Immediate Release: July 17, 2014

#### CP reports Q2-2014 net income of C\$371M or C\$2.11 per diluted share

#### Delivers strongest financial results in company s history

Calgary, AB - Canadian Pacific Railway Limited (TSX: CP) (NYSE: CP) today announced record Q2 2014 financial results.

Reported net income in the second quarter was \$371 million, or \$2.11 per diluted share, versus \$252 million, or \$1.43 per share, in the second quarter of 2013. This represents a 48 per cent year-over-year improvement in earnings per share.

## SECOND-QUARTER 2014 RESULTS COMPARED WITH SECOND-QUARTER 2013:

Total revenues were \$1,681 million, an increase of 12 per cent

Operating expenses were \$1,094 million, an increase of 2 per cent

Operating income was \$587 million, an increase of 40 per cent

Operating ratio was 65.1 per cent, a 680 basis point improvement

CP delivered another record quarter, said E. Hunter Harrison, CP s Chief Executive Officer. The team has made great strides in my two years at CP and they continue to demonstrate resiliency by delivering these results despite continued operational challenges in the US Midwest after a devastating winter. The future is very promising for the railroad as we transition towards leveraging our lower cost structure and improved service.

#### Note on forward-looking information

This news release contains certain forward-looking information within the meaning of applicable securities laws relating, but not limited, to our operations, priorities and plans, anticipated financial performance, purchases of common shares for cancellation under CP s share repurchase program, future sources of capital, business prospects, planned capital expenditures, programs and strategies. This forward-looking information also includes, but is not limited to, statements concerning expectations, beliefs, plans, goals, objectives, assumptions and statements about possible future events, conditions, and results of operations or performance. Forward-looking information may contain statements with words or headings such as financial expectations, key assumptions, anticipate, believe, expect, will, outlook, should or similar words suggesting future outcomes.

Undue reliance should not be placed on forward-looking information as actual results may differ materially from the forward-looking information. Forward-looking information is not a guarantee of future performance. By its nature,

CP s forward-looking information involves numerous assumptions, inherent risks and uncertainties that could cause actual results to differ materially from the forward-looking information, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks in agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; changes in commodity prices; uncertainty surrounding timing and volumes of commodities being shipped via CP; inflation; changes in laws and regulations, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising

1

from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions and discount rates on the financial position of pension plans and investments; and various events that could disrupt operations, including severe weather, droughts, floods, avalanches and earthquakes as well as security threats and governmental response to them, and technological changes. The foregoing list of factors is not exhaustive.

These and other factors are detailed from time to time in reports filed by CP with securities regulators in Canada and the United States. Reference should be made to Management's Discussion and Analysis in CP's annual and interim reports, Annual Information Form and Form 40-F. Readers are cautioned not to place undue reliance on forward-looking information. Forward-looking information is based on current expectations, estimates and projections and it is possible that predictions, forecasts, projections, and other forms of forward-looking information will not be achieved by CP. Except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

#### **About Canadian Pacific**

Canadian Pacific (TSX:CP)(NYSE:CP) is a transcontinental railway in Canada and the United States with direct links to eight major ports, including Vancouver and Montreal, providing North American customers a competitive rail service with access to key markets in every corner of the globe. CP is growing with its customers, offering a suite of freight transportation services, logistics solutions and supply chain expertise. Visit www.cpr.ca to see the rail advantages of Canadian Pacific.

## **CANADIAN PACIFIC RAILWAY LIMITED**

## NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2014

(unaudited)

## 1 Basis of presentation

These unaudited interim consolidated financial statements of Canadian Pacific Railway Limited (CP, or the Company), expressed in Canadian dollars, reflect management s estimates and assumptions that are necessary for their fair presentation in conformity with accounting principles generally accepted in the United States of America (GAAP). They do not include all disclosures required under GAAP for annual financial statements and should be read in conjunction with the 2013 annual consolidated financial statements. The accounting policies used are consistent with the accounting policies used in preparing the 2013 annual consolidated financial statements.

CP s operations can be affected by seasonal fluctuations such as changes in customer demand and weather-related issues. This seasonality could impact quarter-over-quarter comparisons.

In management s opinion, the unaudited interim consolidated financial statements include all adjustments (consisting of normal and recurring adjustments) necessary to present fairly such information. Interim results are not necessarily indicative of the results expected for the fiscal year.

#### 2 Future accounting changes

## Reporting discontinued operations and disclosures of disposals of components

In April 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, an amendment to FASB Accounting Standards Codification (ASC) Topic 205 and Topic 360. The update amends the definition of a discontinued operation in Topic 205, expands disclosure requirements for transactions that meet the definition of a discontinued operation and requires entities to disclose information about individually significant components that are disposed of or held for sale and do not qualify as discontinued operations. In addition, an entity is required to separately present assets and liabilities of a discontinued operation for all comparative periods and separately present assets and liabilities of assets held for sale in the initial period in which the disposal group is classified as held for sale on the face of the consolidated balance sheets. For each period in which assets and liabilities are separately presented on the consolidated balance sheets, those amounts should not be offset and presented as a single amount. This ASU will be effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2014, and will be applied prospectively. The adoption of this ASU is not expected to have a material impact to the Company s financial statements.

#### **Revenue from contracts with customers**

In May 2014, FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, a new FASB ASC, Topic 606, which supersedes the revenue recognition requirements in Topic 605 and most industry-specific guidance

throughout the Industry Topics of the Codification. This new standard requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires enhanced disclosures about revenue to help users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. This ASU will be effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2016. Entities have the option of using either a full retrospective or a modified retrospective approach to adopt the ASU. The Company has not, at this time, ascertained the full impact on the consolidated financial statements from the adoption of this new standard but does not expect the impact to be material.

#### 4 Income taxes

	For the three months			For the six months					
	ended June 30					ended June 30			
(in millions of Canadian dollars)	20	014	20	13	2	014	2	013	
Current income tax expense	\$	159	\$	5	\$	169	\$	14	
Deferred income tax expense (recovery)		(15)		87		74		150	
Income tax expense	\$	144	\$	92	\$	243	\$	164	

The effective income tax rate for the three and six months ended June 30, 2014 was 28% (three and six months ended June 30, 2013 27% and 26%, respectively). The lower rate in 2013 was primarily the result of a benefit recognized for a U.S. federal track maintenance credit of \$6 million for 2012 enacted in the first quarter of 2013.

## 5 Earnings per share

At June 30, 2014, the number of shares outstanding was 172.8 million (June 30, 2013 175.0 million).

Basic earnings per share have been calculated using net income for the period divided by the weighted-average number of shares outstanding during the period.

The number of shares used in earnings per share calculations is reconciled as follows:

	For the thre	ee months	For the six	x months
	ended J	ended June 30		
(in millions)	2014	2013	2014	2013
Weighted-average basic shares outstanding	174.4	174.9	174.9	174.6
Dilutive effect of stock options	1.5	1.4	1.6	1.5
Weighted-average diluted shares outstanding	175.9	176.3	176.5	176.1

For the three and six months ended June 30, 2014, there were 124,093 options and 120,930 options, respectively, excluded from the computation of diluted earnings per share because their effects were not dilutive (three and six months ended June 30, 2013 5,867 and 55,375, respectively).

## 6 Assets held for sale

On May 30, 2014, the Company completed the sale of the west end of Dakota, Minnesota and Eastern Railroad ( DM&E West ) to Genesee & Wyoming Inc. ( G&W ) for net proceeds of U.S. \$218 million (CDN \$236 million), subject to closing adjustments to be finalized between the Company and G&W in the third quarter of 2014.

#### 7 Shareholders Equity

On February 20, 2014, the Board of Directors of the Company approved a share repurchase program, and in March 2014, the Company filed a new normal course issuer bid to purchase, for cancellation, up to 5.3 million of its outstanding Common Shares. Under the filing, share purchases may be made during the 12-month period that began March 17, 2014, and ends March 16, 2015. The purchases are made at the market price on the day of purchase, with consideration allocated to share capital up to the average carrying amount of the shares, and any excess allocated to retained earnings.

The following table provides the activities under the share repurchase program:

	e three months ed June 30 2014	he six months June 30 2014
Number of common shares		
repurchased	2,702,232	3,269,982
Weighted-average price per share <sup>(1)</sup>	\$ 176.86	\$ 172.90
Amount of repurchase (in millions) <sup>(1)</sup>	\$ 478	\$ 565

<sup>(1)</sup> Includes brokerage fees.

#### 8 Financial instruments

#### A. Fair values of financial instruments

The Company categorizes its financial assets and liabilities measured at fair value in line with the fair value hierarchy established by GAAP that prioritizes, with respect to reliability, the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels. Level 1 inputs consist of quoted prices (unadjusted) in active markets for identical assets and liabilities and give the highest priority to these inputs. Level 2 and 3 inputs are based on significant other observable inputs and significant unobservable inputs, respectively, and give lower priority to these inputs.

When possible, the estimated fair value is based on quoted market prices and, if not available, estimates from third party brokers. For non-exchange traded derivatives classified in Level 2, the Company uses standard valuation techniques to calculate fair value. Primary inputs to these techniques include observable market prices (interest, foreign exchange and commodity) and volatility, depending on the type of derivative and nature of the underlying risk. The Company uses inputs and data used by willing market participants when valuing derivatives and considers its own credit default swap spread as well as those of its counterparties in its determination of fair value.

The carrying values of financial instruments equal or approximate their fair values with the exception of long-term debt which has a fair value of approximately \$5,715 million at June 30, 2014 (December 31, 2013 - \$5,572 million) and a carrying value of \$4,725 million at June 30, 2014 (December 31, 2013 \$4,876 million). The estimated fair value of current and long-term borrowings has been determined based on market information where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company at period end. All derivatives and long-term debt are classified as Level 2.

# B. Financial risk management Derivative financial instruments

Derivative financial instruments may be used to selectively reduce volatility associated with fluctuations in interest rates, foreign exchange (FX) rates, the price of fuel and stock-based compensation expense. Where derivatives are designated as hedging instruments, the relationship between the hedging instruments and their associated hedged items is documented, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on the Consolidated Balance Sheet, commitments or forecasted transactions. At the time a derivative contract is entered into and at least quarterly thereafter, an assessment is made whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not the Company s intent to use financial derivatives or commodity instruments for trading or speculative purposes.

## 8 Financial instruments (continued)

## Foreign exchange management

The Company conducts business transactions and owns assets in both Canada and the United States. As a result, the Company is exposed to fluctuations in value of financial commitments, assets, liabilities, income or cash flows due to changes in FX rates. The Company may enter into foreign exchange risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. FX exposure is primarily mitigated through natural offsets created by revenues, expenditures and balance sheet positions incurred in the same currency. Where appropriate, the Company may negotiate with customers and suppliers to reduce the net exposure.

Occasionally the Company may enter into short-term FX forward contracts as part of its cash management strategy.

#### Net investment hedge

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in U.S. affiliates. The majority of the Company s U.S. dollar denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. This designation has the effect of mitigating volatility on net income by offsetting long-term FX gains and losses on U.S. dollar denominated long-term debt and gains and losses on its net investment. The effective portion recognized in Other comprehensive income for the three and six months ended June 30, 2014 was an unrealized foreign exchange gain of \$119 million and a loss of \$12 million, respectively (three and six months ended June 30, 2013 unrealized foreign exchange loss of \$110 million and \$177 million, respectively). There was no ineffectiveness during the three and six months ended June 30, 2014 and comparative periods.

## Foreign exchange forward contracts

The Company may enter into FX forward contracts to lock in the amount of Canadian dollars it has to pay on its U.S. denominated debt maturities.

At June 30, 2014, the Company had no remaining FX forward contracts to fix the exchange rate on U.S. denominated debt maturities. At December 31, 2013, the Company had FX forward contracts to fix the exchange rate on US\$100 million of principal outstanding on a capital lease due in January 2014, US\$175 million of its 6.50% Notes due in May 2018, and US\$100 million of its 7.25% Notes due in May 2019. These derivatives, which were accounted for as cash flow hedges, guaranteed the amount of Canadian dollars that the Company would repay when these obligations mature.

During the three months ended March 31, 2014, the Company settled the FX forward contract related to the repayment of a capital lease due in January 2014 for proceeds of \$8 million.

During the three months ended June 30, 2014, the Company de-designated and settled prior to maturity the FX forward contracts related to the repayment of its 6.50% Notes due in May 2018 and its 7.25% Notes due in May 2019 for proceeds of \$17 million to be settled in the third quarter of 2014.

During the three and six months ended June 30, 2014, the combined realized and unrealized foreign exchange loss was \$8 million and the combined realized and unrealized foreign exchange gain was \$3 million, respectively (three and six months ended June 30, 2013 unrealized gains of \$10 million and \$15 million, respectively), were recorded in Other income and charges in relation to these derivatives. Gains recorded in Other income and charges were largely offset by losses on the underlying debt which the derivatives were designated to hedge. Similarly, losses were largely offset by gains on the underlying debt.

At June 30, 2014, the realized gain derived from these FX forwards was \$17 million which was recorded in Accounts receivables with the offset reflected as realized gains of \$3 million in Accumulated other comprehensive loss and \$14 million in Retained earnings . At December 31, 2013, the unrealized gains derived from these FX forwards was \$25 million of which \$6 million was included in Other current assets and \$19 million in Other assets with the offsets reflected as unrealized gains of \$5 million in Accumulated other comprehensive loss and \$20 million in Retained earnings .

Amounts remaining in Accumulated other comprehensive loss at June 30, 2014 will be amortized to Other income and charges until the underlying debts which were hedged are repaid.

At June 30, 2014, the Company expected that, during the next twelve months, a pre-tax gain of \$1 million would be reclassified to Other income and charges .

## NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2014

(unaudited)

#### 9 Stock-based compensation

At June 30, 2014, the Company had several stock-based compensation plans, including stock option plans, various cash settled liability plans and an employee stock savings plan. These plans resulted in an expense of \$39 million for the three months ended June 30, 2014 and an expense of \$61 million for the six months ended June 30, 2014 (three and six months ended June 30, 2013, an expense of \$10 million and \$43 million, respectively).

## **Regular options**

In the six months ended June 30, 2014, under CP s stock option plans, the Company issued 375,430 regular options at the weighted-average price of \$169.00 per share, based on the closing price on the grant date.

Pursuant to the employee plans, these regular options may be exercised upon vesting, which is between 12 and 48 months after the grant date, and will expire after 10 years.

Under the fair value method, the fair value of the regular options at the grant date was \$17 million. The weighted-average fair value assumptions were approximately:

	For the s	six months
	ended Ju	ne 30, 2014
Grant price	\$	169.00
Expected option life (years) <sup>(1)</sup>		5.83
Risk-free interest rate <sup>(2)</sup>		1.65%
Expected stock price volatility <sup>(3)</sup>		28.63%
Expected annual dividends per share <sup>(4)</sup>	\$	1.40
Expected forfeiture rate <sup>(5)</sup>		1.40%
Weighted-average grant date fair value per		
regular options granted during the period	\$	46.46

Table of Contents 27

(3

<sup>(1)</sup> Represents the period of time that awards are expected to be outstanding. Historical data on exercise behaviour, or when available, specific expectations regarding future exercise behaviour, were used to estimate the expected life of the option.

<sup>(2)</sup> Based on the implied yield available on zero-coupon government issues with an equivalent remaining term at the time of the grant.

- Based on the historical stock price volatility of the Company s stock over a period commensurate with the expected term of the option.
- (4) Determined by the current annual dividend at the time of grant. The Company does not employ different dividend yields throughout the contractual term of the option.
- (5) The Company estimated forfeitures based on past experience. This rate is monitored on a periodic basis.

## Performance share unit ( PSU ) plan

In the six months ended June 30, 2014, the Company issued 165,390 PSUs with a grant date fair value of approximately \$25 million. These units attract dividend equivalents in the form of additional units based on the dividends paid on the Company s Common Shares. PSUs vest and are settled in cash, or in CP common shares approximately three years after the grant date, contingent upon CP s performance (performance factor). The fair value of PSUs is measured, both on the grant date and each subsequent quarter until settlement, using a Monte Carlo simulation model. The model utilizes multiple input variables that determine the probability of satisfying the performance factor and market conditions stipulated in the grant.

## Deferred share unit ( DSU ) plan

In the six months ended June 30, 2014, the Company granted 49,846 DSUs with a grant date fair value of approximately \$8 million. DSUs vest over various periods of up to 48 months and are only redeemable for a specified period after employment is terminated. An expense for DSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods.

## Restricted share unit ( RSU ) plan

In the six months ended June 30, 2014, the Company granted 15,641 RSUs with a grant date fair value of approximately \$3 million. RSUs are subject to time vesting over 36 months. An expense for RSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods.

## 10 Pensions and other benefits

In the three and six months ended June 30, 2014, the Company made contributions of \$20 million and \$39 million, respectively (three and six months ended 2013 - \$22 million and \$52 million, respectively) to its defined benefit pension plans. The net periodic benefit cost for defined benefit pension plans and other benefits recognized in the three and six months ended June 30, 2014 included the following components:

#### For the three months

	ended June 30								
			Ot	her					
	Pens	ions	benefits						
(in millions of Canadian dollars)	2014	2013	2014	2013

Recognized net actuarial loss	48	68		2					
Amortization of prior service costs	(17)	(17)							
Net periodic benefit (recovery) cost	\$ (13)	\$ 8	\$ 10	\$ 12					

#### For the six months

	ended June 30								
	Pens	ions	Other benefits						
(in millions of Canadian dollars)	2014	2013	2014	2013					
Current service cost (benefits earned by employees in the period)	\$ 53	\$ 68	\$ 7	\$ 8					
Interest cost on benefit obligation	238	223	12	11					
Expected return on fund assets	(378)	(373)							
Recognized net actuarial loss	95	134	1	3					
Amortization of prior service costs	(34)	(23)							
Net periodic benefit (recovery) cost	\$ (26)	\$ 29	\$ 20	\$ 22					

## 11 Contingencies

In the normal course of its operations, the Company becomes involved in various legal actions, including claims relating to injuries and damages to property. The Company maintains provisions it considers to be adequate for such actions. While the final outcome with respect to actions outstanding or pending at June 30, 2014 cannot be predicted with certainty, it is the opinion of management that their resolution will not have a material effect on the Company s financial position or results of operations individually and in aggregate.

## Legal proceedings related to Lac-Megantic rail accident

On July 6, 2013, a train carrying crude oil operated by Montreal, Maine and Atlantic Railway (MM&A) derailed and exploded in Lac-Megantic, Quebec on a section of a railway line owned by MM&A. The day before CP had interchanged the train to MM&A, but after the interchange MM&A exercised exclusive control over the train.

Following this incident, the Minster of Sustainable Development, Environment, Wildlife and Parks of Quebec issued an order directing named parties to recover the contaminants and to clean up and decontaminate the derailment. CP was later added as a named party in the administrative action on August 14, 2013.

A class action has also been filed in the Superior Court of Quebec on behalf of a class of persons and entities residing in, owning or leasing property in, operating a business in or physically present in Lac-Megantic. The law-suit seeks damage

14

## **CANADIAN PACIFIC RAILWAY LIMITED**

## NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2014

(unaudited)

#### 11 Contingencies (continued)

caused by the derailment including for wrongful deaths, personal injuries, and property damages. CP was added as a defendant on August 16, 2013. In the wake of the derailment and ensuing litigation, MM&A filed for bankruptcy in Canada and the United States.

At this early stage in the legal proceedings, any potential liability and the quantum of potential loss cannot be determined. Nevertheless, CP denies liability for MM&A s derailment and will vigorously defend itself in both proceedings or any proceeding that may be commenced in the future.

#### **Environmental liabilities**

Environmental remediation accruals cover site-specific remediation programs. The accruals for environmental remediation represent CP s best estimate of its probable future obligation and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Environmental remediation accruals are measured on an undiscounted basis unless a reliably determinable estimate as to amount and timing of costs can be established. The accruals are recorded when the costs to remediate are probable and reasonably estimable. Certain future costs to monitor sites are discounted at a risk free rate. Although the recorded accruals include CP s best estimate of all probable costs, CP s total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, are not expected to be material to CP s financial position, but may materially affect income in the particular period in which a charge is recognized. Costs related to existing, but as yet unknown, or future contamination will be accrued in the period in which they become probable and reasonably estimable.

The expense included in Purchased services and other for the three and six months ended June 30, 2014 was \$nil and \$1 million, respectively (three and six months ended June 30, 2013 \$nil and expense of \$1 million, respectively). Provisions for environmental remediation costs are recorded in Other long-term liabilities , except for the current portion which is recorded in Accounts payable and accrued liabilities . The total amount provided at June 30, 2014 was \$89 million (December 31, 2013 \$90 million). Payments are expected to be made over 10 years to 2024.

## 12 Reclassification of comparative figures

Billings to third parties for the recovery of costs incurred for freight car repairs and servicing have been reclassified from Purchased services and other to Compensation and benefits and Materials within Operating expenses, in order match the billings with the costs incurred on behalf of third parties. As a result, the changes to these components of Operating expenses for the three and six months ended June 30, 2013 are noted below. Operating expenses in total were unchanged as a result of this reclassification.

This Management s Discussion and Analysis (MD&A) is provided in conjunction with the Interim Consolidated Financial Statements and related notes for the three and six months ended June 30, 2014 prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). All information has been prepared in accordance with GAAP, except as described in Section 14, Non-GAAP Measures of this MD&A. Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars.

#### July 17, 2014

In this MD&A, our, us, we, CP, Canadian Pacific and the Company refer to Canadian Pacific Railway Limited (CPRL), CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL s subsidiaries, as the context may require. Other terms not defined in the body of this MD&A are defined in Section 23, Glossary of Terms.

Unless otherwise indicated, all comparisons of results for the second quarter and year to date of 2014 are against the results for the second quarter and year to date of 2013.

#### 1. BUSINESS PROFILE

Canadian Pacific Railway Limited, through its subsidiaries, operates a transcontinental railway in Canada and the United States (U.S.) and provides logistics and supply chain expertise. CP provides rail and intermodal transportation services over a network of approximately 13,700 miles, serving the principal business centres of Canada from Montreal, Quebec, to Vancouver, British Columbia (B.C.), and the U.S. Northeast and Midwest regions. Our railway feeds directly into the U.S. heartland from the East and West coasts. Agreements with other carriers extend the Company s market reach east of Montreal in Canada, throughout the U.S. and into Mexico. The Company transports bulk commodities, merchandise freight and intermodal traffic. Bulk commodities include Canadian grain, U.S. grain, coal, potash, and fertilizers and sulphur. Merchandise freight consists of finished vehicles and automotive parts, chemicals and plastics, crude oil, forest products, and metals, minerals, and consumer products. Intermodal traffic consists largely of high-value, time-sensitive retail goods in overseas containers that can be transported by train, ship and truck, and in domestic containers and trailers that can be moved by train and truck.

#### 2. STRATEGY

Canadian Pacific is driving change as it moves through its transformational journey to become the best railroad in North America, while creating long-term value for shareholders. The Company is focused on providing customers with industry leading rail service; driving sustainable, profitable growth; optimizing our assets; and reducing costs, while remaining a leader in rail safety.

Looking forward, CP is executing its strategic plan to become the lowest cost rail carrier. This plan is centred on five key foundations, which are the Company s performance drivers.

**Provide Service:** Providing efficient and consistent transportation solutions for the Company s customers. Doing what we say we are going to do is what drives CP by providing a reliable product with a lower cost operating model.

Centralized planning aligned with local execution is bringing the Company closer to the customer and accelerating decision-making.

**Control Costs:** Controlling and removing unnecessary costs from the organization, eliminating bureaucracy and continuing to identify productivity enhancements are the keys to success.

**Optimize Assets:** Through longer sidings, improved asset utilization, and increased train lengths, the Company is moving increased volumes with fewer locomotives and cars while unlocking capacity for future growth potential.

**Operate Safely:** Each year, CP safely moves millions of carloads of freight across North America while ensuring the safety of our people and the communities through which we operate. Safety is never to be compromised. Continuous research and development in state-of-the-art safety technology and highly focused employees ensure our trains are built for safe, efficient operations across our network.

**Develop People:** CP recognizes that none of the other foundations can be achieved without its people. Every CP employee is a railroader and the Company is shaping a new culture focused on a passion for service with integrity in everything it does. Coaching and mentoring managers into becoming leaders will help drive CP forward.

#### 3. FORWARD-LOOKING INFORMATION

This MD&A contains certain forward-looking statements within the meaning of the *United States Private Securities Litigation Reform Act* of 1995 and other relevant securities legislation. These forward-looking statements include, but are not limited to, statements concerning the Company's defined benefit pension expectations for 2014 and 2015, financial expectations for 2014, as well as statements concerning the Company's operations, anticipated financial performance, business prospects and strategies, as well as statements concerning the anticipation that cash flow from operations and various sources of financing will be sufficient to meet debt repayments and obligations in the foreseeable future, statements regarding future payments including income taxes and pension contributions, and capital expenditures. Forward-looking information typically contains statements with words such as anticipate, believe, expect, plan or similar words suggesting future outcomes.

Readers are cautioned not to place undue reliance on forward-looking information because it is possible that CP will not achieve predictions, forecasts, projections and other forms of forward-looking information. Current economic conditions render assumptions, although reasonable when made, subject to greater uncertainty. In addition, except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks in agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; inflation; changes in laws and regulations, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions on the financial position of pension plans and investments; and various events that could disrupt operations, including severe weather, droughts, floods, avalanches and earthquakes as well as security threats and the governmental response to them, and technological changes.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this MD&A. These more specific factors are identified and discussed in Section 20, Business Risks and elsewhere in this MD&A. Other risks are detailed from time to time in reports filed by CP with securities regulators in Canada and the United States.

### **Financial Assumptions**

#### Defined benefit pension expectations

Defined benefit pension contributions are currently estimated to be between \$90 million and \$110 million in each year from 2014 to 2016. This contribution level reflects the Company s intentions with respect to the rate at which the Company applies the voluntary prepayments made in previous years to reduce contribution requirements. Defined benefit pension income for 2014 and 2015 is expected to be approximately \$50 million for each year. These pension contributions and pension income estimates are based on a number of economic and demographic assumptions and are sensitive to changes in the assumptions or to actual experience differing from the assumptions. Pensions are discussed further in Section 21, Critical Accounting Estimates.

Canadian Pacific 2014 MD&A Q2

2

### Financial expectations for 2014

The Company expects revenue growth to be 6-7%, operating ratio of 65% or lower and diluted earnings per share (EPS) growth to be 30% or greater from 2013 annual diluted EPS, excluding significant items, of \$6.42, discussed further in Section 14, Non-GAAP Measures. CP plans to spend approximately \$1.2 to \$1.3 billion on capital programs in 2014, discussed further in Section 13, Liquidity and Capital Resources. Key assumptions for full year 2014 financial expectations include:

an average fuel cost per gallon of US\$3.50 per U.S. gallon;

defined benefit pension income of approximately \$50 million;

Canadian to U.S. dollar exchange rate of 1.05; and

an income tax rate of 28% discussed further in Section 10, Other Income Statement Items. Undue reliance should not be placed on these assumptions and other forward-looking information.

### 4. ADDITIONAL INFORMATION

Additional information, including the Company s Consolidated Financial Statements, press releases and other required filing documents, are available on SEDAR at www.sedar.com in Canada, on EDGAR at www.sec.gov in the U.S. and on the Company website at www.cpr.ca. Copies of such documents, as well as the Company s Notice of Intention to Make a Normal course Issuer Bid, may be obtained by contacting the Corporate Secretary s Office. The aforementioned documents are issued and made available in accordance with legal requirements and are not incorporated by reference into this MD&A.

### 5. FINANCIAL HIGHLIGHTS

	For the thre ended Ju		For the six months ended June 30		
(in millions, except percentages and per-share data)	2014	2013	2014	2013	
Revenues	\$ 1,681	\$ 1,497	\$ 3,190	\$ 2,992	
Operating income	587	420	1,010	782	
Net income	371	252	625	469	
Basic earnings per share	2.13	1.44	3.57	2.68	
Diluted earnings per share	2.11	1.43	3.54	2.66	
Dividends declared per share	0.3500	0.3500	0.7000	0.7000	
•					
Return on capital employed ( ROCE <sup>1)</sup> )	10.9%	8.7%	10.9%	8.7%	
Adjusted ROCE <sup>(2)(3)</sup>	13.7%	10.9%	13.7%	10.9%	
Operating ratio	65.1%	71.9%	68.3%	73.9%	
Free cash <sup>(3)(4)</sup>	519	178	534	171	
Total assets at June 30	17,012	15,519	17,012	15,519	
Total long-term financial liabilities at June 30 <sup>(5)</sup>	4,723	4,800	4,723	4,800	

- (1) ROCE is defined as earnings before interest and taxes ( EBIT ) (on a rolling twelve month basis), divided by the average for the year of total assets, less current liabilities, excluding current portion of long-term debt, as measured under GAAP, and it is discussed further in Section 14, Non-GAAP Measures.
- (2) Adjusted ROCE is defined as EBIT excluding significant items (on a rolling twelve month basis) divided by the average for the year of total assets, less current liabilities, excluding current portion of long-term debt, as measured under GAAP. Adjusted ROCE and EBIT excluding significant items are discussed further in Section 14, Non-GAAP Measures.
- (3) These measures have no standardized meanings prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures of other companies. These measures are discussed further in Section 14, Non-GAAP Measures.
- (4) A reconciliation of free cash to GAAP cash position is provided in Section 14, Non-GAAP Measures.
- (5) Excludes deferred income taxes: \$2,870 million and \$2,403 million; and other non-financial deferred liabilities of \$934 million and \$1,333 million at June 30, 2014 and 2013, respectively.

### 6. OPERATING RESULTS

#### **Income**

Operating income in the second quarter of 2014 was \$587 million, an increase of \$167 million, or 40%, from \$420 million in the same period of 2013. Operating income increased primarily due to:

higher overall shipments;

efficiency savings generated from improved operating performance, asset utilization and insourcing of certain IT activities;
higher freight rates;
lower casualty expense;
the favourable impact of the change in foreign exchange ( FX ); and
lower pension expense.  This increase in Operating income was partially offset by higher incentive and stock-based compensation.
Operating income in the first six months of 2014 was $$1,010$ million, an increase of $$228$ million, or $29\%$ from $$782$ million in the same period of $2013$ .
Operating income increased primarily due to:
higher shipments of Canadian originating grain, Domestic intermodal, and Metals, minerals and consumer products;
efficiency savings generated from improved operating performance, asset utilization and insourcing of certain IT activities;
lower pension expense;
the favourable impact of the change in foreign exchange ( FX ); and
lower casualty expense.  This increase in Operating income was partially offset by the unfavourable impact of harsh winter operating conditions and higher incentive and stock-based compensation.
Canadian Pacific 2014 MD&A Q2

Table of Contents 45

4

Net income was \$371 million in the second quarter of 2014, an increase of \$119 million, or 47%, from \$252 million in the same period of 2013. Net income was \$625 million for the first six months of 2014, an increase of \$156 million, or 33%, from \$469 million in the same period of 2013. These increases were primarily due to higher Operating income, partially offset by an increase in income tax expense.

## **Diluted Earnings per Share**

Diluted earnings per share (EPS) in the second quarter of 2014 was \$2.11, an increase of \$0.68, or 48%, from \$1.43 in the same period of 2013. Diluted EPS for the first six months of 2014 was \$3.54, an increase of \$0.88, or 33%, from \$2.66 in the same period of 2013. These increases were primarily due to higher net income.

## **Operating Ratio**

The operating ratio provides the percentage of revenues used to operate the railway, and is calculated as total operating expenses divided by total revenues. A lower percentage normally indicates higher efficiency in the operation of the railway. The operating ratio was 65.1% in the second quarter of 2014, compared with 71.9% in the same period of 2013. This improvement was primarily due to higher volumes generating higher freight revenues and efficiency savings partially offset by higher incentive and stock-based compensation. The operating ratio was 68.3% for the six months ended June 30, 2014, compared with 73.9% in the same period of 2013. These decreases were primarily due to higher volumes and efficiency savings, partially offset by higher incentive and stock-based compensation and the impact of harsh winter operating conditions.

## **Impact of Foreign Exchange on Earnings**

Fluctuations in foreign exchange affect the Company s results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. U.S. dollar-denominated revenues and expenses increase (decrease) when the Canadian dollar weakens (strengthens) in relation to the U.S. dollar.

Canadian to U.S. dollar		
Average exchange rates	2014	2013
For the three months ended June 30	\$1.10	\$ 1.02

Safety indicators	ĺ		` '	ĺ			
FRA personal injuries per 200,000							
employee-hours	1.84	1.51	22	1.73	1.62	7	
FRA train accidents per million train-miles	1.03	1.94	(47)	1.08	1.95	(45)	

- (1) Certain prior period figures have been revised to conform with current presentation or have been updated to reflect new information.
- (2) Incorporates a new reporting definition where average terminal dwell measures the average time a freight car resides within terminal boundaries.
- (3) Incorporates a new reporting definition where average train speed measures the line-haul movement from origin to destination including terminal dwell hours.
- (4) Includes gallons of fuel consumed from freight, yard and commuter service but excludes fuel used in capital projects and other non-freight activities.
- (5) An employee is defined as an individual, including trainees, who has worked more than 40 hours in a standard biweekly pay period. This excludes part time employees, contractors and consultants.
- (6) Workforce is defined as total employees plus part time employees, contractors and consultants.

The indicators listed in this table are key measures of the Company s operating performance. Definitions of these performance indicators are provided in Section 23, Glossary of Terms.

### **Operations Performance**

GTMs for the second quarter of 2014 were 71,333 million, which increased by 6% compared with 67,232 million in the same period of 2013. This increase was driven primarily by higher grain and coal traffic. GTMs for the first six months of 2014 decreased by 1% compared to the same period of 2013. This decrease was primarily due to lower overall traffic volumes in the Company s bulk franchise in the first quarter of 2014.

RTMs for the second quarter of 2014 were 38,429 million which increased by 7% compared with 35,991 million in the same period of 2013. RTMs for the first six months of 2014 were 72,804 million which increased by 1% compared with 72,154 million in the same period of 2013. RTMs are discussed further in Section 8, Lines of Business.

Train miles decreased by 3% in the second quarter of 2014, compared with the same period of 2013, and decreased by 8% for the first six months of 2014, compared to the same period of 2013. These reductions were primarily driven by improvements in operating efficiency.

Average train weight for the second quarter of 2014 was 8,178 tons, an increase of 707 tons or 9%, compared with 7,471 tons in the same period of 2013. Average train weights for the first six months of 2014 increased by 8% compared with the same period of 2013.

Canadian Pacific 2014 MD&A Q2

6

Average train length for the second quarter of 2014 was 6,880 feet, an increase of 436 feet or 7%, compared with 6,444 feet in the same period of 2013 and was 6,634 feet in the first six months of 2014, an increase of 4% compared with the same period of 2013.

Average train weight and length benefited significantly from improvements in operating plan efficiency, as well as longer and heavier bulk train designs, both of which leverage the siding extensions completed in 2013. This improvement was achieved despite the impact of harsh winter operating conditions in the first quarter of 2014.

Average terminal dwell increased by 26% and 40% in the second quarter and first six months of 2014, respectively, compared with the same periods of 2013. These increases were due to harsh winter operating conditions and continued operational challenges in the U.S. Midwest.

Average train speed decreased by 3% in the second quarter of 2014, compared with the same period of 2013. This decrease is due to continued operational challenges in the U.S. Midwest following a challenging winter. Average train speed decreased by 7%, in the first six months of 2014, compared with the same period of 2013. This decrease is primarily due to the impact of harsh winter operating conditions.

Locomotive productivity increased by 5% and 2% for the second quarter and the first six months of 2014, respectively, compared to the same periods of 2013. These increases were primarily a result of reductions in locomotive dwell and continued improvements in train weights, partially offset by a reduction in train speed.

Fuel efficiency improved by 5% and 4% for the second quarter and the first six months of 2014, respectively, compared to the same periods of 2013. These improvements were due to the continued execution of the Company s fuel conservation strategy and increased locomotive productivity from higher average train weights.

The average number of total employees in the second quarter of 2014 decreased by 684, or 4%, compared with the same period in 2013 and in the first six months of 2014 decreased by 680, or 4%, compared with the same period in 2013. These decreases were primarily due to job reductions as a result of continuing strong operational performance and natural attrition, partially offset by additional Information Services (IS) employees as part of the Company s insourcing strategy. Workforce was further decreased due to fewer contractors.

#### 8. LINES OF BUSINESS

#### **Total Revenue, Volumes and Freight Rates**

	For the three months			For the six months				
	ended June 30				ended June 30			
	2014	2013	% Change	2014	2013	% Change		
Freight revenues (in millions)	\$ 1,642	\$ 1,458	13	\$ 3,116	\$ 2,917	7		
Other revenue (in millions)	39	39		74	75	(1)		
Total revenues (in millions)	1,681	1,497	12	3,190	2,992	7		
Carloads (in thousands)	689	668	3	1,307	1,327	(2)		
Revenue ton-miles (in millions)	38,429	35,991	7	72,804	72,154	1		

Freight revenue per carload (dollars)	\$ 2,383	\$ 2,183	9	\$ 2,384	\$ 2,198	8
Freight revenue per revenue ton-mile (cents)	4.27	4.05	5	4.28	4.04	6

The Company s revenues are primarily derived from transporting freight. Other revenue is generated from leasing of certain assets, switching fees, contracts with passenger service operators, and logistical management services. Changes in freight volumes generally contribute to corresponding changes in freight revenues and certain variable expenses, such as fuel, equipment rents and crew costs.

#### **Freight Revenues**

Freight revenues are earned from transporting bulk commodities, merchandise and intermodal goods, and include fuel recoveries billed to the Company s customers. Freight revenues were \$1,642 million in the second quarter of 2014, an increase of \$184 million, or 13%, from \$1,458 million in the same period of 2013. This increase was primarily due to:

higher volumes of Canadian originating grain shipments, Domestic intermodal and expressway containers, U.S. originating grain shipments, and Metals, minerals and consumer products;

the favourable impact of the change in FX; and

Canadian Pacific 2014 MD&A Q2

7

higher freight rates.

This increase was partially offset by lower shipments in International intermodal, Forest products, and Fertilizers and sulphur due to:

the exit of certain customer contracts;

lower shipments of fertilizers as a result of high inventories following a late harvest in 2013 and a narrow spring application window; and

the delayed return to full production of customer facilities following a challenging winter. Freight revenues were \$3,116 million in the first six months of 2014, an increase of \$199 million, or 7%, from \$2,917 million in the same period of 2013. This increase was primarily due to:

the favourable impact of the change in FX;

higher volumes of Canadian originating grain shipments, Frac sand in Metals, minerals and consumer products, and Domestic intermodal and expressway container volumes; and

higher freight rates.

This increase was partially offset by lower shipments in International intermodal, Forest products, and Fertilizers and sulphur due to the exit of certain customer contracts and lower shipments in certain lines of business due to harsh winter operating conditions.

Revenue ton miles (RTMs) were 38,429 million in the second quarter of 2014, an increase of 2,438 million, or 7%, compared to the same period of 2013. This increase was primarily due to higher shipments of:

Canadian originating grain;

Canadian originating metallurgical coal;

Domestic intermodal and expressway containers; and

Frac sand in Metals, minerals and consumer products. This increase in RTMs was offset by lower shipments of:

International intermodal;
Forest product shipments; and
Fertilizers and sulphur.  RTMs were 72,804 million for the first six months of 2014, an increase of approximately 650 million, or 1%, compared to the same period of 2013. This increase in RTMs was primarily due to higher volumes of:
Canadian originating grain;
Frac sand in Metals, minerals and consumer products;
Domestic intermodal and expressway container volumes; and
Canadian originating shipments of metallurgical coal.  This increase in RTMs was offset by lower shipments of:
International intermodal due to the exit of certain customer contracts;
Forest Products;
Potash; and
Fertilizers and sulphur.  Fuel Cost Recovery Programs
CP employs a fuel cost recovery program designed to automatically respond to fluctuations in fuel prices and help mitigate the financial impact of rising fuel prices. Fuel surcharge revenue is earned on individual shipments; as such fuel surcharge revenue is a function of freight volumes. Short-term volatility in fuel prices may adversely or positive impact expenses and revenues.
Canadian Pacific 2014 MD&A Q2

Table of Contents							
Canadian Grain	For t	he three r	nonths	For the six months			
	eı	nded June	: 30	ended June 30			
	2014	2013	% Change	2014	2013	% Change	
Freight revenues (in millions)	\$ 252	\$ 191	32	\$ 473	\$ 394	20	
Carloads (in thousands)	78	61	28	140	120	17	
Revenue ton-miles (in millions)	7,074	5,272	34	12,920	10,647	21	
·	Í			ĺ			
Freight revenue per carload (dollars)	\$3,219	\$3,127	3	\$ 3,374	\$ 3,271	3	
Freight revenue per revenue ton-mile (cents)	3.56	3.61	(1)	3.66	3.69	(1)	

Canadian grain revenue was \$252 million in the second quarter of 2014, an increase of \$61 million, or 32%, from \$191 million in the same period of 2013 and was \$473 million for the first six months of 2014, an increase of \$79 million, or 20%, from \$394 million in the same period of 2013. These increases were primarily due to higher shipments as a result of strong export demand and record Canadian crop production, and the favourable impact of the change in FX.

This increase was partially offset by reduced freight rates as measured by freight revenue per revenue ton-mile.

U.S. Grain	For the three months				For the six months			
	ended June 30				ended June 30			
	2014	2013	% Change	2014	2013	% Change		
Freight revenues (in millions)	\$ 115	\$ 91	26	\$ 221	\$ 202	9		
Carloads (in thousands)	44	42	5	83	91	(9)		
Revenue ton-miles (in millions)	2,679	2,411	11	5,218	5,466	(5)		
Freight revenue per carload (dollars)	\$ 2,645	\$ 2,159	23	\$ 2,675	\$ 2,225	20		
Freight revenue per revenue ton-mile (cents)	4.31	3.77	14	4.24	3.70	15		

U.S. grain revenue was \$115 million in the second quarter of 2014, an increase of \$24 million, or 26%, from \$91 million in the same period of 2013. This increase was primarily due:

higher shipments destined for the Pacific Northwest due to increased U.S. crop production in areas served by CP;

the favourable impact of the change in FX; and

increased freight rates.

This increase was partially offset by lower shipments to certain areas of the U.S. Midwest.

U.S. grain revenue was \$221 million for the first six months of 2014, an increase of \$19 million, or 9%, from \$202 million in the same period of 2013. This increase was primarily due to the favourable impact of the change in FX, partially offset by lower shipments due to harsh winter operating conditions in the first quarter of 2014.

Canadian Pacific 2014 MD&A Q2

Table of Contents							
Coal	For t	he three n	nonths	For the six months			
	eı	nded June	30	ended June 30			
	2014	2013	% Change	2014	2013	% Change	
Freight revenues (in millions)	<b>\$ 165</b>	\$ 144	15	\$ 313	\$ 293	7	
Carloads (in thousands)	82	75	9	160	156	3	
Revenue ton-miles (in millions)	5,941	5,316	12	11,382	10,956	4	
· · · ·	ĺ			ĺ			
Freight revenue per carload (dollars)	\$ 2,027	\$1,921	6	\$ 1,963	\$ 1,878	5	
Freight revenue per revenue ton-mile (cents)	2.79	2.70	3	2.75	2.67	3	

Coal revenue was \$165 million in the second quarter of 2014, an increase of \$21 million, or 15%, from \$144 million in the same period of 2013. This increase was primarily due to:

higher Canadian originating metallurgical coal shipments;

the favourable impact of the change in FX; and

higher freight rates.

This increase was partially offset by lower U.S. originating thermal coal shipments due to the continued operational challenges in the U.S. Midwest following a challenging winter.

Coal revenue was \$313 million for the first six months of 2014, an increase of \$20 million, or 7%, from \$293 million in the same period of 2013. This increase was primarily due to:

higher Canadian originating shipments of metallurgical coal;

higher freight rates; and

the favourable impact of the change in FX.

This increase was partially offset by lower U.S. originating thermal coal shipments due to harsh winter operating conditions.

Potash For the three months For the six months

ended June 30 ended June 30

2014 2013 % Change 2014 2013 % Change

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 6-K

Freight revenues (in millions)	<b>\$ 101</b>	\$ 95	6	\$ 181	\$ 177	2
Carloads (in thousands)	33	35	(6)	61	65	(6)

Freight revenue per carload (dollars)	\$ 3,046	\$ 2,706	13	\$ 2,983	\$ 2,719	10
Freight revenue per revenue ton-mile (cents)	2.46	2.24	10	2.44	2.24	9

Potash revenue was \$101 million in the second quarter of 2014, an increase of \$6 million, or 6%, from \$95 million in the same period of 2013. This increase was primarily due to:

higher domestic potash shipments;

the favourable impact of the change in FX; and

higher freight rates.

This increase was partially offset by lower export potash shipments.

Potash revenue was \$181 million for the first six months of 2014, an increase of \$4 million, or 2%, from \$177 million in the same period of 2013. This increase was primarily due to:

the favourable impact of the change in FX;

higher domestic potash shipments; and

higher freight rates.

This increase was partially offset by the impact of the harsh winter operating conditions in the first quarter of 2014.

Canadian Pacific 2014 MD&A Q2

Freight revenue per revenue ton-mile (cents)	17.37	16.87	3	17.31	16.49	5

Automotive revenue was \$104 million in the second quarter of 2014, a decrease of \$2 million, or 2%, from \$106 million in the same period of 2013. This decrease was primarily due to continued operational challenges in the U.S. Midwest following a challenging winter, partially offset by the favourable impact of FX.

Automotive revenue was \$192 million for the first six months of 2014, a decrease of \$11 million, or 5%, from \$203 million in the same period of 2013. This decrease was primarily due to harsh winter operating conditions and was partially offset by the favourable impact of FX, as well as the movement of one time dimensional loads in 2014.

Domestic Intermodal	For the three months			For the six months		
	ended June 30			ended June 30		
	2014	2013	% Change	2014	2013	% Change
Freight revenues (in millions)	\$ 200	\$ 171	17	\$ 377	\$ 341	11

Carload (in thousands)	140	157	(11)	270	309	(13)	

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 6-K

Revenue ton-miles (in millions)	3,048	3,530	(14)	5,885	6,790	(13)
Freight revenue per carload (dollars)	\$ 1,074	\$ 1,017	6	\$1,074	\$1,011	6
Freight revenue per revenue ton-mile (cents)	4.94	4.52	9	4.93	4.60	7

International intermodal revenue was \$150 million in the second quarter of 2014, a decrease of \$10 million, or 6%, from \$160 million in the same period of 2013 and was \$290 million for the first six months of 2014, a decrease of \$22 million, or 7%, from \$312 million in the same period of 2013. These decreases were primarily due to the exit of certain customer contracts, partially offset by:

higher transcontinental container volumes from existing customers;

Canadian Pacific 2014 MD&A Q2

13

the favourable impact of the change in FX; and

higher freight rates.

#### Other Revenues

Other revenues were \$39 million in the second quarter of 2014 and \$74 million for the first six months of 2014, essentially unchanged from the same periods in 2013.

#### 9. OPERATING EXPENSES

	For the three months ended June 30				onths 30	
(in millions)	2014	2013	% Change	2014	2013	% Change
Operating expenses						
Compensation and benefits <sup>(1)</sup>	\$ 342	\$ 334	2	\$ 687	\$ 726	(5)
Fuel	273	246	11	544	516	5
Materials <sup>(1)</sup>	47	35	34	99	79	25
Equipment rents	40	44	(9)	81	90	(10)
Depreciation and amortization	137	141	(3)	278	282	(1)
Purchased services and other <sup>(1)</sup>	255	277	(8)	491	517	(5)
Total operating expenses	\$1,094	\$ 1,077	2	\$ 2,180	\$2,210	(1)

Operating expenses were \$1,094 million in the second quarter of 2014, an increase of \$17 million, or 2%, from \$1,077 million in the same period of 2013. This increase was primarily due to:

higher stock-based and incentive compensation;

the unfavourable impact in the change of FX;

higher volume variable expenses as a result of an increase in workload, as measured by GTMs;

wage and benefit inflation;

<sup>(1)</sup> Billings to third parties for the recovery of costs incurred for freight car repairs and servicing have been reclassified from Purchased services and other to Compensation and benefits and Materials within Operating expenses.

higher fuel prices; and
the receipt of an insurance recovery in the second quarter of 2013, related to flooding in 2011. This increase was partially offset by:
efficiencies generated from improved operating performance, asset utilization, and insourcing of certain IT activities;
lower pension expense; and
lower casualty expense.  Operating expense was \$2,180 million for the first six months of 2014, a decrease of \$30 million, or 1%, from \$2,22 million in the same period of 2013. This decrease was primarily due to:
efficiencies generated from improved operating performance, asset utilization, and insourcing of certain IT activities;
lower pension expense;
lower casualty expense; and
lower volume variable expenses as a result of a decrease in workload, as measured by GTMs. This decrease was partially offset by:
the unfavourable impact in the change of FX;
higher stock-based and incentive compensation;
higher costs due to the impact of harsh winter operating conditions in the first quarter of 2014;
wage and benefit inflation;

Table of Contents 66

higher fuel prices;

a settlement of litigation in 2013 related to management transition; and

lower land sales.

# **Compensation and Benefits**

Compensation and benefits expense was \$342 million in the second quarter of 2014, an increase of \$8 million, or 2%, from \$334 million in the same period of 2013. This increase was primarily due to:

Canadian Pacific 2014 MD&A Q2

14

wage and benefit inflation;

an increase in IS personnel as part of the Company s insourcing strategy, offset by efficiency savings recorded in Purchased services and other;

the unfavourable impact of the change in FX; and

higher volume variable expenses, as a result of an increase in workload as measured by GTMs. This increase was partially offset by lower pension expense and lower costs achieved through a smaller workforce and road and yard crew efficiencies as a result of continuing strong operational performance.

Compensation and benefits expense was \$687 million for the first six months of 2014, a decrease of \$39 million, or 5%, from \$726 million in the same period of 2013. This decrease was primarily due to a lower pension expense and lower costs achieved through a smaller workforce. This decrease was partially offset by:

higher stock-based compensation primarily driven by the higher change in stock price and higher incentive compensation resulting from improved corporate performance;

wage and benefit inflation;

the unfavourable impact of the change in FX;

an increase in IS personnel; and

increased overtime wages and higher crew costs driven by harsh winter operating conditions.

## Fuel

Fuel expense was \$273 million in the second quarter of 2014, an increase of \$27 million, or 11%, from \$246 million in the same period of 2013. This increase was primarily due to:

the unfavourable change in FX;

the change in workload, as measured by GTMs; and

increased fuel prices.

This increase was partially offset by improvements in fuel efficiency as a result of increased train weights and focus on the fuel conservation strategies of the Company s operating plan.

Fuel expense was \$544 million for the first six months of 2014, an increase of \$28 million, or 5%, from \$516 million in the same period of 2013. The increase was primarily due to the unfavourable change in FX and increased fuel prices. This was partially offset by improvements in fuel efficiency as a result of increased train weights and focus on the fuel conservation strategies of the Company s operating plan, and by the change in workload, as measured by GTMs.

#### **Materials**

Materials expense was \$47 million in the second quarter of 2014, an increase of \$12 million, or 34%, from \$35 million in the same period of 2013 and was \$99 million for the first six months of 2014, an increase of \$20 million, or 25%, from \$79 million in the same period of 2013. These increases were primarily due to higher freight car repair material costs and track maintenance materials. In addition, the increase in the first six months of 2014 is also driven by harsh winter operating conditions in the first quarter of 2014.

## **Equipment Rents**

Equipment rents expense was \$40 million in the second quarter of 2014, a decrease of \$4 million or 9%, from \$44 million in the same period of 2013 and was \$81 million for the first six months of 2014, a decrease of \$9 million or 10%, from \$90 million in the same period of 2013. These decreases reflect a reduction in equipment rents associated with freight cars and locomotives. As a result of operating efficiencies, the Company required fewer freight cars or locomotives, reducing the payments made to foreign railways for the use of their freight cars and permitting the return or sublease of certain leased freight cars and locomotives.

### **Depreciation and Amortization**

Depreciation and amortization expense was \$137 million in the second quarter of 2014, a decrease of \$4 million, or 3%, from \$141 million in the same period of 2013 and was \$278 million for the first six months of 2014, a decrease of \$4 million, or 1%, from \$282 million in the same period of 2013. Depreciation expense was lower due to a decrease in accelerated depreciation on IT assets and lower depreciable assets resulting from the sale of the west end of Dakota, Minnesota and Eastern Railroad ( DM&E West ). The decrease was partially offset by higher depreciable assets as a result of the Company s capital program.

Canadian Pacific 2014 MD&A O2
