(1) Domestic credit ratings are generally defined to indicate the following:

Subject instrument	Credit rating	Definition
	AAA	Strongest capacity for timely repayment.
	AA+/AA/AA-	Very strong capacity for timely repayment. This capacity may, nevertheless, be slightly inferior than is the case for the highest rating category
	A+/A/A-	Strong capacity for timely repayment. This capacity may, nevertheless, be more vulnerable to adverse changes in circumstances or in economic conditions than is the case for higher rating categories.
	BBB+/BBB/BBB-	Capacity for timely repayment is adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
Corporate bonds	BB+/BB/BB-	Capacity for timely repayment is currently adequate, but that there are some speculative characteristics that make the repayment uncertain over time.
	B+/B/B-	Lack of adequate capacity for repayment and speculative characteristics. Interest payment in time of unfavorable economic conditions is uncertain.
	CCC	Lack of capacity for even current repayment and high risk of default.
	CC	Greater uncertainties than higher ratings.
	C	High credit risk and lack of capacity for timely repayment.
	D	Insolvency.

(2)

Earnings per share is based on par value of ₩5,000 per share and is calculated by dividing net income by weighted average number of common shares.

- (3) Cash dividend yield is the percentage that is derived by dividing cash dividend by the arithmetic average of the daily closing prices of our common shares during the one-week period ending two trading days prior to the closing of the register of shareholders for the purpose of determining the shareholders entitled to receive annual dividends.

2. Business

A. Business overview

We were incorporated in February 1985 under the laws of the Republic of Korea. LG Electronics and LG Semicon transferred their respective LCD business to us in 1998, and since then, our business has been focused on the research, development, manufacture and sale of display panels, applying technologies such as TFT-LCD and OLED.

As of March 31, 2015, in Korea we operated TFT-LCD and OLED production facilities and a research center in Paju and TFT-LCD production facilities in Gumi. We have also established subsidiaries in the Americas, Europe and Asia.

Table of Contents

As of March 31, 2015, our business consisted of the manufacture and sale of display and display related products utilizing TFT-LCD, OLED and other technologies under a single reporting business segment.

2015 Q1 consolidated operating results highlights

(Unit: In billions of Won)

2015 Q1	Display business
Sales Revenue	7,022
Gross Profit	1,361
Operating Profit	744

B. Industry**(1) Industry characteristics and growth potential**

TFT-LCD display panels are one of the most widely used type of display panels in flat panel display products, and the entry barriers to manufacture TFT-LCD display panels are relatively high due to the technology and capital intensive nature of the mass manufacturing process that is required to achieve economies of scale, among other factors.

While growth in the market for displays used in notebook computer, monitor and other traditional IT products has stagnated or declined, the market for small- and medium-sized displays (including those used in smartphones) in the rapidly evolving IT environment has shown steady growth. The display market for televisions has also shown steady growth mainly due to growing demand from developing countries as well as from consumers in general for larger sized display panels. As for displays used in industrial, automobile and other value added products, we expect to see growth in these markets.

(2) Cyclicality

The display panel business is highly cyclical and sensitive to fluctuations in the general economy. The industry experiences periodic volatility caused by imbalances between supply and demand due to capacity expansion and changing production utilization rates within the industry.

Macroeconomic factors and other causes of business cycles can affect the rate of growth in demand for display panels. Accordingly, if supply exceeds demand, average selling prices of display panels may decrease. Conversely, if growth in demand outpaces growth in supply, average selling prices may increase.

(3) Market conditions

Overall, while there have been some variations in rates of production capacity growth among individual display panel manufacturers, display panel manufacturers have generally slowed their respective rates of production capacity growth since 2011 due to a slowdown in growth of the display panel industry.

Most display panel manufacturers are located in Asia.

- b. Taiwan: AU Optronics, Innolux, CPT, HannStar, etc.
- c. Japan: Japan Display, Sharp, Panasonic LCD, etc.
- d. China: BOE, CSOT, etc.

(4) Market shares

Our worldwide market share of large-sized display panels (i.e., panels that are 9 inches or larger) based on revenue is as follows:

	2015 Q1	2014	2013
Panels for Televisions ⁽¹⁾	25.5%	25.0%	24.7%
Panels for Monitors	35.8%	32.7%	34.0%
Panels for Notebook Computers ⁽²⁾	27.5%	27.5%	32.3%
Panels for Tablet Computers	18.0%	27.0%	32.0%
Total	27.3%	26.9%	27.8%

Source: DisplaySearch

- (1) Includes panels for public displays.
- (2) Includes panels for netbooks.

(5) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, timely investments, adaptable production capabilities, development of new and premium products through technological advances, competitive production costs, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.

In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.

A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.

As a leading technology innovator in the display industry, we continue to focus on delivering differentiated value to our customers by developing various technologies and products, including display panels with IPS, Advanced In-cell Touch, OLED and other technologies. With respect to TFT-LCD panels, we are leading the market with our differentiated products with IPS technology, such as our slim and light ultra-high definition (Ultra HD) television panels and 21:9 screen aspect ratio curved monitors, and have prepared our production facilities to produce touch modules with Advanced In-cell Touch technology. With respect to OLED panels, following our supply of the world's first 55-inch OLED 3D panels for televisions in January 2013, we have supplied curved Ultra HD OLED panels for televisions, curved plastic OLED panels for smartphones, round OLED panels for wearable devices among others and have shown that we are technologically a step ahead of the competition.

Moreover, we entered into long-term sales contracts with major global firms to secure customers and expand partnerships for technology development.

C. New businesses

For our continued growth, we are actively exploring and preparing for new business opportunities that may arise in the changing market environment. As such, we are continually reviewing and looking at opportunities in the display and promising new industries.

3. Major Products and Raw Materials

A. Major products

We manufacture TFT-LCD and OLED panels, of which a significant majority is exported overseas.

- Period: January 1, 2015 ~ March 31, 2015.

(1) Based on ship-to-party.

B. Average selling price trend of major products

The average selling price of LCD panels per square meter of net display area shipped in the first quarter of 2015 decreased by approximately 16% from the fourth quarter of 2014 largely as a result of a decrease in the shipment of new small- to medium-sized products reflecting seasonal factors, despite average selling prices of LCD panels remaining relatively stable. There is no assurance that the average selling prices of LCD panels will not fluctuate in the future due to change in market conditions.

Table of Contents

- (1) Based on the assumption that all 24 hours in a day have been fully utilized.
 (2) Number of days is calculated by averaging the number of working days for each facility.

C. Investment plan

In 2014, our total capital expenditures on a cash out basis was ₩3 trillion. In 2015, we currently expect that our total capital expenditures on a cash out basis will be similar to that of 2014 (at a level of ₩3 trillion or less) in anticipation of funding the production of future display products and leading the market for OLED panels, as well as investing in our production facilities to respond to increases in demand for large-sized panels. Such amount is subject to change depending on business conditions and market environment

5. Sales

A. Sales performance

(Unit: In billions of Won)

Business area	Sales types	Items (Market)	2015 Q1	2014	2013

	Products, etc.	Display panel Total	7,022	26,456	27,033

- (1) Based on ship-to-party.

B. Sales route and sales method

- (1) Sales organization

As of March 31, 2015, each of our television, IT/mobile and OLED businesses had individual sales and customer support functions.

Sales subsidiaries in the United States, Germany, Japan, Taiwan, China and Singapore perform sales activities and provide local technical support to customers.

- (2) Sales route

Sales of our products take place through one of the following two routes:

LG Display HQ and overseas manufacturing subsidiaries ® Overseas sales subsidiaries (USA/Germany/Japan/Taiwan/China/Singapore), etc. ® System integrators and end-brand customers ® End users

LG Display HQ and overseas manufacturing subsidiaries ® System integrators and end-brand customers ® End users

(3) Sales methods and sales terms

Direct sales and sales through overseas subsidiaries, etc. Sales terms are subject to change depending on the fluctuation in the supply and demand of LCD panels.

(4) Sales strategy

As part of our sales strategy, we have secured stable sales to major personal computer manufacturers and leading consumer electronics manufacturers globally, strengthened sales of high-resolution, IPS, narrow bezel and other high-end display panels in the tablet, notebook computer and monitor markets, led the television market with our OLED and other market leading television panels and increased the proportion of sales of our differentiated television panels, such as our Ultra HD and large television panels, in our product mix.

In the smartphone, industrial products (including aviation and medical equipment) and automobile displays segment, we have continued to build a strong and diversified business portfolio by expanding our business with customers with a global reach on the strength of our differentiated products applying IPS, plastic OLED, high-resolution, Advanced In-cell Touch and other technologies.

Table of Contents

(5) Purchase orders

Customers generally place purchase orders with us one month prior to delivery. Our customary practice for procuring orders from our customers and delivering our products to such customers is as follows:

Receive order from customer (overseas sales subsidiaries, etc.) ® Headquarter is notified ® Manufacture product ® Ship product (overseas sales subsidiaries, etc.) ® Sell product (overseas sales subsidiaries, etc.)

6. Market Risks and Risk Management

A. Market risks

The display industry continues to experience continued declines in the average selling prices of TFT-LCD and OLED panels irrespective of cyclical fluctuations in the industry, and our margins would be adversely impacted if prices decrease faster than we are able to reduce our costs.

The display industry is highly competitive. We have experienced pressure on the prices and margins of our major products due largely to additional industry capacity from panel manufacturers in Korea, Taiwan, China and Japan coupled with changes in the production mix of such manufacturers. Our main competitors in the industry include Samsung Display, AU Optronics, Innolux, Sharp, BOE, CSOT, Japan Display, CPT, HannStar and Panasonic LCD.

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, timely investments, adaptable production capabilities, utilization of differentiated technologies in product development, success or failure of our end-brand customers in marketing their brands and products, component and raw material supply costs, and general economic and industry conditions. We cannot provide assurance that we will be able to compete successfully with our competitors on these fronts and, as a result, we may be unable to sustain our current market position.

Our results of operations are subject to exchange rate fluctuations. To the extent that we incur costs in one currency and generate sales in a different currency, our profit margins may be affected by changes in the exchange rates between the two currencies. Our sales of display panels are denominated mainly in U.S. dollars, whereas our purchases of raw materials are denominated mainly in U.S. dollars and Japanese Yen. Seeking to achieve stable management, we take every precaution in our foreign currency risk management to minimize the risk of foreign currency fluctuations on our foreign currency denominated assets and liabilities.

B. Risk management

As the average selling prices of TFT-LCD and OLED panels can continue to decline over time irrespective of industry-wide cyclical fluctuations, we may find it hard to manage risks associated with certain factors that are outside our control. However, we counteract such declines in average selling prices by increasing the proportion of high value added panels in our product mix while also implementing various cost reduction measures. In addition, in order to manage our risk against foreign currency fluctuations, we continually monitor our currency position and risk, and when needed, we may from time to time enter into cross-currency interest rate swap contracts and foreign currency forward contracts. As of March 31, 2015, we had not entered into any such contract for currency related derivative

products.

Table of Contents**7. Derivative Contracts****A. Currency risks**

We are exposed to currency risks on sales, purchases and borrowings that are denominated in currencies other than in Won, our functional currency. These currencies are primarily the U.S. dollar, the Japanese Yen and the Chinese Yuan.

Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by our underlying operations, primarily in Won and the U.S. dollar.

In respect of other monetary assets and liabilities denominated in foreign currencies, we ensure that our net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates, when necessary, to address short-term imbalances.

B. Interest rate risks

Our exposure to interest rate risks relates primarily to our floating rate long term loan obligations. We have established and are managing interest rate risk policies to minimize uncertainty and costs associated with interest rate fluctuations by monitoring cyclical interest rate fluctuations and enacting countermeasures.

8. Major contracts

Our material contracts, other than contracts entered into in the ordinary course of business, are set forth below:

Type of agreement	Name of party	Term	Content
Technology licensing agreement	Semiconductor Energy Laboratory	October 2005 ~	Patent licensing of LCD and OLED related technology
	Ferguson Patent Properties	October 2007 ~	Patent licensing of LCD driving technology
	Hewlett-Packard	January 2011 ~	Patent licensing of semi-conductor device technology
Technology licensing/supply agreement	HannStar Display Corporation	November 2009 ~	Patent cross-licensing of LCD technology
	AU Optronics Corporation	August 2011~	Patent cross-licensing of LCD technology
	Innolux Corporation	July 2012 ~	Patent cross-licensing of LCD technology, etc.

Applied GF2 direct bonding process

(3) Developed 5.0-inch and 5.5-inch high resolution (over 400 PPI) smartphone products applying AH-IPS technology

Luminance increased by 10% compared to conventional panels (5.0-inch FHD panel has 403 PPI and 5.5-inch FHD panel has 440 PPI)

Developed new source D-IC to drive 4 lanes of MIPI with speeds of up to 1 Gbps per lane

(4) Developed the world's first 60-inch three-side borderless product

Made possible by removing the forward-facing case top, resulting in zero bezel on three sides with a borderless like bottom design

(5) Developed the world's first 47-inch and 55-inch FHD TV product with 2.3 mm narrow bezels

Achieved optimal slim design by minimizing bezel width to 2.3 mm

(6) Developed 55-inch and 65-inch Ultra HD products with narrow bezels

Ultra HD (55-inch model has 80 PPI and 65-inch model has 68 PPI)

Achieved high transmittance panel by applying 1 Gate 1 Data structure

Achieved narrow bezels (55-inch model has 6.9 mm and 65-inch has 7.5 mm) by optimizing panel and mechanical design

- (7) Developed 42-inch, 47-inch and 55-inch FHD three-side borderless products with direct backlight units

Borderless design made possible by removing the forward-facing case top, resulting in zero bezel on three sides

- (8) Developed 5-inch HD smartphone product utilizing oxide cell technology

Reduced energy consumption and achieved narrower bezels by using indium gallium zinc oxide (IGZO) cell technology (energy consumption reduced by 26.7% and bezel size reduced by 23.0% compared to products utilizing conventional silicon (a-Si) cell technology)

- (9) Developed FHD a-Si AH-IPS technology for use in smartphone products (more than 400 PPI)

Improved structure and technology compared to conventional FHD panels (luminance increased by 30%, achieved 443 PPI in 5.0-inch FHD panel)

Developed new D-IC and IC bonding materials and processes

- (10) Developed new line of 19.5-inch HD+ monitor products with IPS technology

Developed new line of display panels for desktop monitor products

Increased yield of glass panel area per glass substrate by cutting glass substrates at 19.5 inches

- (11) Developed 19.5-inch HD+ ultra-light monitor product

The world's lightest (at the time) 19.5-inch HD+ IPS monitor product with slim concept design

Edgar Filing: LG Display Co., Ltd. - Form 6-K

Reduced weight by 55% from 1520g to 830g and thickness from 7.6t to 5.4t compared to a conventional 19.5-inch HD+ IPS monitor product

(12) Developed the world's first borderless monitor product with 3.5 mm narrow bezel (23.8-inch FHD)

Developed 23.8-inch FHD Neo Blade1 monitor product with the world's narrowest (at the time) bezel (3.5 mm)

Table of Contents

- (13) Introduced 9.2-inch WXGA high resolution / high luminance automotive display product

The first automotive display product to apply EPI interface (800Mbps high speed transmission with Real 8it)

High luminance (800 nit) and high color gamut (70%)

Developed T-con with improved reliability and resolution

- (14) Developed 49-inch FHD four sided borderless like product

Achieved narrow borders by applying 4.9 mm GIP technology and developed a new PSJ mechanical structure

Developed new resin technology to apply to the bottom base decoration

- (15) Developed 55-inch FHD wide color gamut (WCG) LCM product

Achieved life like colors with WCG by combining panel and optical technologies

Developed differentiated case top set design

- (16) Developed our first 60-inch FHD product

Achieved narrow panel bezel size (7.8 mm)

New size in our product lineup

- (17) Developed the world's first 23.8-inch Ultra HD monitor product

The world's first Ultra HD AH-IPS monitor product (23.8-inch Ultra HD: 185 ppi)

Applied PAC panel technology and developed Ultra HD T-con/D-IC driver

Developed high luminance dual LED array structure

(18) Expanded product lineup of 21:9 screen aspect ratio monitors

Expanded product lineup of 21:9 screen aspect ratio monitors to include 25-inch, 29-inch and 34-inch monitors

Borderless on three sides by removing case top

(19) Developed the world's first 13.3-inch FHD notebook model with 1.9 mm narrow bezel

Development slim notebook design by utilizing panel GLA structure and minimizing bezel size to 1.9 mm

Achieved slim (3.0 mm) and ultra-light (230 g) LCM by utilizing 0.25 mm glass PPP LGP technology

(20) Developed our first quad HD (QHD) notebook model (13.3-inch, 222 ppi / 14.0-inch / 210 ppi)

Increased transmittance rate by utilizing 3rd metal, coop CS, red eye 12 um technology and improving aperture ratio

Achieved slim (2.6 mm) and ultra-light (235 g) LCM by utilizing 0.3 mm glass PPP LGP technology

(21) Introduced product applying PPP LGP to maximize light collimation

Developed PPP technology for light collimation (improved luminance by 44% compared to conventional panels) for a more energy efficient panel model

Used 2 sheet structure to reduce thickness

(22) Developed 12.3-inch FHD full cluster automotive product

The world's first full cluster product to apply IPS technology

Ultra-high luminance (800 nit) and high color gamut (85%). High color PR and developed RG LED for high light collimation

Applied the highest resolution (1920 x 720), at the time, for clusters

(23) Developed 5.5-inch QHD LTPS smartphone panel applying AH-IPS technology with the world's highest resolution, at the time, for smartphone panels (more than 500 ppi)

Designed and developed QHD, the world's highest resolution, at the time, for smartphone panels (538 ppi)

The world's first QHD module applying 1 chip D-IC driver

Table of Contents

Achievements in 2014

- (1) Developed the world's first green plus structure television panel products (42-inch, 49-inch and 55-inch Ultra HD)

Added white pixels to increase transmittance by 55% compared to conventional display panels

Developed energy conservation technology for Ultra HD products

- (2) Developed the world's narrowest, at the time, bezel (BtB 3.5 mm) videowall product (55-inch FHD)

The world's narrowest, at the time, bezel (BtB 3.5 mm) videowall product

Reduced panel PAD parts and minimized bezel size

- (3) Developed our first 79-inch Ultra HD product

New size in our product lineup

Achieved narrow bezel (On 9.9 mm) and slim depth (13.9 mm)

- (4) Developed the world's first 4 sided borderless like product (49-inch, 55-inch and 60-inch FHD)

Removed front case top and narrowed gap between the panel and front deco cabinet (set side reduced from 2.0 mm to 0.5 mm)

- (5) Developed the world's first a-Si AF-IPS 5Mask panel product for smartphones (5.0 WVGA)

Reduced production cost and simplified manufacturing process by reducing the number of mask steps from 6 to 5

Same level of performance as 6Mask panels

- (6) Developed the world's first LTPS AH-IPS photo alignment and negative LC panel product for smartphones (5.0-inch FHD)

LTPS AH-IPS photo alignment and negative LC panel product for smartphones developed in March 2014

Improved luminance and contrast ratio through improvement in panel transmittance (450 nit to 515 nit; 1,000:1 to 1500:1).

- (7) Developed the world's first 23.8-inch FHD ultra slim and light monitor product

Achieved ultra-light design (reduced LCM weight from 2,270g to 1,280g compared to conventional LCMs)

Achieved ultra slim design by using slim component parts (7.6t reduced to 5.5t)

- (8) Developed LTPS AH-IPS QHD smartphone product (5.5-inch QHD, 538 ppi, LG Electronics G3 model smartphone)

LTPS AH-IPS QHD smartphone product developed in April 2014

Width of panel bezel: 0.95 mm (L/R); luminance: 500 nit; G1F Touch Direct Bonded LCM

- (9) Developed our first curved Ultra HD product (65-inch and 55-inch Ultra HD)

The curved LCM retains the same panel transmissivity as a conventional flat LCM through application of BM-less COT structure with a double pigment lamination

Realized curved LCM technology by applying Frame (Horizontal / Vertical / Center) Structure and Curved C/T & Guide Panel Technologies

- (10) Developed the world's first 6-inch plastic OLED product

Developed the world's first curved display with a curvature radius (R) of 700

Precursor to the development of future bendable, foldable and rollable display products

- (11) Developed the world's first 34-inch curved monitor product (3,800R)

Launched the world's first blade type 21:9 screen aspect ratio 34-inch wide QHD 3,800R curved monitor product and created a new market and standard for curved monitor products

Achieved curvature of 3,800R by using annealing process and setting up assembly equipment utilizing 0.4t glass for curved panels and pol edge type curved backlight

(12) Developed the world's first AH-IPS FHD GIP/DRD product (15.6-inch notebook product)

The world's first AH-IPS FHD (more than 142 ppi) GIP/DRD product developed in September 2014

Increased cost competitiveness by developing GIP/DRD technology

Table of Contents

- (13) Developed the world's first Advanced In-cell Touch LTPS smartphone product (4.5-inch HD product)

Completed development of an AH-IPS LTPS product applying LG Display's own in-cell touch technology, which utilizes the AH-IPS Vcom electrodes in an all point sensing self-capacitive manner in July 2014 (450 nit luminance; L/R panel bezel of 1.00 mm; module thickness of 2.28 mm)

Simplified SCM and provided a cost competitive and differentiated valued product with touch functionality

- (14) Developed the world's first Advanced In-cell Touch a-Si smartphone product (4.5-inch WVGA product)

Completed development of an AH-IPS a-Si product applying LG Display's own in-cell touch technology, which utilizes the AH-IPS Vcom electrodes in an all point sensing self-capacitive manner in August 2014 (450 nit luminance; L/R panel bezel of 1.35 mm; module thickness of 2.6 mm)

Simplified SCM and provided a cost competitive and differentiated valued product with touch functionality

- (15) Developed the world's first Ultra HD+ curved (6,000R) product (105-inch Ultra HD)

The world's first large 105-inch 21:9 screen aspect ratio Ultra HD curved (6,000R) display product

- (16) Developed our first 98-inch Ultra HD product

Our new line of 98-inch Ultra HD products

Achieved ultra-high definition through utilizing the direct BLU local dimming and FCIC circuit compensation algorithm.

- (17) Developed four sided product with even bezels (5.9 mm) for commercial use (42-inch, 49-inch and 55-inch FHD product)

Developed our first 4 sided even bezel product (off bezel: 5.9 mm)

Reduced panel PAD and lower bezel thickness

Improved PAC transmittance and after image reliability

(18) Developed our first 60-inch Ultra HD product

Our new line of 60-inch Ultra HD products

Achieved narrow panel bezel of 7.8 mm

(19) Developed the world's first circular plastic OLED product (1.3 F)

Developed the world's first circular plastic OLED product in September 2014

Developed ultrathin display module of 559 um (without cover window)

Lowered power consumption by developing Power Save Mode algorithm

Display can be turned on without powering the P-IC

(20) Developed the world's first four sided borderless OLED television product (55-inch)

Product developed using the world's first four sided borderless technology utilizing reverse tab bonding manufacturing process in September 2014

(21) Developed the world's first ultra-slim OLED television products (49-inch, 55-inch and 65-inch Ultra HD)

Achieved LCM thickness of 7.5 mm

Reduced thickness by combining exterior set with LCM parts (B/cover, M/cabinet)

(22) Developed the world's first 1:1 screen aspect ratio New Platform Monitor (26.5-inch; 1920 x 1920 resolution)

Creation of new market through the development of new 1:1 screen aspect ratio platform display

Development of high resolution display with four sided even bezels (on bezel: 8 mm)

(23) Development of 14-inch FHD notebook product with three sided even bezels (3.9 mm)

World's first notebook panel with three sided narrow bezels (top and side bezels: 3.9 mm)

Reduced GIP area by 50% compared to conventional GIP area

(24) Development of 12.3-inch new display size UXGA tablet product

Developed new display panel size for tablet products: 12.3-inch UXGA (4:3 screen aspect ratio)

Increased yield of glass panel area per glass substrate by cutting glass substrates at 12.3 inches

Table of Contents

Achievements in 2015

- (1) Developed the world's narrowest, at the time, module bezel (0.7mm) LTPS smartphone display (5.3-inch FHD AIT)

Developed the world's first FHD Advanced In-cell Touch display (LTPS 5.3-inch FHD) applying the Neo Edge module process (new manufacturing technology) in January 2015

Set-up glue & laser cutting process, 0.6mm panel bezel (L/R)

- (2) Developed the world's first QHD Advanced In-cell Touch (AIT) LTPS smartphone display (5.5-inch QHD)

Developed LTPS 5.5-inch QHD display applying LG Display's new capacitive type in-cell touch technology with all points sensing in March 2015; luminance: 500nit, contrast ratio: 1500:1 (using photo alignment & negative LC), 0.95mm panel bezel (L/R)

Delivered differentiated value proposition based on touch performance, simplified SCM process and competitive cost innovation

10. Intellectual Property

As of March 31, 2015, our cumulative patent portfolio (including patents that have already expired) included a total of 27,036 patents, consisting of 13,377 in Korea and 13,659 in other countries.

11. Environmental and Safety Matters

We are subject to a variety of environmental laws and regulations, and we may be subject to fines or restrictions that could cause our operations to be interrupted. Our manufacturing processes generate worksite waste, including water and air pollutants, at various stages in the manufacturing process, and we are subject to relevant laws and regulations in each area of the environment, including with respect to the treatment of chemical by-products. We have installed various types of anti-pollution equipment, consistent with environmental standards, for the treatment of chemical waste and equipment for the recycling of treated waste water at our various facilities. However, we cannot provide assurance that environmental claims will not be brought against us or that the local or national governments will not take steps toward adopting more stringent environmental standards. Any failure on our part to comply with any present or future environmental regulations could result in the assessment of damages or imposition of fines against us, suspension of production or a cessation of operations. In addition, environmental regulations could require us to acquire costly equipment or to incur other significant compliance expenses that may materially and negatively affect our financial condition and results of operations.

In accordance with the Framework Act on Low Carbon, Green Growth, we implemented the greenhouse gas emission and energy consumption target system from 2012 to 2014. Starting from 2015, we plan on implementing the greenhouse gas trading system, under which we will be responsible to meet our emission targets based on the emission credits allocated to us by the Ministry of Environment of the Korean government. As a result, we may need to invest in additional equipment and there may be other costs associated with meeting reduction targets, which may have a negative effect on our profitability or production activities. As a designated company subject to greenhouse gas emission targets under the Framework Act on Low Carbon, Green Growth, if we fail to meet a reduction target and are unable to comply with the government's subsequent enforcement notice relating to such failure, we may be subject to fines. Furthermore, as a designated company subject to the Act on Allocation and Trading of Greenhouse Gas Emissions, if do not have enough emission credits, we may be required to purchase additional credits or be subject to fines.

In connection with the greenhouse gas emission and energy reduction target system, we submitted a statement of our domestic emissions and energy usage for the 2013 to the Korean government (i.e., the Ministry of Environment and the Ministry of Trade, Industry & Energy) in March 2014 after it was certified by Lloyd's Register Quality Assurance, a government-designated certification agency. The table below sets forth yearly levels of our greenhouse gases emissions and energy usage in the statement submitted to the Korean government:

(Unit: thousand tonnes of CO₂ equivalent; Tetra Joules)

Category	2014	2013	2012
Greenhouse gases	7,537	6,922	6,161
Energy	60,002	61,092	61,169

Table of Contents

Operations at our manufacturing plants are subject to regulation and periodic scheduled and unscheduled on-site inspections by the Ministry of Environment and local environmental protection authorities. We believe that we have adopted adequate anti-pollution measures and have minimized our impact on the environment by improving existing and developing new technologies for the effective maintenance of environmental protection standards consistent with local industry practice. In addition, we have continually monitored, and we believe that we are in compliance in all material respects with, the applicable environmental laws and regulations in Korea. Expenditures related to such compliance may be substantial. Such expenditures are generally included in capital expenditures. As required by Korean law, we employ licensed environmental specialists to manage our air pollution, toxic materials and waste water. In February 2013, to reduce costs and ensure safe water quality, we entered into a contract with a specialist company to operate our waste water treatment facilities. We currently have ISO 14001 certifications with respect to the environmental record for P1 through P98, our OLED production facility in Gumi, Korea, our Gumi module production plant and our Paju module production plant, as well as our module production plants in Nanjing, Yantai and Guangzhou, China.

In addition, with respect to P1 through P98 and our module production plants in Gumi and Paju, we received certification from BSI Group Korea in November 2011 and ISO 5001 certification in December 2013 for our green management system. In August 2014, GP1, our newest eighth-generation panel fabrication facility located in Guangzhou, China, was the first electronics plant in China to receive the Green Plant designation under China's Green China Policy, in addition to receiving ISO 50001, ISO 14001, OHSAS 18001, ISO 9001, GB/T 26125, PAS 2050 and ISO 14064-1 certifications. Furthermore, with respect to our production facilities in Gumi, we have been certified by the Ministry of Environment as a Green Company for P1 and our Gumi module production plant since 1997, P2 and P3 since 2006 and P4, P5 and P6 since 2008. Also, we received certification to self-inspect designated waste products with respect to our Paju plant by the Ministry of Environment in 2011, which was recertified in 2013. In addition, in recognition of our efforts to reduce greenhouse gas emissions, we were awarded a commendation from the Minister of Environment in the efforts against climate change category in the 2013 Green Management Awards, which was jointly hosted by the Ministry of Environment and the Ministry of Trade, Industry & Energy. In recognition of our efforts to improve recycling and reduce waste, we received a citation for being a leading recycling company by the Prime Minister of Korea.

We also have an internal monitoring system to control the use of hazardous substances in the manufacture of our products as we are committed to compliance with all applicable environmental laws and regulations, including European Union Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU, and restricts the use of certain hazardous substances in the manufacture of electrical and electronic equipment.

In addition, as part of our commitment to use environment-friendly raw materials, we have implemented a green purchasing system that prevents the introduction of hazardous materials at the purchasing stage. The green purchasing system has been a key component in our efforts to comply with RoHS and other applicable environmental laws and regulation.

In October 2005, we became the first display panel company to receive accreditation as an International Accredited Testing Laboratory by the Korea Laboratory Accreditation Scheme, which is operated by the Korean Ministry of Trade, Industry & Energy. In September 2006, we received international accreditation from TUV SUD, EU's German accreditation agency, as a RoHS testing laboratory. Our efforts to keep pace with the increasingly stringent accreditation standards and to receive and maintain such accreditations are part of our on-going efforts to systematically monitor environmentally controlled substances in our component parts inventory. Moreover, we participated in reforming IEC 62321, an international testing standard published by the International Electrotechnical Commission and used by RoHS, and the commission adopted our halogen-free combustion ion chromatography method in as IEC 62321-3-2, which was published in June 2013.

In February 2015, we were issued a corrective order and assessed a fine of ₩276 million, which we subsequently followed and paid, respectively, for violating the Occupational Health and Safety Act in connection with an accidental nitrogen gas exposure at one of our production facilities in Paju, Korea in January 2015. To prevent such accidents happening again in the future, we have strengthened our safety standards and management and employee education.

Independent Auditors Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Reviewed Financial Statements

We have reviewed the accompanying condensed consolidated interim financial statements of LG Display Co., Ltd. and subsidiaries (the Group) which comprise the condensed consolidated interim statement of financial position as of March 31, 2015 and the condensed consolidated interim statements of comprehensive income (loss), changes in equity and cash flows for the three-month periods ended March 31, 2015 and 2014, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Condensed Consolidated Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Security and Futures Commission of the Republic of Korea. A review of interim financial information consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

Emphasis of Matter

As discussed in note 17 to the consolidated financial statements, the Group has been or is named as defendants in a number of individual lawsuits and class actions in the United States and Canada, respectively, in connection with alleged antitrust violations concerning the sale of LCD panels. The Group estimated and recognized losses related to these alleged violations. However, actual losses are subject to change in the future based on new developments in each

matter, or changes in circumstances, which could be materially different from those estimated and recognized by the Group.

Other Matters

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

We audited the consolidated statement of financial position as of December 31, 2014 and the related consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this review report, in accordance with Korean Standards on Auditing, and our report thereon, dated February 17, 2015, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2014, presented for comparative purposes, is not different from that audited by us from which it was derived in all material respects.

Table of Contents1. **Reporting Entity**(a) **Description of the Controlling Company**

LG Display Co., Ltd. (the Controlling Company) was incorporated in February 1985 under its original name of LG Soft, Ltd. as a wholly owned subsidiary of LG Electronics Inc. In 1998, LG Electronics Inc. and LG Semicon Co., Ltd. transferred their respective Thin Film Transistor-Liquid Crystal Display (TFT-LCD) related business to the Controlling Company. The main business of the Controlling Company and its subsidiaries (the Group) is to manufacture and sell TFT-LCD panels. The Controlling Company is a stock company (Jusikhoesa) domiciled in the Republic of Korea with its address at 128 Yeouidae-ro, Yeongdeungpo-gu, Seoul, the Republic of Korea. In July 1999, LG Electronics Inc. and Koninklijke Philips Electronics N.V. (Philips) entered into a joint venture agreement. Pursuant to the agreement, the Controlling Company changed its name to LG.Philips LCD Co., Ltd. However, in February 2008, the Controlling Company changed its name to LG Display Co., Ltd. considering the decrease of Philips's share interest in the Controlling Company and the possibility of its business expansion to other display products including Organic Light Emitting Diode (OLED) and Flexible Display products. As of March 31, 2014, LG Electronics Inc. owns 37.9% (135,625,000 shares) of the Controlling Company's common stock.

As of March 31, 2015, the Controlling Company has TFT-LCD manufacturing plants, an OLED manufacturing plant and a Research & Development Center in Paju and TFT-LCD manufacturing plants in Gumi. The Controlling Company has overseas subsidiaries located in North America, Europe and Asia.

The Controlling Company's common stock is listed on the Korea Exchange under the identifying code 034220. As of March 31, 2015, there are 357,815,700 shares of common stock outstanding. The Controlling Company's common stock is also listed on the New York Stock Exchange in the form of American Depositary Shares (ADSs) under the symbol LPL. One ADS represents one-half of one share of common stock. As of March 31, 2015, there are 23,010,462 ADSs outstanding.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) No.1034, *Interim Financial Reporting*. They do not include all of the information required for full annual consolidated financial statements and should be read in conjunction with the consolidated financial statements of the Group as of and for the year ended December 31, 2014.

The condensed consolidated interim financial statements were authorized for issuance by the Board of Directors on April 21, 2015.

(b) **Basis of Measurement**

The condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the statements of financial position:

available-for-sale financial assets measured at fair value, and

liabilities for defined benefit plans are recognized as the present value of defined benefit obligations less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed consolidated interim financial statements are presented in Korean won, which is the Controlling Company's functional currency. All amounts in Korean won are in millions unless otherwise stated.

(d) **Use of Estimates and Judgments**

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those applied in its consolidated financial statements as of and for the year ended December 31, 2014.

Table of Contents**3. Summary of Significant Accounting Policies**

The significant accounting policies followed by the Group in the preparation of its condensed consolidated interim financial statements are the same as those followed by the Group in its preparation of the consolidated financial statements as of and for the year ended December 31, 2014.

4. Financial Risk Management

The objectives and policies on financial risk management followed by the Group are consistent with those disclosed in the consolidated financial statements as of and for the year ended December 31, 2014.

5. Inventories

(*1) Despite its 51% ownership, management concluded that the Controlling Company does not have control of Suzhou Raken Technology Co., Ltd. because the Controlling Company and AmTRAN Technology Co., Ltd., which has a 49% equity interest of the investee, jointly control the board of directors of the investee through equal voting powers. Accordingly, investment in Suzhou Raken Technology Co., Ltd. was accounted as an equity method investment.

(*2) Although the Controlling Company's share interests in TLI Inc., AVACO Co., Ltd., LIG INVENIA Co., Ltd., Can Yang Investments Limited, YAS Co., Ltd., and AVATEC Co., Ltd. are below 20%, the Controlling Company is able to exercise significant influence through its right to appoint a director to the board of directors of each investee and the transactions between the Controlling Company and the investees are significant. Accordingly, the investments in these investees have been accounted for using the equity method.

(*3) The Controlling Company is a member of a limited partnership in the LB Gemini New Growth Fund No.16 (the Fund). In March 2015, the Controlling Company made an additional cash investment of ₩360 million in the Fund. There were no changes in the Controlling Company's ownership percentage in the Fund and the Controlling Company is committed to making future investments of up to an aggregate of ₩30,000 million.

(ii) Sensitivity analysis

A weaker won, as indicated below, against the following currencies which comprise the Group's assets or liabilities denominated in foreign currency as of March 31, 2015 and December 31, 2014, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Group considers to be reasonably possible as of the end of reporting period. The analysis assumes that all other variables, in particular interest rates, would remain constant. The changes in equity and profit or loss would have been as follows:

<i>(In millions of won)</i>	March 31, 2015		December 31, 2014	
	Equity	Profit or loss	Equity	Profit or loss
USD (5 percent weakening)	₩ 127	11,544	(15,674)	3,829
JPY (5 percent weakening)	(10,480)	(6,738)	(9,701)	(6,169)
CNY (5 percent weakening)	20,547	(1,244)	197	(757)
TWD (5 percent weakening)	89		46	
EUR (5 percent weakening)	12	162	(360)	1,511
PLN (5 percent weakening)	969	204	981	242
BRL (5 percent weakening)			(533)	(533)

A stronger won against the above currencies as of March 31, 2015 and December 31, 2014 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

As of March 31, 2015, the Controlling Company is currently defending against Direct Action Plaintiffs including Motorola Mobility, Inc., Electrograph Technologies Corp. and its affiliates, TracFone Wireless Inc., Costco Wholesale Corp., Office Depot, Inc., Interbond Corp. of America (BrandsMart), P.C. Richard & Son Long Island Corp., MARTA Cooperative of America, Inc., ABC Appliance (ABC Warehouse), Schultze Agency Services, LLC (Tweeter), AASI Creditor Liquidating Trust for All American Semiconductor Inc., Tech Data Corp. and its affiliates, CompuCom Systems, Inc. and NECO Alliance LLC. The timing and amounts of outflows are uncertain and the outcomes depend upon the various court proceedings.

In Canada, class action complaints alleging violations of Canada competition laws were filed in 2007 against the Controlling Company and other TFT-LCD manufacturers in Ontario, British Columbia and Quebec. The Ontario Superior Court of Justice certified the class action complaints filed by the direct and indirect purchasers in May 2011. The Controlling Company is pursuing an appeal of the class certification decision. The actions in Quebec and British Columbia are in abeyance. The timing and amount of outflows are uncertain and the outcome depends upon the court proceedings.

During the three-month period ended March 31, 2015, based on the developments of the above pending proceedings, the Group updated its estimates on the amount of potential outflow of resources which resulted in an increase of provision-current for pending proceedings, in the amount of ₩111,172 million which is offset by a decrease of ₩41,769 million upon utilization of the provision for proceedings closed. While the Group continues its vigorous defense of the various pending proceedings described above, management's assessment of the facts and circumstances could change based upon new information, intervening events and the final outcome of the cases. Consequently, the actual results could be materially different from management's current estimates.

Independent Auditors Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Reviewed Financial Statements

We have reviewed the accompanying condensed separate interim financial statements of LG Display Co., Ltd. (the Company) which comprise the condensed separate interim statement of financial position as of March 31, 2015, the condensed separate interim statements of comprehensive income (loss), changes in equity and cash flows for the three-month periods ended March 31, 2015 and 2014, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Condensed Separate Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to issue a report on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Security and Futures Commission of the Republic of Korea. A review of interim financial information consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed separate interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

Emphasis of Matter

As discussed in note 17 to the separate financial statements, the Company has been or is named as defendants in a number of individual lawsuits and class actions in the United States and Canada, respectively, in connection with alleged antitrust violations concerning the sale of LCD panels. The Company estimated and recognized losses related to these alleged violations. However, actual losses are subject to change in the future based on new developments in each matter, or changes in circumstances, which could be materially different from those estimated and recognized by

the Company.

1. **Organization and Description of Business**

LG Display Co., Ltd. (the Company) was incorporated in February 1985 under its original name of LG Soft, Ltd. as a wholly owned subsidiary of LG Electronics Inc. In 1998, LG Electronics Inc. and LG Semicon Co., Ltd. transferred their respective Thin Film Transistor-Liquid Crystal Display (TFT-LCD) related business to the Company. The main business of the Company is to manufacture and sell TFT-LCD panels. The Company is a stock company (Jusikhoesa) domiciled in the Republic of Korea with its address at 128 Yeouidae-ro, Yeongdeungpo-gu, Seoul, the Republic of Korea. In July 1999, LG Electronics Inc. and Koninklijke Philips Electronics N.V. (Philips) entered into a joint venture agreement. Pursuant to the agreement, the Company changed its name to LG.Philips LCD Co., Ltd. However, in February 2008, the Company changed its name to LG Display Co., Ltd. considering the decrease of Philips 's share interest in the Company and the possibility of its business expansion to other display products including Organic Light Emitting Diode (OLED) and Flexible Display products. As of March 31, 2014, LG Electronics Inc. owns 37.9% (135,625,000 shares) of the Company 's common stock.

As of March 31, 2015, the Company has TFT-LCD manufacturing plants, an OLED manufacturing plant and a Research & Development Center in Paju and TFT-LCD manufacturing plants in Gumi. The Company has overseas subsidiaries located in North America, Europe and Asia.

The Company 's common stock is listed on the Korea Exchange under the identifying code 034220. As of March 31, 2015, there are 357,815,700 shares of common stock outstanding. The Company 's common stock is also listed on the New York Stock Exchange in the form of American Depository Shares (ADSs) under the symbol LPL . One ADS represents one-half of one share of common stock. As of March 31, 2015, there are 23,010,462 ADSs outstanding.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed separate interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) No.1034, *Interim Financial Reporting*. They do not include all of the information required for full annual financial statements and should be read in conjunction with the financial statements of the Company as of and for the year ended December 31, 2014.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027, *Separate Financial Statements*, presented by a parent, an investor in an associate or a venture in a joint ventures, in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and net assets of the investees.

The condensed separate interim financial statements were authorized for issuance by the Board of Directors on April 21, 2015.

Table of Contents

2. **Basis of Presenting Financial Statements, Continued**

(b) **Basis of Measurement**

The condensed separate interim financial statements have been prepared on the historical cost basis except for the following material items in the statements of financial position:

available-for-sale financial assets measured at fair value, and

liabilities for defined benefit plans are recognized as the present value of defined benefit obligations less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed separate interim financial statements are presented in Korean won, which is the Company's functional currency. All amounts in Korean won are in millions unless otherwise stated.

(d) **Use of Estimates and Judgments**

The preparation of the condensed separate interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those applied in its financial statements as of and for the year ended December 31, 2014.

3. **Summary of Significant Accounting Policies**

BRL	387.09	452.39	342.17	413.62

(ii) Sensitivity analysis

A weaker won, as indicated below, against the following currencies which comprise the Company's assets or liabilities denominated in foreign currency as of March 31, 2015 and December 31, 2014, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considers to be reasonably possible as of the end of reporting period. The analysis assumes that all other variables, in particular interest rates, would remain constant. The changes in equity and profit or loss would have been as follows:

<i>(In millions of won)</i>	March 31, 2015		December 31, 2014	
	Equity	Profit or loss	Equity	Profit or loss
USD (5 percent weakening)	₩ 19,306	19,306	4,249	4,249
JPY (5 percent weakening)	(5,640)	(5,640)	(5,522)	(5,522)
CNY (5 percent weakening)	(81)	(81)	(1,729)	(1,729)
PLN (5 percent weakening)	(166)	(166)	(225)	(225)
EUR (5 percent weakening)	(91)	(91)	760	760
BRL (5 percent weakening)			(533)	(533)

A stronger won against the above currencies as of March 31, 2015 and December 31, 2014 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

Table of Contents17. Legal proceedingsDelaware Display Group LLC and Innovative Display Technologies LLC

In December 2013, Delaware Display Group LLC and Innovative Display Technologies LLC filed a patent infringement case against the Company and LG Display America, Inc. in the United States District Court for the District of Delaware. The Company does not have a present obligation for this matter and has not recognized any provision at March 31, 2015. It is not possible to reasonably estimate an amount of potential loss, if any, because the plaintiffs have not provided any information regarding damages.

Surpass Tech Innovation LLC

In March 2014, Surpass Tech Innovation LLC filed a complaint in the United States District Court for the District of Delaware against the Company and LG Display America, Inc. for alleged patent infringement. In November 2014, the case has been stayed by the United States District Court for the District of Delaware pending Inter Partes Review. The Company does not have a present obligation for this matter and has not recognized any provision at March 31, 2015. It is not possible to reasonably estimate an amount of potential loss, if any, because the plaintiffs have not provided any information regarding damages.

Anti-trust litigations

Certain individual plaintiffs filed complaints in various state or federal courts in the United States alleging violation of the respective antitrust laws and related laws by various LCD panel manufacturers. As of March 31, 2015, the Company is currently defending against Direct Action Plaintiffs including Motorola Mobility, Inc., Electrograph Technologies Corp. and its affiliates, TracFone Wireless Inc., Costco Wholesale Corp., Office Depot, Inc., Interbond Corp. of America (BrandsMart), P.C. Richard & Son Long Island Corp., MARTA Cooperative of America, Inc., ABC Appliance (ABC Warehouse), Schultze Agency Services, LLC (Tweeter), AASI Creditor Liquidating Trust for All American Semiconductor Inc., Tech Data Corp. and its affiliates, CompuCom Systems, Inc. and NECO Alliance LLC. The timing and amounts of outflows are uncertain and the outcomes depend upon the various court proceedings.

In Canada, class action complaints alleging violations of Canada competition laws were filed in 2007 against the Company and other TFT-LCD manufacturers in Ontario, British Columbia and Quebec. The Ontario Superior Court of Justice certified the class action complaints filed by the direct and indirect purchasers in May 2011. The Company is pursuing an appeal of the class certification decision. The actions in Quebec and British Columbia are in abeyance. The timing and amount of outflows are uncertain and the outcome depends upon the court proceedings.

During the three-month period ended March 31, 2015, based on the developments of the above pending proceedings, the Company updated its estimates on the amount of potential outflow of resources which resulted in an increase of provision-current for pending proceedings, in the amount of ₩111,172 million which is offset by a decrease of ₩41,769 million upon utilization of the provision for proceedings closed. While the Company continues its vigorous defense of the various pending proceedings described above, management's assessment of the facts and circumstances could change based upon new information, intervening events and the final outcome of the cases. Consequently, the actual results could be materially different from management's current estimates.
