b. Comparative Information

Balances items as of June 30, 2008 shown in these unaudited financial statements for comparative purposes arise from audited annual financial statements for the year then ended.

Balances for the three-month period ended September 30, 2008 of the income, shareholder's equity and cash flows statements are shown for comparative purposes with the same period of the previous fiscal year.

NOTE 2: CONSIDERATION OF THE EFFECTS OF INFLATION

The unaudited financial statements have been prepared in constant monetary units, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the government discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date again, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements should be restated through September 30, 2003. However, due to the low level of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the consolidated financial statements taken as a whole.

NOTE 2: (Continued)

The rate used for restatement of items was the domestic whole revenue price index published by the National Institute of Statistics and Census.

NOTE 3: SIGNIFICANT ACCOUNTING POLICIES

The unaudited financial statements of the subsidiaries mentioned in Note 1, have been prepared on a consistent basis with those applied by IRSA Inversiones y Representaciones Sociedad Anónima. The Note 1 to the unaudited basic financial statements details the most significant accounting policies applied by the Company. Below are the most relevant accounting policies adopted by the subsidiaries, which are not included in that Note.

a. Revenue recognition

In addition to the description in the unaudited basic financial statements:

Net income for admission rights and rental of stores and stands

Leases with tenants are accounted for as operating leases. Tenants are generally charged a rent, which consists of the higher of (i) a monthly base rent (the Base Rent) and (ii) a specified percentage of the tenant's monthly gross sales (the Percentage Rent) (which generally ranges between 4% and 10% of tenant's gross sales).

Furthermore, pursuant to the rent adjustment clause in most leases, the tenant's Base Rent generally increases between 7% and 12% each year during the term of the lease. Minimum rental income is recognized following the accrue method.

Certain lease agreements contain provisions, which provide for rents based on a percentage of sales or based on a percentage of sales volume above a specified threshold. APSA determines the compliance with specific targets and calculates the additional rent on a monthly basis as provided for in the contracts. Thus, these contingent rents are not recognized until the required thresholds are exceeded.

Generally, APSA's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial nine-months, upon not less than 60 days' written notice, subject to penalties which vary from one to one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease.

NOTE 3: (Continued)

a. (Continued)

Additionally, APSA monthly charges its tenants administration fees relating to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations. These fees are prorated among the tenants according to their leases and varies from shopping center to shopping center.

Administration fees are recognized monthly when accrued. In addition to rent, tenants are generally charged admission rights, that tenants may be required to pay upon entering into a lease or upon lease renewal. Admission right is normally paid in one lump sum or in a small number of monthly installments. Admission rights are recognized in earnings using the straight-line method over the life of the respective lease agreements.

Lease agent operations

Fibesa S.A. and Comercializadora Los Altos S.A. (Altocity.com S.A.'s continuing company), companies in which APSA have shares of 99.9999% and 100% respectively, act as the leasing agents for APSA bringing together that company and potential lessees for the retail space available in certain of APSA's shopping centers. Fibesa S.A.'s and Comercializadora Los Altos S.A.'s revenues are derived primarily from collected commissions calculated as a percentage of the final rental income value. Revenues are recognized at the time the transaction is successfully concluded.

Credit card operations Consumer Financing

Revenues derived from credit card transactions consist commissions, financing income, charges to clients for life and disability insurance and for statements of account, among other. Commissions are recognized at the time the merchants' transactions are processed, while the rest financial income is recognized when accrued.

Income generated from granting consumer loans mainly includes financial interest which are recognized by the accrued method during the period irrespective of whether collection has or has not been made.

Hotel operations

The Company recognizes revenues from its rooms, catering and restaurant facilities as accrued on the close of each business day.

Net operating results from each business unit are disclosed in Note 4.

b. Intangible assets

Intangible assets are carried at cost restated as mentioned in Note 2, less accumulated amortization and corresponding allowances for impairment in value. Included in the Intangible Assets caption are the following:

Trademarks

Trademarks include the expenses and fees related to their registration.

Pre-operating and organization expenses

This item reflects expenses generated by the opening of new shopping malls restated as mentioned in Note 2. Those expenses are amortized by the straight-line method in 3 years, beginning as from the date of opening of the shopping center.

Projects Development Expenses

Intangible assets, related to new projects development expenses, have been valued at acquisition cost and they will be amortized during the period in which the Company starts developing the project.

The value of the intangible assets does not exceed their estimated recoverable value at period end.

c. Goodwill

i) Negative goodwill: Negative goodwill represents the excess of the market value of net assets of the subsidiaries at the percentage of participation acquired over the acquisition cost. Goodwill has been restated following the guidelines mentioned in Note 2 and amortization has been calculated by the straight-line method based on an estimated useful life, that in no case exceed 20 years, considering the weighted-average of the remaining useful life of identifiable assets acquired subject to depreciation.

Includes goodwill originated from the purchase of shares of Emprendimiento Recoleta S.A., Empalme S.A.I.C.F.A y G. and Mendoza Plaza Shopping S.A. (through APSA) and Palermo Invest S.A.

IRSA Inversiones y Representaciones Sociedad Anónima

NOTE 3: (Continued)

c. (Continued)

ii) Positive goodwill: the goodwill represents the excess of the acquisition cost over the net assets market value of the business acquired to the share percentage.

Includes the goodwill originated by the purchase of shares of Tarshop S.A. and Fibesa S.A (through APSA).

Additionally, also includes goodwill originated from the purchase of net assets of Museo Renault y Della Paolera 265.

Amortizations were calculated through the straight line method on the basis of an estimated useful life considering the weight average of the remaining useful life of the assets acquired.

The residual value of goodwill arising from acquisition of net assets and shares in companies has been shown in the Goodwill caption. Amortizations were classified in the Amortization of the Goodwill caption of the statement of income.

Values thus obtained do not exceed the respective estimated recoverable values at period/year end.

d. Liabilities in kind:

Liabilities in kind corresponding to obligations to deliver units to be built are valued considering the cost of the assets received. The Company estimates that this value does exceed the cost of construction of the units to deliver plus additional costs to transfer the assets to the creditor. Liabilities in kind have been shown in the Trade account payables .

NOTE 17: RESTRICTED ASSETS

i) Puerto Retiro S.A.

On April 18, 2000, Puerto Retiro S.A (indirect subsidiary of the Company) was notified of a filing made by the National Government, through the Ministry of Defense, to extend the petition in bankruptcy of Inversora Dársena Norte S.A. (Indarsa) to Puerto Retiro S.A. Concurrently with the complaint, at the request of plaintiff, the bankruptcy court granted an order restraining the ability of Puerto Retiro S.A. to sell or dispose in any manner the acquired real estate property from Tandanor S.A. in June 1993.

Indarsa had acquired 90% of the capital stock of Tandanor S.A. to a formerly estate owned company privatized in 1991, engaged in the shipyard industry.

Indarsa did not comply with the payment of the outstanding price for the acquisition of the stock of Tandanor, and therefore the Ministry of Defense requested the bankruptcy of Indarsa, pursuing to extend the bankruptcy to Puerto Retiro S.A.

The evidence steps of the legal procedures have been completed. Puerto Retiro S.A. appealed the precautionary measure, being the same confirmed by the Court on December 14, 2000. The parties have submitted their claims in due time. The file was passed for the judge to issue a pronouncement, this being a decree adjourning the summoning of decisions to pronouncement in the understanding that there exists pre-judgment in respect of the penal cause filed against ex-officers of the Ministry of Defense and ex-directors of the Company. Consequently, the matter will not be solved until there is final judgment in penal jurisdiction.

The Management and legal advisors of Puerto Retiro S.A. estimate that there are legal and technical issues sufficient to consider that the request for postponement of bankruptcy will be denied by the court. However, taking the circumstances into account and the progress of the legal action, this position cannot be considered final.

ii) Mortgage guaranteed loan Hoteles Argentinos S.A.

In March 2005, Credit Suisse First Boston International (CSFB) acquired the debt for US\$ 11.1 million of Hoteles Argentinos (HASA), which had been in non-compliance since January 2002. In April 2006 HASA reduced the capital amount payable to US\$ 6.0 million. The balance will accrue LIBO interest rate 6 months plus 7.0% and will be paid off in installments, being the last of US\$ 5,070 due in March, 2010.

In addition, two credit default swaps were subscribed. One between IRSA and CSFB for 80% of the restructured debt value, and the other one is between Starwood Hotels and Resorts Worldwide Inc. (Starwood) and CSFB for 20% of the restructured debt value. Under these contracts, both companies (IRSA and Starwood) are able to protect CSFB in case of non-compliance with HASA s obligations. For valuable consideration, the Company and Starwood will be paid a coupon on a periodical basis. To support the obligations assumed, the Company deposited as guarantee the amount of US\$ 1.2 million.

NOTE 18: TARSHOP S.A. CREDIT CARD RECEIVABLES SECURITIZATION PROGRAM

Tarshop S.A. has ongoing securitization programs through which Tarshop S.A., a majority-owned subsidiary of APSA, transfers a portion of its customer credit card receivable balances to master trusts that issues certificates to public and private investors.

Under the securitization programs, Trusts may issue two types of certificates representing undivided interests in the Trusts - Títulos de Deuda Fiduciaria (TDF) and Certificate de Participation (CP), which represent debt, and equity certificates, respectively. Interest and principal services are paid periodically to the TDF holders throughout the life of the security. CPs are subordinated securities which entitle the CP holders to share pro rata in the cash flows of the securitized credit card receivables, after principal and interest on the TDFs and other fees and expenses have been paid. During the revolving period no payments are made to TDF and CP holders. Principal collections of the underlying financial assets are used by the Trust to acquire additional credit card receivables throughout the revolving period. Once the revolving period ends, a period of liquidation occurs during which: (i) no further assets are purchased, (ii) all cash collections are used to fulfill the TDF service requirements and (iii) the remaining proceeds are used to fulfill the CPs service requirements.

- National Government Compensation Bond US\$ 2012 (section 29, points b, c and d): compensating bond difference between pesified assets and liabilities at Ps. 1.00 for the rate of exchange difference of Ps. 0.40, translated at Ps. 1.40 per US\$ dollar: US\$ 360,811.
- National Government Compensation Bond coverage US\$ 2012 (section 29 point e). Coverage bond difference between assets and liabilities in US dollars net of the compensating bond: US\$ 832,827.

In September 2002 and October 2005, the Argentine Central Bank credited US\$ 344,050 and US\$ 16,761 in BODEN 2012, respectively, for compensation.

On August 1, 2005, a note was submitted to the Argentine Central Bank stating the acceptance of the number of BODEN verified by the Superintendence of Financial and Exchange Entities.

Finally, in September 2005 began the subscription of Coverage BODEN 2012. As of September 30, 2008 the subscription in BODEN 2012 amounts to US\$ 773,531.

Exposure to the non-financial public sector

Banco Hipotecario S.A. keeps recorded in its financial statements assets with the Non-Financial Public Sector amounting to Ps. 2,298,597. On the other hand, liabilities to the Argentine Central Banks recorded as of September 30, 2008 amount to Ps. 202,644 being the credit balance related to advances to subscribe BODEN 2012 in line with sections 28 and 29 of Decree 905/02.

The net exposure with the Public Sector, without considering liquid assets in accounts authorized by the Argentine Central Bank, amounts to Ps. 2,095,953 and Ps. 2,701,357 as of September 30, 2008 and 2007, respectively.

Banco Hipotecario S.A. intends to allocate assets portfolio of the public sector as guarantee for the application of the advancement to finance the coverage bonds subscription, as provided for in section 29 of Decree 905/02.

As from January 1, 2006, the dispositions of point 12 of Communication A 3911 (Communication A 4455) became effective, as regards that the assistance to the Public Sector (average measured) cannot exceed 40% of total Assets of the last day of the previous month. Through Communication A 4546 of July 9, 2006, it was established that as from July 1, 2007, such limit was modified to 35%. The exposure of Banco Hipotecario S.A. to the Public Sector originated in compensations granted by the National Government as a result of year 2002 crisis, principally related to the asymmetric pesification of assets and liabilities. Economic situation

During the last months, the world's principal financial markets have suffered the impact of volatility conditions as well as lack both of liquidity and credit. Consequently, stock-market rates showed a significant fall together with an evident economic deceleration also at worldwide. Although the central countries took immediate action on the matter, the future evolution of the international markets is uncertain.

As regards the Argentine Republic, stock-markets showed a pronounced downward trend in the price of public and private bonds and a rise in interest rates, country risk and rates of exchange, which increased subsequent to the closing of these unaudited financial statements and continues to their date of issuance.

The Bank's management is evaluating and monitoring the effects derived from the situations referred to above on the Company and subsidiaries in order to adopt the necessary measures to soften the effects of the global situation.

As shown in the balance sheet of Banco Hipotecario S.A. all the above matters produced negative effects on the bank investments, the principal impact being the one generated by public bonds received and to be received arising from the offsetting established in sections 28 and 29 of Decree 905/02, and by guaranteed bonds.

NOTE 45: CAPITAL INCREASE AND LOANS IN TARSHOP S.A.

As a consequence of the international financial context, a high volatility in interest rates and increases in the so-called systemic default has been noted, both having caused a negative impact on the performance and financing of the consumption financing business. The highest default levels provoked an increase in the subordination of financial trusts that, added to the modification of their tax treatment, to the higher interest rate for risk increasing and to certain deceleration of private consumption, generated the need to review the general and specific economic prospects of Tarshop S.A. activities.

To face the increasing volatility of the international financing market and to provide Tarshop S.A. with a capital base in line with the current market conditions, in September 2008 APSA decided to

participate in a capital increase of Tarshop S.A. for up to Ps. 60 million by increasing the Tarshop S.A. shareholding from 80% to 93.4%.

Several measures were implemented since then to complement the financial support via the direct advising from APSA's management to Tarshop S.A. aiming at improving the performance of the latter by lightening the point of sale structure that would lead to 17% decrease of the payroll, the reduction of 13 point of sales and centralized areas leased by 10% of the total. The streamlining of resources included areas such as consulting services.

In line with the commercial actions other measures have been implemented, such as:

- (i) Structure redesigning of distribution channels.
- (ii) Changes in cash and financing plans to stores.
- (iii) Renegotiation of terms and conditions with member stores.

Subsequent to September 30, 2008 within the changing general environment and following the strategic plan implemented and carried out by APSA, loans were given to Tarshop S.A. in a total of \$ 66 million with the purpose of improving its financial position taking into account that Tarshop S.A. develops trust activities and that such segment is undergoing quite a particular moment. APSA is currently evaluating the convenience of capitalizing such loans.

It should also be mentioned that the recent modification of the tax treatment for financial trusts and other changes brought by the national government, forces to perform a constant monetary adjustment focusing the positioning strategy of Tarshop S.A. to face the ups and downs of the current situation.

NOTE 46: ACQUISITION OF THE PLOT OF LAND

On June 24, 2008, APSA acquired from DOWLER COMPANY S.A. the Plot of land located at Beruti 3351/3359, between Bulnes street and Coronel Díaz avenue in Buenos Aires City, located in the vicinity of the shopping mall known as Shopping Alto Palermo S.A., a location considered to be strategic for the Company.

The transaction was executed for a total price of US\$ 17,836 out of which, as of the closing date of these unaudited financial statements US\$ 8,936 had been paid and the remaining unpaid balance of US\$ 8,900 will be paid off in two equal annual and consecutive installments of US\$ 4,450 each, which do not accrue interest. NOTE 48: SUBSEQUENT EVENTS

Ordinary and Extraordinary General Meeting of Shareholders

The Ordinary and Extraordinary General Meeting of Shareholders of APSA held October 31, 2008 decided to approve the following items:

1. A 5% deduction of the income for the year ended June 30, 2008 for Legal Reserve.
2. The appropriation of a cash dividend in the amount of \$ 60,238.
3. Entitle the Board of Directors to use the mentioned amount of free availability and the free reserves as well, in line with the Company needs and in conformity with the legal applicable regulations and ad referendum of the Meeting of Shareholders, in addition to the full capacities for the following purposes, among other: appropriate dividends or provide for the acquisition of own shares in accordance with the terms of Resolution 535 of the National Securities Commission (CNV), section 220 of the Corporation Law, section 68 of Law 17,811 and all other related dispositions of the CNV's standards effective at any time. All this due to the financial crisis shown in the national and international markets from where it is clear the impact on the quotation prices of the Company values, which certainly do not agree with the Company's reality. It is, therefore, essential to protect the shareholders' interests from the sudden fluctuations of quotation prices, which is intended through these means for the purpose of avoiding a serious damage to the Company.
4. That the tax on personal assets levied on the shareholders and paid by the Company in its capacity as substitute responsible for up to Ps. 518, be fully absorbed by the Company as long as such decision is not modified by virtue of a meeting of shareholders.

NOTE 1: ACCOUNTING STANDARDS

Below are the most relevant accounting standards used by the Company to prepare these financial statements:

1.1. Preparation and presentation of audited financial statements

These unaudited financial statements are stated in Argentine pesos and were prepared in accordance with disclosure and valuation criteria contained in the Technical Resolutions issued by the Argentine Federation of Professional Councils in Economic Sciences, approved with certain amendments by the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires, in accordance with the resolutions issued by the National Securities Commission.

Unification of professional accounting standards

The National Securities Commission has issued General Resolutions No. 485 and 487 on December 29, 2005 and January 26, 2006, respectively.

Such resolutions have adopted, with certain modifications, the new accounting standards recently issued by the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires through its Resolution CD N° 93/2005. These standards are to be obligatorily applied for fiscal years or interim periods corresponding to periods started as from January 1, 2006.

The principal change that the application of these new standards has generated relates to the treatment of the adjustment for inflation in calculating the deferred tax which can be taken as a temporary difference, according to the Company's criteria. At present the adjustment for inflation is considered as a permanent difference in the deferred income tax calculation. The Company in accordance with the new accounting standards has decided not to recognize the deferred liability generated by the effect of the adjustment for inflation on the fixed assets and other non-monetary assets. The estimated effect as of the date of the issuance of these unaudited financial statements that the adoption of the new criteria would have generated would be a decrease in shareholders' equity of approximately Ps. 153.9 which should be recorded in the income statement accounts of previous periods for Ps. 155.5 (loss) and in the income statement accounts of the fiscal period Ps. 1.6 (gain).

In accordance with the Company's Management the potential effect that the new accounting standards would have in its subsidiary Banco Hipotecario S.A. would not be significant on the amount of the Company's investment.

The above-mentioned liability would probably turn to the previous position according to the detail that follows:

Amount in millions	9.1	9.0	8.6	127.2	153.9

1.2. Use of estimates

The preparation of financial statements requires the Company's Management, at a specific date, to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses for the period. The Company's Management makes estimations to calculate, for example, the allowance for doubtful accounts, depreciation and amortization, the impairment of long-lived assets, income taxes, contingencies allowances, fair value of assets purchased of related parties or net assets, the fulfillment of certain conditions for valuation of inventories to its net realizable value and fair value of transaction of exchanges (barter). Future actual results could differ from the estimates and assumptions made at the date of these unaudited financial statements.

1.3. Recognition of the effects of inflation

The unaudited financial statements have been prepared in constant Argentine Pesos, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the Company discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements should have been restated through September 30, 2003. However, due to the low level of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the financial statements taken as a whole.

The rate used for restatement of items in these financial statements is the domestic wholesale price index published by the National Institute of Statistics and Census.

1.4. Comparative information

Balances items as of June 30, 2008 shown in these unaudited financial statements for comparative purposes arise from audited annual financial statements for the year then ended.

h. Inventories

A property is classified as inventories upon determination by the Board of Directors that the property is to be marketed for sale in the normal course of business over the next several years.

Properties classified as inventories have been valued at acquisition or construction cost restated as mentioned in Note 1.3., or estimated market value, whichever is lower. Costs include land and land improvements, direct construction costs, construction overhead costs, financial costs and real estate taxes.

Inventories on which advance payments that establish price have been received, and the operation's contract terms and conditions assure that the sale will be effectively accomplished and that the income will be realized, are valued at its fair market value. Profits arising from such valuation are shown in the Gain from recognition of inventories at net realizable value caption of the Statements of Income.

Properties held for sale are classified as current or non-current based on the estimated date of sale and the time at which the related receivable is expected to be collected by the Company.

The amount recorded in inventories, net of allowances set up, does not exceed their estimated recoverable value at the end of the period/year.

The value thus obtained does not exceed the respective estimated recoverable value at the end of the period/year.

Investments in subsidiaries and affiliated companies:

Long term investments in subsidiaries and affiliated companies detailed in Exhibit C, have been valued by using the equity method of accounting based on the unaudited financial statements at September 30, 2008 issued by them. The accounting standards used by the subsidiaries to prepare their unaudited financial statements are the same as those used by the Company. The accounting standards used by the related companies to prepare their unaudited financial statements are those currently in effect.

The Company has an important investment in Banco Hipotecario S.A. This investment is valued according to the equity method due to the significant influence of the economic group on the decisions of Banco Hipotecario S.A. and to the intention of keeping said investment on a permanent basis.

In accordance with the regulations of the BCRA and the contracts signed as a result of Banco Hipotecario S.A.'s financial debt restructuring process, there are certain restrictions on the distribution of profits by Banco Hipotecario S.A. to the Company.

Certificates of participation in IRSA I financial trust:

The certificates of participation in IRSA I financial trust have been valued at the amount resulting from apportioning the participation certificate holding to the trust assets.

Undeveloped parcels of lands:

The Company acquires undeveloped land in order to provide an adequate and well-located supply for its residential and office building operations. The Company's strategy for land acquisition and development is dictated by specific market conditions where the Company conducts its operations.

Land held for development and sale and improvements are stated at cost restated as mentioned in Note 1.3. or market value, whichever is lower. As of June 30, 2008 the Company maintained allowances for impairment of certain parcels of undeveloped land for which their market value is lower than cost. (See Exhibit E).

Land and land improvements are transferred to inventories or fixed assets when construction commences or their trade is decided.

The values thus obtained, net of the allowances recorded, do not exceed their respective estimated recoverable values at the end of the period.

j. Fixed assets, net

Fixed assets comprise primarily of rental properties and other properties and equipment held for use by the Company.

Fixed assets value, net of allowances set up, does not exceed estimated recoverable value at the end of the period/year.

Rental properties

Rental properties are carried at acquisition and/or construction cost, restated as mentioned in Note 1.3., less accumulated depreciation and allowance for impairment at the end of the period. The Company capitalizes the financial costs accrued costs associated with long-term construction projects. During the period/year ended September 30 and June 30, 2008 financial costs were capitalized in the building known as DIQUE IV for Ps 1,152 and Ps 109, respectively.

Accumulated depreciation is computed under the straight-line method over the estimated useful lives of each asset. Expenditures for ordinary maintenance and repairs are charged to results in the period incurred.

The Company has allowances for impairment of certain rental properties as disclosed in Exhibit A. Increases and decreases of such allowances are disclosed in Exhibit E.

Significant renovations and improvements, which improve or extend the useful life of the asset are capitalized and depreciated over its estimated remaining useful life. At the time depreciable assets are retired or otherwise disposed of, the cost and the accumulated depreciation of the assets are eliminated from the accounts and the resulting gain or loss is disclosed in the unaudited statement of income.

Other properties and equipment

Other properties and equipment properties are carried at cost, restated as mentioned in Note 1.3., less accumulated depreciation at the end of the period. Accumulated depreciation is computed under the straight-line method over the estimated useful lives of the assets, as specified below:

Assets	Estimated useful life (years)
Leasehold improvements	On contract basis
Furniture and fixtures	10
Vehicles	5
Machinery and equipment	10
Computer equipment	3

The cost of maintenance and repairs is charged to expense as incurred.

The cost of significant renewals and improvements are added to the carrying amount of the respective assets. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts.

k. Intangible assets

Intangible assets correspond to expenses that the Company avoids incurring as a result of acquiring effective rent contracts and the estimated costs of entering into rent contracts acquired (see Note 1.5.I.). These are shown net of their accumulated amortization.

Intangible assets are amortized during the average initial remaining useful life of the rent contracts acquired.

The value of these assets does not exceed its estimated recoverable value as of period/year-end.

l. Business combinations

Entities purchased by the Company were recorded in line with the acquisition method set forth in Technical Resolution No. 18. All assets and liabilities acquired to third independent parties were adjusted to show their fair value. In To such extent, the Company identified the assets and liabilities acquired including intangible assets such as:

The estimated current value of the costs that the Company avoids incurring as a result of acquiring effective rent contracts, for which the estimated costs of entering into similar contracts were taken into account as well as other factors such as the geographical location and the size of the area rented. The value of the effective rent contracts is included in intangibles and it is amortized as a rental cost in the remaining initial term of each contract.

The value of the rent contracts acquired, for which the market conditions to the date of acquisition were taken into account as well as other factors including geographical location, size and location of the area rented in the building, profile and credit risk conditions of the lessees to determine if the rental contracts acquired have higher or lesser conditions to those of the market at the time of the acquisition. The current value of the difference between the contracts acquired under the terms of the contracts and the market conditions were taken into account, disclosing an asset or a liability

(shown in Other liabilities) depending if the contracts acquired are higher or lesser to the market values.

The values thus determined should be amortized as an increase or decrease of the income for rentals during the remaining term of the respective contracts, including any renewal considered in the valuation. If a lessee terminates its rent contract, the non-amortized portion of the intangible assets will be recorded in the statement of income.

Relationships with clients. The items that the Company considered to assign value to such relationships include the nature and extension of the commercial relationships currently existing with lessees, growth prospects for development of new business, lessee's credit qualities and renewal prospects. The Company has not identified any lessee with whom it has developed a type of relationship allowing the recognition of an intangible asset.

The process of identification and the determination of the price paid is a matter that requires complex judgments and significant estimates.

The Company used the information contained in valuations estimated by independent appraisers as primary base for assigning the price paid for the land and the building acquired. The amounts assigned to all the other assets and liabilities were based on independent valuations or on the Company's own analysis on comparable assets and liabilities. The current value of tangible assets acquired considers the property value as if it was empty.

In accordance with the terms of Technical Resolution 21, the difference between the price paid and the addition of the current values of the net assets acquired generate goodwill. If the value of identified tangible and intangible assets and liabilities exceeds the price paid, the intangible assets acquired are not recognized as they would cause an increase of the negative goodwill generated by these acquisitions at the time of the purchase. The goodwill generated due to an acquisition of net assets is shown in line with the tangible asset acquired. Amortizations have been calculated by the straight line method on the basis of the estimated useful life considering the weight average of the remaining useful life of the tangible assets acquired.

m. Deferred financing cost

Expenses incurred in connection with the issuance of Negotiable Obligations and proceeds of loans are amortized over the life of the related issuances. In the case of redemption or conversion of these notes, the related expenses are amortized using the accelerated depreciation method.

Amortization has been recorded under Financial results, net in the statements of income as a greater financing expense.

n. Customer advances

Customer advances represent payments received in advance in connection with the sale and rent of properties.

o. Income tax

The Company has recognized the charge for income tax by the deferred tax liability method, recognizing timing differences between measurements of accounting and tax assets and liabilities (see Note 14).

To determine deferred assets and liabilities, the tax rate expected to be in effect at the time of reversal or use has been applied to timing differences identified and tax loss carry forwards, considering the legal regulations approved at the date of issuance of these unaudited financial statements.

p. Minimum Presumed Income Tax (MPIT)

The Company calculates MPIT by applying the current 1% rate on computable assets at the end of the period/year. This tax complements income tax. The Company's tax obligation in each period will coincide with the higher of the two taxes. However, if MPIT exceeds income tax in a given period, that amount in excess will be computable as payment on account of income tax arising in any of the following ten years.

The MPIT is not effective for fiscal years which have begun from January 1, 2008; consequently, the Company has discontinued the calculation of such tax as from the current year.

q. Allowances and Provisions

Allowance for doubtful accounts: the Company provides for losses relating to mortgages, lease and other accounts receivable. The allowance for losses is recognized when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the terms of the agreements. The allowance is determined on a one-by-one basis considering the present value of expected future cash flows. While Management uses the information available to make assessments, future adjustments to the allowance may be necessary if future economic conditions differ substantially from the assumptions used in making the assessments. Management has considered all events and/or transactions that are subject to reasonable and normal methods of estimations, and the unaudited financial statements reflect that consideration.

For impairment of assets: the Company regularly assesses its non-current assets for recoverability at the end of every period.

The Company has estimated the recoverable value of rental properties based on their economic use value, which is determined based on estimated future cash flows discounted. For the rest of the assets (inventories and undeveloped parcels of land) the Company makes a comparison with market values based on values of comparable properties. If the recoverable value of assets, which had been impaired in prior years, increases, the Company records the corresponding reversals of impairment loss as required by accounting standards.

Increases and decreases of allowances for impairment of assets during the period/year ended September 30, 2008 and are detailed in Exhibit E.

For lawsuits: the Company has certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving labor. The Company accrues liabilities when it is probable that future costs will be incurred and such costs can be reasonably estimated. Such accruals are based on developments to date, the Company's estimates of the outcomes of these matters and the Company's lawyers' experience in contesting, litigating and settling other matters.

As the scope of the liabilities becomes better defined, there may be changes in the estimates of future costs, which could have an effect on the Company's future results of operations and financial condition or liquidity.

At the date of issuance of these unaudited financial statements, the Company's Management understands that there are no elements to foresee other potential contingencies having a negative impact on these unaudited financial statements.

r. Shareholders equity accounts

Amounts of shareholders equity accounts have been restated following the guidelines detailed in Note 1.3. until February 28, 2003. Subsequent movements are stated in the currency of the month to which they correspond.

Common stock account was stated at historical nominal value. The difference between value stated in constant currency, following the guidelines detailed in Note 1.3., and historical nominal value is shown under Inflation adjustment of common stock forming part of the shareholders equity.

s. Results accounts

The results for the period are shown as follows:

Amounts included in Unaudited Statements of Income are shown in currency of the month to which they correspond.

Charges for assets consumed (fixed asset depreciation, intangible asset amortization and cost of sales) were determined based on the values recorded for such assets.

Results from investments in subsidiary and affiliated companies was calculated under the equity method, by applying the percentage of the Company s equity interest to the results of such companies, with the adjustments for application of Technical Resolution No. 21.

t. Pension information

The Company does not maintain any pension plans. Argentine laws provide for pension benefits to be paid to retired employees from government pension plans and/or privately managed funds plan to which employees may elect to contribute.

u. Revenue recognition

u.1. Sales of properties

The Company records revenue from the sale of properties when all of the following criteria are met:

The sale has been consummated.

There is sufficient evidence to demonstrate the buyer s ability and commitment to pay for the property.

The Company's receivable is not subject to future subordination.

u.1. Sales of properties (Continued)

The Company has transferred the property to the buyer.

The Company uses the percentage-of-completion method of accounting with respect to sales of development properties under construction. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs according to budgeted costs. The Company does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun. The percentage-of-completion method of accounting requires the Company's Management to prepare budgeted costs in connection with sales of properties/units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

u.2. Revenues from leases

Revenues from leases are recognized on a straight line basis over the life of the related lease contracts.

v. Cash and cash equivalents

The Company considers, for cash flow purposes, all highly liquid investments with original maturities of three months or less, consisting primarily of mutual funds, as cash equivalents.

NOTE 26: FINANCIAL AND CAPITAL MARKET SITUATION

During the last months, the world's principal financial markets have suffered the impact of volatility conditions as well as lack of liquidity, credit and uncertainty. Consequently, stock-market rates showed a significant fall worldwide together with an evident economic deceleration also at world level. Although the central countries took immediate action on the matter, the future evolution of the international markets is uncertain, which produce direct effects on the quotation of financial assets, particularly shares, debt titles and investment funds.

As regards the Argentine Republic, stock-markets showed a pronounced downward trend in the price of public and private bonds and a rise in interest rates, country risk and rates of exchange, which increased subsequent to the closing of these unaudited financial statements and continues to their date of issuance.

The Company's management is evaluating and monitoring the effects derived from the situations referred to above on the Company and subsidiaries in order to adopt in real time the necessary measures to soften the effects of the global situation.

In connection with the quotation value of shares issued, the Company's management reported that the quotation price of its shares has also been affected, in the understanding that such fall does not coincide with the Company's equity reality or with its true economic situation but that it is a consequence of the current process through which national and international markets are undergoing.

SUMMARY as of September 30, 2008

I. Macroeconomic Context

Given the deteriorated international financial conditions seen in recent months, the scenario appears to be one of reduced liquidity in the global economy, which in turn requires an adjustment to the prospects for global economic growth. This may have a negative impact on the level of economic activity in Argentina and hence on the level of financing of the public budget and foreign trade balances which during the past years have been showing signs of robustness. Within this context, our business lines are well positioned to face a scenario of reduced growth thanks to the levels of cash flow generation and their long term maturity profiles.

Regarding the performance of economic activity in Argentina, according to official data concerning the month of August 2008, the Monthly Estimate of Economic Activities (Estimador Mensual de la Actividad Económica, EMAE) pointed to 7.4% growth compared to the first eight months of the year 2007. Therefore, though some signs of a slow-down in the rate of growth in economic activity have started to be perceived, the data available as of the month of August 2008 showed that August was marking the sixty-eighth consecutive month of expansion since December 2002.

When it comes to Public Finances, fiscal accounts, foreign trade current account balances and the reserves held by the Central Bank of Argentina (Banco Central de la República Argentina, BCRA), they have performed favorably. During the first eight months of calendar 2008, Argentina's primary fiscal surplus showed a year-on-year 43% change driven by high tax revenues. As regards the country's external accounts, Argentina had posted a US\$ 894 million surplus in its current account for the second quarter of calendar 2008. As a result, the Central Bank succeeded in strengthening its position in reserves and succeeded in accumulating as of September 30, 2008 a level of US\$ 47,121 million, which allows the Central Bank to manage the increase in volatility in the inflows and outflows of capital caused by the special current financial markets environment.

The construction industry continues to expand, though at a more moderate pace compared to previous periods. According to the data shown by the Summary Indicator of Construction Activities (Indicador Sintético de la Actividad de la Construcción, ISAC) prepared by the National Institute of Statistics and Censuses (Instituto Nacional de Estadísticas y Censos, INDEC), for the first nine months of calendar 2008 this index has shown a 7.6% increase compared to the same period of the previous year. Compared to the same month of the previous year, during the month of September, the index has shown a positive 5.7% change without accounting for seasonality and a 9.4% change in the series that accounts for seasonality.

As regards the demand for homes in the residential real estate market, on one hand it may be influenced by the impact of a cooler economy and on the other hand, it may be pushed by the impact of local investors' preference for channeling their savings to the real estate sector in times of volatility in financial markets. What seems to be more apparent, is that our market should not expect to see a crisis in sub-prime mortgage loans affecting the value of homes as has been the case in other economies basically because home mortgage loans in the Argentine market remain at hardly 2% of the country's GDP.

According to the Argentine Chamber of Medium Sized Companies (Cámara Argentina de la Mediana Empresa, CAME) in September 2008 retail sales dropped by 8.7% compared to the same month of 2007 as a result of the uncertain global and local economic conditions. In contrast, our Shopping Center segment continued to perform favorably over the last quarter and showed a year-on-year increase in sales, with positive growth rates. The leading position enjoyed by our shopping centers in the market as well as our shopping centers' cash flow generation compared to the long-term profile in debt maturities entail that the business is in a position to face a more adverse economic context.

The Office market in Buenos Aires: up to now, the local market had benefited from the absence of available office space which in turn led to a stepwise increase in prices. In our premium locations, rentals had even largely exceeded the amounts charged in Argentina in the years when the Convertibility Law was in force. Recently, certain caution has been noticed among lessees regarding the decision to lease larger areas. However, this circumstance has not yet had an impact on prices or available space. According to Richard Ellis, the rental prices for AAA class offices in the areas of Plaza San Martín, Catalinas and Plaza Roma are on average above US\$35/square meter/month, and the rentals charged in the Plaza Roma area have reached approximately US\$40/square meter/month.

The Hotel market, and particularly the five-star hotel sector, has been favored over the past five years by the increase in the number of tourists with high purchasing power and by a nominal exchange rate that has favored industry competitiveness.

Broadly speaking, the Company's segments continue to show a robust position within the current macroeconomic juncture. Although there has been a change in outlook given the healthy cash flows that the Company has been showing and the long-term financing basis attained in previous fiscal years, we are capable of sustaining our leading market position.

Comment on operations during the quarter ended September 30, 2008

Our revenues rose by 11.7%, from Ps.195.6 million as of September 30, 2007 to Ps.218.4 million as of September 30, 2008. The share of the Company's various segments in net revenues was as follows: sales and developments increased 85.4% to Ps.2.3 million, offices and other rental properties increased 42.6% to Ps.29.5 million, shopping centers increased 18.7% to Ps.95.1 million, hotels increased 19.7% to Ps.42.2 million, consumer finance decreased 15.9% to Ps.48.8 million, and financial operations and others recorded revenues of Ps.0.5 million.

Our operating income decreased to a loss of Ps.0.9 million as of September 30, 2008 compared to an income of Ps.55.2 million as of September 30, 2007, mainly due to the operating losses recorded in the consumer finance segment. Excluding the effect of this segment, the operating income of the other segments increased 54.1% from Ps.47.2 million to Ps.72.8 million.

Net income for the three months ended September 30, 2008 decreased by Ps.40.2 million, totaling a loss of Ps.70.3 million compared to a loss of Ps.30.0 million posted during the same period of fiscal year 2007.

As regards financial results, they entailed a Ps.61.7 million loss for the three months ended September 30, 2008, compared to a loss of Ps.40.7 million in the same period of fiscal year 2007, largely explained by the fluctuations in the exchange rate applied for valuing the Company's stock of debt as of the closing date.

Finally, the results from related companies showed a loss of Ps.28.6 million during the first quarter of fiscal year 2009 compared to a loss of Ps.19.5 million in the same period of fiscal year 2008, due to losses in our related company Banco Hipotecario S.A. caused mainly by the decrease in the valuation of its portfolio of financial assets resulting from the current financial conditions.

First quarter of fiscal year 2009 highlights, including significant operations occurred after the end of the period

I. Offices and Other Rental Properties

During the first quarter of fiscal year 2009, income from rental properties totaled Ps.29.5 million, a 42.6% increase compared to the figure of Ps.20.7 million recorded in the same period of fiscal year 2008.

We have grown significantly in this segment in recent years, as shown by the noteworthy increase in leaseable area and low vacancy rates, combined with higher rates. The acquisitions made have helped us gain a strong leading position in the Buenos Aires office market, which we intend to maintain and keep developing.

Our offices continue to have full occupancy levels, reaching 99.0% during the first three months of fiscal year 2009 excluding Edificio República, which has been recently added to our portfolio (90.8% including this building), compared to 99.1% for the first three months of the previous fiscal year. The vacancy rate in Edificio República is explained by the fact that it is in the absorption process after having joined our portfolio with an occupancy rate of 30.2% at year end.

Dique IV, Puerto Madero. Our current portfolio of projects includes the addition of 11,000 sqm of leaseable area in Dique IV in Puerto Madero, currently under construction and entailing a total investment of Ps.61.5 million approximately. As of October 30, work in progress is 75% and completion is scheduled for the beginning of calendar year 2009.

Lipstick Building, New York. On July 2, 2008, we acquired a 30% ownership interest in a company organized in the State of Delaware, USA, Metropolitan 885 Third Avenue LLC. Its main asset is an office building in the City of New York, situated at Third Avenue between Fifty-third and Fifty-fourth Streets in Manhattan. This transaction entailed a disbursement of US\$22.6 million. This building, highly distinguishable from the others in its vicinity, is a so-called Trophy Building, recognized with the 1987 and 1990 editions of the prize awarded by the Building

Managers Association (BOMA). Its leasable area is 59,000 square meters distributed in 34 stories and 2 commercial underground levels. Given its one-of-a kind features, it is a landmark icon of architectural design in the midst of Midtown Manhattan, with an approximate height of 143 meters. It was built in 1986 based on a design by renowned US architects Philip Johnson and John Burgee.

II. Alto Palermo S.A (APSA): Shopping Centers and Consumer Finance

The following information relates to data extracted from the balance sheet of our subsidiary Alto Palermo S.A. (APSA), the company that operates our shopping center business, in which we had a 63.3% interest as of September 30, 2008.

For the three month period the Company's net result was a loss of Ps. 23.0 million, compared to an income of Ps. 21.1 million recorded in the same period of the previous year. This result is explained by a Ps. 22.6 million income in the Shopping Center segment and a Ps. 45.6 million loss in the Consumer Finance Segment, as explained below under Consumer Finance Segment.

Total revenues as of September 30, 2008, amounted to Ps. 143.9 million, i.e., 4.2% higher than the total revenues recorded in the same period of the previous year. As concerns net revenues, the Shopping Center segment posted an increase of 18.7% in net revenues, whereas the Consumer Finance segment recorded a 15.9% decrease.

Gross profit for the period showed a 13.9% decrease, from Ps. 85.5 million to an income of Ps. 73.6 million for the period ended September 30, 2008 compared to the same period of 2007. This result is explained by a 26.6% increase in the gross profit of the Shopping Center segment, along with a 88.5% reduction in the gross profit of the Consumer Finance segment.

The consolidated operating result for the period registered a loss of Ps. 20.9 million compared to Ps. 47.2 million registered in the same period of the previous year, resulting from the negative result reflected in the Consumer Finance segment, as described above. EBITDA¹ for the three month period totaled Ps. 0.1 million representing a 99.8% decrease compared to the EBITDA for the same period of the previous year. The Shopping Center segment has posted a 27.4% increase in terms of EBITDA.

Our tenants' sales have continued to grow, reaching Ps. 1,026.4 million in the three-month period ended September 30, 2008, 20.3% higher in nominal terms than those recorded in the same period of the previous year.

In addition, the business success of our tenants continues to increase demand for space at our shopping centers. In this way, we have maintained an occupancy rate of 98.7%. Although this percentage is lower than the one recorded as of June 30, 2008, the variation reflects a series of reforms under way in Córdoba Shopping, Villa Cabrera.

Coto Residential Project. In July 2008, a conditional barter agreement was executed whereby APSA would transfer to CYRSA 112 parking lots and the rights to build two buildings in this parcel owned by APSA. With a surface area of approximately 24,000 square meters, this parcel is located on top of the Coto Hypermarket, close to our Abasto Shopping Center. As consideration, Cyrsa would deliver to APSA an amount to be determined in the future of the units comprising the building that would be constructed equivalent to 25% of the square meters. The total amount of the transaction between Cyrsa and APSA amounts to US\$ 5.9 million.

Panamerican Mall Project, City of Buenos Aires. In December 2006 we entered into several agreements for the construction, marketing and management of a new shopping center to be developed in the neighborhood of Saavedra, City of Buenos Aires, by Panamerican Mall S.A. The project includes the construction of a shopping center, a hypermarket, a cinema complex and an office building and/or a residential building. This is one of the Company's most important projects. In March 2007 we started to build the shopping center, which we expect to open during the first half of 2009. At the closing of the quarter, the degree of progress of the works was 46%.

Consumer Finance Subsidiary Tarshop S.A.

As a result of the current international financial scenario, a high volatility has been observed in interest rates and systemic delinquency has increased, affecting the performance and financing of the consumer finance business. The higher delinquency levels have led to an increase in the subordination of financial trusts which, added to the changes in their tax treatment, the higher interest rates resulting from higher risk and a slight deceleration in private consumption, have resulted in the need to review the general economic and the business specific prospects.

To face the growing volatility in the international financial scenario and to provide Tarshop S.A. with a suitable capital base taking into account the current market conditions, in September 2008 APSA decided to take part in Tarshop S.A.'s capital increase for up to Ps. 60 million, and increased its equity stake in Tarshop S.A. from 80% to 93.4%.

IRSA Inversiones y Representaciones Sociedad Anónima

To supplement the financial support given, several actions were taken since then through the direct counseling provided to Tarshop S.A. by APSA's management. These actions are aimed at improving Tarshop S.A.'s performance, and include a revision in the point of sale structure involving a 17% headcount reduction, 13 less points of sale and a cut on leased centralized areas by 10% of the total. This rationalization of resources has included areas such as consulting.

In line with the commercial actions, various other measures have been implemented, including:

- (i) Redesign of the distribution channel structure.
- (ii) Changes in cash lending plans and merchant financing.

- (iii) Renegotiation of conditions with merchants.

After September 30, 2008, in the light of the general changing scenario and in compliance with the strategic plan devised and implemented by APSA, loans for an aggregate amount of Ps. 66 million were extended to Tarshop S.A. to improve its financial position, given the conditions faced by the financial trust segment in which part of its business is involved. At present, APSA is evaluating the suitability of capitalizing these loans.

In addition, the recent changes introduced in the tax treatment of financial trusts and other reforms made by the National Executive Branch result in the need to continuously monitor Tarshop S.A. and fine-tune its positioning strategy to adapt to the changing conditions.

As a result of all the factors mentioned, net revenues showed a 15.9% reduction, from Ps. 57.9 million during the three-month period ended September 30, 2007, to Ps. 48.8 million in the same period of this fiscal year. Gross profit stood at Ps. 3.5 million, and operating income was Ps. (75.0) million, a reduction from the Ps. 7.1 million recorded in the same period of the previous fiscal year.

In this way, our consumer finance segment posted a negative result of Ps. 45.7 million, down from an income of Ps. 4.8 million recorded in the same period of the previous fiscal year.

The credit portfolio including securitized coupons as of September 30, 2008 amounted to Ps. 848.7 million, 1% lower than the Ps. 861.5 million portfolio as of June 30, 2008.

In addition, as regards collections, 90-day delinquency as of September 30, 2008 was 6.2%, an improvement of 0.4% compared to the period ended on June 30, 2008.

III. Sales and Developments

In the three months ended on September 30, 2008, the sales and developments segment recorded revenues for Ps. 2.3 million, compared to Ps. 1.2 million for the same period of the previous fiscal year. The following paragraphs describe the Company's major developments:

Caballito. On May 4, 2006 we entered into a US\$ 7.5 million swap agreement with Koad S.A. (Koad) whereby we transferred title of block 36 of the property Terrenos de Caballito to Koad in order for it to develop at its sole expense, cost and risk, a complex known as Caballito Nuevo. The construction works have already started, and include two apartment towers of 34 floors each, with 1, 2 and 3 room units of 40 to 85 sqm. surface area, including a

IRSA Inversiones y Representaciones Sociedad Anónima

wide variety of amenities and services. In consideration for it, Koad paid to us US\$ 0.05 million while the US\$ 7.45 million balance will be repaid through the delivery of 118 apartment units and 55 parking spaces. The final number of units to be received will depend on the date of actual delivery by Koad, as the agreement provides for rewards based on terms of delivery. At present, the degree of progress is 70% and marketing is expected to be launched in the coming quarters.

Solares de Santa Maria, Ciudad de Buenos Aires, (formerly Santa María del Plata). Solares de Santa María is a 70-hectare property facing the River Plate, located in the south border of Puerto Madero (10 minutes away from the Presidential Palace) where we plan to start developing an urban project through our subsidiary Solares de Santa María S.A., in which we hold a 90% equity interest. The project has been designed with a residential profile and also features mixed uses, including offices, retail stores, hotels, sports and sailing clubs and service support areas such as a school, supermarket, parking areas, etc., and has been conceived as a new neighborhood in the City of Buenos Aires.

Since its purchase in 1997, we followed the application process for obtaining validation and approval of the project before the governmental authorities of the City of Buenos Aires. So as to optimize and achieve project start-up, while such consents and authorizations are obtained the Company has made contacts with investors with international experience in this kind of real estate developments.

In November 2007, the Executive Branch of the Government of the City of Buenos Aires approved the project through Decree 1584/2007. The approval was made in compliance with the standards of the urban design previously approved by the Urban Planning Council of the Executive Branch, and was passed upon by all competent authorities. The assignment of places for public use and convenience is the maximum one provided for in the Planning Code: 50% of the site will be donated for public use and convenience (357,975 sqm) in which common recreational green and sailing areas, recreation, roads, pedestrian lanes, etc. will be constructed. However, several operational and implementation issues remain to be approved by different areas of the authorities in charge of the urban affairs of the City of Buenos Aires.

This notwithstanding, the Decree has been challenged in court in its formal and procedural aspects, but the authorities have not rendered a decision in connection with this challenge yet.

As of October 30, 2008, our internal team completed the Urban Development draft project for Solares de Santa María. Feasibility studies have been filed with the service companies and we have held multiple informative meetings with several governmental agencies aimed at defining the development of the draft project.

Organization of IRSA-CYRELA and launch of the Horizons residential project. In the first quarter of fiscal 2008, we created together with CYRELA, a renowned Brazilian developer, an undertaking that operates under the name IRSA-CYRELA (CYRSA) to develop top-level construction residential units in Argentina that applies innovating sales and financing policies and is based on a new concept in residential units in line with the most modern trends in the world.

IRSA-CYRELA's first project, which has been developed in a plot made up by two adjacent blocks in the Vicente López neighborhood was launched in March under the name Horizons. It is one of the most significant developments in Greater Buenos Aires and it will entail a new concept in residential complexes given its emphasis on the use of common spaces. This project includes two complexes with a total of six buildings; a complex facing the river with three 14-floor buildings and another complex on Avenida del Libertador with three 17-floor buildings,

IRSA Inversiones y Representaciones Sociedad Anónima

totaling 59,000 sqm of construction distributed in 467 units. The showroom was opened to the public in March 2008 quite successfully as the units have all been reserved. As of September 30, 2008, preliminary sales agreements had been executed for 98% of the own units subject to sale and results will be reflected as progress is made in the execution of the works, consolidated at 50%. The units will be finalized and delivered at the beginning of the year 2011. As of September 30 of this year excavation works at the Rio block are in full progress and excavation works at the Parque block will start soon.

At present, we are also evaluating the execution times of other projects jointly with CYRELA (see Terreno Caballito, CYRSA and Coto Residential Project in paragraph II, APSA).

Terreno Caballito, CYRSA. As of the closing of fiscal year 2008, we and CYRSA executed a barter deed pursuant to which we transferred to CYRSA under a swap agreement the property described below, which has a total surface area of 9,784 square meters: plot of land, designated as Parcel ONE L, in block 35, facing Méndez de Andes street between Rojas and Colpayo streets in the Caballito neighborhood.

In turn, CYRSA agreed to carry out in the property a real estate development for residential use, which shall comprise a first stage of two towers and a third building to be developed in a second stage at the option of CYRSA. In exchange for the transfer of the property, CYRSA paid to IRSA US\$ 0.12 million and agreed to make a non-cash consideration consisting in transferring under barter to IRSA certain home units in the buildings to be built which will represent 25% of the meters. Furthermore, as security for the performance of its obligations, CYRSA has created a security interest over the property by mortgaging it in favor of IRSA in the amount of US\$ 12.6 million.

On July 31, 2008, the deed of conveyance of title to the land was executed.

The following is a detail of the properties being developed by IRSA as of September 30, 2008.

IV. Hotels

Income from the hotel segment rose by 19.7%, up from Ps.35.3 million for the first three months of fiscal 2008 to Ps.42.2 million for the same period in fiscal 2009.

This was mainly due to the increase in the average rate, which in the first three months of fiscal 2009 performed quite favorably with an average per room of Ps. 610 compared to Ps.537 for the previous period. In addition, occupancy levels remain high and reached 73.1% in the first quarter of fiscal year 2009, compared to 73.6% in the same period of the previous fiscal year.

The following table shows information regarding our hotels for the three-month period ended September 30, 2008.

VI. Brief comment on prospects for the next quarter

In the next quarter the likelihood of a more adverse world economic scenario could likely impact on the activity levels of the Argentine economy, and hence on our business lines. However, our business lines' cash flow generation and long-term debt maturity profile leads us to think that the Company is well positioned from a financial standpoint to face the new economic environment.

As concerns our Shopping Center segment we plan to continue offering an attractive and broad variety of commercial proposals for our customers, aimed at maintaining our Company's leading position in the industry that we have achieved during the last years. As part of our ongoing efforts to optimize our mix of activities offered, promotions and entertainment we will continue the process of renovation of our existing Shopping Centers, which will be added to the already completed refurbishment works in Shopping Alto Palermo, Paseo Alcorta and Alto Avellaneda. As concerns new developments we will make further progress in the construction works of the Panamericana and Av. General Paz project with the aim of completing it and turning it operational during the first half of calendar 2009.

Regarding Consumer Finance, we will continue to take actions on those areas that call for an improvement in this segment's operating and financing performance in light of the new market scenario.

As concerns the office sector in Buenos Aires, we have recently noted certain caution among potential lessees regarding decisions to lease larger areas. However, this circumstance has still not been reflected in the prices or vacancy rates. According to Richard Ellis, rental prices of AAA class offices in the San Martín, Catalinas and Plaza Roma areas are on average above US\$35/sqm/month, whereas certain properties in the Plaza Roma area have reached approximately US\$40/sqm/month. Vacancy sensitivity to fluctuations in activity levels has been conditioned by the implied transaction costs incurred by Premium lessees in the execution or termination of lease agreements. This factor, combined with the strength that this segment still shows in our balance sheet and the fact that the average price of our portfolio is way below the average market price, leads us to think that revenues from this segment would not be compromised in the short term. We will continue the process of absorption of the meters added as a result of the purchase of Edificio República and completion of the building of 11,000 sqm gross leasable area in Dique IV in Puerto Madero, which we expect to conclude in the first months of calendar 2009.

Regarding the Sales and Development segment, we plan to make further progress in the execution of the first project launched through the IRSA-CYRELA vehicle, in which sales have been booked for almost 100% of the units. As concerns our other future ventures, during the current quarter we will continue to work in all the preliminary activities aimed at launching these projects.
