Notes to the Consolidated Financial Statements

(Dollars and shares in thousands, except per share amounts)

(Unaudited)

Note 1 Basis of Presentation

The Consolidated Financial Statements include the accounts of ProQuest Company and its subsidiaries, including ProQuest Information & Learning (PQIL) and ProQuest Business Solutions (PQBS), and are unaudited.

As permitted under the Securities and Exchange Commission (SEC) requirements for interim reporting, certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. Certain reclassifications to the 2004 Consolidated Financial Statements have been made to conform to the 2005 presentation. We believe that these financial statements include all necessary and recurring adjustments for the fair presentation of the interim period results. These financial statements should be read in conjunction with the Consolidated Financial Statements and related notes included in our annual report on Form 10-K for the fiscal year ended January 1, 2005.

In June 2004, we sold our Dealer Management System (DMS) business. For periods prior to June 2004, the operating results of this business have been segregated from our continuing operations in our Consolidated Statements of Operations.

Note 2 - Significant Accounting Policies

Accounts Receivable. Accounts receivable are stated net of the allowance for doubtful accounts which was \$ 2,443, \$1,452, and \$2,579 at October 1, 2005, January 1, 2005, and October 2, 2004, respectively.

Inventory. Inventory costs include material, labor, and overhead. Inventories are stated at the lower of cost (determined using the first in, first out (FIFO) method) or market, net of reserves.

Table of Contents

The components of inventory are shown in the table below as of the dates indicated:

	October 1, 2005	January 1, 2005	October 2, 2004
Finished products	\$ 13,313	\$ 3,411	\$ 2,855
Products in process and materials	2,448	1,901	2,140
Total inventory, net	\$ 15,761	\$ 5,312	\$ 4,995

Property, Plant, Equipment, and Product Masters. Property, plant, equipment, and product masters are recorded at cost. The straight-line method of depreciation is primarily used, except for PQIL product masters (which represent the cost to create electronic and microform master document copies which are subsequently used in the production process to fulfill customers' information requirements), which are depreciated on the double declining balance method. The carrying value of the product masters is \$186,025 (net of \$231,296 of accumulated depreciation), \$171,368 (net of \$161,321 of accumulated depreciation), and \$173,723 (net of \$151,389 of accumulated depreciation) at October 1, 2005, January 1, 2005, and October 2, 2004, respectively.

As of October 1, 2005, fixtures and equipment held under capital leases totaled \$428 (net of \$217 accumulated depreciation). There were no capital leases as of January 1, 2005 or October 2, 2004.

Curriculum. Curriculum includes the acquired curriculum in the amount of \$97,000 resulting from the acquisition of Voyager in the first quarter of 2005, as well as additional ongoing curriculum development costs. The curriculum that was acquired with Voyager is being amortized over 10 years on a straight-line basis. New curriculum development costs for programs that have an estimated life of more than one year are capitalized and amortized over the expected lives of the programs, typically 3 years. Curriculum development costs on programs with a one-year shelf life are expensed as incurred. The carrying value of curriculum is \$94,357 (net of \$6,687 of accumulated amortization) at October 1, 2005.

Stock Option Plan. As permitted by Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock Based Compensation* , we account for our stock option plan using the intrinsic method prescribed in Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees* and related interpretations. Accordingly, compensation expense is recorded on the date of grant only if the current market price of the underlying stock exceeds the exercise price of the stock option. Pro forma net earnings and earnings per share disclosures for employee stock option grants based on the fair value-based method (defined in SFAS No. 123),

Table of Contents

whereby the fair value of stock-based awards at the date of grant would be subsequently expensed over the related vesting periods, are indicated below:

	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	October 1, 2005	October 2, 2004	October 1, 2005	October 2, 2004

Deduct: Total stock-based employee compensation expense determined under fair-value based method for all awards, net of related tax effects	(1,253)	(1,449)	(3,910)	(4,567)

Diluted - as reported	\$ 0.60	\$ 0.42	\$ 1.27	\$ 1.81
Diluted - pro forma	\$ 0.57	\$ 0.37	\$ 1.16	\$ 1.65

The fair value of restricted stock is based on the market value of those shares at the grant date. The fair value of each option granted is estimated on the date of grant using the Black-Scholes option-pricing model or a binomial model. The assumptions for the Black-Scholes option-pricing model are as follows:

	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	October 1, 2005	October 2, 2004	October 1, 2005	October 2, 2004
Expected stock volatility	35.72%	37.60%	36.71%	38.53%
Risk-free interest rate	3.77%	3.12%	3.82%	3.04%
Expected years until exercise	4	4	4	4
Dividend yield	0.00%	0.00%	0.00%	0.00%

On February 4, 2004, the Compensation Committee of our Board of Directors granted 1,961.5 nonqualified stock options with an exercise price of \$30.97 to six members of our senior executive team. These stock options are intended to serve as a long-term incentive consistent with the Board's desire that management deliver long-term sustainable stockholder value.

Based on the complexity of this plan, we have utilized a binomial model to estimate the fair value of the options, utilizing the following assumptions:

Edgar Filing: PROQUEST CO - Form 10-Q

Expected stock volatility	31.50%
Risk-free interest rate	3.07%
Expected years until exercise	5
Dividend yield	0.00%

Table of Contents

We also issue shares of restricted stock to certain employees and non-employees. For the thirteen and thirty-nine weeks ended October 1, 2005 we issued 4 and 113 shares respectively, compared to 6 and 11, respectively, for the thirteen and thirty-nine weeks ended October 2, 2004. These shares are valued at the market price at their respective award dates, recorded as Unearned compensation on restricted stock on our Consolidated Balance Sheets, and recognized as expense over the vesting period, typically 3 years.

Derivative Financial Instruments and Hedging Activities. All derivative instruments are recognized as assets or liabilities in the balance sheet at fair value.

Net Earnings per Common Share. Basic net earnings per common share is computed by dividing net earnings by the weighted-average number of common shares outstanding during the period. Diluted net earnings per common share is computed by dividing net earnings by the weighted-average number of common shares outstanding during the period, and reflects the potential dilution that could occur if all of our outstanding stock options that are in-the-money were exercised and the restricted stock was fully vested, using the treasury stock method. Under the treasury stock method, the proceeds that would be received from the exercise of all in-the-money options are assumed to be used to repurchase shares. A reconciliation of the weighted-average number of common shares and equivalents outstanding in the calculation of basic and diluted net earnings per common share is shown in the table below for the periods indicated:

	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	October 1, 2005	October 2, 2004	October 1, 2005	October 2, 2004
Basic	29,752	28,588	29,602	28,494
Dilutive effect of stock options and non-vested restricted stock	481	227	434	312
Diluted	30,233	28,815	30,036	28,806

In accordance with SFAS No. 128, *Earnings per Share*, 233 and 3,097 common stock equivalent shares for the thirteen weeks ended October 1, 2005 and October 2, 2004, respectively, and 315 and 2,959 common stock equivalent shares for the thirty-nine weeks ended October 1, 2005 and October 2, 2004, respectively, issuable upon the exercise of stock options were excluded from the above computations because the exercise price of such options were greater than the average market prices of the common stock and therefore the impact of these shares was antidilutive.

Note 3 Discontinued Operations

In June 2004, we sold our DMS business, which was a component of PQBS. The DMS business was a software business, which did not fit with our core electronic publishing strategy. The net gain resulting from the sale was derived as follows:

Purchase price	\$ 35,900
Net assets, reserves, and expenses	(20,562)
Gain on sale, net	\$ 15,338

Table of Contents

Results for discontinued operations are shown in the table below for the periods indicated:

	Thirty-Nine Weeks Ended October 2, 2004
Net sales	\$ 8,567
Earnings before interest and income taxes	1,499
Interest expense, net	(237)
Income tax expense	(470)
Earnings from discontinued operations	\$ 792

We will continue to provide parts and service products for powersports, recreational vehicles, and marine dealers. In addition, we entered into an exclusive distributor agreement with the DMS buyer. Approximately \$5,100 was recorded as deferred revenue related to this agreement, and will be recognized as revenue over the sixty-month contract. For the thirteen and thirty-nine weeks ended October 1, 2005, \$255 and \$765 respectively, were recognized as revenue related to this contract.

Note 4 Comprehensive Income

Comprehensive income or loss includes net earnings, net unrealized gain(loss) on derivative instruments related to interest rate hedging, foreign currency translation adjustments, minimum pension liability, and net unrealized gain on available-for-sale securities.

Comprehensive income is shown in the table below for the periods indicated:

	Thirteen Weeks Ended		Thirty-Nine Weeks Ended

Comprehensive income	\$ 17,952	\$ 12,153	\$ 34,903	\$ 52,137

Table of Contents

The net unrealized gain(loss) on derivative instruments, foreign currency translation adjustments, minimum pension liability, and net unrealized gain on securities does not impact our current income tax expense.

Note 6 Investments in Affiliates

On December 4, 2000, we entered into a Limited Liability Company Agreement with DaimlerChrysler Corporation, Ford Motor Company, and General Motors Corporation to form OEConnection (OEC).

For reporting purposes, OEC's balance sheet and statement of operations are not consolidated with our results. Beginning January 1, 2003 until December 31, 2007, we earn a royalty on OEC's net revenues, which is recorded in Net sales in our Consolidated Statement of Operations. The royalty recognized was \$373 and \$1,066 for the thirteen and thirty-nine weeks ended October 1, 2005, respectively, compared to \$330 and \$942 for the thirteen and thirty-nine weeks ended October 2, 2004, respectively.

Note 7 Goodwill, Software, Curriculum, and Other Intangible Assets

We follow SFAS No. 142, *Goodwill and Other Intangible Assets*. SFAS No. 142 requires that goodwill no longer be amortized to earnings, but instead be reviewed for impairment on an annual basis. We perform this annual analysis during the second fiscal quarter based on the goodwill balance as of the end of the first fiscal quarter.

Table of Contents

The following table summarizes the changes in the carrying amount of goodwill by segment for the periods indicated:

- (1) Changes in goodwill consist primarily of current acquisitions and disposals as well as the finalization of our preliminary purchase price allocations for prior acquisitions.

We follow the guidance in Statement of Position (SOP) 98-1 *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use* for capitalizing software projects. We follow SFAS No. 86 *Accounting for Costs of Computer Software to be Sold, Leased or Otherwise Marketed* for software projects related to external use. Included in depreciation and amortization expense was \$4,200 and \$11,331 of software amortization expense for the thirteen and thirty-nine weeks ended October 1, 2005, respectively and \$4,931 and \$12,871 for the thirteen and thirty-nine weeks ended October 2, 2004, respectively.

Curriculum includes the acquired curriculum in the amount of \$97,000 resulting from the acquisition of Voyager in the first quarter of 2005, as well as additional ongoing curriculum development costs. Included in depreciation and amortization expense was \$2,634 and \$6,687 of curriculum amortization expense for the thirteen and thirty-nine weeks ended October 1, 2005.

As previously disclosed in our annual report on Form 10-K for the year ended January 1, 2005, in November 2004 we announced that effective January 1, 2006 we will no longer offer a retiree medical program. This resulted in a negative plan amendment in the amount of \$937 which is being recognized ratably over the remaining service period through December 31, 2005. Upon the expiration of the participant option period in June 2005, an additional \$563 negative plan amendment resulted which will be recognized ratably through the remainder of the 2005 fiscal year.

Note 13 Acquisitions

On January 31, 2005, we completed our acquisition of all the outstanding ownership interest in Voyager Expanded Learning Inc. (Voyager). Voyager is part of our ProQuest Information & Learning segment. The results of Voyager's operations subsequent to the acquisition on January 31, 2005 are included in our Consolidated Financial Statements. Had Voyager been acquired effective on the first day of our 2004 fiscal year, pro forma unaudited consolidated net sales, net earnings, and net earnings per common share would have been as follows:

Voyager provides research-based curriculum and professional development programs for school districts throughout the United States. Voyager's research-based reading intervention programs integrate all of the vital components necessary for teaching every child to read and meet the requirements of the Federal No Child Left Behind Act. Voyager also provides math intervention programs, reading intervention programs for middle school and professional development for teachers.

Growing our kindergarten through twelfth grade educational business (K-12) is an important part of our long-term strategy. The acquisition of Voyager is a major step in advancing that strategy. Combining the ProQuest name with the strengths of the Voyager products as well as their market position and strong sales force will allow us to reach more customers in the K-12 market. The acquisition creates opportunities for synergies that will come from offering more products and services across more customer segments.

The total consideration paid for all the issued and outstanding common stock of Voyager was approximately \$370 million which included \$21 million in our restricted common stock which was approximately 683 thousand shares as well as a \$10 million working capital adjustment which was paid in the second quarter of 2005. The number of restricted common stock shares was determined based on the closing price of our common stock on January 31, 2005. We also agreed to pay up to an additional \$20 million in the aggregate to the shareholders of Voyager based upon Voyager's revenue performance during the period from April 1, 2005 through March 31, 2006.

We financed our acquisition of Voyager through a new issuance of private-placement notes and a new revolving line of credit (see Note 14). The 5.38% fixed notes mature in January 2015. Our previous revolving credit agreement was replaced with a new agreement with capacity of \$275 million in total borrowings and an expiration of January 2010.

5.45% Senior Notes

On January 31, 2005, we entered into a first amendment to the 2002 Note Purchase Agreement dated as of October 1, 2002, under and pursuant to which we originally issued and sold our 5.45% senior notes (the 2002 Notes) due October 1, 2012, in an aggregate principal amount of \$150 million. The first amendment, among other things, amended the financial covenants under the 2002 Note Purchase Agreement to give effect to the acquisition of Voyager. Specifically, the consolidated adjusted net worth covenant and the consolidated debt covenants were adjusted to be consistent with the terms of the 2005 Note Purchase Agreement.

5.38% Senior Notes

On January 31, 2005, we entered into the 2005 Note Purchase Agreement providing for, among other things, the issue and sale by us to the 2005 Note Purchasers of the Company's 5.38% Senior Notes due January 31, 2015, in the aggregate principal amount of \$175 million (the 2005 Notes). We are required to make six equal annual principal payments on the 2005 Notes commencing on January 31, 2010. The applicable annual interest on the 2005 Notes will be payable semi-annually in arrears calculated on the basis of a 360-day year of twelve 30-day months.

Revolving Credit Agreement

Edgar Filing: PROQUEST CO - Form 10-Q

On January 31, 2005, we replaced our previous revolving credit agreement with a new variable interest rate facility. The new Credit Agreement is a five-year, unsecured revolving credit facility in an amount up to \$275 million, with a subfacility for letters of credit (in an amount not to exceed \$20 million) and a subfacility for swingline loans (in an amount not to exceed \$15 million). The aggregate maximum principal amount of the revolver may be increased by an amount up to \$75 million during the term of the Credit Agreement, provided that the lenders are willing to grant such increase, no default exists, and certain other conditions are satisfied. Borrowings and letters of credit under the Credit Agreement bear

interest, at our option, at either the London Interbank Offered Rate plus a spread ranging from 0.75% to 1.75% or 0% to 0.25% over an alternative base rate. The alternative base rate is the greater of the Standard Federal Bank, N.A. prime rate or the Federal Funds rate plus 0.50%.

Capital Lease Obligations

With the acquisition of Voyager, we acquired property under capital leases. These capital leases expire in 2008.

Note 15 Capital Leases

We lease certain fixtures and equipment under capital leases. The aggregate future minimum lease payments related to these capital leases at October 1, 2005 are as follows:

Note 16 Subsequent Event

On October 28, 2005, we completed the sale of PQIL's periodical microfilm business, related manufacturing assets including the manufacturing facility and the coursepack business to National Archive Publishing Company (NAPC). NAPC will provide microfilming and scanning services for our electronic products. This sale is aligned with PQIL's strategy to focus on growth platforms in K-12 curriculum products and unique published products for higher education. Archival content has been and remains an important part of the business mission of ProQuest Company. We believe that redirecting our higher education resources to our digital published products will result in more sustainable revenue growth.

Under the terms of the agreement, this transaction bears a purchase price of \$30 million, consisting of \$28 million in cash less any working capital adjustments and a note in the amount of \$2 million which will bear an annual interest rate of 9% and be paid in 4 annual installments of principal plus interest, with the final payment due on December 31, 2009.

Our net sales from continuing operations increased \$46.3 million, or 40.9%, to \$159.4 million in the third quarter of 2005.

Table of Contents

ProQuest Information & Learning

Net sales at PQIL increased \$42.1 million, or 59.0%, to \$113.4 million.

Published Products.

Our published products continued to show strong demand and revenue increased \$4.1 million, or 14.7%, to \$31.9 million compared to the third quarter of 2004. The increase was driven by market demand for these products and continued improvement in library funding.

General Reference Products.

Revenue from our general reference products increased 1.9% in the quarter. Four percent revenue growth in our K-12 and higher education products was offset by continued declines in our reseller products.

Traditional Products.

Revenue from our traditional products decreased \$1.6 million, or 7.4%, to \$20.1 million. This was the result of a decline in revenue of \$2.4 million from serials and collections microfilm, backfile and miscellaneous film which was partially offset by an \$0.8 million increase in revenue from newspaper.

Voyager.

Revenue from Voyager products was \$40.1 million for the third quarter of fiscal 2005. Revenue was driven by continued strong renewal rates and expansion into new districts. Revenue at Voyager is seasonal. The first quarter is generally the lowest, with increased revenue shown as the year progresses. Revenue increases in the second quarter from summer school enrollment. The third and fourth quarters have the strongest revenue as a result of the start of the school year.

For the third quarter of 2005, approximately \$4.0 million of revenue was lost because of damage to Voyager customer schools in Louisiana, Mississippi and Texas, some of which are closed indefinitely. In addition, reading and math intervention funding of more than \$100 million was approved by the Texas state government, but disbursement of these approved funds has been delayed. The impact of the Texas funding delay on Voyager's revenue is approximately \$10 million for the combined third and fourth quarters of 2005. The third and fourth quarters of 2005 will also be impacted by a change from centralized purchasing to decentralized purchasing in the New York City school district.

ProQuest Business Solutions

Net sales at PQBS increased \$4.2 million, or 10.0%, to \$46.0 million.

Automotive Group.

Revenue from our automotive products increased \$3.9 million, or 9.9%, to \$43.3 million. This was the result of increased revenue from acquired new products that help automotive dealers solve specific business problems within sales, service, warranty, and dealer management.

(1) Percentages calculated based on each division's sales.

Our gross profit percentage increased 40 basis points to 51.2% compared to the third quarter of 2004.

At PQIL, the gross profit margin increased from 43.5% to 47.9%, an increase of 440 basis points compared to the third quarter of 2004. This increase is primarily due to the acquisition of Voyager, which has higher gross profit margins, partially offset by the amortization of acquired curriculum costs.

At PQBS, the gross profit margin decreased from 63.2% to 59.3%, a decrease of 390 basis points compared to the third quarter of 2004. This decrease resulted primarily from development costs incurred which includes updating an electronic parts catalog for a major OEM and lower margins on new products we obtained as part of acquisitions completed earlier this year.

Income Tax Expense.

For the thirteen weeks ended October 1, 2005, income taxes were recorded at an effective rate of 31.6%, compared to an effective rate of 33.0% for the thirteen weeks ended October 2, 2004. Income tax expense increased for the thirteen weeks ended October 1, 2005 due to higher operating earnings partially offset by a decrease to the effective tax rate. We expect our full year 2005 tax rate to be approximately 34%.

Table of Contents

ProQuest Information & Learning

Net sales at PQIL increased \$75.4 million, or 35.9%, to \$285.3 million.

Published Products.

Our published products continued to show strong demand and revenue increased \$14.0 million, or 16.8%, to \$97.5 million compared to the first nine months of fiscal 2004. The increase was driven by strong revenue from humanities products, Serials Solutions products and Historical Newspapers products.

General Reference Products.

Revenue from our general reference products decreased \$0.8 million, or 1.6%, to \$47.8 million primarily due to a decline in our reseller business, partially offset by increases in our K-12 products.

Traditional Products.

Revenue from our traditional products decreased \$5.8 million, or 8.6%, to \$61.6 million primarily as a result of a decline in revenue of \$5.1 million from microfilm backfile, serials and miscellaneous film.

Voyager.

Revenue from Voyager products was \$69.1 million for the eight months since the Voyager acquisition was consummated in 2005. Revenue was driven by sales of our Voyager Passport, Summer School, and Universal Literacy System programs. Revenue at Voyager is seasonal. The first quarter is generally the lowest, with increased revenue generated as the year progresses. Revenue increases in the second quarter from summer school enrollment. The third and fourth quarters have the strongest revenue as a result of the start of the school year.

For the third quarter of 2005, approximately \$4.0 million of revenue was lost because of damage to Voyager customer schools in Louisiana, Mississippi and Texas, some of which are closed indefinitely. In addition, reading and math intervention funding of more than \$100 million was approved by the Texas state government, but disbursement of these approved funds has been delayed. The impact of the Texas funding delay on Voyager's revenue is approximately \$10 million for the combined third and fourth quarters of 2005. The third and fourth quarters of 2005 will also be impacted by a change from centralized purchasing to decentralized purchasing in the New York City school district.

Net sales at PQBS increased \$9.4 million, or 7.4%, to \$135.6 million.

Automotive Group.

Revenue from our automotive products increased \$9.1 million, or 7.6%, to \$128.3 million. This was the result of increased revenue from acquired new products that help automotive dealers solve specific business problems within sales, service, warranty, and dealer management.

(1) These are calculated based on each division's sales.

Our gross profit percentage increased 20 basis points to 51.2% compared to the first nine months of fiscal 2004.

At PQIL, the gross profit margin increased from 43.9% to 46.6%, an increase of 270 basis points compared to the first nine months of fiscal 2004. This increase is primarily due to the acquisition of Voyager, which has higher gross profit margins, partially offset by the amortization of acquired curriculum costs.

At PQBS, the gross profit margin decreased from 62.8% to 61.0%, a decrease of 180 basis points compared to the first nine months of fiscal 2004. This decrease resulted primarily from development costs incurred which includes updating an electronic parts catalog for a major OEM (Original Equipment Manufacturer), developing and updating performance management products, as well as developing the solutions we acquired in 2005.

As a result of the Voyager acquisition, net interest expense increased approximately \$11.7 million.

Income Tax Expense.

For the thirty-nine weeks ended October 1, 2005, income taxes were recorded at an effective rate of 33.7%, compared to an effective rate of 34.3% for the thirty-nine weeks ended October 2, 2004. Income tax expense increased for the thirty-nine weeks ended October 1, 2005 due to higher operating earnings partially offset by a decrease to the effective tax rate. We expect our full year 2005 tax rate to be approximately 34%.

Liquidity

Long-term debt increased by \$380.7 million to \$575.3 million in the first nine months of fiscal 2005 compared to the first nine months of fiscal 2004.

In January 2005, we acquired Voyager Expanded Learning Inc. (see Note 13 to the interim unaudited Consolidated Financial Statements). We financed our acquisition through a new \$175 million issuance of private-placement notes and a new revolving line of credit. The private-placement notes carry a 5.38% fixed rate and mature in January 2015. Our previous revolving credit agreement was replaced with a new variable interest rate facility with capacity of \$275 million which expires in January 2010 (see Note 14 to the interim unaudited Consolidated Financial Statements).

For the first nine months of fiscal 2005, we generated cash from operations of \$34.7 million compared to generation of \$43.2 million for the first nine months of 2004, a decrease of \$8.5 million. The decrease in cash provided by continuing operations is primarily due to the following:

	<u>Inc/(Dec) vs. 2004</u>
	(Dollars in millions)
Net earnings	\$ 2.4
Depreciation & amortization	10.9
Accounts payable (acquisition of Voyager and timing of payments)	7.9
Accounts receivable, net (film renewals and acquisition of Voyager)	(9.1)
Deferred income taxes (additional tax payments)	(8.3)
Deferred income (decline in microfilm sales)	(6.6)
Other long-term liabilities (exclusive distributor agreement with the DMS buyer in 2004)	(5.9)

Table of Contents

We used \$419.9 million of cash in our investing activities for the first nine months of fiscal 2005, an increased use of \$374.2 million compared to the first nine months of 2004. This increase is primarily due to the following:

	Inc/(Dec) vs. 2004
	(Dollars in millions)
Expenditures associated with sales of discontinued operations	\$ 2.8
Acquisitions, net of cash acquired	(332.4)
Proceeds from (expenditures associated with) sales of discontinued operations (sale of DMS in 2004)	(35.9)
Property, plant, equipment, product masters, curriculum development costs, and software (accelerated digitization to meet market demands)	(10.0)

For the first nine months of fiscal 2005, we generated cash from financing activities of \$406.5 million compared to a use of \$0.3 million in the first nine months of fiscal 2004, an increase of \$406.8 million. This increase is primarily due to the following:

	Inc/(Dec) vs. 2004
	(Dollars in millions)
Net increase in debt (financing of Voyager acquisition and proceeds received from 2004 DMS sale)	\$ 416.7
Proceeds from exercise of stock options, net	5.3
Monetized future billings (decreased monetization of PQBS contracts)	(14.4)
Debt issuance costs (new debt issuance and amendment)	(2.0)

We believe that current cash balances, cash generated from operations, and availability under our line of credit will be adequate to fund the growth in working capital and capital expenditures necessary to support planned increases in sales for the foreseeable future and meet our on-going obligations for at least the next 12 months. Under our \$275.0 million revolving credit facility, \$250.0 million was outstanding as of October 1, 2005.

Other liabilities	103.1	82.5	20.6	25.0

Accounts receivable increased \$40.4 million primarily due to the acquisition of Voyager as well as annual microfilm subscriptions that were billed in the third quarter.

Other current assets increased \$19.9 million primarily due the annual microfilm subscriptions that were billed during the third quarter and timing of prepaid royalties and costs related to tradeshows.

Net purchased and developed software decreased \$3.4 million primarily due to amortization.

Accrued expenses increased \$21.7 million primarily due to an increase in accrued taxes (\$17.6 million) as a result of the 2005 projected tax liability and the reclass of a portion of the tax reserve to short term as well as an increase in accrued interest (\$4.2 million) as a result of the new debt related to the Voyager acquisition.

Deferred income decreased \$14.5 million primarily due to the seasonal nature of PQIL's deferred revenue. At year end, deferred revenue is at a high level due to the billings that occur late in the third quarter and throughout the fourth quarter.

Other liabilities increased \$20.6 million primarily due to an increase in the deferred income taxes related to the tax basis differences for Voyager intangibles (\$37.2 million). This increase was partially offset by a decline in deferred taxes (\$8.8 million) due to the provision for income taxes and a decline (\$4.9 million) due to the reclass of the tax reserve to short term.

Accounts receivable increased \$22.2 million primarily due to the acquisition of Voyager.

Other current assets increased \$7.4 million primarily due to prepaid royalties as a result of the annual microfilm subscriptions that were billed during the third quarter.

Net purchased and developed software decreased \$6.5 million primarily due to annual amortization expense as well as lower software expenditures in the first nine months of 2005.

Other assets increased \$3.0 million primarily due to the long term deferred tax asset increase (\$3.2 million) due to the tax provision and reclassification between deferred tax balances as well as the deferred financing fees as a result of the debt refinancing related to the Voyager acquisition (\$1.9 million). These increases were offset by a decrease in licenses (\$1.9 million) due to normal amortization.

Accrued expenses increased \$17.5 million primarily due to an increase in accrued taxes (\$6.3 million) as a result of the 2005 projected tax liability and the reclass of a portion of the tax reserve to short term, an increase in accrued interest (\$6.4 million) as a result of the new debt related to the Voyager acquisition, and an increase in accrued commissions (\$2.5 million) due to the Voyager acquisition.

Deferred income decreased primarily due to unit declines in our traditional microfilm subscription products and timing of microfilm billings.

Other liabilities increased \$34.6 million primarily due to an increase in the deferred income taxes related to the tax basis differences for Voyager intangibles (\$37.2 million) partially offset by a decline in the deferred taxes (\$3.6 million) due to the provision for income taxes and reclassification of deferred balances.

Interest Rate Risk Management

We have a revolving credit facility, which is variable-rate long-term debt that exposes us to variability in interest payments due to changes in interest rates. We had \$250.0 million outstanding on the credit facility at October 1, 2005, and the weighted-average interest rate on the credit facility was 5.587% at October 1, 2005. We have decided not to hedge this interest rate risk. Instead, we have limited this risk by maintaining \$150.0 million of our debt in the form of long-term fixed-rate notes with a 5.45% fixed coupon rate and a 5.60% effective rate. These notes have a seven-year average life and are due in seven equal annual payments of \$21.4 million beginning October 1, 2006 and ending October 1, 2012. Additionally, we maintain \$175.0 million of our debt in the form of long-term fixed-rate notes with a 5.38% fixed coupon rate and a 5.42% effective rate. These notes have a ten-year average life and are due in six annual payments of \$29.1 million beginning January 31, 2010 and ending January 31, 2015.

Recently Issued Financial Accounting Standards

In May 2005, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 154, *Accounting Changes and Error Corrections* (SFAS 154), which replaces Accounting Principles Board Opinion (APB) No. 20 *Accounting Changes* , and SFAS No. 3 *Reporting Accounting Changes in Interim Financial Statements* . SFAS 154 changes the requirements for the accounting for and reporting of a change in accounting principle, and applies to all voluntary changes in accounting principles, as well as changes required by an accounting pronouncement in the unusual instance that it does not include specific transition provisions. Specifically, SFAS 154 requires retrospective application to prior periods financial statements, unless it is impracticable to determine the period-specific effects or the cumulative effect of the change. SFAS 154 does not change the transition provisions of any existing pronouncement. SFAS 154 is effective for all accounting changes and corrections of errors made beginning January 1, 2006.

In December 2004, the FASB issued Statement No. 123(R), *Share-Based Payment* . FASB Statement No. 123(R) replaces FASB Statement No. 123, *Accounting for Stock-Based Compensation* and supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees* . The revised statement requires that the compensation cost relating to share-based payment transactions be recognized in financial statements and measured at the fair value of the equity instruments issued. Effective April 14, 2005, the Securities and Exchange Commission issued a new rule that amends the compliance dates for companies to implement the revised statement to the beginning of their next fiscal year after June 15, 2005, which for ProQuest is January 1, 2006. Under SFAS 123(R), we will begin recognizing expense for the portion

Table of Contents

of outstanding stock options for which the requisite vesting period has not yet been met and any new awards over the requisite vesting period, based on the fair value of these awards at the date of grant. We are still evaluating the impact of SFAS No. 123(R) on our financial statements.

On October 22, 2004, the President of the United States signed The American Jobs Creation Act of 2004. Among the provisions of the Act is a provision that allows for the exclusion from income of a portion of the remittances of earnings of foreign subsidiaries to U.S. shareholders through December 31, 2005. In December 2004, the FASB issued FASB Staff Position 109-2, *Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creation Act of 2004* (FSP 109-2). Under the guidance of FSP 109-2, an enterprise is allowed time beyond the financial reporting period of enactment to evaluate the effect of the American Jobs Creation Act of 2004 on its plan for reinvestment or repatriation of foreign earnings for purposes of applying SFAS No. 109. The deduction is subject to a number of limitations. We have not yet decided whether, or to what extent, foreign earnings will be repatriated. Based on our analysis to date, however, it is possible that we may repatriate an amount from \$0 to \$9.6 million. The related range of income tax effects of such repatriation cannot be reasonably estimated at the time of issuance of these financial statements. We will be in a position to finalize our assessment by December 31, 2005.

Item 3.

Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

As a result of our financing activities, we are exposed to changes in interest rates which may adversely affect our results of operations and financial position. We are not currently hedging this interest rate risk. Instead, we have limited this risk by maintaining \$150.0 million of our debt in the form of long-term fixed-rate notes with a 5.45% fixed coupon rate and a 5.60% effective rate. These notes have a seven-year average life and are due in seven equal annual payments of \$21.4 million beginning October 1, 2006 and ending October 1, 2012. Additionally, we maintain \$175.0 million of our debt in the form of long-term fixed-rate notes with a 5.38% fixed coupon rate and a 5.42% effective rate. These notes have a ten-year average life and are due in six annual payments of \$29.1 million beginning January 31, 2010 and ending January 31, 2015. Our remaining debt is variable-rate long-term debt, which exposes us to variability in interest payments due to changes in interest rates.

Foreign Currency Risk

As a result of our global operations, we are exposed to changes in foreign currencies. Our practice is to hedge a limited number of significant operating balance sheet exposures to foreign currency rate fluctuations via use of foreign currency forward or option contracts. We do not utilize financial derivatives for trading or other speculative purposes. At October 1, 2005, we had no outstanding foreign currency forward or option contracts. The potential impact on our earnings from a 10% adverse change in quoted foreign currency rates would be immaterial.

Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

Under the supervision and with the participation of our senior management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this quarterly report (the Evaluation Date). Based on this evaluation, our chief executive officer and chief financial officer concluded as of the Evaluation Date that our disclosure controls and procedures were

effective such that the information relating to the Company, including consolidated subsidiaries, required to be disclosed in our Securities and Exchange Commission (SEC) reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company s management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting.

There have been no changes in our internal control over financial reporting that occurred during the quarter ended October 1, 2005 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.
