PROSPECTUS

**17,250,000 Shares**

# **ING Global Advantage and Premium Opportunity Fund**

**Common Shares**

**\$20.00 per Share**

---

ING Global Advantage and Premium Opportunity Fund (the Fund) is a newly organized, diversified, closed-end management investment company. The Fund's primary investment objective is to provide a high level of income. Capital appreciation is the Fund's secondary investment objective. The Fund seeks to achieve its investment objectives by investing in a portfolio of global common stocks and utilizing an integrated options writing strategy. Under normal market conditions, the Fund will invest at least 80% of its managed assets, as defined on page 9 of this prospectus, in a portfolio of common stocks of companies located in a number of different countries throughout the world, including the United States. The Fund will also seek to generate gains from option premiums by selling call options on selected securities indices.

*(continued on following page)*

**No Prior Trading History.** Because the Fund is newly organized, its common shares have no history of public trading. Shares of closed-end investment companies frequently trade at a discount from their net asset value. This risk may be greater for investors who expect to sell their shares in a relatively short period after completion of this public offering.

The Fund's Common Shares have been approved for listing on the New York Stock Exchange ( NYSE ) under the symbol IGA, subject to notice of issuance.

Investing in common shares of the Fund involves risk. See Risks beginning on page 28.

Per Share

Total(1)

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

Public offering price	\$ 20.00	\$345,000,000
Sales load(2)	\$.90	\$15,525,000
Estimated organizational expenses and offering costs(3)	\$.04	\$690,000
Proceeds, after expenses, to Fund	\$ 19.06	\$328,785,000

- (1) Total expenses relating to the organization of the Fund and the Common Share offering paid by the Fund (which do not include the sales load) are estimated to be \$690,000, which represents \$.04 per Common Share issued. ING Investments, LLC has agreed to pay all organizational expenses and Common Share offering costs of the Fund (other than sales load) that exceed \$.04 per Common Share.
- (2) ING Investments, LLC has agreed to pay additional compensation to Merrill Lynch, Pierce, Fenner & Smith Incorporated and additional compensation to certain qualifying underwriters. See Underwriting on page 54 of this prospectus.
- (3) The Fund has granted the underwriters an option to purchase up to 2,587,500 additional Common Shares, at the public offering price, less the sales load, within 45 days from the date of this prospectus to cover over-allotments, if any. If such option is exercised in full, the public offering price, sales load, estimated organizational expenses and offering costs and proceeds to the Fund will be \$396,750,000, \$17,853,750, \$793,500 and \$378,102,750, respectively. See Underwriting.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The Common Shares will be ready for delivery on or about October 31, 2005.

The date of this prospectus is October 26, 2005.

**Table of Contents**

*(continued from previous page)*

Under normal market conditions, the Fund will invest in common stocks of companies located in a number of different countries throughout the world, normally in approximately 550 common stocks, seeking to reduce the Fund's exposure to individual stock risk. Securities held by the Fund may be denominated in both U.S. dollars and non-U.S. currencies. The Fund normally expects that its investments will be invested across a broad range of countries, industries and market sectors, including investments in issuers located in countries with emerging markets. There can be no assurance that the Fund will achieve its investment objectives. For more information on the Fund's investment strategies, see "The Fund's Investments and Risks."

The Fund will have an investment adviser and a sub-adviser. ING Investments, LLC ( "ING Investments" or "Adviser" ), the investment adviser, will be responsible for determining the Fund's overall investment strategy. ING Investment Management Co. ( "ING IM" or "Sub-Adviser" ), the sub-adviser, will be responsible for investing the Fund's assets in accordance with the Fund's investment objectives and strategies.

This prospectus sets forth concisely the information about the Fund that a prospective investor ought to know before investing. You should read it carefully before you invest, and keep it for future reference. The Fund has filed with the Securities and Exchange Commission ( "SEC" ) a Statement of Additional Information dated October 26, 2005, as may be amended ( "SAI" ), containing additional information about the Fund. The SAI is incorporated by reference in its entirety into this prospectus. The Fund also will produce both annual and semi-annual reports that will contain important information about the Fund. You may obtain a free copy of the SAI, the annual report and the semi-annual report, when available, and other information regarding the Fund, by contacting the Fund at (800) 992-0180 or by writing to the Fund at 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258. The SAI is, and the annual report and the semi-annual report will be, available free of charge, on the Fund's website at [www.ingfunds.com](http://www.ingfunds.com). The prospectus, SAI and other information about the Fund are also available on the SEC's website (<http://www.sec.gov>). The table of contents for the SAI appears on page 60 of this prospectus.

The Fund's Common Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation or any other government agency.

The Fund has not, and the underwriters have not, authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information you should not rely on it. The Fund is not, and the underwriters are not, making an offer of these securities in any state where the offer is not permitted.

**Table of Contents**

**PROSPECTUS SUMMARY**

*This summary highlights information contained elsewhere in this prospectus. This summary does not contain all of the information that you should consider before investing in the Fund's common shares. You should review the more detailed information contained elsewhere in this prospectus and in the Statement of Additional Information to understand the offering fully.*

**The Fund** The Fund is a newly organized, diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended ( 1940 Act ). It is organized as a Delaware statutory trust.

**The Offering** The Fund is offering ( Offering ) 17,250,000 common shares of beneficial interest ( Common Shares ) at an initial offering price of \$20.00 per share. The Common Shares are being offered by a group of underwriters (each an Underwriter and collectively, the Underwriters ) led by Merrill Lynch, Pierce, Fenner & Smith Incorporated ( Merrill Lynch ), Citigroup Global Markets Inc., UBS Securities LLC, A.G. Edwards & Sons, Inc., Advest, Inc., Robert W. Baird & Co. Incorporated, H&R Block Financial Advisors, Inc., Crowell, Weedon & Co., Ferris, Baker Watts, Incorporated, J.J.B. Hilliard, W.L. Lyons, Inc., Janney Montgomery Scott LLC, Legg Mason Wood Walker, Incorporated, RBC Capital Markets Corporation, Stifel, Nicolaus & Company Incorporated, Wedbush Morgan Securities Inc. and Wells Fargo Securities, LLC. You must purchase at least 100 Common Shares in order to participate in this Offering. The Fund has given the Underwriters an option to purchase up to 2,587,500 additional shares, at the public offering price less the sales load, within 45 days from the date of this prospectus to cover orders in excess of 17,250,000 Common Shares. ING Investments has agreed to pay all organizational expenses and offering costs of the Fund (other than sales load) that exceed \$.04 per Common Share. See Underwriting.

**Investment Objectives** The Fund's primary investment objective is to provide a high level of income. Capital appreciation is the Fund's secondary investment objective. There can be no assurance that the Fund will achieve its investment objectives. See The Fund's Investments. The Fund will provide shareholders with at least 60 days' prior notice of any change in this investment policy.

**Investment Strategies** The Fund seeks to achieve its investment objectives by investing at least 80% of its managed assets in a portfolio of common stocks of companies located in a number of different countries throughout the world, including the United States. In addition, the Fund will utilize an integrated options writing strategy.

**Equity Portfolio** Under normal market conditions, the Fund will invest in a diversified portfolio of common stocks of companies located in a number of different countries throughout the world, normally in approximately 550 common stocks, seeking to reduce the Fund's exposure to individual stock risk. Securities held by the Fund may be denominated in both U.S. dollars and non-U.S. currencies. The Fund normally expects that its investments will be invested across a broad range of countries, industries and market sectors, including investments in issuers located in countries with emerging markets. The Fund may not invest 25% or more of its total assets in the securities of issuers in any single industry or group of industries.

## Table of Contents

Under normal market conditions, the Fund will invest at least 80% of its managed assets in a diversified portfolio of common stocks of companies located in a number of different countries throughout the world, including the United States. The Fund may invest up to 20% of its managed assets in securities issued by companies located in countries with emerging markets when the Sub-Adviser believes they present attractive investment opportunities.

The Fund will typically seek to be broadly diversified across countries, asset classes and industries. The weighting between U.S. and international equities will depend on the Sub-Adviser's ongoing assessment of market opportunities for the Fund. Under normal market conditions, the Fund will seek to maintain a target weighting of the Fund's equity portfolio being 60% in U.S. domestic common stocks and not less than 40% in international (ex-U.S.) common stocks.

The Sub-Adviser uses a quantitative screening process to assist in the portfolio construction process. The Sub-Adviser expects to start its investment process with the approximately 1,600 stocks that make up the Standard & Poor's 500 Composite Stock Price Index ( S&P 500 Index ) and the Morgan Stanley Capital International Equity (Europe, Australia, Far East) Index ( MSCI EAFE Index ). The S&P 500 Index is an unmanaged index that measures the performance of securities of approximately 500 large-capitalization companies whose securities are traded on major U.S. stock markets. As of September 1, 2005, the S&P 500 Index contained companies with a market capitalization between \$843 million and \$373 billion (in U.S. dollars). The MSCI EAFE Index is a market value-weighted index that reflects the performance of approximately 1100 securities listed on the stock exchange in Europe, Australia, and the Far East. As of September 1, 2005, the MSCI EAFE Index contained companies with a market capitalization between \$456 million and \$234 billion (in U.S. dollars). Investors cannot invest directly in an index. The Sub-Adviser will then apply a series of proprietary quantitative screens to these securities, as more fully discussed below. Once this screening has been completed, the Sub-Adviser will determine the split between U.S. and international equities based on its ongoing assessment of market opportunities for the Fund, with an initial target weight of 60% invested in approximately 150 U.S. domestic common stocks and 40% invested in approximately 400 international (ex-U.S.) common stocks.

*U.S. Equity Component.* The Sub-Adviser will normally invest its U.S. domestic assets in common stocks included in the S&P 500 Index. In managing the U.S. equity component, the Sub-Adviser attempts to achieve the Fund's investment objectives by overweighting those stocks in the S&P 500 Index that the Sub-Adviser believes will outperform the index and underweighting (or avoiding altogether) those stocks that the Sub-Adviser believes will underperform the index. A number of stocks expected to match the return of the index are included for risk control purposes. In determining stock weightings, the Sub-Adviser uses internally developed quantitative computer models to evaluate certain criteria such as the financial strength of each company and its potential for strong, sustained earnings growth.

The Sub-Adviser typically will change its position on a stock only if there is a significant change in its rank from the previous quantitative evaluation. This rule

## Table of Contents

seeks to minimize excessive turnover. The specific factors and weightings used in the model are continually reviewed and evaluated, with modifications introduced when the Sub-Adviser's research indicates that enhancements would be appropriate. The Sub-Adviser may also sell securities for a variety of reasons, such as to secure gains, limit losses, or redeploy assets into opportunities believed to be more promising.

*International Component (ex-U.S.)* The Sub-Adviser will normally invest its international assets in common stocks included in the MSCI EAFE Index. As of September 15, 2005, the MSCI EAFE Index contained securities of issuers located in approximately 22 different countries. As a result, the Sub-Adviser anticipates the Fund's international assets will normally be invested in 10 to 22 different countries in accordance with the Fund's investment strategies. The securities in which the Fund may invest include common stock and securities convertible into common stock. In managing the international component, the Sub-Adviser attempts to achieve the Fund's investment objectives by overweighting those stocks in the MSCI EAFE Index that the Sub-Adviser believes will outperform the index, and underweighting (or avoiding altogether) those stocks that the Sub-Adviser believes will underperform the index. A number of stocks expected to match the return of the index are included for risk control purposes. The Portfolio's aggregate characteristics will seek to approximate that of the index.

The Sub-Adviser expects to start its investment process with the approximately 1,100 stocks that make up the MSCI EAFE Index. The Sub-Adviser applies a liquidity screen to this universe resulting in approximately 700 potential names. A proprietary stock ranking model then ranks these stocks within 12 EAFE sectors with further subdivisions into 24 industries on the basis of a customized model for each sector. In determining stock weightings, the Sub-Adviser uses proprietary models to evaluate certain criteria, such as cash flows, earnings and price-to-book ratios of each company, in an attempt to select companies with long-term sustainable growth characteristics at acceptable valuation levels and construct a portfolio with approximate country-, sector- and industry-neutrality and the desired risk level.

## **Option Portfolio**

The Fund's principal options activity will consist of writing (selling) index call options on selected indices, with the underlying values of the indices having approximately 60% to 100% of the value of its holdings of common stocks. The Fund seeks to generate gains from the index call option strategy and, to a lesser extent, income from dividends on the common stocks held in the Fund's portfolio. The extent of index call option writing activity will depend upon market conditions and the Sub-Adviser's ongoing assessment of the attractiveness of writing index call options on selected indices. Index call options will be written both in exchange-listed option markets and over-the-counter markets with major international banks, broker-dealers and financial institutions.

As the seller of index call options, the Fund will receive cash (the premium) from options purchasers. The purchaser of an index call option has the right to receive from the option seller any appreciation in the value of the index over a fixed price (the exercise price) as of a specified date in the future (the option expiration date).

**Table of Contents**

In effect, the Fund sells the potential appreciation in the value of the index above the exercise price during the term of the option in exchange for the premium.

The Fund intends to sell index call options that are both exchange-listed as well as in the over-the-counter ( OTC ) markets. The Fund may write index call options that are European style, meaning that the options only may be exercised on the expiration date of the option. The Fund also may write index call options that are American style, meaning that the options may be exercised at any point up to and including the expiration date.

Options on an index differ from options on securities because (i) the exercise of an index option requires cash payments and does not involve the actual purchase or sale of securities, (ii) the holder of an index option has the right to receive cash upon exercise of the option if the level of the index upon which the option is based is greater, in the case of a call, or less, in the case of a put, than the exercise price of the option and (iii) index options are designed to reflect price fluctuations in a group of securities or segments of the securities market rather than price fluctuations in a single security.

Prior to expiration, the Fund may close an option position by making an offsetting market purchase of identical option contracts (same type, underlying index, exercise price and expiration). The cost of closing out transactions and payments in settlement of exercised options will reduce the net option premiums available for distribution to Common Shareholders by the Fund. The reduction in net option premiums due to a rise in stock prices should generally be offset, at least in part, by appreciation in the value of the Fund's common stock portfolio.

The principal factors affecting the market value of an option include supply and demand, interest rates, the current market price of the underlying index or security in relation to the exercise price of the option, the actual or perceived volatility of the underlying index or security and the time remaining until the expiration date. The premium received for an option written by the Fund is recorded as an asset of the Fund and its obligation under the option contract as an equivalent liability. The Fund then adjusts over time the liability as the market value of the option changes. The value of each written option will be marked to market daily.

The transaction costs of buying and selling options consist primarily of commissions (which are imposed in opening, closing, exercise and assignment transactions), but may also include margin and interest costs in particular transactions. The impact of transaction costs on the profitability of a transaction may often be greater for options transactions than for transactions in the underlying indices or securities because these costs are often greater in relation to options premiums than in relation to the cash value of the indices or the prices of underlying securities. Transaction costs may be especially significant in option strategies calling for multiple purchases and sales of options, such as spreads or straddles. Transaction costs may be different for transactions effected in foreign markets than for transactions effected in U.S. markets. Transaction costs associated with the Fund's options strategy will vary depending on market circumstances and other factors.

**Table of Contents**

The Sub-Adviser does not intend to write (sell) call options on equity indices where at the time the options are written, the underlying values of the indices exceed the net asset value of the Fund's equity portfolio. For these purposes, the Fund treats options on indices as being written on securities having an aggregate value equal to the face or notional amount of the index subject to the option. The Fund will cover its written equity index call positions by segregating liquid assets in an amount equal to the contract value of the index, by entering into offsetting positions (*e.g.*, by purchasing a call option on the same index as the call written where the exercise price of the purchased call is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written, provided the difference is maintained by the Fund in segregated liquid assets in an amount equal to the difference) and/or by holding a portfolio of common stocks which substantially replicate the movement of the index on which the option is written.

Examples of the indices upon which the Fund may write options include (but are not limited to) the S&P 500 Index, the MSCI EAFE Index, the FTSE 100 Index, the Topix Index and the EuroSTOXX 50 Index. The Fund will generally write (sell) index call options that are out-of-the-money or at-the-money at the time of sale. In addition to providing possible gains from premiums received, out-of-the-money index call options allow the Fund to potentially benefit from appreciation in the equities held by the Fund with respect to which the option was written, to the extent the Fund's equity portfolio is correlated with the applicable index, up to the exercise price. The Fund may sell index call options that are near-to-the-money (*i.e.*, the exercise price generally will be within a close range above or below the current level of the cash value of the index). The Fund also reserves the right to sell index call options that are in-the-money. When the prices of the equity index upon which a call option is written rise, call options that were out-of-the-money when written may become in-the-money (*i.e.*, the cash value of the index rises above the exercise price of the option), thereby increasing the likelihood that the options will be exercised and the Fund will be forced to pay the amount of appreciation over the strike price upon the purchaser's exercise of the option. The premium, the exercise price and the market value of the index determine the gain or loss realized by the Fund as the seller of an index call option.

The Sub-Adviser will seek to maintain for the Fund written call options positions on equity indices whose price movements, taken in the aggregate, are correlated with the price movements of the common stocks and other securities held in the Fund's equity portfolio. To the extent that there is a lack of correlation, movements in the indices underlying the options positions may result in losses to the Fund, which may more than offset any gains received by the Fund from the receipt of options premiums. The Fund cannot guarantee that the index call option strategy will be effective. The Fund may also write index call options with different characteristics and managed differently than described above.

If an option written by the Fund expires unexercised, the Fund realizes on the expiration date a capital gain equal to the premium received by the Fund at the time the option was written. If an option written by the Fund is exercised, the Fund realizes on the expiration date a capital gain if the cash payment made by the Fund upon exercise is less than the premium received from writing the option and a capital loss if the cash payment made is more than the premium received. If

**Table of Contents**

a written option is repurchased, the Fund realizes upon the closing purchase transaction a capital gain if the cost of the closing option is less than the premium received from writing the option and a capital loss if the cost of the closing option is more than the premium received.

The Sub-Adviser believes that a strategy of owning a diversified portfolio of common stocks and selling index call options can provide current income and gains and attractive risk-adjusted returns. The Sub-Adviser further believes that a strategy of owning a portfolio of common stocks in conjunction with writing index call options may provide returns that are superior to owning the same stocks without an associated call option writing program under three different stock market scenarios: (1) down-trending equity markets; (2) flat market conditions; and (3) moderately rising equity markets. In the Sub-Adviser's opinion, in more strongly rising equity markets this strategy generally may be expected to underperform the stock-only portfolio.

In addition to the intended strategy of selling index call options, the Fund may write call options on individual securities and purchase put options on indices and may invest in other derivative instruments acquired for hedging, risk management and investment purposes to gain or reduce exposure to securities, securities markets, markets indices and/or currencies consistent with its investment objectives and strategies, provided that such derivative instruments are acquired to enable the Fund to protect against a decline in its assets or its ability to pay dividends. Derivative instruments may be used by the Fund to enhance returns or as a substitute for the purchase or sale of securities. Derivatives can be illiquid, may disproportionately increase losses and have a potentially large negative impact on the Fund's performance. The Fund may enter into foreign currency exchange transactions or other derivatives to hedge currency risk or gain exposure to a currency. Initially, the Sub-Adviser intends to enter into foreign currency exchange transactions on behalf of the Fund with respect to substantially all of the Fund's international equity investments in an attempt to hedge against decreases in the values of the Fund's international equities and potentially help stabilize the Fund's net asset value. The Fund's ongoing use of foreign currency exchange transactions will be based on the Sub-Adviser's ongoing assessment of the Fund's need for such transactions and market conditions. These investment techniques are not expected to be a primary strategy for the Fund.

**Other Investment Policies**

In addition to its primary investment policies, the Fund may engage in the following investment practices to a limited extent. The Fund may invest in the aggregate up to 20% of its managed assets in all investments described below. These investments are not expected to be a primary strategy of the Fund.

The Fund may invest in preferred stocks, warrants and convertible securities. The Fund may sell securities short in certain situations. The Fund may invest in cash equivalents or highly liquid, short-term securities such as commercial paper, time deposits, certificates of deposit, short-term notes and short-term government obligations. The Fund may invest up to 15% of its managed assets in restricted and illiquid securities. The Fund may also invest up to 10% of its managed assets in securities of other open- or closed-end investment companies, including

**Table of Contents**

exchange-traded funds that invest primarily in securities of the types in which the Fund may invest directly. The Fund may also seek to earn income by lending portfolio securities to broker-dealers or other institutional borrowers. See **Other Investment Policies** and **Additional Investment Policies and Restrictions** in the SAI for more information regarding the Fund's other investments.

**Distributions**

Commencing with the Fund's first distribution, the Fund intends to implement a level dividend strategy and make regular quarterly distributions to Common Shareholders based on the past and projected performance of the Fund. The Fund's distribution rate will be based on past and projected:

dividends received on the common stocks or other securities held by the fund;

capital gains from net option premiums (option premium received less the cost of close out or settlement); and

capital gains (realized or unrealized) on the common stocks held in the Fund's portfolio.

To permit the Fund to maintain more stable distributions, distribution rates will be based on projected Fund performance. As a result, the distributions paid by the Fund for any particular quarter may be more or less than the amount of net investment income from that quarterly period. The Fund's Board may modify this distribution policy at any time without obtaining the approval of Common Shareholders. The initial distribution is expected to be declared in December 2005 and paid in April 2006, depending on market conditions.

The Fund's annual distributions will likely differ from annual net investment income. The investment income of the Fund will consist of all dividend and interest income accrued on portfolio investments, short-term capital gain (including short-term gains on terminated option positions and gains on the sale of portfolio investments held for one year or less) in excess of long-term capital loss and income from certain hedging transactions, less all expenses of the Fund. Expenses of the Fund will be accrued each day. To the extent that the Fund's net investment income for any year exceeds the total quarterly distributions paid during the year, the Fund will make a special distribution at or near year-end of such excess amount as may be required. Over time, all of the Fund's investment company taxable income will be distributed.

At least annually, the Fund intends to distribute any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) or, alternatively, to retain all or a portion of the year's net capital gain and pay federal income tax on the retained gain. As provided under federal tax law, Common Shareholders of record as of the end of the Fund's taxable year will include their allocable share of the retained gain in their income for the year as a long-term capital gain and will be entitled to a tax credit or refund for the tax deemed paid on their behalf by the Fund.

The tax treatment and characterization of the Fund's distributions may vary significantly from time to time because of the varied nature of the Fund's

**Table of Contents**

investments. If the Fund's total quarterly distributions in any year exceed the amount of its net investment income for the year, any such excess would be characterized as a return of capital for federal income tax purposes to the extent not designated as a capital gain dividend. Distributions in any year may include a substantial return of capital component. Under the 1940 Act, for any distribution that includes amounts from sources other than net income, the Fund is required to provide Common Shareholders a written statement regarding the components of such distribution. Such a statement will be provided at the time of any distribution believed to include any such amounts. However the ultimate tax characterization of the Fund's distributions made in a calendar year cannot finally be determined until the end of that calendar year. For example, the Fund may distribute income early in the calendar year that is taxable at short-term capital gains rates, but incur net short-term capital losses later in the year, thereby offsetting the income taxable at short-term capital gains rates for which distributions have already been made by the Fund. See Tax Matters.

In certain circumstances, the Fund may be required to sell a portion of its investment portfolio to fund distributions. Distributions will reduce the Common Shares' net asset value.

The Fund intends to rely on an exemptive application with the SEC seeking an order under the 1940 Act to permit the Fund to include realized long-term capital gains as a part of its regular distributions to Common Shareholders more frequently than would otherwise be permitted by the 1940 Act (generally once per taxable year). There is no assurance that the SEC will grant the request for such exemptive relief. The staff of the SEC has indicated that it has suspended the processing of exemptive applications requesting the type of relief referenced above, pending review by the staff of the results of an industry-wide SEC inspection focusing on the dividend practices of closed-end investment companies. There can be no assurance as to when that review might be completed or whether, following that review, the staff would process such applications or grant such relief. As a result of this development, the Fund has no current expectation that it will be in a position to include long-term capital gains in Fund distributions more frequently than is permitted under the 1940 Act, thus leaving the Fund with the possibility of variability in distributions (and their tax attributes) as discussed above. See Distributions.

**Investment Adviser**

ING Investments is an Arizona limited liability company and is an indirect wholly-owned subsidiary of ING Groep N.V. (NYSE: ING) (ING Groep). ING Groep is one of the largest financial services organizations in the world with approximately 113,000 employees. Based in Amsterdam, ING Groep offers an array of banking, insurance and asset management services to both individual and institutional investors. The principal address of ING Investments is 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258. As of June 30, 2005, ING Investments had over \$39 billion of assets under management. See Management of the Fund.

For its services as investment adviser to the Fund, including its oversight of the Sub-Adviser, ING Investments will receive an annual fee, payable monthly, in an amount equal to .75% of the Fund's average daily gross asset value, minus the

**Table of Contents**

sum of the Fund's accrued and unpaid dividends on any outstanding preferred shares, if any, and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper or notes issued by the Fund and the liquidation preference of any outstanding preferred shares) (managed assets). Option contracts written (sold) by the Fund are recorded as liabilities, while option contracts purchased by the Fund are recorded as assets. As the net aggregate value of the option contracts written by the Fund increases, the liability related to those contracts increases, thereby reducing the managed assets of the Fund and decreasing the management fee payable to the Adviser. Conversely, as the net aggregate value of the option contracts purchased by the Fund increases, the asset related to those contracts increases, thereby increasing the managed assets of the Fund and increasing the management fee payable to the Adviser.

**Sub-Adviser**

ING Investment Management Co. (ING IM or Sub-Adviser), a Connecticut corporation, is responsible for managing the Fund's assets in accordance with the Fund's investment objectives and policies, subject to oversight by ING Investments and the Board. Founded in 1972, ING IM is registered with the SEC as an investment adviser. ING IM has acted as adviser or sub-adviser to mutual funds since 1994 and has managed institutional accounts since 1972. ING IM is an indirect, wholly-owned subsidiary of ING Groep N.V. and is an affiliate of ING Investments. As of June 30, 2005, ING IM managed over \$57 billion in assets. The principal office of ING IM is 230 Park Avenue, New York, NY 10169. For its services, ING IM will receive a sub-advisory fee from ING Investments. No advisory fee will be paid by the Fund directly to ING IM. See Management of the Fund.

**Listing**

The Common Shares have been approved for listing on the New York Stock Exchange (NYSE) under the symbol IGA, subject to notice of issuance.

**Transfer Agent, Dividend**

**Disbursing Agent,**

**Registrar**

**and Custodian**

The transfer agent, dividend disbursing agent, registrar and Custodian for the Common Shares is The Bank of New York, whose principal business address is 101 Barclay Street (11E), New York, New York 10286.

**Risks**

**AN INVESTMENT IN THE FUND'S COMMON SHARES INVOLVES CERTAIN RISKS. LISTED BELOW ARE THE PRIMARY RISKS OF INVESTING IN THE FUND'S COMMON SHARES. SEE RISKS FOR A MORE COMPLETE DISCUSSION OF THE RISKS OF INVESTING IN THE FUND'S COMMON SHARES.**

*No Prior History.* The Fund is a newly organized, diversified, closed-end management investment company with no history of operations or public trading of its Common Shares.

*Market Discount Risk.* Shares of closed-end management investment companies frequently trade at a discount from their net asset value, and the Fund's Common Shares may likewise trade at a discount from net asset value. The trading price of

**Table of Contents**

the Fund's Common Shares may be less than the public offering price. The returns earned by holders of Common Shares who purchased their Common Shares in this offering and sell their Common Shares below net asset value will be reduced. See Risks Market Discount Risk.

*Investment and Market Risk.* An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of all or a portion of the amount invested. An investment in the Fund's Common Shares represents an indirect investment in the securities owned by the Fund, which are generally traded on a securities exchange or in the over-the-counter markets. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably. In addition, by writing (selling) call options on indices, capital appreciation potential will be limited. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account any reinvestment of distributions. Market risk is the risk that securities may decline in value due to factors affecting securities markets generally or particular industries. See Risks Investment and Market Risk.

*Issuer Risk.* The value of securities held by the Fund may decline for a number of reasons that directly relate to the issuer, such as changes in the financial condition of the issuer, management performance, financial leverage and reduced demand for the issuer's goods and services. The amount of dividends paid may decline for reasons that relate to an issuer, such as changes in an issuer's financial condition or a decision by the issuer to pay a lower dividend. See Risks Issuer Risk.

*Equity Risk.* The net asset value ( NAV ) of the Fund's Common Shares will change as the prices of its portfolio investments go up or down. Equity securities face market, issuer and other risks, and their prices may go up or down, sometimes rapidly and unpredictably.

The Fund will invest primarily in common stocks of large-cap and mid-cap companies, which sometimes have more stable prices than smaller companies. Although common stocks historically have generated higher average returns than fixed-income securities, common stocks also have experienced significantly more volatility in those returns. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by the Fund. Also, prices of common stocks are sensitive to general movements in the stock market and a drop in the stock market may depress the prices of common stocks held by the Fund or to which it has exposure. See Risks Equity Risk.

*Risks of Small-Cap and Mid-Cap Companies.* The Fund may invest in companies whose market capitalization is considered small sized or small-cap as well as mid-cap companies. These companies often are newer or less established companies than larger companies. Investments in these companies carry additional risks because earnings of these companies tend to be less predictable; they often have limited product lines, markets, distribution channels or financial resources; and the management of such companies may be dependent upon one or a few key people. The market movements of equity securities of small-cap and mid-cap companies may be more abrupt or erratic than the market

**Table of Contents**

movements of equity securities of larger, more established companies or the stock market in general. Historically, small-cap and mid-cap companies have sometimes gone through extended periods when they did not perform as well as larger companies. In addition, equity securities of these companies generally are less liquid than those of larger companies. This means that the Fund could have greater difficulty selling such securities at the time and price that the Fund would like. See Risk Risks of Small-Cap and Mid-Cap Companies.

*Index Call Option Risk.* The purchaser of the index call option written (sold) has the right to any appreciation in the cash value of the index over the exercise price up to and including the expiration date. Therefore, as the writer of an index call option, the Fund forgoes, during the term of the option, the opportunity to profit from increases in the market value of the equity securities held by the Fund with respect to which the option was written (to the extent that their performance is correlated with that of the index) above the sum of the premium and the exercise price of the call option. However, the Fund has retained the risk of loss (net of premiums received) should the price of the Fund's portfolio securities decline. Because the exercise of index options is settled in cash, sellers of index call options, such as the Fund, cannot provide in advance for their potential settlement obligations by acquiring and holding the underlying securities. The value of index options written by the Fund, which will be priced daily, will be affected by changes in the value of and dividend rates of the underlying common stocks in the index, changes in the actual or perceived volatility of the stock market and the remaining time to the options expiration. The value of the index options also may be adversely affected if the market for the index options becomes less liquid or smaller.

The Fund intends to mitigate the risks of its written index call positions by seeking to maintain for the Fund written (sold) call options positions on equity indexes whose price movements, taken in the aggregate, are correlated with the price movements of the common stocks and other securities held in the Fund's equity portfolio. In doing so, the Sub-Adviser will consider data relating to the Fund's equity holdings, including net assets, industry and sector weightings, and historic volatility. In addition, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. To the extent that there is a lack of correlation, movements in the indices underlying the options positions may result in losses to the Fund, which may more than offset any gains received by the Fund from the receipt of options premiums. In these and other circumstances, the Fund may be required to sell portfolio securities to satisfy its obligations as the writer of an index call option when it would not otherwise choose to do so, or the Fund may choose to sell portfolio securities to realize gains to supplement Fund distributions. Such sales would involve transaction costs borne by the Fund and may also result in realization of taxable capital gains, including short-term capital gains taxed at ordinary income tax rates, and may adversely impact the Fund's after-tax returns. See Risks Index Call Option Risk.

*Options Related Risk.* There are numerous risks associated with transactions in options. A decision as to whether, when and how to use index call options,

**Table of Contents**

covered call options and put options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. As the writer of a covered call option, the Fund forgoes, during the covered call option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the option premium received and the exercise price of the covered call option, but has retained the risk of loss, minus the option premium received, should the price of the underlying security decline. The writer of an American-style option has no control over when during the exercise period of the option it may be required to fulfill its obligation as a writer of the option. This does not apply for European-style options, which may only be exercised at termination. Once an option writer has received an exercise notice for an American-style option, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must either close out the position with a cash settlement or deliver the underlying security at the exercise price. Thus, the use of options may require the Fund to sell portfolio securities at inopportune times or for prices other than current market values, will limit the amount of appreciation the Fund can realize above the exercise price of an option on a common stock, or may cause the Fund to hold a security that it might otherwise sell.

The Fund intends to primarily write over-the-counter options, however, the Fund may write call options that are exchange-traded. The Fund's ability to terminate over-the-counter options may be more limited than with exchange-traded options and may involve the risk that banks, broker-dealers or other financial institutions participating in such transactions will not fulfill their obligations. If the Fund were unable to close out a covered call option that it had written on a common stock, it would not be able to sell the underlying common stock unless the option expired without exercise. The value of options may also be adversely affected if the market for such options becomes less liquid or smaller. There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position either, in the case of a covered call option written, by buying the option, or, in the case of a purchased put option, by selling the option. Exchange-traded options may also be illiquid. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation ( OCC ) may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options). If trading on an exchange were discontinued, the secondary market on that exchange (or in that class or series of options) would cease to exist. However, outstanding options on that exchange that had been issued by the OCC as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

**Table of Contents**

The hours of trading for listed or over-the-counter options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that would not be reflected concurrently in the options markets. Call options are marked to market daily at 4:00 p.m. Eastern time, and their value will be affected by changes in the value of and dividend rates of the underlying common stocks, changes in interest rates, changes in the actual or perceived volatility of the stock market and the underlying common stocks and the remaining time to the options' expiration. Additionally, the exercise price of an option may be adjusted downward before the option's expiration as a result of the occurrence of certain corporate events affecting the underlying equity security, such as extraordinary dividends, stock splits, mergers or other extraordinary distributions or events. A reduction in the exercise price of an option may reduce the Fund's capital appreciation potential on the underlying security.

When the Fund purchases put options, the Fund will be subject to additional risks. A put option acquired by the Fund and not sold prior to expiration will expire worthless if the price of the stock or index at expiration exceeds the exercise price of the option, thereby causing the Fund to lose its entire investment in the option. If restrictions on exercise were imposed, the Fund might be unable to exercise an option it had purchased. If the Fund were unable to close out an option that it had purchased, it would have to exercise the option in order to realize any profit or the option may expire worthless. Stock market indices on which the Fund may purchase options positions likely will not mirror the Fund's actual portfolio holdings. The effectiveness of index put options as hedges against declines in the Fund's stock portfolio will be limited to the extent that the performance of the underlying index does not correlate with that of the Fund's holdings. See **Risks Options Related Risk**.

*Foreign Investment and Emerging Markets Risk.* The Fund will invest in a portfolio of global common stocks and may invest up to 20% of its managed assets in securities issued by companies located in countries with emerging markets. Foreign (non-U.S.) investments may be subject to greater risk than U.S. investments for many reasons, including changes in currency exchange rates and unstable political, social and economic conditions, which may significantly disrupt the financial markets or interfere with the Fund's ability to enforce its rights against foreign government issuers. Foreign (non-U.S.) investments may also be subject to the risks of a lack of adequate or accurate company information, smaller, less liquid and more volatile securities markets, less secure foreign banks or securities depositories than those in the U.S. and foreign controls on investment and currency transfers. Because of less developed markets and economies, foreign investments may have less liquidity and increased price volatility. In some countries, less mature governments and governmental institutions may potentially lead to greater risks of expropriation, confiscatory taxation and national policies that may restrict the repatriation of cash or the Fund's investments in general. The risks of investing in foreign securities can be intensified in the case of investments in issuers located in countries with emerging markets. Investments in foreign issuers may also decrease the Fund's ability to borrow against its assets. See **Risks Foreign Investment and Emerging Markets Risk**.

**Table of Contents**

*Foreign (non-U.S.) Currency Risk.* The Fund's Common Shares are priced in U.S. dollars and the distributions paid by the Fund are paid in U.S. dollars. However, a significant portion of the Fund's assets may be denominated in foreign (non-U.S.) currencies. There is the risk that the value of such assets and/or the value of any distributions from such assets may decrease if the currency in which such assets are priced or in which they make distributions falls in relation to the value of the U.S. dollar. The Fund is not required to hedge its foreign currency risk, although it may do so through foreign currency exchange contracts and other methods. Therefore, to the extent the Fund does not hedge its foreign currency risk, the value of the Fund's assets and income could be adversely affected by currency exchange rate movements. See Risks Foreign (non-U.S.) Currency Risk.

*Derivatives Risk.* In addition to writing index call options, covered call options and purchasing put options, the risks of which are described above, the Fund may invest in a variety of derivative instruments for hedging, risk management or investment purposes. Derivatives can be illiquid, may disproportionately increase losses and have a potentially large negative impact on the Fund's performance. Derivative transactions, including options on securities and securities indices and other transactions in which the Fund may engage (such as futures contracts and options thereon, swaps and short sales), may subject the Fund to increased risk of principal loss due to unexpected movements in stock prices, changes in stock volatility levels and interest rates and imperfect correlations between the Fund's securities holdings and indices upon which derivative transactions are based. The Fund also will be subject to credit risk with respect to the counterparties to any over-the-counter derivatives contracts purchased by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances. See Risks Derivatives Risk.

*Interest Rate Risk.* The level of premiums from index call option writing and the amounts available for distribution from the Fund's options activity may decrease in declining interest rate environments. The value of the Fund's common stock investments may also be influenced by changes in interest rates. When interest rates rise, the market value of certain of such securities may fall. Interest rates are currently low relative to historic levels. During periods of declining interest rates, an issuer of preferred stock may exercise its option to redeem securities prior to maturity, forcing the Fund to reinvest in lower yielding securities. This is known as call risk. During periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected payments. This may lock in a below market yield, increase the security's duration, and reduce the value of the security. This is known as extension risk. See Risks Interest Rate Risk.

*Restricted and Illiquid Securities Risk.* The Fund may invest up to 15% of its managed assets in restricted and illiquid securities. For this limit, a security is considered illiquid if it cannot be disposed of in seven days at approximately the price at which the Fund carries the security on its books. In the case of exchange-

**Table of Contents**

traded options or options written in the over-the-counter markets, an option will be considered illiquid by the Fund if it cannot be closed in seven days. The Fund may not be able to sell an illiquid security at a favorable time or price and thereby decrease the Fund's overall liquidity. Further, the lack of an established secondary market may make it more difficult to value illiquid securities, which may negatively impact the price the Fund would receive upon disposition. The Fund's policy on liquidity of options varies from the position used by open-end funds in that the Fund relies on the ability to close an over-the-counter option on the market, whereas over-the-counter options and the securities on which they are written are generally treated as illiquid by open-end funds. As a result, the Fund may invest a greater portion of its assets in options traded over-the-counter than could an open-end fund. See Risks Restricted and Illiquid Securities Risk and Risks Options Related Risk.

*Distribution Risk.* The Fund's ability to pay distributions varies widely over the short- and long-term. If stock prices or stock market volatility declines, the level of premiums from writing index call options and the amounts available for distribution from options activity will likely decrease as well. Payments to close out written call options will reduce amounts available for distribution from call option premiums received. Net realized and unrealized gains on the Fund's stock investments will be determined primarily by the direction and movement of the relevant stock market (and the particular stocks held). Dividends on common stocks are not fixed but are declared at the discretion of the issuer's board of directors. There can be no assurance that quarterly distributions paid by the Fund to the Common Shareholders will be maintained at initial levels or increase over time. See Risks Distribution Risk.

*Tax Risk.* The Fund intends to elect to be treated and to qualify each year as a regulated investment company (RIC) under Subchapter M of Chapter 1 of the Internal Revenue Code of 1986, as amended (the Code). If the Fund qualifies as a RIC and meets certain source of income, asset diversification, and distribution requirements, the Fund will not be subject to corporate-level income tax on income timely distributed to Common Shareholders as dividends. If the Fund fails to qualify as a RIC or otherwise fails to satisfy the source of income, asset diversification, or distribution requirements, the Fund would be required to pay corporate-level taxes on all of its income whether or not we distribute it, which would substantially reduce the amount of income available for distribution to Common Shareholders. The tax treatment and characterization of the Fund's distributions may change over time due to changes in the Fund's mix of investment returns and changes in the federal tax laws, regulations and administrative and judicial interpretations. Distributions paid on the Common Shares may be characterized variously as net investment income, capital gains dividends or return of capital. The ultimate tax characterization of the Fund's distributions made in a calendar year cannot finally be determined until after the end of that calendar year. See Risks Tax Risk and Tax Matters.

*Preferred Stock Risk.* Preferred stock, unlike common stock, offers a stated dividend rate payable from a corporation's earnings. Such preferred stock dividends may be cumulative or non-cumulative, participating, or auction rate. If interest rates rise, the fixed dividend on preferred stocks may be less attractive,

**Table of Contents**

causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. Dividends on some preferred stock may be cumulative, requiring all or a portion of prior unpaid dividends to be paid before dividends are paid on the issuer's common stock. Preferred stock also generally has a preference over common stock on the distribution of a corporation's assets in the event of liquidation of the corporation, and may be participating, which means that it may be entitled to a dividend exceeding the stated dividend in certain cases. The rights of preferred stock on the distribution of a corporation's assets in the event of a liquidation are generally subordinate to the rights associated with a corporation's debt securities. See Risks Preferred Stock Risk.

*Convertible Securities Risk.* Convertible securities are securities that may be converted either at a stated price or at a stated rate within a specified period of time into a specified number of shares of common stock. By investing in convertible securities, the Fund seeks the opportunity, through the conversion feature, to participate in the capital appreciation of the common stock into which the securities are convertible, while investing at a better price than may be available on the common stock or obtaining a higher fixed rate of return than is available on common stocks.

The market value of convertible debt securities tends to vary inversely with the level of interest rates. The value of the security declines as interest rates increase and increases as interest rates decline. Although under normal market conditions longer-term convertible debt securities have greater yields than do shorter-term convertible debt securities of similar quality, they are subject to greater price fluctuations.

A convertible security may be subject to redemption at the option of the issuer at a price established in the instrument governing the convertible security. If a convertible security held by the Fund is called for redemption, the Fund must permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party. See Risks Convertible Securities Risk.

*Management Risk.* The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Adviser and the individual portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. Although the Sub-Adviser has a wide range of experience in managing funds or accounts that utilize (1) the strategy of investing in active portfolios of U.S. and international equity securities and (2) strategies involving options, including the writing of call options on selected securities indices, it does not have experience with funds or accounts in which these strategies are combined as described in this prospectus. While the Sub-Adviser has developed its approach through the testing of models in different market environments, investors bear the risk that the combination of strategies has not been tested in actual funds or accounts, and has not been utilized in various market cycles. See Risks Management Risk.

**Table of Contents**

*Leverage Risk.* Although the Fund has no current intention to do so, the Fund is authorized to utilize leverage through the issuance of preferred shares and/or borrowings, including the issuance of debt securities. In the event that the Fund determines in the future to utilize investment leverage, there can be no assurance that such a leveraging strategy will be successful during any period in which it is employed. Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares and the risk that fluctuations in distribution rates on any preferred shares issued by the Fund or fluctuations in borrowing costs may affect the return to Common Shareholders. To the extent the income derived from securities purchased with proceeds received from leverage exceeds the cost of leverage, the Fund's distributions will be greater than if leverage had not been used. Conversely, if the income from the securities purchased with such proceeds is not sufficient to cover the cost of leverage, the amount available for distribution to Common Shareholders will be less than if leverage had not been used. In the latter case, ING Investments, in its best judgment, may nevertheless determine to maintain the Fund's leveraged position if it deems such action to be appropriate. The costs of an offering of preferred shares and/or a borrowing program would be borne by Common Shareholders and consequently would result in a reduction of the net asset value of Common Shares. In addition, the fee paid to ING Investments and ING IM will be calculated on the basis of the Fund's average daily managed assets, including proceeds from the issuance of preferred shares and/or borrowings, so the fees will be higher when leverage is utilized. In this regard, holders of preferred shares do not bear the investment advisory fee. Rather, Common Shareholders bear the portion of the investment advisory fee attributable to the assets purchased with the proceeds of the preferred shares offering. See Risks Leverage Risk.

*Securities Lending Risk.* To seek to generate additional income, the Fund may lend portfolio securities in an amount equal to up to 33.3% of the Fund's managed assets. The Fund intends to engage in lending portfolio securities only when such lending is fully secured by investment grade collateral held by an independent agent. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower default or fail financially. In addition, there is the risk that, when lending portfolio securities, the securities may not be available to the Fund on a timely basis and the Fund may, therefore, lose the opportunity to sell the securities at a desirable price. In addition, securities lending is subject to counterparty risk. See Risks Securities Lending Risk.

*Market Disruption and Geo-Political Risk.* The aftermath of the war with Iraq, the continuing occupation of Iraq, instability in the Middle East and terrorist attacks in the United States and around the world have had a substantial impact on the U.S. and world economies and securities markets. The nature, scope and duration of the war and the occupation cannot be predicted with any certainty. Terrorist attacks closed some of the U.S. securities markets in 2001, and similar events cannot be ruled out in the future. The war and occupation, terrorism and related geopolitical risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. These risks could also adversely affect

**Table of Contents**

individual issuers and securities markets, interest rates, secondary trading, ratings, investor psychology, credit risk, inflation and other factors relating to the Common Shares and the investments made by the Fund. See [Risks Market Disruption and Geo-Political Risk](#).

*Anti-Takeover Provisions.* The Fund's Declaration of Trust, as amended, includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the holders of Common Shares of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See [Certain Provisions in the Declaration of Trust](#) and [Risks Anti-Takeover Provisions](#).

*Dividend Risk.* Companies that issue dividend yielding equity securities are not required to continue to pay dividends on such stock. Therefore, there is the possibility that such companies could reduce or eliminate the payment of dividends in the future. In such an event, the yield on the Fund's dividend yielding equity securities would be adversely affected. See [Risks Dividend Risk](#) and [Risks Equity Risk](#).

*Temporary Defensive Strategies Risk.* When the Sub-Adviser anticipates unusual market or other conditions, the Fund may temporarily depart from its principal investment strategies as a defensive measure. To the extent that the Fund invests defensively, it likely will not achieve its investment objectives.

**Table of Contents**

**SUMMARY OF FUND EXPENSES**

The following table shows the Fund's expenses as a percentage of net assets attributable to Common Shares:

	<b>Percentage of Managed Assets Attributable to Common Shares</b>
<b>Shareholder Transaction Expenses</b>	
Sales Load Paid by You (as a percentage of offering price)	4.50%
Offering Expenses Borne by the Fund (as a percentage of offering price)(1)	.20%
Dividend Reinvestment Plan Fees	None(2)
<b>Annual Expenses</b>	
Management Fees	.75%
Other Expenses(3)	.15%
Administrator Fees	.10%
<b>Total Annual Expenses</b>	<b>1.00%</b>

- (1) ING Investments has agreed to pay all organizational expenses and offering costs (other than the sales load) that exceed \$.04 per Common Share.
- (2) You will be charged certain service charges and pay a per share charge if you direct the Plan Agent to sell your Common Shares held in a dividend reinvestment account. You may also pay a pro rata share of brokerage commissions incurred in connection with open-market purchases pursuant to the Fund's Dividend Reinvestment Plan. See Distributions.
- (3) Other Expenses are based on estimated amounts of ordinary operating expenses for the current fiscal year.

The purpose of the table above and the example below is to help you understand all fees and expenses that you, as a shareholder, would bear directly or indirectly. The expenses shown in the table under Other Expenses are based on estimated amounts for the Fund's first full year of operation and assumes that the Fund issues 10,000,000 Common Shares. If the Fund issues fewer Common Shares, these expenses as a percentage of net assets attributable to Common Shares would generally increase. See Management of the Fund.

The following example illustrates the expenses (including the sales load of \$45.00, and estimated expenses of this offering of \$2.00) that you would pay on a \$1,000 investment in Common Shares, assuming (1) total annual expenses of 1.00% of net assets attributable to Common Shares and (2) a 5% return.(1)

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Total Expenses(2)	\$ 57	\$ 77	\$ 100	\$ 164

- (1) **The foregoing example should not be considered a representation of future expenses, and actual expenses may be greater or less than those shown.** The example assumes that the estimated Other Expenses set forth in the Annual Expenses fee table are accurate and that all dividends and distributions are reinvested at net asset value. Actual expenses may be greater or less than those assumed. Moreover,

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

(2) Assumes the Fund has not issued any preferred shares and has no outstanding borrowings.

The purpose of the above table is to assist you in understanding the various costs and expenses that an investor in the Fund will bear directly or indirectly.

**Table of Contents**

**THE FUND**

The Fund is a newly organized, diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Delaware statutory trust on July 7, 2005. As a newly organized entity, the Fund has no operating history and there has been no public trading of the Fund's Common Shares. The Fund's principal office is located at 7337 East Doubletree Ranch Road, Scottsdale, AZ 85258, and its telephone number is (800) 992-0180.

**USE OF PROCEEDS**

The net proceeds of the Offering will be approximately \$328,785,000 (\$378,102,750 if the Underwriters exercise the over-allotment option in full) after payment of the estimated organization and offering costs. ING Investments has agreed to pay all organizational expenses of the Fund and all offering costs (other than sales load) to the extent that such costs and expenses exceed \$.04 per Common Share.

The Fund will invest the net proceeds of the Offering in accordance with the Fund's investment objectives and strategies described elsewhere in this prospectus. It is presently anticipated that the Fund will be able to invest substantially all of the net proceeds within a week after the completion of the Offering. Pending such investment, it is anticipated that the proceeds will be invested in short-term or long-term securities issued by the U.S. government or its agencies or instrumentalities or in high quality, short-term money market instruments.

**THE FUND'S INVESTMENTS**

**Investment Objectives and Strategies**

The Fund's primary investment objective is to provide a high level of income. Capital appreciation is the Fund's secondary investment objective. There can be no assurance that the Fund will achieve its investment objectives. The Fund will provide shareholders with at least 60 days' prior notice of any change in this investment policy.

The Fund seeks to achieve its investment objectives by investing at least 80% of its managed assets in a diversified portfolio of common stocks of companies located in a number of different countries throughout the world, including the United States. In addition, the Fund will utilize an integrated options writing strategy.

Under normal market conditions, the Fund will invest in a diversified portfolio of common stocks of companies located in a number of different countries throughout the world, normally in approximately 550 common stocks, seeking to reduce the Fund's exposure to individual stock risk. Securities held by the Fund may be denominated in both U.S. dollars and non-U.S. currencies. The Fund normally expects that its investments will be invested across a broad range of countries, industries and market sectors, including investments in issuers located in countries with emerging markets. The Fund may not invest 25% or more of its total assets in the securities of issuers in any single industry or group of industries.

**Portfolio Content**

*Equity Securities.* Under normal market conditions, the Fund will invest at least 80% of its managed assets in a diversified portfolio of common stocks of companies located in a number of different countries throughout the world, including the United States. The Fund may invest up to 20% of its managed assets in securities issued by companies located in countries with emerging markets when the Sub-Adviser believes they present attractive investment opportunities.

## Table of Contents

The Fund will typically seek to be broadly diversified across countries, asset classes and industries. The weighting between U.S. and international equities will depend on the Sub-Adviser's ongoing assessment of market opportunities for the Fund. Under normal market conditions, the Fund will seek to maintain a target weighting of the Fund's equity portfolio being 60% in U.S. domestic common stocks and not less than 40% in international (ex-U.S.) common stocks.

The Sub-Adviser uses a quantitative screening process to assist in the portfolio construction process. The Sub-Adviser expects to start its investment process with the approximately 1,600 stocks that make up the Standard & Poor's 500 Composite Stock Price Index ( S&P 500 Index ) and the Morgan Stanley Capital International Equity (Europe, Australia, Far East) Index ( MSCI EAFE Index ). The S&P 500 Index is an unmanaged index that measures the performance of securities of approximately 500 large-capitalization companies whose securities are traded on major U.S. stock markets. As of September 1, 2005, the S&P 500 Index contained companies with a market capitalization between \$843 million and \$373 billion (in U.S. dollars). The MSCI EAFE Index is a market value-weighted index that reflects the performance of approximately 1100 securities listed on the stock exchanges in Europe, Australia, and the Far East. As of September 1, 2005, the MSCI EAFE Index contained companies with a market capitalization between \$456 million and \$234 billion (in U.S. dollars). Investors cannot invest directly in an index. They will then apply a series of proprietary quantitative screens to these securities, as more fully discussed below. Once this screening has been completed, the Sub-Adviser will determine the split between U.S. and international equities based on its ongoing assessment of market opportunities for the Fund, with an initial target weight of 60% invested in approximately 150 U.S. domestic common stocks and 40% invested in approximately 400 international (ex-U.S.) common stocks.

*U.S. Equity Component.* The Sub-Adviser will normally invest its U.S. domestic assets in common stocks included in the S&P 500 Index. In managing the U.S. equity component, the Sub-Adviser attempts to achieve the Fund's investment objectives by overweighting those stocks in the S&P 500 Index that the Sub-Adviser believes will outperform the index, and underweighting (or avoiding altogether) those stocks that the Sub-Adviser believes will underperform the index. A number of stocks expected to match the return of the index are included for risk control purposes. In determining stock weightings, the Sub-Adviser uses internally developed quantitative computer models to evaluate certain criteria such as the financial strength of each company and its potential for strong, sustained earnings growth.

The Sub-Adviser typically will change its position on a stock only if there is a significant change in its rank from the previous quantitative evaluation. This rule seeks to minimize excessive turnover. The specific factors and weightings used in the model are continually reviewed and evaluated, with modifications introduced when the Sub-Adviser's research indicates that enhancements would be appropriate. The Sub-Adviser may also sell securities for a variety of reasons, such as to secure gains, limit losses, or redeploy assets into opportunities believed to be more promising.

*International Component (ex-U.S.)* The Sub-Adviser will normally invest its international assets in common stocks included in the MSCI EAFE Index. As of September 15, 2005, the MSCI EAFE Index contained securities of issuers located in approximately 22 different countries. As a result, the Sub-Adviser anticipates the Fund's international assets will normally be invested in 10 to 22 different countries in accordance with the Fund's investment strategies. The securities in which the Fund may invest include common stock and securities convertible into common stock. In managing the international component, the Sub-Adviser attempts to achieve the Fund's investment objectives by overweighting those stocks in the MSCI EAFE Index that the Sub-Adviser believes will outperform the index, and underweighting (or avoiding altogether) those stocks that the Sub-Adviser believes will underperform the index. A number of stocks expected to match the return of the index are included for risk control purposes. The Portfolio's aggregate characteristics will seek to approximate that of the index.

The Sub-Adviser expects to start its investment process with the approximately 1,100 stocks that make up the MSCI EAFE Index. The Sub-Adviser applies a liquidity screen to this universe resulting in approximately

## **Table of Contents**

700 potential names. A proprietary stock ranking model then ranks these stocks within 12 EAFE sectors with further subdivisions into 24 industries on the basis of a customized model for each sector. In determining stock weightings, the Sub-Adviser uses proprietary models to evaluate certain criteria, such as cash flows, earnings and price-to-book ratios of each company, in an attempt to select companies with long-term sustainable growth characteristics at acceptable valuation levels and constructing a portfolio with approximate country-, sector- and industry-neutrality and the desired risk level.

*Options Strategy.* The Fund's principal options activity will consist of writing (selling) index call options on selected indices on an amount equal to approximately 60% to 100% of the value of its holdings of common stocks. The Fund seeks to generate gains from the index call option strategy and, to a lesser extent, from dividends on the common stocks held in the Fund's portfolio. The extent of index call option writing activity will depend upon market conditions and the Sub-Adviser's ongoing assessment of the attractiveness of writing index call options on selected indices. Index call options will be written both in exchange-listed option markets and over-the-counter markets with major international banks, broker-dealers and financial institutions.

As the seller of index call options, the Fund will receive cash (the premium) from options purchasers. The purchaser of an index call option has the right to receive from the option seller any appreciation in the value of the index over a fixed price (the exercise price) as of a specified date in the future (the option expiration date). In effect, the Fund sells the potential appreciation in the value of the index above the exercise price during the term of the option in exchange for the premium.

The Fund intends to sell index call options that are both exchange-listed as well as in the over-the-counter (OTC) markets. The Fund may write index call options that are European style, meaning that the options only may be exercised on the expiration date of the option. The Fund also may write index call options that are American style, meaning that the options may be exercised at any point up to and including the expiration date.

Options on an index differ from options on securities because (i) the exercise of an index option requires cash payments and does not involve the actual purchase or sale of securities, (ii) the holder of an index option has the right to receive cash upon exercise of the option if the level of the index upon which the option is based is greater, in the case of a call, or less, in the case of a put, than the exercise price of the option and (iii) index options are designed to reflect price fluctuations in a group of securities or segments of the securities market rather than price fluctuations in a single security.

Prior to expiration, the Fund may close an option position by making an offsetting market purchase of identical option contracts (same type, underlying index, exercise price and expiration). The cost of closing out transactions and payments in settlement of exercised options will reduce the net option premiums available for distribution to Common Shareholders by the Fund. The reduction in net option premiums due to a rise in stock prices should generally be offset, at least in part, by appreciation in the value of the Fund's common stock portfolio.

The principal factors affecting the market value of an option include supply and demand, interest rates, the current market price of the underlying index or security in relation to the exercise price of the option, the actual or perceived volatility of the underlying index or security and the time remaining until the expiration date. The premium received for an option written by the Fund is recorded as an asset of the Fund and its obligation under the option contract as an equivalent liability. The Fund then adjusts over time the liability as the market value of the option changes. The value of each written option will be marked to market daily.

The transaction costs of buying and selling options consist primarily of commissions (which are imposed in opening, closing, exercise and assignment transactions), but may also include margin and interest costs in particular transactions. The impact of transaction costs on the

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

profitability of a transaction may often be greater for options transactions than for transactions in the underlying indices or securities because these costs are often greater in relation to options premiums than in relation to the cash value of the indices or the prices of

## Table of Contents

underlying securities. Transaction costs may be especially significant in option strategies calling for multiple purchases and sales of options, such as spreads or straddles. Transaction costs may be different for transactions effected in foreign markets than for transactions effected in U.S. markets. Transaction costs associated with the Fund's options strategy will vary depending on market circumstances and other factors.

The Sub-Adviser does not intend to write (sell) call options on equity indices where at the time the options were written the underlying values of the indices exceed the net asset value of the Fund's equity portfolio. For these purposes, the Fund treats options on indices as being written on securities having an aggregate value equal to the face or notional amount of the index subject to the option. The Fund will cover its written equity index call positions by segregating liquid assets in an amount equal to the contract value of the index and/or by entering into offsetting positions (*e.g.*, by purchasing a call option on the same index as the call written where the exercise price of the purchased call is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written, provided the difference is maintained by the Fund in segregated liquid assets in an amount equal to the difference).

Examples of the indices upon which the Fund may write options include (but are not limited to) the S&P 500 Index, the MSCI EAFE Index, the FTSE 100 Index, the Topix Index and the EuroSTOXX 50 Index. The Fund will generally write (sell) index call options that are out-of-the-money or at-the-money at the time of sale. In addition to providing possible gains from premiums received, out-of-the-money index call options allow the Fund to potentially benefit from appreciation in the equities held by the Fund with respect to which the option was written, to the extent the Fund's equity portfolio is correlated with the applicable index, up to the exercise price. The Fund may sell index call options that are near-to-the-money (*i.e.*, the exercise price generally will be within a close range above or below the current level of the cash value of the index). The Fund also reserves the right to sell index call options that are in-the-money. When the prices of the equity index upon which a call option is written rise, call options that were out-of-the-money when written may become in-the-money (*i.e.*, the cash value of the index rises above the exercise price of the option), thereby increasing the likelihood that the options will be exercised and the Fund will be forced to pay the amount of appreciation over the strike price upon the purchaser's exercise of the option. The premium, the exercise price and the market value of the index determine the gain or loss realized by the Fund as the seller of an index call option.

The Sub-Adviser will seek to maintain for the Fund written call options positions on equity indices whose price movements, taken in the aggregate, are correlated with the price movements of the common stocks and other securities held in the Fund's equity portfolio. To the extent that there is a lack of correlation, movements in the indices underlying the options positions may result in losses to the Fund, which may more than offset any gains received by the Fund from the receipt of options premiums. The Fund cannot guarantee that the index call option strategy will be effective. The Fund may also write index call options with different characteristics and managed differently than described above.

If an option written by the Fund expires unexercised, the Fund realizes on the expiration date a capital gain equal to the premium received by the Fund at the time the option was written. If an option written by the Fund is exercised, the Fund realizes on the expiration date a capital gain if the cash payment made by the Fund upon exercise is less than the premium received from writing the option and a capital loss if the cash payment made is more than the premium received. If a written option is repurchased, the Fund realizes upon the closing purchase transaction a capital gain if the cost of the closing option is less than the premium received from writing the option and a capital loss if the cost of the closing option is more than the premium received.

The Sub-Adviser believes that a strategy of owning a diversified portfolio of common stocks and selling index call options can provide current income and gains and attractive risk-adjusted returns. The Sub-Adviser further believes that a strategy of owning a portfolio of common stocks in conjunction with writing index call options may provide returns that are superior to owning the same stocks without an associated call option writing program under three different stock market scenarios: (1) down-trending equity markets; (2) flat market

## **Table of Contents**

conditions; and (3) moderately rising equity markets. In the Sub-Adviser's opinion, in more strongly rising equity markets this strategy generally may be expected to underperform the stock-only portfolio.

In addition to the intended strategy of selling index call options, the Fund may write call options on individual securities and purchase put options on indices and may invest in other derivative instruments acquired for hedging, risk management and investment purposes to gain or reduce exposure to securities, securities markets, markets indices and/or currencies consistent with its investment objectives and strategies, provided that such derivative instruments are acquired to enable the Fund to protect against a decline in its assets or its ability to pay dividends. Derivative instruments may be used by the Fund to enhance returns or as a substitute for the purchase or sale of securities. Derivatives can be illiquid, may disproportionately increase losses and have a potentially large negative impact on the Fund's performance. The Fund may enter into foreign currency exchange transactions or other derivatives to hedge currency risk or gain exposure to a currency. Initially, the Sub-Adviser intends to enter into foreign currency exchange transactions on behalf of the Fund with respect to substantially all of the Fund's international equity investments in an attempt to hedge against decreases in the values of the Fund's international equities and potentially help stabilize the Fund's net asset value. The Fund's ongoing use of foreign currency exchange transactions will be based on the Sub-Adviser's ongoing assessment of the Fund's need for such transactions and market conditions. These investment techniques are not expected to be a primary strategy for the Fund.

## **Other Investment Policies**

In addition to its primary investment policies, the Fund may engage in the following investment practices to a limited extent. The Fund may invest in the aggregate up to 20% of its managed assets in all investments described below. See Additional Investment Policies and Restrictions in the SAI for more information regarding the Fund's investment restrictions.

*Preferred Stocks.* Preferred stock, like common stock, represents an equity ownership in an issuer. Generally, preferred stock has a priority of claim over common stock in dividend payments and upon liquidation of the issuer. Unlike common stock, preferred stock does not usually have voting rights. Preferred stock in some instances is convertible into common stock. Although they are equity securities, preferred stocks have certain characteristics of both debt and common stock. They are debt-like in that their promised income is contractually fixed. They are common stock-like in that they do not have rights to precipitate bankruptcy proceedings or collection activities in the event of missed payments. Furthermore, they have many of the key characteristics of equity due to their subordinated position in an issuer's capital structure and because their quality and value are heavily dependent on the profitability of the issuer rather than on any legal claims to specific assets or cash flows. The Fund will only invest in preferred stocks that are rated investment grade at the time of investment or, if unrated, determined by the Sub-Adviser to be of comparable quality. Standard & Poor's Ratings Group and Fitch Ratings consider securities rated BBB- and above to be investment grade and Moody's Investors Service, Inc. considers securities rated Baa3 and above to be investment grade.

*Warrants.* The Fund may invest in equity and index warrants of domestic and international issuers. Equity warrants are securities that give the holder the right, but not the obligation, to subscribe for equity issues of the issuing company or a related company at a fixed price either on a certain date or during a set period. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments. The sale of a warrant results in a long- or short-term capital gain or loss depending on the period for which a warrant is held.

*Convertible Securities.* Convertible securities are debt securities that may be converted at either a stated price or stated rate into underlying shares of common stock. Convertible securities have general

## **Table of Contents**

characteristics similar to both debt securities and equity securities. The Fund may invest in preferred stocks and fixed-income obligations that are convertible into common stocks of domestic and foreign issuers, and bonds issued as a unit with warrants. Convertible securities generally enable an investor to benefit from increases in the market price of the underlying common stock. Convertible securities often provide higher yields than the underlying equity securities, but generally offer lower yields than non-convertible securities of similar quality. The value of convertible securities fluctuates in relation to changes in interest rates like bonds, and, in addition, fluctuates in relation to changes in the price of the underlying common stock.

*Short Sales.* The Fund may sell a security short if it owns at least an equal amount of the security sold short or another security convertible or exchangeable for an equal amount of the security sold short without payment of further compensation (a short sale against-the-box). In a short sale against-the-box, the short seller is exposed to the risk of being forced to deliver stock that it holds to close the position if the borrowed stock is called in by the lender, which would cause gain or loss to be recognized on the delivered stock. The Fund expects normally to close its short sales against-the-box by delivering newly acquired stock.

The ability to use short sales against-the-box as a tax-efficient management technique with respect to holdings of appreciated securities is limited to circumstances in which the hedging transaction is closed out not later than thirty days after the end of the Fund's taxable year in which the transaction was initiated, and the underlying appreciated securities position is held unhedged for at least the next sixty days after the hedging transaction is closed. Not meeting these requirements would trigger the recognition of gain on the underlying appreciated securities position under the federal tax laws applicable to constructive sales.

*Temporary Investments.* The Fund may invest in cash equivalents or highly liquid, short-term securities such as commercial paper, time deposits, certificates of deposit, short-term notes and short-term U.S. government obligations. During unusual market circumstances, the Fund may temporarily invest a substantial portion of its assets in cash or cash equivalents, which may be inconsistent with the Fund's investment objectives. In moving to a substantial temporary investments position and in transitioning from such a position back into full conformity with the Fund's normal investment objectives and policies, the Fund may incur transaction costs that would not be incurred if the Fund had remained fully invested in accordance with such normal policies. The transition to and back from a substantial temporary investments position may also result in the Fund having to sell common stocks and/or close out options positions and then later purchase common stocks and open new options positions in circumstances that might not otherwise be optimal.

*When-Issued Securities and Forward Commitments.* Securities may be purchased on a forward commitment or when-issued basis (meaning securities are purchased or sold with payment and delivery taking place in the future) in order to secure what is considered to be an advantageous price and yield at the time of entering into the transaction. However, the return on a comparable security when the transaction is consummated may vary from the return on the security at the time that the forward commitment or when-issued transaction was made. From the time of entering into the transaction until delivery and payment is made at a later date, the securities that are the subject of the transaction are subject to market fluctuations. In forward commitment or when-issued transactions, if the seller or buyer, as the case may be, fails to consummate the transaction, the counterparty may miss the opportunity of obtaining a price or yield considered to be advantageous. Forward commitment or when-issued transactions may occur a month or more before delivery is due. However, no payment or delivery is made until payment is received or delivery is made from the other party to the transaction. Forward commitment or when-issued transactions will not be entered into for the purpose of investment leverage.

*Illiquid Securities.* The Fund may invest up to 15% of its managed assets in restricted and illiquid securities. For this limit, a security is considered illiquid if it cannot be disposed of in seven days at approximately the price at which the Fund carries the security on its books. In the case of exchange-traded options or options written in the over-the-counter markets, an option will be considered illiquid by the Fund if it cannot be closed in seven days. Illiquid securities may also include securities legally restricted as to resale, such as commercial paper issued pursuant to Section 4(2) of the Securities Act of 1933, as amended, and securities

## **Table of Contents**

eligible for resale pursuant to Rule 144A thereunder. Section 4(2) and Rule 144A securities may, however, be treated as liquid by the Adviser pursuant to procedures adopted by the Board, which require consideration of factors such as trading activity, availability of market quotations and number of dealers willing to purchase the security. If the Fund invests in Rule 144A securities, the level of portfolio illiquidity may be increased to the extent that eligible buyers become uninterested in purchasing such securities. Restricted securities are typically valued at prices lower than the unrestricted securities of the same issuer.

It may be difficult to sell illiquid securities at a price representing their fair value until such time as such securities may be sold publicly. Where registration is required, a considerable period may elapse between a decision to sell the securities and the time when it would be permitted to sell. Thus, the Fund may not be able to obtain as favorable a price as that prevailing at the time of the decision to sell. The Fund may also acquire securities through private placements under which it may agree to contractual restrictions on the resale of such securities. Such restrictions might prevent their sale at a time or price when such sale would otherwise be desirable. The Fund's policy on liquidity of options varies from the position used by open-end funds in that the Fund relies on the ability to close an over-the-counter option on the market, whereas over-the-counter options and the securities on which they are written are generally treated as illiquid by open-end funds. As a result, the Fund may invest a greater portion of its assets in options traded over-the-counter than could an open-end fund.

*Securities Lending.* The Fund may seek to earn income by lending portfolio securities to broker-dealers or other institutional borrowers. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the securities loaned if the borrower of the securities fails financially. Loans will be made only to organizations whose credit quality or claims paying ability is considered by the Sub-Adviser to be at least investment grade and when the expected returns, net of administrative expenses and any finders' fees, justifies the attendant risk. Securities loans currently are required to be secured continuously by collateral in cash, cash equivalents (such as money market instruments) or other liquid securities held by the custodian and maintained in an amount at least equal to the market value of the securities loaned. The financial condition of the borrower will be monitored by the Adviser on an ongoing basis. The Fund will not lend portfolio securities subject to a written American style covered call option contract. The Fund may lend portfolio securities subject to a written European style covered call option contract as long as the lending period is less than or equal to the term of the covered call option contract.

*Borrowings.* The Fund may borrow money to the extent permitted under the 1940 Act as interpreted, modified or otherwise permitted by the regulatory authority having jurisdiction. Although there is no current intention to do so, the Fund may in the future from time to time borrow money to add leverage to the portfolio. The Fund may also borrow money for temporary administrative purposes.

*Other Investment Companies.* The Fund may invest up to 10% of its managed assets in securities of other open- or closed-end investment companies, including exchange-traded funds (ETFs) that invest primarily in securities of the types in which the Fund may invest directly. In addition, the Fund may invest a portion of its managed assets in pooled investment vehicles (other than investment companies) that invest primarily in securities of the types in which the Fund may invest directly. The Fund generally expects that it may invest in other investment companies and/or pooled investment vehicles either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the Offering, or during periods when there is a shortage of attractive securities of the types in which the Fund may invest directly available in the market. As an investor in an investment company, the Fund will bear its pro rata share of that investment company's expenses and would remain subject to payment of that investment company's advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. The Sub-Adviser will take expenses into account when evaluating the investment merits of an investment in another investment company relative to available securities of the types in which the Fund may invest directly. In addition, the securities of other investment companies may be leveraged and therefore will be subject to the same leverage risks described herein.

**Table of Contents**

*Portfolio Turnover.* The Fund will buy and sell securities to seek to accomplish its investment objectives. Portfolio turnover generally involves some expense to the Fund, including brokerage commissions and other transaction costs on the purchase and sale of securities and reinvestment in other securities. Higher portfolio turnover may decrease the after-tax return to Common Shareholders to the extent it results in a decrease of the long-term capital gains portion of distributions to Common Shareholders. Although the Fund cannot accurately predict its portfolio turnover rate, under normal market conditions it expects to maintain relatively low core turnover of its stock portfolio, not considering purchases and sales of common stocks and options in connection with the Fund's options program. On an overall basis, the Fund's annual turnover rate may exceed 100%. A high turnover rate (100% or more) necessarily involves greater trading costs to the Fund and may result in greater realization of taxable capital gains.

**Table of Contents**

**RISKS**

Risk is inherent in all investing. The following discussion summarizes some of the risks that you should consider before deciding whether to invest in the Fund. For additional information about the risks associated with investing in the Fund, see Additional Investment Policies and Restrictions in the SAI.

**No Prior History**

The Fund is a newly organized, diversified, closed-end management investment company with no history of operations or public trading of its Common Shares.

**Market Discount Risk**

Shares of closed-end management investment companies frequently trade at a discount from their net asset value, and the Fund's Common Shares may likewise trade at a discount from net asset value. The trading price of the Fund's Common Shares may be less than the public offering price. The returns earned by holders of Common Shares who purchased their Common Shares in this offering and sell their Common Shares below net asset value will be reduced.

**Investment and Market Risk**

An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of all or a portion of the amount invested. An investment in the Fund's Common Shares represents an indirect investment in the securities owned by the Fund, which are generally traded on a securities exchange or in the over-the-counter markets. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably. In addition, by writing (selling) call options on indices, capital appreciation potential may be limited. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account any reinvestment of distributions. Market risk is the risk that securities may decline in value due to factors affecting securities markets generally or particular industries.

**Issuer Risk**

The value of securities held by the Fund may decline for a number of reasons that directly relate to the issuer, such as changes in the financial condition of the issuer, management performance, financial leverage and reduced demand for the issuer's goods and services. The amount of dividends paid may decline for reasons that relate to an issuer, such as changes in an issuer's financial condition or a decision by the issuer to pay a lower dividend.

**Equity Risk**

The net asset value ( NAV ) of the Fund's Common Shares will change as the prices of its portfolio investments go up or down. Equity securities face market, issuer and other risks, and their prices may go up or down, sometimes rapidly and unpredictably.

The Fund will invest primarily in common stocks of large-cap and mid-cap companies, which sometimes have more stable prices than smaller companies. Although common stocks historically have generated higher average returns than fixed-income securities, common stocks also have experienced significantly more volatility in those returns. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by the Fund. Also, prices of common stocks are sensitive to general movements in the stock market and a drop in the stock market may depress the prices of common stocks held by the Fund or to which it has exposure.

## **Table of Contents**

### **Risks of Small-Cap and Mid-Cap Companies**

The Fund may invest in companies whose market capitalization is considered small sized or small-cap as well as mid-cap companies. These companies often are newer or less established companies than larger companies. Investments in these companies carry additional risks because earnings of these companies tend to be less predictable; they often have limited product lines, markets, distribution channels or financial resources; and the management of such companies may be dependent upon one or a few key people. The market movements of equity securities of small-cap and mid-cap companies may be more abrupt or erratic than the market movements of equity securities of larger, more established companies or the stock market in general. Historically, small-cap and mid-cap companies have sometimes gone through extended periods when they did not perform as well as larger companies. In addition, equity securities of these companies generally are less liquid than those of larger companies. This means that the Fund could have greater difficulty selling such securities at the time and price that the Fund would like.

### **Options Related Risk**

*Index Call Option Risk.* The purchaser of the index call option written (sold) has the right to any appreciation in the cash value of the index over the exercise price up to and including the expiration date. Therefore, as the writer of an index call option, the Fund forgoes, during the term of the option, the opportunity to profit from increases in the market value of the equity securities held by the Fund with respect to which the option was written (to the extent that their performance is correlated with that of the index) above the sum of the premium and the exercise price of the call option. However, the Fund has retained the risk of loss (net of premiums received) should the prices of the Fund's portfolio securities decline. Because the exercise of index options is settled in cash, sellers of index call options, such as the Fund, cannot provide in advance for their potential settlement obligations by acquiring and holding the underlying securities. The value of index options written by the Fund, which will be priced daily, will be affected by changes in the value of and dividend rates of the underlying common stocks in the index, changes in the actual or perceived volatility of the stock market and the remaining time to the options' expiration. The value of the index options also may be adversely affected if the market for the index options becomes less liquid or smaller.

The Fund intends to mitigate the risks of its written index call positions by seeking to maintain for the Fund written (sold) call options positions on equity indexes whose price movements, taken in the aggregate, are correlated with the price movements of the common stocks and other securities held in the Fund's equity portfolio. In doing so, the Sub-Adviser will consider data relating to the Fund's equity holdings, including net assets, industry and sector weightings, and historic volatility. In addition, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. To the extent that there is a lack of correlation, movements in the indices underlying the options positions may result in losses to the Fund, which may more than offset any gains received by the Fund from the receipt of options premiums. In these and other circumstances, the Fund may be required to sell portfolio securities to satisfy its obligations as the writer of an index call option when it would not otherwise choose to do so, or the Fund may choose to sell portfolio securities to realize gains to supplement Fund distributions. Such sales would involve transaction costs borne by the Fund and may also result in realization of taxable capital gains, including short-term capital gains taxed at ordinary income tax rates, and may adversely impact the Fund's after-tax returns.

*Other Related Risk.* There are numerous risks associated with transactions in options. A decision as to whether, when and how to use index call options, covered call options and put options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. As the writer of a covered call option, the Fund forgoes, during the covered call option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the option premium received and the exercise price of the covered call option, but has retained the risk of loss, minus the option premium received, should the price of the underlying security decline. The writer

## **Table of Contents**

of an American-style option has no control over when during the exercise period of the option it may be required to fulfill its obligation as a writer of the option. This does not apply for European-style options, which may only be exercised at termination. Once an option writer has received an exercise notice for an American-style option, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must either close out the position with a cash settlement or deliver the underlying security at the exercise price. Thus, the use of options may require the Fund to sell portfolio securities at inopportune times or for prices other than current market values, will limit the amount of appreciation the Fund can realize above the exercise price of an option on a common stock, or may cause the Fund to hold a security that it might otherwise sell.

The Fund intends to primarily write over-the-counter options, however, the Fund may write call options that are exchange-traded. The Fund's ability to terminate over-the-counter options may be more limited than with exchange-traded options and may involve the risk that banks, broker-dealers or other financial institutions participating in such transactions will not fulfill their obligations. If the Fund were unable to close out a covered call option that it had written on a common stock, it would not be able to sell the underlying common stock unless the option expired without exercise. The value of options may also be adversely affected if the market for such options becomes less liquid or smaller. There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position either, in the case of a covered call option written, by buying the option, or, in the case of a purchased put option, by selling the option. Exchange-traded options may also be illiquid. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation ( OCC ) may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options). If trading on an exchange were discontinued, the secondary market on that exchange (or in that class or series of options) would cease to exist. However, outstanding options on that exchange that had been issued by the OCC as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

The hours of trading for listed or over-the-counter options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that would not be reflected concurrently in the options markets. Call options are marked to market daily at 4:00 p.m. Eastern time, and their value will be affected by changes in the value of and dividend rates of the underlying common stocks, changes in interest rates, changes in the actual or perceived volatility of the stock market and the underlying common stocks and the remaining time to the options expiration. Additionally, the exercise price of an option may be adjusted downward before the option's expiration as a result of the occurrence of certain corporate events affecting the underlying equity security, such as extraordinary dividends, stock splits, mergers or other extraordinary distributions or events. A reduction in the exercise price of an option may reduce the Fund's capital appreciation potential on the underlying security.

When the Fund purchases put options, the Fund will be subject to additional risks. A put option acquired by the Fund and not sold prior to expiration will expire worthless if the price of the stock or index at expiration exceeds the exercise price of the option, thereby causing the Fund to lose its entire investment in the option. If restrictions on exercise were imposed, the Fund might be unable to exercise an option it had purchased. If the Fund were unable to close out an option that it had purchased, it would have to exercise the option in order to realize any profit or the option may expire worthless. Stock market indices on which the Fund may purchase options positions likely will not mirror the Fund's actual portfolio holdings. The effectiveness of index put options as hedges against declines in the Fund's stock portfolio will be limited to the extent that the performance of the underlying index does not correlate with that of the Fund's holdings.

## **Table of Contents**

### **Foreign Investment and Emerging Markets Risk**

The Fund will invest in a portfolio of global common stocks and may invest up to 20% of its managed assets in securities issued by companies located in countries with emerging markets. Foreign (non-U.S.) investments may be subject to greater risk than U.S. investments for many reasons, including changes in currency exchange rates and unstable political, social and economic conditions, which may significantly disrupt the financial markets or interfere with the Fund's ability to enforce its rights against foreign government issuers. Foreign (non-U.S.) investments may also be subject to the risks of a lack of adequate or accurate company information, smaller, less liquid and more volatile securities markets, less secure foreign banks or securities depositories than those in the U.S. and foreign controls on investment and currency transfers. Because of less developed markets and economies, foreign investments may have less liquidity and increased price volatility. In some countries, less mature governments and governmental institutions may potentially lead to greater risks of expropriation, confiscatory taxation and national policies that may restrict the repatriation of cash or the Fund's investments in general. The risks of investing in foreign securities can be intensified in the case of investments in issuers located in countries with emerging markets. Investments in foreign issuers may also decrease the Fund's ability to borrow against its assets.

### **Foreign (non-U.S.) Currency Risk**

The Fund's Common Shares are priced in U.S. dollars and the distributions paid by the Fund are paid in U.S. dollars. However, a significant portion of the Fund's assets may be denominated in foreign (non-U.S.) currencies. There is the risk that the value of such assets and/or the value of any distributions from such assets may decrease if the currency in which such assets are priced or in which they make distributions falls in relation to the value of the U.S. dollar. The Fund is not required to hedge its foreign currency risk, although it may do so through foreign currency exchange contracts and other methods. Therefore, to the extent the Fund does not hedge its foreign currency risk, the value of the Fund's assets and income could be adversely affected by currency exchange rate movements.

### **Derivatives Risk**

In addition to writing index call options, covered call options and purchasing put options, the risks of which are described above, the Fund may invest in a variety of derivative instruments for hedging, risk management or investment purposes. Derivatives can be illiquid, may disproportionately increase losses and have a potentially large negative impact on the Fund's performance. Derivative transactions, including options on securities and securities indices and other transactions in which the Fund may engage (such as futures contracts and options thereon, swaps and short sales), may subject the Fund to increased risk of principal loss due to unexpected movements in stock prices, changes in stock volatility levels and interest rates and imperfect correlations between the Fund's securities holdings and indices upon which derivative transactions are based. The Fund also will be subject to credit risk with respect to the counterparties to any over-the-counter derivatives contracts purchased by the Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

### **Interest Rate Risk**

The level of premiums from index call option writing and the amounts available for distribution from the Fund's options activity may decrease in declining interest rate environments. The value of the Fund's common stock investments may also be influenced by changes in interest rates. When interest rates rise, the market value of certain of such securities may fall. Interest rates are currently low relative to historic levels. During periods of declining interest rates, an issuer of preferred stock may exercise its option to redeem securities prior to maturity, forcing the Fund to

reinvest in lower yielding securities. This is known as call risk.

## **Table of Contents**

During periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected payments. This may lock in a below market yield, increase the security's duration, and reduce the value of the security. This is known as extension risk.

### **Restricted and Illiquid Securities Risk**

The Fund may invest up to 15% of its managed assets in restricted and illiquid securities. For this limit, a security is considered illiquid if it cannot be disposed of in seven days at approximately the price at which the Fund carries the security on its books. In the case of exchange-traded options or options written in the over-the-counter markets, an option will be considered illiquid by the Fund if it cannot be closed in seven days. The Fund may not be able to sell an illiquid security at a favorable time or price and thereby decrease the Fund's overall liquidity. Further, the lack of an established secondary market may make it more difficult to value illiquid securities, which may negatively impact the price the Fund would receive upon disposition. The Fund's policy on liquidity of options varies from the position used by open-end funds in that the Fund relies on the ability to close an over-the-counter option on the market, whereas over-the-counter options and the securities on which they are written are generally treated as illiquid by open-end funds. As a result, the Fund may invest a greater portion of its assets in options traded over-the-counter than could an open-end fund.

### **Distribution Risk**

The Fund's ability to pay distributions varies widely over the short- and long-term. If stock prices or stock market volatility declines, the level of premiums from writing index call options and the amounts available for distribution from options activity will likely decrease as well. Payments to close out written call options will reduce amounts available for distribution from call option premiums received. Net realized and unrealized gains on the Fund's stock investments will be determined primarily by the direction and movement of the relevant stock market (and the particular stocks held). Dividends on common stocks are not fixed but are declared at the discretion of the issuer's board of directors. There can be no assurance that quarterly distributions paid by the Fund to the Common Shareholders will be maintained at initial levels or increase over time.

### **Tax Risk**

The Fund intends to elect to be treated and to qualify each year as a regulated investment company (RIC) under Subchapter M of Chapter 1 of the Internal Revenue Code of 1986, as amended (the Code). If the Fund qualifies as a RIC and meets certain source of income, asset diversification, and distribution requirements, the Fund will not be subject to corporate-level income tax on income timely distributed to Common Shareholders as dividends. If the Fund fails to qualify as a RIC or otherwise fails to satisfy the source of income, asset diversification, or distribution requirements, the Fund would be required to pay corporate-level taxes on all of its income whether or not we distribute it, which would substantially reduce the amount of income available for distribution to Common Shareholders. The tax treatment and characterization of the Fund's distributions may change over time due to changes in the Fund's mix of investment returns and changes in the federal tax laws, regulations and administrative and judicial interpretations. Distributions paid on the Common Shares may be characterized variously as net investment income, capital gains dividends or return of capital. The ultimate tax characterization of the Fund's distributions made in a calendar year cannot finally be determined until after the end of that calendar year. See Tax Matters.

### **Preferred Stock Risk**

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

Preferred stock, unlike common stock, offers a stated dividend rate payable from a corporation's earnings. Such preferred stock dividends may be cumulative or non-cumulative, participating, or auction rate. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. Dividends on some preferred stock

## **Table of Contents**

may be cumulative, requiring all or a portion of prior unpaid dividends to be paid before dividends are paid on the issuer's common stock. Preferred stock also generally has a preference over common stock on the distribution of a corporation's assets in the event of liquidation of the corporation, and may be participating, which means that it may be entitled to a dividend exceeding the stated dividend in certain cases. The rights of preferred stock on the distribution of a corporation's assets in the event of a liquidation are generally subordinate to the rights associated with a corporation's debt securities.

## **Convertible Securities Risk**

Convertible securities are securities that may be converted either at a stated price or at a stated rate within a specified period of time into a specified number of shares of common stock. By investing in convertible securities, the Fund seeks the opportunity, through the conversion feature, to participate in the capital appreciation of the common stock into which the securities are convertible, while investing at a better price than may be available on the common stock or obtaining a higher fixed rate of return than is available on common stocks.

The market value of convertible debt securities tends to vary inversely with the level of interest rates. The value of the security declines as interest rates increase and increases as interest rates decline. Although under normal market conditions longer-term convertible debt securities have greater yields than do shorter-term convertible debt securities of similar quality, they are subject to greater price fluctuations.

A convertible security may be subject to redemption at the option of the issuer at a price established in the instrument governing the convertible security. If a convertible security held by the Fund is called for redemption, the Fund must permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party.

## **Management Risk**

The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Adviser and the individual portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. Although the Sub-Adviser has a wide range of experience in managing funds or accounts that utilize (1) the strategy of investing in active portfolios of U.S. and international equity securities and (2) strategies involving options, including the writing of call options on selected securities indices, it does not have experience with funds or accounts in which these strategies are combined as described in this prospectus. While the Sub-Adviser has developed its approach through the testing of models in different market environments, investors bear the risk that the combination of strategies has not been tested in actual funds or accounts, and has not been utilized in various market cycles.

## **Leverage Risk**

Although the Fund has no current intention to do so, the Fund is authorized to utilize leverage through the issuance of preferred shares and/or borrowings, including the issuance of debt securities. In the event that the Fund determines in the future to utilize investment leverage, there can be no assurance that such a leveraging strategy will be successful during any period in which it is employed. Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares and the risk that fluctuations in distribution rates on any preferred shares issued by the Fund or fluctuations in borrowing costs may affect the return to Common Shareholders. To the extent the income derived from securities purchased with proceeds received from leverage exceeds the cost of leverage, the Fund's distributions will be greater than if leverage had not been used. Conversely, if the income from the securities purchased with such

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

proceeds is not sufficient to cover the cost of leverage, the amount available for distribution to Common Shareholders will be less than if leverage had not been used. In the latter case, ING Investments, in

## **Table of Contents**

its best judgment, may nevertheless determine to maintain the Fund's leveraged position if it deems such action to be appropriate. The costs of an offering of preferred shares and/or a borrowing program would be borne by Common Shareholders and consequently would result in a reduction of the net asset value of Common Shares. In addition, the fee paid to ING Investments and ING IM will be calculated on the basis of the Fund's average daily managed assets, including proceeds from the issuance of preferred shares and/or borrowings, so the fees will be higher when leverage is utilized. In this regard, holders of preferred shares do not bear the investment advisory fee. Rather, Common Shareholders bear the portion of the investment advisory fee attributable to the assets purchased with the proceeds of the preferred shares offering.

## **Securities Lending Risk**

To seek to generate additional income, the Fund may lend portfolio securities in an amount equal to up to 33.3% of the Fund's managed assets. The Fund intends to engage in lending portfolio securities only when such lending is fully secured by investment grade collateral held by an independent agent. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower default or fail financially. In addition, there is the risk that, when lending portfolio securities, the securities may not be available to the Fund on a timely basis and the Fund may, therefore, lose the opportunity to sell the securities at a desirable price. In addition, securities lending is subject to counterparty risk.

## **Market Disruption and Geo-Political Risk**

The aftermath of the war with Iraq, the continuing occupation of Iraq, instability in the Middle East and terrorist attacks in the United States and around the world have had a substantial impact on the U.S. and world economies and securities markets. The nature, scope and duration of the war and the occupation cannot be predicted with any certainty. Terrorist attacks closed some of the U.S. securities markets in 2001, and similar events cannot be ruled out in the future. The war and occupation, terrorism and related geopolitical risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. These risks could also adversely affect individual issuers and securities markets, interest rates, secondary trading, ratings, investor psychology, credit risk, inflation and other factors relating to the Common Shares and the investments made by the Fund.

## **Anti-Takeover Provisions**

The Fund's Declaration of Trust, as amended, includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the holders of Common Shares of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust.

## **Dividend Risk**

Companies that issue dividend yielding equity securities are not required to continue to pay dividends on such stock. Therefore, there is the possibility that such companies could reduce or eliminate the payment of dividends in the future. In such an event, the yield on the Fund's dividend yielding equity securities would be adversely affected.

**Temporary Defensive Strategies Risk**

When the Sub-Adviser anticipates unusual market or other conditions, the Fund may temporarily depart from its principal investment strategies as a defensive measure. To the extent that the Fund invests defensively, it likely will not achieve its investment objectives.

**Table of Contents**

**MANAGEMENT OF THE FUND**

**Board of Trustees**

The business and affairs of the Fund, including supervision of the duties performed by the Fund's Adviser and Sub-Adviser are managed under the direction of its Board of Trustees. The names and business addresses of the Trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under Management of the Fund in the SAI.

**Investment Advisers**

ING Investments, an Arizona limited liability company, serves as the investment adviser to the Fund and has overall responsibility for the management of the Fund under the general supervision of the Fund's Board of Trustees. ING Investment's principal business address is 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258.

The Fund and ING Investments have entered into an Investment Management Agreement that requires ING Investments to provide investment advisory and portfolio management services for the Fund. The agreement with ING Investments may be cancelled by the Board of Trustees or the Fund's shareholders upon 60 days' written notice. Under the agreement, ING Investments bears its expenses of providing the services described above in exchange for an annual fee. For its services including supervising the Sub-Adviser, ING Investments will receive an annual fee, payable monthly, in an amount equal to 0.75% of the Fund's managed assets. Option contracts written (sold) by the Fund are recorded as liabilities, while option contracts purchased by the Fund are recorded as assets. As the net aggregate value of the option contracts written by the Fund increases, the liability related to those contracts increases, thereby reducing the managed assets of the Fund and decreasing the management fee payable to the Adviser. Conversely, as the net aggregate value of the option contracts purchased by the Fund increases, the asset related to those contracts increases, thereby increasing the managed assets of the Fund and increasing the management fee payable to the Adviser. The Adviser has entered into a written Expense Limitation Agreement with the Fund under which it will limit the expenses of the Fund, excluding interest, taxes, leverage expenses, brokerage and extraordinary expenses to 1.00% of average net assets. The Adviser may at a later day recoup from the Fund fees waived and other expenses assumed by the Adviser during the previous 36 months, but only if, after such reimbursement, the Fund's expense ratio does not exceed the percentage described above. The Expense Limitation Agreement is contractual and shall renew automatically for one-year terms unless ING Investments provides written notice of the termination within 90 days of the end of the then current term.

ING Investments is registered as an investment adviser with the SEC. ING Investments began investment management in 1995, and serves as an investment adviser to registered investment companies as well as structured finance vehicles. As of June 30, 2005, ING Investments had assets under management of over \$39 billion. ING Investments is an indirect, wholly owned subsidiary of ING Groep. ING Groep is one of the largest financial services organizations in the world with approximately 113,000 employees. Based in Amsterdam, ING Groep offers an array of banking, insurance and asset management services to both individual and institutional investors.

ING Investments has engaged ING Investment Management Co. (ING IM or Sub-Adviser), a Connecticut corporation, to manage the assets of each Fund in accordance with the Funds investment objective and policies, subject to oversight by ING Investments and the Board. Founded in 1972, ING IM is registered with the SEC as an investment adviser. ING IM has acted as adviser or sub-adviser to mutual funds since 1994 and has managed institutional accounts since 1972. ING IM is an indirect, wholly-owned subsidiary of ING Groep N.V. and is an affiliate of ING Investments. As of June 30, 2005, ING IM managed over \$57 billion in assets. The principal office of ING IM is 230 Park Avenue, New York, NY 10169. For its services, ING IM will receive a sub-advisory fee equal to 0.6375% of the Fund's average daily managed assets from ING

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

Investments. No advisory fee will be paid by the Fund directly to ING IM. See Management of the Fund.

## **Table of Contents**

### **Investment Management Teams**

Set forth below is information regarding the members of the investment teams that are primarily responsible for the management of the Fund's portfolio. The teams consist of investment professionals with a variety of specializations. It is expected that each investment management team member listed below will play a role in the management of the Fund's portfolio from the inception of the Fund under the leadership of Hugh Whelan.

### **Overall Strategy and Asset Allocation**

*Hugh Whelan.* Mr. Whelan is a senior portfolio manager and director of quantitative equity strategies. Mr. Whelan will be primarily responsible for the overall structure of the Fund, the asset allocation between domestic and global investments and any currency hedging implemented by the Sub-Adviser. He has over 15 years of investment management experience. Mr. Whelan joined the firm in 1989 as an investment associate in the private finance group. Prior to assuming his current position in 1992, he was a quantitative portfolio manager and analyst in ING's fixed income group, specializing in corporate securities. Mr. Whelan earned his Bachelors of Science degree in geology and Master of Science degree in petroleum geology from Stanford University and M.B.A. from the University of Pennsylvania's Wharton School. Mr. Whelan also holds the Chartered Financial Analyst designation.

### **U.S. Equity Component**

*Mary Ann Fernandez.* Ms. Fernandez is a senior portfolio specialist for ING IM. Ms. Fernandez will be jointly and primarily responsible with Mr. Whelan for the structure and strategy implementation of the Fund's U.S. domestic common stock portfolio. She has over 20 years of investment management experience. Prior to her current role, Ms. Fernandez was chief operating officer for the institutional marketing and sales group and portfolio manager in the fixed income group. She joined ING in 1996 as vice president of product development, which included structuring CBOs. Previously she worked in several investment departments within Aetna. Ms. Fernandez received both a B.S. in microbiology and M.B.A. from the University of Massachusetts and holds the Chartered Financial Analyst designation.

### **Domestic Option Strategy**

*Paul Zemsky.* Mr. Zemsky is currently Head of Derivative Strategies for ING IM. Mr. Zemsky, along with Ernie Tang, will be jointly and primarily responsible for the structure and implementation of the Fund's U.S. domestic index option strategy. As Head of Derivative Strategies, Mr. Zemsky oversees derivative strategies for credit, interest rate, and equity products, and supports the organization on a number of key areas, including product development and risk management for both proprietary and third party businesses. This includes hedging and overlay strategies, as well as focusing on new business development opportunities. A key function within his scope of responsibility is developing macro hedging strategies for variable and equity index annuities sold through various ING businesses. Mr. Zemsky joined ING IM in 2005 after 18 years at J.P. Morgan Investment Management, where he held a number of key positions, including having responsibility for the market timing and sector allocation for the firm's fixed income business and handling option trading in both the exchange-traded and over-the-counter markets. Most recently, Mr. Zemsky co-founded CaliberOne Private Funds Management, a macro hedge fund. Mr. Zemsky holds a dual degree in finance and electrical engineering from the Management and Technology Program at the University of Pennsylvania.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

*Ernie Tang.* Mr. Tang joined the Derivatives Team of ING IM in 2001. His current responsibilities include trade executions, research and consulting services to other groups that need derivative expertise. He manages a derivatives portfolio for hedging and replication purposes. The products in this portfolio include equity options and futures; interest rate swaps, swaptions, caps and floors; as well as credit default swaps. Prior to joining ING IM, Mr. Tang helped manage the derivative portfolio for Lincoln National Corporation. Prior to

## **Table of Contents**

that assignment, he worked as an Asset Liability Manager for Lincoln for two and a half years. He was responsible for modeling fixed income securities and derivatives. Before joining Lincoln, he worked for Prudential for six and a half years. He also worked for Blue Cross Blue Shield of Delaware for two and a half years. Mr. Tang has worked in various lines of insurance business Life, Health and Annuity, and has performed different actuarial functions, including pricing, product development, underwriting and financial reporting. He has been a fellow of the Society of Actuaries since 1998. Mr. Tang holds a Master Degree in civil engineering from University of Delaware and he graduated summa cum laude from National Taiwan University with a Bachelor of Science degree.

## **International Equity Component**

*Carl Ghielen.* Mr. Ghielen is Senior Portfolio Manager responsible for the EAFE product strategies. Mr. Ghielen will be jointly and primarily responsible with Martin Jansen for the structure and strategy implementation of the Fund's international common stock portfolio. Mr. Ghielen has been associated with ING since 2000 and has over 14 years of investment experience. Mr. Ghielen started his career as an investment advisor at General Investment Management in Eindhoven, an independent boutique investment manager. Before joining ING he worked for MN Services (one of the largest pension funds in the Netherlands) where he was senior fund manager for European Equity. Mr. Ghielen studied business economics at the Catholic University of Tilburg. He holds a RBA degree (registered investment analyst), a Dutch equivalent to the Chartered Financial Analyst designation.

*Martin Jansen.* Mr. Jansen is Senior Portfolio Manager responsible for the EAFE product strategies. Mr. Jansen has 26 years of investment experience. Mr. Jansen joined ING in 1997 as senior manager to co-manage U.S. equity portfolios and was named head of the U.S. equity team in 1999. Prior to joining ING, he was responsible for the U.S. equity and venture capital portfolios at a large corporate Dutch pension fund. Mr. Jansen received a Bachelor of Commerce and M.B.A. from the University of the Witwatersrand, South Africa.

## **International Option Strategy**

*Bas Peeters, Ph.D.* Dr. Peeters joined ING in 1998. Currently, Dr. Peeters is Head of Structured Products. Dr. Peeters will be primarily responsible for the structure of the Fund's international index option strategy. As Head of Structured Products based in The Hague, The Netherlands, Dr. Peeters is responsible for the research, marketing and portfolio management activities of this department. Previously he was Head of Research Structured Products, where he worked on product development and implementation of structured products research. Until 2001 he also was jointly responsible for portfolio management and derivatives trading. In addition, since 2002 he has carried out research in financial economics at the Free University of Amsterdam. His previous working experience comprises postdoctoral research positions at universities in London and Belgium. Dr. Peeters obtained a Masters degree in theoretical physics (cum laude) from the University of Utrecht in 1990, where he also studied mathematics. Dr. Peeters obtained his Ph.D. in theoretical physics at Stony Brook University, NY, USA in 1995.

*Frank Van Etten.* Mr. Van Etten is currently an Investment Manager of Structured Products and began his career at ING, joining the firm in 2002. Mr. Van Etten will be primarily responsible for implementation of the Fund's international index option strategy. In this capacity he is responsible for managing a range of structured products and the execution of transactions in the derivatives portfolios. Furthermore Mr. Van Etten also carries out research in structured products development and option strategies and markets. Mr. Van Etten obtained his Master's degree in econometrics from Tilburg University in 2003, specializing in quantitative finance.

## **Additional Information Regarding Portfolio Managers**

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund.

## **Table of Contents**

### **The Administrator**

The Administrator of the Fund is ING Funds Services, LLC ( ING Funds Services ). Its principal business address is 7337 East Doubletree Ranch Road, Scottsdale, Arizona 85258. The Administrator is a wholly-owned subsidiary of ING Groep and the immediate parent company of ING Investments.

Under an Administration Agreement between ING Funds Services and the Fund, ING Funds Services administers the Fund's corporate affairs subject to the supervision of the Board of Trustees of the Fund. ING Funds Services also furnishes the Fund with office facilities and furnishes executive personnel together with clerical and certain recordkeeping and administrative services. These services include preparation of annual and other reports to shareholders and to the SEC. ING Funds Services also handles the filing of federal, state and local income tax returns not being furnished by the Custodian or Transfer Agent (as defined below).

The Administration Agreement also requires ING Funds Services to assist in managing and supervising all aspects of the general day-to-day business activities and operations of the Fund, including custodial, transfer agency, dividend disbursing, accounting, auditing, compliance and related services. The Administrator has authorized all of its officers and employees who have been elected as officers of the Fund to serve in such capacities.

All services furnished by the Administrator under the Administration Agreement may be furnished by such officers or employees of the Administrator. The Fund pays ING Funds Services an administration fee, computed daily and payable monthly. The Administration Agreement states that ING Funds Services is entitled to receive a fee at an annual rate of 0.10% of the Fund's managed assets. The Administration Agreement may be canceled by the Board of Trustees upon 60 days written notice.

### **Control Person**

Prior to the public offering of Common Shares, ING Investments will purchase Common Shares from the Fund in an amount sufficient to satisfy the net worth requirements of Section 14(a) of the 1940 Act. At that time, ING Investments will own 100% of the outstanding Common Shares. ING Investments may be deemed to control the Fund until such time as it owns less than 25% of the outstanding Common Shares, which is expected to occur as of the completion of the Offering.

### **Information Regarding Trading of ING's U.S. Mutual Funds**

ING Investments, the adviser to the ING Funds, has reported to the Boards of Directors/Trustees (the Boards) of the ING Funds that, like many U.S. financial services companies, Investments and certain of its U.S. affiliates have received informal and formal requests for information since September 2003 from various governmental and self-regulatory agencies in connection with investigations related to mutual funds and variable insurance products. ING Investments has advised the Boards that it and its affiliates have cooperated fully with each request.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

In addition to responding to regulatory and governmental requests, Investments reported that management of U.S. affiliates of ING Groep N.V., including ING Investments (collectively, ING ), on their own initiative, have conducted, through independent special counsel and a national accounting firm, an extensive internal review of trading in ING insurance, retirement, and mutual fund products. The goal of this review was to identify any instances of inappropriate trading in those products by third parties or by ING investment professionals and other ING personnel. ING's internal review related to mutual fund trading is now substantially completed. ING has reported that, of the millions of customer relationships that ING maintains, the internal review identified several isolated arrangements allowing third parties to engage in frequent trading of mutual funds within ING's variable insurance and mutual fund products, and identified other circumstances where frequent trading occurred, despite measures taken by ING intended to combat market timing. ING further

## Table of Contents

reported that each of these arrangements has been terminated and fully disclosed to regulators. The results of the internal review were also reported to the independent members of the Board.

ING Investments has advised the Board that most of the identified arrangements were initiated prior to ING's acquisition of the businesses in question in the U.S. ING Investments further reported that the companies in question did not receive special benefits in return for any of these arrangements, which have all been terminated.

Based on the internal review, ING Investments has advised the Board that the identified arrangements do not represent a systemic problem in any of the companies that were involved.

In September 2005, ING Funds Distributor, LLC ( IFD ), the distributor of certain ING Funds, settled an administrative proceeding with the NASD regarding three arrangements, dating from 1995, 1996 and 1998, under which the administrator to the then-Pilgrim Funds, which subsequently became part of the ING Funds, entered into formal and informal arrangements that permitted frequent trading. Under the terms of the Letter of Acceptance, Waiver and Consent ( AWC ) with the NASD, under which IFD neither admitted nor denied the allegations or findings, IFD consented to the following sanctions: (i) a censure; (ii) a fine of \$1.5 million; (iii) restitution of approximately \$1.44 million to certain ING Funds for losses attributable to excessive trading described in the AWC; and (iv) agreement to make certification to NASD regarding the review and establishment of certain procedures.

In addition to the arrangements discussed above, ING Investments reported to the Board that, at this time, these instances include the following, in addition to the arrangements subject to the AWC discussed above:

Aeltus Investment Management, Inc. (a predecessor entity to ING Investment Management Co.) identified two investment professionals who engaged in extensive frequent trading in certain ING Funds. One was subsequently terminated for cause and incurred substantial financial penalties in connection with this conduct and the second has been disciplined.

ReliaStar Life Insurance Company ( ReliaStar ) entered into agreements seven years ago permitting the owner of policies issued by the insurer to engage in frequent trading and to submit orders until 4pm Central Time. In 2001 ReliaStar also entered into a selling agreement with a broker-dealer that engaged in frequent trading. Employees of ING affiliates were terminated and/or disciplined in connection with these matters.

In 1998, Golden American Life Insurance Company entered into arrangements permitting a broker-dealer to frequently trade up to certain specific limits in a fund available in an ING variable annuity product. No employee responsible for this arrangement remains at the company.

For additional information regarding these matters, you may consult the Form 8-K and Form 8-K/A for each of four life insurance companies, ING USA Annuity and Life Insurance Company, ING Life Insurance and Annuity Company, ING Insurance Company of America, and ReliaStar Life Insurance Company of New York, each filed with the Securities and Exchange Commission (the SEC ) on October 29, 2004 and September 8, 2004. These Forms 8-K and Forms 8-K/A can be accessed through the SEC's Web site at <http://www.sec.gov>. Despite the extensive internal review conducted through independent special counsel and a national accounting firm, there can be no assurance that the instances of inappropriate trading reported to the Board are the only instances of such trading respecting the ING Funds.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

ING Investments reported to the Board that ING is committed to conducting its business with the highest standards of ethical conduct with zero tolerance for noncompliance. Accordingly, Investments advised the Board that ING management was disappointed that its voluntary internal review identified these situations. Viewed in the context of the breadth and magnitude of its U.S. business as a whole, ING management does not believe that ING's acquired companies had systemic ethical or compliance issues in these areas. Nonetheless,

## **Table of Contents**

Investments reported that given ING's refusal to tolerate any lapses, it has taken the steps noted below, and will continue to seek opportunities to further strengthen the internal controls of its affiliates.

ING has agreed with the ING Funds to indemnify and hold harmless the ING Funds from all damages resulting from wrongful conduct by ING or its employees or from ING's internal investigation, any investigations conducted by any governmental or self-regulatory agencies, litigation or other formal proceedings, including any proceedings by the Securities and Exchange Commission. Investments reported to the Board that ING management believes that the total amount of any indemnification obligations will not be material to ING or its U.S. business.

ING updated its Code of Conduct for employees reinforcing its employees' obligation to conduct personal trading activity consistent with the law, disclosed limits, and other requirements.

The ING Funds, upon a recommendation from ING, updated their respective Codes of Ethics applicable to investment professionals with ING entities and certain other fund personnel, requiring such personnel to pre-clear any purchases or sales of ING Funds that are not systematic in nature (i.e., dividend reinvestment), and imposing minimum holding periods for shares of ING Funds.

ING instituted excessive trading policies for all customers in its variable insurance and retirement products and for shareholders of the ING Funds sold to the public through financial intermediaries. ING does not make exceptions to these policies.

ING reorganized and expanded its U.S. Compliance Department, and created an Enterprise Compliance team to enhance controls and consistency in regulatory compliance.

As has been widely reported in the media, the New York Attorney General's office ( NYAG ) is conducting broad investigations regarding insurance quoting and brokerage practices. ING U.S. has been subpoenaed in this regard, and is cooperating fully with these NYAG requests for information.

ING U.S. believes that its practices are consistent with our business principles and our commitment to our customers.

At this time, in light of the current regulatory factors, ING U.S. is actively engaged in reviewing whether any modifications in our practices are appropriate for the future.

There can be no assurance that these matters, or the adverse publicity associated with them, will not result in increased fund redemptions, reduced sale of fund shares, or other adverse consequences to ING Funds.

## **DESCRIPTION OF SHARES**

### **Common Shares**

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

The Fund's Declaration of Trust, as amended, authorizes the issuance of an unlimited number of Common Shares of beneficial interest, par value \$.01 per share. All Common Shares have equal rights to the payment of dividends and other distributions and the distribution of assets upon liquidation. Common Shares will, when issued, be fully paid and non-assessable by the Fund, except to the extent provided in the Declaration of Trust, and will have no pre-emptive or conversion rights or rights to cumulative voting.

Common Shareholders are entitled to share equally in dividends declared by the Board of Trustees payable to holders of Common Shares and in the net assets of the Fund available for distribution to holders of Common Shares upon liquidation after payment of the preferential amounts payable to holders of any outstanding preferred shares.

## **Table of Contents**

Common Shareholders are entitled to one vote for each share held. The Common Shares and any preferred shares do not have cumulative voting rights, which means that the holders of more than 50% of the shares of Common Shares and any preferred shares voting for the election of Trustees can elect all of the Trustees standing for election by such holders, and, in such event, the holders of the remaining shares of Common Shares and any preferred shares will not be able to elect any of such Trustees.

The Declaration of Trust provides for indemnification out of Fund property for all loss and expense of any shareholder or former shareholder held personally liable for the obligations of the Fund solely by reason of such person's status as a shareholder or former shareholder. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations.

Neither Common Shareholders nor holders of any preferred shares have pre-emptive or conversion rights and Common Shares are not redeemable. Upon liquidation of the Fund, after paying or adequately providing for the payment of all liabilities of the Fund and the liquidation preference with respect to any outstanding preferred shares, and upon receipt of such releases, indemnities and refunding agreements as they deem necessary for their protection, the Trustees may distribute the remaining assets of the Fund among the holders of the Common Shares.

If preferred shares are issued and outstanding, holders of Common Shares will not be entitled to receive any distributions from the Fund, unless at the time of such declaration, (1) all accrued dividends on preferred shares or accrued interest on borrowings have been paid and (2) the value of the Fund's total assets (determined after deducting the amount of such dividend or other distribution), less all liabilities and indebtedness of the Fund not represented by senior securities, is at least 300% of the aggregate amount of such securities representing indebtedness and at least 200% of the aggregate amount of securities representing the aggregate liquidation value of the outstanding preferred shares.

## **Preferred Shares**

The Fund has no current intention of issuing any shares other than the Common Shares. However, the Fund's Declaration of Trust authorizes the issuance of a class of preferred shares (which class may be divided into one or more series) as the Trustees may, without shareholder approval, authorize. Any preferred shares will have such preferences, voting powers, terms of redemption, if any, and special or relative rights or privileges (including conversion rights, if any) as the Trustees may determine and as will be set forth in a certificate of designation establishing the terms of the preferred shares. The number of shares of the preferred class or series authorized is unlimited, and the shares authorized may be represented in part by fractional shares.

Any decision to offer preferred shares is subject to market conditions and to the management's continuing belief that leveraging the Fund's capital structure through the issuance of preferred shares is likely to achieve the benefits to the Common Shares described in this prospectus for long-term investors. The terms of any preferred shares will be determined by the Board of Trustees in consultation with ING Investments (subject to applicable law and the Fund's Declaration of Trust) if and when it authorizes a preferred shares offering.

Preferred shares will have complete priority over the Common Shares as to distribution of assets. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of preferred shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to holders of Common Shares.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

The 1940 Act also requires that the holders of preferred shares, voting as a separate class, have the right to: elect at least two trustees at all times; and elect a majority of the trustees at any time when dividends on such class of securities are unpaid for two full years. In each case, the holders of Common Shares voting separately as a class will elect the remaining trustees.

## **Table of Contents**

In the event of any future issuance of preferred shares, the Fund likely would seek a credit rating for such preferred shares from a nationally recognized rating agency. In such event, as long as preferred shares are outstanding, the composition of its portfolio will reflect guidelines established by such rating agency. Based on previous guidelines established by such rating agencies for the securities of other issuers, the Fund anticipates that the guidelines with respect to any preferred shares would establish a set of tests for portfolio composition and asset coverage that supplement (and in some cases are more restrictive than) the applicable requirements under the 1940 Act. Although, at this time, no assurance can be given as to the nature or extent of the guidelines, which may be imposed in connection with obtaining a rating of any preferred shares, the Fund anticipates that such guidelines would include asset coverage requirements that are more restrictive than those under the 1940 Act, restrictions on certain portfolio investments and investment practices, requirements that the Fund maintain a portion of its assets in short-term, high-quality, fixed-income securities and certain mandatory redemption requirements relating to any preferred shares. No assurance can be given that the guidelines actually imposed with respect to any preferred shares by such rating agency would be more or less restrictive than as described in this prospectus.

## **Borrowings**

The Fund has no current intention to borrow money for the purpose of obtaining investment leverage. In the event the Fund in the future determines to engage in investment leverage, in whole or in part, through borrowings, the Fund may enter into definitive agreements with respect to a credit facility/ commercial paper program or other borrowing program. The Fund may negotiate with commercial banks to arrange a credit facility/commercial paper program pursuant to which the Fund would expect to be entitled to borrow up to a specified amount. Any such borrowings would constitute financial leverage. Such a facility/commercial paper program would not be expected to be convertible into any other securities of the Fund, outstanding amounts would be expected to be prepayable by the Fund prior to final maturity without significant penalty and there are not expected to be any sinking fund or mandatory retirement provisions. Outstanding amounts would be payable at maturity or such earlier times as required by the agreement. The Fund may be required to prepay outstanding amounts under the facility/program or incur a penalty rate of interest in the event of the occurrence of certain events of default. The Fund would be expected to indemnify the lenders under the facility/program against liabilities they may incur in connection with the facility/program.

In addition, the Fund expects that any such credit facility/program would contain covenants that, among other things, likely would limit the Fund's ability to pay distributions in certain circumstances, incur additional debt, change its fundamental investment policies and engage in certain transactions, including mergers and consolidations, and may require asset coverage ratios in addition to those required by the 1940 Act. The Fund may be required to pledge its assets and to maintain a portion of its assets in cash or high-grade securities as a reserve against interest or principal payments and expenses. The Fund expects that any credit facility/program would have customary covenant, negative covenant and default provisions. There can be no assurance that the Fund will enter into an agreement for a credit facility/program on terms and conditions representative of the foregoing, or that additional material terms will not apply. In addition, if entered into, any such credit facility/program may in the future be replaced or refinanced by one or more credit facilities having substantially different terms or by the issuance of preferred shares or debt securities.

## **Effects of Possible Future Leverage**

As discussed above, the Fund has no current intention to issue preferred shares or to borrow money for the purpose of obtaining investment leverage. In the event that the Fund determines in the future to utilize investment leverage, there can be no assurance that such a leveraging strategy would be successful during any period in which it is employed. Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares and the risk that fluctuations in distribution rates on any preferred shares or fluctuations in borrowing costs may affect the return to Common Shareholders. To the extent the amounts available for distribution derived from securities purchased with

## **Table of Contents**

proceeds received from leverage exceed the cost of leverage, the Fund's distributions would be greater than if leverage had not been used. Conversely, if the amounts available for distribution derived from securities purchased with such proceeds are not sufficient to cover the cost of leverage, distributions to Common Shareholders would be less than if leverage had not been used. In the latter case, the Adviser, in its best judgment, may nevertheless determine to maintain the Fund's leveraged position if it deems such action to be appropriate. The costs of an offering of preferred shares and/or a borrowing program would be borne by Common Shareholders and consequently would result in a reduction of the net asset value of Common Shares.

In addition, the fee paid to the Adviser and Sub-Adviser will be calculated on the basis of the Fund's average daily managed assets, including proceeds from the issuance of preferred shares and/or borrowings, so the fees would be higher if leverage is utilized. In this regard, holders of preferred shares would not bear the investment advisory fee. Rather, Common Shareholders would bear the portion of the investment advisory fee attributable to the assets purchased with the proceeds of the preferred shares offering.

## **NET ASSET VALUE**

### **Net Asset Value**

The net asset value ( NAV ) per Common Share of the Fund is determined each business day as of the close of regular trading on the NYSE (normally 4:00 p.m. Eastern time unless otherwise designated by the NYSE). The Fund is open for business every day the NYSE is open. The NYSE is closed on all weekends and on all national holidays and Good Friday. Fund shares will not be priced on those days. The NAV per Common Share is determined by dividing the value of the Fund's assets (including interest accrued but not collected) less all liabilities (including accrued expenses and less the liquidation preference of any outstanding preferred shares) by the number of shares outstanding. The NAV per Common Share is made available for publication.

### **Valuation of the Fund's Assets**

The assets in the Fund's portfolio are valued in accordance with the Fund's Valuation Procedures adopted by the Board of Trustees. Portfolio securities listed or traded on a national securities exchange will be valued at the last reported sale price on the valuation day. Securities traded on an exchange for which there has been no sale that day and other securities traded in the over-the-counter market will be valued at the mean between the last reported bid and asked prices on the valuation day. Portfolio securities reported by NASDAQ will be valued at the NASDAQ Official Closing Price on the valuation day.

In cases in which securities are traded on more than one exchange, the securities are valued on the exchange that is normally the primary market. Short-term obligations maturing in 60 days or less will generally be valued at amortized cost. This involves valuing such a security at cost on the date of acquisition and thereafter assuming a constant accretion of a discount or amortization of a premium to maturity, regardless of the impact of fluctuating interest rates on the market value of the instrument. While this method provides certainty in valuation, it may result in periods during which value, as determined by amortized cost, is higher or lower than the price the Fund would receive if it sold the instrument.

Securities and assets for which reliable market value quotations are not readily available (which may include certain restricted securities which are subject to limitations as to their sale) are valued at their fair values as determined in good faith by or under the supervision of the Fund's Board, in accordance with methods that are specifically authorized by the Board. Securities traded on exchanges, including foreign exchanges,

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

which close earlier than the time that the Fund calculates its net asset value may also be valued at their fair values as determined in good faith by or under the supervision of the Fund's Board, in accordance with methods that are specifically authorized by the Board.

## **Table of Contents**

The valuation procedures applied in any specific instance are likely to vary from case to case. With respect to a restricted security, for example, consideration is generally given to the cost of the investment, the market value of any unrestricted securities of the same class at the time of valuation, the potential expiration of restrictions on the security, the existence of any registration rights, the costs related to registration of the security, as well as factors relevant to the issuer itself. Consideration may also be given to the price and extent of any public trading in similar securities of the issuer or comparable companies' securities.

The prices of foreign securities are determined using information derived from pricing services and other sources. The value of the foreign securities traded on exchanges outside the United States is generally based upon the price on the foreign exchange as of the close of business of the exchange preceding the time of valuation (or, if earlier, at the time of the Fund's valuation). Foreign securities markets may close before the Fund determines its NAV. European, Asian, Latin American, or other international securities trading may not take place on all days on which the NYSE is open. Further, trading takes place in Japanese markets on certain Saturdays and in various foreign markets on days on which the NYSE is not open. Consequently, the calculation of the Fund's NAV may not take place contemporaneously with the determination of the prices of securities held by the Fund in foreign securities markets. Further, the value of the Fund's assets may be significantly affected by foreign trading on days when a shareholder cannot purchase or sell shares of the Fund.

If an event occurs after the time at which the market for foreign securities held by the Fund closes but before the time that the Fund's NAV is calculated, such event may cause the closing price on the foreign exchange to not represent a readily available reliable market value quotation for such securities at the time the Fund determines its NAV. In such a case, the Fund will use the fair value of such securities as determined under the Fund's valuation procedures. Events after the close of trading on a foreign market that could require the Fund to fair value some or all of its foreign securities include, among others, securities trading in the U.S. and other markets, corporate announcements, natural and other disasters and political and other events.

Among other elements of analysis in the determination of a security's fair value, the Board has authorized the use of one or more independent research services to assist with such determinations. An independent research service may use statistical analyses and quantitative models to help determine fair value as of the time the Fund calculates its NAV. There can be no assurance that such models accurately reflect the behavior of the applicable markets or the effect of the behavior of such markets on the fair value of the securities, nor that such markets will continue to behave in a fashion that is consistent with such models. Unlike the closing price of a security on an exchange, fair value determinations employ elements of judgment. Consequently, the fair value assigned to a security may not represent the actual value that the Fund could obtain if it were to sell the security at the time of the close of the NYSE. Pursuant to procedures adopted by the Board, the Fund is not obligated to use the fair valuations recommended by any research service, and valuation recommendations provided by such research services may be overridden if other events have occurred or if other fair valuations are determined in good faith to be more accurate. Unless an event is such that it causes the Fund to determine that the closing prices for one or more securities do not represent readily available reliable market value quotations at the time the Fund determines its NAV, events that occur between the time of the close of the foreign market on which they are traded and the close of regular trading on the NYSE will not be reflected in the Fund's NAV.

Quotations of foreign securities denominated in foreign currencies are converted to U.S. dollar equivalents using the applicable foreign exchange quotation in effect at 4:00 p.m. London time.

Options that are traded over-the-counter will be valued using one of three methods: 1) dealer quotes, 2) industry models with objective inputs, or 3) by using a benchmark arrived at by comparing prior-day dealer quotes with the corresponding change in the underlying security or index. Exchange traded options will be valued using the last reported sale. If no last sale is reported, exchange traded options will be valued using an industry accepted model such as Black Scholes. Options on currencies purchased by the Fund are valued at their last bid price in the case of listed options or at the average of the last bid prices obtained from dealers in the case of over-the-counter options.

## **Table of Contents**

The fair value of other assets is added to the value of all securities positions to arrive at the value of the Fund's total assets. The Fund's liabilities, including accruals for expenses, are deducted from its total assets. Once the total value of the Fund's net assets is so determined, that value is then divided by the total number of common shares outstanding (excluding treasury shares), and the result, rounded to the nearest cent, is the NAV per share.

## **DISTRIBUTIONS**

### **Initial Distribution**

The Fund's initial distribution is expected to be declared in December 2005, and paid in April 2006, depending upon market conditions. Unless an election is made to receive dividends in cash, shareholders will automatically have all dividends and distributions reinvested in Common Shares through the receipt of additional unissued but authorized Common Shares from the Fund or Common Shares purchased in the open market through the Fund's Dividend Reinvestment Plan.

### **Level Rate Distribution Policy**

Commencing with the Fund's first distribution, the Fund intends to implement a level dividend strategy and make regular quarterly distributions to Common Shareholders based on the past and projected performance of the Fund. The Fund's distribution rate will be based on past and projected:

dividends received on the common stocks or other securities held by the fund;

capital gains from net option premiums (option premium received less the cost of close out or settlement); and

capital gains (realized or unrealized) on the common stocks held in the Fund's portfolio.

To permit the Fund to maintain more stable distributions, distribution rates will be based on projected Fund performance. As a result, the distributions paid by the Fund for any particular quarter may be more or less than the amount of net investment income from that quarterly period. The Fund's Board may modify this distribution policy at any time without obtaining the approval of Common Shareholders.

The Fund's annual distributions will likely differ from annual net investment income. The investment income of the Fund will consist of all dividend and interest income accrued on portfolio investments, short-term capital gain (including short-term gains on terminated option positions and gains on the sale of portfolio investments held for one year or less) in excess of long-term capital loss and income from certain hedging transactions, less all expenses of the Fund. Expenses of the Fund will be accrued each day. To the extent that the Fund's net investment income for any year exceeds the total quarterly distributions paid during the year, the Fund will make a special distribution at or near year-end of such excess amount as may be required. Over time, all of the Fund's investment company taxable income will be distributed.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

At least annually, the Fund intends to distribute any net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) or, alternatively, to retain all or a portion of the year's net capital gain and pay federal income tax on the retained gain. As provided under federal tax law, Common Shareholders of record as of the end of the Fund's taxable year will include their allocable share of the retained gain in their income for the year as a long-term capital gain and will be entitled to a tax credit or refund for the tax deemed paid on their behalf by the Fund.

The tax treatment and characterization of the Fund's distributions may vary significantly from time to time because of the varied nature of the Fund's investments. If the Fund's total quarterly distributions in any year

## **Table of Contents**

exceed the amount of its net investment income for the year, any such excess would be characterized as a return of capital for federal income tax purposes to the extent not designated as a capital gain dividend. Distributions in any year may include a substantial return of capital component. Under the 1940 Act, for any distribution that includes amounts from sources other than net income, the Fund is required to provide Common Shareholders a written statement regarding the components of such distribution. Such a statement will be provided at the time of any distribution believed to include any such amounts. However the ultimate tax characterization of the Fund's distributions made in a calendar year cannot finally be determined until the end of that calendar year. For example, the Fund may distribute income early in the calendar year that is taxable at short-term capital gains rates, but incur net short-term capital losses later in the year, thereby offsetting the income taxable at short-term capital gains rates for which distributions have already been made by the Fund. See Tax Matters.

In certain circumstances, the Fund may be required to sell a portion of its investment portfolio to fund distributions. Distributions will reduce the Common Shares' net asset value.

The Fund intends to rely on an exemptive application with the SEC seeking an order under the 1940 Act to permit the Fund to include realized long-term capital gains as a part of its regular distributions to Common Shareholders more frequently than would otherwise be permitted by the 1940 Act (generally once per taxable year). There is no assurance that the SEC will grant the request for such exemptive relief. The staff of the SEC has indicated that it has suspended the processing of exemptive applications requesting the type of relief referenced above, pending review by the staff of the results of an industry-wide SEC inspection focusing on the dividend practices of closed-end investment companies. There can be no assurance as to when that review might be completed or whether, following that review, the staff would process such applications or grant such relief. As a result of this development, the Fund has no current expectation that it will be in a position to include long-term capital gains in Fund distributions more frequently than is permitted under the 1940 Act, thus leaving the Fund with the possibility of variability in distributions (and their tax attributes) as discussed above. See Distributions.

## **Dividend Reinvestment Plan**

Unless the registered owner of Common Shares elects to receive cash by contacting The Bank of New York (the Plan Agent), all dividends declared on Common Shares of the Fund will be automatically reinvested by the Plan Agent for shareholders in additional Common Shares of the Fund through the Fund's Dividend Reinvestment Plan (the Plan). Shareholders who elect not to participate in the Plan will receive all dividends and other distributions in cash paid by check mailed directly to the shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by the Plan Agent. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Agent prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional Common Shares of the Fund for you. If you wish for all dividends declared on your Common Shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Agent will open an account for each Common Shareholder under the Plan in the same name in which such Common Shareholder's Common Shares are registered. Whenever the Fund declares a dividend or other distribution (together, a Dividend) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Agent for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common Shares from the Fund (Newly Issued Common Shares) or (ii) by purchase of outstanding Common Shares on the open market (Open-Market Purchases) on the NYSE or elsewhere. Open-market purchases and sales are usually made through a broker affiliated with The Bank of New York. The affiliated broker will receive brokerage commissions for effecting Plan transactions.

## **Table of Contents**

If, on the payment date for any Dividend, the closing market price per Common Share ( Market Price ) plus estimated brokerage commissions is equal to or greater than the net asset value per Common Share, the Plan Agent will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per Common Share on the payment date; provided that, if the net asset value is less than or equal to 95% of the Market Price on the payment date, the dollar amount of the Dividend will be divided by 95% of the Market Price on the payment date. If, on the payment date for any Dividend, the net asset value per Common Share is greater than the Market Price plus estimated brokerage commissions, the Plan Agent will invest the Dividend amount in Common Shares acquired on behalf of the participants in Open-Market Purchases. In the event of a market discount on the payment date for any Dividend, the Plan Agent will have 30 days to invest the Dividend amount in Common Shares acquired in Open-Market Purchases.

If the Plan Agent is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Agent will cease making Open-Market Purchases and will invest the un-invested portion of the Dividend amount in Newly Issued Common Shares at the net asset value per common share at the close of business on the 30th day following the payment date for that Dividend provided that, if the net asset value is less than or equal to 95% of the then current Market Price, the dollar amount of the Dividend will be divided by 95% of the Market Price on the payment date.

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Plan.

There will be no brokerage charges with respect to Common Shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. See Tax Matters. Participants that request a partial or full sale of shares through the Plan Agent are subject to a \$15.00 sales fee and a \$.10 per share charge on purchases or sales, and may be subject to certain other service charges.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All questions concerning the Plan should be directed to the Plan Agent at (800) 524-4458.

## **CERTAIN PROVISIONS IN THE DECLARATION OF TRUST**

### **Anti-Takeover Provisions**

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

The Declaration of Trust includes provisions that could have the effect of limiting the ability of other entities or persons to acquire control of the Fund or to change the composition of its Board and could have the

## **Table of Contents**

effect of depriving Common Shareholders of an opportunity to sell their Common Shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund. These provisions may have the effect of discouraging attempts to acquire control of the Fund, which attempts could have the effect of increasing the expenses of the Fund and interfering with the normal operation of the Fund. The Board is divided into three classes, with the term of one class expiring at each annual meeting of Common Shareholders. At each annual meeting, one class of Trustees is elected to a three-year term. This provision could delay for up to two years the replacement of a majority of the Board. A Trustee may be removed from office only for cause, by action taken by a majority of the remaining Trustees followed by the vote of the holders of at least 75% of the shares then entitled to vote in an election of such Trustee. The Declaration of Trust also limits the ability of shareholders to call meetings of the shareholders.

In addition, the Declaration of Trust requires the favorable vote or consent of the holders of not less than 75% of each class and series of shares outstanding and entitled to vote (with each class and series separately voting thereon or consenting thereto as a separate class and series), to approve certain transactions with 5%-or-greater holders of a class of shares and their associates. These provisions are not applicable to any such transaction if the Trustees by resolution have approved such transaction or to any such transaction with any corporation of which a majority of the outstanding shares of stock normally entitled to vote in elections of directors is owned of record or beneficially by the Fund and its subsidiaries. For purposes of these provisions, a 5%-or-greater holder of a class of shares (a Principal Shareholder ) refers to any corporation, person or other entity who, whether directly or indirectly and whether alone or together with its affiliates and associates, beneficially owns 5% or more of the outstanding shares of any class of beneficial interest of the Fund. The transactions subject to these special approval requirements are: (i) the merger or consolidation of the Fund or any subsidiary of the Fund with or into any Principal Shareholder; (ii) the issuance of any securities of the Fund to any Principal Shareholder for cash, other than pursuant to any automatic dividend reinvestment program; (iii) the sale, lease or exchange of all or any substantial part of the assets of the Fund to any Principal Shareholder (except assets having an aggregate fair market value of less than 2% of the total assets of the Fund, aggregating for the purpose of such computation all assets sold, leased or exchanged in any series of similar transactions within a twelve-month period or assets sold, leased or exchanged in the ordinary course of business); or (iv) the sale, lease or exchange to the Fund or any subsidiary thereof, in exchange for securities of the Fund, of any assets of any Principal Shareholder (except assets having an aggregate fair market value of less than 2% of the total assets of the Fund, aggregating for the purposes of such computation all assets sold, leased or exchanged in any series of similar transactions within a twelve-month period, or assets sold, leased or exchanged in the ordinary course of business).

The Board has determined that provisions with respect to the Board and the 75% voting requirements described above, which voting requirements are greater than the minimum requirements under Delaware law or the 1940 Act, are in the best interest of Common Shareholders generally. This description of the provisions is qualified in its entirety by reference to the Declaration of Trust. The Declaration of Trust is on file with the SEC and contains the full text of these provisions.

## **CLOSED-END FUND STRUCTURE**

The Fund is a newly organized, diversified, closed-end management investment company (commonly referred to as a closed-end fund). Closed-end funds differ from open-end funds (which are generally referred to as mutual funds) in that closed-end funds generally list their shares for trading on a stock exchange and do not redeem their shares at the request of the shareholder. This means that if you wish to sell your shares of the Fund, you must trade them on the market like any other stock at the prevailing market price at that time. In a mutual fund, if a shareholder wishes to sell shares of the fund, the mutual fund will redeem or buy back the shares at NAV. Also, mutual funds generally offer new shares on a continuous basis to new investors, and closed-end funds generally do not. The continuous inflows and outflows of assets in a mutual fund can make it difficult to manage the fund's investments. By comparison, closed-end funds are generally able to stay more fully invested in securities that are consistent with their investment objectives, and also have greater flexibility to make certain

## **Table of Contents**

types of investments, and to use certain investment strategies, such as financial leverage and investments in illiquid securities.

Shares of closed-end funds frequently trade at a discount to their NAV, although it is also possible that they may trade at a premium above NAV. The market price of the Fund's Common Shares will be determined by such factors as relative demand for and supply of such Common Shares in the market, the Fund's NAV, general market and economic conditions and other factors beyond the control of the Fund. See Net Asset Value. Because of the possibility and the recognition that any discount to the NAV may not be in the interest of shareholders, the Fund's Board of Trustees might consider from time to time engaging in open-market repurchases, tender offers for shares or other programs intended to reduce the discount. The Fund cannot guarantee or assure, however, that the Fund's Board of Trustees will decide to engage in any of these actions. Nor is there any guarantee or assurance that such actions, if undertaken, would result in the shares trading at a price equal or close to NAV per share. The Board of Trustees might also consider converting the Fund to an open-end mutual fund, which would require a vote of the shareholders of the Fund.

### **Conversion to Open-End Fund**

The Trustees may at any time propose conversion of the Fund to an open-end management investment company depending upon their judgment as to the advisability of such action in light of circumstances then prevailing. In considering whether to submit an open-ending proposal to shareholders, the Trustees might consider, among other factors, the differences in operating expenses between open-end and closed-end funds (due to the expenses of continuously selling shares and of standing ready to effect redemptions), the potentially adverse tax consequences to non-redeeming shareholders once a fund is open-ended, and the impact of open-ending on portfolio management policies. Such a conversion would require the approval of both a majority of the Fund's outstanding Common Shares and preferred shares voting together as a single class and a majority of the outstanding preferred shares voting as a separate class on such conversion.

Conversion of the Fund to an open-end investment company would require the redemption of any outstanding preferred shares, which would eliminate the leveraged capital structure of the Fund with respect to the Common Shares. A delay in conversion could result following shareholder approval due to the Fund's inability to redeem the preferred shares.

Shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their next computed NAV less any redemption charge as might be in effect at the time of redemption. If the Fund is converted to an open-end management investment company, it could be required to liquidate portfolio securities to meet requests for redemption, and its shares would no longer be listed on the NYSE. The Fund may have to limit its holdings of illiquid securities and the inflows and outflows of open-end fund shares may alter the options strategies that the Fund may use. If the Fund were to experience significant redemptions as an open-end fund, the decrease in total assets could result in a higher expense ratio and inefficiencies in portfolio management. In this regard, the Fund could reserve the right to effect redemptions in-kind with portfolio securities, which would subject redeeming shareholders to transaction costs in liquidating those securities. The Fund may also impose a redemption fee.

### **Repurchase of Common Shares**

The Fund may take action to repurchase Common Shares in the open market or make tender offers for its Common Shares. This may have the effect of reducing any market discount from NAV. Share repurchases and tenders could have a favorable effect on the market price of the Fund's Common Shares; however, you should be aware that the acquisition of Common Shares by the Fund will decrease the capital of the Fund and, therefore, may have the effect of increasing the Fund's expense ratio and decreasing the asset coverage with respect to any preferred shares outstanding. Any share repurchases or tender offers will be made in accordance with requirements of the Securities Exchange Act of 1934, as

Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

amended, the 1940 Act and the principal market on which the Common Shares are traded.

## **Table of Contents**

### **TAX MATTERS**

Investments in the Fund have U.S. federal income tax consequences that you should consider. The following information is meant as a general summary for U.S. shareholders who hold their shares as a capital asset. Please see the SAI for additional information. You should rely on your own tax adviser for advice about the particular federal, foreign, state and local tax consequences to you of investing in the Fund.

#### **Tax Status of the Fund**

The Fund intends to elect to be treated and to qualify each year as a regulated investment company ( RIC ) under the Internal Revenue Code of 1986, as amended (the Code ). Accordingly, the Fund intends to satisfy certain requirements relating to sources of its income and diversification of its assets and to distribute substantially all of its net income and net short-term and long-term capital gains (after reduction by any available capital loss carry-forwards) in accordance with the timing requirements imposed by the Code, so as to maintain its RIC status and to generally avoid paying federal income or excise tax. To the extent that it satisfies the requirements, the Fund will not be subject to federal income tax on income paid to its shareholders in the form of dividends or capital gain distributions. However, if the Fund retains any net capital gain or any investment company taxable income, it will be subject to tax at regular corporate rates on the amount retained.

If the Fund does not qualify as a RIC for any taxable year, the Fund's taxable income will be subject to corporate income taxes, and all distributions from earnings and profits, including distributions of net capital gain (if any), will be taxable to the shareholder as ordinary income. In addition, in order to requalify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest and make certain distributions.

#### **Taxes on Distributions**

Although the Fund will not be subject to federal income tax on amounts it distributes, shareholders will be subject to federal, and possibly state and local, income taxes on amounts distributed to them by the Fund. A particular distribution will generally be taxable as either ordinary income or long-term capital gain, whether paid in cash or reinvested in additional Common Shares. Dividends paid to you out of the Fund's investment company taxable income (which includes dividends the Fund receives, any interest income, and net short-term capital gain) will generally be taxable to you as ordinary income to the extent of the Fund's earnings and profits. Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, are taxable to you as long-term capital gains, regardless of how long you have held the Common Shares.

The Jobs and Growth Tax Relief Reconciliation Act of 2003 (the Tax Act ) reduced the maximum tax rate on long-term capital gains for individuals from 20% to 15%. In addition, the Tax Act also provided that this maximum rate of tax would apply to qualified dividend income of individuals. Individual shareholders that satisfy certain minimum holding periods with respect to their Common Shares may be eligible to treat a portion of a Fund's ordinary income dividends as qualified dividend income, to the extent properly designated as such by the Fund. Corporations are not eligible for the reduced maximum rates on long-term capital gains or qualified dividend income. Corporate shareholders that satisfy certain minimum holding periods with respect to their Common Shares may be eligible to claim the dividends received deduction with respect to a portion of the Fund's ordinary income dividends properly designated by the Fund as eligible for such treatment. Without further legislative change, the rate reductions enacted by the Tax Act will lapse, and the previous rates will be reinstated, for taxable years beginning on or after January 1, 2009.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

The Fund must designate the portion of any distributions by the Fund that are eligible to be treated as qualified dividend income in a written notice within 60 days of the close of the relevant taxable year. In general, the maximum amount of distributions by the Fund that may be designated as qualified dividend income for that taxable year is the total amount of qualified dividend income received by the Fund during such year. In order to

## **Table of Contents**

constitute qualified dividend income to the Fund, a dividend must be received from a U.S. domestic corporation (other than dividends from tax-exempt corporations and certain dividends from real estate investment trusts and other regulated investment companies) or a qualified foreign corporation. In addition, the dividend must be paid in respect of the stock that has been held by the Fund, for federal income tax purposes, for at least 61 days during the 121-day period that begins 60 days before the stock becomes ex-dividend. In order to be eligible to treat a dividend from the Fund as qualified dividend income, individual Shareholders must also meet the foregoing minimum holding period requirements with respect to their Common Shares. These special rules relating to qualified dividend income apply to taxable years beginning before January 1, 2009. Without additional Congressional action, all of the Fund's ordinary income dividends for taxable years beginning after such date will be subject to tax at ordinary income rates.

The Fund's ordinary income dividends to corporate Shareholders may, if certain conditions are met, qualify for the dividends-received deduction to the extent that the Fund has received qualifying dividend income during the taxable year; capital gain dividends distributed by the Fund are not eligible for the dividends-received deduction. In order to constitute a qualifying dividend, a dividend must be from a U.S. domestic corporation in respect of the stock of such corporation that has been held by the Fund, for federal income tax purposes, for at least 46 days during the 91-day period that begins 45 days before the stock becomes ex-dividend (or, in the case of preferred stock, 91 days during the 181-day period that begins 90 days before the stock becomes ex-dividend). The Fund must also designate the portion of any distribution that is eligible for the dividends-received deduction in a written notice within 60 days of the close of the relevant taxable year. In addition, in order to be eligible to claim the dividends-received deduction with respect to distributions from the Fund, corporate Shareholders must meet the foregoing minimum holding period requirements with respect to their Common Shares. If a corporation borrows to acquire Common Shares, it may be denied a portion of the dividends-received deduction it would otherwise be eligible to claim. The entire qualifying dividend, including the otherwise deductible amount, is included in determining the excess (if any) of a corporate Shareholder's adjusted current earnings over its alternative minimum taxable income, which may increase its alternative minimum tax liability. Additionally, any corporate Shareholder should consult its tax adviser regarding the possibility that its basis in its shares may be reduced, for federal income tax purposes, by reason of extraordinary dividends received with respect to the Common Shares, for the purpose of computing its gain or loss on redemption or other disposition of the Common Shares.

There can be no assurance as to what portion if any of the Fund's distributions will qualify for favorable treatment as long-term capital gains or qualified dividend income or what portion (if any) that will be eligible for the corporate dividends received deduction. To the extent that the Fund derives net short-term capital gains from its investment activities, distributions of such gains would be taxed as ordinary income. Further, certain of the Fund's option writing strategies and securities lending activities could reduce the amount of the Fund's distributions that may qualify for either the reduced rates on qualified dividends or the corporate dividends received deduction.

Common Shareholders receiving dividends or distributions in the form of additional Common Shares pursuant to the Plan will be treated for U.S. federal income tax purposes as receiving a distribution in an amount equal to (i) the fair market value of any new Common Shares issued to the Common Shareholder by the Fund, and (ii) if Common Shares are trading below net asset value, the cash allocated to the Common Shareholder for the purchase of Common Shares on its behalf, and such Common Shareholder will have a cost basis in the Common Shares received equal to such foregoing amount.

In light of the Fund's plans regarding its initial distribution and its plan to adopt either a level rate distribution plan or a managed distribution policy, you may receive a so-called "return of capital" distribution. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will be treated by a shareholder as a return of capital which is applied against and reduces the shareholder's basis in his or her shares. To the extent that the amount of any such distribution exceeds the shareholder's basis in his or her shares, the excess will be treated by the shareholder as gain from a sale or exchange of the shares.

## **Table of Contents**

An investor should be aware that, if Common Shares are purchased shortly before the record date for any taxable distribution (including a capital gain distribution), the purchase price likely will reflect the value of the distribution and the investor then would receive a taxable distribution likely to reduce the trading value of such Common Shares, in effect resulting in a taxable return of some of the purchase price.

The Fund's distributions are taxable when they are paid, except that distributions declared in October, November or December to shareholders of record of such months and paid in January are taxable as if paid on December 31.

The Fund will inform shareholders of the source and tax status of all distributions promptly after the close of each calendar year.

## **Tax Aspects of Sales of Fund Shares**

Upon the sale or other disposition of shares of the Fund, which a shareholder holds as a capital asset, such a shareholder may realize a capital gain or loss which will be long-term or short-term, depending upon the shareholder's holding period for the shares. Generally, a shareholder's gain or loss will be a long-term gain or loss if the shares have been held for more than one year. As discussed above, the Tax Act reduced the maximum tax rate on long-term capital gains for individual investors from 20% to 15%. Without further legislative change, the rate reductions enacted by the Tax Act will lapse, and the previous rates will be reinstated, for taxable years beginning on or after January 1, 2009.

Any loss realized on a sale or exchange of Fund shares will be disallowed to the extent that shares disposed of are replaced (including through reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after disposition of the original shares. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of Fund shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of net capital gain received by the shareholder with respect to such shares.

## **Taxation of Fund Investments**

Although the Fund will generally not be subject to tax, as discussed above, the tax treatment of the Fund's investments will affect the timing and tax character of the Fund's distributions.

The Fund's transactions in options are subject to special and complex federal income tax provisions that may, among other things, (i) convert dividends that would otherwise constitute qualified dividend income into higher taxed short-term capital gain or ordinary income, (ii) treat dividends that would otherwise be eligible for the corporate dividends received deduction as ineligible for such treatment, (iii) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (iv) convert long-term capital gain into short-term capital gain or ordinary income, (v) convert an ordinary loss or deduction into a capital loss (the deductibility of which is more limited) and (vi) cause the Fund to recognize income or gain without a corresponding receipt of cash.

In most cases, net gains from the Fund's option strategy are expected to be short-term capital gains that would be taxable as ordinary income when distributed to shareholders.

The taxation of equity options that the Fund expects to write is governed by Code Section 1234. Pursuant to Code Section 1234, the premium received by the Fund for selling a call option is not included in income at the time of receipt. If the option expires, the premium is short-term capital gain to the Fund. If the Fund enters into a closing transaction, the difference between the amount paid to close out its position and the premium received is short-term capital gain or loss. If a call option written by the Fund is exercised, thereby requiring the Fund to sell the underlying security, the premium will increase the amount realized upon the sale of the security and any resulting gain or loss will be long-term or short-term, depending upon the holding period of

## **Table of Contents**

the security. Because the Fund does not have control over the exercise of the call options it writes, such exercise or other required sales of the underlying securities may cause the Fund to realize capital gains or losses at inopportune times.

In the case of Fund transactions in Section 1256 Contracts, the Code generally will require any gain or loss arising from the lapse, closing out or exercise of such positions to generally be treated as 60% long-term and 40% short-term capital gain or loss. In addition, the Fund generally will be required to mark to market (i.e., treat as sold for fair market value) each such position which it holds at the close of each taxable year. If a Section 1256 Contract held by the Fund at the end of a taxable year is sold in the following year, the amount of any gain or loss realized on such sale will be adjusted to reflect the gain or loss previously taken into account under the mark to market rules. Section 1256 Contracts include certain options contracts, certain regulated futures contracts and certain other financial contracts.

The Code contains special rules that apply to straddles, defined generally as the holding of offsetting positions with respect to personal property. For example, the straddle rules normally apply when a taxpayer holds stock and an offsetting option with respect to such stock or substantially identical stock or securities. In general, investment positions will be offsetting if there is a substantial diminution in the risk of loss from holding one position by reason of holding one or more other positions. The Fund may write call options on portfolio securities that are qualified covered calls that are exempt from the straddle rules. To meet the qualified covered call option exemption, a stock-plus-covered-call position cannot be part of a larger straddle and must meet a number of other conditions, including that the option is written more than 30 days prior to expiration and is not deep-in-the-money as defined in the Code. The Fund may enter into certain investments that may constitute positions in a straddle. If two or more positions constitute a straddle, recognition of a realized loss from one position must be deferred to the extent of unrecognized gain in an offsetting position. In addition, long-term capital gain may be recharacterized as short-term capital gain, or short-term capital loss as long-term capital loss. Interest and other carrying charges allocable to personal property that is part of a straddle are not currently deductible but must instead be capitalized. Similarly, wash sale rules apply to prevent the recognition of loss by the Fund from the disposition of stock or securities at a loss in a case in which identical or substantially identical stock or securities (or an option to acquire such property) is or has been acquired within a prescribed period.

The Fund's income from foreign securities may be subject to non-U.S. taxes. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. Shareholders of the Fund generally will not be entitled to a credit or deduction with respect to such taxes paid by the Fund.

## **Backup Withholding**

The Fund may be required to withhold federal income tax from all taxable distributions payable to shareholders who fail to provide their correct taxpayer identification number or to make required certifications, or who have been notified by the IRS that they are subject to backup withholding. As modified by the Tax Act, the backup withholding percentage is 28% for amounts paid through 2010, after which time the rate will increase to 31% absent legislative change. Corporate shareholders and certain other shareholders specified in the Code generally are exempt from such backup withholding. This withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's federal income tax liability, provided the required information is furnished to the IRS.

**Table of Contents****UNDERWRITING**

Subject to the terms and conditions stated in a purchase agreement dated October 26, 2005, each Underwriter named below, for which Merrill Lynch, Pierce, Fenner & Smith Incorporated is acting as representative, has severally agreed to purchase, and the Fund has agreed to sell to such Underwriter, the number of Common Shares set forth opposite the name of such Underwriter.

<u>Underwriter</u>	<u>Number of Common Shares</u>
Merrill Lynch, Pierce, Fenner & Smith Incorporated	3,150,000

The purchase agreement provides that the obligations of the Underwriters to purchase the Common Shares included in this offering are subject to the approval of certain legal matters by counsel and certain other conditions. The Underwriters are obligated to purchase all the Common Shares sold under the purchase agreement if any of the Common Shares are purchased. In the purchase agreement, the Fund, the Adviser and the Sub-Adviser have agreed to indemnify the Underwriters against certain liabilities, including liabilities arising under the Securities Act or to contribute payments the Underwriters may be required to make for any of those liabilities.

**Commissions and Discounts**

The Underwriters propose to initially offer some of the Common Shares directly to the public at the public offering price set forth on the cover page of this prospectus and some of the Common Shares to certain dealers at the public offering price less a concession not in excess of \$.60 per share. The sales load the Fund will pay of \$.90 per share is equal to 4.5% of the initial offering price. The Underwriters may allow, and the dealers may reallow, a discount not in excess of \$.10 per share on sales to other dealers. After the initial public offering, the public offering price, concession and discount may be changed. Investors must pay for any Common Shares purchased on or before October 31, 2005.

**Table of Contents**

The following table shows the public offering price, sales load, estimated organizational and offering expenses and proceeds, after expenses, to the Fund. The information assumes either no exercise or full exercise by the Underwriters of their overallotment option.

	<u>Per Share</u>	<u>Without Option</u>	<u>With Option</u>
Public offering price	\$ 20.00	\$345,000,000	\$396,750,000
Sales load	\$.90	\$15,525,000	\$17,853,750
Estimated offering expenses and offering costs	\$.04	\$690,000	\$793,500
Proceeds, after expenses, to the Fund	\$ 19.06	\$328,785,000	\$378,102,750

The expenses of the offering are estimated at \$690,000 and are payable by the Fund. The Fund has agreed to pay the Underwriters \$.00667 per common share as a partial reimbursement of expenses incurred by them in connection with the offering. The amount payable by the Fund as this partial reimbursement to the Underwriters will not exceed .03335% of the total price to the public of the Common Shares sold in this offering. The Adviser has agreed to pay offering expenses of the Fund (other than sales load, but including the reimbursement of expenses described above) that exceed \$.04 per Common Share. The Adviser has also agreed to pay the organizational expenses of the Fund.

**Overallotment Option**

The Fund has granted the Underwriters an option to purchase up to 2,587,500 additional Common Shares at the public offering price, less the sales load, within 45 days from the date of this prospectus solely to cover any overallotments. If the Underwriters exercise this option, each will be obligated, subject to conditions contained in the purchase agreement, to purchase a number of additional Common Shares proportionate to that Underwriter's initial amount reflected in the above table.

**Price Stabilization, Short Positions and Penalty Bids**

Until the distribution of the Common Shares is complete, Securities and Exchange Commission rules may limit Underwriters and selling group members from bidding for and purchasing the Common Shares. However, the representative may engage in transactions that stabilize the price of the Common Shares, such as bids or purchases to peg, fix or maintain that price.

If the Underwriters create a short position in the Common Shares in connection with the offering, *i.e.*, if they sell more Common Shares than are listed on the cover of this prospectus, the representative may reduce that short position by purchasing Common Shares in the open market. The representative may also elect to reduce any short position by exercising all or part of the overallotment option described above. The Underwriters may also impose a penalty bid, whereby selling concessions allowed to syndicate members or other broker-dealers in respect of the Common Shares sold in this offering for their account may be reclaimed by the syndicate if such Common Shares are repurchased by the syndicate in stabilizing or covering transactions. Purchases of the Common Shares to stabilize its price or to reduce a short position may cause the price of the Common Shares to be higher than it might be in the absence of such purchases.

Neither the Fund nor any of the Underwriters makes any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the Common Shares. In addition, neither the Fund nor any of the Underwriters make any representation that the representatives will engage in these transactions or that these transactions, once commenced, will not be discontinued.

without notice.

The Fund has agreed not to offer or sell any additional Common Shares for a period of 180 days after the date of the purchase agreement without the prior written consent of the Underwriters, except for the sale of the Common Shares to the Underwriters pursuant to the purchase agreement and certain transactions related to the Fund's Plan.

## **Table of Contents**

The Fund anticipates that the Underwriters may from time to time act as brokers or, after they have ceased to be Underwriters, dealers in executing the Fund's portfolio transactions. The Underwriters are active Underwriters of, and dealers in, securities and act as market makers in a number of such securities, and therefore can be expected to engage in portfolio transactions with the Fund.

The Common Shares will be sold to ensure that the NYSE distribution standards (*i.e.* round lots, public shares and aggregate market value) will be met.

## **Other Relationships**

The Adviser has also agreed to pay from its own assets additional compensation to Merrill Lynch, Pierce, Fenner & Smith Incorporated. The Adviser will pay a quarterly fee to Merrill Lynch, Pierce, Fenner & Smith Incorporated at the annual rate of .15% of the Fund's Managed Assets. The total amount of these additional compensation amounts paid to Merrill Lynch, Pierce, Fenner & Smith Incorporated will not exceed 3.73599% of the total price to the public of the Common Shares sold in the offering. Merrill Lynch, Pierce, Fenner & Smith Incorporated has agreed to provide, as requested by the Adviser, certain after-market shareholder support services designed to maintain the visibility of the Fund on an ongoing basis and, as requested by the Adviser, to provide relevant information, studies or reports regarding the Fund and the closed-end investment company industry.

The Adviser has also agreed to pay from its own assets additional compensation to A.G. Edwards & Sons, Inc., quarterly in arrears, an annual fee of up to .15% of the Fund's Managed Assets attributable to the Common Shares sold by A.G. Edwards & Sons, Inc. The total amount of the additional compensation payments paid to A.G. Edwards & Sons, Inc. will not exceed .30501% of the total price to the public of the Common Shares sold in the offering.

Additionally, the Adviser will pay to each of Citigroup Global Markets Inc. and UBS Securities LLC from its own assets a structuring fee for advice relating to the structure and design of the Fund and the organization of the Fund as well as services related to the sale and distribution of the Common Shares. The total amount of structuring fee payable to Citigroup Global Markets Inc. is equal to \$979,510, which is .2499% of the total price to the public of the Common Shares offered hereby. The total amount of structuring fee payable to UBS Securities LLC is equal to \$681,342, which is .17383% of the total price to the public of the Common Shares offered hereby.

The total amount of the additional compensation fees payable to Merrill Lynch, Pierce, Fenner & Smith Incorporated, Citigroup Global Markets Inc., UBS Securities LLC and A.G. Edwards & Sons, Inc., plus the partial reimbursement of \$.00667 per share of Common Shares to Underwriters, will not exceed 4.5% of the total price to the public of the Common Shares sold in this offering. The sum total of all compensation to Underwriters in connection with the public offering of Common Shares, including sales load and all forms of additional compensation to Underwriters, will be limited to 9.0% of the total price to the public of the Common Shares sold in this offering.

One or more of the Underwriters of Common Shares may also act as an underwriter or placement agent in connection with the issuance by the Fund of any financial leverage, including the Fund's preferred shares, if any.

The principal address of Merrill Lynch, Pierce, Fenner & Smith Incorporated is 4 World Financial Center, New York, New York 10080.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

ING Funds Distributor, LLC ( IFD ) will enter into a distribution agreement with the Fund. IFD will not receive any compensation for its distribution assistance. IFD is a registered broker-dealer and a member of the National Association of Securities Dealers, Inc. and may be deemed an underwriter for the purposes of this offering under the Securities Act of 1933, although it will not purchase any of the Common Shares or be a party to the Underwriting Agreement.

## **Table of Contents**

Financial Network Investment Corporation ( FNIC ), ING Financial Partners, Inc. ( IFP ) and Multi-Financial Securities Corporation ( MFSC ) may be members of the selling group in the Offering. FNIC, IFP and MFSC are all registered broker-dealers and are members of the National Association of Securities Dealers, Inc. Additionally, FNIC, IFP and MFSC are all affiliated with ING Investments and IFD.

## **CUSTODIAN, TRANSFER AGENT, DIVIDEND-DISBURSING AGENT AND REGISTRAR**

The custodian, transfer agent, dividend disbursing agent and registrar for the Fund is The Bank of New York, whose principal address is 101 Barclay Street (11E), New York, New York 10286.

## **LEGAL MATTERS**

Certain legal matters will be passed on by Sutherland Asbill & Brennan LLP, Washington, D.C., as special counsel to the Fund in connection with the offering of the Common Shares, and by Clifford Chance US LLP, New York, New York, counsel to the Underwriters. Clifford Chance US LLP and Sutherland Asbill & Brennan LLP may rely on the opinion of Richards, Layton & Finger, P.A., Wilmington, Delaware, as to certain matters of Delaware law.

## **ADDITIONAL INFORMATION**

The Fund is subject to the informational requirements of the Securities Exchange Act of 1934, as amended, and the 1940 Act and in accordance therewith files reports and other information with the Securities and Exchange Commission. Reports, proxy statements and other information filed by the Fund with the Securities and Exchange Commission pursuant to the informational requirements of such Acts can be inspected and copied at the public reference facilities maintained by the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. The Securities and Exchange Commission maintains a web site at <http://www.sec.gov> containing reports, proxy and information statements and other information regarding registrants, including the Fund, that file electronically with the Securities and Exchange Commission.

The Fund's Common Shares have been approved for listing on the NYSE subject to notice of issuance, and reports, proxy statements and other information concerning the Fund and filed with the Securities and Exchange Commission by the Fund can be inspected at the offices of the New York Stock Exchange, Inc., 20 Broad Street, New York, New York 10005.

This prospectus constitutes part of a Registration Statement filed by the Fund with the Securities and Exchange Commission under the Securities Act, and the 1940 Act. This prospectus omits certain of the information contained in the Registration Statement, and reference is hereby made to the Registration Statement and related exhibits for further information with respect to the Fund and the Common Shares offered hereby. Any statements contained herein concerning the provisions of any document are not necessarily complete, and, in each instance, reference is made to the copy of such document filed as an exhibit to the Registration Statement or otherwise filed with the Securities and Exchange Commission. Each such statement is qualified in its entirety by such reference. The complete Registration Statement may be obtained from the Securities and Exchange Commission upon payment of the fee prescribed by its rules and regulations or free of charge through the Securities and Exchange Commission's web site (<http://www.sec.gov>).

**PRIVACY PRINCIPLES OF THE FUND**

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding their non-public personal information. The following information is provided to help you understand what personal

**Table of Contents**

information the Fund collects, how the Fund protects that information and why, in certain cases, the Fund may share information with select other parties.

Generally, the Fund does not receive any non-public personal information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about its shareholders to employees of the Fund's Adviser and their delegates and affiliates with a legitimate business need for the information. The Fund maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

**ING GLOBAL ADVANTAGE AND PREMIUM OPPORTUNITY FUND**

**HISTORY OF THE FUND**

The Fund is a statutory trust organized under the laws of the State of Delaware and is registered as a closed-end, management investment company. The Fund was organized on July 7, 2005.

**ADDITIONAL INVESTMENT POLICIES AND RESTRICTIONS**

Primary investment strategies are described in the Prospectus. The following is a description of the various investment policies that may be engaged in, whether as a primary or secondary strategy, and a summary of certain attendant risks. The Sub-Adviser will use the following techniques only to the extent it believes that doing so will help to achieve the Fund's investment objectives.

**EQUITY INVESTMENTS.** As described in the Prospectus, the Fund invests primarily in common stocks of dividend paying companies located throughout the world, including the U.S.

**PREFERRED STOCKS.** The Fund may invest in preferred stocks of both domestic and foreign issuers. Under normal market conditions, the Fund expects, with respect to that portion of its managed assets invested in preferred stocks, if any, to invest only in preferred stocks of investment grade quality as determined by rating agencies such as S&P, Fitch or Moody's or, if unrated, determined to be of comparable quality by the Sub-Adviser. The foregoing credit quality policies apply only at the time a preferred stock is purchased, and the Fund is not required to dispose of a preferred stock in the event of a downgrade of an assessment of credit quality or the withdrawal of a rating. Preferred stocks involve credit risk, which is the risk that a preferred stock will decline in price, or fail to pay dividends when expected, because the issuer experiences a decline in its financial status. In addition to credit risk, investment in preferred stocks involves certain other risks as described in the Prospectus.

**EMERGING MARKET ISSUERS.** The risks of foreign (non-U.S.) investments described in the Prospectus apply to an even greater extent to investments in countries with emerging markets. The securities markets of countries with emerging markets are generally smaller, less developed, less liquid and more volatile than the securities markets of the U.S. and developed foreign markets. Disclosure and regulatory standards in many respects are less stringent than in the U.S. and developed foreign markets. There also may be a lower level of monitoring and regulation of securities markets in countries with emerging markets, and the activities of investors in such markets and enforcement of existing regulations has been extremely limited. Many countries with emerging markets have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have very negative effects on the economies and securities markets of certain countries with emerging markets. Economies in countries with emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. The economies of these countries also have been and may continue to be adversely affected by economic conditions in the countries with which they trade. The economies of countries with emerging markets may also be predominantly based on only a few industries or dependent on revenues from particular commodities. In addition, custodial services and other costs relating to investment in foreign markets may be more expensive in countries with emerging markets than in many developed foreign markets, which could reduce the Fund's income from such securities.

In many cases, governments of countries with emerging markets continue to exercise significant control over their economies, and government actions relative to the economy, as well as economic developments

## Table of Contents

generally, may affect the Fund's investments in those countries. In addition, there is a heightened possibility of expropriation or confiscatory taxation, imposition of withholding taxes on interest payments or other similar developments that could affect investments in those countries. There can be no assurance that adverse political changes will not cause the Fund to suffer a loss of any or all of its investments in countries with emerging markets.

**DERIVATIVE INSTRUMENTS.** Derivative instruments (which are instruments that derive their value from another instrument, security or index) may be purchased or sold for hedging, risk management and investment purposes. These strategies may be executed through the use of derivative contracts in the U.S. or abroad. In the course of pursuing these investment strategies, the Fund may purchase and sell exchange-listed and over-the-counter put and call options on common stocks and other securities, instruments based upon equity and fixed-income indices and other instruments, purchase and sell futures contracts and options thereon, and enter into various transactions such as swaps, caps, floors or collars. In addition, derivatives may also include new techniques, instruments or strategies that are permitted as regulatory changes occur.

Transactions in derivative instruments involve a risk of loss or depreciation due to: unanticipated adverse changes in securities prices, interest rates, indices or other financial instruments' prices; the inability to close out a position; default by the counterparty; imperfect correlation between a position and the desired hedge; tax constraints on closing out positions; and portfolio management constraints on securities subject to such transactions. The loss on derivative instruments (other than purchased options) may substantially exceed an investment in these instruments. In addition, the entire premium paid for purchased options may be lost before they can be profitably exercised. Transaction costs are incurred in opening and closing positions. Derivative instruments may sometimes increase or leverage exposure to a particular market risk, thereby increasing price volatility.

Over-the-counter (OTC) derivative instruments, equity swaps and forward sales of stocks involve an enhanced risk that the issuer or counterparty will fail to perform its contractual obligations. Some derivative instruments are not readily marketable or may become illiquid under adverse market conditions. In addition, during periods of market volatility, a commodity exchange may suspend or limit trading in an exchange-traded derivative instrument, which may make the contract temporarily illiquid and difficult to price. Commodity exchanges may also establish daily limits on the amount that the price of a futures contract or futures option can vary from the previous day's settlement price. Once the daily limit is reached, no trades may be made that day at a price beyond the limit. This may prevent the closing out of positions to limit losses. The staff of the SEC takes the position that certain purchased OTC options, and assets used as cover for written OTC options, are generally illiquid. The ability to terminate OTC derivative instruments may depend on the cooperation of the counterparties to such contracts. For thinly traded derivative instruments, the only source of price quotations may be the selling dealer or counterparty. In addition, certain provisions of the Internal Revenue Code of 1986, as amended (the Code), limit the use of derivative instruments. The Fund has claimed an exclusion from the definition of a Commodity Pool Operator (CPO) under the Commodity Exchange Act and therefore is not subject to registration or regulation as a CPO. There can be no assurance that the use of derivative instruments will benefit the Fund.

Foreign exchange traded futures contracts and options thereon may be used only if the Sub-Adviser determines that trading on such foreign exchange does not entail risks, including credit and liquidity risks, that are materially greater than the risks associated with trading on U.S. exchanges.

**SWAPS.** Swap contracts may be purchased or sold to hedge against fluctuations in securities prices, interest rates or market conditions, to mitigate non-payment or default risk or to gain exposure to particular securities, baskets of securities, indices or currencies for hedging purposes. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) to be exchanged or swapped between the parties, which returns are calculated with respect to a notional amount, i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, or in a particular security, basket of

## **Table of Contents**

securities or index. The Fund will enter into swaps only on a net basis, i.e., the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. If the other party to a swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. The net amount of the excess, if any, of the Fund's obligations over its entitlements will be maintained in a segregated account by the Fund's custodian. The Fund will not enter into any swap unless the claims-paying ability of the other party thereto is considered to be investment grade by the Sub-Adviser. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction. Swaps are traded in the over-the-counter market. The use of swaps is a highly specialized activity, which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If the Sub-Adviser is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would be unfavorably affected.

**Total return swaps.** Total return swaps are contracts in which one party agrees to make payments of the total return from the underlying asset(s), which may include securities, baskets of securities or securities indices during the specified period, in return for payments equal to a fixed or floating rate of interest or the total return from other underlying asset(s).

**Interest rate swaps.** Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments).

**FUTURES AND OPTIONS ON FUTURES.** The Fund may purchase and sell various kinds of financial futures contracts and options thereon to seek to hedge against changes in stock prices or interest rates, for other risk management purposes or to gain exposure to certain securities, indices and currencies for hedging purposes. Futures contracts may be based on various securities indices and securities. Such transactions involve a risk of loss or depreciation due to adverse changes in securities prices, which may exceed the Fund's initial investment in these contracts. The Fund will only purchase or sell futures contracts or related options for hedging purposes and in compliance with the rules of the Commodity Futures Trading Commission. These transactions involve transaction costs. Sales of futures contracts and related options generally result in realization of short-term or long-term capital gain depending on the period for which the investment is held. To the extent that any futures contract or options on futures contract held by the Fund is a Section 1256 contract under the Code, the contract will be marked-to-market annually and any gain or loss will be treated as 60% long-term and 40% short-term, regardless of the holding period for such contract.

**SHORT SALES.** The Fund may sell a security short if it owns at least an equal amount of the security sold short or another security convertible or exchangeable for an equal amount of the security sold short without payment of further compensation (a short sale "against-the-box").

Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. Short-selling exposes the Fund to unlimited risk with respect to that security due to the lack of an upper limit on the price to which an instrument can rise. Although the Fund reserves the right to utilize short sales, the Sub-Adviser may not utilize short sales at all.

**SECURITIES LENDING.** As described in the Prospectus, the Fund may lend a portion of its portfolio securities to broker-dealers or other institutional borrowers. Loans will be made only to organizations whose credit quality or claims paying ability is considered by the Sub-Adviser to be at least investment grade (rated BBB- or higher by S&P, Baa3 or higher by Moody's). All securities loans will be collateralized on a continuous basis by cash or U.S. government securities having a value, marked-to-market daily, of at least 100% of the market value of the loaned securities. The Fund may receive loan fees in connection with loans that are collateralized by securities or on loans of securities for which there is special demand. The Fund may also seek to earn income on securities loans by reinvesting cash collateral in securities consistent with its investment

## **Table of Contents**

objectives and policies, seeking to invest at rates that are higher than the rebate rate that it normally will pay to the borrower with respect to such cash collateral. Any such reinvestment will be subject to the investment policies, strategies, restrictions and risk considerations described in the Prospectus and in this SAI.

Securities loans may result in delays in recovering, or a failure of the borrower to return, the loaned securities. The defaulting borrower ordinarily would be liable to the Fund for any losses resulting from such delays or failures, and the collateral provided in connection with the loan normally would also be available for that purpose. Securities loans normally may be terminated by either the Fund or the borrower at any time. Upon termination and the return of the loaned securities, the Fund would be required to return the related cash or securities collateral to the borrower and it may be required to liquidate longer term portfolio securities in order to do so. To the extent that such securities have decreased in value, this may result in the Fund realizing a loss at a time when it would not otherwise do so. The Fund also may incur losses if it is unable to reinvest cash collateral at rates higher than applicable rebate rates paid to borrowers and related administrative costs. These risks are substantially the same as those incurred through investment leverage, and will be subject to the investment policies, strategies, restrictions and risk considerations described in the Prospectus and in this SAI.

The Fund will receive amounts equivalent to any interest or other distributions paid on securities while they are on loan, and the Fund will not be entitled to exercise voting or other beneficial rights on loaned securities. The Fund will exercise its right to terminate loans and thereby regain these rights whenever the Sub-Adviser considers it to be in the Fund's interest to do so, taking into account the related loss of reinvestment income and other factors.

**TEMPORARY INVESTMENTS.** The Fund may temporarily invest to a significant degree in cash, cash equivalents or investment grade debt securities including U.S. government securities. Cash equivalents are highly liquid, short-term securities such as commercial paper, time deposits, certificates of deposit, short-term notes and short-term U.S. government obligations.

## **FUNDAMENTAL POLICIES**

The following investment restrictions of the Fund are designated as fundamental policies and as such cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities, which as used in this SAI means the lesser of (a) 67% of the shares of the Fund present or represented by proxy at a meeting if the holders of more than 50% of the outstanding shares are present or represented at the meeting or (b) more than 50% of outstanding shares of the Fund. As a matter of fundamental policy the Fund may not:

- (1) Borrow money, except as permitted by the Investment Company Act of 1940, as amended (the 1940 Act), the rules thereunder and any interpretations or exemptions from the 1940 Act. However, the Fund may borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities. The 1940 Act currently requires that the Fund have 300% asset coverage with respect to all borrowings other than temporary borrowings;
- (2) Issue senior securities, as defined in the 1940 Act, other than (a) preferred shares which immediately after issuance will have asset coverage of at least 200%, (b) indebtedness which immediately after issuance will have asset coverage of at least 300%, or (c) the borrowings permitted by investment restriction (1) above. The 1940 Act currently defines senior security as any bond, debenture, note or similar obligation or instrument constituting a security and evidencing indebtedness and any stock of a class having priority over any other class as to distribution of assets or payment of dividends. Debt and equity securities issued by a closed-end investment company meeting the foregoing asset coverage provisions are excluded from the general 1940 Act prohibition on the issuance of senior securities;

- (3) Purchase securities on margin (but the Fund may obtain such short-term credits as may be necessary for the clearance of purchases and sales of securities). The purchase of investment assets with the

**Table of Contents**

proceeds of a permitted borrowing or securities offering will not be deemed to be the purchase of securities on margin;

- (4) Underwrite securities issued by other persons, except insofar as it may technically be deemed to be an underwriter under the Securities Act of 1933, as amended, in selling or disposing of a portfolio investment, or participating in a secondary offering of a portfolio investment;
- (5) Make loans to other persons, except by (a) the acquisition of obligations in which the Fund is authorized to invest in accordance with its investment objectives and policies, (b) entering into repurchase agreements, or (c) lending its portfolio securities;
- (6) Purchase or sell real estate, although it may purchase and sell securities which are secured by interests in real estate, securities of issuers which invest or deal in real estate, securities of real estate investment trusts and other securities that represent a similar indirect interest in real estate. The Fund reserves the freedom of action to hold and to sell real estate acquired as a result of the ownership of securities; and
- (7) Purchase or sell physical commodities or contracts for the purchase or sale of physical commodities. Physical commodities do not include futures contracts with respect to securities, securities indices, currencies, interest or other financial instruments. The Fund may invest in currency instruments and contracts and financial instruments and contracts that might be deemed to be commodities and commodities contracts.
- (8) Purchase a security if, as a result, more than 25% of the value of its total assets would be invested in securities of one or more issuers conducting their principal business activities in the same industry or group of industries, provided that this limitation shall not apply to obligations issued or guaranteed by the U.S. Government or its agencies and instrumentalities.

The Fund has also adopted the following non-fundamental investment policies which may be changed by the Board without approval of the Fund's shareholders. As a matter of non-fundamental policy, the Fund may not make short sales of securities or maintain a short position, unless at all times when a short position is open it either owns an equal amount of such securities or owns securities convertible into or exchangeable, without payment of any further consideration, for securities of the same issue as, and equal in amount to, the securities sold short. The Fund will provide its shareholders with at least 60 days' prior written notice of any material change in such investment policy. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy.

Whenever an investment policy or investment restriction set forth in the Prospectus or this SAI states a maximum percentage of assets that may be invested in any security or other assets or describes a policy regarding quality standards, such percentage limitation or standard shall be determined immediately after and as a result of the Fund's acquisition of such security or asset. Accordingly, any later increase or decrease resulting from a change in values, assets or other circumstances or any subsequent rating change made by a rating service (or as determined by the Sub-Adviser if the security is not rated by a rating agency) will not compel the Fund to dispose of such security or other asset. Notwithstanding the foregoing, the Fund must always be in compliance with the borrowing policies set forth above.

**Table of Contents****MANAGEMENT OF THE FUND**

## TRUSTEES

The Trustees of the Fund are responsible for the overall management and supervision of the affairs of the Fund. The Trustees and officers of the Fund are listed below. Except as indicated, each individual has held the office shown or other offices in the same company for the last five years.

Set forth in the table below is information about each Trustee of the Fund.

<b>Name, Address and Age</b>	<b>Position(s) held with Fund</b>	<b>Term of Office and Length of Time Served<sup>(1)</sup></b>	<b>Principal Occupation(s) during the Past 5 Years</b>	<b>Number of Portfolios in Portfolio Complex overseen by Trustee<sup>(2)</sup></b>	<b>Other Directorships held by Trustee</b>

<sup>(1)</sup> Trustees serve until their successors are duly elected and qualified, subject to the Board's retirement policy which states that each duly elected or appointed Trustee who is not an interested person of the Fund, as defined in the 1940 Act ( Independent Trustees ), shall retire from service as a Trustee at the first regularly scheduled quarterly meeting of the Board that is held after the Trustee reaches the age of 70. A unanimous vote of the Board may extend the retirement date of a Trustee for up to one year. An extension may be permitted if the retirement would trigger a requirement to hold a meeting of shareholders of the Fund under applicable law, whether for purposes of appointing a successor to the Trustee or if otherwise necessary under applicable law, in which the extension would apply until such time as the shareholder meeting can be held or is no longer needed. The term of office of Class I Trustees shall expire on the date of the first annual meeting of Shareholders or special meeting in lieu thereof in 2006. The term of office of Class II Trustees shall expire on the date of the second annual meeting of Shareholders or special meeting in lieu thereof in 2007. The term of office of Class III Trustees shall expire on the date of the third annual meeting of Shareholders or special meeting in lieu thereof in 2008. Upon expiration of the term of office of each class as set forth above, the number of Trustees in such class, as determined by the Board of Trustees, shall be elected for a term expiring on the date of the third annual meeting of Shareholders or special meeting in lieu thereof following such expiration to succeed the Trustees whose terms of office expire.

<sup>(2)</sup> For the purposes of this table, Fund Complex means the following investment companies: the Fund; ING Global Equity Dividend and Premium Opportunity Fund; ING Equity Trust; ING Funds Trust; ING

**Table of Contents**

Investment Funds, Inc.; ING Investors Trust; ING Mayflower Trust; ING Mutual Funds; ING Prime Rate Trust; ING Senior Income Fund; ING Variable Insurance Trust; ING Variable Products Trust; ING VP Emerging Markets Fund, Inc.; ING VP Natural Resources Trust; USLICO Series Fund and ING Partners, Inc.

- (3) Commenced service as a Trustee on January 1, 2005. Prior to January 1, 2005, Messrs. Boyer and Kenny were members of the board of directors of ING Partners, Inc. On January 1, 2005, the ING Partners, Inc. board of directors was unified with the boards of the other Portfolios.
- (4) Shaun Mathews, Senior Vice President of ING Life Insurance and Annuity Company, has held a seat on the board of directors of the Mark Twain House & Museum since September 19, 2002. ING Groep N.V. makes non-material, charitable contributions to The Mark Twain House & Museum.
- (5) Messrs. McInerney and Turner are deemed to be interested persons of the Fund as defined in the 1940 Act because of their relationship with ING Groep, N.V., the parent corporation of the Investment Adviser, ING Investments, LLC.
- (6) Mr. McInerney is also a director of the following investment companies: ING VP Balanced Portfolio, Inc.; ING Strategic Allocation Portfolio, Inc.; ING GET Fund; ING VP Intermediate Bond Portfolio; ING VP Money Market Portfolio; ING Variable Funds; ING Variable Portfolios, Inc.; and ING Series Fund, Inc., therefore for the purposes of this table with reference to Mr. McInerney, Fund Complex includes these companies

## **Table of Contents**

### **BOARD**

The Board of Trustees of the Fund ( Board ) governs the Fund and is responsible for protecting the interests of the shareholders. The Trustees are experienced executives who oversee the Fund s activities, review contractual arrangements with companies that provide services to the Fund, and review the Fund s performance.

### **FREQUENCY OF MEETINGS**

The Board expects to conduct regular meetings six times a year. The Audit and Valuation, Proxy and Brokerage Committees meet regularly four times per year, the Investment Review Committee meets six times per year, the Contracts Committee meets seven times per year and the remaining Committees meet as needed. In addition, the Board or the Committees may hold special meetings by telephone or in person to discuss specific matters that may require action prior to the next regular meeting. Each Committee listed below operates pursuant to a Charter approved by the Board.

### **COMMITTEES**

An Executive Committee of the Board was formed in order to act on behalf of the full Board between meetings when necessary. The Executive Committee currently consists of two Independent Trustees and two Trustees who are interested persons, as defined in the 1940 Act, of the Fund. The following Trustees serve as members of the Executive Committee: Messrs. Turner, McInerney, May and Patton. Mr. Patton serves as Chairman of the Committee.

The Board has an Audit Committee whose functions include, among others, to meet with the independent registered public accounting firm of the Fund to review the scope of the Fund s audit, its financial statements and interim accounting controls, and to meet with management concerning these matters, among other things. The Audit Committee currently consists of four Independent Trustees: Messrs. Earley, Kenny, Vincent and Putnam. Mr. Earley serves as Chairman of the Committee.

The Board has a Valuation, Proxy and Brokerage Committee (formerly, the Valuation and Proxy Voting Committee) whose functions include, among others, reviewing the determination of the value of securities held by the Fund for which market value quotations are not readily available, overseeing management s administration of proxy voting and overseeing the effectiveness of the adviser s usage of the Fund s brokerage and adviser s compliance with changing regulations regarding the allocation of brokerage for services other than pure trade executions. The Valuation, Proxy and Brokerage Committee currently consists of five Independent Trustees: Dr. Gitenstein and Messrs. May, Patton, Boyer and Wedemeyer. Mr. May serves as Chairman of the Committee.

The Board has established a Nominating and Governance Committee (formerly, the Nominating Committee) for the purpose of, among other things, (1) identifying and recommending to the Board candidates it proposes for nomination to fill Independent Trustees vacancies on the Board; (2) reviewing workload and capabilities of Independent Board members and recommending changes to size or composition of the Board, as necessary; (3) monitoring regulatory developments and recommending modifications to the committee s responsibilities; (4) considering and recommending the creation of additional committees or changes to Trustee policies and procedures based on rule changes and best practices in corporate governance; (5) reviewing compensation of Independent Board members and making recommendations for any changes; and (6) overseeing the Board s annual self evaluation process.

In evaluating candidates, the Nominating and Governance Committee may consider a variety of factors, but it has not at this time set any specific minimum qualifications that must be met. Specific qualifications of candidates for Board membership will be based on the needs of the Board at the time of nomination.

## **Table of Contents**

The Nominating and Governance Committee is willing to consider nominations received from shareholders and shall assess shareholder nominees in the same manner as it reviews its own nominees. A shareholder nominee for trustee should be submitted in writing to the Fund's Secretary. Any such shareholder nomination should include at a minimum the following information as to each individual proposed for nominations as trustee: such individual's written consent to be named in the proxy statement as a nominee (if nominated) and to serve as a trustee (if elected), and all information relating to such individual that is required to be disclosed in the solicitation of proxies for election of trustees, or is otherwise required, in each case under applicable federal securities laws, rules and regulations.

The Secretary shall submit all nominations received in a timely manner to the Nominating and Governance Committee. To be timely, in connection with a shareholder meeting to elect trustees, any such submission must be delivered to the Fund's Secretary not earlier than the 90th day prior to such meeting and not later than the close of business on the later of the 60th day prior to such meeting or the 10th day following the day on which public announcement of the date of the meeting is first made, by either the disclosure in a press release or in a document publicly filed by the Funds with the SEC.

The Nominating and Governance Committee consists of four Independent Trustees: Dr. Gitenstein and Messrs. Kenny, May and Wedemeyer. Dr. Gitenstein serves as Chairman of the Committee.

The Board has established an Investment Review Committee to, among other things, monitor the investment performance of the Fund and make recommendations to the Board with respect to the Fund. The Investment Review Committee for the Domestic Equity funds currently consists of four Independent Trustees and one Trustee who is an interested person, as defined in the 1940 Act: Messrs. Kenny, Putnam, Earley, Turner and Vincent. Mr. Vincent serves as Chairman of the Investment Review Committee for the Domestic Equity funds. The Investment Review Committee for the International and Fixed-Income funds currently consists of five Independent Trustees and one Trustee who is an interested person as defined in the 1940 Act of the Fund: Dr. Gitenstein and Messrs. Patton, May, Boyer, McInerney and Wedemeyer. Mr. Wedemeyer serves as Chairman of the Investment Review Committee for the International and Fixed-Income funds.

The Board has established a Compliance Committee for the purpose of, among other things, coordinating activities between the Board and the Chief Compliance Officer ( CCO ) of the Fund. The Compliance Committee facilitates the information flow among Board members and the CCO between Board meetings; works with the CCO and management to identify the types of reports to be submitted by the CCO to the Compliance Committee and the Board; coordinates CCO oversight activities with other ING Fund boards; and makes recommendations regarding the role, performance and oversight of the CCO. The Compliance Committee currently consists of three Independent Trustees: Messrs. Boyer, Earley and Patton. Mr. Boyer serves as Chairman of the Committee.

The Board has established a Contracts Committee, whose primary function is to review all investment advisory, sub-advisory and all annually renewable agreements as well as make recommendations to the Board regarding the continuation of existing contractual relationships. The Contracts Committee is also responsible for recommending new contracts when additional funds are established or there is a change in an advisory relationship. The Contracts Committee currently consists of five Independent Trustees: Messrs. Boyer, May, Patton, Vincent and Wedemeyer. Mr. Vincent serves as Chairman of the Committee.

TRUSTEE OWNERSHIP OF SECURITIES

SHARE OWNERSHIP POLICY

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

In order to further align the interests of the Independent Trustees with the Fund's shareholders, it is the policy of the Board that Independent Trustees should at all times own, beneficially, shares of one or more of the ING Funds for which such Independent Trustee serves as a Trustee. For this purpose, beneficial ownership of

**Table of Contents**

Fund shares includes ownership of a variable annuity contract or a variable life insurance policy whose proceeds are invested in a Fund.

Under this Policy, the initial value of investments in the ING Funds that are beneficially owned by a Trustee must equal at least \$50,000. New Trustees shall satisfy the foregoing requirements within a reasonable amount of time of becoming a Trustee. A decline in the value of any Fund investments will not cause a Trustee to have to make any additional investments under this Policy.

Set forth below is the dollar range of equity securities owned by each Trustee:

Name of Trustee	Dollar Range of Equity Securities in the Fund as of December 31, 2004 <sup>(1)</sup>	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by Trustee in Family of Investment Companies
John V. Boyer <sup>(2)</sup>	N/A	NONE
J. Michael Earley	N/A	\$50,001 - \$100,000
R. Barbara Gitenstein	N/A	\$50,001 - \$100,000
Patrick W. Kenny <sup>(2)</sup>	N/A	NONE
Walter H. May	N/A	Over \$100,000
Jock Patton	N/A	Over \$100,000
David W. C. Putnam	N/A	Over \$100,000
Roger B. Vincent	N/A	Over \$100,000
Richard A. Wedemeyer	N/A	\$50,001 - \$100,000

<sup>(1)</sup> The Fund had not commenced operations as of December 31, 2004.

<sup>(2)</sup> Commenced services as Trustee on January 1, 2005. Prior to January 1, 2005, Messrs. Boyer and Kenny were members of the board of directors of ING Partners, Inc. On January 1, 2005, the ING Partners, Inc. board of directors was unified with the boards of the other Funds in the ING Complex of Funds.

John G. Turner	N/A	Over \$100,000

<sup>(1)</sup> The Fund had not commenced operations as of December 31, 2004.

**Table of Contents**

## INDEPENDENT TRUSTEE OWNERSHIP OF SECURITIES

Set forth in the table below is information regarding each Independent Trustee's (and his or her immediate family members') share ownership in securities of the ING Funds' investment adviser or principal underwriter, and the ownership of securities in an entity directly or indirectly controlling, controlled by or under common control with the investment adviser or principal underwriter of the ING Funds (not including registered investment companies) as of December 31, 2004.

Name of Trustee	Name of Owners and Relationship to Trustee	Company	Title of Class	Value of Securities	Percentage of Class
John V. Boyer <sup>(1)</sup>	N/A	N/A	N/A	\$ 0	N/A
J. Michael Earley	N/A	N/A	N/A	\$ 0	N/A
R. Barbara Gitenstein	N/A	N/A	N/A	\$ 0	N/A
Patrick W. Kenny <sup>(1)</sup>	N/A	N/A	N/A	\$ 0	N/A
Walter H. May	N/A	N/A	N/A	\$ 0	N/A
Jock Patton	N/A	N/A	N/A	\$ 0	N/A
David W. C. Putnam	N/A	N/A	N/A	\$ 0	N/A
Roger B. Vincent	N/A	N/A	N/A	\$ 0	N/A
Richard A. Wedemeyer	N/A	N/A	N/A	\$ 0	N/A

<sup>(1)</sup> Commenced services as Trustee on January 1, 2005. Prior to January 1, 2005, Messrs. Boyer and Kenny were members of the board of directors of ING Partners, Inc. On January 1, 2005, the ING Partners, Inc. board of directors was unified with the boards of the other Funds in the ING Complex of Funds.

## COMPENSATION OF TRUSTEES

Each Fund in the ING Complex of Funds pays each Trustee who is not an interested person a *pro rata* share, as described below, of: (i) an annual retainer of \$45,000 (Messrs. Patton, Earley, Vincent, May, Boyer, Wedemeyer and Dr. Gitenstein, as Chairpersons of committees of the Board, each receives an additional annual retainer of \$30,000, \$20,000, \$10,000, \$10,000, \$20,000 and \$2,500<sup>1</sup>, respectively. Additionally, as Chairperson of the Investment Review and Contract Committees, Mr. Vincent receives an additional retainer of \$20,000 and \$15,000, respectively); (ii) \$7,000 for each in person meeting of the Board (Mr. Patton, as Chairperson of the Board, receives an additional \$1,000 for each Board meeting); (iii) \$3,000 per attendance of any committee meeting (Chairpersons of committees of the Board receive an additional \$1,000 for each committee meeting); (iv) \$2,000 per special telephonic meeting; and (v) out-of-pocket expenses. The *pro rata* share paid by each Fund is based on each Fund's average net assets as a percentage of the average net assets of all the funds managed by the investment adviser or its affiliates, Directed Services, Inc. and ING Life Insurance and Annuity Company, for which the Trustees serve in common as Trustees/Directors.

The following table sets forth estimated information that the Fund expects to pay Trustees for the fiscal year ending February 28, 2006 and the aggregate compensation paid by the ING Complex of Funds for the fiscal year ended February 28, 2005. Officers of the Fund and Trustees who are interested persons of the Fund do not receive any compensation from the Fund or any other funds managed by the Adviser or Sub-Adviser.

<sup>1</sup> The Chairperson for the Nominating and Governance Committee is paid on a quarterly basis and only if the Nominating and Governance Committee has been active for that quarter. The compensation per quarter to the Chairperson is \$625, which if the Nominating Committee has been active for all four quarters will result in the Chairperson receiving the full annual retainer of \$2,500.

Barbara Gitenstein, Trustee	\$ 1,470	N/A	N/A	\$ 97,000

(1) The Fund had not commenced operations as of the date of this SAI and therefore, did not pay any compensation to any Trustees during the fiscal year ending February 28, 2005. The compensation presented in the table is estimated for the fiscal year ending February 28, 2006.

(2) The Fund has adopted a retirement policy under which a Trustee who has served as an Independent Trustee for five years or more will be paid by the ING Funds at the time of his or her retirement an amount equal to twice the compensation normally paid to the Independent Trustee for one year of service.

(3) Represents compensation from 153 funds (total in complex as of June 30, 2005). Does not include Funds that are a series of ING Partners, Inc., except for Messrs. Boyer and Kenny.

(4) Commenced services as Trustee on January 1, 2005. Prior to January 1, 2005, Messrs. Boyer and Kenny were members of the board of directors of ING Partners, Inc. On January 1, 2005, the ING Partners, Inc. board of directors was unified with the boards of the other Funds in the ING Complex of Funds. The compensation reflected is that of the fees paid by ING Partners, Inc. in 2004.

(5) Interested person, as defined in the 1940 Act, of the Company because of the affiliation with ING Groep, N.V. the parent corporation of the Investment Adviser, the Distributor and the Administrator. Officers and Trustees who are interested persons do not receive any compensation from the Funds.

**CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS**

Prior to the public offering of Common Shares, ING Investments will purchase Common Shares from the Fund in an amount sufficient to satisfy the net worth requirements of Section 14(a) of the 1940 Act. At such time, ING Investments will own 100% of the outstanding Common Shares. ING Investments may be deemed to control the Fund until such time as it owns less than 25% of the outstanding Common Shares, which is expected to occur as of the completion of the Offering.

**Table of Contents**

**INVESTMENT ADVISORY AND OTHER SERVICES**

ING Investments, LLC ( ING Investments or Adviser ) is registered as an investment adviser with the SEC and serves as an investment adviser to registered investment companies (or series thereof), as well as structured finance vehicles. ING Investments, subject to the authority of the Trustees of the Fund, has the overall responsibility for the management of the Fund's portfolio subject to delegation of certain responsibilities to the Sub-Adviser. ING Investments is an indirect wholly-owned subsidiary of ING Groep, N.V. (NYSE: ING) ( ING Groep ). ING Groep is one of the largest financial services organizations in the world with approximately 113,000 employees. Based in Amsterdam, ING Groep offers an array of banking, insurance and asset management services to both individual and institutional investors.

ING Investments serves pursuant to an investment management agreement between ING Investments and the Fund ( Investment Management Agreement ). The Investment Management Agreement requires ING Investments to oversee the provision of all investment advisory and portfolio management services of the Fund. Pursuant to a sub-advisory agreement, ING Investments has delegated certain management responsibilities to ING Investment Management Co. ( ING IM or Sub-Adviser ) ( Sub-Adviser Agreement ).

The Investment Management Agreement requires ING Investments to provide, subject to the supervision of the Board, investment advice and investment services to the Fund and to furnish advice and recommendations with respect to investment of the Fund's assets and the purchase or sale of its portfolio securities. ING Investments also provides investment research and analysis. The Investment Management Agreement provides that ING Investments is not subject to liability to the Fund for any act or omission in the course of, or connected with, rendering services under the Agreement, except by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations and duties under the Investment Management Agreement.

After an initial term of two years, both the Investment Management Agreement and the Sub-Adviser Agreement continue in effect from year to year so long as such continuance is specifically approved at least annually by (a) the Board or (b) the vote of a majority (as defined in the 1940 Act) of the Fund's outstanding shares voting as a single class; provided that in either event the continuance is also approved by at least a majority of the Board who are not interested persons (as defined in the 1940 Act) by vote cast in person at a meeting called for the purpose of voting on such approval.

In determining whether to approve the advisory and sub-advisory agreements for the Fund, the Board received and evaluated such information as it deemed necessary for an informed determination of whether each agreement, and the proposed policies and procedures for the Fund, should be approved for the Fund. The materials provided to the Board prior to the Board meeting in support of the Fund and its Investment Management and Sub-Adviser Agreements included the following: (1) a memorandum presenting management's rationale for requesting the launch of the Fund; (2) information about the Fund's investment portfolio, objectives and strategies; (3) responses from ING Investments to questions posed by Kirkpatrick & Lockhart Nicholson Graham LLP ( K&LNG ), independent legal counsel, on behalf of the Independent Trustees; (4) supporting documentation, including copies of the forms of Investment Management and Sub-Adviser Agreements for the Fund; and (5) other information relevant to the Board's evaluation. In addition, the Board considered the information provided periodically throughout the year in presentations to the Board by ING Investments and ING IM in the context of Fund oversight and investment management. At the Board meeting at which the Investment Management and Sub-Adviser Agreements were considered, the Board met with and considered a presentation given by the proposed managers to the Fund.

In determining whether to approve the Investment Management and Sub-Adviser Agreements for the Fund, the Board considered a number of factors that its members believed, in light of the legal advice furnished to them by K&LNG, independent legal counsel, and their own business judgment, to be relevant. The Board, including a majority of the Independent Trustees, did not identify any single factor as all-important or controlling, and each member of the Board may have given different weight to different factors.

## **Table of Contents**

The Board's consideration of whether to approve the Investment Management Agreement with ING Investments on behalf of the Fund took into account factors that included the following: (1) the nature and quality of the services to be provided by ING Investments to the Fund under the proposed Investment Management Agreement; (2) ING Investments' experience as a manager-of-managers overseeing Fund sub-advisers to other Funds within the ING Funds complex; (3) ING Investments' strength and reputation within the industry; (4) the fairness of the compensation under the Investment Management Agreement in light of the services to be provided to the Fund and taking into account the sub-advisory fees payable by ING Investments to ING IM; (5) the pricing structure (including the expenses to be borne by shareholders and taking into account the expense limitation agreements between the Fund and ING Investments) of the Fund, as compared to other similarly-managed funds in a comparable selected peer group, including management's analysis that (a) the proposed advisory fee for the Fund is below the median and the average advisory fees of the funds in the Fund's selected peer group, and (b) the proposed expense ratio for the Fund is below the median and average expenses borne by the funds in the Fund's selected peer group; (6) the projected profitability to ING Investments when sub-advisory fees payable by ING Investments to ING IM are taken into account; (7) the personnel, operations, financial condition, and investment management capabilities, methodologies and resources of ING Investments, including its management team's expertise in the management of other funds, including closed-end funds; (8) ING Investments' compliance capabilities, as demonstrated by, among other things, its policies and procedures adopted pursuant to Rule 206(4)-7 under the Investment Advisers Act of 1940, which had previously been approved by the Board in connection with their oversight of other Funds in the ING Funds complex; (9) the information that had been provided by ING Investments at regular Board meetings, and in anticipation of the meeting at which the Investment Management Agreement was considered, with respect to its capabilities as a manager-of-managers; (10) fall-out benefits to ING Investments and its affiliates and benefits to the shareholders from the Fund's relationship with ING; and (11) ING Investments' ability to negotiate an offering underwritten by a syndicate of well-known, successful financial service providers led by Merrill Lynch.

The Board determined, among other things, that: (1) the management fee rate payable to ING Investments by the Fund is below the fee rates of its selected peer group and is reasonable, taking into account the sub-advisory fees payable to ING IM; (2) the expense ratio of the Fund is competitive with its selected peer group; (3) based upon the Board's experience with ING Investments in managing other funds in the ING Funds complex, ING Investments is capable of overseeing the Fund's investment program; (4) ING Investments has sufficient financial resources available to it to fulfill its commitments to the Fund under the proposed Investment Management Agreement; and (5) ING Investments maintains an appropriate compliance program, with this conclusion based upon the Board's previous and ongoing review of the compliance program.

In reviewing the Sub-Adviser Agreement with ING IM, the Board also considered a number of factors, including, but not limited to, the following: (1) ING Investments' view of the reputation of ING IM as a manager to other funds in the ING Funds complex, including a recently-launched, successful closed-end fund; (2) ING IM's strength and reputation in the industry; (3) ING IM's experience and skill in managing other closed-end fund offerings; (4) the information that had been provided by ING IM in anticipation of the meeting at which the Sub-Adviser Agreement was considered, with respect to its sub-advisory services in general and its management of closed-end funds in particular; (5) the nature and quality of the services to be provided by ING IM under the proposed Sub-Adviser Agreement; (6) the personnel, operations, financial condition, and investment management capabilities, methodologies and resources of ING IM, including its management team's expertise in the management of closed-end funds specializing in the types of equities and options investment in which the Fund would engage; (7) the fairness of the compensation under the Sub-Adviser Agreement in light of the services to be provided by and the projected profitability of ING IM, as the Fund's sub-adviser; (8) the costs for the services to be provided by ING IM; (9) ING IM's operations and compliance program, including its policies and procedures adopted pursuant to Rule 206(4)-7 under the Investment Advisers Act of 1940, which had previously been approved by the Board as part of its oversight of other funds in the ING Funds complex; (10) ING IM's financial condition; (11) the appropriateness of the selection of ING IM in light of the Fund's investment objectives and prospective investor base; (12) ING IM's Code of Ethics, which had previously been approved for other ING Funds, and related procedures for complying with that Code; and (13) ING IM's expertise in managing a closed-end fund investing in a unique mix of equities and derivatives securities.

## **Table of Contents**

During the course of its deliberations as to whether to approve ING IM as sub-adviser to the Fund, the Board reached the following conclusions: (1) ING IM is qualified to manage the Fund's assets in accordance with its investment objectives and policies; (2) the investment strategy to be pursued by ING IM is appropriate for seeking the Fund's investment objectives and is consistent with the interests of the investors that would choose to invest in the Fund; (3) ING IM has sufficient financial resources available to it to fulfill its commitments to the Fund under the proposed Sub-Advisory Agreement; (4) ING IM maintains an appropriate compliance program, with this conclusion based upon the Board's previous and ongoing review of ING IM's compliance program; and (5) the fees paid by the Adviser to ING IM are appropriate with respect to the services provided.

Based upon its review, the Board determined that the Investment Management Agreement and the Sub-Adviser Agreement are in the best interests of the Fund and its shareholders and that the fees payable under each Agreement are fair and reasonable.

The Investment Management Agreement and the Sub-Adviser Agreement are both terminable without penalty upon notice given by the Board or by a vote of the holders of a majority of the Fund's outstanding shares voting as a single class, or upon notice given by ING Investments. The Investment Management Agreement and the Sub-Adviser Agreement both provide for automatic termination in the event of their assignment (as defined in the 1940 Act). ING Investments remains responsible for providing general management services to the Fund, including overall supervisory responsibility for the general management and investment of the Fund's assets, and, subject to the review and approval of the Board, will among other things: (i) set the Fund's overall investment strategies; (ii) evaluate, select and recommend sub-advisers to manage all or part of the Fund's assets; (iii) when appropriate, allocate and reallocate the Fund's assets among multiple sub-advisers; (iv) monitor and evaluate the investment performance of sub-advisers; and (v) implement procedures reasonably designed to ensure that the Sub-Adviser complies with the Fund's investment objectives, strategies and restrictions.

## **INVESTMENT ADVISORY FEES**

ING Investments bears the expense of providing its services to the Fund, and it also pays the fees of the Sub-Adviser. For its services, the Fund pays ING Investments an annual fee, payable monthly in arrears, in an amount equal to 0.75% of the Fund's average daily managed assets. Managed assets include assets acquired through the Fund's use of leverage, if any.

## **SUB-ADVISER AGREEMENT**

ING Investments pays all of its expenses arising from the performance of its obligations under the Investment Management Agreement, including all fees payable to the Sub-Adviser, and executive salaries and expenses of the Trustees and officers of the Fund who are employees of ING Investments or its affiliates. The Sub-Adviser pays all of its expenses arising from the performance of its obligations under the Sub-Adviser Agreement.

The Sub-Adviser Agreement may be terminated upon written notice without payment of any penalty by ING Investments, the Trustees on behalf of the Fund or the shareholders of the Fund. Otherwise, after an initial term of two years, the Sub-Adviser Agreement will remain in effect from year to year, subject to the annual approval of the Board, on behalf of the Fund, or the vote of a majority of the outstanding voting securities, and

**Table of Contents**

the vote, cast in person at a meeting duly called and held, of a majority of the Trustees on behalf of the Fund who are not parties to a Sub-Adviser Agreement or interested persons (as defined in the 1940 Act) of any such party.

Pursuant to the Sub-Adviser Agreement between ING Investments and ING IM, ING IM serves as the sub-adviser to the Fund. In this capacity, ING IM, subject to the supervision and control of ING Investments and the Trustees of the Fund on behalf of the Fund, provides investment advice for the Fund's investments, including its investments in dividend yielding common stocks and the Fund's index call writing strategy, consistent with the Fund's investment objectives, and executes any of the Fund's investment policies that it deems appropriate to utilize from time to time.

As compensation to the Sub-Adviser for its services to the Fund, ING Investments pays the sub-adviser a monthly fee in arrears equal to the following as a percentage of the Fund's average daily managed assets managed during the month:

**SUB-ADVISER**

**ANNUAL SUB-ADVISORY FEE**

ING IM

0.6375% of the Fund's average daily managed assets

**OTHER ACCOUNTS MANAGED**

The following table shows the number of accounts and total assets in the accounts managed by the portfolio managers of the Sub-Adviser as of May 31, 2005.

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in billions)	Number of Accounts	Total Assets (in billions)	Number of Accounts	Total Assets (in billions)
Frank Van Etten	0	0	26	3.16	1	.02

Ernie Tang	0	0	0	0	0	0
Hugh Whelan	50	7.21	13	1.56	23	3.15
Paul Zemsky	0	0	0	0	0	0

**POTENTIAL CONFLICTS OF INTEREST**

A portfolio manager may be subject to potential conflicts of interest because the portfolio manager is responsible for other accounts in addition to the Fund. These other accounts may include, among others, other mutual funds, separately managed advisory accounts, commingled trust accounts, insurance, wrap fee programs and hedge funds. Potential conflicts may arise out of the implementation of differing investment

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

strategies for the portfolio manager's various accounts, the allocation of investment opportunities among those accounts or differences in the advisory fees paid by the portfolio manager's accounts.

A potential conflict of interest may arise as a result of the portfolio manager's responsibility for multiple accounts with similar investment guidelines. Under these circumstances, a potential investment may be suitable for more than one of the portfolio manager's accounts, but the quantity of the investment available for purchase is less than the aggregate amount the accounts would ideally devote to the opportunity. Similar conflicts may arise when multiple accounts seek to dispose of the same investment.

## **Table of Contents**

A portfolio manager may also manage accounts whose objectives and policies differ from those of the Fund. These differences may be such that under certain circumstances, trading activity appropriate for one account managed by the portfolio manager may have adverse consequences for another account managed by the portfolio manager. For example, if an account were to sell a significant position in a security, which could cause the market price of that security to decrease, while the Fund maintained its position in that security.

A potential conflict may arise when a portfolio manager is responsible for accounts that have different advisory fees – the difference in the fees may create an incentive for the portfolio manager to favor one account over another, for example, in terms of access to particularly appealing investment opportunities. This conflict may be heightened where an account is subject to a performance-based fee.

As part of its compliance program, ING IM has adopted policies and procedures reasonably designed to address the potential conflicts of interest described above.

## **COMPENSATION STRUCTURE OF PORTFOLIO MANAGERS**

Compensation generally consists of (a) fixed base salary and (b) bonus which is based on ING IM's performance, consisting of pre-tax performance of the accounts for which the portfolio managers are primarily and jointly responsible compared to account benchmarks and relevant peer groups (see below), and revenue growth of the accounts for which they are responsible. Certain investment professionals may also be eligible to receive long-term equity awards tied to the performance of ING IM and its parent company, ING Groep.

Portfolio managers are eligible to participate in an annual incentive plan. The overall design of the ING IM annual incentive plan was developed to closely tie compensation to performance, structured in such a way as to drive performance and promote retention of top talent. As with base salary compensation, individual target awards are determined and set based on external market data and internal comparators. Investment performance is measured on both index and relative performance in all areas. The relevant indices are the S&P 500 and MSCI-EAFE indices. Relevant peer groups include Morningstar, Lipper and Lehman. The measures for the team are outlined on a scorecard that is reviewed on an annual basis. These scorecards reflect a comprehensive approach to measuring investment performance versus both benchmarks and peer groups over a one year period. The overall ING IM scorecards are calculated based on an asset weighted aggregation of the individual team scorecards.

Investment professionals' performance measures for bonus determinations are weighted by 25% of the weight attributable to the overall ING IM performance and 75% attributable to their specific team results, which results are based both on a qualitative evaluation and quantitative results (i.e. relative performance).

The portfolio managers participate in ING's Pension, Retirement and Option plans, which do not discriminate in favor of portfolio managers or a group of employees that includes portfolio managers and are available generally to all salaried employees.

**Table of Contents****PORTFOLIO MANAGER OWNERSHIP OF SECURITIES**

The following table shows the dollar range of shares of the Fund owned by the portfolio manager as of June 30, 2005, including investments by his immediate family members and amounts invested through retirement and deferred compensation plans.

<b><u>Portfolio Manager</u></b>	<b><u>Dollar Range of Fund Shares Owned</u></b>
Frank Van Etten	None
Mary Ann Fernandez	None
Carl Ghielen	None
Martin Jansen	None
Bas Peeters	None
Ernie Tang	None
Hugh Whelan	None
Paul Zemsky	None

**PROXY VOTING PROCEDURES**

The Board has adopted proxy voting procedures and guidelines to govern the voting of proxies relating to the Fund's portfolio securities. The procedures and guidelines delegate to ING Investments the authority to vote proxies relating to portfolio securities, and provide a method for responding to potential conflicts of interest. In delegating voting authority to ING Investments, the Board has also approved ING Investments proxy voting procedures, which require ING Investments to vote proxies in accordance with the Fund's proxy voting procedures and guidelines. An independent proxy voting service has been retained to assist in the voting of Fund proxies through the provision of vote analysis, implementation and recordkeeping and disclosure services. In addition, the Board established the Valuation, Proxy and Brokerage Committee (formerly, Valuation and Proxy Voting Committee) to oversee the implementation of the Fund's proxy voting procedures. A copy of the proxy voting procedures and guidelines of the Fund, including procedures of ING Investments, is attached hereto as Appendix A. No later than August 31st of each year, information regarding how the Fund voted proxies relating to portfolio securities for the one-year period ending June 30th is available through the ING Funds' website ([www.ingfunds.com](http://www.ingfunds.com)) or by accessing the SEC's EDGAR database, available on the SEC's website at ([www.sec.gov](http://www.sec.gov)).

**ADMINISTRATION**

ING Funds Services, LLC ( "ING Funds Services" or the "Administrator" ) serves as administrator for the Fund, pursuant to an Administrative Services Agreement. Subject to the supervision of the Board, the Administrator provides the overall business management and administrative services necessary to properly conduct the Fund's business, except for those services performed by ING Investments under the Investment Management Agreement, the custodian for the Fund under the Custodian Agreement, the transfer agent for the Fund under the Transfer Agency Agreement and such other service providers as may be retained by the Fund from time to time. The Administrator acts as a liaison among these service providers to the Fund. The Administrator is also responsible for monitoring the Fund in compliance with applicable legal requirements and with the investment policies and restrictions of the Fund, and provides office space for the Fund. ING Funds Services also serves as Shareholder Services Representative for the Fund. The Shareholder Services Representative is responsible for responding to written and telephonic inquiries from shareholders. The Administrator is an affiliate of the Adviser and the Sub-Adviser. ING Funds Services receives an annual administration fee equal to 0.10% of the Fund's average daily managed assets.

## **Table of Contents**

The Administration Agreement may be cancelled by the Fund, without payment of any penalty, by a vote of a majority of the Trustees upon sixty (60) days written notice to the Administrator, or by the Administrator at any time, without the payment of any penalty upon sixty (60) days written notice to the Fund.

## **OTHER EXPENSES**

Other expenses borne by the Fund include, without limitation, investment advisory fees; brokerage commissions; interest; legal fees and expenses of attorneys; fees of independent auditors, transfer agents and dividend disbursing agents, accounting agents and custodians; the expense of obtaining quotations for calculating the Fund's net asset value; taxes, if any, and the preparation of the Fund's tax returns; cost of stock certificates and any other expenses (including clerical expenses) of issue, sale or repurchase of shares; fees and expenses of registering and maintaining the registration of shares of the Fund under federal and state laws and regulations; expenses of printing and distributing reports, notices and proxy materials to existing shareholders; expenses of printing and filing reports and other documents filed with governmental agencies; expenses of annual and special shareholder meetings; expenses of printing and distributing prospectuses and statements of additional information to existing shareholders; fees and expenses of Trustees of the Fund who are not employees of ING Investments or the Sub-Adviser, or their affiliates, and the fees and expenses of counsel, accountants, or consultants engaged by such Trustees; membership dues in trade associations; insurance premiums; and extraordinary expenses such as litigation expenses.

## **CODE OF ETHICS**

Pursuant to Rule 17j-1 of the 1940 Act and Rule 204A-1 of the Investment Advisers Act of 1940, as amended, the Fund and ING Investments have each adopted a Code of Ethics governing personal trading activities of all Trustees, officers of the Fund and persons who, in connection with their regular functions, play a role in the recommendation of any purchase or sale of a security by the Fund or obtain information pertaining to such purchase or sale. The Code of Ethics is intended to prohibit fraud against the Fund that may arise from personal trading. Personal trading is permitted by such persons subject to certain restrictions; however, such persons are generally required to pre-clear many security transactions with the Fund's Compliance Department and to report all transactions on a regular basis. The Sub-Adviser has adopted its own Codes of Ethics to govern the personal trading activities of its personnel.

## **PORTFOLIO TRANSACTIONS**

As of the date of this SAI, the Fund had not commenced operations and therefore has not engaged in any portfolio transactions or paid any brokerage commissions.

The Investment Management Agreement or the Sub-Adviser Agreement authorizes ING Investments or ING IM to select the brokers or dealers that will execute the purchase and sale of investment securities for the Fund. In all purchases and sales of securities for the portfolio of the Fund, the primary consideration is to obtain the most favorable price and execution available. Pursuant to the Investment Management Agreement or the Sub-Adviser Agreement, ING Investments or ING IM determines, subject to the instructions of and review by the Board, which securities are to be purchased and sold by the Fund and which brokers are to be eligible to execute portfolio transactions of the Fund. Purchases and sales of securities in the over-the-counter market will generally be executed directly with a market-maker, unless in the opinion of Adviser or the Sub-Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

In placing portfolio transactions, ING Investments or ING IM are required to use their best efforts to choose a broker capable of providing the brokerage services necessary to obtain the most favorable price and execution available. The full range and quality of brokerage services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm

## **Table of Contents**

involved, the firm's risk in positioning a block of securities and other factors. The Adviser or Sub-Adviser may select broker-dealers (subject to obtaining best execution of each transaction) that participate in commission recapture programs that have been established for the benefit of the Fund. Under these programs, the participating broker-dealers will return to the Fund a portion of the brokerage commissions (in the form of a credit to the Fund) paid to the broker-dealers to pay certain expenses of the Fund. These commission recapture payments benefit the Fund, and the Adviser or Sub-Adviser.

In selecting a broker-dealer, ING Investments or ING IM will seek to obtain the most favorable commission rate available from brokers that are believed to be capable of providing efficient execution and handling of the orders. The Adviser or the Sub-Adviser may also take into account the quality of research and related services that can be provided by a broker-dealer, provided that the Adviser or Sub-Adviser makes a good faith determination that the commission paid by the Fund to the broker-dealer is reasonable in light of the research and other products or services the broker-dealer provides. As permitted by Section 28(e) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), ING Investments or ING IM may cause the Fund to pay a broker-dealer which provides brokerage and research services (as defined in the 1934 Act) to ING Investments or ING IM commissions for effecting a securities transaction for the Fund in excess of the commission which another broker-dealer would have charged for effecting that transaction.

For many years, it has been a common practice for investment managers to receive research services from broker-dealers that execute portfolio transactions for the clients of the managers. This research can assist an investment manager in rendering services to its clients. These services may include, but are not limited to, general economic and security market reviews, industry and company reviews, evaluations of securities and recommendations as to the purchase and sale of securities, financial data on a company or companies, performance measuring services, stock price quotation services, computerized historical financial databases and equipment to retrieve such data, credit rating services, brokerage analysts earning estimates, computerized links to current market data, hardware and software dedicated to research, and portfolio modeling. Consistent with this practice, the Adviser or Sub-Adviser may receive research services from broker-dealers with which the Adviser or Sub-Adviser places the Fund's securities transactions. Some of the research services received may be of indeterminable value. In some cases, the research services may also be purchased for cash, and the Adviser or Sub-Adviser does not bear the expense of these services if provided by a broker-dealer that executes trades for the Fund, and the advisory fee paid to the Adviser or sub-advisory fee paid to the Sub-Adviser is not reduced because of the receipt of research services received in this fashion. Some of the services may be of value to the Adviser or the Sub-Adviser in advising the Fund and other clients, although not all of the research services received by the Adviser or Sub-Adviser will necessarily be useful and of value in managing the particular Fund. The availability of research services from a broker-dealer may influence the selection of a broker-dealer by the Adviser or Sub-Adviser for the execution of securities transactions for the Fund. In negotiating commissions with a broker, the Fund may therefore pay a higher commission than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission has been determined in good faith by the Adviser or Sub-Adviser to be reasonable in relation to the value of the brokerage and research services provided by such broker-dealer. In negotiating commissions with a broker, the Fund may therefore pay a higher commission than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission has been determined in good faith by the Adviser or Sub-Advisers to be reasonable in relation to the value of the brokerage and research services provided by such brokerdealer. In negotiating commissions with a broker, the Fund may therefore pay a higher commission than would be the case if no weight were given to the furnishing of these services, provided that the amount of such commission has been determined in good faith by the Adviser or Sub-Advisers to be reasonable in relation to the value of the brokerage and research services provided by such brokerdealer.

Portfolio transactions may be executed by brokers affiliated with ING Groep or the Adviser or Sub-Adviser, so long as the commission paid to the affiliated broker is reasonable and fair compared to the commission that would be charged by an unaffiliated broker in a comparable transaction. The placement of

## **Table of Contents**

portfolio brokerage with broker-dealers who have sold shares of the Fund is subject to rules adopted by the National Association of Securities Dealers, Inc. ( NASD ).

Purchases of securities for the Fund also may be made directly from issuers or from underwriters. Purchase and sale transactions may be effected through dealers which specialize in the types of securities which the Fund may hold. Dealers and underwriters usually act as principals for their own account. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter which has provided research or other services as mentioned above.

Some securities considered for investment by the Fund may also be appropriate for other clients served by the Adviser or Sub-Adviser. If the purchase or sale of securities consistent with the investment policies of the Fund and one or more of these other clients serviced by ING Investments or ING IM is considered at or about the same time, transactions in such securities will be allocated among the Fund and ING Investment s or ING IM s other clients in a manner deemed fair and reasonable by the Adviser or Sub-Adviser. ING Investments has adopted policies and procedures designed to allocate trades to all participating client accounts in a fair and equitable manner. Trades will generally be allocated *pro rata* among the participating client accounts based on the size of each account s original order. ING Investments may allocate on a basis other than *pro rata*, if, under the circumstances, such other method of allocation is reasonable and does not result in improper or undisclosed advantage or disadvantage to other managed accounts. The various allocation methods used by ING Investments or ING IM, and the results of such allocations, are subject to periodic review by the Board. To the extent the Fund and other clients seek to acquire the same security at the same time, the Fund and/or one or more of the other clients may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price for such security. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned.

Purchases and sales of fixed income securities will usually be principal transactions. Such securities often will be purchased or sold from or to dealers serving as market makers for the securities at a net price. The Fund may also purchase such securities in underwritten offerings and will, on occasion, purchase securities directly from the issuer. Generally, fixed income securities are traded on a net basis and do not involve brokerage commissions. The cost of executing fixed income securities transactions consists primarily of dealer spreads and underwriting commissions.

In purchasing and selling fixed income securities, it is the policy of the Fund to obtain the best results, while taking into account the dealer s general execution and operational facilities, the type of transaction involved and other factors, such as the dealer s risk in positioning the securities involved. While ING generally seeks reasonably competitive spreads or commissions, the Fund will not necessarily pay the lowest spread or commission available.

The Board has adopted a policy allowing trades to be made between affiliated registered investment companies or series thereof provided they meet the terms of Rule 17a-7 under the 1940 Act.

**Table of Contents**

**DETERMINATION OF NET ASSET VALUE**

As noted in the Prospectus, the net asset value ( NAV ) of the Fund 's shares will be determined once daily as of the close of regular trading on the New York Stock Exchange ( NYSE ) (normally 4:00 p.m. Eastern time) during each day on which the NYSE is open for trading. The NYSE is closed on the following holidays: New Year 's Day, Martin Luther King, Jr. Day, Presidents ' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Shares of the Fund will not be priced on these days.

Portfolio securities listed or traded on a national securities exchange will be valued at the last reported sale price on the valuation day. Securities traded on an exchange for which there has been no sale that day and other securities traded in the over-the-counter market will be valued at the mean between the last reported bid and asked prices on the valuation day. Portfolio securities reported by NASDAQ will be valued at the NASDAQ Official Closing Price on the valuation day. In cases in which securities are traded on more than one exchange, the securities are valued on the exchange that is normally the primary market. Short-term obligations maturing in 60 days or less will generally be valued at amortized cost. This involves valuing a security at cost on the date of acquisition and thereafter assuming a constant accretion of a discount or amortization of a premium to maturity, regardless of the impact of fluctuating interest rates on the market value of the instrument. While this method provides certainty in valuation, it may result in periods during which value, as determined by amortized cost, is higher or lower than the price the Fund would receive if it sold the instrument. The long-term debt obligations held in the Fund 's portfolio will be valued at the mean between the most recent bid and asked prices as obtained from one or more dealers that make markets in the securities when over-the counter market quotations are readily available.

Securities and assets for which market quotations are not readily available (which may include certain restricted securities which are subject to limitations as to their sale) are valued at their fair values as determined in good faith by or under the supervision of the Fund 's Board, in accordance with methods that are specifically authorized by the Board. Securities traded on exchanges, including foreign exchanges, which close earlier than the time that the Fund calculates its NAV may also be valued at their fair values as determined in good faith by or under the supervision of the Fund 's Board, in accordance with methods that are specifically authorized by the Board. The valuation procedures applied in any specific instance are likely to vary from case to case. With respect to a restricted security, for example, consideration is generally given to the cost of the investment, the market value of any unrestricted securities of the same class at the time of valuation, the potential expiration of restrictions on the security, the existence of any registration rights, the costs to the Fund related to registration of the security, as well as factors relevant to the issuer itself. Consideration may also be given to the price and extent of any public trading in similar securities of the issuer or comparable companies ' securities.

The value of a foreign security traded on an exchange outside the United States is generally based on its price on the principal foreign exchange where it trades as of the time the Fund determines its NAV or if the foreign exchange closes prior to the time the Fund determines its NAV, the most recent closing price of the foreign security on its principal exchange. Trading in certain Non-U.S. securities may not take place on all days on which the NYSE is open. Further, trading takes place in various foreign markets on days on which the NYSE is not open. Consequently, the calculation of the Fund 's NAV may not take place contemporaneously with the determination of the prices of securities held by the Fund in foreign securities markets. Further, the value of the Fund 's assets may be significantly affected by foreign trading on days when a shareholder cannot purchase or redeem shares of the Fund. In calculating the Fund 's NAV, foreign securities denominated in foreign currency are converted to U.S. dollar equivalents.

If an event occurs after the time at which the market for foreign securities held by the Fund closes but before the time that the Fund 's NAV is calculated, such event may cause the closing price on the foreign exchange to not represent a readily available reliable market value quotation for such securities at the time the Fund determines its NAV. In such a case, the Fund will use the fair value of such securities as determined under the Fund 's valuation procedures. Events after the close of trading on a foreign market that could require the Fund

**Table of Contents**

to fair value some or all of its foreign securities include, among others, securities trading in the U.S. and other markets, corporate announcements, natural and other disasters and political and other events. Among other elements of analysis in the determination of a security's fair value, the Board has authorized the use of one or more independent research services to assist with such determinations. An independent research service may use statistical analyses and quantitative models to help determine fair value as of the time the Fund calculates its NAV. There can be no assurance that such models accurately reflect the behavior of the applicable markets or the effect of the behavior of such markets on the fair value of the securities, nor that such markets will continue to behave in a fashion that is consistent with such models. Unlike the closing price of a security on an exchange, fair value determinations employ elements of judgment. Consequently, the fair value assigned to a security may not represent the actual value that the Fund could obtain if it were to sell the security at the time of the close of the NYSE. Pursuant to procedures adopted by the Board, the Fund is not obligated to use the fair valuations recommended by any research service, and valuation recommendations provided by such research services may be overridden if other events have occurred, or if other fair valuations are determined in good faith to be more accurate. Unless an event is such that it causes the Fund to determine that the closing prices for one or more securities do not represent readily available reliable market value quotations at the time the Fund determines its NAV, events that occur between the time of the close of the foreign market on which they are traded and the close of regular trading on the NYSE will not be reflected in the Fund's NAV.

Quotations of foreign securities denominated in foreign currencies are converted to U.S. dollar equivalents using the foreign exchange quotation in effect at 4:00 p.m. London time.

Options that are traded over-the-counter will be valued using one of three methods: (1) dealer quotes, (2) industry models with objective inputs, or (3) by using a benchmark arrived at by comparing prior-day dealer quotes with the corresponding change in the underlying security or index. Exchange traded options will be valued using the last reported sale. If no last sale is reported, exchange traded options will be valued using an industry accepted model such as Black Scholes. Options on currencies purchased by the Fund are valued at their last bid price in the case of listed options or at the average of the last bid prices obtained from dealers in the case of over-the-counter options.

The fair value of other assets is added to the value of all securities positions to arrive at the value of the Fund's total assets. The Fund's liabilities, including accruals for expenses, are deducted from its total assets. Once the total value of the Fund's net assets is so determined, that value is then divided by the total number of shares outstanding (excluding treasury shares), and the result, rounded to the nearest cent, is the NAV per share.

**Table of Contents**

**DIVIDEND REINVESTMENT PLAN**

As noted in the Prospectus, shareholders have the privilege of reinvesting both income dividends and capital gains distributions, if any, in additional Common Shares of the Fund at the then current NAV, with no sales charge. The Fund's management believes that most investors desire to take advantage of this privilege. It has therefore made arrangements with the Transfer Agent to have all income dividends and capital gains distributions that are declared by the Fund automatically reinvested for the account of each shareholder, unless the shareholder has elected otherwise.

A shareholder may elect at any time by writing to the Fund or the Transfer Agent to have subsequent dividends and/or distributions paid in cash. In the absence of such an election, each purchase of shares of the Fund is made upon the condition and understanding that the Transfer Agent is automatically appointed the shareholder's agent to receive his dividends and distributions upon all shares registered in his name and to reinvest them in full and fractional Common Shares at the lesser of NAV (but not less than 95% of the market price) or the market price in effect at the close of business on the reinvestment date. A shareholder may still at any time after a purchase of Fund shares request that dividends and/or capital gains distributions be paid in cash.

---

**Table of Contents**

**REPURCHASE OF COMMON SHARES**

The Fund is a closed-end management investment company, and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Fund's Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), NAV, call protection, dividend stability, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of a closed-end investment company may frequently trade at prices lower than NAV, the Board may consider action that might be taken to reduce or eliminate any material discount from NAV in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares or the conversion of the Fund to an open-end investment company. The Board may decide not to take any of these actions. In addition, there can be no assurance that share repurchases or tender offers, if undertaken, will reduce any market discount.

Notwithstanding the foregoing, at any time when Preferred Shares of the Fund are outstanding, the Fund may not purchase, redeem or otherwise acquire any of its Common Shares unless (1) all accumulated Preferred Share dividends due have been paid and (2) after giving effect to such purchase, redemption or acquisition, the total value of the Fund's portfolio (less liabilities not constituting senior securities) is at least 200% of the liquidation value of the outstanding Preferred Shares (expected to equal the original purchase price per share plus any accumulated and unpaid dividends thereon) plus any outstanding borrowings. Any service fees incurred in connection with any tender offer made by the Fund will be borne by the Fund and will not reduce the stated consideration to be paid to tendering shareholders.

Subject to its investment restrictions, the Fund may borrow to finance the repurchase of shares or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board would have to comply with the 1934 Act, the 1940 Act and the rules and regulations thereunder.

Although the decision to take action in response to a discount from NAV will be made by the Board at the time it considers such issue, it is the board's present policy, which may be changed by the Board, not to authorize repurchases of Common Shares or a tender offer for such shares if: (1) such transactions, if consummated, would (a) result in the delisting of the Common Shares from the NYSE, or (b) impair the Fund's status as a regulated investment company under the Code, (which would make the Fund a taxable entity, causing the Fund's income to be taxed at the corporate level in addition to the taxation of shareholders who receive dividends from the Fund) or as a registered closed-end investment company under the 1940 Act; (2) the Fund would not be able to liquidate portfolio securities in an orderly manner and consistent with the Fund's investment objectives and policies in order to repurchase shares; or (3) there is, in the Board's judgment, any (a) material legal action or proceeding instituted or threatened challenging such transactions or otherwise materially adversely affecting the Fund, (b) general suspension of or limitation on prices for trading securities on the NYSE, (c) declaration of a banking moratorium by federal or state authorities or any suspension of payment by U.S. or New York banks, (d) material limitation affecting the Fund or the issuers of its portfolio securities by federal or state authorities on the extension of credit by lending institutions or on the exchange of foreign currency, (e) commencement of war, armed hostilities or other international or national calamity directly or indirectly involving the U.S., or (f) other event or condition which would have a material adverse effect (including any adverse tax effect) on the Fund or its shareholders if shares were repurchased. The Board may in the future modify these conditions in light of experience.

The repurchase by the Fund of its shares at prices below NAV will result in an increase in the NAV of those shares that remain outstanding. However, there can be no assurance that share repurchases or tender offers at or below NAV will result in the Fund's shares trading at a price equal to their NAV. Nevertheless, the fact that the Fund's shares may be the subject of repurchase or tender offers from time to time, or that the Fund may be

**Table of Contents**

converted to an open-end investment company, may reduce any spread between market price and NAV that might otherwise exist.

In addition, a purchase by the Fund of its Common Shares will decrease the Fund's managed assets which would likely have the effect of increasing the Fund's expense ratio. Any purchase by the Fund of its Common Shares at a time when Preferred Shares are outstanding will increase the leverage applicable to the outstanding Common Shares then remaining.

If the Common Shares of the Fund trade below NAV, the Board would likely consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders and market considerations, before deciding whether to take any action. Based on these considerations, even if the Fund's shares should trade at a discount, the Board may determine that, in the interest of the Fund and its shareholders, no action should be taken.

**TAX CONSIDERATIONS**

*The following discussion is a general summary of the material United States federal income tax considerations applicable to us and to an investment in our common stock. This summary does not purport to be a complete description of the income tax considerations applicable to such an investment. The discussion is based upon the Internal Revenue Code (the Code), Treasury Regulations, and administrative and judicial interpretations, each as of the date of this prospectus and all of which are subject to change. Each investor should consult his or her own tax advisor with respect to tax considerations that pertain to his or her purchase of our Common Shares.*

*This summary is intended to apply to investments in our Common Shares and assumes that investors hold our Common Shares as capital assets. This summary does not discuss all aspects of federal income taxation relevant to holders of our Common Shares in light of particular circumstances, or to certain types of holders subject to special treatment under federal income tax laws, including dealers in securities, pension plans and trusts and financial institutions. This summary does not discuss any aspects of U.S. estate and gift tax or foreign, state or local tax. It does not discuss the special treatment under federal income tax laws that could result if we invested in tax-exempt securities or certain other investment assets.*

*Except as specifically indicated herein, this summary is intended to apply to U.S. Shareholders (as defined below) and does not purport to discuss all U.S. federal income tax consequences to persons who are not U.S. Shareholders ( Non-U.S. Shareholders ) from an investment in our Common Shares. (A U.S. Shareholder is a shareholder who is (i) a citizen or resident of the United States, (ii) a corporation or partnership created in or organized under the laws of the United States or any political subdivision thereof, (iii) an estate, the income of which is subject to United States federal income taxation regardless of its source, or (iv) a trust if such trust validly elects to be treated as a United States person for U.S. federal income tax purposes or if (1) a court within the United States is able to exercise primary supervision over its administration and (2) one or more United States persons have the authority to control all of the substantial decisions of such trust.*

**TAXATION OF THE FUND**

The Fund intends to elect to be treated and to qualify each year as a regulated investment company ( RIC ) under the Code. Accordingly, the Fund intends to satisfy certain requirements relating to sources of its income and diversification of its assets and to distribute substantially all of its net income and net short-term and long-term capital gains (after reduction by any available capital loss carry-forwards) in accordance with the timing requirements imposed by the Code, so as to maintain its RIC status and to avoid paying any federal income or excise tax. To the extent it qualifies for treatment as a RIC and satisfies the above-mentioned distribution requirements, the Fund will not be subject to federal income tax on income paid to its shareholders in the form of dividends or capital gain distributions.

Specifically to qualify for the favorable U.S. federal income tax treatment generally accorded to RICs, the Fund must, among other things:

- (i) derive in each taxable year at least 90% of its gross income from (a) dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of investing in such stock, securities or currencies, and/or (b) interests in publicly traded partnerships that are treated as partnerships for U.S. federal income tax purposes and that derive less than 90% of their gross income from the items described in (a) above (each a Qualified Publicly Traded Partnership ); and
- (ii)

## Edgar Filing: ING Global Advantage & Premium Opportunity Fund - Form 497

diversify its holdings so that, at the end of each quarter of the taxable year, (a) at least 50% of the value of the Fund's assets is represented by cash and cash items (including receivables), U.S. Government securities, securities of other RICs, and investments in other securities which, with respect to any one issuer, do not represent more than 5% of the value of the Fund's total assets nor more than 10% of the

## Table of Contents

outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is invested in the securities (other than U.S. Government securities or the securities of other regulated investment companies) of (I) any one issuer, (II) any two or more issuers which the Fund controls and are engaged in the same, similar or related trades or businesses or (III) any one or more Qualified Publicly Traded Partnerships.

The Fund intends to distribute to its shareholders all or substantially all of its investment company taxable income and net capital gain. Amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax. To prevent imposition of the excise tax, the Fund must distribute during each calendar year an amount at least equal to the sum of (1) 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) 98% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed during those years and on which the Fund paid no federal income tax. To prevent application of the excise tax, the Fund intends to make its distributions in accordance with the calendar year distribution requirement, but reserves the right to distribute less than the full amount and thus pay any resulting excise tax or corporate income tax.

If the Fund does not qualify as a RIC for any taxable year, the Fund's taxable income will be subject to corporate income taxes, and all distributions from earnings and profits, including distributions of net capital gain (if any), will be taxable to the shareholder as ordinary income. In addition, in order to requalify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest, and make certain distributions.

## TAXATION OF SHAREHOLDERS

Dividends out of the Fund's investment company taxable income (which includes dividends the Fund receives, interest income, and net short-term capital gain) will generally be taxable as ordinary income to the extent of the Fund's earnings and profits, whether paid in cash or reinvested in additional Common Shares. Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, are taxable to you as long-term capital gains, regardless of how long you have held the Common Shares and regardless of whether paid in cash or reinvested in additional Common Shares. A distribution of an amount in excess of the Fund's earnings and profits is treated as a non-taxable return of capital that reduces your tax basis in your Common Shares; any such distributions in excess of your basis are treated as gain from a sale of your shares.

Common Shareholders receiving dividends or distributions in the form of additional Common Shares pursuant to the Dividend Reinvestment Plan will be treated for U.S. federal income tax purposes as receiving a distribution in an amount equal to (i) the fair market value of any new shares issued to the Common Shareholder by the Fund, and (ii) if shares are trading below net asset value, the cash allocated to the Common Shareholder for the purchase of shares on its behalf, and such Common Shareholder will have a cost basis in the Common Shares received equal to such foregoing amount. The Fund will inform shareholders of the source and tax status of all distributions promptly after the close of each calendar year.

The Jobs and Growth Tax Relief Reconciliation Act of 2003 (the Tax Act) reduced the maximum tax rate on long-term capital gains for individuals from 20% to 15%. In addition, the Tax Act also provided that this maximum rate of tax would apply to qualified dividend income of individuals. Corporations are not eligible for the reduced maximum rates on long-term capital gains or qualified dividend income. Individual Shareholders may be eligible to treat a portion of the Fund's ordinary income dividends as qualified dividend income.

The Fund must designate the portion of any distributions by the Fund that are eligible to be treated as qualified dividend income in a written notice within 60 days of the close of the relevant taxable year. In general, the maximum amount of distributions by the Fund that may be

designated as qualified dividend income for that

## **Table of Contents**

taxable year is the total amount of qualified dividend income received by the Fund during such year. In order to constitute qualified dividend income to the Fund, a dividend must be received from a U.S. domestic corporation (other than dividends from tax-exempt corporations and certain dividends from real estate investment trusts and other regulated investment companies) or a qualified foreign corporation. In addition, the dividend must be paid in respect of the stock that has been held by the Fund, for federal income tax purposes, for at least 61 days during the 121-day period that begins 60 days before the stock becomes ex-dividend. In order to be eligible to treat a dividend from the Fund as qualified dividend income, individual Shareholders must also meet the foregoing minimum holding period requirements with respect to their Common Shares. These special rules relating to qualified dividend income apply to taxable years beginning before January 1, 2009. Without additional Congressional action, all of the Fund's ordinary income dividends for taxable years beginning after such date will be subject to tax at ordinary income rates.

The Fund's ordinary income dividends to corporate Shareholders may, if certain conditions are met, qualify for the dividends-received deduction to the extent that the Fund has received qualifying dividend income during the taxable year; capital gain dividends distributed by the Fund are not eligible for the dividends-received deduction. In order to constitute a qualifying dividend, a dividend must be from a U.S. domestic corporation in respect of the stock of such corporation that has been held by the Fund, for federal income tax purposes, for at least 46 days during the 91-day period that begins 45 days before the stock becomes ex-dividend (or, in the case of preferred stock, 91 days during the 181-day period that begins 90 days before the stock becomes ex-dividend). The Fund must also designate the portion of any distribution that is eligible for the dividends-received deduction in a written notice within 60 days of the close of the relevant taxable year. In addition, in order to be eligible to claim the dividends-received deduction with respect to distributions from the Fund, corporate Shareholders must meet the foregoing minimum holding period requirements with respect to their Common Shares. If a corporation borrows to acquire Common Shares, it may be denied a portion of the dividends-received deduction it would otherwise be eligible to claim. The entire qualifying dividend, including the otherwise deductible amount, is included in determining the excess (if any) of a corporate Shareholder's adjusted current earnings over its alternative minimum taxable income, which may increase its alternative minimum tax liability. Additionally, any corporate Shareholder should consult its tax adviser regarding the possibility that its basis in its shares may be reduced, for federal income tax purposes, by reason of extraordinary dividends received with respect to the Common Shares, for the purpose of computing its gain or loss on redemption or other disposition of the Common Shares.

There can be no assurance as to what portion (if any) of the Fund's distributions will qualify for favorable treatment as long-term capital gains or qualified dividend income or what portion (if any) will be eligible for the corporate dividends received deduction. To the extent that the Fund derives net short-term capital gains from its investment activities, distributions of such gains would be taxed as ordinary income. Further, certain of the Fund's option writing strategies and securities lending activities could reduce the amount of the Fund's distributions that may qualify for either the reduced rates on qualified dividends or the corporate dividends received deduction.

The benefits of the reduced tax rates applicable to long-term capital gains and qualified dividend income may be impacted by the application of the alternative minimum tax to individual shareholders.

Dividends and distributions on the Fund's shares are generally subject to federal income tax as described herein to the extent they do not exceed the Fund's realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the Fund's NAV reflects gains that are either unrealized, or realized but not distributed. Such realized gains may be required to be distributed even when the Fund's NAV also reflects unrealized losses.

Certain distributions declared in October, November or December and paid to shareholders of record of such months in the following January will be taxed to shareholders as if received on December 31 of the year in

## **Table of Contents**

which they were declared. In addition, certain other distributions made after the close of a taxable year of the Fund may be spilled back and treated as paid by the Fund (except for purposes of the non-deductible 4% federal excise tax) during such taxable year. In such case, shareholders will be treated as having received such dividends in the taxable year in which the distributions were actually made.

The IRS position in a published revenue ruling indicates that the Fund is required to designate distributions paid with respect to its Common Shares and any preferred shares as consisting of a portion of each type of income distributed by the Fund. The portion of each type of income deemed received by the holders of each class of shares will be equal to the portion of total Fund dividends received by such class. Thus, the Fund will designate dividends paid as capital gain dividends in a manner that allocates such dividends between the holders of the Common Shares and the holders of any preferred shares, in proportion to the total dividends paid to each such class during or with respect to the taxable year, or otherwise as required by applicable law. Shareholders will be notified annually as to the U.S. federal tax status of distributions, and shareholders receiving distributions in the form of additional shares will receive a report as to the NAV of those shares.

The Fund may retain for investment part or all of its net capital gain. However, if the Fund retains any net capital gain or any investment company taxable income, it will be subject to tax at regular corporate rates on the amount retained.

If the Fund retains any net capital gain, it may designate the retained amount as undistributed capital gain in a notice to its shareholders who, if subject to federal income tax on long-term capital gains, (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal under current law to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence.

## **TAX ASPECTS OF SALES OF FUND SHARES**

Upon the sale or other disposition of shares of the Fund, which a shareholder holds as a capital asset, such a shareholder may realize a capital gain or loss, which will be long-term or short-term, depending upon the shareholder's holding period for the shares. Generally, a shareholder's gain or loss will be a long-term capital gain or loss if the shares have been held for more than one year. As discussed above, the Tax Act reduced the maximum tax rate on long-term capital gains for individual investors from 20% to 15%. Without further legislative change, the rate reductions enacted by the Tax Act will lapse, and the previous rates will be reinstated, for taxable years beginning on or after January 1, 2009.

Any loss realized on a sale or exchange of Fund shares will be disallowed to the extent that shares disposed of are replaced (including through reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after disposition of the original shares. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of Fund shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of net capital gain received by the shareholder with respect to such shares.

Sales charges paid upon a purchase of shares cannot be taken into account for purposes of determining gain or loss on a sale of the shares before the 91st day after their purchase to the extent a sales charge is reduced or eliminated in a subsequent acquisition of shares of the Fund (or of another fund) pursuant to the reinvestment or exchange privilege. Any disregarded amounts will result in an adjustment to the shareholder's tax basis in some or all of any other shares acquired.

---

**Table of Contents**

TAXATION OF FUND INVESTMENTS

Although the Fund will generally not be subject to federal income tax, the tax treatment of the Fund's investments will affect the timing and tax character of the Fund's distributions.

The Fund's transactions in futures contracts and options will be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (i.e., may affect whether gains or losses are ordinary or capital, or short-term or long-term), may accelerate recognition of income to the Fund and may defer Fund losses. These rules could, therefore, affect the character, amount and timing of distributions to shareholders. These provisions also (a) will require the Fund to mark-to-market certain types of the positions in its portfolio (i.e., treat them as if they were closed out), and (b) may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the 90% distribution requirement for qualifying to be taxed as a RIC and the 98% distribution requirement for avoiding excise taxes. The Fund will monitor its transactions, will make the appropriate tax elections and will make the appropriate entries in its books and records when it acquires any futures contract, option or hedged investment in order to mitigate the effect of these rules and prevent disqualification of the Fund from being taxed as a RIC. In particular, the Fund expects to write call options with respect to certain securities held by the Fund. Depending on whether such options are exercised or lapse, or whether the securities or options are sold, the existence of these options will affect the amount and timing of the recognition of income and whether the income qualifies as long-term capital gain.

The premiums received by the Fund for writing or selling call options are not included in income at the time of receipt. Rather, gain or loss is determined at the time the options lapse, are terminated in a closing transaction, or are exercised. The character of the gain or loss for options (other than options that are Section 1256 Contracts) that lapse or terminate is determined under Code Section 1234. If such an option lapses, the premium is short-term capital gain to the Fund. If the Fund enters into a closing transaction (including a cash settlement), the difference between the amount paid to close out its position and the premium received is short-term capital gain or loss. If a call option written by the Fund is exercised, thereby requiring the Fund to sell the underlying security, the premium will increase the amount realized upon the sale of the security and any resulting gain or loss will be long-term or short-term, depending upon the holding period of the security. Because the Fund does not have control over the exercise of the call options it writes, such exercise or other required sales of the underlying securities may cause the Fund to realize capital gains or losses at inopportune times.

With respect to a put or call option (other than an option that is a Section 1256 Contract) that is purchased by the Fund, if the option is sold, any resulting gain or loss will be a capital gain or loss, and will be short-term or long-term, depending upon the Fund's holding period for the option. If such option expires, the resulting loss is a capital loss, and will be short-term or long-term, depending upon the Fund's holding period for the option. If such option is exercised, the cost of the option, in the case of a call option, is added to the basis of the purchased security and, in the case of a put option, reduces the amount realized on the underlying security in determining gain or loss.

In the case of Fund transactions in Section 1256 Contracts, the Code generally will require any gain or loss arising from the lapse, closing out or exercise of such positions to generally be treated as 60% long-term and 40% short-term capital gain or loss. In addition, the Fund generally will be required to mark to market (i.e., treat as sold for fair market value) each such position which it holds at the close of each taxable year. If a Section 1256 Contract held by the Fund at the end of a taxable year is sold in the following year, the amount of any gain or loss realized on such sale will be adjusted to reflect the gain or loss previously taken into account under the mark to market rules. Section 1256 Contracts include certain options contracts (including many listed index options and any listed non-equity options), certain regulated futures contracts, and certain other financial contracts.

The Code contains special rules that apply to straddles, defined generally as the holding of offsetting positions with respect to personal property. For example, the straddle rules normally apply when a taxpayer

---

**Table of Contents**

holds stock and an offsetting option with respect to such stock or substantially identical stock or securities. In general, investment positions will be offsetting if there is a substantial diminution in the risk of loss from holding one position by reason of holding one or more other positions. The Fund may write call options on portfolio securities that are qualified covered calls that are exempt from the straddle rules. To meet the qualified covered call option exemption, a stock-plus-covered-call position cannot be part of a larger straddle and must meet a number of other conditions, including that the option is written more than 30 days prior to expiration and is not deep-in-the-money as defined in the Code. The Fund may enter into certain investments that may constitute positions in a straddle. If two or more positions constitute a straddle, recognition of a realized loss from one position must be deferred to the extent of unrecognized gain in an offsetting position. In addition, long-term capital gain may be recharacterized as short-term capital gain, or short-term capital loss as long-term capital loss. Interest and other carrying charges allocable to personal property that is part of a straddle are not currently deductible but must instead be capitalized. Similarly, wash sale rules apply to prevent the recognition of loss by the Fund from the disposition of stock or securities at a loss in a case in which identical or substantially identical stock or securities (or an option to acquire such property) is or has been acquired within a prescribed period.

The Fund's investment in any zero coupon, payment in kind and certain other securities will cause it to realize income prior to the receipt of cash payments with respect to these securities. Such income will be accrued daily by the Fund and, in order to satisfy minimum distribution requirements and to avoid a tax payable by the Fund, the Fund may be required to liquidate securities that it might otherwise have continued to hold in order to generate cash so that the Fund may make distributions to its shareholders.

Any recognized gain or income attributable to market discount on long-term debt obligations (i.e., obligations with a term of more than one year except to the extent of a portion of the discount attributable to original issue discount) purchased by the Fund is taxable as ordinary income. A long-term debt obligation is generally treated as acquired at a market discount if purchased after its original issue at a price less than (i) the stated principal amount payable at maturity, in the case of an obligation that does not have original issue discount or (ii) in the case of an obligation that does have original issue discount, the sum of the issue price and any original issue discount that accrued before the obligation was purchased, subject to a de minimis exclusion.

Dividends and interest received, and gains realized, by the Fund on foreign securities may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions (collectively foreign taxes) that would reduce the return on the Fund's investments. Tax conventions between certain countries and the U.S., however, may reduce or eliminate foreign taxes, and many foreign countries do not impose taxes on capital gains in respect of investments by foreign investors. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign issuers, the Fund will be eligible to, and may, file an election with the IRS that will enable its shareholders, in effect, to receive the benefit of the foreign tax credit with respect to any foreign taxes paid by it. Pursuant to the election, the Fund would treat those taxes as dividends paid to its shareholders and each shareholder (1) would be required to include in gross income, and treat as paid by such shareholder, a proportionate share of those taxes, (2) would be required to treat such share of those taxes and of any dividend paid by the Fund that represents income from foreign or U.S. possessions sources as such shareholder's own income from those sources, and (3) could either deduct the foreign taxes deemed paid in computing taxable income or, alternatively, use the foregoing information in calculating the foreign tax credit against federal income tax. The Fund will report to its shareholders shortly after each taxable year their respective shares of foreign taxes paid and the income from sources within, and taxes paid to, foreign countries and U.S. possessions if it makes this election. A shareholder's ability to utilize the foreign tax credits or deduct such amounts may be limited under the Code. An individual who has no more than \$300 (\$600 for married persons filing jointly) of creditable foreign taxes included on Forms 1099 and all of whose foreign source income is qualified passive income may elect each year to be exempt from the complicated foreign tax credit limitation, in which event such individual would be able to claim a foreign tax credit without needing to file the detailed Form 1116 that otherwise is required.

## **Table of Contents**

The Fund may invest in the stock of passive foreign investment companies ( PFICs ). A PFIC is any foreign corporation (with certain exceptions) that, in general, meets either of the following tests: (1) at least 75% of its gross income is passive or (2) an average of at least 50% of its assets produce, or are held for the production of, passive income. Under certain circumstances, the Fund will be subject to federal income tax on a portion of any excess distribution received on the stock of a PFIC or of any gain from disposition of that stock (collectively PFIC income ), plus interest thereon, even if the Fund distributes the PFIC income as a taxable dividend to its shareholders. The Fund would not be able to pass through to our shareholders any credit or deduction for such a tax. Certain elections may, if available, ameliorate these adverse tax consequences, but any such election requires the Fund to recognize taxable income or gain without the concurrent receipt of cash.

Under Section 988 of the Code, gains or losses attributable to fluctuations in exchange rates between the time the Fund accrues income or receivables or expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such income or receivables or pays such liabilities are generally treated as ordinary income or loss. Similarly, gains or losses on foreign currency forward contracts and the disposition of debt securities denominated in a foreign currency, to the extent attributable to fluctuations in exchange rates between the acquisition and disposition dates, are also treated as ordinary income or loss.

## **BACKUP WITHHOLDING**

The Fund may be required to withhold federal income tax from all taxable distributions payable to shareholders who fail to provide their correct taxpayer identification number or to make required certifications, or who have been notified by the IRS that they are subject to backup withholding. As modified by the Tax Act, the backup withholding percentage is 28% for amounts paid through 2010, after which time the rate will increase to 31% absent legislative change. Corporate shareholders and certain other shareholders specified in the Code generally are exempt from such backup withholding. This withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's federal income tax liability, provided the required information is furnished to the IRS.

## **REPORTABLE LOSSES**

Under recently promulgated Treasury regulations, if a shareholder recognizes a loss with respect to Common Shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder in any single taxable year (or a greater loss over a combination of years), the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

## **NON-U.S. SHAREHOLDERS**

Taxation of a Non-U.S. Shareholder depends on whether the income from the Fund is effectively connected with a U.S. trade or business carried on by such shareholder. If the income from the Fund is not effectively connected with a U.S. trade or business carried on by a Non-U.S. Shareholder, ordinary income dividends (including distributions of any net short term capital gains) will be subject to U.S. withholding tax at the rate of 30% (or lower treaty rate) upon the gross amount of the dividend. Such a Non-U.S. Shareholder would generally be exempt from U.S. federal income tax on gains realized on the sale of shares of the Fund, and distributions of net long term capital gains that are designated as capital gain dividends. In addition, subject to certain limitations and the receipt of further guidance from the Treasury, dividends paid to certain Non-U.S. Shareholders may be exempt from withholding of U.S. tax through December 31, 2007 to the extent such dividends are attributable to

qualified interest or net short-term capital gains. There can be no assurance as to the

**Table of Contents**

amount, if any, of such dividends that would not be subject to withholding. If the income from the Fund is effectively connected with a U.S. trade or business carried on by a Non-U.S. Shareholder, then ordinary income dividends, capital gain dividends and any gains realized upon the sale of shares of the Fund will be subject to U.S. federal income tax at the rates applicable to U.S. citizens or domestic corporations.

Distributions attributable to gains from U.S. real property interests (including certain U.S. real property holding corporations) will generally be subject to federal withholding tax and may give rise to an obligation on the part of the Non-U.S. Shareholder to file a U.S. tax return. Also, such gain may be subject to a 30% branch profit tax in the hands of a Non-U.S. Shareholder that is a corporation.

**Table of Contents**

**GENERAL INFORMATION**

**CAPITALIZATION AND VOTING RIGHTS**

The authorized capital of the Fund is an unlimited number of Common Shares of beneficial interest. Holders of shares of the Fund have one vote for each share held. All shares when issued are fully paid, non-redeemable and non assessable by the Fund, except that the Trustees shall have the power to cause shareholders to pay directly for charges of the Fund's custodian or transfer, shareholder servicing or similar agent, by setting off such charges due from shareholders from declared but unpaid dividends owed the shareholders and/or by reducing the number of Common Shares owned by each respective shareholder. All shares have equal voting, dividend and liquidation rights. Shares have non-cumulative voting rights, which means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and in such event the holders of the remaining shares voting for the election of Trustees will not be able to elect any person or persons to the Board. There will be annual meetings of shareholders for the purpose of electing Trustees. Shareholders may, in accordance with the Fund's charter, cause a meeting of shareholders to be held for the purpose of voting on the removal of Trustees. Meetings of the shareholders will be called upon written request of shareholders holding in the aggregate not fewer than 10% of the outstanding Common Shares of the Fund.

Certificates representing shares of the Fund will not normally be issued to shareholders. The Transfer Agent will maintain an account for each shareholder upon which the registration and transfer of shares are recorded, and any transfers shall be reflected by bookkeeping entry, without physical delivery. The Transfer Agent will require that a shareholder provide requests in writing, accompanied by a valid signature guarantee form, when changing certain information in an account such as wiring instructions or telephone privileges.

The Board may create additional classes or series of preferred shares without shareholder approval. Any series or class of shares may be terminated by a vote of the shareholders of such series or class entitled to vote or by the Trustees of the Fund by written notice to shareholders of such series or class. Shareholders may remove Trustees from office by votes cast at a meeting of shareholders or by written consent.

**CUSTODIAN**

The cash and securities owned by the Fund are held by The Bank of New York, 101 Barclay Street (11E), New York, New York 10286, as Custodian, which takes no part in the decisions relating to the purchase or sale of the Fund's portfolio securities.

**LEGAL COUNSEL**

Legal matters for the Fund are passed upon by Sutherland Asbill & Brennan LLP, Washington, DC. Matters of Delaware law are passed upon by Richards, Layton & Finger, P.A., Wilmington, Delaware.

The Board of Directors and Stockholders

ING Global Advantage and Premium Opportunity Fund:

We have audited the accompanying statement of assets and liabilities, of the ING Global Advantage and Premium Opportunity Fund, as of September 8, 2005, and the related statements of operations and changes in net assets for the day then ended. These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards of the Public Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the ING Global Advantage and Premium Opportunity Fund as of September 8, 2005, and the results of its operations and changes in net assets for the day then ended in conformity with accounting principles generally accepted in the United States of America.

**ING GLOBAL ADVANTAGE AND PREMIUM OPPORTUNITY FUND**

**NOTES TO FINANCIAL STATEMENTS AS OF SEPTEMBER 8, 2005**

**NOTE 1 ORGANIZATION**

ING Global Advantage and Premium Opportunity Fund (the Fund) is a newly organized, diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended. The Fund was originally organized as a Delaware statutory trust on July 7, 2005 with initial capital contributed on September 8, 2005. As a newly organized entity, the Fund has had no operations other than its organization and the sale and issuance of 5,000 shares of common stock at an aggregate purchase price of \$100,000 to ING Investments, LLC (the Investment Adviser). The Fund's Declaration of Trust provides for two classes of shares consisting of (i) a class of common shares, par value \$0.01 per share, and (ii) a class of preferred shares which may be divided into one or more series of preferred shares and with such par value as may be authorized from time to time by the Fund's Board of Trustees (the Board).

Management of the Fund intends to file a registration to offer common shares of the Fund for public sale. The Fund will invest in global common stocks of companies located in a number of different countries throughout the world, including the United States and will utilize an integrated options writing strategy.

**NOTE 2 SIGNIFICANT ACCOUNTING POLICIES**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income or loss and expenses during the reporting period. Actual results could differ from those estimates.

**NOTE 3 AGREEMENTS**

The Fund intends to enter into an investment advisory agreement (the Advisory Agreement) with the Investment Adviser under which the Investment Adviser, subject to the overall supervision of the Board will provide investment advisory services to the Fund. For providing these services, the Investment Adviser will receive a fee from the Fund of 0.75% of the Managed Assets. For the purposes of the Advisory Agreement, Managed Assets are defined as the Fund's average daily gross asset value, minus the sum of the Fund's accrued and unpaid dividends on any outstanding preferred shares and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper or notes issued by the Fund and the liquidation preference of any outstanding preferred shares).

The Investment Adviser intends to engage ING Investment Management Co. (ING IM) as the sub-adviser of the Fund. The Fund intends to engage ING Funds Services, LLC (the Administrator) to perform administrative services to the Fund for which it will be paid 0.10% of the Fund's Managed Assets.

**NOTE 4 EXPENSE LIMITATION**

The Investment Adviser has entered into a written Expense Limitation Agreement with the Fund under which it will limit the expenses of the Fund, excluding interest, taxes, leverage expenses, brokerage and extraordinary expenses to 1.00% of average net assets.

The Investment Adviser may at a later day recoup from the Fund management fees waived and other expenses assumed by the Investment Adviser during the previous 36 months, but only if, after such reimbursement, the Fund's expense ratio does not exceed the percentage described above.

The Expense Limitation Agreement is contractual and shall renew automatically for one-year terms unless ING Investments, LLC provides written notice of the termination of the Expense Limitation Agreement within 90 days of the end of the then current term.

**Table of Contents**

**ING GLOBAL ADVANTAGE AND PREMIUM OPPORTUNITY FUND**

**NOTES TO FINANCIAL STATEMENTS AS OF SEPTEMBER 8, 2005 (CONTINUED)**

**NOTE 5 ORGANIZATIONAL AND OFFERING EXPENSES**

The Investment Adviser will pay out of its own funds an additional fee on assets sold to certain selling syndicate members. The additional amounts may vary by syndicate member and will be negotiated upon their selection. Those syndicate members will have agreed to provide certain after-market services to the Fund designed to maintain the visibility of the Fund on an ongoing basis and to provide relevant information, studies or reports regarding the Fund and the closed-end investment company industry. The fee is typically either a one-time up-front fee in the range of 1% of assets sold by the individual syndicate member, or a per annum fee of approximately 0.15% on assets sold.

A portion of the net proceeds of the proposed public offering will be used to pay for the offering costs and organizational expenses. Offering costs will be charged against the proceeds from the offering when received. Organizational expenses will be treated as an expense as incurred and are currently estimated to be \$70,000.

Organization costs recorded in the accompanying financial statements as well as offering costs which have been incurred and are deferred pending the receipt of proceeds from the proposed offering reflect management's best estimate and are subject to change upon the completion of the offering and conclusion of the organization process. In the event the public offering does not occur, the Fund will not be able to pay the expenses. The Investment Advisor has also committed to bear all organizational and offering costs incurred by the Fund, which exceed \$0.04 per common share of the shares issued in connection with the proposed public offering.

**NOTE 5 FEDERAL INCOME TAXES**

The Fund intends to qualify for the tax treatment applicable to regulated investment companies under Subchapter M of the Internal Revenue Code of 1986, as amended, and, among other things, intends to make the requisite distributions to its stockholders, which will relieve it from federal income or excise taxes. Therefore, no provision has been recorded for federal income or excise taxes.

**APPENDIX A**

**ING FUNDS**

---

**PROXY VOTING PROCEDURES AND GUIDELINES**

**Effective Date: July 10, 2003**

**Revision Date: September 15, 2005**

---

**I. INTRODUCTION**

The following are the Proxy Voting Procedures and Guidelines (the Procedures and Guidelines ) of the ING Funds set forth on *Exhibit 1* attached hereto and each portfolio or series thereof (each a Fund and collectively, the Funds ). The purpose of these Procedures and Guidelines is to set forth the process by which each Fund will vote proxies related to the equity assets in its investment portfolio (the portfolio securities ). The Procedures and Guidelines have been approved by the Funds Boards of Trustees/Directors
