**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

These notes are an integral part of the financial statements of Murphy Oil Corporation and Consolidated Subsidiaries (Murphy/the Company) on pages 2 through 6 of this Form 10-Q report.

**Note A Interim Financial Statements**

The consolidated financial statements of the Company presented herein have not been audited by independent auditors, except for the Consolidated Balance Sheet at December 31, 2012. In the opinion of Murphy's management, the unaudited financial statements presented herein include all accruals necessary to present fairly the Company's financial position at March 31, 2013, and the results of operations, cash flows and changes in stockholders' equity for the interim periods ended March 31, 2013 and 2012, in conformity with accounting principles generally accepted in the United States. In preparing the financial statements of the Company in conformity with accounting principles generally accepted in the United States, management has made a number of estimates and assumptions related to the reporting of assets, liabilities, revenues, and expenses and the disclosure of contingent assets and liabilities. Actual results may differ from the estimates.

Financial statements and notes to consolidated financial statements included in this Form 10-Q report should be read in conjunction with the Company's 2012 Form 10-K report, as certain notes and other pertinent information have been abbreviated or omitted in this report. Financial results for the three-month period ended March 31, 2013 are not necessarily indicative of future results.

**Note B Property, Plant and Equipment**

Under U.S. generally accepted accounting principles for companies that use the successful efforts method of accounting, exploratory well costs should continue to be capitalized when the well has found a sufficient quantity of reserves to justify its completion as a producing well and the company is making sufficient progress assessing the reserves and the economic and operating viability of the project.

At March 31, 2013, the Company had total capitalized exploratory well costs pending the determination of proved reserves of \$444.2 million. The following table reflects the net changes in capitalized exploratory well costs during the three-month periods ended March 31, 2013 and 2012.

(Thousands of dollars)	2013	2012
Beginning balance at January 1	\$ 445,697	556,412
Additions pending the determination of proved reserves	26,929	49,524
Reclassifications to proved properties based on the determination of proved reserves	(28,398)	(42,431)
Balance at March 31	\$ 444,228	563,505

The following table provides an aging of capitalized exploratory well costs based on the date the drilling was completed for each individual well and the number of projects for which exploratory well costs have been capitalized. The projects are aged based on the last well drilled in the project.

(Thousands of dollars)	Amount	March 31		Amount	2012	
		No. of Wells	No. of Projects		No. of Wells	No. of Projects
Aging of capitalized well costs:						
Zero to one year	\$ 56,324	6	3	109,907	29	5
One to two years	40,721	3	1	141,441	16	4
Two to three years	79,446	8	2	55,922	9	2
Three years or more	267,737	24	5	256,235	35	5
	\$ 444,228	41	11	563,505	89	16

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note B Property, Plant and Equipment (Contd.)**

Of the \$387.9 million of exploratory well costs capitalized more than one year at March 31, 2013, \$272.7 million is in Malaysia and \$115.2 million is in the U.S. In Malaysia either further appraisal or development drilling is planned and/or development studies/plans are in various stages of completion. In the U.S. drilling and development operations are planned.

In 2012, the Company announced that its Board of Directors had approved a plan to separate its U.S. retail marketing business into a separate publicly owned company. In 2010, the Company announced that its Board of Directors had approved plans to exit the U.K. refining and marketing business. These operations are presented as the U.S. and U.K. refining and marketing segments in Note P. The separation of the U.S. retail marketing business is expected to be completed during 2013. The sale process for the U.K. downstream assets continues in 2013. Based on current market conditions, it is possible that the Company could incur a loss when the U.K. downstream assets are sold. If the separation of the U.S. retail marketing business and the sale of the U.K. downstream assets continue to progress, the results of these operations are likely to be presented as discontinued operations in future periods when the operations no longer qualify as continuing operations under U.S. generally accepted accounting principles.

**Note C Inventories**

Inventories are carried at the lower of cost or market. The cost of crude oil and finished products is predominantly determined on the last-in, first-out (LIFO) method. At March 31, 2013 and December 31, 2012, the carrying values of inventories under the LIFO method were \$623.7 million and \$571.2 million, respectively, less than such inventories would have been valued using the first-in, first-out (FIFO) method.

**Note D Discontinued Operations**

The Company sold certain oil and gas assets in the United Kingdom during the three months ended March 31, 2013. The after-tax gain on sale of the two assets was \$147.4 million in the three months ended March 31, 2013. One remaining oil and gas producing asset is expected to be sold in the second quarter 2013. The Company has accounted for these U.K. upstream operations as discontinued operations in its consolidated financial statements for all periods presented.

The results of operations associated with these discontinued operations for the three-month periods ended March 31, 2013 and 2012 were as follows:

(Thousands of dollars)	2013	2012
Revenues	\$ 166,522	37,583
Income before income taxes, including gain on disposal of \$74,928 during 2013	89,521	22,973
Income tax expense (benefit)	(63,108)	14,340

**Note E Financing Arrangements**

The Company has a \$1.5 billion committed credit facility that expires in June 2016. Borrowings under the facility bear interest at 1.25% above LIBOR based on the Company's current credit rating as of March 31, 2013. In addition, facility fees of 0.25% are charged on the full \$1.5 billion commitment. The Company also has a shelf registration statement on file with the U.S. Securities and Exchange Commission that permits the offer and sale of debt and/or equity securities through October 2015.

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note F Cash Flow Disclosures**

Additional disclosures regarding cash flow activities are provided below.

(Thousands of dollars)	Three Months Ended March 31,	
	2013	2012
Net (increase) decrease in operating working capital other than cash and cash equivalents:		
Decrease in accounts receivable	\$ 182,714	69,126
Decrease in inventories	126,826	4,962
Increase in prepaid expenses	(54,119)	(51,508)
Decrease in deferred income tax assets	24,082	5,522
Increase (decrease) in accounts payable and accrued liabilities	(191,616)	229,804
Increase in current income tax liabilities	123,575	43,165
Total	\$ 211,462	301,071
Supplementary disclosures:		
Cash income taxes paid	\$ 47,877	160,210
Interest paid more (less) than amounts capitalized	(10,519)	490

**Note G Employee and Retiree Benefit Plans**

The Company has defined benefit pension plans that are principally noncontributory and cover most full-time employees. All pension plans are funded except for the U.S. and Canadian nonqualified supplemental plans and the U.S. directors' plan. All U.S. tax qualified plans meet the funding requirements of federal laws and regulations. Contributions to foreign plans are based on local laws and tax regulations. The Company also sponsors health care benefit plans, which are not funded, that cover most active and retired U.S. employees. Additionally, most U.S. retired employees are covered by a life insurance benefit plan. The health care benefits are contributory; the life insurance benefits are noncontributory.

The table that follows provides the components of net periodic benefit expense for the three-month periods ended March 31, 2013 and 2012.

(Thousands of dollars)	Three Months Ended March 31,			
	Pension Benefits		Postretirement Benefits Other	
	2013	2012	2013	2012
Service cost	\$ 7,603	5,888	1,167	1,041
Interest cost	6,431	7,292	1,234	1,449
Expected return on plan assets	(5,700)	(6,305)	0	0
Amortization of prior service cost	276	312	(42)	(46)
Amortization of transitional liability	120	111	2	2
Recognized actuarial net loss	3,532	3,767	457	489
Net periodic benefit expense	\$ 12,262	11,065	2,818	2,935

During the three-month period ended March 31, 2013, the Company made contributions of \$17.4 million to its defined benefit pension and postretirement benefit plans. Remaining funding in 2013 for the Company's defined benefit pension and postretirement plans is anticipated to be \$31.1 million.

## Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

In March 2010, the United States Congress enacted a health care reform law. Along with other provisions, the law (a) eliminates the tax free status of federal subsidies to companies with qualified retiree prescription drug plans that are actuarially equivalent to Medicare Part D plans beginning in 2013; (b) imposes a 40% excise tax on high-cost health plans as defined in the law beginning in 2018; (c) eliminated lifetime or annual coverage limits and required coverage for preventative health services beginning in September 2010; and (d) imposed a fee of \$2 (subsequently adjusted for inflation) for each person covered by a health insurance policy beginning in September 2010. The Company provides a health care benefit plan to eligible U.S. employees and most U.S. retired employees. The new law did not significantly affect the Company's consolidated financial statements as of March 31, 2013 and December 31, 2012 and for the three-month periods ended March 31, 2013 and 2012. The Company continues to evaluate the various components of the law as further guidance is issued and cannot predict with certainty all the ways it may impact the Company. However, based on the evaluation performed to date, the Company currently believes that the health care reform law will not have a material effect on its financial condition, net income or cash flow in future periods.

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note H Incentive Plans**

The costs resulting from all share-based payment transactions are recognized in the Consolidated Statements of Income using a fair value-based measurement method over the periods that the awards vest.

The 2012 Annual Incentive Plan (2012 Annual Plan) authorizes the Executive Compensation Committee (the Committee) to establish specific performance goals associated with annual cash awards that may be earned by officers, executives and other key employees. Cash awards under the 2012 Annual Plan are determined based on the Company's actual financial and operating results as measured against the performance goals established by the Committee. The 2012 Long-Term Incentive Plan (2012 Long-Term Plan) authorizes the Committee to make grants of the Company's Common Stock and other stock-based incentives to employees. These grants may be in the form of stock options (nonqualified or incentive), stock appreciation rights (SAR), restricted stock, restricted stock units, performance units, performance shares, dividend equivalents and other stock-based incentives. The 2012 Long-Term Plan expires in 2022. A total of 8,700,000 shares are issuable during the life of the 2012 Long-Term Plan, with annual grants limited to 1% of Common shares outstanding. The Company has an Employee Stock Purchase Plan that permits the issuance of up to 980,000 shares through September 30, 2017. The Company also has a Stock Plan for Non-Employee Directors that permits the issuance of restricted stock and stock options or a combination thereof to the Company's Directors.

On February 5, 2013, the Committee granted stock options for 1,123,300 shares at an exercise price of \$60.015 per share. The Black-Scholes valuation for these awards was \$15.81 per option. The Committee also granted 443,700 performance-based restricted stock units on that date. The fair value of the performance-based restricted stock units, using a Monte Carlo valuation model, ranged from \$39.50 to \$54.82 per unit. Additionally, on February 5, 2013, the Committee granted 851,000 stock appreciation rights (SAR) and 93,200 units of restricted stock-cash (RSU-C) to certain employees. The SAR and RSU-C are to be settled in cash, net of applicable income taxes, and are accounted for as liability-type awards. The initial fair values of these SAR were equivalent to the stock options granted, while the initial value of RSU-C were equivalent to restricted stock units granted. On February 6, 2013, the Committee granted 36,600 shares of time-based restricted stock units to the Company's Directors under the Non-employee Director Plan. These shares vest on the third anniversary of the date of grant. The fair value of these awards was estimated based on the fair market value of the Company's stock on the date of grant, which was \$60.30 per share.

Cash received from options exercised under all share-based payment arrangements for the three-month periods ended March 31, 2013 and 2012 was \$1.3 million and \$6.6 million, respectively. The actual income tax benefit realized for the tax deductions from option exercises of the share-based payment arrangements totaled \$1.4 million and \$2.0 million for the three-month periods ended March 31, 2013 and 2012, respectively.

Amounts recognized in the Consolidated Statements of Income with respect to share-based plans are as follows:

(Thousands of dollars)	Three Months Ended March 31,	
	2013	2012
Compensation charged against income before tax benefit	\$ 17,833	13,042
Related income tax benefit recognized in income	3,755	3,978

**Note I Earnings per Share**

Net income was used as the numerator in computing both basic and diluted income per Common share for the three-months ended March 31, 2013 and 2012. The following table reconciles the weighted-average shares outstanding used for these computations.

(Weighted-average shares)	Three Months Ended March 31,	
	2013	2012
Basic method	190,810,201	193,922,260
Dilutive stock options and restricted stock units	955,194	962,473

Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

Diluted method	191,765,395	194,884,733
----------------	-------------	-------------

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note I Earnings per Share (Contd.)**

Outstanding options to purchase shares of Common stock were not included in the computation of diluted EPS during the 2013 and 2012 periods when the incremental shares from assumed conversion were antidilutive. These included 3,794,002 shares at a weighted average share price of \$62.18 in the 2013 period and 2,834,487 shares at a weighted average share price of \$66.51 in the 2012 period.

**Note J Income Taxes**

The Company's effective income tax rate generally exceeds the U.S. Federal statutory tax rate of 35.0%. The effective tax rate is calculated as the amount of income tax expense divided by income before income tax expense. For the three-month periods in 2013 and 2012, the Company's effective income tax rates were as follows:

	2013	2012
Three months ended March 31	48.4%	39.6%

The effective tax rates for the periods presented exceeded the U.S. Federal tax rate of 35.0% due to several factors, including: the effects of income generated in foreign tax jurisdictions, certain of which have tax rates that are higher than the U.S. Federal rate; U.S. state tax expense; and certain expenses, including exploration and other expenses in certain foreign jurisdictions, for which no income tax benefits are available or are not presently being recorded due to a lack of reasonable certainty of adequate future revenue against which to utilize these expenses as deductions.

The Company's tax returns in multiple jurisdictions are subject to audit by taxing authorities. These audits often take years to complete and settle. Although the Company believes that recorded liabilities for unsettled issues are adequate, additional gains or losses could occur in future years from resolution of outstanding unsettled matters. As of March 31, 2013, the earliest years remaining open for audit and/or settlement in our major taxing jurisdictions are as follows: United States 2009; Canada 2007; United Kingdom 2011; and Malaysia 2006.

**Note K Financial Instruments and Derivatives**

Murphy periodically utilizes derivative instruments to manage certain risks related to commodity prices, foreign currency exchange rates and interest rates. The use of derivative instruments for risk management is covered by operating policies and is closely monitored by the Company's senior management. The Company does not hold any derivatives for speculative purposes, and it does not use derivatives with leveraged or complex features. Derivative instruments are traded primarily with creditworthy major financial institutions or over national exchanges. The Company has a risk management control system to monitor commodity price risks and any derivatives obtained to manage a portion of such risks. For accounting purposes, the Company has not designated commodity and foreign currency derivative contracts as hedges, and therefore, it recognizes all gains and losses on these derivative contracts in its Consolidated Statements of Income. Certain interest rate derivative contracts were accounted for as hedges and the gain or loss associated with recording the fair value of these contracts was deferred in Accumulated Other Comprehensive Income until the anticipated transactions occur.

*Commodity Purchase Price Risks*

The Company is subject to commodity price risk related to corn that it will purchase in the future for feedstock and to wet and dried distillers grain with solubles that it will sell in the future at its ethanol production facilities in the United States. At March 31, 2013 and 2012, the Company had open physical delivery commitment contracts for purchase of approximately 18.7 million and 11.7 million bushels of corn, respectively, for processing at its ethanol plants. For both periods ending March 31, 2013 and 2012, the Company had open physical delivery commitment contracts for sale of approximately 0.9 million equivalent bushels of wet and dried distillers grain with solubles. To manage the price risk associated with certain of these physical delivery commitments which have fixed prices, at March 31, 2013 and 2012, the Company had outstanding derivative contracts with a net volume of approximately 6.0 million and 11.7 million bushels, respectively, that mature at future prices in effect on the expected date of delivery under the physical delivery commitment contracts. Additionally, at March 31, 2013, the Company had outstanding derivative contracts to sell 2.1 million bushels of corn and buy them back when certain corn inventories are expected

## Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

to be processed at the Hankinson, North Dakota, and Hereford, Texas facilities. The impact of marking to market these commodity derivative contracts reduced income before taxes by \$0.6 million and \$0.1 million for the three months ended March 31, 2013 and 2012, respectively.

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note K Financial Instruments and Derivatives (Contd.)***Foreign Currency Exchange Risks*

The Company is subject to foreign currency exchange risk associated with operations in countries outside the United States. Short-term derivative instruments were outstanding at March 31, 2013 and 2012 to manage the risk of certain future income taxes that are payable in Malaysian ringgits. The equivalent U.S. dollars of Malaysian ringgit derivative contracts open at March 31, 2013 and 2012 were approximately \$274.0 million and \$373.6 million, respectively. Short-term derivative instrument contracts totaling \$20.0 million and \$46.0 million U.S. dollars were also outstanding at March 31, 2013 and 2012, respectively, to manage the risk of certain U.S. dollar accounts receivable associated with sale of crude oil production in Canada. The impact from marking to market these foreign currency derivative contracts reduced income before taxes by \$2.7 million for the three-month period ended March 31, 2013 and increased income before taxes by \$6.6 million for the three-month period ended March 31, 2012.

At March 31, 2013 and December 31, 2012, the fair value of derivative instruments not designated as hedging instruments are presented in the following table.

(Thousands of dollars)	March 31, 2013		December 31, 2012	
	Asset (Liability)	Derivatives	Asset (Liability)	Derivatives
Type of Derivative Contract	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Commodity	Accounts receivable	\$ 2,158	Accounts receivable	\$ 3,043
Commodity	Accounts payable	(2,805)	Accounts payable	(102)
Foreign currency	Accounts payable	(2,718)	Accounts payable	(1,031)

For the three-month periods ended March 31, 2013 and 2012, the gains and losses recognized in the Consolidated Statements of Income for derivative instruments not designated as hedging instruments are presented in the following table.

(Thousands of dollars)	Statement of Income Location	Gain (Loss) Three Months Ended March 31,	
		2013	2012
Type of Derivative Contract			
Commodity	Crude oil and product purchases	\$ (4,210)	645
Foreign currency	Interest and other income (loss)	(2,818)	17,515
		\$ (7,028)	18,160

*Interest Rate Risks*

The Company had ten-year notes totaling \$350 million that matured on May 1, 2012. The Company expected to replace these notes at maturity with new ten-year notes, and it therefore had risk associated with the interest rate related to the anticipated sale of these notes in 2012. To manage this risk, in 2011 the Company entered into a series of derivative contracts known as forward starting interest rate swaps that matured in May 2012. The Company utilized hedge accounting to defer any gain or loss on these contracts associated with the payment of interest on these anticipated notes in 2012 through 2022. During the three-month period ended March 31, 2013, \$0.7 million of the deferred loss on the interest rate swaps was charged to income. The remaining loss deferred on these matured contracts at March 31, 2013 was \$17.6 million, which is recorded, net of income taxes, in Accumulated Other Comprehensive Income in the Consolidated Balance Sheet. The Company expects to charge approximately \$2.2 million of this deferred loss to income in the form of interest expense during the remaining nine months of 2013. There was no impact in the Consolidated Statement of Income during the three-month period ended March 31, 2012 related to these interest rate derivative contracts.

## Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

The Company carries certain assets and liabilities at fair value in its Consolidated Balance Sheets. The fair value hierarchy is based on the quality of inputs used to measure fair value, with Level 1 being the highest quality and Level 3 being the lowest quality. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are observable inputs other than quoted prices included within Level 1. Level 3 inputs are unobservable inputs which reflect assumptions about pricing by market participants.

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note K Financial Instruments and Derivatives (Contd.)**

The carrying value of assets and liabilities recorded at fair value on a recurring basis at March 31, 2013 and December 31, 2012 are presented in the following table.

(Thousands of dollars)	March 31, 2013				December 31, 2012			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
<b>Assets</b>								
Commodity derivative contracts	\$ 0	2,158	0	2,158	0	3,043	0	3,043
<b>Liabilities</b>								
Nonqualified employee savings plans	\$ (10,816)	0	0	(10,816)	(10,293)	0	0	(10,293)
Foreign currency exchange derivative contracts	0	(2,718)	0	(2,718)	0	(1,031)	0	(1,031)
Commodity derivative contracts	0	(2,805)	0	(2,805)	0	(102)	0	(102)
	\$ (10,816)	(5,523)	0	(16,339)	(10,293)	(1,133)	0	(11,426)

The fair value of commodity derivative contracts for corn and wet and dried distillers grain was determined based on market quotes for No. 2 yellow corn. The fair value of foreign exchange derivative contracts was based on market quotes for similar contracts at the balance sheet date. The income effect of changes in fair value of commodity derivative contracts is recorded in Crude Oil and Product Purchases in the Consolidated Statements of Income and changes in fair value of foreign exchange derivative contracts is recorded in Interest and Other Income. The nonqualified employee savings plan is an unfunded savings plan through which participants seek a return via phantom investments in equity securities and/or mutual funds. The fair value of this liability was based on quoted prices for these equity securities and mutual funds. The income effect of changes in the fair value of the nonqualified employee savings plan is recorded in Selling and General Expenses.

The Company offsets certain assets and liabilities related to derivative contracts when the legal right of offset exists. Derivative assets and liabilities which have offsetting positions at March 31, 2013 and December 31, 2012 are presented in the following tables.

(Thousands of dollars)	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts of Assets Presented in the Consolidated Balance Sheet
<b>At March 31, 2013</b>			
Commodity derivatives	\$ 1,528	(936)	592
<b>At December 31, 2012</b>			
Commodity derivatives	\$ 1,383	(441)	942
	Gross Amounts of Recognized	Gross Amounts Offset in the Consolidated	Net Amounts of Liabilities Presented in the

Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

	Liabilities	Balance Sheet	Consolidated Balance Sheet
<u>(Thousands of dollars)</u>			
<u>At March 31, 2013</u>			
Commodity derivatives	\$ 325	(43)	282
 <u>At December 31, 2012</u>			
Commodity derivatives	\$ 1,830	(1,728)	102

All commodity derivatives above are corn-based contracts associated with the Company's two U.S. ethanol plants. Net derivative assets in the table above are included in Accounts Receivable presented in the table on the prior page and are included in Accounts Receivable on the Consolidated Balance Sheet; likewise, net derivative liabilities in the above table are included in Accounts Payable in the table on the prior page and are included in Accounts Payable

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note K Financial Instruments and Derivatives (Contd.)**

and Accrued Liabilities on the Consolidated Balance Sheet. Separate derivative agreements exist for each of the ethanol plants and at March 31, 2013 one plant has a net receivable and the other has a net payable for derivative contracts. These contracts permit net settlement and the Company generally avails itself of this right to settle net. At March 31, 2013 cash deposits of \$11.6 million related to commodity derivative contracts were reported in Prepaid Expenses in the Consolidated Balance Sheet. These cash deposits have not been used to reduce the reported net liabilities on the corn-based derivative contracts at March 31, 2013.

**Note L Accumulated Other Comprehensive Income**

The components of Accumulated Other Comprehensive Income (AOCI) on the Consolidated Balance Sheets at March 31, 2013 and December 31, 2012 and the changes during the three months ended March 31, 2013 are presented net of taxes in the following table.

(Thousands of dollars)	AOCI Components		Changes in AOCI Three Months Ended March 31, 2013	
			Changes Before Reclassi- fications	Reclassi- fications from AOCI
	March 31, 2013	Dec. 31, 2012		
Foreign currency translation gains, net of tax	\$ 495,738	613,492	(117,754)	0
Retirement and postretirement benefit plan losses, net of tax	(183,801)	(186,539)	(347)	3,085
Loss deferred on settled interest rate derivative contracts, net of tax	(17,566)	(18,052)	0	486
Accumulated other comprehensive income	\$ 294,371	408,901	(118,101)	3,571

The following table presents further information about amounts reclassified from Accumulated Other Comprehensive Income during the three-month period ended March 31, 2013.

(Thousands of dollars)	Amounts Reclassified from AOCI	Affected Line Item in Consolidated Statement of Income
<b>Amortization of retirement and postretirement plan items:</b>		
Actuarial net loss	\$ 3,989*	
Prior service cost	234*	
Transitional liability	122*	
	4,345	Total expense before tax
	1,260	Tax benefit
	3,085	Expense net of tax
Deferred loss on interest rate derivative hedges	741	Interest expense

Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

	255	Tax benefit
	486	Net of tax
Total reclassifications for period	\$ 3,571	Net of tax

\* These AOCI components are included in the computation of net periodic benefit expense. See Note G for additional information.

---

**Table of Contents*****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)*****Note M Environmental and Other Contingencies**

The Company's operations and earnings have been and may be affected by various forms of governmental action both in the United States and throughout the world. Examples of such governmental action include, but are by no means limited to: tax increases and retroactive tax claims; royalty and revenue sharing increases; import and export controls; price controls; currency controls; allocation of supplies of crude oil and petroleum products and other goods; expropriation of property; restrictions and preferences affecting the issuance of oil and gas or mineral leases; restrictions on drilling and/or production; laws and regulations intended for the promotion of safety and the protection and/or remediation of the environment; governmental support for other forms of energy; and laws and regulations affecting the Company's relationships with employees, suppliers, customers, stockholders and others. Because governmental actions are often motivated by political considerations and may be taken without full consideration of their consequences, and may be taken in response to actions of other governments, it is not practical to attempt to predict the likelihood of such actions, the form the actions may take or the effect such actions may have on the Company.

Murphy and other companies in the oil and gas industry are subject to numerous federal, state, local and foreign laws and regulations dealing with the environment. Violation of federal or state environmental laws, regulations and permits can result in the imposition of significant civil and criminal penalties, injunctions and construction bans or delays. A discharge of hazardous substances into the environment could, to the extent such event is not insured, subject the Company to substantial expense, including both the cost to comply with applicable regulations and claims by neighboring landowners and other third parties for any personal injury and property damage that might result.

The Company currently owns or leases, and has in the past owned or leased, properties at which hazardous substances have been or are being handled. Although the Company has used operating and disposal practices that were standard in the industry at the time, hazardous substances may have been disposed of or released on or under the properties owned or leased by the Company or on or under other locations where these wastes have been taken for disposal. In addition, many of these properties have been operated by third parties whose treatment and disposal or release of hydrocarbons or other wastes were not under Murphy's control. Under existing laws the Company could be required to remove or remediate previously disposed wastes (including wastes disposed of or released by prior owners or operators), to clean up contaminated property (including contaminated groundwater) or to perform remedial plugging operations to prevent future contamination. Certain of these historical properties are in various stages of negotiation, investigation, and/or cleanup and the Company is investigating the extent of any such liability and the availability of applicable defenses. With the sale of the U.S. refineries in 2011, the Company retained certain liabilities related to environmental matters. The Company also has insurance covering certain levels of environmental exposures. The Company believes costs related to these sites will not have a material adverse affect on Murphy's net income, financial condition or liquidity in a future period.

The U.S. Environmental Protection Agency (EPA) currently considers the Company to be a Potentially Responsible Party (PRP) at one Superfund site. The potential total cost to all parties to perform necessary remedial work at the one remaining Superfund site may be substantial. However, based on current negotiations and available information, the Company believes that it is a de minimis party as to ultimate responsibility at this Superfund site. The Company has not recorded a liability for remedial costs on Superfund sites. The Company could be required to bear a pro rata share of costs attributable to nonparticipating PRPs or could be assigned additional responsibility for remediation at the site or other Superfund sites. The Company believes that its share of the ultimate costs to clean-up the Superfund site will be immaterial and will not have a material adverse effect on its net income, financial condition or liquidity in a future period.

There is the possibility that environmental expenditures could be required at currently unidentified sites, and new or revised regulations could require additional expenditures at known sites. However, based on information currently available to the Company, the amount of future remediation costs incurred at known or currently unidentified sites is not expected to have a material adverse effect on the Company's future net income, cash flows or liquidity.

Murphy and its subsidiaries are engaged in a number of other legal proceedings, all of which Murphy considers routine and incidental to its business. Based on information currently available to the Company, the ultimate resolution of these matters is not expected to have a material adverse effect on the Company's net income, financial condition or liquidity in a future period.

In the normal course of its business, the Company is required under certain contracts with various governmental authorities and others to provide financial guarantees or letters of credit that may be drawn upon if the Company fails to perform under those contracts. At March 31, 2013, the Company had contingent liabilities of \$178.5 million on outstanding letters of credit. The Company has not accrued a liability in its balance sheet related to these letters of credit because it is believed that the likelihood of having these drawn is remote.

**Table of Contents****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Contd.)****Note N Accounting Matters**

In December 2011, the Financial Accounting Standards Board (FASB) issued an accounting standards update that requires enhanced disclosures about financial instruments and derivative instruments that are either offset in the balance sheet or are subject to an enforceable master netting arrangement or similar agreement. The guidance was effective for all interim and annual periods beginning on or after January 1, 2013. These disclosures are presented in Note K.

In February 2013, the FASB issued an accounting standards update that requires additional disclosures for reclassification adjustments from accumulated other comprehensive income (AOCI). These additional disclosures include changes in AOCI balances by component and significant items reclassified out of AOCI. These disclosures must be presented either on the face of the affected financial statement or in the notes to the financial statements. The disclosures are effective for Murphy Oil beginning in the first quarter of 2013 and are to be provided on a prospective basis. These disclosures are presented in Note L.

**Note O Commitments**

The Company has entered into forward sales contracts to mitigate the price risk for a portion of its 2013 heavy oil and natural gas sales volumes in Western Canada. The heavy oil sales contracts call for deliveries of 4,000 barrels per day in May and June 2013 that achieve netback values ranging from US\$50.28 to US\$50.30 per barrel. The natural gas contracts call for deliveries between April through December that average approximately 73 million cubic feet per day at prices ranging from Cdn\$3.69 to Cdn\$3.87 per MCF, with the contracts calling for delivery at the NOVA inventory transfer sales point. These oil and natural gas contracts have been accounted for as normal sales for accounting purposes.

**Note P Business Segments**

\* Additional details about results of oil and gas operations are presented in the tables on page 20.

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Results of Operations**

Murphy's net income in the first quarter of 2013 was \$360.6 million (\$1.88 per diluted share) compared to net income of \$290.1 million (\$1.49 per diluted share) in the first quarter of 2012. The 2013 and 2012 results included \$152.6 million (\$0.80 per diluted share) and \$8.6 million (\$0.05 per diluted share), respectively, of income from discontinued operations. Excluding discontinued operations, income in the 2013 first quarter was below 2012 results, primarily related to higher costs for exploration, administration, financing and income taxes. These higher costs were partially offset by improved results for the Company's refining and marketing operations in the current year.

Murphy's income by type of business is presented below.

(Millions of dollars)	Income (Loss)	
	Three Months Ended	
	March 31,	
	2013	2012
Exploration and production	\$ 231.9	313.0
Refining and marketing	25.3	(4.2)
Corporate	(49.2)	(27.3)
Income from continuing operations	208.0	281.5
Discontinued operations	152.6	8.6
Net income	\$ 360.6	290.1

In the 2013 first quarter, the Company's exploration and production operations earned \$231.9 million compared to \$313.0 million in the 2012 quarter. Income in the 2013 quarter was favorably impacted by higher crude oil sales volumes, but this was more than offset by higher exploration and extraction costs in the current quarter. The Company's refining and marketing operations generated a profit of \$25.3 million in the 2013 first quarter compared to a loss of \$4.2 million in the same quarter of 2012. The improvement in downstream results arose in the U.S., which experienced stronger marketing margins for retail and wholesale operations. Results for the U.K. downstream segment were down in 2013 due to weaker refining margins coupled with lower crude oil throughputs associated with planned maintenance at the Milford Haven refinery. The corporate function had after-tax costs of \$49.2 million in the 2013 first quarter compared to after-tax costs of \$27.3 million in the 2012 period with the unfavorable variance in 2013 primarily due to higher expenses associated with administration and debt financing.

**Exploration and Production**

Results of exploration and production operations are presented by geographic segment below.

(Millions of dollars)	Income (Loss)	
	Three Months Ended	
	March 31,	
	2013	2012
Exploration and production		
United States	\$ 93.8	50.8
Canada	13.3	73.3
Malaysia	205.2	224.1
Republic of the Congo	(14.8)	1.6
Other International	(65.6)	(36.8)
Total	\$ 231.9	313.0

## Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

United States exploration and production operations had earnings of \$93.8 million in the first quarter of 2013 compared to earnings of \$50.8 million in the 2012 quarter. Earnings improved in 2013 primarily due to higher crude oil sales volumes in the latest period. The increase in production was achieved in the Eagle Ford Shale area of South Texas, where an ongoing development project is proceeding. At March 31, 2013, nine rigs were actively drilling in the Eagle Ford Shale on behalf of the Company. U.S. results in 2013 were unfavorably affected by lower crude oil sales prices, but this was mostly offset by both higher natural gas sales prices and higher natural gas sales volumes in the current year. Production and depreciation expenses in the U.S. increased \$41.9 million and \$67.4 million, respectively, in 2013 compared to 2012 mostly due to higher production in the Eagle Ford Shale. Exploration expenses in the 2013 quarter were \$5.8 million above 2012 levels due to higher costs for seismic in the Gulf of Mexico, partially offset by lower leasehold amortization in the Eagle Ford Shale in the latest quarter. Selling and general expenses in the 2013 period increased \$4.0 million from the prior year primarily due to higher costs for employee compensation and other professional services.

**Table of Contents*****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)*****Results of Operations (Contd.)*****Exploration and Production (Contd.)***

Operations in Canada had earnings of \$13.3 million in the first quarter 2013 compared to earnings of \$73.3 million in the 2012 quarter. Canadian earnings decreased in the 2013 quarter due to a combination of lower oil sales prices, lower oil sales volumes at Terra Nova and Syncrude, and higher exploration expenses in the current period. Oil production decreased in the 2013 quarter compared to 2012 primarily due to lower volumes at Syncrude. Heavy oil production in 2013 at Seal was slightly above the prior year as a fire at a tank battery in the Seal area led to downtime for repairs that otherwise offset higher daily volumes when production was online. Natural gas sales volumes decreased in 2013 due to virtually no development drilling in the Tupper and Tupper West areas in the current year. Oil sales prices in 2013 were below the prior year in all areas, but heavy oil prices were especially weak, averaging more than \$23.00 per barrel below 2012 sales prices. Exploration expenses in 2013 were \$23.9 million above the prior year primarily due to dry hole costs associated with drilling in the Muskwa Shale area of Alberta. Although hydrocarbons were found at Rainbow, well flows were insufficient and the associated drilling costs were expensed.

Operations in Malaysia reported earnings of \$205.2 million in the 2013 quarter compared to earnings of \$224.1 million during the same period in 2012. Earnings in 2013 were below 2012 levels in Malaysia primarily due to lower natural gas sales prices and lower sales volumes for gas fields offshore Sarawak. Production expense was lower in the 2013 period by \$2.6 million primarily due to lower workover costs at the Kikeh field partially offset by higher expenses for planned maintenance at the Sarawak onshore gas receiving facility. Depreciation expense was \$21.2 million more in the 2013 quarter due to higher capital amortization unit rates partially offset by lower overall natural gas sales volumes.

Operations in Republic of the Congo had a loss of \$14.8 million in the first quarter of 2013 compared to income of \$1.6 million in the 2012 quarter. Production expense in 2013 was \$58.9 million more than the prior year due to higher charges for ongoing production operations and costs of \$11.3 million for a well workover. A significant Azurite field oil well went off production in the first quarter of 2012, which led to reduced daily production for the field in the last nine months of 2012 and the first quarter of 2013 compared to prior periods. With the lower production levels, the Company sells only about one oil cargo per year, whereas in earlier periods sales generally occurred each quarter. Although oil sales volumes were only slightly higher in 2013 than in 2012, production expense for the 2013 quarter increased more dramatically as the current quarter included costs associated with approximately 12 months of production operations, while the 2012 period included costs for approximately on calendar quarter of operations. The 2013 quarter had no depreciation expense due to the write-off of the remaining property costs for the Azurite field in 2012.

Other international operations reported a loss of \$65.6 million in the first quarter of 2013 compared to a loss of \$36.8 million in the 2012 period. The unfavorable variance in the current quarter was primarily associated with higher costs for unsuccessful exploratory drilling costs and acquisition of geophysical data in 2013. Dry hole expense of \$9.4 million in 2013 included unsuccessful drilling costs at a shallow-water prospect in Cameroon and final costs for the previously drilled Eupheme well offshore Australia. Higher geophysical costs in 2013 were primarily associated with seismic data and other studies in Australia, Cameroon and Indonesia.

On a worldwide basis, the Company's crude oil, condensate and gas liquids sales prices averaged \$96.00 per barrel in the first quarter 2013 compared to \$97.78 in the 2012 period. Total hydrocarbon production averaged 201,876 barrels of oil equivalent per day in the 2013 first quarter, up from 195,096 barrels equivalent per day produced in the 2012 quarter. Average crude oil and liquids production was 126,888 barrels per day in the first quarter of 2013 compared to 107,490 barrels per day in the first quarter of 2012, with the 18% increase primarily attributable to higher production in the Eagle Ford Shale area in South Texas, where an ongoing development program continues. Oil production in the Gulf of Mexico also increased in 2013 due to additional working interests acquired in late 2012 at the Thunder Hawk and Front Runner fields. Synthetic crude oil production was lower in 2013 primarily due to less reliable operations in the current quarter. Crude oil production in Malaysia was higher in 2013 due to a late 2012 production start up at the Kakap field, offshore Sabah. Oil production in the Republic of Congo at the Azurite field was lower in 2013 due to field decline and a well that went off production during the 2012 first quarter. North American natural gas sales prices averaged \$3.11 per thousand cubic feet (MCF) in the 2013 quarter compared to \$2.56 per MCF in the same quarter of 2012. Natural gas produced in 2013 at fields offshore Sarawak was sold at \$6.82 per MCF, compared to a sale price of \$7.80 per MCF in the 2012 quarter. Natural gas sales volumes averaged almost 450 million cubic feet per day in the first quarter 2013, down from 525 million cubic feet per day in the 2012 quarter. The 14% reduction in natural gas sales volumes in 2013 was primarily due to lower natural gas production at the Tupper and Tupper West areas in British Columbia in the 2013 quarter. Development drilling activities in the Tupper area have been voluntarily curtailed for the last several months due to weak North American gas sales prices. Additionally, 2013 natural gas sales volumes from fields offshore Sarawak were below 2012 levels primarily due to planned maintenance at our gas receiving facility.

Additional details about results of oil and gas operations are presented in the tables on page 20.

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)****Results of Operations (Contd.)**Exploration and Production (Contd.)

Selected operating statistics for the three-month periods ended March 31, 2013 and 2012 follow.

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)****Results of Operations (Contd.)**Refining and Marketing

The Company has announced its intention to separate its U.S. retail marketing business into a separate publicly owned company. The Company has also announced its intention to sell its U.K. refining and marketing operations. The separation process for the U.S. retail marketing business and the sale process for the U.K. downstream operations continue to progress.

The United States downstream segment includes retail and wholesale fuel marketing operations and two ethanol production facilities. The United Kingdom refining and marketing segment includes the Milford Haven, Wales refinery and U.K. retail and other refined products marketing operations.

Murphy's downstream income (loss) from continuing operations is presented below by segment.

(Millions of dollars)	Income (Loss)	
	Three Months Ended March 31,	
	2013	2012
Refining and marketing continuing operations		
United States	\$ 29.4	(7.2)
United Kingdom	(4.1)	3.0
Total	\$ 25.3	(4.2)

United States downstream results from continuing operations improved from a loss of \$7.2 million in the 2012 first quarter to a profit of \$29.4 million in the 2013 quarter. The favorable 2013 result was primarily due to stronger U.S. marketing results compared to the prior year's quarter. U.S. retail margins averaged \$0.110 per gallon in 2013 and \$0.071 per gallon in 2012. The Company closed the first quarter 2013 with 1,172 retail stations in the U.S., an increase of 39 sites compared to a year ago. The Company signed a contract with Walmart Stores in late 2012 that will provide access to more than 200 additional station sites at Walmart Supercenters over the next three years. Overall, the retail fuel business sold 1.8% more fuel volume in the 2013 quarter compared to 2012, but volume on a per-store basis in the 2013 quarter was 1.5% below 2012. Sales volumes were adversely affected by one less calendar day in the 2013 quarter. Total margin on sales of merchandise was about 1% lower in 2013 compared to 2012, primarily due to less sales volumes, mostly caused by one less day in the current quarter, and weaker average sales prices for cigarettes in the current period. Operating results for other marketing operations in the U.S. also improved in 2013 compared to the prior year due to both higher per gallon margins for fuel moved through product terminals and higher prices for ethanol renewable identification numbers (RINs) sold in 2013. Earnings from ethanol production operations were slightly higher in 2013 than 2012, primarily due to improved sales prices for dried distillers grain at the Hankinson, North Dakota plant, which more than offset weaker ethanol crush spreads at the Hereford, Texas plant in the current year.

Refining and marketing operations in the United Kingdom had a net loss of \$4.1 million in the first quarter of 2013 compared to income of \$3.0 million in the same quarter of 2012. The U.K. results in 2013 were unfavorably affected compared to 2012 by weaker margins at the Milford Haven, Wales refinery in the current quarter. The U.K. refining and marketing operations had a negative net margin of \$0.03 per barrel in 2013, unfavorable to the positive margin of \$0.79 per barrel in 2012. Crude oil throughput volumes at the Milford Haven refinery were also lower at 112,411 barrels per day during the 2013 quarter compared to throughputs of 127,001 barrels per day in the 2012 quarter. The Milford Haven refinery had certain units down for scheduled maintenance in the 2013 quarter. U.K. marketing operating results were stronger during 2013 than in the prior year due to improved margins for retail station and wholesale fuel operations.

Worldwide petroleum product sales were 424,072 barrels per day in the 2013 quarter, down from 450,527 barrels per day a year ago. The decrease in 2013 sales volumes compared to the prior year was attributable to lower U.S. fuel sales volumes through product terminals, plus lower motor fuel production available for sale in the U.K. due to planned maintenance carried out at the Milford Haven refinery.

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)****Results of Operations (Contd.)****Refining and Marketing (Contd.)**

Selected operating statistics for the three-month periods ended March 31, 2013 and 2012 follow.

	Three Months Ended	
	2013	March 31, 2012
<b>United States retail marketing:</b>		
Fuel margin per gallon*	\$ 0.110	\$ 0.071
Gallons sold per store month	250,952	254,806
Merchandise sales revenue per store month	\$ 146,986	\$ 152,923
Merchandise margin as a percentage of merchandise sales	12.9%	13.0%
Store count at end of period (Company operated)	1,172	1,133
<b>United Kingdom refining and marketing unit margins per barrel</b>	<b>\$ (0.03)</b>	<b>\$ 0.79</b>
Petroleum products sold barrels per day	424,072	450,527
United States	305,794	319,976

Kerosine	15,465	16,089
Diesel and home heating oils	40,604	40,340
Residuals	12,135	15,586
LPG and other	4,160	10,593
Fuel and loss	2,984	3,569

\* Represents net sales prices for fuel less purchased cost of fuel.

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)****Results of Operations (Contd.)**Corporate

Corporate activities, which include interest income and expense, foreign exchange effects, and corporate overhead not allocated to operating functions, had net costs of \$49.2 million in the 2013 first quarter compared to net costs of \$27.3 million in the first quarter of 2012. The results for corporate activities were unfavorable in 2013 compared to 2012 primarily due to higher expenses associated with administration and debt financing in the just completed quarter. The Company also incurred after-tax losses of \$4.1 million in the 2013 quarter on transactions denominated in foreign currencies compared to after-tax losses of \$1.5 million in the 2012 quarter. Higher administrative costs in 2013 were primarily associated with overall employee compensation and professional fees associated with the upcoming separation of the U.S. retail marketing business. The Company's net interest expense increased in 2013 due to higher average borrowing levels partially offset by larger amounts of interest costs capitalized to oil field development projects.

Discontinued Operations

The Company sold two U.K. oil and gas properties in the first quarter 2013. See Note D of the consolidated financial statements for further information. The Company has accounted for U.K. oil and gas assets as discontinued operations in all periods presented. Income from discontinued operations was \$152.6 million in the first three months of 2013, compared to income of \$8.6 million in the 2012 quarter. The 2013 quarter included a \$147.4 million after-tax gain on disposal of the two properties. The one remaining field at Mungo/Monan is expected to be sold in the second quarter 2013.

**Financial Condition**

Net cash provided by operating activities was \$921.1 million for the first three months of 2013 compared to \$991.0 million during the same period in 2012. Cash provided by operating activities of discontinued operations was \$13.9 million and \$13.4 million in the 2013 and 2012 periods, respectively. Changes in operating working capital other than cash and cash equivalents provided cash of \$211.5 million in the first three months of 2013, compared to cash provided of \$301.1 million in the first three months of 2012. Cash was provided by working capital in 2013 primarily due to a combination of higher income taxes payable and lower accounts receivable at March 31, 2013 compared to December 31, 2012. Cash of \$130.4 million in the 2013 period and \$507.3 million in 2012 was generated from maturity of Canadian government securities that had maturity dates greater than 90 days at time of acquisition. The sale of two oil and gas properties in the United Kingdom provided cash proceeds of \$211.5 million in the 2013 quarter.

Significant uses of cash in both years were for dividends, which totaled \$59.7 million in 2013 and \$53.4 million in 2012, and for property additions and dry holes, which including amounts expensed, were \$1,035.0 million and \$561.7 million in the three-month periods ended March 31, 2013 and 2012, respectively. The purchase of Canadian government securities with maturity dates greater than 90 days at acquisition used cash of \$230.3 million in the 2013 period and \$469.6 million in the 2012 period. Cash used for property additions and other investing activities of discontinued operations totaled \$8.0 million in 2013 and \$5.6 million in 2012. Total accrual basis capital expenditures were as follows:

(Millions of dollars)	Three Months Ended	
	March 31,	
	2013	2012
Capital expenditures – continuing operations		
Exploration and production	\$ 966.0	706.7
Refining and marketing	70.4	22.8
Corporate and other	3.8	1.8
<b>Total capital expenditures – continuing operations</b>	<b>\$ 1,040.2</b>	<b>731.3</b>

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)****Financial Condition (Contd.)**

A reconciliation of property additions and dry hole costs in the Consolidated Statements of Cash Flows to total capital expenditures for continuing operations follows.

(Millions of dollars)	Three Months Ended March 31,	
	2013	2012
Property additions and dry hole costs per cash flow statements	\$ 1,035.0	561.7
Geophysical and other exploration expenses	52.1	23.7
Capital expenditure accrual changes	(46.9)	145.9
Total capital expenditures continuing operations	\$ 1,040.2	731.3

Working capital (total current assets less total current liabilities) at March 31, 2013 was \$826.7 million, an increase of \$127.2 million from December 31, 2012. This level of working capital does not fully reflect the Company's liquidity position, because the lower historical costs assigned to inventories under last-in first-out accounting were \$623.7 million below fair value at March 31, 2013.

At March 31, 2013, long-term notes payable of \$2,507.3 million had increased \$262.1 million from December 31, 2012. A summary of capital employed at March 31, 2013 and December 31, 2012 follows.

(Millions of dollars)	March 31, 2013		Dec. 31, 2012	
	Amount	%	Amount	%
Capital employed				
Long-term debt	\$ 2,507.3	21.5%	\$ 2,245.2	20.1%
Stockholders' equity	9,138.5	78.5	8,942.0	79.9
Total capital employed	\$ 11,645.8	100.0%	\$ 11,187.2	100.0%

The Company's ratio of earnings to fixed charges was 11.0 to 1 for the three-month period ended March 31, 2013.

Cash and invested cash are maintained in several operating locations outside the United States. At March 31, 2013, cash, cash equivalents and cash temporarily invested in Canadian government securities held outside the U.S. included approximately \$290 million in Canada, \$181 million in the U.K. and \$758 million in Malaysia. In certain cases, the Company could incur taxes or other costs should these cash balances be repatriated to the U.S. in future periods. This could occur due to withholding taxes and/or potential additional U.S. tax burden when less than the U.S. Federal tax rate of 35% has been paid for cash taxes in foreign locations. A lower cash tax rate is often paid in foreign countries in the early years of operations when accelerated tax deductions exist to incent oil and gas investments; cash tax rates are generally higher in later years after accelerated tax deductions in early years are exhausted. Canada collects a 5% withholding tax on any cash repatriated to the United States.

**Accounting and Other Matters**

In December 2011, the Financial Accounting Standards Board (FASB) issued an accounting standards update that requires enhanced disclosures about financial instruments and derivative instruments that are either offset in the balance sheet or are subject to an enforceable master netting arrangement or similar agreement. The guidance was effective for all interim and annual periods beginning on or after January 1, 2013. These disclosures are presented in Note K to the consolidated financial statements.

In February 2013, the FASB issued an accounting standards update that requires additional disclosures for reclassification adjustments from accumulated other comprehensive income (AOCI). These additional disclosures include changes in AOCI balances by component and

## Edgar Filing: MURPHY OIL CORP /DE - Form 10-Q

significant items reclassified out of AOCI. These disclosures must be presented either on the face of the affected financial statement or in the notes to the financial statements. The disclosures are effective for Murphy Oil beginning in the first quarter of 2013 and are to be provided on a prospective basis. These disclosures are presented in Note L to the consolidated financial statements.

---

**Table of Contents**

***ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)***

***Accounting and Other Matters (Contd.)***

The United States Congress passed the Dodd-Frank Act (the Act) in 2010. As mandated by the Act, the U.S. Securities and Exchange Commission (SEC) has recently issued rules regarding annual disclosures for purchases of conflict minerals and payments made to the U.S. Federal and all foreign governments by extractive industries, including oil and gas companies. These two rules are described below.

Conflict minerals are defined as tin, tantalum, tungsten and gold which originate from the Democratic Republic of Congo or adjoining countries. The Company is currently investigating whether its activities will require an annual conflict minerals filing. If applicable, the first annual report for conflict minerals must be filed by May 31, 2014 for the calendar year of 2013.

Due to its activities as a worldwide exploration company and a producer of oil and natural gas in several countries, the Company will be required to report annual payments made to the U.S. Federal and all foreign governments. The recent SEC rules require disclosures of (a) the type and total amount of payments made for each project associated with extraction activities, and (b) the type and total amount of payments made to each government. The types of payments covered by the rules include taxes, royalties, fees, production entitlements, bonuses and other material benefits that are part of the commonly recognized revenue stream for oil and gas companies. The annual disclosure filing must be made within 150 days of the fiscal year-end (May 30, 2014 for the 2013 filing) and will first be required for fiscal years ending after September 30, 2013. The transition rules for 2013 allow Murphy's first filing to disclose payments for the period from October 1 to December 31, 2013. The oil and gas industry has challenged in U.S. Federal court the rules set forth by the SEC. The Company cannot predict the outcome of this court challenge.

**Outlook**

Average crude oil prices in April 2013 weakened compared to the average price during the first quarter of 2013 due to concerns about global economic growth, particularly in China and other Asian countries. North American natural gas prices, however, strengthened in April 2013 principally due to cooler than normal spring temperatures across much of the continent. The Company expects its total oil and natural gas production to average about 202,000 barrels of oil equivalent per day in the second quarter 2013. U.S. retail marketing margins improved in April versus the average margins achieved in the first quarter 2013. The Company currently anticipates total capital expenditures for the full year 2013 to be approximately \$4.4 billion.

The Company will primarily fund its capital program in 2013 using operating cash flow, but will supplement funding where necessary using borrowings under available credit facilities. The Company's 2013 budget calls for borrowings of long-term debt during the year to fund a portion of the capital program. If oil and/or natural gas prices weaken, actual cash flow generated from operations could be reduced such that higher than anticipated borrowings might be required during the year to maintain funding of the Company's ongoing development projects. Additionally, the 2013 budget assumes further share repurchases under the previously announced share buyback program of up to \$1.0 billion. Through March 31, 2013, the Company had funded a \$250 million accelerated share repurchase program with a major financial institution. The level of these share repurchases is expected to influence the amount of borrowings under credit facilities during 2013.

The Company has announced that it plans to exit the U.K. refining and marketing business. The sale process for this U.K. business continues to progress in early 2013. Should the Company be unable to sell its U.K. refining and marketing assets on acceptable terms, this could require additional borrowings under credit facilities during 2013.

In 2012, the Company announced its intention to separate its U.S. retail marketing business into a stand-alone publicly owned company. At the present time, this separation is expected to be completed in 2013. The Company expects that the stand-alone U.S. retail marketing business will have outstanding debt and will provide Murphy Oil Corporation with a cash dividend upon separation. The level of this cash dividend also could influence the amount of debt outstanding for Murphy Oil during 2013.

***ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS (Contd.)***

***Outlook (Contd.)***

After the anticipated separation of the U.S. retail marketing business from Murphy Oil Corporation during 2013, and the desired sale of the U.K. downstream business, the Company is expected to be fundamentally different. The Company will have significantly lower sales revenue as the U.S. and U.K. businesses generated about 80% of Murphy's consolidated revenue during the first quarter 2013. For the first quarter 2013, the combined U.S. and U.K. businesses generated about 10% of income from continuing operations before considering unallocated corporate net costs. Also, the two businesses made up about 82% of the Company's workforce at March 31, 2013. The Company also anticipates that without these operations, it may no longer qualify as a member of the Fortune 500 group of companies. Murphy Oil is anticipated to be an independent oil and gas company in the future and will not have a significant refining and marketing business as a diversification to its oil and gas business. This decrease in size and change in diversification could impact its credit rating, and could, although not expected to, impact its ability to repay long-term debt obligations when due.

As noted above, crude oil sales prices weakened in April 2013. Should these prices continue to weaken in the future, it is possible that certain investments in oil properties could become impaired in a future period.

**Forward-Looking Statements**

This Form 10-Q contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management's current views concerning future events or results, are subject to inherent risks and uncertainties. Factors that could cause actual results to differ materially from those expressed or implied in our forward-looking statements include, but are not limited to, the volatility and level of crude oil and natural gas prices, the level and success rate of our exploration programs, our ability to maintain production rates and replace reserves, customer demand for our products, adverse foreign exchange movements, political and regulatory instability, and uncontrollable natural hazards. Factors that could cause the forecasted separation of its U.S. retail marketing business, as discussed in this Form 10-Q, not to occur include, but are not limited to, a failure to obtain necessary regulatory approvals, a failure to obtain assurances of anticipated tax treatment, a deterioration in the business or prospects of Murphy or its U.S. retail marketing business, adverse developments in Murphy or its U.S. retail marketing business markets, and adverse developments in the U.S. or global capital markets, credit markets or economies generally. Additionally, the Company may be unable to sell its U.K. downstream business as it desires to do because it may fail to execute a sale of these operations on acceptable terms. For further discussion of risk factors, see Murphy's 2012 Annual Report on Form 10-K on file with the U.S. Securities and Exchange Commission. Murphy undertakes no duty to publicly update or revise any forward-looking statements.

***ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK***

The Company is exposed to market risks associated with interest rates, prices of crude oil, natural gas and petroleum products, and foreign currency exchange rates. As described in Note K to this Form 10-Q report, Murphy periodically makes use of derivative financial and commodity instruments to manage risks associated with existing or anticipated transactions.

There were short-term commodity derivative contracts in place at March 31, 2013 to hedge the purchase price of corn and the sales prices of wet and dried distillers grain at the Company's ethanol production facilities. A 10% increase in the respective benchmark price of these commodities would have increased the recorded net liability associated with these derivative contracts by approximately \$1.7 million, while a 10% decrease would have reduced the recorded net liability by a similar amount. Changes in the fair value of these derivative contracts generally offset the changes in the value for an equivalent volume of these feedstocks.

There were short-term derivative foreign exchange contracts in place at March 31, 2013 to hedge the value of the U.S. dollar against two foreign currencies. A 10% strengthening of the U.S. dollar against these foreign currencies would have increased the recorded net liability associated with these contracts by approximately \$26.9 million, while a 10% weakening of the U.S. dollar would have decreased the recorded net liability by approximately \$31.5 million. Changes in the fair value of these derivative contracts generally offset the financial statement impact of an equivalent volume of foreign currency exposures associated with other assets and/or liabilities.

***ITEM 4. CONTROLS AND PROCEDURES***

Under the direction of its principal executive officer and principal financial officer, controls and procedures have been established by the Company to ensure that material information relating to the Company and its consolidated subsidiaries is made known to the officers who certify the Company's financial reports and to other members of senior management and the Board of Directors.

Based on the Company's evaluation as of the end of the period covered by the filing of this Quarterly Report on Form 10-Q, the principal executive officer and principal financial officer of Murphy Oil Corporation have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by Murphy Oil Corporation in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

There have been no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II OTHER INFORMATION**

***ITEM 1. LEGAL PROCEEDINGS***

In 2011, a subsidiary of Murphy was notified by the U.K. Environment Agency (EA) that it failed to surrender sufficient greenhouse gas emission allowances, which Murphy self-reported to the EA in 2010. The EA had issued a civil penalty notice of approximately \$1.7 million. In March 2013, the EA withdrew its penalty notice and the matter was closed.

In March 2013, a subsidiary of the Company paid a fine amounting to \$151,250 to the U.S. Department of Transportation for violations of the pipeline and hazardous Materials Safety Administration (PHMSA), Office of Pipeline Safety (OPS) of 49 C.F.R. Part 195 from an on-site pipeline safety inspection of its former Superior, Wisconsin refinery. The subsidiary had recorded an expense related to this fine in a prior year.

Murphy is engaged in a number of legal proceedings, all of which Murphy considers routine and incidental to its business. Based on information currently available to the Company, the ultimate resolution of environmental and legal matters referred to in this note is not expected to have a material adverse effect on the Company's net income, financial condition or liquidity in a future period.

**Table of Contents****ITEM 1A. RISK FACTORS**

The Company's operations in the oil and gas business naturally lead to various risks and uncertainties. These risk factors are discussed in Item 1A. Risk Factors in our 2012 Form 10-K filed on February 28, 2013. The Company has not identified any additional risk factors not previously disclosed in its 2012 Form 10-K report.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS****Murphy Oil Corporation****Issuer Purchases of Equity Securities**

Period	Total Number of Shares Purchased*	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs*
January 1, 2013 to January 31, 2013		\$		\$ 750,000,000
February 1, 2013 to February 28, 2013				750,000,000
March 1, 2013 to March 31, 2013				750,000,000
Total January 1, 2013 to March 31, 2013				<b>750,000,000</b>

\* On October 16, 2012, the Company announced that its Board of Directors had authorized a buyback of up to \$1.0 billion of the Company's Common stock. On December 10, 2012, the Company announced that it had entered into a variable term, capped accelerated share repurchase transaction (ASR) with a major financial institution to repurchase an aggregate of \$250 million of the Company's Common stock. The total aggregate number of shares repurchased pursuant to this ASR will be determined by reference to the Rule 10b-18 volume-weighted price of the Company's Common stock, less a fixed discount, over the term of the ASR, subject to a minimum number of shares. The ASR is expected to be completed in May 2013. Through March 31, 2013, the minimum amount of Common stock totaling 3,867,550 shares had been delivered to the Company pursuant to the ASR. Any remaining shares will be delivered to the Company upon the completion of the ASR program.
