GLOBAL POWER EQUIPMENT GROUP INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 BUSINESS AND ORGANIZATION

Global Power Equipment Group Inc. and its wholly owned subsidiaries (unless the context requires otherwise, Global Power, the Company, we, us or our) is a leading provider of power generation equipment and industrial maintenance services. Through our Products Division, we design, engineer and manufacture gas turbine auxiliary equipment and control houses for customers throughout the world. Through our Services Division, we provide on-site modification and maintenance, outage management and facility upgrade services for nuclear power plants and specialty maintenance and other industrial services to hydrocarbon power plants and other industrial operations in the United States. Our corporate headquarters are located in Irving, Texas, with various facilities around the United States and internationally in The Netherlands, Mexico and China.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation: These unaudited condensed consolidated financial statements have been prepared by us in accordance with accounting principles generally accepted in the United States of America (U.S.). The information in the condensed consolidated financial statements, in the opinion of management, includes normal recurring adjustments and reflects all adjustments that are necessary for a fair statement of such financial statements. We believe that the disclosures presented are adequate to represent materially correct interim financial statements. These condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements and related notes for the year ended December 31, 2011 included in the Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 14, 2012.

Discontinued Operations Presentation: In August 2011, we completed the sale of substantially all of the operating assets of our Deltak LLC (Deltak) business unit. The results of Deltak operations for all periods presented have been reclassified to discontinued operations except where noted. The following notes relate to our continuing operations only unless otherwise noted (See Note 4 *Discontinued Operations and Sale of Deltak Assets*).

Principles of Consolidation: The accompanying condensed consolidated financial statements include the accounts of Global Power Equipment Group Inc. and its wholly owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying footnotes. Actual results could vary materially from those estimates.

Reclassifications: Certain reclassifications have been made to the prior years consolidated financial statements to conform with the current year presentation.

Dollar Amounts: All dollar amounts (except per share amounts) presented in the tabulations within the notes to our condensed consolidated financial statements are stated in thousands of dollars, unless otherwise noted.

Revenue Recognition: We are organized in two major segments: the Products Division and the Services Division. Substantially all of our revenues within the Products Division are derived from fixed-priced contracts. Within the Services Division, we enter into a variety of contract structures including cost plus reimbursements, time and material contracts and fixed-price contracts. The determination of the contract structure within the Services Division is based on the scope of work, complexity and project length and customer preference. We expense pre-contract costs as incurred. Change orders are included in total estimated contract revenue when they can be reliably estimated and it is probable that the adjustment will be approved by the customer or realized. Costs related to change orders are recognized when they are incurred. Revenue for gas turbine auxiliary and control house equipment is recognized on the completed contract method typically when the unit is delivered and title and risk of loss have transferred to the customer. Revenues for the Selective Catalytic Emission Reduction (SCR) product line in the Products Division and the fixed-price contracts in the Services Division are recognized on the percentage-of-completion method.

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

The percentage-of-completion method generally results in the recognition of reasonably consistent profit margins over the life of a contract since management has the ability to produce reasonably dependable estimates of contract billings and contract costs. We use the level of profit margin that is most likely to occur on a contract. If the most likely profit margin cannot be precisely determined, the lowest probable level of profit in the range of estimates is used until the results can be estimated more precisely. Our estimate of the total hours or total contract costs to be incurred at any particular time has a significant impact on the revenue recognized for the respective period. Changes in job performance, job conditions, estimated profitability, final contract settlements and resolution of claims may result in revisions to costs and income, and the effects of such revisions are recognized in the period that the revisions are determined. Estimated losses on uncompleted contracts are recognized in the period in which

Table of Contents

they first become apparent. Under percentage-of-completion accounting, management must also make key judgments in areas such as the percentage-of-completion, estimates of project revenue, costs and margin, estimates of total and remaining project hours and liquidated damages assessments. Any deviations from estimates could have a significant positive or negative impact on our results of operations.

Products Division revenue for gas turbine auxiliary and control house equipment is recognized on the completed contract method typically when the unit is shipped. Certain of these contracts specify separate delivery dates of individual equipment units or require customer acceptance of a product. In circumstances where separate delivery dates of individual equipment units exist, we recognize revenue when the customer assumes the risk of loss and title for the equipment, which is generally the date the unit is shipped, and costs previously deferred are charged to expense. In circumstances where the contract requires customer acceptance of a product in addition to transfer of title and risk of loss to the customer, revenue is either recognized (i) upon shipment when we are able to demonstrate that the customer specific objective criteria have been met or (ii) upon customer acceptance. Once title and risk of loss have transferred and, where applicable, customer acceptance is complete, we have no further performance obligations. Our SCR product line follows percentage-of-completion method based on cost-to-cost input measures. Regardless of contract provisions, we require that the customer assumes risk of loss and title, and the installation is operating according to specifications or is an uninstalled unit that has been accepted by the customer for revenue to be recognized. Changes in job performance, job conditions, estimated profitability, final contract settlements and resolution of claims may result in revisions to job costs and income amounts that are different than amounts originally estimated.

Cost plus and time and material contracts represent the majority of the contracts in the Service Division. For these contract types, we recognize revenue when services are performed based upon an agreed-upon price for the completed services or based upon the hours incurred and agreed-upon hourly rates. Some of our contracts include provisions that adjust contract revenues for safety, schedule or other performance measures. On cost reimbursable contracts, revenue is recognized as costs are incurred and includes applicable mark up earned through the date services are provided. Fixed price contracts are recognized under the percentage-of-completion method using cost-to-cost measures. Occasionally, we may exclude certain costs from the cost-to-cost method such as significant costs for materials or subcontractors if the exclusion of such costs would result in a more meaningful measurement of actual progress towards completion of the contract.

Revenue and cost of revenue for the discontinued Deltak business unit in the Products Division were recognized on the percentage-of-completion method based on the percentage of actual hours incurred to date in relation to total estimated hours for each contract. This method was used because management considered expended labor hours to be the best available measure of progress on these contracts.

Adoption of New Accounting Pronouncements:

Accounting Standards Update (ASU) No. 2011-05, Comprehensive Income (Topic 220) (ASU 2011-05) changes the options when presenting comprehensive income. The update gives companies the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in separate but consecutive statements. The amendments in the update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. This amendment also required an entity to present on the face of the financial statements adjustments for items that are reclassified from accumulated other comprehensive income to net income; however, this portion of the guidance has been deferred. The provisions of ASU 2011-05 will be applied retrospectively for interim and annual periods beginning after December 15, 2011. We now present condensed consolidated statements of comprehensive income as a result of adopting the update.

Recently Issued Accounting Pronouncements:

In July 2012, the Financial Accounting Standards Board (FASB) issued ASU No. 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment (the revised standard). Under this new standard, entities testing indefinite-lived intangible assets for impairment now have an option of performing a qualitative assessment before having to calculate the fair value of a reporting unit. If an entity determines, on the basis of qualitative factors, that there is a more likely than not chance that the fair value of the reporting unit is less than the carrying amount, the existing quantitative impairment test is required. Otherwise, no further impairment testing is required. This standard is effective for us beginning January 1, 2013, with early adoption permitted under certain conditions. We do not expect the adoption of this standard will have any material effect on our financial statements or results of operations.

In August 2012, the FASB issued ASU No. 2012-03, Technical Amendments and Corrections to Securities and Exchange Commission (SEC) Paragraphs, amends SEC paragraphs in the FASB Accounting Standards Codification (ASC) to make it more consistent with accounting principles generally accepted in the U.S. issued by the FASB and included in the ASC. Most of the changes were considered minor. The provisions are effective upon issuance. The provisions of ASU No. 2012-03 are not expected to have a material impact on our consolidated financial statements.

Table of Contents

In October 2012, the FASB issued ASU No. 2012-04, Technical Corrections and Improvements (ASU No. 2012-04) which makes certain technical corrections and conforming fair value amendments to the FASB ASC. The amendments affect various ASC topics and apply to all reporting entities within the scope of those topics. The technical corrections (Section A) are divided into three main categories: (1) Source literature amendments amendments to carry forward the original intent of certain pre-ASC authoritative literature that was inadvertently altered during the ASC process, (2) Guidance clarification and reference corrections changes in wording and references to avoid misapplication or misinterpretation of guidance, and (3) Relocated guidance moving guidance from one part of the ASC to another to correct instances in which the scope of pre-ASC guidance may have been unintentionally narrowed or broadened during the ASC process. The purpose of Section B of ASU No. 2012-04 is to conform the use of the term fair value throughout the ASC to fully reflect the fair value measurement and disclosure requirements of ASC Topic 820 Fair Value Measurement . These provisions are effective upon issuance, except for amendments that are subject to transition guidance, which will be effective for fiscal periods beginning after December 15, 2012. The provisions of ASU No. 2012-04 are not expected to have a material impact on our consolidated financial statements.

NOTE 3 ACQUISITIONS

On July 30, 2012, we acquired Koontz-Wagner Custom Controls Holdings LLC (Koontz-Wagner), a leading manufacturer and integrator of engineered packaged control house solutions for the energy, oil & gas, and electrical industries. The aggregate acquisition price consisted of \$32.4 million in cash.

On September 5, 2012, we acquired the equity of TOG Holdings, Inc., together with its subsidiary, TOG Manufacturing Corporation (TOG). TOG provides precision machined metal and alloy parts to original equipment manufacturers for the steam and natural gas turbine power generation market. The aggregate acquisition price is expected to be \$12.3 million after working capital adjustments.

We funded the purchase price of the Koontz-Wagner acquisition and the TOG acquisition (together, the 2012 Acquisitions) with cash on hand, excluding non-cash accruals of \$0.5 million for unpaid purchase price adjustments included in the accompanying condensed consolidated balance sheets as of September 30, 2012. The financial results of the 2012 Acquisitions have been included in our Products Division as of their respective acquisition dates.

The following table summarizes the consideration paid for the 2012 Acquisitions and presents the allocation of these amounts to the net tangible and identifiable intangible assets based on their estimated fair values as of the respective acquisition dates. This allocation requires the significant use of estimates and is based on the information that was available to management at the time these condensed consolidated financial statements were prepared.

Current assets, including cash and cash equivalents of \$0.1 million	\$ 10,954
Property, plant and equipment.	1,552
Identifiable intangible assets	25,470
Goodwill	15,492
Total assets acquired	53,468
Current liabilities	(8,828)
Net assets acquired	\$ 44,640

Management determined the purchase price allocations for the 2012 Acquisitions based on estimates of the fair values of the tangible and intangible assets acquired and liabilities assumed. We utilized recognized valuation techniques, including the income approach and cost approach for the net assets acquired. The fair value of the assets acquired and liabilities assumed in the 2012 Acquisitions remain subject to potential adjustments. The acquisition accounting for the TOG acquisition is subject to working capital adjustments, which is not expected to be materially different from our September 30, 2012 estimate.

Table of Contents

Acquired intangible assets of \$25.5 million consisted of customer relationships, trade names and noncompete agreements. The amortization period for these intangible assets ranges from 5 to 9 years. We recorded \$0.4 million of amortization expense related to these intangible assets during the three months ended September 30, 2012 covering the period of July 31, 2012 through September 30, 2012. The major classes of intangible assets are as follows:

	Weighted Average Amortization Years	Amount
Customer Relations	8.5	\$ 19,300
Trade Names	Indefinite	5,100
Noncompetes	5	1,070
		\$ 25,470

The goodwill arising from the 2012 Acquisitions consists largely of expectations that the 2012 Acquisitions extend our ability to deliver a broader portfolio of products to our Products Division customers including original equipment manufacturers, engineering, procurement and construction contractors and operators of power generation facilities. The goodwill associated with the Koontz-Wagner acquisition is deductible for tax purposes whereas the goodwill associated with the TOG acquisition is not deductible.

The following unaudited pro forma information have been provided for illustrative purposes only and are not necessarily indicative of results that would have occurred had the 2012 Acquisitions been in effect for the periods presented, nor are they necessarily indicative of future results.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Revenue	\$ 115,021	\$ 111,252	\$ 332,014	\$ 372,360
Income from continuing operations	1,840	7,105	4,180	55,561
Earnings per share from continuing operations:				
Basic	\$ 0.11	\$ 0.44	\$ 0.25	\$ 3.50
Diluted	\$ 0.11	\$ 0.42	\$ 0.24	\$ 3.28

The pro forma combined results for the three and nine months ended September 30, 2012 and 2011 have been prepared by adjusting our historical results to include the 2012 Acquisitions as if they occurred on January 1, 2011. These pro forma combined historical results were then adjusted for the following: a reduction in interest expense as we had no outstanding debt during the nine months ended September 30, 2012 and 2011, an increase in amortization expense due to the incremental intangible assets recorded related to the 2012 Acquisitions and an increase or decrease in depreciation expenses relating to the net impact of adjusting acquired property and equipment to the acquisition date fair value. The pro forma results of operations also include adjustments to reflect the impact of \$1.9 million of acquisition related costs as of January 1, 2011. The pro forma results do not include any adjustments to eliminate the impact of cost savings or other synergies that may result from the 2012 Acquisitions. As noted above, the pro forma results of operations do not purport to be indicative of the actual results that would have been achieved by the combined company for the periods presented or that may be achieved by the combined company in the future.

Revenue of approximately \$5.0 million and loss before income taxes of approximately \$1.8 million are included in our condensed consolidated results of operations for the three and nine months ended September 30, 2012 related to the 2012 Acquisitions following their respective dates of acquisitions.

We recognized \$1.9 million of acquisition related costs that were expensed during the three and nine months ended September 30, 2012, respectively. These acquisitions costs are included in selling and administrative expenses in our condensed consolidated statements of income for the three and nine months ended September 30, 2012.

Table of Contents**NOTE 4 DISCONTINUED OPERATIONS AND SALE OF DELTAK ASSETS**

During the third quarter of 2011, we completed the sale of the operating net assets of our Deltak business unit, which was part of the Products Division. We have reported the disposition of the Deltak business unit as discontinued operations in accordance with the guidance of ASC 205-20 *Discontinued Operations*. The following table presents selected information regarding the results of our discontinued operations:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Revenue	\$ 13	\$ 8,975	\$ 206	\$ 27,460
Income before income taxes	336	1,666	142	3,208
Income tax expense	98	1,181	31	1,228
Gain on disposal of assets		11,326		11,326
Income from discontinued operations	\$ 238	\$ 11,811	\$ 111	\$ 13,306

NOTE 5 EARNINGS PER SHARE

Basic earnings per common share is net income divided by the weighted average common shares outstanding during the period. Diluted earnings per common share is based on the weighted average common shares outstanding during the period, adjusted to include the incremental effect of common shares that would be issued upon the conversion of warrants and the vesting and release of restricted stock awards.

Basic and diluted earnings per common share are calculated as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Net Income:				
Income from continuing operations	\$ 1,308	\$ 6,656	\$ 3,163	\$ 55,684
Income from discontinued operations	238	11,811	111	13,306
Net income available to common shareholders	\$ 1,546	\$ 18,467	\$ 3,274	\$ 68,990
Basic Earnings Per Common Share:				
Weighted Average Common Shares Outstanding	17,166,293	16,138,319	16,885,205	15,876,312
Basic earnings per common share from continuing operations	\$ 0.08	\$ 0.41	\$ 0.19	\$ 3.51
Basic earnings per common share from discontinued operations	0.01	0.73		0.84
Basic earnings per common share	\$ 0.09	\$ 1.14	\$ 0.19	\$ 4.35
Diluted Earnings Per Common Share:				
Weighted Average Common Shares Outstanding	17,166,293	16,138,319	16,885,205	15,876,312
Effect of Dilutive Securities:				
Unvested portion of restricted stock awards	92,366	167,741	203,255	182,294
Warrants to purchase common stock		678,387	162,682	869,813
Weighted Average Common Shares Outstanding Assuming Dilution	17,258,659	16,984,447	17,251,142	16,928,419
Diluted earnings per common share from continuing operations	\$ 0.08	\$ 0.39	\$ 0.18	\$ 3.29

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

Diluted earnings per common share from discontinued operations	0.01	0.70	0.01	0.79
Diluted earnings per common share	\$ 0.09	\$ 1.09	\$ 0.19	\$ 4.08

During the three and nine months ended September 30, 2012, there were 73,016 and 1,125 outstanding stock equivalents, respectively, that were anti-dilutive and excluded from the computations of diluted earnings per common share. During the three and nine months ended September 30, 2011, there were no outstanding stock equivalents that were anti-dilutive and excluded from the computations of diluted earnings per common share. Excluded from the calculation of both basic and diluted earnings per common share are the unvested performance-based restricted stock awards for which performance targets had not been set by the Board of Directors of 157,042 and 236,243 as of September 30, 2012 and 2011, respectively.

Table of Contents**NOTE 6 INCOME TAXES**

The overall effective income tax rate during the three and nine months ended September 30, 2012 and 2011 was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Effective income tax rate	42.2%	11.8%	45.0%	-216.6%

The effective income tax rate differs from the statutory federal income tax rate of 35% primarily because of state and foreign income taxes and permanent differences, changes in the valuation allowance realized in 2011 and utilization of net operating loss carryforwards.

In the second quarter of 2011, we assessed our valuation allowances against deferred tax assets for intangible assets, accruals and U.S. net operating loss (NOL) carryforwards in accordance with ASC 740 *Income Taxes* (ASC 740). Management's assessment included consideration of all available positive and negative evidence including, among other evidence, the scheduled reversal of deferred tax liabilities (including the impact of available carry back and carry forward periods), recent utilization of NOL carryforwards, historical operating income, projected future taxable income, customer concentration, tight credit markets, and tax planning strategies. Based on results of the assessment, we determined that it was more likely than not that the U.S. NOL carryforwards were realizable based on the guidance provided in ASC 740. Because the U.S. NOL carryforwards were expected to be realized due to 2011 and future year's income, only the portion attributable to future year's income was released as a discrete event during the second quarter of 2011.

We recognized a non-recurring, non-cash tax benefit in the second quarter of 2011 for continuing operations of \$40.0 million related to the release of valuation allowances. Income in 2011 allowed interim period decreases to the valuation allowance of \$4.6 million for the third quarter of 2011. Additionally, we increased valuation allowances in the third quarter of 2011 by \$0.5 million for state NOL modifications.

As of September 30, 2012, we would need to generate approximately \$93.3 million of future financial taxable income to realize our deferred tax assets.

As of September 30, 2012 we provided for a liability of \$6.6 million for unrecognized tax benefits related to various federal, foreign and state income tax matters, which was included in long-term deferred tax assets and other long-term liabilities, as compared to a liability of \$5.8 million for unrecognized tax benefits as of December 31, 2011. If recognized, the entire amount of the liability would affect the effective tax rate. As of September 30, 2012, we have accrued approximately \$2.1 million in other long-term liabilities for potential payment of interest and penalties related to uncertain income tax positions.

NOTE 7 DEBT

New Credit Facility: On February 21, 2012, we entered into a new \$100 million Credit Facility (New Credit Facility) with Wells Fargo Bank, National Association, as Administrative Agent, U.S. Bank National Association, as Syndication Agent and the various lending institutions party thereto. The New Credit Facility is a multicurrency revolving credit facility with a letter of credit sublimit of \$75 million and an accordion feature not to exceed \$50 million. Proceeds of borrowings under the New Credit Facility may be used for working capital, acquisitions and general corporate purposes. As of September 30, 2012, there were no outstanding borrowings.

The interest rate on letters of credit issued under the revolving letter of credit was 1.25% per annum as of September 30, 2012. We also pay an unused line fee of 0.20%. Should we need to borrow against the revolver facility, at any time during the agreement, we would incur an interest rate of LIBOR or a Base Rate, plus in each case, an additional margin based on the Consolidated Total Leverage Ratio, as defined in the New Credit Facility agreement. The New Credit Facility agreement includes additional margin ranges on Base Rate loans between 0.25% and 1.25% and between 1.25% and 2.25% on LIBOR-based loans. As of September 30, 2012, our outstanding letters of credit under the New Credit Facility totaled approximately \$16.1 million for our U.S. entities. We also had outstanding letters of credit issued by another financial institution for our non-U.S. entities of \$13.3 million, which reduced our available capacity sublimit for letters of credit under the New Credit Facility. As of September 30, 2012, we had unused commitments of \$70.7 million on our New Credit Facility.

The New Credit Facility contains certain restrictive covenants customary for facilities of this type (subject to negotiated exceptions and baskets), including restrictions on indebtedness, liens, acquisitions and investments, restricted payments and dispositions. There are also financial covenants that require us to maintain a maximum consolidated total leverage ratio and a minimum interest coverage ratio. The New Credit Facility also provides for customary events of default, with corresponding grace periods, including failure to pay principal when due, failure to

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

pay interest within three business days after becoming due, failure to pay other obligations within five days after becoming due, failure to comply with covenants, breaches of representations and warranties, default under certain other indebtedness, certain insolvency or receivership events affecting us

Table of Contents

and our subsidiaries, the occurrence of certain material judgments, or a change in control of the Company. We have given a first priority lien on substantially all of our assets as security for the New Credit Facility. The New Credit Facility has a maturity date of February 21, 2017.

As of September 30, 2012, we were in compliance with all debt covenants. As of September 30, 2012, we had unamortized deferred financing fees on our New Credit Facility of \$0.8 million.

Previous Credit Facility: Upon entering into our New Credit Facility on February 21, 2012, we extinguished our previous \$150 million Credit Facility (Previous Credit Facility). Our Previous Credit Facility consisted of a \$60 million revolving letter of credit facility, including a \$25 million cash advance sub-facility, and a \$90 million term loan facility. On November 18, 2010, we repaid the outstanding balance of the term loan facility and all related interest in full. The Previous Credit Facility would have terminated on January 22, 2014 and any amounts outstanding at that time would have been due and payable in full, if it had not been extinguished.

On February 21, 2012, the amortization of debt financing costs pertaining to the Previous Credit Facility was accelerated, increasing the amount of interest expense recognized during the first quarter of 2012 by \$1.1 million.

NOTE 8 COMMITMENTS AND CONTINGENCIES

Asbestos Cases: A former operating unit of Global Power has been named as a defendant in a limited number of asbestos personal injury lawsuits. Neither we nor our predecessors ever mined, manufactured, produced or distributed asbestos fiber, the material that allegedly caused the injury underlying these actions. The bankruptcy court's discharge order issued upon emergence from bankruptcy extinguished the claims made by all plaintiffs who had filed asbestos claims against us before that time. We also believe the bankruptcy court's discharge order should serve as a bar against any later claim filed against us, including any of our subsidiaries, based on alleged injury from asbestos at any time before emergence from bankruptcy. In any event in all of the asbestos cases finalized post-bankruptcy, we have been successful in having such cases dismissed without liability. We intend to vigorously defend all currently active actions, just as we defended the other actions that have since been dismissed, all without liability, and we do not anticipate that any of these actions will have a material adverse effect on our financial position, results of operations or liquidity. However, the outcomes of any legal action cannot be predicted, and therefore, there can be no assurance that this will be the case.

Deltak Claims: By purchase agreement dated August 6, 2011, referred to as the 2011 Purchase Agreement, we sold the operating net assets of our Deltak business unit to Hamon & Compagnie International SA (the Buyer). Under the 2011 Purchase Agreement, we retained certain liabilities relating to the operating net assets sold to the Buyer. We have received three claims for indemnification from the Buyer in connection with the activities of our Deltak business unit. Generally, complaints allege losses from excluded liabilities and breach of warranty relating to one of our wholly owned subsidiaries. The claims asserted for each matter is \$0.1 million, \$7.1 million and an unspecified amount. We intend to defend these matters vigorously and believe the claims are without merit. However, we cannot predict with certainty the outcome or effect of any of these matters. There can be no assurance as to the ultimate outcome of these claims.

As of September 30, 2012, we did not record any provision for these matters as we do not believe a loss is probable related to the above claims. Further a reasonable estimate of a possible range of loss cannot be made. In the event that one or more of these matters is unfavorably resolved, it is possible our results from discontinued operations and cash flows could be materially impacted.

The 2011 Purchase Agreement required the establishment of escrow accounts totaling \$7.0 million as a funding mechanism for settlement of warranty claims and other possible contractual claims. As of September 30, 2012, the escrow balances were recorded in the accompanying consolidated balance sheet as short-term restricted cash of \$3.1 million and long-term restricted cash, included in other assets, of \$3.9 million. The short-term restricted cash that was due for release on August 31, 2012, remains in escrow due to the unresolved claims made by the Buyer described above and the Buyer's corresponding determination not to release such cash.

Litigation: We are involved from time to time in legal actions that arise in the ordinary course of our business. We do not believe that the resolution of any currently pending actions, either individually or in the aggregate, is reasonably likely to have a material adverse effect on our financial position, results of operations or liquidity. However, the outcomes of any legal actions cannot be predicted, and therefore, there can be no assurance that this will be the case.

NOTE 9 STOCKHOLDERS EQUITY

Warrants: On January 22, 2008, we issued warrants to purchase 1,807,236 shares of common stock with an exercise price of \$7.9254. The warrants vested immediately upon issuance. During the nine months ended September 30, 2012, warrants were exercised to purchase 730,282 shares of common stock. The stock was issued in a cashless transaction whereby we withheld 209,451 shares of common stock as payment of

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

the exercised purchase warrants during the nine months ended September 30, 2012. As of September 30, 2012, all issued warrants have been exercised.

Table of Contents

Foreign Currency Translation: Foreign assets and liabilities are translated using the exchange rate in effect at the balance sheet date, and results of operations are translated using an average rate during the period. Translation adjustments are accumulated and reported as a component of accumulated other comprehensive income. The amount of accumulated comprehensive income related to foreign currency translation was an unrealized gain of \$0.3 million during the nine months ended September 30, 2012.

Stock-Based Compensation: We granted 267,192 shares of restricted stock awards to employees and directors during the nine months ended September 30, 2012 at a weighted-average fair value price per share of \$26.86. These restricted stock awards include 110,587 time-based shares that will vest ratably over four years and 156,605 performance-based shares that will vest in one year. During the nine months ended September 30, 2012, we vested 409,049 shares of stock-based compensation to employees and directors. Included in the shares vested in the nine months ended September 30, 2012 were 33,373 restricted stock awards that vested in accordance with the retirement agreement of our former Chief Executive Officer.

For all awards with graded vesting other than awards with performance-based vesting conditions, we record compensation expense for the entire award on a straight-line basis (or if, applicable, on the accelerated method) over the requisite service period. For graded-vesting awards with performance-based vesting conditions, total compensation expense is recognized over the requisite service period for each separately vesting tranche of the award as if the award is, in substance, multiple awards once certain performance targets are deemed probable of achievement. The 2012 restricted stock performance units that will vest in 2013 are subject to multiple target levels in order to be eligible to vest. If the minimum target set in the agreement is not met, none of the shares will vest and no compensation expense is recognized and any previously recognized compensation expense is reversed. The actual number of shares that will ultimately vest is dependent on achieving fixed thresholds between the minimum and target performance condition and ranges between 0.5x and 1.0x the number of units originally granted. During the third quarter of 2012, we determined that it was not probable that we would achieve the performance objective for 68,815 of our 137,626 performance-based shares remaining to vest as of September 30, 2012. As a result, we recorded a \$0.9 million cumulative effect compensation expense reversal in the third quarter of 2012.

Dividends: In May 2012, our Board of Directors approved a quarterly cash dividend policy. The dividends declared during each of the second and third quarters of 2012 were \$0.09 per share and dividends paid totaled \$1.5 million in each of the second and third quarters of 2012, respectively. Third quarter dividends were paid on September 28, 2012. Dividend equivalents equal to the dividends payable on the same number of shares of our common stock were accrued on unvested restricted stock awards on each of the second and third quarter dividend record dates. No dividend equivalents are paid on any of these restricted stock awards that are forfeited prior to the vesting date. Dividend equivalents are paid out in cash at the vesting date on restricted stock awards. A non-cash accrual of \$0.1 million for unpaid dividend equivalents for unvested restricted stock awards was included in the accompanying condensed consolidated balance sheet as of September 30, 2012.

Stock Repurchase Program: In May 2012, our Board of Directors authorized a program to repurchase up to two million shares of our common stock until the earlier of June 30, 2014 or a determination by the Board of Directors to discontinue the repurchase program. We repurchased 35,801 shares of common stock during the nine months ended September 30, 2012 for \$0.7 million under the repurchase program.

Table of Contents**NOTE 10 SUPPLEMENTAL CASH FLOW INFORMATION**

Supplemental cash flow disclosures are as follows:

All others	27%	45%	37%	40%
Total	100%	100%	100%	100%

* Less than 10% of revenue included in All others above

Customers for the Products Division include original equipment manufacturers, engineering, procurement and construction contractors and operators of power generation facilities. Products Division customers include Siemens Energy, Inc. and General Electric Company. Customers for the Services Division are varied, but include some major utility companies within the U.S. Services Division customers include Southern Nuclear Operating Company, Tennessee Valley Authority, and Florida Power & Light Company. Our major customers vary over time due to the relative size and duration of our projects and customer outages.

Table of Contents**NOTE 12 SEGMENT INFORMATION**

We follow ASC 280 *Segment Reporting*, to present segment information. We considered the way our management team makes operating decisions and assesses performance and considered which components of our enterprise have discrete financial information available. As management makes decisions using a products and services group focus, our analysis resulted in two reportable segments, the Products Division and the Services Division. The financial results of the Koontz-Wagner and TOG acquisitions have been included in our Products Division as of their respective acquisition dates.

The following tables present information about segment income:

	Products Division		Services Division		Total	
	Three Months Ended		Three Months Ended		Three Months Ended	
	September 30,		September 30,		September 30,	
	2012	2011	2012	2011	2012	2011
Revenue	\$ 47,995	\$ 36,700	\$ 63,501	\$ 62,526	\$ 111,496	\$ 99,226
Depreciation and amortization	841	236	125	99	966	335
Operating (loss) income	(977)	3,653	3,502	4,039	2,525	7,692

	Products Division		Services Division		Total	
	Nine Months Ended		Nine Months Ended		Nine Months Ended	
	September 30,		September 30,		September 30,	
	2012	2011	2012	2011	2012	2011
Revenue	\$ 113,681	\$ 111,641	\$ 196,955	\$ 230,196	\$ 310,636	\$ 341,837
Depreciation and amortization	1,490	857	381	792	1,871	1,649
Operating (loss) income	(580)	6,206	7,853	12,041	7,273	18,247

The following table presents information, which reconciles segment information to consolidated total assets:

	As of	As of
	September 30,	December 31,
	2012	2011
Assets:		
Products	\$ 196,727	\$ 116,557
Services	97,605	78,652
Non allocated corporate assets	38,917	120,941
Total consolidated assets	\$ 333,249	\$ 316,150

Corporate assets consist primarily of cash and deferred tax assets.

Table of Contents

The following presents the Products Division revenue by geographical region based on our operating locations. Products are often shipped to other geographical areas but revenue is listed in the region in which the revenue is recognized. The geographic dispersion of where products were shipped during the nine months ended September 30, 2011 was updated primarily for reclassifications of discounts and was not material.

	Three Months Ended September 30,			
	2012		2011

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations.*
Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q (this Form 10-Q) contains or incorporates by reference various forward-looking statements that express a belief, expectation or intention or are otherwise not statements of historical fact. Forward-looking statements generally use forward-looking words, such as may, will, could, project, believe, anticipate, expect, estimate, continue, potential, plan, forecast and other words that indicate uncertainty of future events or outcomes. Forward-looking statements include information concerning possible or assumed future results of our operations, including the following:

business strategies;

operating and growth initiatives and opportunities;

competitive position;

market outlook and trends in our industry;

contract backlog and related amounts to be recognized as revenue;

expected financial condition;

future cash flows;

financing plans;

expected results of operations;

future capital and other expenditures;

availability of raw materials and inventories;

plans and objectives of management;

future exposure to currency devaluations or exchange rate fluctuations;

future income tax payments and utilization of net operating losses and foreign tax credit carryforwards;

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

future compliance with orders and agreements with regulatory agencies;

the effectiveness of our disclosure controls and procedures;

expected outcomes of legal or regulatory proceedings and their expected effects on our results of operations; and

any other statements regarding future growth, future cash needs, future operations, business plans and future financial results.

These forward-looking statements represent our intentions, plans, expectations, assumptions and beliefs about future events and are subject to risks, uncertainties and other factors, including unpredictable or unanticipated factors that we have not discussed in this Form 10-Q. Many of those factors are outside of our control and could cause actual results to differ materially from the results expressed or implied by the forward-looking statements.

In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than we have described. You should consider the areas of risk and uncertainty described above, as well as those discussed in our Annual Report on Form 10-K (the "Form 10-K"), filed with the Securities and Exchange Commission ("SEC") on March 14, 2012, titled *Risk Factors* and those discussed under Item 1A Risk Factors in this Quarterly Report on Form 10-Q. Except as may be required by applicable law, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise and we caution you not to rely upon them unduly.

The following discussion provides an analysis of the results of operations for each of our business segments, an overview of our liquidity and capital resources and other items related to our business. This discussion and analysis should be read in conjunction with our condensed consolidated financial statements and notes thereto included in this Form 10-Q and our audited consolidated financial statements and notes thereto included in the Form 10-K.

Table of Contents

Overview

We are a comprehensive provider of power generation equipment and modification and maintenance services for customers in the domestic and international energy, power infrastructure and service industries. We operate through two business segments, which we refer to as our Products Division and our Services Division.

Through our Products Division, we design, engineer and manufacture a comprehensive range of gas turbine auxiliary equipment and control houses primarily used to enhance the efficiency and facilitate the operation of gas turbine power plants as well as for other industrial, energy and power-related applications.

Through our Services Division, we provide on-site specialty modification and maintenance, outage management and facility upgrade services for nuclear power plants and specialty maintenance and other industrial services to fossil-fuel and hydroelectric power plants and other industrial operations in the United States (U.S.).

For information about our segments, see Note 12 to our condensed consolidated financial statements included in this Form 10-Q.

In both our segments, our operations are based on discrete projects subject to contract awards of varying scopes and values. Business volume fluctuates due to many factors, including the mix of work and project schedules, which are dependent on the level and timing of customer releases of new projects. Significant fluctuations may occur from period to period in revenue, gross profit and operating results and are discussed below.

2012 Acquisitions

On July 30, 2012, we acquired Koontz-Wagner Custom Controls Holdings LLC (Koontz-Wagner), a leading manufacturer and integrator of engineered packaged control house solutions for the energy, oil & gas, and electrical industries. The aggregate acquisition price consisted of \$32.4 million in cash, of which \$31.6 million was paid in the third quarter 2012 and \$0.8 million was paid in the fourth quarter 2012. On September 5, 2012, we acquired TOG Holdings, Inc., together with its subsidiary, TOG Manufacturing Corporation (TOG), a precision machined metal and alloy parts provider to original equipment manufacturers for the steam and natural gas turbine power generation market. We paid \$12.6 million and expect to receive \$0.3 million in the fourth quarter of 2012 attributable to a working capital adjustment. Additionally, the TOG net assets acquired included \$0.1 million of cash.

The addition of Koontz-Wagner's engineered packaged control house solutions will expand our products portfolio to our current customers, and supports the global expansion into adjacent infrastructure products and services. The acquisition of TOG complements our Consolidated Fabricators parts product line and establishes a growth platform for aftermarket energy parts sales and also expands our products portfolio to serve the steam turbine segment. The repair and replacement parts business provides a relatively stable revenue stream.

We funded the purchase price of the Koontz-Wagner acquisition and the TOG acquisition (together, the 2012 Acquisitions) with cash on hand. The financial results of the 2012 Acquisitions have been included in our Products Division as of their respective acquisition dates.

Dividend and Stock Repurchases

In May 2012, our Board of Directors approved a dividend policy pursuant to which it plans to make, subject to subsequent declaration, quarterly dividends. The dividends declared during each of the second and third quarters of 2012 were \$0.09 per share and dividends paid totaled \$1.5 million in each of the second and third quarters of 2012.

Additionally, in May 2012, our Board of Directors authorized a program to repurchase up to two million shares of our common stock. During the nine months ended September 30, 2012, we repurchased 35,801 shares of common stock for \$0.7 million under the repurchase program.

Table of Contents

New Credit Facility

On February 21, 2012, we extinguished our previous \$150 million Credit Facility (*Previous Credit Facility*) and entered into a new \$100 million Credit Facility (*New Credit Facility*). The New Credit Facility allows for borrowings up to \$100 million, with an accordion feature for up to \$50 million of additional borrowing capacity. The facility has a letter of credit sublimit of \$75 million and provides access to multi-currency funds. The New Credit Facility has a maturity date of February 21, 2017.

Sale of Deltak Assets

On August 31, 2011, we sold substantially all of the operating assets of our Deltak LLC (*Deltak*) business unit, which was part of our Products Division, for \$31.0 million in cash, less a \$4.9 million working capital adjustment. We have reclassified the historical results of operations of our Deltak business unit to discontinued operations for all periods presented. Unless noted otherwise, the discussion and analysis that follows relates to our continuing operations only.

Business Outlook

Products:

Year-to-date operating results for our Products Division reflect higher shipment volumes compared to the prior year period primarily due to increased activity in the Middle East and the U.S. and incremental results associated with the 2012 Acquisitions. Proposal and bid activity for near-term original equipment manufacturer (*OEM*) projects declined during the third quarter of 2012 and indicated potential uncertainties in the market for product deliveries in the second half of 2013.

Our overall long-term outlook remains positive as demand increases for global power generation capacity additions, but has been affected by short-term headwinds resulting from continued macro-economic uncertainties and a slowing recovery in certain geographic markets. Natural gas power generation remains a less expensive and a lower emission alternative to coal-fired power generation, and we are in a strong position to take advantage of this once a sustainable recovery takes hold. Gross margins realized during the nine months ended September 30, 2012 were weaker than in 2011, primarily due to additional costs incurred for customer requirements on discrete projects that shipped in the third quarter. The higher costs are expected to be limited to these discrete projects.

In the third quarter of 2012, we also expanded our OEM offerings with the acquisition of Koontz-Wagner and our repair and replacement parts product line with the acquisition of TOG.

Services:

Within our Services Division, year-to-date revenue is lower primarily due to a reduction in refueling outage work at nuclear power plants in the nine months ended September 30, 2012 as compared to the nine months ended September 30, 2011 and the expiration of a contract during 2011. The impact of the year-over-year revenue declines has been partially offset by increased scope related to our participation on new build and re-start nuclear project sites in the U.S. Also, capital spending constraints and deferred maintenance requirements in response to lower electricity demand and a mild 2011 winter have negatively impacted revenue as some of our customers have reduced the scope of elective maintenance projects. Although we believe we have maintained market share during this period, we continue to see full scope engineering, procurement and construction firms and other niche companies seeking to expand into nuclear modification and maintenance services.

The U.S. Nuclear Regulatory Commission (*NRC*) has issued preliminary guidance related to certain modifications on the U.S. nuclear fleet, but the timing and scope of such modifications remain uncertain as U.S. utilities evaluate how these preliminary guidelines will apply to their nuclear sites. We do not anticipate earnings in 2012 from contract opportunities that may result from this guidance, but do anticipate some projects to materialize by the second half of 2013. Our margins realized during the nine months ended September 30, 2012 have improved from 2011 due to operational execution and efficient project management on capital projects.

Backlog:

Our backlog consists of firm orders or blanket authorizations from our customers. Backlog may vary significantly from reporting period to reporting period due to the timing of customer commitments. The time between receipt of an order and actual completion, or delivery, of our products varies from a few weeks, in the case of inventoried precision parts, to a year or more, in the case of custom designed gas turbine auxiliary and control house equipment and other major plant components. We add a booking to our backlog for Products Division orders when we receive a purchase order or other written contractual commitment from a customer. The maintenance services we provide through our

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

Services Division are typically carried out under long-term contracts spanning several years. Upon signing a multi-year maintenance contract with a customer for services, we add to our backlog only the first twelve months of work that we expect to perform under the contract. Additional work that is not identified under the original contract is added to our backlog when we reach an agreement with the customer as to the scope and pricing of

Table of Contents

that additional work. Capital project awards are typically defined in terms of scope and pricing at the time of contractual commitment from the customer. Upon receipt of a customer commitment, capital project bookings are added to our backlog at full contract value regardless of the time frame anticipated to complete the project. Capital project bookings are removed from our backlog as work is performed and revenue is recognized, or until cancellation.

Backlog is not a measure defined by generally accepted accounting principles in the U.S., and our methodology for determining backlog may vary from the methodology used by other companies in determining their backlog amounts. Backlog may not be indicative of future operating results and projects in our backlog may be cancelled, modified or otherwise altered by our customers.

The following table shows our backlog, by division, as of the end of each of the last five quarters (\$ in thousands):

	September 30, 2012	June 30, 2012	March 31, 2012	December 31, 2011	September 30, 2011
Products Backlog	\$ 152,385	\$ 136,058	\$ 135,355	\$ 130,614	\$ 126,198
Services Backlog	301,916	266,451	199,412	213,433	213,647
Total	\$ 454,301	\$ 402,509	\$ 334,767	\$ 344,047	\$ 339,845

Our Products Division backlog as of September 30, 2012 increased by \$16.3 million from June 30, 2012 and increased by \$26.2 million from September 30, 2011. We acquired approximately \$24.0 million of this backlog through our 2012 Acquisitions. Excluding the 2012 Acquisitions, Products Division backlog decreased by \$7.6 million from June 30, 2012. This decrease was primarily driven by quarterly shipments outpacing new orders. While we remain optimistic about future prospects for new natural gas-fired generation projects, quote and booking activity remains slower than the first half of 2012. Bookings for the quarter were heavily concentrated on projects destined for U.S. and Middle East projects. The Middle East remains active and bookings destined for U.S. projects increased during the third quarter of 2012. Booking from projects destined for Asia have returned to 2011 levels during the third quarter of 2012. Excluding the effects of the 2012 Acquisitions, the ratio of orders booked to orders shipped was 0.8-to-1 during the three months ended September 30, 2012 and 1.0-to-1 during the nine months ended September 30, 2012.

Our Services Division backlog as of September 30, 2012 increased by \$35.5 million from June 30, 2012 and \$88.3 million from September 30, 2011. The increase in backlog from June 30, 2012 was primarily due to scope expansion on multi-year new build and re-start nuclear project sites. The build in backlog from new project bookings more than offset the impact of lower backlog from our core maintenance and modification services due to customer budget constraints. Of the \$301.9 million in backlog as of September 30, 2012, we expect an estimated \$40.4 million to convert to revenue beyond 2013. The ratio of project awards added to backlog to services rendered was 1.6-to-1 during the three months ended September 30, 2012 and 1.5-to-1 during the nine months ended September 30, 2012.

Table of Contents**Results of Operations**

Our summary financial results during the three and nine months ended September 30, 2012 and 2011 were as follows (\$ in thousands):

	Three Months Ended September 30,		Variance		Nine Months Ended September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%

Products Revenue.

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

The composition of our Products Division revenue varies from period to period based on our product mix, the strength of various geographic markets we serve and our ability to address those markets. The geographic dispersion of where products were shipped during the three and nine months ended September 30, 2012 and 2011 was as follows (\$ in thousands):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012	2011	Variance		2012	2011	Variance	
			\$	%			\$	%
United States	\$ 14,598	\$ 8,619	\$ 5,979	69.4%	\$ 31,417	\$ 25,670	\$ 5,747	22.4%
Canada	958	91	867	952.7%	2,397	5,766	(3,369)	-58.4%
Europe	3,111	1,587	1,524	96.0%	7,086	5,085	2,001	39.4%
Mexico	611	64	547	854.7%	4,357	3,611	746	20.7%
Asia	3,451	7,525	(4,074)	-54.1%	6,935	13,647	(6,712)	-49.2%
Middle East	22,673	11,866	10,807	91.1%	52,272	43,612	8,660	19.9%
South America	819	550	269	48.9%	6,559	7,560	(1,001)	-13.2%
Other	1,774	6,398	(4,624)	-72.3%	2,658	6,690	(4,032)	-60.3%
Total	\$ 47,995	\$ 36,700	\$ 11,295	30.8%	\$ 113,681	\$ 111,641	\$ 2,040	1.8%

The \$11.3 million or 30.8% increase in Products Division revenue during the three months ended September 30, 2012, compared to the corresponding period in 2011, was primarily due to shipping of customer delayed shipments from the second quarter and incremental revenue of \$5.0 million associated with the 2012 Acquisitions as compared to the three months ended September 30, 2011. During the three months ended September 30, 2012, \$15.6 million of the \$16.9 million of project shipments delayed in the second quarter of 2012 were shipped in the third quarter of 2012. Including the 2012 Acquisitions, project delivery dates that were delayed as of September 30, 2012 totaled approximately \$12.2 million.

Table of Contents

Project delivery dates often change after a project is added to our backlog due to project site logistics or customer driven change orders among other reasons including transportation logistics. Our revenue during the three months ended September 30, 2012 was concentrated in the Middle East as our backlog was concentrated with orders destined for Middle East projects as of June 30, 2012.

The \$2.0 million or 1.8% increase in Products Division revenue during the nine months ended September 30, 2012, compared to the corresponding period in 2011, was primarily due to incremental revenue of \$5.0 million associated with the 2012 Acquisitions as compared to the nine months ended September 30, 2011. Negatively impacting current year revenue were delays in shipments of projects. Including the 2012 Acquisitions, project delivery dates that were delayed as of September 30, 2012 totaled approximately \$12.2 million.

Services Revenue.

The composition of our Services Division revenue varies from period to period based on contract mix (cost plus versus fixed price and capital versus maintenance) and the number and scope of outages under our evergreen maintenance contracts.

The increase in Services Division revenue of \$1.0 million or 1.6% during the three months ended September 30, 2012, compared to the corresponding period in 2011, resulted primarily from \$13.5 million from new capital project work and \$3.4 million from construction support work at new build and re-start nuclear reactor sites. This increase was largely offset by a reduction of \$15.9 million due to the deferral of maintenance services and capital budget reductions by existing customers in response to lower electricity demand.

The decrease in Services Division revenue of \$33.2 million or 14.4% during the nine months ended September 30, 2012, compared to the corresponding period in 2011, resulted from an approximate \$17.3 million in net revenue reduction from outage work in the nine months ended September 30, 2011 as compared to the same period in 2011. The decline in outage work is primarily related to decreases in scope due to customer spending constraints. In addition, \$27.5 million of the lower revenue was attributable to work performed in the prior year under a contract that has since expired. The impact of these volume reductions was partially offset by approximately \$13.8 million from construction support work at new build and re-start nuclear reactor sites.

Gross Profit / Margin %

(\$ in thousands)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012	2011	Variance		2012	2011	Variance	
			\$	%			\$	%
Gross Profit - Products	\$ 8,799	\$ 9,228	\$ (429)	-4.6%	\$ 23,039	\$ 23,991	\$ (952)	-4.0%
<i>Gross Margin %</i>	18.3%	25.1%			20.3%	21.5%		
Gross Profit - Services	\$ 9,330	\$ 9,977	\$ (647)	-6.5%	\$ 28,574	\$ 30,334	\$ (1,760)	-5.8%
<i>Gross Margin %</i>	14.7%	16.0%			14.5%	13.2%		
Total Gross Profit	\$ 18,129	\$ 19,205	\$ (1,076)	-5.6%	\$ 51,613	\$ 54,325	\$ (2,712)	-5.0%
<i>Gross Margin %</i>	16.3%	19.4%			16.6%	15.9%		

Products.

The decrease in Products Division gross profit during the three months ended September 30, 2012 of \$0.4 million compared to the corresponding periods in 2011, was the result of decreases in realized gross margin percentage. The impact of the decrease in gross margin percentage of \$3.3 million was primarily due to additional costs incurred for customer requirements on discrete projects and products that shipped during the quarter at lower margins in 2012 as compared to shipments in the corresponding period in 2011, which resulted in lower gross profit. Included in the gross margin percentage decrease were warranty costs of \$0.9 million and unfavorable absorption related to expansion for our parts manufacturing capacity. The effects of the gross margin percentage decreases were partially offset by current quarter revenue increases as described above. Excluding the effects of the 2012 Acquisitions, the impact of the higher volumes on gross profit during the three months ended September 30, 2012 as compared to the corresponding period in 2011 was approximately \$1.6 million.

The decrease in Products Division gross profit during the nine months ended September 30, 2012 of \$1.0 million compared to the corresponding periods in 2011, was primarily due to decreases in realized gross margin percentage. Contributing to the decrease in gross margin percentage were warranty costs of \$1.5 million and unfavorable absorption related to expansion for our parts manufacturing capacity. The effects of the

gross margin decreases were partially offset by current year revenue increases associated with the 2012 Acquisitions.

Table of Contents*Services.*

The decrease in Services Division gross profit during the three months ended September 30, 2012 of \$0.6 million compared to the corresponding period in 2011, was primarily due to decreases in realized gross margin percentage primarily due to \$1.4 million of increased costs on a fixed price contract which was partially offset by a \$1.1 million favorable insurance retention reserve adjustment based on an updated actuarial estimate due to continued improvements in our safety record as well as higher margin rates on new capital project work.

The decrease in Services Division gross profit during the nine months ended September 30, 2012 of \$1.8 million compared to the corresponding period in 2011, was primarily due to decreases in revenue, which impacted gross profit dollars by approximately \$4.4 million and \$1.4 million of increased costs on a fixed price contract. The effect of the volume reduction and increased costs was partially offset by an increase in gross margin percentage primarily due to improved operational execution, efficient project management on capital projects in 2012 and a \$1.1 million favorable insurance retention reserve adjustment based on an updated actuarial estimate due to continued improvements in our safety record.

Selling and Administrative Expenses

(\$ in thousands)	Three Months Ended				Nine Months Ended			
	September 30,		Variance		September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%
Selling and administrative expenses	\$ 15,604	\$ 11,493	\$ 4,111	35.8%	\$ 44,340	\$ 36,063	\$ 8,277	23.0%

Consolidated selling and administrative expenses include the costs associated with conducting our business, including general management, compensation and benefits of employees that are not direct costs of active projects, officers and directors, legal and professional fees and other general expenses.

Consolidated selling and administrative expenses increased by \$4.1 million during the three months ended September 30, 2012 as compared to the corresponding period in 2011. This increase was impacted by \$1.9 million in transaction costs related to the 2012 Acquisitions and \$0.8 million in incremental expenses associated with the acquired companies, including \$0.4 million of intangible amortization expense. In addition, selling and administrative expenses during the third quarter of 2011 were favorably impacted by \$0.8 million of legal and professional fees considered part of discontinued operations. The remaining increases in selling and administrative costs were primarily due to expanded business development efforts and integration costs associated with the 2012 Acquisitions. These increases were partially offset by \$1.1 million of reduced stock compensation expense primarily for performance awards no longer deemed probable to vest and the acceleration of expense in the second quarter of 2012 effectively lowering third quarter 2012 expense.

Consolidated selling and administrative expenses increased by \$8.3 million during the nine months ended September 30, 2012 as compared to the corresponding period in 2011. The increase was primarily due to \$1.9 million in transactions costs along with \$0.8 million in incremental expenses associated with the 2012 Acquisitions, including \$0.4 million of intangible amortization expense. Also impacting the increase was \$1.0 million in expenses related to CEO transition costs as well as a \$1.2 million increase in legal and professional fees for mergers and acquisition work, tax compliance, integration of acquired businesses and other projects. Additionally, we incurred \$0.8 million related to the Enterprise Resource Planning (ERP) system implementation and \$0.5 million of organic growth initiatives within our Products Division. Higher wages and benefits for the effect of a full nine months of a fully staffed corporate management team and separate facility cost also contributed to the increase in 2012.

Table of Contents**Operating Income (Loss)**

(\$ in thousands)	Three Months Ended				Nine Months Ended			
	September 30,		Variance		September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%
Operating (Loss) Income - Products	\$ (977)	\$ 3,653	\$ (4,630)	-126.7%	\$ (580)	\$ 6,206	\$ (6,786)	-109.3%
Operating Income - Services	3,502	4,039	(537)	-13.3%	7,853	12,041	(4,188)	-34.8%
Total	\$ 2,525	\$ 7,692	\$ (5,167)	-67.2%	\$ 7,273	\$ 18,247	\$ (10,974)	-60.1%

Operating income is the resulting sum of our gross profit less selling and administrative expenses. All selling and administrative expenses incurred at the corporate level are systematically charged to the reportable segments consistent with our segment disclosures.

Products.

Products Division operating loss of \$1.0 million during the three months ended September 30, 2012 decreased \$4.6 million or 126.7% compared to operating income of \$3.6 million during the corresponding period in 2011. Operating margins were negative 2.0% and positive 10.0% during the three months ended September 30, 2012 and 2011, respectively. The decrease was primarily due to \$1.9 million of transactions costs from the 2012 Acquisitions accounted for in the Products Division. Also impacting the decrease was higher costs incurred for customer requirements on discrete projects and products that shipped during the quarter at lower margins in 2012 as compared to shipments in the corresponding period in 2011 as well as additional expenses related to the ERP system implementation incurred during the three months ended September 30, 2012. Additionally, allocation to the Products Division of its proportionate share of corporate selling and administrative expenses increased by approximately \$0.9 million.

Products Division operating loss of \$0.6 million during the nine months ended September 30, 2012 decreased \$6.8 million or 109.3% compared to operating income of \$6.2 million during the corresponding period in 2011. Operating margins were negative 0.5% and positive 5.6% during the nine months ended September 30, 2012 and 2011, respectively. The decrease was primarily due to \$1.9 million of transactions costs from the 2012 Acquisitions accounted for in the Products Division. Also impacting the decrease was higher costs incurred for customer requirements on discrete projects and products that shipped during the quarter at lower margins in 2012 as compared to shipments in the corresponding period in 2011 as well as additional expenses related to the ERP system implementation incurred during the three months ended September 30, 2012. Additionally, allocation to the Products Division of its proportionate share of corporate selling and administrative expenses increased by approximately \$0.8 million, which was driven by higher corporate costs impacted by CEO transition costs and higher mergers and acquisitions fees and expenses.

Services.

Services Division operating income of \$3.5 million during the three months ended September 30, 2012 decreased \$0.5 million or 13.1% compared to operating income of \$4.0 million during the corresponding period in 2011. Operating margins were 5.5% and 6.5% during the three months ended September 30, 2012 and 2011, respectively. The decrease was primarily due to reduced gross profit of \$0.6 million as discussed above. Additionally, allocation to the Services Division of its proportionate share of corporate selling and administrative expenses increased by approximately \$0.5 million.

Services Division operating income of \$7.9 million during the nine months ended September 30, 2012 decreased \$4.2 million or 34.7% compared to operating income of \$12.0 million during the corresponding period in 2011. Operating margins were 4.0% and 5.2% during the nine months ended September 30, 2012 and 2011, respectively. The decrease was primarily due to reduced gross profit of \$1.8 million stemming primarily from declining plant outage work including the impact of a contract expiration. Additionally, allocation to the Services Division of its proportionate share of corporate selling and administrative expenses increased by approximately \$2.2 million, which was driven by higher corporate costs impacted by CEO transition costs and higher mergers and acquisitions fees and expenses.

Interest Expense, net

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

(\$ in thousands)	Three Months Ended				Nine Months Ended			
	September 30,		Variance		September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%
Interest expense, net	\$ 94	\$ 270	\$ (176)	-65.2%	\$ 1,365	\$ 844	\$ 521	61.7%

Interest expense, net consists of interest on outstanding letters of credit, interest on our unused commitment and amortization of debt issuance costs offset by interest income earned on cash balances.

Table of Contents

Interest expense, net decreased \$0.2 million or 65.2% during the three months ended September 30, 2012, compared to the corresponding period in 2011. The decrease was due to a \$0.1 million reduction in amortization of debt issuance costs and lower rates on our unused commitments and outstanding letters of credit.

Interest expense, net increased \$0.5 million or 61.7% during the nine months ended September 30, 2012, compared to the corresponding period in 2011. The increase was primarily attributable to extinguishing our Previous Credit Facility, resulting in a \$1.1 million charge to write-off the remaining portion of unamortized debt issuance costs. The increase was partially offset by \$0.3 million in reduced amortization of debt issuance costs as well as lower interest expense of \$0.2 million during 2012 due to lower rates on our unused commitments and outstanding letters of credit.

Other Expense (Income), net

(\$ in thousands)	Three Months Ended				Nine Months Ended			
	September 30,		Variance		September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%
Other expense (income), net	\$ 169	\$ (121)	\$ 290	-239.7%	\$ 162	\$ (183)	\$ 345	-188.5%

The increase in other expense, net during the three and nine months ended September 30, 2012 compared to the corresponding periods in 2011, was primarily due to the impact of remeasuring U.S. dollars held in Europe to the functional Euro currency. We did not have a U.S. dollar cash balance in Europe during 2011.

Income Tax Expense (Benefit)

(\$ in thousands)	Three Months Ended				Nine Months Ended			
	September 30,		Variance		September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%
Income tax expense (benefit)	\$ 954	\$ 887	\$ 67	7.6%	\$ 2,583	\$ (38,098)	\$ 40,681	-106.8%

Income tax expense for interim periods is based on estimates of the effective tax rate during the entire fiscal year. The effective income tax rate is based upon the estimated income during the year, the estimated composition of the income in different jurisdictions and discrete adjustments, if any, in the applicable quarterly periods for settlements of tax audits or assessments and the resolution or identification of tax position uncertainties.

During the three months ended September 30, 2012, our income tax provision for continuing operations was \$1.0 million, or 42.2% of pre-tax income, compared to \$0.9 million, or 11.8% of pre-tax income, in the corresponding period for 2011. The increase in our effective tax rate was primarily due to 2011 valuation allowance releases that removed the majority of valuation allowances related to U.S. federal and state net operating loss carryforwards partially offset by low income during the third quarter. The effective tax rate in 2012 differs from the statutory rate due to U.S. state income taxes, non-deductible expenses and other permanent differences.

During the nine months ended September 30, 2012, our income tax provision for continuing operations was \$2.6 million, or 45.0% of pre-tax income, compared to an income tax benefit of \$38.1 million, or -216.6% of pre-tax income, in the corresponding period for 2011. The increase in our effective tax rate was primarily due to 2011 valuation allowance releases that removed the majority of valuation allowances related to U.S. federal and state net operating loss carryforwards partially offset by low income during the nine months ended September 30, 2012. The effective tax rate in 2012 differs from the statutory rate due to U.S. state income taxes, non-deductible expenses and other permanent differences.

In the third quarter of 2011, we assessed our valuation allowances against deferred tax assets for intangible assets, accruals and U.S. net operating loss (NOL) carryforwards in accordance with Accounting Standards Codification 740 *Income Taxes* (ASC 740). Management's assessment included consideration of all available positive and negative evidence including, among other evidence, the scheduled reversal of deferred tax liabilities (including the impact of available carry back and carry forward periods), recent utilization of NOL carryforwards, historical operating income, projected future taxable income, customer concentration, tight credit markets, and tax planning strategies. Based on results of the assessment, we determined that it was more likely than not that the U.S. NOL carryforwards were realizable based on the guidance provided in ASC 740. Because the U.S. NOL carryforwards are expected to be realized due to current year and future year's income, only the

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

portion attributable to future year's income was released as a discrete event during the third quarter of 2011. We recognized a non-recurring, non-cash tax benefit in the second quarter of 2011 for continuing operations of \$40.0 million related to the release of valuation allowances as of September 30, 2011. Additionally, we increased valuation allowances in the third quarter of 2011 by \$0.5 million for state NOL modifications.

As of September 30, 2012, we would need to generate approximately \$93.3 million of future financial taxable income to realize our deferred tax assets.

Table of Contents**Income from Discontinued Operations**

(\$ in thousands)	Three Months Ended				Nine Months Ended			
	September 30,		Variance		September 30,		Variance	
	2012	2011	\$	%	2012	2011	\$	%
Income from discontinued operations	\$ 238	\$ 11,811	\$(11,573)	-98.4%	\$ 111	\$ 13,306	\$(13,195)	-99.5%

Income from discontinued operations during the three and nine months ended September 30, 2012 and 2011 were fully comprised of the Deltak business unit, divested on August 31, 2011. Income from discontinued operations in 2012 consisted primarily of the expiration of warranty periods partially offset by costs incurred on the winddown of in-process contracts and legal and professional fee expenses.

Liquidity and Capital Resources*Overview*

As of September 30, 2012, our unrestricted cash and cash equivalents totaled \$33.7 million, comprised of \$8.0 million of U.S. cash and \$25.7 million of non-U.S. cash. The decrease in unrestricted cash and cash equivalents of approximately \$65.8 million from December 31, 2011, was impacted by the \$44.1 million of cash used to fund the 2012 Acquisitions. In addition to the cash used in investing activities, our cash used in operating activities was \$10.6 million, which was negatively affected by delayed shipping and billing on Products Division projects. Furthermore, we distributed \$3.1 million of cash on dividends and \$0.7 million on share repurchases. In addition to our unrestricted cash and cash equivalents, the amount available under our New Credit Facility was \$70.7 million.

Cash generated by operations and borrowings available under our New Credit Facility represent our primary sources of short-term liquidity. We believe our existing cash and cash equivalents, cash flow from operations and our available borrowings will be adequate to satisfy our working capital needs, general corporate purposes, capital expenditures, interest payments on our unused borrowing capacity, common stock repurchases, dividends on our common stock and other liquidity requirements associated with our existing operations over the next 12 months. Additionally, we may use U.S. or non-U.S. cash on hand or may borrow against our New Credit Facility to support growth initiatives either organically or through additional acquisitions of complementary businesses.

Included in our total unrestricted cash and cash equivalents was approximately \$25.7 million maintained in our non-U.S. operations and subsidiaries. In general, these resources are not available to fund our U.S. operations unless the funds are repatriated to the U.S., which would expose us to taxes we presently have not accrued in our results of operations. We presently have no plans to repatriate these funds to the U.S. as we believe the liquidity generated by our U.S. operations and our unused borrowing capacity are sufficient to meet the cash requirements of our U.S. operations.

The primary elements of our working capital accounts are accounts receivable, costs and estimated earnings in excess of billings, other assets, accounts payable, billings in excess of costs and estimated earnings and other accrued liabilities. We continually monitor our accounts receivable and manage our operating cash flows by managing the working capital accounts in total, rather than by the individual elements. This comprehensive view of working capital, taking into account each of the six primary elements listed, is both common and useful in our project-based industry, as it facilitates reviews of cash flow information at the total working capital level.

Our ability to generate sufficient cash depends on numerous factors beyond our control. We cannot be assured that our business will generate sufficient cash flow from operations or that future borrowings in addition to our New Credit Facility will be available to us in an amount sufficient to enable us to fund our liquidity needs. There can be no assurance that additional financing above our New Credit Facility will continue to be available in the future or that it will be available under terms acceptable to us. Failure to obtain sufficient capital could materially hinder our future expansion strategies.

Short-term Restricted Cash

In accordance with the Deltak sale agreement, we set aside \$7.0 million in escrow as a funding mechanism for settlement of warranty claims and other possible contractual claims. As of September 30, 2012, the escrow balances were recorded in the accompanying consolidated balance sheet as short-term restricted cash of \$3.1 million and long-term restricted cash, included in other assets, of \$3.9 million. The short-term restricted cash that was due for release on August 31, 2012, remains in escrow due to claims asserted by the Deltak buyer during the third quarter of 2012. The timing of the receipt of escrow funds due to us is contingent on the resolution of the Deltak buyer claims. See Note 8 *Commitments and Contingencies* to these condensed consolidated financial statements for more information regarding the claims.

Table of Contents*Dividend and Stock Repurchases*

In May 2012, our Board of Directors approved a dividend policy related to our common stock. The dividends declared during each of the second and third quarters of 2012 were \$0.09 per share and dividends paid totaled \$1.5 million in each of the second and third quarters of 2012. We anticipate the cash used for future dividends and the repurchase program will come from current U.S. cash and from on-going U.S. operating activities and the cash generated from such activities. The timing and amounts of any future dividends are subject to determination and approval by our Board of Directors.

Additionally, in May 2012, our Board of Directors authorized a program to repurchase up to two million shares of our common stock until the earlier of June 30, 2014 or a determination by the Board of Directors to discontinue the repurchase program. The repurchase program does not obligate us to acquire any specific number of shares. Through September 30, 2012, we have repurchased 35,801 shares for an aggregate cost of approximately \$0.7 million since the inception of the repurchase program announced on June 1, 2012. At September 30, 2012, we had 1,964,199 shares remaining to be repurchased under the current authorization.

Changes in cash and cash equivalents during the nine months ended September 30, 2012 and 2011 were as follows (\$ in thousands):

	Nine Months Ended September 30,	
	2012	2011
Statement of cash flow data:		
Cash flows (used in) provided by:		
Operating activities	\$ (10,644)	\$ 17,179
Investing activities	(47,361)	17,633
Financing activities	(7,725)	(2,975)
Effect of exchange rate changes on cash	(30)	902
Change in cash and cash equivalents	\$ (65,760)	\$ 32,739

*2012 as compared to 2011**Operating Activities*

Cash flows used in operating activities during the nine months ended September 30, 2012 was \$10.6 million and was impacted by the following:

Net income of \$3.2 million, adjusted by non-cash expenses of \$4.6 million for stock-based compensation, \$1.9 million of depreciation and amortization on plant, property and equipment and intangible assets and \$1.2 million of amortization of deferred financing costs.

Net accounts receivable increased by \$6.7 million reducing operating cash flows. This change included unfavorable contributions from both our Products and Services Divisions.

A decrease in cash of \$2.9 million due to higher on-hand inventory levels and a higher level of project activity in the Products Division.

A decrease in cash due to a total of \$20.2 million of additional working capital deployed (the sum of the changes in costs and estimated earnings in excess of billings and billings in excess of costs and estimated earnings) to jobs in progress as of September 30, 2012. This change was primarily driven by a higher level of project activity in our Products Division and also impacted by the timing of billings in our Services Division.

An increase in cash from accounts payable of \$5.7 million due to the favorable timing of disbursements. This was primarily driven by the Products Division as payables at September 30, 2012 were incurred related to the large volume of projects in progress during the year.

An increase in cash of \$4.3 million for accrued and other liabilities primarily due to month-end payroll cut off dates.

Cash flows provided by operating activities during the nine months ended September 30, 2011 of \$17.2 million was impacted by the following:

Net income of \$69.0 million, reduced by approximately \$33.1 million increase in net deferred income taxes (which was impacted by the valuation allowance release) as well as the \$17.3 million pre-tax gain on the Deltak sale. Offsetting the impact of the valuation allowance release and pre-tax gain on the Deltak sale were non-cash expenses of \$4.7 million for stock-based compensation and \$1.9 million of depreciation and amortization on plant, property and equipment and intangible assets.

Table of Contents

Net accounts receivable decreased by \$6.4 million contributing higher operating cash flows. The positive cash flows were the result of collections by the Services Division, partially offset by an increase in accounts receivable in our Products Division.

A decrease in cash of \$1.5 million due to higher on-hand inventory levels and a higher level of project activity in the Products Division.

A decrease in cash due to a total of \$5.6 million of additional working capital deployed (as defined above) to jobs in progress as of September 30, 2011. This change was primarily driven by increases in project activity within the Products Division.

A decrease in cash from accounts payable of \$2.9 million due to the unfavorable timing of disbursements. This was primarily driven by the Services Division as payables at December 31, 2010 related to the large capital project were disbursed in 2011.

A decrease in cash from accrued and other liabilities of \$3.6 million due to a use of cash of \$2.7 million from the timing of annual bonus payments and month-end payroll cut off dates, partially offset by an increase in legal and professional fees of \$0.7 million that were accrued but not paid as of September 30, 2011.

Investing Activities

Cash flows used in investing activities of \$47.4 million during the nine months ended September 30, 2012 consisted primarily of \$44.1 million of cash paid for the 2012 Acquisitions.

Cash flows provided by investing activities of \$17.6 million during the nine months ended September 30, 2011 consisted primarily of \$19.4 million of cash proceeds from the sale of the Deltak business unit in the third quarter of 2011.

Financing Activities

Cash flows used in financing activities of \$7.7 million during the nine months ended September 30, 2012 consisted primarily of cash expenditures of \$3.1 million related to cash dividends paid in the second and third quarter of 2012, \$3.0 million of cash paid for the repurchase of stock-based awards for payment of statutory taxes due on stock-based compensation, \$0.9 million for costs associated with the issuance of our New Credit Facility and \$0.7 million of cash utilized to repurchase shares.

Cash flows used in financing activities of \$3.0 million during the nine months ended September 30, 2011 consisted primarily of cash expenditures of \$3.0 million for the repurchase of stock-based awards for payment of statutory taxes due on stock-based compensation.

Effect of Exchange Rate Changes on Cash

The exchange rate changes on cash had a de minimus impact during the nine months ended September 30, 2012. The effect of exchange rate changes increased cash by \$0.9 million during the nine months ended September 30, 2011. This increase was primarily driven by the strengthening of the Euro against the U.S. Dollar from December 31, 2010 to September 30, 2011.

Discontinued Operations

Cash flows used in operating activities during the nine months ended September 30, 2012 included operating cash flows provided by discontinued operations of \$0.3 million. During the nine months ended September 30, 2011, operating cash flows provided by discontinued operations were \$0.6 million.

Financing

Credit Facilities. On February 21, 2012, we extinguished our Previous Credit Facility and entered into a New Credit Facility. The New Credit Facility allows for borrowings up to \$100 million, with an accordion feature for up to \$50 million of additional borrowing capacity. The facility has a letter of credit sublimit of \$75 million and provides access to multi-currency funds. The New Credit Facility has a maturity date of

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

February 21, 2017. As of September 30, 2012, we had no debt outstanding.

The New Credit Facility, while structured to support strategic growth initiatives and provide flexibility regarding return on capital alternatives, includes affirmative and negative covenants, including customary limitations on securing additional debt and liens and restrictions on transactions and payments, as well as financial covenants relating to our consolidated leverage ratio and consolidated interest coverage ratio. If we fail to comply with the restrictions in the New Credit Facility, we will be in default and the participating banks may restrict our ability to borrow additional funds under the New Credit Facility, require that we immediately repay all outstanding loans with interest and require the cash collateralization of outstanding letter of credit obligations. We have given a first priority lien on substantially all of our assets as security for the New Credit Facility. As of September 30, 2012, we were in compliance with all covenants under the New Credit Facility.

Table of Contents

We may review from time to time possible expansion and acquisition opportunities relating to our business. The timing, size or success of any acquisition effort and the associated potential capital commitments are unpredictable. We may seek to fund all or part of any such efforts with proceeds from debt and/or equity issuances. Debt or equity financing may not, however, be available to us at that time due to a variety of events, including, among others, credit rating agency downgrades of our debt, industry conditions, general economic conditions, market conditions and market perceptions of us and our industry.

Off-Balance Sheet Transactions

Our liquidity is currently not dependent on the use of off-balance sheet transactions but, in line with industry practice, we are often required to provide performance and surety bonds to customers and may be required to provide letters of credit. If performance assurances are extended to customers, generally our maximum potential exposure is limited in the contract with our customers. We frequently obtain similar performance assurances from third party vendors and subcontractors for work performed in the ordinary course of contract execution. However, the total costs of a project could exceed our original cost estimates, and we could experience reduced gross profit or possibly a loss for a given project. In some cases, if we fail to meet certain performance standards, we may be subject to contractual liquidated damages.

As of September 30, 2012, we had a contingent liability for issued and outstanding letters of credit, generally issued to secure performance on customer contracts. As of September 30, 2012, the balance of letters of credit totaled approximately \$16.1 million for the U.S. entities and \$13.3 million for non-U.S. entities. Currently, there are no amounts drawn upon these letters of credit. In addition, as of September 30, 2012, we had outstanding surety bonds on projects of approximately \$22.4 million. Our subsidiaries provide financial guarantees for certain contractual obligations in the ordinary course of business. As of September 30, 2012, we had \$17.1 million of subsidiary company financial guarantees outstanding.

Critical Accounting Policies and Estimates

Our condensed consolidated interim financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. Preparation of these statements requires management to make judgments and estimates. Item 7 of Part II of the Form 10-K, addressed the accounting policies and related estimates that we believed were the most critical to understanding our consolidated financial statements, financial condition and results of operations and those that require management judgment and assumptions, or involve uncertainties. We did not have a significant change to the application of our critical accounting policies and estimates during the first nine months of 2012. The following section provides certain information with respect to our critical accounting policies as of the close of our most recent quarterly period.

Revenue Recognition: We are organized in two major segments: the Products Division and the Services Division. Substantially all of our revenues within the Products Division are derived from fixed-priced contracts. Within the Services Division, we enter into a variety of contract structures including cost plus reimbursements, time and material contracts and fixed-price contracts. The determination of the contract structure within the Services Division is based on the scope of work, complexity and project length and customer preference. We expense pre-contract costs as incurred. Change orders are included in total estimated contract revenue when they can be reliably estimated and it is probable that the adjustment will be approved by the customer or realized. Costs related to change orders are recognized when they are incurred. Revenue for gas turbine auxiliary and control house equipment is recognized on the completed contract method, typically when the unit is delivered and title and risk of loss have transferred to the customer. Revenues for the Selective Catalytic Emission Reduction (SCR) product line in the Products Division and the fixed-price contracts in the Services Division are recognized on the percentage-of-completion method.

The percentage-of-completion method generally results in the recognition of reasonably consistent profit margins over the life of a contract since management has the ability to produce reasonably dependable estimates of contract billings and contract costs. We use the level of profit margin that is most likely to occur on a contract. If the most likely profit margin cannot be precisely determined, the lowest probable level of profit in the range of estimates is used until the results can be estimated more precisely. Our estimate of the total hours or total contract costs to be incurred at any particular time has a significant impact on the revenue recognized for the respective period. Changes in job performance, job conditions, estimated profitability, final contract settlements and resolution of claims may result in revisions to costs and income, and the effects of such revisions are recognized in the period that the revisions are determined. Estimated losses on uncompleted contracts are recognized in the period in which they first become apparent. Under percentage-of-completion accounting, management must also make key judgments in areas such as the percentage-of-completion, estimates of project revenue, costs and margin, estimates of total and remaining project hours and liquidated damages assessments. Any deviations from estimates could have a significant positive or negative impact on our results of operations.

Products Division revenue for gas turbine auxiliary and control house equipment is recognized on the completed contract method, typically when the unit is shipped. Certain of these contracts specify separate delivery dates of individual equipment units or require customer acceptance of a product. In circumstances where separate delivery dates of individual equipment units exist, we recognize revenue when the customer assumes the risk of loss and title for the equipment and the unit has shipped,

Table of Contents

which is generally the date the unit is shipped, and costs previously deferred are charged to expense. In circumstances where the contract requires customer acceptance of a product in addition to transfer of title and risk of loss to the customer, revenue is either recognized (i) upon shipment when we are able to demonstrate that the customer specific objective criteria have been met or (ii) upon customer acceptance. Once title and risk of loss have transferred and, where applicable, customer acceptance is complete, we have no further performance obligations. Our SCR product line follows percentage-of-completion method based on cost-to-cost input measures. Regardless of contract provisions, we require that the customer assumes risk of loss and title, and the installation is operating according to specifications or is an uninstalled unit that has been accepted by the customer for revenue to be recognized. Changes in job performance, job conditions, estimated profitability, final contract settlements and resolution of claims may result in revisions to job costs and income amounts that are different than amounts originally estimated.

Cost plus and time and material contracts represent the majority of the contracts in the Service Division. For these contract types, we recognize revenue when services are performed based upon an agreed-upon price for the completed services or based upon the hours incurred and agreed-upon hourly rates. Some of our contracts include provisions that adjust contract revenues for safety, schedule or other performance measures. On cost reimbursable contracts, revenue is recognized as costs are incurred and includes applicable mark up earned through the date services are provided. Fixed price contracts are recognized under the percentage-of-completion method using cost-to-cost measures. Occasionally, we may exclude certain costs from the cost-to-cost method such as significant costs for materials or subcontractors if the exclusion of such costs would result in a more meaningful measurement of actual progress towards completion of the contract.

Revenue and cost of revenue for the discontinued Deltak business unit in the Products Division were recognized on the percentage-of-completion method based on the percentage of actual hours incurred to date in relation to total estimated hours for each contract. This method was used because management considered expended labor hours to be the best available measure of progress on these contracts.

New Accounting Pronouncements

For a discussion of the new accounting pronouncements, see Note 2 to our condensed consolidated financial statements included in this Form 10-Q and Item 7 of Part II of the Form 10-K.

Contractual Obligations

There have been no material changes to the table of contractual obligations presented in the Form 10-K.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk.*

We may be exposed to market risk through changes in interest rates and foreign currency exchange fluctuations. We have established policies to monitor and control these market risks.

Foreign Exchange Rate Risk. We operate in a number of international areas and are involved in transactions denominated in currencies other than the U.S. Dollar, which exposes us to foreign currency exchange rate risk. We have from time-to-time used derivative instruments to hedge our foreign currency transactions. We did not enter into any such instruments as of or during the three and nine months ended September 30, 2012. We do not hold or issue foreign currency forward contracts, option contracts or other derivative financial instruments for speculative purposes.

Interest Rate Risk. Our primary market risk exposure is volatility of interest rates, primarily in the U.S. We manage interest rates through the use of a combination of fixed and floating rate debt and interest rate swap agreements. We are subject to interest rate changes on our LIBOR-based variable interest under our New Credit Facility. As of September 30, 2012, we had no outstanding borrowings on our New Credit Facility and have not borrowed funds since the November 2010 payoff of the term loan on our Previous Credit Facility.

Interest Rate Sensitivity. Based on the absence of any borrowings as of September 30, 2012, a 50 basis point fluctuation in short-term interest rates would have a de minimis impact on our expected pre-tax income on an annual basis.

Item 4. *Controls and Procedures.* ***Evaluation of Disclosure Controls and Procedures***

Edgar Filing: GLOBAL POWER EQUIPMENT GROUP INC. - Form 10-Q

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based on the definition of disclosure controls and procedures in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Table of Contents

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2012. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

Changes in Internal Controls over Financial Reporting

During the third quarter of 2012, we acquired Koontz-Wagner and TOG, (see Note 3 - *Acquisitions* to these condensed consolidated financial statements), which, in the aggregate, represented 16.7% of our total assets as of September 30, 2012. We are in the process of fully integrating Koontz-Wagner and TOG into our internal controls over financial reporting and, in reliance on interpretive guidance issued by the SEC staff, disclosure of changes in internal control over financial reporting related to Koontz-Wagner and TOG have been excluded. Otherwise, there were no changes in our internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**Part II - OTHER INFORMATION****Item 1. Legal Proceedings.**

The information set forth under Note 8 *Commitments and Contingencies*, in Item 1 of Part I of this Quarterly Report on Form 10-Q, is incorporated herein by reference.

Item 1A. Risk Factors.

There were no material changes to our risk factors from those reported in Part I, Item 1A, of the Form 10-K and Part II, Item 1A of our Quarterly Report on Form 10-Q for the quarter ended June 30, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.*Issuer Purchases of Equity Securities*

The following table presents information regarding our repurchases of shares of our common stock on a monthly basis during the third quarter of 2012.

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan ⁽²⁾	Maximum Number of Shares That May Yet Be Purchased Under the Plan ⁽²⁾
July 1, 2012 through July 31, 2012		\$		2,000,000
August 1, 2012 through August 31, 2012	444	20.11	1,703	1,998,297
September 1, 2012 through September 30, 2012			34,098	1,964,199
Total	444	\$ 20.11	35,801	1,964,199

(1) Represents the surrender of shares of common stock to satisfy statutory minimum tax withholding obligations in connection with the vesting of restricted stock awards issued to employees under our stockholders-approved long-term incentive plan.

(2) Our share repurchase program was approved by the Board on May 30, 2012 and allows for repurchase of up to two million shares of our common stock until the earlier of June 30, 2014 or a determination by the Board of Directors to discontinue the repurchase program.
