

ISHARES COMEX GOLD TRUST

Form 424B3

July 02, 2010

Table of Contents

Filed pursuant to Rule 424 (b)(3)

Registration Statement No. 333-165057

520,250,000 iShares[®]

iShares[®] COMEX[®] Gold Trust

The iShares[®] COMEX[®] Gold Trust issues shares representing fractional undivided beneficial interests in its net assets. The assets of the trust consist primarily of gold held by custodians on behalf of the trust. The objective of the trust is for the shares of the trust, called "iShares[®]", to reflect the price of gold less the trust's expenses and liabilities. The iShares are listed and trade on NYSE Arca under the symbol "IAU". Market prices for the iShares may be different from the net asset value per iShare. BlackRock Asset Management International Inc. is the sponsor of the trust; The Bank of New York Mellon is the trustee of the trust, and The Bank of Nova Scotia and JPMorgan Chase Bank, N.A., London branch, are the custodians of the trust. The trust is not an investment company registered under the Investment Company Act of 1940. The trust is not a commodity pool for purposes of the Commodity Exchange Act, and its sponsor is not subject to regulation by the Commodity Futures Trading Commission as a commodity pool operator, or a commodity trading advisor.

The trust intends to issue iShares on a continuous basis. The trust issues and redeems iShares only in blocks of 50,000 and integral multiples thereof. A block of 50,000 iShares is called a "Basket". These transactions take place in exchange for gold. Only registered broker-dealers that become authorized participants by entering into a contract with the sponsor and the trustee may purchase or redeem Baskets. iShares will be offered to the public from time to time at prices that will reflect the price of gold and the trading price of the iShares on NYSE Arca at the time of the offer.

On July 2, 2010, the iShares closed on NYSE Arca at \$11.85 and the settlement price announced by COMEX for the spot month gold futures contract was \$1,207.40 (on any day, the spot month gold futures contract is the COMEX-traded gold futures contract closest to maturity).

Except when aggregated in Baskets, iShares are not redeemable securities.

Investing in the iShares involves significant risks. See Risk Factors starting on page 7.

Neither the Securities and Exchange Commission (SEC) nor any state securities commission has approved or disapproved of the securities offered in this prospectus, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The iShares are not interests in nor obligations of either the sponsor or the trustee. The iShares are not insured by the Federal Deposit Insurance Corporation or any other governmental agency. The iShares[®] COMEX[®] Gold Trust is not sponsored, endorsed, sold or promoted by Commodity Exchange, Inc., nor does Commodity Exchange, Inc., make any representation regarding the advisability of investing in the trust.

iShares is a registered trademark of BlackRock Institutional Trust Company, N.A.

COMEX is a registered service mark of Commodity Exchange, Inc.

The date of this prospectus is July 2, 2010.

STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus includes statements which relate to future events or future performance. In some cases, you can identify such forward-looking statements by terminology such as may, should, expect, plan, anticipate, believe, estimate, predict, potential or the negative of the other comparable terminology. All statements (other than statements of historical fact) included in this prospectus that address activities, events or developments that may occur in the future, including such matters as changes in commodity prices and market conditions (for gold and the iShares), the trust's operations, the sponsor's plans and references to the trust's future success and other similar matters are forward-looking statements. These statements are only predictions. Actual events or results may differ materially. These statements are based upon certain assumptions and analyses made by the sponsor on the basis of its perception of historical trends, current conditions and expected future developments, as well as other factors it believes are appropriate in the circumstances. Whether or not actual results and developments will conform to the sponsor's expectations and predictions, however, is subject to a number of risks and uncertainties, including the special considerations discussed in this prospectus, general economic, market and business conditions, changes in laws or regulations, including those concerning taxes, made by governmental authorities or regulatory bodies, and other world economic and political developments. See Risk Factors. Consequently, all the forward-looking statements made in this prospectus are qualified by these cautionary statements, and there can be no assurance that the actual results or developments the sponsor anticipates will be realized or, even if substantially realized, that they will result in the expected consequences to, or have the expected effects on, the trust's operations or the value of the iShares. Moreover, neither the sponsor, nor any other person assumes responsibility for the accuracy or completeness of the forward-looking statements. Neither the trust nor the sponsor is under a duty to update any of the forward-looking statements to conform such statements to actual results or to a change in the sponsor's expectations or predictions.

GLOSSARY

In this prospectus, each of the following terms has the meaning set forth below:

Authorized Participant A person who, at the time of submitting to the trustee an order to create or redeem one or more Baskets (1) is a registered broker-dealer, (2) is a DTC Participant or an Indirect Participant, and (3) has in effect a valid Authorized Participant Agreement.

Authorized Participant Agreement An agreement entered into by each Authorized Participant, the sponsor and the trustee which provides the procedures for the creation and redemption of Baskets.

Basket A block of 50,000 iShares or such number of iShares as the trustee, in consultation with the sponsor, may from time to time determine.

Basket Gold Amount The amount of gold (measured in Fine Ounces), determined on each Business Day by the trustee, which Authorized Participants must transfer to the trust in exchange for a Basket, or will receive in exchange for each Basket surrendered for redemption.

Business Day Any day other than (i) a Saturday or a Sunday, or (ii) a day on which NYSE Arca is closed for regular trading.

CFTC Commodity Futures Trading Commission, an independent agency with the mandate to regulate commodity futures and option markets in the United States.

Code The United States Internal Revenue Code of 1986, as amended.

COMEX The exchange market on gold futures contracts operated by Commodity Exchange, Inc., a subsidiary of New York Mercantile Exchange, Inc.

Table of Contents

Commodity Exchange Act The United States Commodity Exchange Act of 1936, as amended.

Custodian Each financial institution retained by the Trustee as provided in the Trust Agreement to act as custodian of the trust's gold.

Custody Agreement Each agreement between the trustee and a custodian governing the custody of the trust's gold.

DTC The Depository Trust Company, a limited purpose trust company organized under the New York Banking Law, a banking organization within the meaning of the New York Banking Law, a member of the United States Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934.

DTC Participant An entity which, pursuant to DTC's governing documents, is entitled to deposit securities with DTC in its capacity as a participant.

ERISA The Employee Retirement Income Security Act of 1974, as amended.

Exchange Act The United States Securities Exchange Act of 1934, as amended.

FINRA Financial Industry Regulatory Authority.

FSA The Financial Services Authority, an independent non-governmental body which exercises statutory regulatory power under the FSM Act.

FSM Act The United Kingdom Financial Services and Markets Act 2000.

Fine Ounce An Ounce of 100% pure gold. The number of Fine Ounces in a gold bar may be calculated by multiplying the gross weight in Ounces by the fineness, expressed as a fraction of the fine metal content in parts per 1000.

Indirect Participant An entity which has access to the DTC clearing system by clearing securities through, or maintaining a custodial relationship with, a DTC Participant.

IRA Individual retirement account.

IRS Internal Revenue Service.

iShares Units of fractional undivided beneficial interest in the net assets of the trust which are issued by the trust.

LBMA The London Bullion Market Association, a trade association that acts as the coordinator for activities conducted on behalf of its members and other participants in the London bullion market.

London Good Delivery Bar A bar of gold meeting the London Good Delivery Standards.

London Good Delivery Standards The specifications for weight, dimensions, fineness (or purity), identifying marks and appearance of gold bars as set forth in The Good Delivery Rules for Gold and Silver Bars published by the LBMA.

NAV Net asset value per iShare. See Business of the Trust Valuation of Gold; Computation of Net Asset Value for a description of how the net asset value of the trust and the NAV are calculated.

Table of Contents

Non-U.S. Shareholder A shareholder that is not a U.S. Shareholder.

NYMEX New York Mercantile Exchange, Inc.

NYSE Arca The NYSE Arca Marketplace operated by NYSE Arca Equities, Inc.

OTC The global Over-the-Counter market for the trading of gold which consists of transactions in spot, forwards, and options and other derivatives.

Ounce A troy ounce, equal to 1.0971428 ounces avoirdupois. Avoirdupois is the system of weights used in the U.S. and Great Britain for goods other than precious metals, gems and drugs. In that system, a pound has 16 ounces and an ounce has 16 drams.

Plans Employee benefit plans and certain other plans and arrangements, including individual retirement accounts and annuities, Keogh plans, and certain collective investment funds or insurance company general or separate accounts in which such plans or arrangements are invested, that are subject to ERISA and/or section 4975 of the Code.

SEC The Securities and Exchange Commission.

Securities Act The United States Securities Act of 1933, as amended.

Shareholders Owners of beneficial interests in the iShares.

Sponsor BlackRock Asset Management International Inc., an indirect subsidiary of BlackRock, Inc.

TOCOM The Tokyo Commodity Exchange.

Tonne One metric tonne which is equivalent to 1,000 kilograms or 32,150.7465 troy ounces.

Trust The iShares[®] COMEX[®] Gold Trust, a New York trust formed pursuant to the Trust Agreement.

Trust Agreement The First Amended and Restated Depositary Trust Agreement dated as of February 6, 2007, as amended through the date of this Prospectus, among BlackRock Institutional Trust Company, N.A., the sponsor, The Bank of New York Mellon, the registered and beneficial owners from time to time of iShares and all persons that deposit gold for creation of iShares under which the trust is governed.

Trustee The Bank of New York Mellon, a banking corporation organized under the laws of the State of New York with trust powers.

Unallocated Gold is said to be held in unallocated form at a custodian when the person in whose name gold is so held is entitled to receive delivery of gold in the amount standing to the credit of that person's account, but that person has no ownership interest in any particular gold that the custodian maintaining the account owns or holds. In contrast, gold is held in allocated form when specific bars of gold held by the custodian are identified as the property of the person holding the allocated account.

U.S. Shareholder A Shareholder that is (1) an individual who is treated as a citizen or resident of the United States for United States federal income tax purposes; (2) a corporation or partnership created or organized in or under the laws of the United States or any political subdivision thereof; (3) an estate, the income of which is includible in gross income for United States federal income tax purposes regardless of its source; or (4) a trust, if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more United States persons have the authority to control all substantial decisions of the trust, or a trust that has made a valid election under applicable Treasury Regulations to be treated as a domestic trust.

Table of Contents

PROSPECTUS SUMMARY

Although the sponsor believes that this summary is materially complete, you should read the entire prospectus, including Risk Factors beginning on page 7, before making an investment decision about the iShares.

Trust Structure, the Sponsor, the Trustee and the Custodians

The trust was formed on January 21, 2005 when an initial deposit of gold was made in exchange for the issuance of three Baskets. The purpose of the trust is to own gold transferred to the trust in exchange for shares issued by the trust (iShares). Each iShare represents a fractional undivided beneficial interest in the net assets of the trust. The assets of the trust consist primarily of gold held by custodians on behalf of the trust. However, there may be situations where the trust will unexpectedly hold cash. For example, a claim may arise against a third party, which is settled in cash. In situations where the trust unexpectedly receives cash or other assets, no new iShares will be issued until after the record date for the distribution of such cash or other property has passed.

The sponsor of the trust is BlackRock Asset Management International Inc., a Delaware corporation and a subsidiary of BlackRock, Inc. ***The iShares are not obligations of, and are not guaranteed by, BlackRock Asset Management International Inc., or any of its subsidiaries or affiliates.***

The trust is governed by the provisions of the First Amended and Restated Depositary Trust Agreement as amended from time to time, (the Trust Agreement) executed on February 6, 2007 by the sponsor, its predecessor and the trustee.

The trust issues iShares only in Baskets of 50,000 or integral multiples thereof. Baskets of iShares may be redeemed by the trust in exchange for the amount of gold corresponding to their redemption value. Individual iShares will not be redeemed by the trust, but are listed and trade on NYSE Arca under the symbol IAU . The objective of the trust is for the value of the iShares to reflect, at any given time, the price of gold owned by the trust at that time, less the trust s expenses and liabilities. The material terms of the trust are discussed in greater detail under the section Description of the iShares and the Trust Agreement . The trust is not a registered investment company under the Investment Company Act of 1940 and is not required to register under such act.

The sponsor has agreed to assume the following administrative and marketing expenses incurred by the trust: the trustee s fee, the custodians fees, NYSE Arca listing fees, SEC registration fees, printing and mailing costs, audit fees and expenses and up to \$100,000 per annum in legal fees and expenses.

The sponsor does not exercise day-to-day oversight over the trustee or the custodians. The sponsor may remove the trustee and appoint a successor trustee if the trustee ceases to meet certain objective requirements (including the requirement that it have capital, surplus and undivided profits of at least \$150 million) or if, having received written notice of a material breach of its obligations under the Trust Agreement, the trustee has not cured the breach within thirty days. The sponsor also has the right to replace the trustee during the ninety days following any merger, consolidation or conversion in which the trustee is not the surviving entity or, in its discretion, on the fifth anniversary of the creation of the trust or on any subsequent third anniversary thereafter. The sponsor also has the right to approve any new or additional custodian that the trustee may wish to appoint.

The trustee is The Bank of New York Mellon and The Bank of Nova Scotia and JPMorgan Chase Bank, N.A., London branch, are the custodians.

Table of Contents

The trustee is responsible for the day-to-day administration of the trust. The responsibilities of the trustee include (1) processing orders for the creation and redemption of Baskets; (2) coordinating with the custodians the receipt and delivery of gold transferred to, or by, the trust in connection with each issuance and redemption of Baskets; (3) calculating the net asset value and the adjusted net asset value of the trust on each business day; and (4) selling the trust's gold as needed to cover the trust's expenses. For a more detailed description of the role and responsibilities of the trustee see "Description of the iShares and the Trust Agreement" and "The Trustee."

The custodians are responsible for safekeeping the gold owned by the trust. Each custodian is appointed by the trustee and is responsible to the trustee only. The general role and responsibilities of the custodians are further described in "The Custodians." A custodian has no obligation to accept any additional delivery on behalf of the trust if, after giving effect to such delivery, the total value of the trust's gold held by such custodian exceeds the amount specified in such custodian's custody agreement. If the total limit available to the trustee under existing custody agreements is exceeded, it is anticipated that the trustee, with the consent of the sponsor, will retain an additional custodian. If an additional custodian becomes necessary, the trustee will seek to hire the additional custodian under terms and conditions substantially similar to those in the custody agreements at the time in effect. However, it may not be possible for the trustee to locate at that time an additional custodian that agrees to exactly the same terms of the agreements at the time in effect. As a result, the new agreement may differ from the current ones with respect to issues like duration, fees, maximum amount of gold that the additional custodian will hold on behalf of the trust, scope of the additional custodian's liability and the additional custodian's standard of care.

Trust Objective

The objective of the trust is for the value of the iShares to reflect, at any given time, the price of gold owned by the trust at that time, less the trust's expenses and liabilities. The trust is not actively managed. It does not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the price of gold. The trust receives gold deposited with it in exchange for the creation of Baskets of iShares, sells gold as necessary to cover the trust expenses and other liabilities and delivers gold in exchange for Baskets of iShares surrendered to it for redemption.

The iShares are intended to constitute a simple and cost-effective means of making an investment similar to an investment in gold. Although the iShares are not the exact equivalent of an investment in gold, they provide investors with an alternative that allows a level of participation in the gold market through the securities market. An investment in iShares is:

Backed by gold held by custodians on behalf of the trust.

The iShares are backed by gold, identified on the custodians' books as the property of the trust and held by the custodians in the vicinity of New York, Toronto, Montreal, London and other locations that may be authorized in the future.

As accessible and easy to handle as any other investment in shares.

Retail investors may purchase and sell iShares through traditional brokerage accounts at prices expected to be less than the amount required for currently existing means of investing in physical gold. iShares are eligible for margin accounts.

Listed.

The iShares are listed and trade on NYSE Arca under the symbol "IAU".

Table of Contents

Relatively cost efficient.

Because the expenses involved in an investment in physical gold are dispersed among all holders of iShares, an investment in iShares may represent a cost-efficient alternative to investments in gold for investors not otherwise in a position to participate directly in the market for physical gold. See *Business of the Trust* *Trust Objective* .

Principal Offices

The sponsor's office is located at 400 Howard Street, San Francisco, CA 94105. The trustee has a trust office at 101 Barclay Street, Floor 6E, New York, New York 10286. The Bank of Nova Scotia is located at One Liberty Plaza, New York, New York, 10006. JPMorgan Chase Bank, N.A., London branch, is located at 125 London Wall, London, England.

THE OFFERING

Offering	The iShares represent units of fractional undivided beneficial interest in the net assets of the trust.
Use of proceeds	Proceeds received by the trust from the issuance and sale of Baskets consist of gold deposits. Such deposits are held by the custodians on behalf of the trust until (i) distributed to Authorized Participants in connection with a redemption of Baskets or (ii) sold to pay the fee due to the sponsor and trust expenses or liabilities not assumed by the sponsor.
NYSE Arca symbol	IAU
CUSIP	464285105
Creation and redemption	The trust issues and redeems Baskets of iShares on a continuous basis (a Basket equals 50,000 iShares). Baskets of iShares are only issued or redeemed in exchange for an amount of gold determined by the trustee on each day that NYSE Arca is open for regular trading. No iShares are issued unless one of the custodians has allocated to the trust's account with such custodian (except for an unallocated amount of gold not in excess of 430 ounces), the corresponding amount of gold. Initially, a Basket required delivery of 5,000 fine ounces of gold. The amount of gold necessary for the creation of a Basket, or to be received upon redemption of a Basket, will decrease over the life of the trust, due to the payment or accrual of fees and other expenses or liabilities payable by the trust. On June 24, 2010 after giving effect to the ten for one share split that occurred on that date, creation of a Basket required delivery of 489.368 fine ounces of gold. Baskets may be created or redeemed only by Authorized Participants, who pay the trustee a transaction fee for each order to create or redeem Baskets. See <i>Description of the iShares and the Trust Agreement</i> for more details.

Table of Contents

Net Asset Value	<p>The net asset value of the trust is obtained by subtracting the trust's expenses and liabilities on any day from the value of the gold owned by the trust on that day; the net asset value per iShare, or NAV, is obtained by dividing the net asset value of the trust on a given day by the number of iShares outstanding on that date. On each day on which NYSE Arca is open for regular trading, the trustee determines the NAV as promptly as practicable after 4:00 p.m. (New York time). The trustee values the trust's gold on the basis of that day's announced COMEX settlement price for the spot month gold futures contract (the futures contract closest to maturity on that day). If there is no COMEX settlement price for spot month gold futures on that day, the trustee is authorized to use the most recently announced COMEX settlement price for spot month gold futures unless the trustee, in consultation with the sponsor, determines that such price is inappropriate as a basis for evaluation. See Business of the Trust Valuation of Gold; Computation of Net Asset Value.</p>
Trust expenses	<p>The trust's only ordinary recurring expense is expected to be the remuneration due to the sponsor (the sponsor's fee). In exchange for the sponsor's fee, the sponsor has agreed to assume the following administrative and marketing expenses of the trust: the trustee's fee, the custodians' fees, NYSE Arca listing fees, SEC registration fees, printing and mailing costs, audit fees and expenses and up to \$100,000 per annum in legal fees and expenses.</p> <p>The sponsor's fee is accrued daily at an annualized rate equal to 0.25% of the adjusted net asset value of the trust and is payable monthly in arrears. The trustee sells gold from time to time in such quantity as is necessary to permit payment of the sponsor's fee and may also sell gold in such quantities as may be necessary to permit the payment of trust expenses and liabilities not assumed by the sponsor. The trustee is authorized to sell gold at such times and in the smallest amounts required to permit such payments as they become due, it being the intention to avoid or minimize the trust's holdings of assets other than gold. Accordingly, the amount of gold to be sold may vary from time to time depending on the level of the trust's expenses and liabilities and the market price of gold. See Business of the Trust Trust Expenses and Description of the iShares and the Trust Agreement Trust Expenses and Gold Sales.</p>
Tax Considerations	<p>Owners of iShares are treated, for U.S. federal income tax purposes, as if they owned a corresponding share of the assets of the trust. They are also viewed as if they directly received a corresponding share of any income of the trust, or as if they had incurred a corresponding share of the expenses of the trust. Consequently, each sale of gold by the trust constitutes a taxable event to Shareholders. See United States Federal Tax Consequences Taxation of U.S. Shareholders and ERISA and Related Considerations.</p>
Voting Rights	<p>Owners of iShares do not have any voting rights. See Description of the iShares and the Trust Agreement Voting Rights.</p>

Table of Contents

Suspension of Issuance, Transfers and Redemptions

The trustee may suspend the delivery or registration of transfers of iShares, or may refuse a particular deposit or transfer at any time, if the trustee or the sponsor think it advisable for any reason. Redemptions may be suspended only (i) during any period in which regular trading on NYSE Arca or COMEX is suspended or restricted, or one or both exchanges are closed, or (ii) during an emergency as a result of which delivery, disposal or evaluation of gold is not reasonably practicable. See Description of the iShares and the Trust Agreement Requirements for Trustee Actions.

Limitation on Liability

The sponsor and the trustee:

are only obligated to take the actions specifically set forth in the Trust Agreement without negligence or bad faith;

are not liable for the exercise of discretion permitted under the Trust Agreement; and

have no obligation to prosecute any lawsuit or other proceeding on behalf of the Shareholders or any other person.

See Description of the iShares and the Trust Agreement Limitations on Obligations and Liability.

Termination events

The trustee will terminate the Trust Agreement if:

the trustee is notified that the iShares are delisted from NYSE Arca and are not approved for listing on another national securities exchange within five business days of their delisting;

holders of at least 75% of the outstanding iShares notify the trustee that they elect to terminate the trust;

60 days have elapsed since the trustee notified the sponsor of the trustee's election to resign and a successor trustee has not been appointed and accepted its appointment;

the SEC determines that the trust is an investment company under the Investment Company Act of 1940, as amended, and the trustee has actual knowledge of that determination;

the aggregate market capitalization of the trust, based on the closing price for the iShares, was less than \$350 million for five consecutive trading days and the trustee receives, within six months from the last of those trading days, notice that the sponsor has decided to terminate the trust;

the CFTC determines that the trust is a commodity pool under the Commodity Exchange Act and the trustee has actual knowledge of that determination; or

the trust fails to qualify for treatment, or ceases to be treated, as a grantor trust for United States federal income tax purposes and the trustee receives notice that the sponsor has determined that the termination of the trust is advisable.

Table of Contents

If not terminated earlier by the trustee, the trust will terminate on January 19, 2045. See

Description of the iShares and the Trust Agreement Amendment and Termination. After termination of the trust, the trustee will deliver trust property upon surrender and cancellation of iShares and, ninety days after termination, may sell any remaining trust property in a private or public sale, and hold the proceeds, uninvested and in a non-interest bearing account, for the benefit of the holders who have not surrendered their iShares for cancellation. See Description of the iShares and the Trust Agreement Amendment and Termination.

Authorized Participants

Baskets may be created or redeemed only by Authorized Participants. Each Authorized Participant must be a registered broker-dealer, a participant in DTC, have entered into an agreement with the trustee (the Authorized Participant Agreement) and be in a position to transfer gold to, and take delivery of gold from, at least one of the custodians through one or more gold accounts. The Authorized Participant Agreement provides the procedures for the creation and redemption of Baskets and for the delivery of gold in connection with such creations or redemptions. A list of the current Authorized Participants can be obtained from the trustee or the sponsor.

Clearance and settlement

The iShares are issued in book-entry form only. Transactions in iShares clear through the facilities of DTC. Investors may hold their iShares through DTC, if they are participants in DTC, or indirectly through entities that are participants in DTC.

SUMMARY FINANCIAL CONDITION

As of the close of business on June 23, 2010, the net asset value of the trust was \$3,369,957,882 and the NAV was \$12.08, after giving effect to the ten-for-one share split effective June 24, 2010.

Selected financial data after giving effect to the ten-for-one share split effective on June 24, 2010:

	December 31, 2009	December 31, 2008	December 31, 2007	December 31, 2006	December 31, 2005*

Net cash flows	\$	\$	\$	\$	\$

* For the period from January 21, 2005 (date of inception) to December 31, 2005.

Table of Contents

RISK FACTORS

Before making an investment decision, you should consider carefully the risks described below, as well as the other information included in this prospectus.

Because the iShares are created to reflect the price of the gold held by the trust, the market price of the iShares will be as unpredictable as the price of gold has historically been. This creates the potential for losses, regardless of whether you hold iShares for a short-, mid- or long-term.

iShares are created to reflect, at any given time, the market price of gold owned by the trust at that time less the trust's expenses and liabilities. Because the value of iShares depends on the price of gold, it is subject to fluctuations similar to those affecting gold prices. The price of gold has fluctuated widely over the past several years. If gold markets continue to be characterized by the wide fluctuations that they have shown in the past several years, the price of the iShares will change widely and in an unpredictable manner. This exposes your investment in iShares to potential losses if you need to sell your iShares at a time when the price of gold is lower than it was when you made your investment in iShares. Even if you are able to hold iShares for the mid- or long-term you may never have a profit, because gold markets have historically experienced extended periods of flat or declining prices.

Following an investment in iShares, several factors may have the effect of causing a decline in the prices of gold and a corresponding decline in the price of iShares. Among them:

Large sales by the official sector. A significant portion of the aggregate world gold holdings is owned by governments, central banks and related institutions. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of the iShares will be adversely affected.

A significant increase in gold hedging activity by gold producers. Should there be an increase in the level of hedge activity of gold producing companies, it could cause a decline in world gold prices, adversely affecting the price of the iShares.

A significant change in the attitude of speculators and investors towards gold. Should the speculative community take a negative view towards gold, it could cause a decline in world gold prices, negatively impacting the price of the iShares. Conversely, several factors may trigger a temporary increase in the price of gold prior to your investment in the iShares. If that is the case, you will be buying iShares at prices affected by the temporarily high prices of gold, and you may incur losses when the causes for the temporary increase disappear.

The amount of gold represented by the iShares will continue to decrease over the life of the trust due to the sales necessary to pay the sponsor's fee and trust expenses. Without increases in the price of gold sufficient to compensate for that decrease, the price of the iShares will also decline and you will lose money on your investment in iShares.

Although the sponsor has agreed to assume all organizational and certain ordinary administrative and marketing expenses incurred by the trust, not all trust expenses have been assumed by the sponsor. For example, any taxes and other governmental charges that may be imposed on the trust's property will not be paid by the sponsor. As part of its agreement to assume some of the trust's ordinary administrative expenses, the sponsor has agreed to pay legal fees and expenses of the trust not in excess of \$100,000 per annum. Any legal fees and expenses in excess of that amount will be the responsibility of the trust.

Because the trust does not have any income, it needs to sell gold to cover the sponsor's fee and expenses not assumed by the sponsor. The trust may also be subject to other liabilities (for example, as a result of litigation) which have also not been assumed by the sponsor. The only source of funds to cover

Table of Contents

those liabilities will be sales of gold held by the trust. Even if there are no expenses other than those assumed by the sponsor, and there are no other liabilities of the trust, the trustee will still need to sell gold to pay the sponsor's fee. The result of these periodic sales is that the amount of gold represented by each iShare will decrease. New deposits of gold, received in exchange for new iShares issued by the trust, do not reverse this trend.

A decrease in the amount of gold represented by each iShare results in a decrease in its price even if the price of gold has not changed. To retain the iShare's original price, the price of gold has to increase. Without that increase, the lower amount of gold represented by the iShare will have a correspondingly lower price. If these increases do not occur, or are not sufficient to counter the lower amount of gold represented by each iShare, you will sustain losses on your investment in iShares.

An increase in the trust expenses not assumed by the sponsor, or the existence of unexpected liabilities affecting the trust, will force the trustee to sell larger amounts of gold, and will result in a more rapid decrease of the amount of gold represented by each iShare and a corresponding decrease in its value.

The trust is a passive investment vehicle. This means that the value of your iShares may be adversely affected by trust losses that, if the trust had been actively managed, it might have been possible to avoid.

The trustee does not actively manage the gold held by the trust. This means that the trustee does not sell gold at times when its price is high, or acquire gold at low prices in the expectation of future price increases. It also means that the trustee does not make use of any of the hedging techniques available to professional gold investors to attempt to reduce the risks of losses resulting from price decreases. Any losses sustained by the trust will adversely affect the value of your iShares.

The price received upon the sale of iShares may be less than the value of the gold represented by them.

The result obtained by subtracting the trust's expenses and liabilities on any day from the price of the gold owned by the trust on that day is the net asset value of the trust which, when divided by the number of iShares outstanding on that date, results in the net asset value per iShare, or NAV.

iShares may trade at, above or below their NAV. The NAV of iShares will fluctuate with changes in the market value of the trust's assets. The trading prices of iShares will fluctuate in accordance with changes in their NAVs as well as market supply and demand. The amount of the discount or premium in the trading price relative to the NAV per iShare may be influenced by non-concurrent trading hours between the major gold markets and NYSE Arca. While the iShares will trade on NYSE Arca until 4:00 p.m. New York time, liquidity in the market for gold will be reduced after the close of the major world gold markets, including London, Zurich and COMEX. As a result, during this time, trading spreads, and the resulting premium or discount on iShares, may widen.

The liquidation of the trust may occur at a time when the disposition of the trust's gold will result in losses to investors in iShares.

The trust will have limited duration. If certain events occur, at any time, the trustee will have to terminate the trust. Otherwise, the trust will terminate automatically after forty years. See "Description of the iShares and the Trust Agreement Amendment and Termination" for more information about the termination of the trust, including when events outside the control of the sponsor, the trustee or the Shareholders may prompt the trust's termination.

Upon termination of the trust, the trustee will sell gold in the amount necessary to cover all expenses of liquidation, and to pay any outstanding liabilities of the trust. The remaining gold will be distributed

Table of Contents

among investors surrendering iShares. Any gold remaining in the possession of the trustee after 90 days may be sold by the trustee and the proceeds of the sale will be held by the trustee until claimed by any remaining holders of iShares. Sales of gold in connection with the liquidation of the trust at a time of low prices will likely result in losses, or adversely affect your gains, on your investment in iShares.

There may be situations where an Authorized Participant is unable to redeem a Basket of shares. To the extent the value of gold decreases, these delays may result in a decrease in the value of the gold the Authorized Participant will receive when the redemption occurs, as well as a reduction in liquidity for all shareholders in the secondary market.

Although iShares surrendered by Authorized Participants in Basket-size aggregations are redeemable in exchange for the underlying amount of gold, redemptions may be suspended during any period while regular trading on NYSE Arca or COMEX is suspended or restricted, or in which an emergency exists that makes it reasonably impracticable to deliver, dispose of, or evaluate gold. If any of these events occurs at a time when an Authorized Participant intends to redeem iShares, and the price of gold decreases before such Authorized Participant is able again to surrender for redemption Baskets of iShares, such Authorized Participant will sustain a loss with respect to the amount that it would have been able to obtain in exchange for the gold received from the trust upon the redemption of its iShares, had the redemption taken place when such Authorized Participant originally intended it to occur. As a consequence, Authorized Participants may reduce their trading in iShares during periods of suspension, decreasing the number of potential buyers of iShares in the secondary market and, therefore, the price a shareholder may receive upon sale.

The liquidity of the iShares may also be affected by the withdrawal from participation of Authorized Participants.

In the event that one or more Authorized Participants which have substantial interests in iShares withdraw from participation, the liquidity of the iShares will likely decrease which could adversely affect the market price of the iShares and result in your incurring a loss on your investment.

Authorized Participants with large holdings may choose to terminate the trust.

Holders of 75% of the iShares have the power to terminate the trust. This power may be exercised by a relatively small number of holders. If it is so exercised, investors who wished to continue to invest in gold through the vehicle of the trust will have to find another vehicle, and may not be able to find another vehicle that offers the same features as the trust.

The lack of an active trading market for the iShares may result in losses on your investment at the time of disposition of your iShares.

Although iShares are listed for trading on NYSE Arca, you should not assume that an active trading market for the iShares will develop or be maintained. If you need to sell your iShares at a time when no active market for them exists, such lack of an active market will most likely adversely affect the price you receive for your iShares (assuming you are able to sell them).

If the process of creation and redemption of Baskets of iShares encounters any unanticipated difficulties, the possibility for arbitrage transactions intended to keep the price of the iShares closely linked to the price of gold may not exist and, as a result, the price of the iShares may fall.

If the processes of creation and redemption of shares (which depend on timely transfers of gold to and by one of the trust's custodians) encounter any unanticipated difficulties, potential market participants who would otherwise be willing to purchase or redeem Baskets of iShares to take advantage of any arbitrage opportunity arising from discrepancies between the price of the iShares and the price of the underlying

Table of Contents

gold may not take the risk that, as a result of those difficulties, they may not be able to realize the profit they expect. If this is the case, the liquidity of the iShares may decline and the price of the iShares may fluctuate independently of the price of gold and may fall.

As an owner of iShares, you will not have the rights normally associated with ownership of other types of shares.

iShares are not entitled to the same rights as shares issued by a corporation. By acquiring iShares, you are not acquiring the right to elect directors, to receive dividends, to vote on certain matters regarding the issuer of your iShares or to take other actions normally associated with the ownership of shares. You will only have the limited rights described under Description of the iShares and the Trust Agreement .

As an owner of iShares, you will not have the protections normally associated with ownership of shares in an investment company registered under the Investment Company Act of 1940, or the protections afforded by the Commodity Exchange Act of 1936.

The trust is not registered as an investment company for purposes of United States federal securities laws, and is not subject to regulation by the SEC as an investment company. Consequently, the owners of iShares do not have the regulatory protections provided to investors in investment companies. For example, the provisions of the Investment Company Act that limit transactions with affiliates, prohibit the suspension of redemptions (except under certain limited circumstances) or limit sales loads do not apply to the trust.

The trust does not hold or trade in commodity futures contracts regulated by the Commodity Exchange Act (CEA), as administered by the Commodity Futures Trading Commission (CFTC). Furthermore, the Trust is not a commodity pool for purposes of the CEA, and its sponsor is not subject to regulation by the CFTC as a commodity pool operator, or a commodity trading advisor. Consequently, the owner of iShares does not have the regulatory protections provided to investors in CEA-regulated instruments or commodity pools. Consequently, the trustee is not subject to registration as a commodity pool operator and the owners of iShares do not receive the disclosure document and certified annual report required to be delivered by a commodity pool operator.

The value of the iShares will be adversely affected if gold owned by the trust is lost or damaged in circumstances in which the trust is not in a position to recover the corresponding loss.

The responsibility of a custodian for loss or damage to the trust's gold is not unlimited. Each agreement with a custodian contemplates that under certain circumstances the custodian will not be responsible for loss or damage to the trust's gold in the custodian's possession. For example, losses due to nuclear accidents, terrorism, riots, acts of God, insurrections, strikes and similar causes beyond the control of the custodian will be sustained by the trust. Any loss of gold owned by the trust will result in a corresponding loss in the NAV and it is reasonable to expect that such loss will also result in a decrease in the value at which the iShares are traded on NYSE Arca.

Gold transferred to the trust in connection with the creation of Baskets of iShares may not be of the quality required under the Trust Agreement. The trust will sustain a loss if the trustee issues iShares in exchange for gold of inferior quality and that loss will adversely affect the value of all existing iShares.

The procedures agreed to with the custodians contemplate that each custodian must undertake certain tasks in connection with the inspection of gold delivered by Authorized Participants in exchange for Baskets of iShares. The Custodian's inspection includes review of the corresponding bar list to ensure that it accurately describes the weight, fineness, refiner marks and bar numbers appearing on the gold bars, but does not include any chemical or other tests designed to verify that the gold received does, in fact, meet the purity requirements referred to in the Trust Agreement. Accordingly, such inspection procedures may

Table of Contents

not prevent the deposit of gold that fails to meet these purity standards. Each person that deposits gold in the trust is liable to the trust if that gold does not meet the requirements of the Trust Agreement. A custodian will not be responsible or liable to the trust or to any investor in the event any gold otherwise properly inspected by it does not meet the purity requirements contained in the Trust Agreement. To the extent that Baskets of iShares are issued in exchange for gold of inferior quality and the trust is not able to recover damages from the person that deposited that gold, the total value of the assets of the trust will be adversely affected and, with it, the NAV. In these circumstances, it is reasonable to expect that the value at which the iShares trade on NYSE Arca will also be adversely affected.

The value of the iShares will be adversely affected if the trust is required to indemnify the sponsor or a custodian as contemplated in the Trust Agreement and the custody agreements.

Under the Trust Agreement, the sponsor has a right to be indemnified from the trust for any liability or expense it incurs without negligence, bad faith or willful misconduct on its part. Similarly, each custody agreement provides for indemnification of the custodian by the trust under certain circumstances. That means that it may be necessary to sell assets of the trust to cover losses or liability suffered by the sponsor or a custodian. Any sale of that kind would reduce the net asset value of the trust and the value of the iShares.

USE OF PROCEEDS

Proceeds received by the trust from the issuance and sale of Baskets consist of gold deposits. Such deposits are held by custodians on behalf of the trust until (i) distributed to Authorized Participants in connection with redemptions of Baskets or (ii) sold to pay fees due to the sponsor and trust expenses and liabilities not assumed by the sponsor. See *Business of the Trust* *Trust Expenses* .

THE GOLD INDUSTRY

Introduction

This section provides a brief introduction to the gold industry by looking at some of the key participants, detailing the primary sources of demand and supply and outlining the role of the official sector (*i.e.*, central banks) in the market.

Market Participants

The participants in the world gold market may be classified in the following sectors: the mining and producer sector, the banking sector, the official sector, the investment sector; and the manufacturing sector. A brief description of each follows.

Mining and Producer Sector

This group includes mining companies that specialize in gold and silver production; mining companies that produce gold as a by-product of other production (such as a copper or silver producer); scrap merchants and recyclers.

Banking Sector

Bullion banks provide a variety of services to the gold market and its participants, thereby facilitating interactions between other parties. Services provided by the bullion banking community include traditional banking products as well as mine financing, physical gold purchases and sales, hedging and risk management, inventory management for industrial users and consumers, and gold deposit and loan instruments.

Table of Contents*The Official Sector*

The official sector encompasses the activities of the various central banking operations of gold-holding countries. In September 1999 a group of 15 central banks acting to clarify their intentions with respect to their gold holdings signed the Central Bank Gold Agreement commonly called the Washington Accord on Gold. The signatories included the European Central Bank and the central banks of Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, Switzerland, and England. The original agreement limited incremental sales by the 15 signatories to 400 tonnes per annum over the ensuing five-year period. The original Washington Accord on Gold expired in September 2004, and was renewed by almost all of the original signatories for a second five-year period (England did not renew in 2004). The second Washington Accord Agreement expired in September 2009 and was renewed again by all signatories of the second agreement for a third five-year period. In addition, the central banks of Cyprus, Greece, Malta, Slovakia and Slovenia signed the 2009 accord. The current per annum limit on gold sales is 400 tonnes, with total sales not to exceed 2,000 tonnes in the five-year period.

The Investment Sector

This sector includes the investment and trading activities of both professional and private investors and speculators. These participants range from large hedge and mutual funds to day-traders on futures exchanges and retail-level coin collectors.

The Manufacturing Sector

The fabrication and manufacturing sector represents all the commercial and industrial users of gold for whom gold is a daily part of their business. The jewelry industry is a large user of gold. Other industrial users of gold include the electronics and dental industries.

World Gold Supply and Demand (2000-2009)

The following table sets forth a summary of the world gold supply and demand from 2000-2009:

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
<i>(Tonnes)⁽¹⁾</i>										
Supply										
Mine production	2,620	2,646	2,618	2,623	2,494	2,549	2,483	2,473	2,409	2,572
Official sector sales	479	520	547	620	479	663	365	484	232	41
Old gold scrap	620	749	874	986	881	902	1,133	982	1,816	1,674
Implied net disinvestment	299				12					
Total Supply	4,018	3,915	4,038	4,228	3,866	4,115	3,981	3,939	3,957	4,287
Demand										
Fabrication										
Jewelry	3,205	3,009	2,662	2,484	2,616	2,718	2,298	2,417	2,193	1,759
Other	557	474	481	515	555	581	650	672	696	658
Total Fabrication	3,762	3,483	3,143	2,999	3,172	3,299	2,948	3,089	2,889	2,417
Bar hoarding	242	261	264	180	257	264	235	236	386	187

Historical Chart of the Price of Gold

The price of gold is volatile and its fluctuations are expected to have a direct impact on the value of the iShares. However, movements in the price of gold in the past, and any past or present trends, are not a reliable indicator of future movements. Movements may be influenced by various factors, including announcements from central banks regarding a country's reserve gold holdings, agreements among central banks, fluctuations in the value of the U.S. dollar, political uncertainties around the world, and economic concerns.

This section of the prospectus identifies recent movements of the gold price and the historical events surrounding these movements. For the purposes of this discussion, gold prices refers to the settlement price for the COMEX spot month gold futures contract. The COMEX settlement price for the spot month gold futures contract and the New York spot price for physical gold are closely related, as they both pertain to the price of gold for New York delivery in two business days. Any divergence between the two prices creates an arbitrage opportunity and is, therefore, limited. The sponsor estimates that for the period from December 1999 through May 2010, the daily settlement price for the COMEX spot month gold futures contract and the closing spot prices for physical gold reported by Bloomberg have a 0.9818 correlation. During that period, other than in the week of September 11, 2001 (during which the COMEX did not conduct normal trading operations due to the attack on the nearby World Trade Center), the difference between the two prices was equal to or exceeded 1% on a total of forty-seven trading days. The sponsor has no reason to believe that the generally high degree of correlation between the prices will not exist in the future. However, the price relationship over a previous period is not necessarily indicative of relative prices on any particular future date.

The following chart provides a historical background on COMEX Gold Spot Settlement prices for the period December 1999 to May 2010.

Source: COMEX Division of the New York Mercantile Exchange, Inc; Bloomberg.

Table of Contents

The price of gold (in U.S. dollars) declined over the period from 1998 to 1999. The decline in the price of gold during this period was related to a number of factors including, among other things, a strong U.S. dollar (which, historically, has often been negatively correlated with the price of gold), significant forward sales of gold by producers (increasing supply) and selling pressure from speculators betting on falling gold prices.

The trends that, in general, resulted in falling gold prices from 1998 to 1999 began to change in the second half of 1999. On September 23, 1999, gold prices had recovered to \$265.50 per ounce. Furthermore, the announcement of the Central Bank Gold Agreement preceded a sharp rally in the price of gold. Gold prices hit a high of \$324.50 on October 6, 1999. However, despite the Central Bank Gold Agreement, prices gradually began to decrease in the fourth quarter of 1999 and through May 2000 for a variety of possible reasons, notably continued strength in the U.S. dollar and U.S. equity markets and a fall in physical demand upon the turn of the millennium.

The ongoing recovery in the gold price began in 2001. First, declining U.S. interest rates resulted in a fall in the contango (i.e., the premium available on gold for future delivery), which reduced the returns available to producers for forward sales. Second, several mining companies reduced or eliminated their hedging activities in 2001 in response to pressure from shareholders seeking greater leverage to the price of gold, thereby reducing the amount of gold supply entering the market. This led a number of speculators and others who were short gold to close out short positions, further increasing demand. Finally, the terrorist attacks of September 11, 2001 and their political, military, and economic implications led to a sharp rise in the gold price, although gains somewhat moderated by year end.

Between 2002 and 2004 the price of gold in U.S. dollars continued to rise due to a number of factors, including the decline in the U.S. dollar against other currencies, the poor performance of U.S. and other major equities markets, a surge in investment demand in commodities as an asset class generally and gold specifically, the renewal of the Central Bank Gold Agreement in 2004, and continued reduction in forward selling by mining companies. It is important to note that central bank gold sales continued over the period and, indeed, the second Central Bank Gold Agreement increased the potential size of sales by the signatories under the agreement. This increase in the price of gold during this period was the first such gain over a three year period since the early 1990s.

After a rapid rise starting in the second half of 2005 through mid-2006, there was a period of short decline and sideways volatility in the price of gold lasting through the end of that year. Although the peak was over \$700 per ounce in May 2006, the more typical range was between \$550 and \$660 per ounce during that period. Until about August of 2007, prices were below that high, but since have moved up strongly, reaching a new high of \$1,003 on March 18, 2008, and ending at \$884 per ounce on December 31, 2008. Gold prices were quite volatile between the March 2008 high and the end of December 2008 with run-ups and falls of over \$150 in each direction. The gyrating price movements reflect the battles between inflationary and deflationary pressures, US Dollar strengthening against many major currencies and global economic uncertainty going into 2009. Gold prices continued its upward trend in 2009, closing at \$1,040 per ounce on October 30, 2009. Gold saw one of the largest monthly price increases on record in November 2009, jumping 13.6%. After rallying to a record high of \$1,218.25 per ounce in early December 2009, it fell back down to \$1,095.20 per ounce to close the 2009 year. This still resulted in a gain of over 24% for the year. Upward price movement for COMEX Gold Spot Settlement has continued in 2010, with previous record highs per ounce in 2009 being surpassed by a new record high of \$1,242.70 per ounce on May 12, 2010. The increase in price can be largely attributed to a number of factors, including investors outlook toward inflation, current interest rate environment, and increased appetite for physical assets.

Table of Contents

OPERATION OF THE GOLD MARKET

Futures Exchanges

The most significant gold futures exchanges are the COMEX, operated by Commodities Exchange, Inc., a subsidiary of New York Mercantile Exchange, Inc., and the Tokyo Commodity Exchange (TOCOM). The COMEX is the largest exchange in the world for trading metals futures and options and has been trading gold since 1974. The TOCOM has been trading gold since 1982.

COMEX

Future exchanges seek to provide a neutral, regulated marketplace for the trading of derivatives contracts for commodities. Future contracts are defined by the exchange for each commodity. For each commodity traded, this contract specifies the precise quality and quantity standards. The contract's terms and conditions also define the location and timing of physical delivery.

An exchange does not buy or sell those contracts, but seeks to offer a transparent forum where members, on their own behalf or on the behalf of customers, can trade the contracts in a safe, efficient and orderly manner. During regular trading hours at COMEX, the commodity contracts are traded through open outcry; a verbal auction in which all bids, offers and trades must be publicly announced to all members. The prices at which each commodity trades throughout the day serve as world benchmarks. They are immediately transmitted around the world by a wide variety of price-reporting services under arrangement with the exchange. Electronic trading is offered by the exchange after regular market hours. Except for brief breaks to switch between open outcry and electronic trading in the evening and the morning, gold trades almost 24 hours a day, five business days a week.

In addition to the public nature of the pricing, futures exchanges in the United States are regulated at two levels, internal and external governmental supervision. The internal is performed through self-regulation and consists of regular monitoring of the following: the open-outcry process to insure that it is conducted in conformance with all exchange rules; the financial condition of all exchange member firms to insure that they continuously meet financial commitments; and the positions of commercial and non-commercial customers to insure that physical delivery and other commercial commitments can be met, and that pricing is not being improperly affected by the size of any particular customer positions. External governmental oversight is performed by the CFTC, which reviews all the rules and regulations of United States futures exchanges and monitors their enforcement.

Gold futures opened for trading on the COMEX on December 31, 1974, coinciding with the lifting of the Government's ban on gold ownership by private citizens in the United States.

The clearing system of NYMEX seeks to minimize credit risk exposure for NYMEX participants. The system binds all the members through both financial deposits and other commitments into a unitary system guaranteeing the performance of each other and their customers. The NYMEX clearinghouse operates this system by holding member firms' funds on deposit, who in turn hold their member and non-member customer funds. The clearinghouse acts as fiscal transfer agent moving funds from account to account on a daily basis as dictated by price changes. The clearinghouse also insures that trading is conducted in an orderly manner by matching trades and maintaining the delivery process.

The COMEX rules and procedures seek to insure the integrity of the trading process. They are complemented by a system designed to insure the quality of the physical gold used for delivery under the futures contracts. For gold to be eligible for delivery upon a COMEX contract, it must be deposited into an exchange-licensed depository from a source that is capable of guaranteeing the gold's quality. The three sources include: (1) a refiner approved for COMEX gold delivery, (2) an assayer approved to assay such gold, or (3) from another licensed depository, when it entered that depository via either (1) or (2). Gold can

Table of Contents

only be moved from any of these sources by a COMEX-approved deliverer. Throughout every step, the gold bar must be accompanied by a complete documentary history of its movement. If this chain of integrity is broken at any point, the bar is not eligible and either must be re-assayed to prove its quality or sent back to the refinery to be recast.

The trading unit of COMEX gold futures contracts is 100 troy ounces. Gold bars tendered for delivery can be cast in the form of either one bar or three one-kilogram bars. In either form, the gross weight of the bar or bars tendered for each contract must be within a five-percent tolerance. The bars must assay at not less than 995 fineness, i.e. 99.5% pure gold. The weight, fineness, bar number and identifying stamp of the refiner must be clearly incised on each bar by the approved refiner. The buyer taking delivery pays for the actual gold content, called the fine weight, in the bar. The fine weight is determined by multiplying the gross weight of the bar or bars tendered for each contract by their fineness. For example, a bar with a gross weight of 100 oz. with a fineness of 995, has a fine weight of 99.5 troy ounces. Delivery of COMEX gold is based on negotiable warehouse receipts, called warrants, for specific bars identified on the receipt which are stored in licensed depositories located in New York City.

All procedures described above are set forth in the COMEX rules and regulations as in effect as of the date of this prospectus. These rules and regulations are established by the Board of Directors of the NYMEX and subject to change by that body.

Exchange Regulation

In the United States, commodity futures trading, and the markets where it is conducted, are regulated under the federal Commodity Exchange Act, which is administered by the CFTC, an independent agency of the federal government. The CFTC oversees the operation of the U.S. commodity futures markets, including COMEX. One of the principal public policy objectives of the Commodity Exchange Act is to insure the integrity of the markets it oversees and the reliability of the prices of trades on those markets. The Commodity Exchange Act and CFTC require markets, including COMEX, to have rules and procedures to prevent market manipulation, abusive trade practice and fraud and the CFTC conducts regular review of the markets' rule enforcement programs.

Over-the-Counter Market

The OTC gold market includes spot, forward, and option and other derivative transactions conducted on a principal-to-principal basis. While this is a global 24-hour per day market, its main centers are London, New York and Zurich.

Ten members of the LBMA, the trade association that acts as the coordinator for activities conducted on behalf of its members and other participants in the London bullion market, act as OTC market-makers and most OTC market trades are cleared through London. The LBMA plays an important role in setting OTC gold trading industry standards. The LBMA's London Good Delivery Lists, identify approved refiners of gold. In the OTC market, gold that meets the specifications for weight, dimensions, fineness (or purity), identifying marks (including the assay stamp of an LBMA-acceptable refiner) and appearance set forth in The Good Delivery Rules for Gold and Silver Bars published by the LBMA are London Good Delivery Bars. A London Good Delivery Bar (typically called a 400 ounce bar) must contain between 350 and 430 fine troy ounces of gold (1 troy ounce = 31.1034768 grams), with a minimum fineness (or purity) of 995 parts per 1000 (99.5%), be of good appearance and be easy to handle and stack. The fine gold content of a gold bar is calculated by multiplying the gross weight of the bar (expressed in units of 0.025 troy ounces) by the fineness of the bar. A London Good Delivery Bar must also bear the stamp of one of refiners who are on the LBMA-approved list. A London Gold Delivery Bar, which is acceptable for settlement of any OTC transaction will be acceptable for delivery to the trust in connection with the issuance of Baskets of iShares.

Table of Contents

London Market Regulation

Regulation of the London gold market's participants, including the major participating members of the LBMA is the responsibility of the Financial Services Authority (FSA) pursuant to the Financial Services and Markets Act 2000 (FSM Act). This law makes all UK-based banks and investment firms, subject to certain fitness and properness, capital adequacy, liquidity, and systems and control requirements. Spot, commercial forwards, and deposits of gold not covered by the FSM Act is subject to The London Code of Conduct for Non-Investment Products, which was established by market participants in conjunction with the Bank of England.

Not a Regulated Commodity Pool

The trust does not trade in gold futures contracts on COMEX or on any other futures exchange. The trust takes delivery of physical gold that complies with the COMEX gold delivery rules or the LBMA gold delivery rules. Because the trust does not trade in gold futures contracts on any futures exchange, the trust is not regulated by the CFTC under the Commodity Exchange Act as a commodity pool, and is not operated by a CFTC-regulated commodity pool operator. Investors in the trust do not receive the regulatory protections afforded to investors in regulated commodity pools, nor may COMEX or any futures exchange enforce its rules with respect to the trust's activities. In addition, investors in the trust do not benefit from the protections afforded to investors in gold futures contracts on regulated futures exchanges.

Other Methods of Investing in Gold

The Trust competes with other financial vehicles, including traditional debt and equity securities issued by companies in the gold industry and other securities backed by or linked to gold, direct investments in gold and investment vehicles similar to the Trust.

BUSINESS OF THE TRUST

The activities of the trust are limited to (1) issuing Baskets of iShares in exchange for the gold deposited with the custodians as consideration, (2) selling gold as necessary to cover the sponsor's fee, trust expenses not assumed by the sponsor and other liabilities and (3) delivering gold in exchange for Baskets of iShares surrendered for redemption. The trust is not actively managed. It does not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the price of gold.

Trust Objective

The objective of the trust is for the value of the iShares to reflect, at any given time, the price of gold owned by the trust at that time less the trust's expenses and liabilities. The iShares are intended to constitute a simple and cost-effective means of making an investment similar to an investment in gold. An investment in physical gold requires expensive and sometimes complicated arrangements in connection with the assay, transportation, warehousing and insurance of the metal. Traditionally, such expense and complications have resulted in investments in physical gold being efficient only in amounts beyond the reach of many investors. The iShares have been designed to remove the obstacles represented by the expense and complications involved in an investment in physical gold, while at the same time having an intrinsic value that reflects, at any given time, the price of the gold owned by the trust at such time less the trust expenses and liabilities. Although the iShares are not the exact equivalent of an investment in gold, they provide investors with an alternative that allows a level of participation in the gold market through the securities market.

Table of Contents

An investment in iShares is:

Backed by gold held by the custodians on behalf of the trust.

The iShares are backed by the assets of the trust. The trustee's arrangements with each custodian contemplate that at the end of each business day there can be in the trust account at such custodian's no more than 430 ounces of gold in an unallocated form. Accordingly, the bulk of the trust's gold holdings is represented by physical gold, identified on the custodian's books as the property of the trust and held by the custodians in the vicinity of New York, Toronto, Montreal, London and other locations that may be authorized in the future.

As accessible and easy to handle as any other investment in shares.

Retail investors may purchase and sell iShares through traditional brokerage accounts. Because the intrinsic value of each iShare is a function of the price of only a fraction of an ounce of gold held by the trust, the cash outlay necessary for an investment in iShares should be less than the amount required for currently existing means of investing in physical gold. iShares are eligible for margin accounts.

Listed.

The iShares are listed and trade on NYSE Arca under the symbol IAU.

Relatively cost efficient.

Because the expenses involved in an investment in physical gold are dispersed among all holders of iShares, an investment in iShares may represent a cost-efficient alternative to investments in gold for investors not otherwise in a position to participate directly in the market for physical gold.

Secondary Market Trading

While the objective of the trust is for the value of the iShares to reflect, at any given time, the price of gold owned by the trust at that time less the trust's expenses and liabilities, iShares may trade at, above or below their NAV. The NAV of iShares will fluctuate with changes in the market value of the trust's assets. The trading prices of iShares will fluctuate in accordance with changes in their NAV as well as market supply and demand. The amount of the discount or premium in the trading price relative to the NAV may be influenced by non-concurrent trading hours between the major gold markets and NYSE Arca. While the iShares trade on NYSE Arca until 4:00 p.m. New York time, liquidity in the market for gold may be reduced after the close of the major world gold markets, including London, Zurich and COMEX. As a result, during this time, trading spreads, and the resulting premium or discount, on iShares may widen. However, given that Baskets of iShares can be created and redeemed in exchange for the underlying amount of gold, the sponsor believes that the arbitrage opportunities may provide a mechanism to mitigate the effect of such premium or discount.

Valuation of Gold; Computation of Net Asset Value

On each business day, as soon as practicable after 4:00 p.m. (New York time), the trustee evaluates the gold held by the trust and determines the net asset value of the trust. For purposes of making these calculations, a business day means any day other than a day when NYSE Arca is closed for regular trading.

The trustee values the trust's gold on the basis of that day's announced COMEX settlement price for the spot month gold futures contract. At any point in time, the spot month contract is the futures contract then closest to maturity. If there is no announced COMEX settlement price for spot month gold futures on a

Table of Contents

business day, the trustee is authorized to use the most recently announced COMEX settlement price for spot month gold futures contracts unless the trustee, in consultation with the sponsor, determines that such price is inappropriate as a basis for evaluation.

The COMEX daily settlement price for each gold futures contract is established by a subcommittee of COMEX members shortly after the close of trading in New York. The daily settlement price for each contract (delivery month) is derived from the daily settlement price for the most active futures contract month, which is not necessarily the spot month. That settlement price for the most active futures contract month is the average, rounded off to the nearest multiple of ten cents, of the highest and lowest price of the trades for that contract month reported during the last one minute of trading prior to the close of the market.

For all other gold futures contract months, which may include the spot month, the settlement prices are determined by COMEX based upon the differentials reflected in spread trades between adjacent months, such differentials being directly or indirectly related to the most active month. These differentials are determined by the average of the highest and lowest spread trades (trades based upon the differential between the price for two contract months) reported during the last fifteen minutes of trading prior to the close of the market. In the case that there were no such spread trades, the average of the bids and offers for spread transactions during that last fifteen-minute period are used. In the case that there were no such bids and offers during that time, the contracts are settled at prices consistent with the differentials for other contract months that were settled by the first or second method. If the third method is used, the subcommittee of the COMEX members establishing those settlement prices provides a record of the differentials from other contract months which formed the basis for those settlements.

If the COMEX establishes, with the approval of, or after regulatory notification to, the CFTC, rules for regularly determining a gold price that is different from that described above, the trustee, in consultation with the sponsor, may decide to evaluate the gold held by the trust using such other COMEX gold price, and the new price will become effective 60 days after notice of the trustee's decision is sent to the holders of iShares.

Once the value of the gold has been determined, the trustee subtracts all accrued fees (other than the fees to be computed by reference to the value of the trust or its assets), expenses and other liabilities of the trust from the total value of the gold and all other assets of the trust. The resulting figure is the adjusted net asset value of the trust, which is used to compute all fees (including the trustee's and the sponsor's fees) which are calculated from the value of the trust's assets.

To determine the net asset value of the trust, the trustee subtracts from the adjusted net asset value of the trust the amount of accrued fees computed from the value of the trust's assets. The trustee also determines the NAV by dividing the net asset value of the trust by the number of the iShares outstanding at the time the computation is made.

Trust Expenses

The trust's only ordinary recurring expense is expected to be the sponsor's fee. In exchange for the sponsor's fee the sponsor has agreed to assume the following administrative and marketing expenses incurred by the trust: the trustee's fee, the custodians' fees, NYSE Arca listing fees, SEC registration fees, printing and mailing costs, audit fees and expenses and up to \$100,000 per annum in legal fees and expenses.

The sponsor's fee is accrued daily at an annualized rate equal to 0.25% of the adjusted net asset value of the trust and is payable monthly in arrears. The trustee will, when directed by the sponsor, and, in the absence of such direction, may, in its discretion, sell gold in such quantity and at such times, as may be necessary to permit payment of the sponsor's fee and of trust expenses or liabilities not assumed by the

Table of Contents

sponsor. The trustee is authorized to sell gold at such times and in the smallest amounts required to permit such payments as they become due, it being the intention to avoid or minimize the trust's holdings of assets other than gold. Accordingly, the amount of gold to be sold will vary from time to time depending on the level of the trust's expenses and the market price of gold. The custodians have agreed to purchase from the trust, at the request of the trustee, gold needed to cover trust expenses at a price equal to the price used by the trustee to determine the value of the gold held by the trust on the date of the sale.

Cash held by the trustee pending payment of the trust's expenses will not bear any interest. Each sale of gold by the trust will be a taxable event to Shareholders. See "United States Federal Tax Consequences" Taxation of U.S. Shareholders.

Impact of Trust Expenses on the Trust's Net Asset Value

The trust sells gold to raise the funds needed for the payment of the sponsor's fee and all trust expenses or liabilities not assumed by the sponsor. See "The Sponsor" "The Sponsor's Fee". The purchase price received as consideration for such sales is the trust's sole source of funds to cover its liabilities. The trust does not engage in any activity designed to derive a profit from changes in the price of gold. Gold not needed to redeem Baskets of iShares, or to cover the sponsor's fee and trust expenses or liabilities not assumed by the trustee, will be held in physical form by the custodians (except for residual amounts not exceeding 430 ounces which will be held in unallocated form by each custodian on behalf of the trust). As a result of the recurring sales of gold necessary to pay the sponsor's fee and the trust expenses or liabilities not assumed by the sponsor, the net asset value of the trust and, correspondingly, the fractional amount of gold represented by each iShare will decrease over the life of the trust. New deposits of gold, received in exchange for additional new Baskets issued by the trust, do not reverse this trend.

The following table, prepared by the sponsor, illustrates the anticipated impact of the sales of gold discussed above on the fractional amount of gold represented by each outstanding iShare. It assumes that the only sales of gold will be those needed to pay the sponsor's fee and that the price of gold and the number of iShares remain constant during the three-year period covered. The table does not show the impact of any extraordinary expenses the trust may incur. Any such extraordinary expenses, if and when incurred, will accelerate the decrease in the fractional amount of gold represented by each iShare.

Calculation of NAV:

	Year 1	Year 2	Year 3
Hypothetical gold price per ounce	\$ 1,000.00	\$ 1,000.00	\$ 1,000.00
Sponsor's fee	0.25%	0.25%	0.25%
Shares of trust, beginning	1,000,000	1,000,000	1,000,000
Ounces of gold in trust, beginning	10,000.00	9,975.00	9,950.00
Beginning adjusted net asset value of the trust	\$ 10,000,000	\$ 9,975,000	\$ 9,950,000
Ounces of gold to be sold to cover the sponsor's fee*	25.00	24.94	24.88
Ounces of gold in trust, ending	9,975.00	9,950.00	9,925.00
Ending adjusted net asset value of the trust	\$ 9,975,000	\$ 9,950,000	\$ 9,925,000
Ending NAV	\$ 9.98	\$ 9.95	\$ 9.93

* Sales occur daily, but the sponsor's fee is payable monthly in arrears.

Table of Contents

DESCRIPTION OF THE ISHARES AND THE TRUST AGREEMENT

The trust was formed on January 21, 2005 when an initial deposit of gold was made in exchange for the issuance of three Baskets. The purpose of the trust is to own gold transferred to the trust in exchange for iShares issued by the trust. The trust is governed by the Trust Agreement among the sponsor, the trustee, the registered holders and beneficial owners of iShares and all persons that deposit gold for the purpose of creating iShares. The Trust Agreement sets out the rights of depositors of gold and registered holders of iShares and the rights and obligations of the sponsor and the trustee. New York law governs the Trust Agreement, the trust and the iShares. The following is a summary of material provisions of the Trust Agreement. It is qualified by reference to the entire Trust Agreement, which is filed as an exhibit to the registration statement of which the prospectus is a part.

Each iShare represents a fractional undivided beneficial interest in the net assets of the trust. The assets of the trust consist primarily of gold held by the custodians on behalf of the trust. However, the trust is expected to make daily sales of gold to pay the sponsor's fee and to cover expenses and liabilities not assumed by the sponsor. Such sales result in the trust holding cash for brief periods of time. In addition, there may be other situations where the trust may hold cash. For example, a claim may arise against a custodian, an Authorized Participant, or any other third party, which is settled in cash. In those situations where the trust unexpectedly receives cash or any other assets, the Trust Agreement provides that no deposits of gold will be accepted (*i.e.*, there will be no issuance of new iShares) until after the record date for the distribution of such cash or other property has passed. The trust issues iShares only in Baskets of 50,000 or integral multiples thereof. Baskets of iShares may be redeemed by the trust in exchange for the amount of gold represented by the aggregate number of iShares redeemed. The trust is not a registered investment company under the Investment Company Act of 1940 and is not required to register under such act.

Deposit of Gold; Issuance of Baskets of iShares

The trust creates and redeems iShares on a continuous basis but only in Baskets of 50,000 iShares. Upon the deposit of the corresponding amount of gold with one of the custodians, and the payment of the trustee's applicable fee and of any expenses, taxes or charges (such as stamp taxes or stock transfer taxes or fees), the trustee will deliver the appropriate number of Baskets to the DTC account of the depositing Authorized Participant. Only Authorized Participants can deposit gold and receive Baskets of iShares in exchange. As of the date of this prospectus, Barclays Capital Inc., Citigroup Global Markets, Inc., Credit Suisse Securities (USA), LLC, Deutsche Bank Securities Inc., EWT, LLC, Goldman Sachs & Co., Goldman Sachs Execution & Clearing L.P., J.P. Morgan Securities Inc., Knight Clearing Services LLC, Merrill Lynch Professional Clearing Corp., Newedge Group USA, PruGlobal Securities, LLC, Scotia Capital (USA) Inc. and Virtu Financial BD LLC are the only Authorized Participants. The sponsor and the trustee maintain a current list of Authorized Participants. Gold deposited with a custodian must either (a) meet the requirements to be delivered in settlement of a COMEX gold futures contract pursuant to rules adopted by COMEX, or (b) meet the London Good Delivery Standards.

Before making a deposit, the Authorized Participant must deliver to the trustee a written purchase order indicating the number of Baskets it intends to acquire and the location or locations where it expects to make the corresponding deposit of gold with one of the custodians. The trustee will acknowledge the purchase order unless it or the sponsor decides to refuse the deposit as described below under Requirements for Trustee Actions. The date the trustee receives that order determines the Basket Gold Amount the Authorized Participant needs to deposit. However, orders received by the trustee after 4:00 p.m. (New York time) on a business day are treated as received on the next following business day. The trustee has entered into custody agreements with the custodians which contain arrangements so that gold can be delivered in the vicinity of New York, Toronto, Canada, Montreal, Canada, London, England, or at other locations that may be authorized in the future.

Table of Contents

If the trustee accepts the purchase order, it transmits to the Authorized Participant, via facsimile or electronic mail message, no later than 5:00 p.m. (New York time) on the date such purchase order is received, or deemed received, a copy of the purchase order endorsed "Accepted" by the trustee and indicating the Basket Gold Amount that the Authorized Participant must deliver to one of the custodians in exchange for each Basket. Prior to the trustee's acceptance as specified above, a purchase order only represents the Authorized Participant's unilateral offer to deposit gold in exchange for Baskets of iShares and has no binding effect upon the trust, the trustee, any custodian or any other party.

The Basket Gold Amount necessary for the creation of a Basket changes from day to day. The initial Basket Gold Amount at the time of creation of the trust was 5,000 fine ounces of gold. On June 24, 2010, after the ten-for-one share split that became effective on that date, the Basket Gold Amount was 489.368 fine ounces of gold. On each day that NYSE Arca is open for regular trading, the trustee adjusts the quantity of gold constituting the Basket Gold Amount as appropriate to reflect sales of gold, any loss of gold that may occur, and accrued expenses. The computation is made by the trustee as promptly as practicable after 4:00 p.m. (New York time). See "Business of the Trust Valuation of Gold; Computation of Net Asset Value" for a description of how the COMEX determines settlement prices, including the settlement price for the spot month gold futures contract and how the trustee determines the NAV. The trustee determines the Basket Gold Amount for a given business day by multiplying the NAV by the number of iShares in each Basket (50,000) and dividing the resulting product by that day's COMEX settlement price for the spot month gold futures contract. Fractions of a fine ounce of gold smaller than 0.001 fine ounce are disregarded for purposes of the computation of the Basket Gold Amount. The Basket Gold Amount so determined is communicated via facsimile or electronic mail message to all Authorized Participants, and available in the sponsor's website for the iShares. NYSE Arca also publishes the Basket Gold Amount determined by the trustee as indicated above.

Because the sponsor has assumed what are expected to be most of the trust's expenses, and the sponsor's fee accrues daily at the same rate (*i.e.*, $\frac{1}{365}$ th of the net asset value of the trust multiplied by (0.25%), in the absence of any extraordinary expenses or liabilities the amount of gold by which the Basket Gold Amount decreases each day is predictable. The trustee intends to make available on each business day through the same channels used to disseminate the actual Basket Gold Amount determined by the trustee as indicated above an indicative Basket Gold Amount for the next business day. Authorized Participants may use that indicative Basket Gold Amount as guidance regarding the amount of gold that they may expect to have to deposit with one of the custodians in respect of purchase orders placed by them on such next business day and accepted by the trustee. The agreement entered with each Authorized Participant provides, however, that once a purchase order has been accepted by the trustee, the Authorized Participant will be required to deposit with one of the custodians the Basket Gold Amount determined by the trustee on the effective date of the purchase order.

No iShares are issued unless and until one of the custodians has informed the trustee that it has allocated to the trust's account at such custodian's (except that any amounts of less than 430 ounces may be held in such trust account on an unallocated basis) the corresponding amount of gold. In accordance with the procedures that the custodians have agreed to follow in connection with the creation of iShares, gold received by a custodian no later than 11:30 a.m. (local time at the place of delivery) is required to be allocated to the trust's account at such custodian's no later than 9:00 a.m. (New York time) on

(a) on the same day, if it is delivered to such custodian's account at The Bank of England;

(b) the second business day thereafter, if it does not exceed

(i) 500,000 fine ounces, in the case of gold that, prior to the transaction, was already in the possession of the custodian (*e.g.* if the custodian held it for the account of the Authorized Participant party to the transaction), or

Table of Contents

(ii) 50,000 fine ounces, in the case of gold which, prior to the transaction, was not in the possession of the custodian (*i.e.*, gold that is first delivered in physical form to the custodian in connection with the transaction); or

(c) the fourth business day thereafter, in the case of more than 50,000 fine ounces but less than 100,000 fine ounces of gold that, prior to the transaction, was not in the possession of the custodian.

In all other cases, a custodian's obligation is to allocate gold to the trust's account as soon as practicable after its receipt at the custodian's facilities.

Redemption of Baskets of iShares; Withdrawal of Gold

Authorized Participants, acting on authority of the registered holder of iShares, may surrender Baskets of iShares in exchange for the corresponding Basket Gold Amount announced by the trustee. Upon the surrender of such iShares and the payment of the trustee's applicable fee and of any expenses, taxes or charges (such as stamp taxes or stock transfer taxes or fees), the trustee will deliver to the order of the redeeming Authorized Participant the amount of gold corresponding to the redeemed Baskets. iShares can only be surrendered for redemption in Baskets of 50,000 iShares each.

Before surrendering Baskets of iShares for redemption, an Authorized Participant must deliver to the trustee a written request indicating the number of Baskets it intends to redeem and the location where it would like to take delivery of the gold represented by such Baskets. The date the trustee receives that order determines the Basket Gold Amount to be received in exchange. However, orders received by the trustee after 4:00 p.m. (New York time) on a business day are treated as received on the next following business day.

A custodian may make the gold available for collection at its office or at the office of a sub-custodian if the gold is being held by a sub-custodian. Gold is delivered at the locations designated by the trustee, in consultation with the custodians. Redeeming Authorized Participants are entitled to express a preference as to where they would like to have gold delivered, but have no right to receive delivery at a specified location.

Unless otherwise agreed to by the custodian making such delivery, gold is delivered to the redeeming Authorized Participants in the form of physical bars only (except that any amount of less than 430 ounces may be transferred to an unallocated account of or as ordered by, the redeeming Authorized Participant).

Redemptions may be suspended only (i) during any period in which regular trading on NYSE Arca or the COMEX is suspended or restricted or one or both exchanges are closed (other than scheduled holiday or weekend closings), or (ii) during an emergency as a result of which delivery, disposal or evaluation of gold is not reasonably practicable.

Certificates Evidencing the iShares

The iShares are evidenced by certificates executed and delivered by the trustee on behalf of the trust. DTC has accepted the iShares for settlement through its book-entry settlement system. So long as the iShares are eligible for DTC settlement, there will be only one certificate evidencing shares that will be registered in the name of a nominee of DTC. Investors will be able to own iShares only in the form of book-entry security entitlements with DTC or direct or indirect participants in DTC. No investor will be entitled to receive a separate certificate evidencing iShares. Because iShares can only be held in the form of book-entries through DTC and its participants, investors must rely on DTC, a DTC participant and any other financial intermediary through which they hold iShares to receive the benefits and exercise the rights described in this section. Investors should consult with their broker or financial institution to find out about the procedures and requirements for securities held in DTC book-entry form.

Table of Contents

Cash and Other Distributions

If the sponsor and trustee determine that there is more cash being held in the trust than is needed to pay the trust's expenses for the next month, the trustee will distribute the extra cash to DTC.

If the trust receives any property other than gold or cash, the trustee will distribute that property to DTC by any means it thinks is lawful, equitable and feasible. If it cannot make the distribution in that way, the trustee will sell the property and distribute the net proceeds, in the same way as it does with cash.

Registered holders of iShares are entitled to receive these distributions in proportion to the number of iShares owned. Before making a distribution, the trustee may deduct any applicable withholding taxes and any fees and expenses of the trust that have not been paid. The trustee distributes only whole United States dollars and cents and is not required to round fractional cents to the nearest whole cent. The trustee is not responsible if it decides that it is unlawful or impractical to make a distribution available to registered holders.

Voting Rights

iShares do not have any voting rights. However, registered holders of at least 25% of the iShares have the right to require the trustee to cure any material breach by it of the Trust Agreement, and registered holders of at least 75% of the iShares have the right to require the trustee to terminate the Trust Agreement as described below.

Fees and Expenses of the Trustee

Each deposit of gold for the creation of Baskets of iShares and each surrender of Baskets of iShares for the purpose of withdrawing trust property (including if the Trust Agreement terminates) must be accompanied by a payment to the trustee of a fee of \$500 (or such other fee as the trustee, with the prior written consent of the sponsor, may from time to time announce).

The trustee will be entitled to reimburse itself from the assets of the trust for all expenses and disbursements incurred by it for extraordinary services it may provide to the trust or in connection with any discretionary action the trustee may take to protect the trust or the interests of the holders.

Trust Expenses and Gold Sales

In addition to the fee payable to the sponsor (See "The Sponsor" "The Sponsor's Fee"), the following expenses are paid out of the assets of the trust:

any expenses or liabilities of the trust that are not assumed by the sponsor;

any taxes and other governmental charges that may fall on the trust or its property;

expenses and costs of any action taken by the trustee or the sponsor to protect the trust and the rights and interests of holders of iShares; and

any indemnification of the sponsor as described below.

The trustee sells the trust's gold from time to time as necessary to permit payment of the fees and expenses that the trust is required to pay. See "Business of the Trust" "Trust Expenses."

The trustee is not responsible for any depreciation or loss incurred by reason of sales of gold made in compliance with the Trust Agreement.

Table of Contents

Payment of Taxes

The trustee may deduct the amount of any taxes owed from any distributions it makes. It may also sell trust assets, by public or private sale, to pay any taxes owed. Registered holders of iShares will remain liable if the proceeds of the sale are not enough to pay the taxes.

Evaluation of Gold and the Trust Assets

See Business of the Trust Valuation of Gold; Computation of Net Asset Value .

Amendment and Termination

The sponsor and the trustee may agree to amend the Trust Agreement without the consent of the holders of iShares. If an amendment imposes or increases fees or charges, except for taxes and other governmental charges, or prejudices a substantial right of holders of iShares, it will not become effective for outstanding iShares until 30 days after the trustee notifies DTC of the amendment. *At the time an amendment becomes effective, by continuing to hold iShares, investors are deemed to agree to the amendment and to be bound by the Trust Agreement as amended.*

The trustee will terminate the Trust Agreement if:

the trustee is notified that the iShares are delisted from NYSE Arca and are not approved for listing on another national securities exchange within five business days of their delisting;

holders of at least 75% of the outstanding iShares notify the trustee that they elect to terminate the trust;

60 days have elapsed since the trustee notified the sponsor of the trustee's election to resign and a successor trustee has not been appointed and accepted its appointment;

the SEC determines that the trust is an investment company under the Investment Company Act of 1940, as amended, and the trustee has actual knowledge of that determination;

the aggregate market capitalization of the trust, based on the closing price for the iShares, was less than \$350 million on each of five consecutive trading days and the trustee receives, within six months from the last of those trading days, notice that the sponsor has decided to terminate the trust;

the CFTC determines that the trust is a commodity pool under the Commodity Exchange Act and the trustee has actual knowledge of that determination; or

the trust fails to qualify for treatment, or ceases to be treated, as a grantor trust for United States federal income tax purposes and the trustee receives notice that the sponsor has determined that the termination of the trust is advisable.

If not terminated earlier by the trustee, the trust will terminate on January 19, 2045. The trustee will notify DTC at least 30 days before the date for termination of the Trust Agreement. After termination, the trustee and its agents will do the following under the Trust Agreement but nothing else: (1) collect distributions pertaining to trust property, (2) pay the trust's expenses and sell gold as necessary to meet those expenses and (3) deliver trust property upon surrender and cancellation of iShares. Ninety days or more after termination, the trustee may sell any remaining trust property by public or private sale. After that, the trustee will hold the money it received on the sale, as well as any other cash it is holding under the Trust Agreement for the *pro rata* benefit of the registered holders that have not surrendered their iShares. It will not invest the money and has no liability for interest. The trustee's only obligations will be to account for the money and other cash, after deduction of applicable fees, trust expenses and taxes and governmental charges.

Table of Contents

Limitations on Obligations and Liability

The Trust Agreement expressly limits the obligations of the sponsor and the trustee. It also limits the liability of the sponsor and the trustee. The sponsor and the trustee:

are only obligated to take the actions specifically set forth in the Trust Agreement without negligence or bad faith;

are not liable if either of them is prevented or delayed by law or circumstances beyond their control from performing their obligations under the Trust Agreement;

are not liable if they exercise discretion permitted under the Trust Agreement;

have no obligation to prosecute a lawsuit or other proceeding related to the iShares or the Trust Agreement on behalf of the holders of iShares or on behalf of any other person;

may rely upon any documents they believe in good faith to be genuine and to have been signed or presented by the proper party. In addition, the sponsor will be indemnified by the trust for any liability or expense it incurs without negligence, bad faith or willful misconduct on its part.

Requirements for Trustee Actions

Before the trustee delivers or registers a transfer of iShares, makes a distribution on iShares, or permits withdrawal of trust property, the trustee may require:

payment of stock transfer or other taxes or other governmental charges and transfer or registration fees charged by third parties for the transfer of any iShares or trust property;

satisfactory proof of the identity and genuineness of any signature or other information it deems necessary; and

compliance with regulations it may establish, from time to time, consistent with the Trust Agreement, including presentation of transfer documents.

The trustee may suspend the delivery or registration of transfers of iShares, or may refuse a particular deposit or transfer at any time when the transfer books of the trustee are closed or if the trustee or the sponsor thinks it necessary or advisable for any reason. Redemptions may be suspended only (i) during any period in which regular trading on NYSE Arca or the COMEX is suspended or restricted or one or both exchanges are closed (other than scheduled holiday or weekend closings), or (ii) during an emergency as a result of which delivery, disposal or evaluation of gold is not reasonably practicable.

THE SECURITIES DEPOSITORY; BOOK-ENTRY-ONLY SYSTEM; GLOBAL SECURITY

DTC acts as securities depository for the iShares. DTC is a limited-purpose trust company organized under the laws of the State of New York, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code, and a clearing agency registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended. DTC was created to hold securities of its participants and to facilitate the clearance and settlement of transactions in such securities among the DTC Participants through electronic book-entry changes. This eliminates the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations, some of whom (and/or their representatives) own DTC. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly. DTC agrees with and represents to its participants that it will administer its book-entry system in accordance with its rules and by-laws and requirements of law.

Individual certificates will not be issued for the iShares. Instead, a global certificate will be signed by the trustee on behalf of the trust, registered in the name of Cede & Co., as nominee for DTC, and deposited with the trustee on behalf of DTC. The global certificate will represent all of the iShares outstanding at any time.

Upon the settlement date of any creation, transfer or redemption of iShares, DTC will credit or debit, on its book-entry registration and transfer system, the amount of the iShares so created, transferred or redeemed to the accounts of the appropriate DTC Participants. The trustee and the DTC Participants will designate the accounts to be credited and charged in the case of creation or redemption of iShares.

Beneficial ownership of the iShares will be limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Owners of beneficial interests in the iShares will be shown on, and the transfer of ownership will be effected only through, records maintained by DTC (with respect to DTC Participants), the records of DTC Participants (with respect to Indirect Participants), and the records of Indirect Participants (with respect to beneficial owners that are not DTC Participants or Indirect Participants). Beneficial owners are expected to receive from or through the DTC Participant a written confirmation relating to their purchase of the iShares.

Investors may transfer the iShares through DTC by instructing the DTC Participant or Indirect Participant through which the Shareholders hold their iShares to transfer the iShares. Transfers will be made in accordance with standard securities industry practice.

DTC may decide to discontinue providing its service for the iShares by giving notice to the trustee and the sponsor. Under such circumstances, the trustee and the sponsor will either find a replacement for DTC to perform its functions at a comparable cost or, if a replacement is unavailable, deliver separate certificates for iShares to the DTC Participants having iShares credited to their accounts.

The rights of the Shareholders generally must be exercised by DTC Participants acting on their behalf in accordance with the rules and procedures of DTC.
