#### MANAGED DISTRIBUTION POLICY DISCLOSURE

The MFS Multimarket Income Trust s (the fund) Board of Trustees has adopted a managed distribution policy effective May 1, 2015. The fund seeks to pay monthly distributions based on an annual rate of 8.00% of the fund s average monthly net asset value. The fund s total return in relation to changes in net asset value is presented in the Financial Highlights. You should not draw any conclusions about the fund s investment performance from the amount of the current distribution or from the terms of the fund s managed distribution policy. The Board may amend or terminate the managed distribution policy at any time without prior notice to fund shareholders.

With each distribution, the fund will issue a notice to shareholders and an accompanying press release which will provide detailed information regarding the amount and composition of the distribution and other related information. The amounts and sources of distributions reported in the notice to shareholders are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the fund s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Under a managed distribution policy the fund may at times distribute more than its net investment income and net realized capital gains; therefore, a portion of your distribution may result in a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. A return of capital does not necessarily reflect the fund s investment performance and should not be confused with yield or income. Please refer to Tax Matters and Distributions under Note 2 of the Notes to Financial Statements for information regarding the tax character of the fund s distributions.

#### NOT FDIC INSURED MAY LOSE VALUE NO BANK GUARANTEE

## LETTER FROM THE CHAIRMAN

Dear Shareholders:

The global economy remains vulnerable as central banks continue to play a major role in supporting growth.

Even the resilient U.S. economy has had slower growth, as a strong U.S. dollar and weak overseas markets have hurt exporters. However, robust consumer demand and a recovering housing market have aided the domestic economy, fueled by cheap gasoline and an improving labor market.

China s transition to a consumer-based, slower-growth economy has weighed on many commodity-exporting nations. And concerns about weakness in China have eroded investor and business confidence around the world. Meanwhile, rising geopolitical concerns will weigh on the eurozone, which is still reliant on the European Central Bank s support.

As markets have become more focused on short-term trends in recent years, we believe it s important for investors to lengthen their investment time horizon. At MFS®, we don t trade on headlines or trends; we invest for the long term.

We believe that this approach, coupled with the professional guidance of a financial advisor, will help you reach your investment goals.

Respectfully,

#### **Robert J. Manning**

Chairman

Israel	1.6%
Netherlands	1.5%
Other Countries	16.4%

- (a) For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody s, Fitch, and Standard & Poor s rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). Securities rated BBB or higher are considered investment grade. All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency mortgage-backed securities, and collateralized mortgage obligations of U.S. Agency mortgage-backed securities. Not Rated includes fixed income securities, including fixed income futures contracts, which have not been rated by any rating agency. Non-Fixed Income includes equity securities (including convertible bonds and equity derivatives) and commodities. The fund may not hold all of these instruments. The fund is not rated by these agencies.
- (d) Duration is a measure of how much a bond s price is likely to fluctuate with general changes in interest rates, e.g., if rates rise 1.00%, a bond with a 5-year duration is likely to lose about 5.00% of its value due to the interest rate move.
- (i) For purposes of this presentation, the components include the value of securities, and reflect the impact of the equivalent exposure of derivative positions, if any. These amounts may be negative from time to time. Equivalent exposure is a calculated amount that translates the derivative position into a reasonable approximation of the amount of the underlying asset that the portfolio would have to hold at a given point in time to have the same price sensitivity that results from the portfolio s ownership of the derivative contract. When dealing with derivatives, equivalent exposure is a more representative measure of the potential impact of a position on portfolio performance than value. The bond component will include any accrued interest amounts.

Portfolio Composition continued

- (m) In determining an instrument s effective maturity for purposes of calculating the fund s dollar-weighted average effective maturity, MFS uses the instrument s stated maturity or, if applicable, an earlier date on which MFS believes it is probable that a maturity-shortening device (such as a put, pre-refunding or prepayment) will cause the instrument to be repaid. Such an earlier date can be substantially shorter than the instrument s stated maturity.
- (x) Represents the portfolio s exposure to issuer countries as a percentage of a portfolio s net assets. For purposes of this presentation, United States includes Cash & Cash Equivalents and Other.

From time to time Cash & Cash Equivalents may be negative due to borrowings for leverage transactions and/or timing of cash receipts.

Where the fund holds convertible bonds, these are treated as part of the equity portion of the portfolio.

Cash & Cash Equivalents includes any cash, investments in money market funds, short-term securities, and other assets less liabilities. Please see the Statement of Assets and Liabilities for additional information related to the fund s cash position and other assets and liabilities.

Other includes currency derivatives and/or any offsets to derivative positions.

Percentages are based on net assets as of 10/31/15.

The portfolio is actively managed and current holdings may be different.

## **MANAGEMENT REVIEW**

#### **Summary of Results**

MFS Multimarket Income Trust (fund) is a closed-end fund. The fund s investment objective is to seek high current income, but may also consider capital appreciation. The fund normally invests at least 80% of its net assets in fixed income securities. MFS considers debt instruments of all types to be fixed income securities. MFS normally invests the fund s assets in corporate bonds of US and/or foreign issuers, US Government securities, foreign government securities, mortgage-backed and other asset-backed securities of US and foreign issuers, and/or debt instruments of issuers located in emerging market countries. MFS allocates the fund s assets across these categories with a view toward broad diversification across and within these categories. MFS may also invest the fund s assets in equity securities.

For the twelve months ended October 31, 2015, shares of the fund provided a total return of 0.24%, at net asset value and a total return of 2.18%, at market value. This compares with a return of 1.91% for the fund s benchmark, the Barclays U.S. High-Yield Corporate Bond 2% Issuer Capped Index. Over the same period, the fund s other benchmark, the MFS Multimarket Income Trust Blended Index (Blended Index), generated a return of 1.32%. The Blended Index reflects the blended returns of various fixed income market indices, with percentage allocations to each index designed to resemble the fixed income allocations of the fund. The market indices and related percentage allocations used to compile the Blended Index are set forth in the Performance Summary.

The performance commentary below is based on the net asset value performance of the fund which reflects the performance of the underlying pool of assets held by the fund. The total return at market value represents the return earned by owners of the shares of the fund which are traded publicly on the exchange.

#### **Market Environment**

Sluggish global growth weighed on both developed and emerging market (EM) economies during the reporting period. EM economies have been particularly lackluster. While the US Federal Reserve appears ready to tighten monetary conditions, other large developed economies continued to embrace accommodative monetary policies, particularly the European Central Bank, which instituted a large quantitative easing program in January of 2015. Poor policy management by the Chinese government roiled global markets over the summer, beginning with the poorly executed response to the stock market s boom and bust and then the confusing decision to devalue the remninbi in August. China subsequently stabilized the currency and ramped up a wide range of monetary and fiscal measures to stimulate the economy and bolster sentiment.

During the second half of the reporting period, the US faced an earnings recession caused primarily by the sharp decline in the prices of oil and other commodities. Earnings contractions were concentrated primarily in the energy, materials and industrial sectors. An additional headwind for earnings was the sharp rise in the US dollar over the period. Exports were crimped by the dollar strength and falling demand in emerging markets. Consumer spending held up well during the period amid

Management Review continued

a modest increase in real wages and a tailwind from falling gasoline prices. Demand for autos reached near-record territory late in the period. In emerging markets, two key factors weighed on economies and asset prices: weaker Chinese growth, and the resulting decline in commodity prices, in addition to prospects for higher US interest rates. Structural factors like floating exchange rates and fiscal buffers partially offset these cyclical headwinds.

#### **Contributors to Performance**

Relative to the Blended Index, a lesser exposure to Venezuelan and Brazilian bonds were primary contributors to the fund s outperformance.

The fund s greater exposure to corporate bonds, particularly within both the *industrial* and *financial* sectors, also benefited relative performance.

#### **Detractors from Performance**

Credit quality in US bonds, particularly a greater exposure to B and BB fased urities, was a primary area of relative weakness.

The portion of the fund s return derived from yield, which was less than that of the Blended Index, also held back relative performance.

The fund employs leverage and, to the extent that investments are purchased through the use of leverage, the fund s net asset value may increase or decrease at a greater rate than a comparable unleveraged fund. During the reporting period, the use of leverage did not have a material impact on the fund s performance.

(r) Bonds rated BBB, Baa, or higher are considered investment grade; bonds rated BB, Ba, or below are considered non-investment grade. The source for bond quality ratings is Moody s Investors Service, Standard & Poor s and Fitch, Inc. and are applied using the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). For securities which are not rated by any of the three agencies, the security is considered Not Rated. The views expressed in this report are those of the portfolio managers only through the end of the period of the report as stated on the cover and do not necessarily reflect the views of MFS or any other person in the MFS organization. These views are subject to change at any time based on market or other conditions, and MFS disclaims any responsibility to update such views. These views may not be relied upon as investment advice or an indication of trading intent on behalf of any MFS portfolio. References to specific securities are not recommendations of such securities, and may not be representative of any MFS portfolio s current or future investments.

## PERFORMANCE SUMMARY THROUGH 10/31/15

The following chart presents the fund s historical performance in comparison to its benchmark(s). Investment return and principal value will fluctuate, and shares, when sold, may be worth more or less than their original cost; current performance may be lower or higher than quoted. The performance shown does not reflect the deduction of taxes, if any, that a shareholder would pay on fund distributions or the sale of fund shares. Performance data shown represents past performance and is no guarantee of future results.

Performance Summary continued

#### **Benchmark Definitions**

Barclays Global Aggregate Credit Bond Index is a subset of the Global Aggregate Index, and contains investment grade credit securities from the U.S. Aggregate, Pan-European Aggregate, Asian-Pacific Aggregate, Eurodollar, 144A, and Euro-Yen indices. Credit securities are publicly issued corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity and quality requirements.

Barclays U.S. Government/Mortgage Bond Index measures debt issued by the U.S. Government, and its agencies, as well as mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).

Barclays U.S. High-Yield Corporate Bond 2% Issuer Capped Index is a component of the Barclays U.S. High-Yield Corporate Bond Index, which measures performance of non-investment grade, fixed rate debt. The index limits the maximum exposure to any one issuer to 2%.

JPMorgan Emerging Markets Bond Index Global measures the performance of U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds.

It is not possible to invest directly in an index.

#### Notes to Performance Summary

The fund s shares may trade at a discount or premium to net asset value. When fund shares trade at a premium, buyers pay more than the net asset value underlying fund shares, and shares purchased at a premium would receive less than the amount paid for them in the event of the fund s liquidation.

The fund s monthly distributions may include a return of capital to shareholders to the extent that the fund s net investment income and net capital gains are insufficient to meet the fund s target annual distribution rate. Distributions that are treated for federal income tax purposes as a return of capital will reduce each shareholder s basis in his or her shares and, to the extent the return of capital exceeds such basis, will be treated as gain to the shareholder from a sale of shares. It may also result in a recharacterization of what economically represents a return of capital to ordinary income in those situations where a fund has long term capital gains and a capital loss carryforward. Returns of shareholder capital have the effect of reducing the fund s assets and increasing the fund s expense ratio.

The fund s target annual distribution rate is calculated based on an annual rate of 8.00% of the fund s average monthly net asset value, not a fixed share price, and the fund s dividend amount will fluctuate with changes in the fund s average monthly net assets

Net asset values and performance results based on net asset value per share do not include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles and may differ from amounts reported in the Statement of Assets and Liabilities or the Financial Highlights.

From time to time the fund may receive proceeds from litigation settlements, without which performance would be lower.

In accordance with Section 23(c) of the Investment Company Act of 1940, the fund hereby gives notice that it may from time to time repurchase shares of the fund in the open market at the option of the Board of Trustees and on such terms as the Trustees shall determine.

## DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

The fund offers a Dividend Reinvestment and Cash Purchase Plan (the Plan ) that allows common shareholders to reinvest either all of the distributions paid by the fund or only the long-term capital gains. Generally, purchases are made at the market price unless that price exceeds the net asset value (the shares are trading at a premium). If the shares are trading at a premium, purchases will be made at a price of either the net asset value or 95% of the market price, whichever is greater. You can also buy shares on a quarterly basis in any amount \$100 and over. The Plan Agent will purchase shares under the Cash Purchase Plan on the 15th of January, April, July, and October or shortly thereafter.

If shares are registered in your own name, new shareholders will automatically participate in the Plan, unless you have indicated that you do not wish to participate. If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you may wish to request that your shares be re-registered in your own name so that you can participate. There is no service charge to reinvest distributions, nor are there brokerage charges for shares issued directly by the fund. However, when shares are bought on the New York Stock Exchange or otherwise on the open market, each participant pays a pro rata share of the transaction expenses, including commissions. Dividends and capital gains distributions are taxable whether received in cash or reinvested in additional shares — the automatic reinvestment of distributions does not relieve you of any income tax that may be payable (or required to be withheld) on the distributions.

If your shares are held directly with the Plan Agent, you may withdraw from the Plan at any time by going to the Plan Agent s website at www.computershare.com/investor, by calling 1-800-637-2304 any business day from 9 a.m. to 5 p.m. Eastern time or by writing to the Plan Agent at P.O. Box 43078, Providence, RI 02940-3078. Please have available the name of the fund and your account number. For certain types of registrations, such as corporate accounts, instructions must be submitted in writing. Please call for additional details. When you withdraw from the Plan, you can receive the value of the reinvested shares in one of three ways: your full shares will be held in your account, the Plan Agent will sell your shares and send the proceeds to you, or you may transfer your full shares to your investment professional who can hold or sell them. Additionally, the Plan Agent will sell your fractional shares and send the proceeds to you.

If you have any questions or for further information or a copy of the Plan, contact the Plan Agent Computershare Trust Company, N.A. (the Transfer Agent for the fund) at 1-800-637-2304, at the Plan Agent s website at www.computershare.com/investor, or by writing to the Plan Agent at P.O. Box 43078, Providence, RI 02940-3078.
