Notice on interim dividend

Please be advised that Kubota Corporation (hereinafter the Company) resolved at the Board of Directors Meeting held on November 6, 2007 that the Company would pay interim dividend.

1. Details of interim dividend

	Interim dividend	Interim dividend of the prior year
Record date	September 30, 2007	September 30, 2006
Interim dividend per ADS	¥ 30	¥ 25
Amount of dividend	¥ 7,733 million	¥ 6,475 million
Date of payment	December 5, 2007	December 5, 2006
Resource of interim dividend	Retained earnings	Retained earnings

2. Reasons for raising interim dividend

The Company raised the annual dividend per ADS from ¥50 to ¥60 in the prior year. Based on the annual dividend of the prior year, the Company decided to pay a half of the prior year's annual dividend as interim dividend of this fiscal year.

< Cautionary Statements with Respect to Forward-Looking Statements >

Edgar Filing: KUBOTA CORP - Form 6-K

This document may contain forward-looking statements that are based on management's expectations, estimates, projections and assumptions. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results may differ materially from what is forecast in forward-looking statements due to a variety of factors, including, without limitation: general economic conditions in the Company's markets, particularly government agricultural policies, levels of capital expenditures, both in public and private sectors, foreign currency exchange rates, continued competitive pricing pressures in the marketplace, as well as the Company's ability to continue to gain acceptance of its products.

Notice on the conclusion of demerger agreement

with Kubota Environmental Service Co., Ltd.

Kubota Corporation (hereinafter the Company) resolved at the Board of Directors Meeting held on November 6, 2007 that the Company would split and transfer its nightsoil treatment plant business to Kubota Environmental Service Co., Ltd. (hereinafter KSK), which is a wholly-owned subsidiary of the Company, effective on January 1, 2008.

1. Purpose of the demerger

At the end of March 2006, the Company has discontinued receiving new orders of nightsoil treatment plant and has been planning to continue the related business specialized in repair works to extend lifetime of decrepit nightsoil treatment plants.

After careful consideration, the Company has decided to transfer its nightsoil treatment plant business to KSK which conducts repairs works and maintenance of environmental control plants.

2. Outline of the demerger

(1) Schedule

Board of Directors Meeting for approval of the demerger : November 6, 2007

Conclusion of the demerger agreement : November 6, 2007

Effective date of the demerger : January 1, 2008 (planned)

* Pursuant to the Article 784 Paragraph 3 of Corporate Law of Japan, the Company splits and transfers its nightsoil plant business without approval of shareholders meeting of the Company.

Furthermore, pursuant to the Article 796 Paragraph 1 of Corporate Law, KSK succeeds the nightsoil plant business without approval of shareholders meeting of KSK.

(2) Method of the demerger

The demerger is an absorption-type demerger. The Company will effect the demerger and KSK will succeed the business.

(3) Change in the amount of capital

There will be no change in capital.

(4) Treatment of stock acquisition rights and bonds with stock acquisition rights

There is no outstanding stock acquisition rights and bonds with stock acquisition rights.

(5) Rights and obligations to be succeeded by KSK

KSK will succeed inventories, assets such as fixed assets, liabilities such as deposits received, the major contractual status in such contracts as related to developments and transactions as well as all rights and obligations arising under the status that belong to the business to be split. (Any rights and obligations related to the business other than the business to be split, and any rights and obligations that are not supposed to be related to the business to be split will be excluded.)

However, any employment contracts with the employees who are engaged in the business to be split and any and all rights and obligations related to such contracts will not be succeeded by KSK.

(6) Prospect for fulfillment of obligations

The Company and KSK believe that both companies will be able to fulfill the obligations of each company after the effective date of the demerger.

Table of Contents**3. Outline of the Company and KSK (as of March 31, 2007)**

Table of Contents

5. Changes after the demerger

There will be no changes in the Company's name, principal line of business, address of head office, representative persons, capital and closing date as a result of the demerger.

6. Financial outlook

There will be no effect on the consolidated financial results for the year ending March 31, 2008 because the demerger will be completed between the Company and its wholly-owned subsidiaries. The effect of the demerger on non-consolidated financial results for the year ending March 31, 2008 will be quite small.

Table of Contents**Kubota Corporation
and Subsidiaries****1. Review of Operations and Financial Condition****1. Review of operations****(1) Summary of the results of operations for the six months under review**

For the six months ended September 30, 2007, revenues of Kubota Corporation and subsidiaries (collectively the Company) increased ¥3.0 billion (0.5 %), to ¥561.0 billion from the corresponding period in the prior year.

In the domestic market, revenues decreased ¥9.8 billion (3.6 %), to ¥265.8 billion from the corresponding period in the prior year. Revenues in Internal Combustion Engine & Machinery decreased due to declined sales of core farm equipment, even though sales of construction machinery and engines increased. Revenues in Pipes, Valves, and Industrial Castings increased due to a great increase in sales of industrial casting, although sales of ductile iron pipes and plastic pipes slightly decreased. Revenues in Environmental Engineering decreased affected by the discontinuation of a part of operations. Revenues in Other decreased slightly due to a decrease in sales of condominiums and construction while sales of vending machine expanded substantially.

Revenues in overseas markets increased ¥12.8 billion (4.5 %), to ¥295.3 billion from the corresponding period in the prior year. In North America, sales of tractors decreased affected by the slowdown of U.S. housing market. Sales of construction machinery and engines also decreased. On the contrary, in Europe, sales of tractors, construction machinery and engines increased largely all together. In Asia outside Japan, sales of tractors continued a high rate of growth in Thailand. As a result, the ratio of overseas revenues to consolidated revenues rose 2.0 percentage points, to 52.6 % compared with the corresponding period in the prior year.

Operating income decreased ¥1.6 billion (2.1 %), to ¥75.1 billion from the corresponding period in the prior year. By segment, operating income in Internal Combustion Engine and Machinery expanded due to the increase in revenues and the positive effect of depreciation of the yen. Operating income in Pipes, Valves, and Industrial Castings decreased owing to sharp price hike of raw materials. Operating income in Environmental Engineering deteriorated due to sales decrease and declining profit margins by intensifying competition. Operating income in Other rose mainly due to increased sales of vending machines.

Income from continuing operations before income taxes, minority interests in earnings of subsidiaries, and equity in net income of affiliated companies decreased ¥2.4 billion (3.1 %), to ¥76.2 billion, along with the decrease of operating income. Income taxes were ¥29.3 billion (representing an effective tax rate of 38.5%), and net amount of minority interests in earnings of subsidiaries and equity in net income of affiliated companies to deduct was ¥3.7 billion and loss from discontinued operation was ¥0.2 billion. As a result, net income during the six months under review decreased ¥1.3 billion (3.0 %), to ¥43.0 billion from the corresponding period in the prior year.

(2) Review of operations by industry segment**1) Internal Combustion Engine and Machinery**

Revenues in Internal Combustion Engine and Machinery increased ¥4.7 billion (1.2 %), to ¥408.5 billion from the corresponding period in the prior year, comprising 72.8 % of consolidated revenues. Domestic revenues decreased ¥8.4 billion (6.1 %), to ¥129.2 billion, and overseas revenues increased ¥13.1 billion (4.9 %), to ¥279.3 billion. This segment comprises farm equipment, engines and construction machinery.

In the domestic market, sales of farm equipment decreased. With full-scale development of new government agricultural policies, farmers investment for farm equipment, especially medium-sized farmers investment, remained sluggish. The Company actively implemented sales expansion policies to stimulate the market and was able to increase its market share; however, these efforts did not compensate for the market slump. On the other hand, sales of construction machinery rose because the Company conducted promotional sales activities tailored to various customer groups and increased its market share. Sales of engines increased steadily due to sales expansion to domestic manufacturers of construction and industrial machinery that their exports are very brisk.

Table of Contents

In overseas markets, sales of tractors, the Company's core product, increased steadily. In the U.S., sales of tractors decreased due to the slowdown of the markets related to housing and construction, and serious drought in Southeast area. In Europe, sales of tractors showed strong expansion due to the active introduction of new products and aggressive promotional sales activity. In Asia outside Japan, sales of tractors continued a large increase in Thailand where demand for tractors is rapidly expanding associated with development of mechanized farming.

Sales of construction machinery increased substantially in Europe. Although sales of construction machinery decreased in North America due to the deterioration of the market, sales in Europe reported a large expansion due to rising demand resulted from favorable economic situations and sales expansion of the larger-sized product, which was introduced in the prior year. Sales of engines also increased steadily, mainly in Europe. However, sales of farm machinery decreased due to a stagnation of the market in combine harvesters in China.

2) Pipes, Valves, and Industrial Castings

Revenues in Pipes, Valves, and Industrial Castings increased ¥3.6 billion (4.2 %), to ¥87.4 billion from the corresponding period in the prior year, comprising 15.5 % of consolidated revenues. Domestic revenues increased ¥4.9 billion (7.0 %), to ¥74.3 billion, and overseas revenues decreased ¥1.3 billion (9.1 %), to ¥13.2 billion. This segment comprises pipes, valves and industrial castings.

In the domestic market, sales of ductile iron pipes and plastic pipes slightly decreased from the corresponding period in the prior year. On the contrary, sales of industrial castings increased substantially owing to a sales increase of ductile tunnel segment and products for steel and petrochemical industries, in addition to a steady increase in sales of spiral welded steel pipes and valves.

In overseas markets, sales of industrial castings were favorable, while exports of ductile iron pipes to the Middle East decreased substantially.

3) Environmental Engineering

Revenues in Environmental Engineering decreased ¥4.3 billion (18.2 %), to ¥19.5 billion from the corresponding period in the prior year, comprising 3.5 % of consolidated revenues. Domestic revenues decreased ¥5.1 billion (22.9 %), to ¥17.1 billion, and overseas revenues increased ¥0.8 billion (46.3 %), to ¥2.4 billion. This segment consists of environmental control plants and pumps.

In the domestic market, sales of the Water & Sewage Engineering division, the Waste Engineering division and Pumps division decreased due to the continued challenging operating environment in public works related business and the negative impact of suspension of designated pre-approved supplier due to compliance. In particular, sales of the Waste Engineering division significantly decreased due to downsizing nightsoil treatment plant business and waste incinerating plant business, which was decided in the prior year. On the other hand, in overseas market, sales of pumps increased largely.

4) Other

Revenues in Other decreased ¥0.9 billion (2.0 %), to ¥45.6 billion from the corresponding period in the prior year, comprising 8.2 % of consolidated revenues. Domestic revenues decreased ¥1.2 billion (2.5 %), to ¥45.2 billion, and overseas revenues increased ¥0.2 billion (180.2 %), to ¥0.4 billion. This segment comprises vending machines, electronic-equipped machinery, air-conditioning equipment, construction, septic tanks, condominiums and other business.

Sales of vending machine and electronic-equipped machinery increased. Sales expansion of vending machine was substantial due to a sales increase of cigarettes-vending machine with the function of age-identification. On the other hand, sales of condominiums decreased due to a fewer completed condominiums, and sales of construction decreased due to the contraction of business field. Sales of air-conditioning equipment and septic tanks also decreased from the corresponding period in the prior year.

Table of Contents**(3) Prospect for the Full Fiscal Year**

The Company forecasts consolidated revenues for the year ending March 31, 2008 at ¥1,140.0 billion, that are the same as the previous forecast released in May 11, 2007. In the domestic market, revenues in Pipes, Valves and Industrial Castings are expected to increase. However, revenues in Internal Combustion Engine and Machinery, Environmental Engineering and Other are forecast to decrease. As a result, total domestic revenues are forecast to decrease from the prior year. As for overseas revenues, the Company expects higher revenues than the prior year due to steady expansion of revenues in Internal Combustion Engine and Machinery.

A forecast of operating income was revised upward by ¥5.0 billion, to ¥136.0 billion in consideration of the result of operations for the six months ended September 30, 2007 and recent economic conditions. The Company expects income from continuing operation before income taxes, minority interests in earnings of subsidiaries, and equity in net income of affiliated companies for the full fiscal year to be ¥136.5 billion, an increase of ¥4.5 billion from the previous forecast. Net income is forecast to be ¥77.5 billion, an increase of ¥1.0 billion from the previous forecast. (These forecasts anticipate an exchange rate of ¥118=US\$1.)

(In millions of yen)

	Previous				Prior year
	Forecasts	Revised			(Year ended
	on May 11, 2007	Forecasts	Change		March 31, 2007)
Revenues	1,140,000	1,140,000			1,127,456
Operating Income	131,000	136,000	5,000	4%	130,347
Income from continuing operations before income taxes, minority interests in earnings of subsidiaries, and equity in net income of affiliated companies	132,000	136,500	4,500	3%	131,565
Net income	76,500	77,500	1,000	1%	76,457

2. Financial condition**(1) Assets, liabilities and shareholders' equity**

Total assets at the end of September 2007 amounted to ¥1,547.5 billion, an increase of ¥86.5 billion from the corresponding period in the prior year. As for assets, brisk sales of Internal Combustion Engine and Machinery in Europe and Asia resulted in an increase in inventories in those regions. Short- and long-term finance receivables substantially increased mainly related to North American business. On the other hand, other investments decreased due to a decrease in unrealized gains on securities.

Regarding liabilities, interest-bearing debt increased associated with an increase in short- and long-term finance receivables. Accrued retirement and pension costs largely decreased resulting from adoption of a new accounting standard for pensions at the end of March 2007. Shareholders' equity substantially increased due to recorded net income.

Total assets increased ¥44.9 billion compared with those at the end of March 2007. As for assets, short- and long-term finance receivables increased, while notes and accounts receivable and other investments substantially decreased.

Regarding liabilities, interest-bearing debt increased, while trade notes and accounts payable and income tax payable decreased. The high level of net income contributed to a steadily increase in shareholders' equity. As a result, shareholders' equity ratio was 44.4 %, 0.5 percentage points higher than the prior year-end.

Table of Contents

(2) Cash flows

Net cash provided by operating activities during the six months under review was ¥45.8 billion, a decrease of ¥2.3 billion from the corresponding period in the prior year. Although net income slightly decreased, increased depreciation and amortization related to expanding production capacities compensated this decrease. Moreover, total change of working capital items, such as trade notes and accounts receivable, inventories, and trade notes and accounts payable, was very slight compared with the corresponding period in the prior year. Accordingly, net cash provided by operating activities was the same level as the corresponding period in the prior year.

Net cash used in investing activities was ¥36.5 billion, a decrease of ¥2.0 billion from the corresponding period in the prior year. Purchases of fixed assets resulted from expansion of production capacity increased and an increase in finance receivables mainly in North America and Thailand pushed up net cash used in investing activities, while collection of finance receivables also increased. As a result, net cash used in investing activities was the same level as the corresponding period in the prior year.

Net cash used in financing activities was ¥3.0 billion, an increase of ¥10.3 billion from the corresponding period in the prior year. Although purchases of treasury stock decreased, a restraining of financing and increased dividend payments substantially increased net cash used in financing activities.

As a result, including the effect of exchange rate, cash and cash equivalents at the end of September 2007 were ¥90.0 billion, an increase of ¥7.4 billion from the prior year-end.

3. Matter concerning profit allocation

(1) Basic policy related to the Company's profit allocation

The Company's basic policy for the return of profit to shareholders is to maintain stable dividends or raise dividends together with share buy-back and cancellation of treasury stock. The Company recognizes returning profit to shareholders is one of the most important missions and will strive to expand it, considering requirements of maintaining sound business operations as well as adapting to the future business environment.

(2) Matter concerning profit allocation for this fiscal year

The Company has decided to pay ¥30 per ADS as interim cash dividends.

In accordance with the previously described basic policy related to the Company's profit allocation of maintaining stable dividends or raising dividends, the Company is considering paying cash dividends per ADS for the year under review equivalent to, or more of, the prior year (¥60 per ADS). Specific amount will be decided based on the development of business performance in the year under review.

Moreover, during the six months under review the Company purchased 2.90 million of its own shares (¥2.4 billion) on market pursuant to the resolutions of the Board of Directors' Meetings.

Table of Contents

2. Management Policies

1. Basic management policy

More than a century since its founding, the Company has continued to help improve people's quality of life, by offering products and services including farm equipment, pipes for water supply and sewage systems, environmental control plants, industrial castings, and building materials. The Company has its management principle that the Company contributes to the development of society and the preservation of the earth's environment through its products, technology, and services that provide the foundation for society and for affluent lifestyles. While adhering to this management principle, the Company is implementing management policies that are focused on prioritizing allocation of its resources, emphasizing agility in its operations and strengthening consolidated operations. Through these measures, the Company aims to improve its adaptability to respond with flexibility to the changing times, resulting in a high enterprise value.

2. Principal Business Policies for Medium- to Long-Term Growth in Profit

To achieve further development and steady increases in enterprise value, the Company is actively addressing the following management issues.

(1) Accelerating the Expansion of Internal Combustion Engine and Machinery in Overseas Operations

The Company is allocating management resources to the overseas operations of Internal Combustion Engine and Machinery on a priority basis to expand its business domain from the perspective of the product portfolio and geographical coverage, while working to strengthen the business structure of this segment to the level appropriate for a global enterprise.

From a product portfolio point of view, the Company is broadening the scope of overseas operations of the segment by expanding the model lineup of tractors, construction machinery, and farm machinery as well as substantially diversifying the product lineup. Concerning diesel engines, which are key components in Kubota products, the Company is endeavoring to develop and manufacture its diesel engines in a timely manner that meet more stringent emission regulations to be introduced in Japan, North America, and Europe. Through this effort, the Company is enhancing the competitive edge of its diesel engine powered products and further expanding sales of diesel engines to other manufacturers.

From a geographical perspective, the Company is promptly implementing different strategies in North America, Europe, and Asia, responding to the regional characteristics of each market. In North America and Europe, which are currently the segment's principal markets, the Company is working to significantly enhance its product and service supply capabilities. In Asia outside Japan, where rapid market expansion is ongoing, the Company is moving forward actively with initiatives to strengthen the capabilities of its production and sales networks in Thailand and China. As a part of these measures, in August, the Company has reached the following decision that the Company and The Siam Cement Group would jointly establish a company and construct a plant for manufacturing tractors. Through the full implementation of these initiatives, the Company is promoting the geographical diversification of the overseas operations of Internal Combustion Engine and Machinery.

Moreover, to prevail in intense competition and accelerate the expansion of overseas business activities, it will be essential to enhance the segment's business structure to enable it to outpace the competition in global markets. The Company will fortify production capacity in Japan and overseas to meet rising overseas demand while also training personnel who can carry out the work of a global enterprise, speed up R&D activities, and work to consistently enhance design and manufacturing capabilities as well as operating efficiency all with the objective of strengthening the segment's business structure from a comprehensive perspective.

Table of Contents

(2) Restructuring the Public Works Related Businesses

The Company's public works related businesses are included in Pipes, Valves, and Industrial Castings and Environment Engineering. These businesses are confronting an exceptionally challenging operating environment because of the continuous cutbacks in public works investment. To respond effectively to changes in the operating environment, the Company is undertaking drastic restructuring in its business structure.

(a) Pipes, Valves, and Industrial Castings Segment to Step Up Initiatives to Expand Core Businesses

The Company has worked to strengthen its profitability by making drastic reductions in costs, including fixed expenses, bringing about major increases in productivity, and becoming thoroughly market-oriented and competitive. As a result of these efforts, the Company has improved profitability over the past several years.

Going forward, to increase profits, the Company must actively focus on expanding core business while advancing into closely related areas as it strives to maintain and increase its earning power. This will require shifting the business activities from the public sector to the private sector, and also from the domestic market to overseas markets. The Company will shift the thrust of business development to the private sector and to opportunities overseas as a part of initiatives to further expand core businesses.

(b) Restructuring Environmental Engineering

The deterioration of the market environment and the intensification of competition in this segment have occurred faster than anticipated. In addition, the emergence of compliance issues has acted to accelerate deterioration in business performance, and the segment has fallen into a tough situation. To revitalize and restructure this segment, the Company is aggressively working to shift its business model and concentrate on its core competencies. Specifically, by developing its positions in the private sector and overseas markets, the Company is endeavoring to reduce dependency of this segment on the public sector while also promoting a shift from the plant engineering business to the sales and installation of machinery and equipment. In addition, by focusing on water-related businesses, the Company will work to make more efficient use of management resources in this segment and thereby promptly recover sound profitability and strengthen its business structure.

To make a successful transition to its new business model, the segment must have strong product development capabilities for stand-alone equipment and be cost-competitive. With this in mind, in April 2007, the Company formed the Environmental Equipment R&D Center. Through the activities of this new center, the Company intends to make the manufacturing technology and development capabilities nurtured by Internal Combustion Engine and Machinery available to this segment and, while taking thorough measures to lower costs, differentiate its technology from that of other companies.

(c) Moving toward Close Teamwork between the Two Segments

Both Pipes, Valves, and Industrial Castings and Environmental Engineering have core strengths in water-related products. By moving toward close teamwork between these segments, the Company will seek to realize synergies among their products and technologies and achieve greater operational efficiencies. The Company has taken specific measures in this direction by combining the organizations of the two segments within the parent company, beginning in April 2007. Going forward, by promoting the sharing of information related to products and technologies connected with water and strengthening teamwork in development and sales activities, the Company will work to increase the competitiveness of both segments.

Table of Contents

(3) Management Based on Corporate Social Responsibility (CSR)

To achieve medium-to-long term growth and development, the Company must be an enterprise that continuously contributes to the sustainable development of society in harmony with the environment in addition to increasing its economic value. With this awareness, the Company is implementing CSR management as the most important management policy, and it pursues its corporate activities with a strong sense of responsibility regarding the economic, social, and environmental aspects of its activities as a global corporate citizen that responds positively to the expectations and trust of its various stakeholders.

Looking ahead, the Company will adhere strongly to its management principle: The Kubota Group contributes to the development of society and the preservation of the earth's environment through its products, technology, and services that provide the foundation for society and for affluent lifestyles. To remain an upstanding and proud member of society, the Company will also strengthen its compliance, internal controls, and corporate governance, as well as ensure full adherence to these and other aspects of its activities that are basic to management in the spirit of CSR.

< Cautionary Statements with Respect to Forward-Looking Statements >

This document may contain forward-looking statements that are based on management's expectations, estimates, projections and assumptions. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results may differ materially from what is forecast in forward-looking statements due to a variety of factors, including, without limitation: general economic conditions in the Company's markets, particularly government agricultural policies, levels of capital expenditures, both in public and private sectors, foreign currency exchange rates, continued competitive pricing pressures in the marketplace, as well as the Company's ability to continue to gain acceptance of its products.

On July 27, 2007, the Company announced that the Company and Urbanex Co., Ltd. have reached a basic agreement to transfer all the shares of Kubota Maison Co., Ltd. (Kubota Maison) to Urbanex Co., Ltd. On October 1, 2007, the Company transferred 70% shares of Kubota Maison in accordance with the agreement. As a result of the transfer, Kubota Maison was excluded from consolidated subsidiaries and became an affiliated company of Kubota Corporation. Kubota Maison will be excluded from affiliated companies by the scheduled transfer of the remaining 30% shares on April 1, 2009.

4. 25 affiliated companies are accounted for under the equity method.

Major affiliated companies:	<table border="0"> <tr> <td style="vertical-align: top;">Domestic</td> <td style="vertical-align: top;"> 17 sales companies of farm equipment, Kubota Matsushitadenko Exterior Works, Ltd. </td> </tr> </table>	Domestic	17 sales companies of farm equipment, Kubota Matsushitadenko Exterior Works, Ltd.

5. Summary of accounting policies

- (1) The accompanying consolidated financial information has been prepared in accordance with accounting principles generally accepted in the United States of America except for the presentation for segment information described in (2).

Edgar Filing: KUBOTA CORP - Form 6-K

- (2) The consolidated segment information is prepared in accordance with a requirement of the Japanese Securities and Exchange regulations. This disclosure is not consistent with SFAS No.131, Disclosures about Segments of an Enterprise and Related Information .
6. The Company adopted the FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of SFAS No. 109 , as of April 1, 2007. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of uncertainty in income tax return.
The adoption of this interpretation did not have a material impact on the Company s consolidated results of operations and financial position.
7. In the consolidated statements of income for the six months ended September 30, 2006, finance income and expenses from retail finance business were classified mainly into Interest income and Interest expense in other income (expenses). However, from the consolidated statements of income for the year ended March 31, 2007, the Company has classified them into Revenues and Cost of revenues , since the significance of retail finance business has been increasing and the business is becoming one of the major or central operations of the Company. Accordingly, the reclassification has been made to the presentation of the consolidated statements of income for the six months ended September 30, 2006.
Finance income included in Revenues for the six months ended September 30, 2007 and 2006 are ¥12,980 million and ¥9,238 million, respectively, and finance expenses included in Cost of revenues for the six months ended September 30, 2007 and 2006 are ¥7,115 million and ¥5,542 million, respectively.
8. The Company accounts for discontinued operations in accordance with SFAS No.144, Accounting for the Impairment or Disposal of Long-Lived Assets and presents the results of discontinued operations as a separate line item in the consolidated statements of income under loss from discontinued operations, net of taxes. The figures of the consolidated statements of income for the prior year related to the discontinued operations have been separately reported from the ongoing operating results to conform with the current year presentation.
9. Reclassification
The consolidated financial reports for the year ended March 31, 2007 and the six months ended September 30, 2006 have been reclassified to conform to the presentation for the six months ended September 30, 2007.
