Kobelco Construction Machinery America Invests \$10.5 Million in

Expansion of Calhoun, Georgia Plant

CALHOUN, GA, June 5, 2008 Kobelco Construction Machinery America LLC, a manufacturer of compact, mid-size and full-size excavators, announced that it is investing approximately \$10.5 million in its Calhoun, Georgia operations. Five million dollars has been appropriated for production expansion into a new 52,000 square foot building while an additional \$1.5 million will be used to develop a new training center. A \$4 million upgrade in production machinery is also just being completed at the existing Calhoun location.

The investments will allow the company to consolidate training operations, expand production capacity by approximately 15 percent and increase exports to about a third of its total production. The new training center will provide a facility for sales and service training for dealers and company personnel and will employ a full-time technical support staff.

All Kobelco machines are manufactured in our own plants to ensure continuous excellence in quality, and our global manufacturing footprint allows us to maintain specialized manufacturing Centers Of Excellence in close proximity to customers, wherever they are in the world, said Terry Sheehan, president and chief executive officer of Kobelco America. Timely delivery of quality products to our customers requires continued investments in the production processes for best-in-class manufacturing activities, which is exactly what we are committed to.
