Qualitative information related to the operating results:

With respect to the financial and economic environment for the first quarter ended June 30, 2005, slowdown of overseas economies continued due to measures taken to restrain the economy in the United States and China, and due to the sharp rise in crude oil prices. Similarly, in our country, export was sluggish due to the decline of foreign demand, which caused an adjustment in inventory mainly in the IT sector. As a result, the standstill of the Japanese economy continued.

Regarding the financial environment, in the EU, the European Central Bank's policy rate remained at 2%. In the United States, the target for the federal funds rate was raised from 2.75 % to 3.25 % between April and June 2005. In Japan, the Bank of Japan continued its current easy monetary policy and kept short-term interest rates at near zero percent. On the other hand, the yield on ten-year Japanese government bonds followed a downward trend as a certain degree of uncertainty prevailed over the Japanese economy. In the foreign exchange markets, the yen depreciated against the US dollar as expectations rose over the rise of interest rates in the United States.

Amidst this environment, for the three months ended June 30, 2005, MTFG's ordinary income was 635.5 billion yen, an increase of 9.3% compared to the first quarter ended June 30 2004, ordinary profit was 150.4 billion yen, an increase of 44.4% compared to the first quarter ended June 30 2004, and net income was 96.9 billion yen, an increase of 18.1% compared to the first quarter ended June 30 2004.

The increase in total assets mainly reflected the increase in loans and bills discounted and an increase in investment securities. Loans and bills discounted increased by 391.0 billion yen, from 46,446.6 billion yen at March 31, 2005 to 46,837.7 billion yen at June 30, 2005, due to the increase in loans and bills discounted by overseas branches, overseas subsidiaries and due to the increase in domestic housing loans.
