Security Valuation

Securities owned by the Funds for which market quotations are readily available are valued at current market value. Current market value means the last sale price of the day or, in the absence of any such sales, the bid price obtained from quotation reporting systems, pricing services or other approved methods. Other assets and securities for which no quotations are readily available are valued at fair value pursuant to procedures adopted by the Board of Trustees. The factors considered in making such valuations are subject to change over time and reviewed periodically. The values assigned to fair valued investments are based on future developments inherent in long-term investments. Further, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market of the investments existed, and the differences could be material.

Options, Futures and Swap Agreements

The current market value of an exchange traded option is the last sale price or, in the absence of a sale, the price obtained by reference to broker-dealer quotations. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As the contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed. Swap agreements are generally priced daily based upon quotations from brokers and the change, if any, is recorded as unrealized appreciation or depreciation.

Other information regarding the Funds is available in the Funds' most recent Report to Shareholders. This information is available on the Securities and Exchange Commission's website (www.sec.gov).

Item 2 Controls and Procedures

- (a) The Western Asset/Claymore U.S. Treasury Inflation Protected Securities Fund (the Registrant) have concluded, based on their evaluation of the Registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the Registrant's disclosure controls and procedures are reasonably designed to ensure that information required to be disclosed by the Registrant on Form N-Q is recorded, processed, summarized and reported within the required time periods in the Securities and Exchange Commission's rules and forms and that information required to be disclosed by the Registrant in the reports that it files or submits on Form N-Q is accumulated and communicated to the Registrant's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

- (b) There were no changes in the Registrant's internal control over financial reporting during the Registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the internal control over financial reporting.
