equity Markets, L.P. (KEM) operates as a market maker in over-the-counter (OTC) equity securities, primarily those traded in the Nasdaq stock market and on the OTC Bulletin Board (OTCBB). Additionally, in December 2003, KEM acquired the business of Donaldson & Co., Incorporated (Donaldson), a firm that offers soft dollar and commission recapture services. KEM is a broker-dealer registered with the Securities and Exchange Commission (SEC) and is a member of the National Association of Securities Dealers (NASD), the National Stock Exchange and the Pacific Stock Exchange.

Knight Capital Markets LLC (KCM) operates as a market maker in the Nasdaq Intermarkethe over-the-counter market for New York Stock Exchange (NYSE) and American Stock Exchange (AMEX) listed securities. KCM is a broker-dealer registered with the SEC and is a member of the NASD.

Knight Equity Markets International Limited (KEMIL) is a U.K. registered broker-dealer that provides execution services for European institutional and broker-dealer clients in U.S. and European equities. KEMIL is regulated by the FSA and is a member of the London Stock Exchange.

The Corporate segment includes all corporate overhead expenses and investment income earned on strategic investments and our corporate investment in the Deephaven Funds. Corporate overhead expenses primarily consist of compensation for certain senior executives and other individuals employed at the corporate holding company, legal and other professional expenses related to corporate matters, investor and public relations expenses and directors—and officers—insurance.

Discontinued Operations

The Company completed the sale of its Derivative Markets business to Citigroup Financial Products Inc. (Citigroup) for \$237 million in cash as of the close of business on December 9, 2004. In accordance with generally accepted accounting principles (GAAP), the results of the Derivative Markets segment, as well as the gain on the sale of this business, have been included within discontinued operations for all periods presented. The final purchase price was subject to adjustment based on the final determination of the book value of the Derivative Markets business at the time the deal closed. The final determination of the book value was completed during the first quarter of 2005. For a further discussion of the sale of the Company s Derivative Markets business and its associated accounting treatment, see Footnote 8 Discontinued Operations.

•	Significant	Accounting	Policies

Basis of consolidation and form of presentation

The accompanying unaudited consolidated financial statements include the accounts of the Company and its subsidiaries and, in the opinion of management, reflect all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results for the interim period. All significant intercompany transactions and balances within continuing operations have been eliminated. Certain footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to SEC rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. The nature of the Company s business is such that the results of an interim period are not necessarily indicative of the results for the full year. These unaudited consolidated financial statements should be read in conjunction with the financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2004 as filed with the SEC.

Certain prior period amounts have been reclassified to conform to the current period presentation.

Cash and cash equivalents

Cash and cash equivalents include money market accounts, which are payable on demand, or short-term investments with an original maturity of less than 30 days. The carrying amount of such cash equivalents approximates their fair value due to the short-term nature of these instruments.

Market making and sales activities

Securities owned and securities sold, not yet purchased, which primarily consist of listed and OTC equities, are carried at market value and are recorded on a trade date basis. Net trading revenue (trading gains, net of trading losses) and commissions (which includes commission equivalents earned on institutional client orders) and related expenses are also recorded on a trade date basis. As disclosed in the Company s Annual Report on Form 10-K, in 2004, the Company changed its classification of certain transaction-related regulatory fees. These fees are now included within Execution and clearance fees. In prior periods, these fees were netted within Net trading revenue. The transaction-related regulatory fees were \$4.7 million and \$8.4 million for the three months ended March 31, 2005 and 2004, respectively. As a result of this change, prior period amounts have been reclassified to conform to current period presentation.

Payments for order flow represent payments to broker-dealer clients for directing their order executions to the Company. Soft dollar and commission recapture expense represents payments to institutions in connection with soft dollar and commission recapture programs. The Company s clearing agreements call for payment or receipt of interest income, net of interest expense, for facilitating the settlement and financing of securities transactions.

Asset management fees

The Company earns asset management fees for sponsoring and managing the Deephaven Funds. Such fees are recorded monthly as earned and are calculated as a percentage of the Deephaven Funds monthly net assets, plus a percentage of a new high net asset value (the Incentive Allocation Fee), as defined, for any six month period ended June 30th or December 31st. A new high net asset value is generally defined as the amount by which the net asset value of the Deephaven Funds exceeds the greater of either the highest previous net asset value in the Deephaven Funds, or the net asset value at the time each investor made a purchase. The Incentive Allocation Fee may increase or decrease during the year based on the performance of the Deephaven Funds. If Deephaven s Market Neutral Fund, which contains the majority of assets under management, recognizes a loss in the second half of a calendar year, the Incentive Allocation Fee is recalculated on an annual rather than a semi-annual basis. As such, the Incentive Allocation Fee may be negative for certain periods, but not lower than zero on a year-to-date basis.

Table of Contents

Estimated fair value of financial instruments

The Company s securities owned and securities sold, not yet purchased are carried at market value, which is estimated using market quotations available from major securities exchanges, clearing brokers and dealers. Management estimates that the fair values of other financial instruments recognized on the Consolidated Statements of Financial Condition (including receivables, payables and accrued expenses) approximate their carrying values, as such financial instruments are short-term in nature, bear interest at current market rates or are subject to frequent repricing.

Accounting for derivatives

The Company s derivative financial instruments, primarily comprised of listed futures, are all held for trading purposes and are carried at market value.

Goodwill and intangible assets

The Company applies the provisions of Statement of Financial Accounting Standards (SFAS) No. 142 *Goodwill and Other Intangible Assets*, which requires that goodwill and intangible assets with an indefinite useful life no longer be amortized, but instead, be tested for impairment annually or when an event occurs or circumstances change that signify the existence of impairment. Other intangible assets are amortized over their useful lives.

Strategic investments

Strategic investments include equity ownership interests of less than 20% in financial services-related businesses and are accounted for under the equity method or at fair value. The equity method of accounting is used for investments in limited partnerships and limited liability corporations. Investments that are classified as available-for-sale, which include the Company s investments in Nasdaq and the International Securities Exchange (ISE), are reported at fair value with unrealized gains and losses excluded from earnings and reported, net of applicable taxes, in Accumulated other comprehensive income, net of tax within Stockholders Equity on the Consolidated Statements of Financial Condition. The fair value of investments for which a quoted market or dealer price is not available for the size of our investment, is based on management s estimate. Among the factors considered by management in determining the fair value of investments are the cost of the investment, terms and liquidity, developments since the acquisition of the investment, the sales price of recently issued securities, the financial condition and operating results of the issuer, earnings trends and consistency of operating cash flows, the long-term business potential of the issuer, the quoted market price of securities with similar quality and yield that are publicly traded, and other factors generally pertinent to the valuation of investments. The fair value of these investments is subject to a high degree of volatility and may be susceptible to significant fluctuations in the near term. The valuations of strategic investments are reviewed by management on an ongoing basis.

Treasury stock

The Company records its purchases of treasury stock at cost as a separate component of Stockholders equity. The Company obtains treasury stock through purchases in the open market or through privately negotiated transactions.

Foreign currencies

The functional currency of the Company s consolidated foreign subsidiaries is the U.S. dollar. Assets and liabilities in foreign currencies are translated into U.S. dollars using current exchange rates at the date of the Consolidated Statements of Financial Condition. Revenues and expenses are translated at average rates during the periods.

Depreciation, amortization and occupancy

Leasehold improvements are being amortized on a straight-line basis over the shorter of the life of the related office lease or the expected useful life of the assets. Writedown of fixed assets

Writedowns of fixed assets are recognized when it is determined that the fixed assets are no longer actively used and are determined to be impaired. In determining the impairment, an estimated fair value is obtained through research and inquiry of the market. Fixed assets are reviewed for impairment on a quarterly basis.

Lease loss accrual

It is the Company s policy to identify excess real estate capacity and where applicable, accrue for such future costs. In determining the accrual, a nominal cash flow analysis is performed for lease losses initiated prior to December 31, 2002, the effective date of SFAS No. 146 *Accounting* for Costs Associated with Exit or Disposal Activities (which requires the accrual of future costs to be made using a discounted cash flow analysis for lease losses initiated after such date), and costs related to the excess capacity are accrued.

Income taxes

The Company records deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when such differences are expected to reverse. Discontinued Operations

In accordance with SFAS No. 144, *Accounting for the Disposal of Long-Lived Assets*, the revenues and expenses associated with a separate business segment or reporting unit that has been disposed of through closure or sale are included within (Loss) income from discontinued operations, net of tax, on the Consolidated Statements of Operations for all periods presented.

Stock-based compensation

The Company applies Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25) and related interpretations in accounting for its stock options plans. As options are granted at the then market value, no compensation expense has been recognized for the fair values of the options granted to employees.

The final purchase price was subject to adjustment based on the final determination of the book value of the Derivative Markets business at the time the deal closed. The final determination of book value occurred in the first quarter of 2005, at which time the adjustment was recognized. The result of this adjustment and other expenses related to the sale resulted in a loss from discontinued operations, net of tax, of \$266,000 in the first quarter 2005.

The decision to sell the Derivative Markets business was based on a review of the overall options industry, the capital and risk required to maintain this business successfully and the business role in the Company's long-term strategy. In accordance with SFAS No. 144, *Accounting for the Disposal of Long-Lived Assets*, the results of the Derivative Markets segment, the revenues and expenses associated with these businesses as well as all costs associated with the sale transaction have been included in (Loss) income from discontinued operations, net of tax on the Consolidated Statements of Operations for all periods presented.

Pursuant to the terms of a simultaneously executed option agreement between the Company and the Deephaven managers, in the event of a change of control of the Company during the initial three-year employment term, the Deephaven managers would have the option (the Option) to obtain a 51% interest in Deephaven in exchange for the termination of their employment contracts and associated profit-sharing bonuses and other employee profit-sharing plans, which in the aggregate range from 42% to 50% of the pre-tax, pre-profit sharing profits of Deephaven during the term of the agreements, subject to meeting certain annual guaranteed amounts.
