Applications for Currency ETPs
Applications for Currency ETPs
Buying
international
stocks
and

bonds
inherently
introduces
some
exposure
to
fluctuating currency values, which can significantly impact returns for U.S. investors.
International
Hedging
Equipped
with
currency
ETPs,
investors
can
make
calls
on
the
future
value
of
any
given
pair of currencies. For example, an investor who believes the U.S. dollar will weaken
compared
to
the
euro
may
choose
to
go
long
the
CurrencyShares®
Euro
Trust,
while
an investor who thinks the euro is relatively overvalued may choose to short the trust
instead.
Speculation
i.e.
Popular
Carry
Trade,
where
investors
profit
on

the
interest

between two currencies. A simple version of the trade can be achieved by purchasing a high-yielding currency ETP and shorting a low-yielding one.

Alpha
Strategies

Just as investors diversify their international stock and bond portfolios to reduce risk, investors can also diversify their cash allocations.
