QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2016.

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 0-15752

CENTURY BANCORP, INC.

(Exact name of registrant as specified in its charter)

COMMONWEALTH OF MASSACHUSETTS
 (State or other jurisdiction of
 incorporation or organization)

04-2498617
 (I.R.S. Employer
 Identification No.)

400 MYSTIC AVENUE, MEDFORD, MA
 (Address of principal executive offices)
(781) 391-4000

02155
 (Zip Code)

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. (See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act). (Check one):

Large accelerated filer Accelerated filer
 Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2016, the Registrant had outstanding:

Class A Common Stock, \$1.00 par value	3,600,729 Shares
Class B Common Stock, \$1.00 par value	1,967,180 Shares

Forward Looking Statements

Except for the historical information contained herein, this Quarterly Report on Form 10-Q may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 as amended and Section 21E of the Securities Exchange Act of 1934 as amended. Investors are cautioned that forward-looking statements are inherently uncertain. Actual performance and results of operations may differ materially from those projected or suggested in the forward-looking statements due to certain risks and uncertainties, including, without limitation, (i) the fact that the Company's success is dependent to a significant extent upon general economic conditions in New England, (ii) the fact that the Company's earnings depend to a great extent upon the level of net interest income (the difference between interest income earned on loans and investments and the interest expense paid on deposits and other borrowings) generated by the Bank and thus the Bank's results of operations may be adversely affected by increases or decreases in interest rates, (iii) the fact that the banking business is highly competitive and the profitability of the Company depends upon the Bank's ability to attract loans and deposits within its market area, where the Bank competes with a variety of traditional banking and other institutions such as credit unions and finance companies, and (iv) the fact that a significant portion of the Company's loan portfolio is comprised of commercial loans, exposing the Company to the risks inherent in loans based upon analyses of credit risk, the value of underlying collateral, including real estate, and other more intangible factors, which are considered in making commercial loans. Accordingly, the Company's profitability may be negatively impacted by errors in risk analyses, and by loan defaults, and the ability of certain borrowers to repay such loans may be adversely affected by any downturn in general economic conditions. These factors, as well as general economic and market conditions, may materially and adversely affect the market price of shares of the Company's common stock. Because of these and other factors, past financial performance should not be considered an indicator of future performance. The forward-looking statements contained herein represent the Company's judgment as of the date of this Form 10-Q, and the Company cautions readers not to place undue reliance on such statements.

Century Bancorp, Inc.

Notes to Unaudited Consolidated Interim Financial Statements

Three Months Ended March 31, 2016 and 2015

Note 1. Basis of Financial Statement Presentation

The consolidated financial statements include the accounts of Century Bancorp, Inc. (the Company) and its wholly owned subsidiary, Century Bank and Trust Company (the Bank). The consolidated financial statements also include the accounts of the Bank's wholly owned subsidiaries, Century Subsidiary Investments, Inc. (CSII), Century Subsidiary Investments, Inc. II (CSII II), Century Subsidiary Investments, Inc. III (CSII III) and Century Financial Services Inc. (CFSI). CSII, CSII II, and CSII III are engaged in buying, selling and holding investment securities. CFSI has the power to engage in financial agency, securities brokerage, and investment and financial advisory services and related securities credit. The Company also owns 100% of Century Bancorp Capital Trust II (CBCT II). The entity is an unconsolidated subsidiary of the Company.

All significant intercompany accounts and transactions have been eliminated in consolidation. The Company provides a full range of banking services to individual, business and municipal customers in Massachusetts. As a bank holding company, the Company is subject to the regulation and supervision of the Federal Reserve Board. The Bank, a state chartered financial institution, is subject to supervision and regulation by applicable state and federal banking agencies, including the Federal Reserve Board, the Federal Deposit Insurance Corporation (the FDIC) and the Commonwealth of Massachusetts Commissioner of Banks. The Bank is also subject to various requirements and restrictions under federal and state law, including requirements to maintain reserves against deposits, restrictions on the types and amounts of loans that may be granted and the interest that may be charged thereon, and limitations on the types of investments that may be made and the types of services that may be offered. Various consumer laws and regulations also affect the operations of the Bank. In addition to the impact of regulation, commercial banks are affected significantly by the actions of the Federal Reserve Board as it attempts to control the money supply and credit availability in order to influence the economy. All aspects of the Company's business are highly competitive. The Company faces aggressive competition from other lending institutions and from numerous other providers of financial services. The Company has one reportable operating segment.

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ from those estimates. The Company's quarterly report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, as filed with the Securities and Exchange Commission.

Material estimates that are susceptible to change in the near term relate to the allowance for loan losses. Management believes that the allowance for loan losses is adequate based on independent appraisals and review of other factors, including historical charge-off rates with additional allocations based on risk factors for each category and general economic factors. While management uses available information to recognize loan losses, future additions to the allowance for loan losses may be necessary based on changes in economic conditions. In addition, regulatory agencies periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance for loan losses based on their judgments about information available to them at the time of their examination. Certain reclassifications are made to prior-year amounts whenever necessary to conform with the

current-year presentation.

Table of ContentsNote 2. Securities Available-for-Sale

	March 31, 2016				December 31, 2015

Obligations Issued by States and Political Subdivisions	135,490		401	135,089	157,838		878	156,960
Other Debt Securities	4,600		131	4,469	4,600	3	130	4,473
Equity Securities	116	101		217	153	99		252
Total	\$ 380,219	\$ 880	\$ 750	\$ 380,349	\$ 404,977	\$ 979	\$ 1,333	\$ 404,623

Included in U.S. Government Sponsored Enterprise Securities and U.S. Government Agency and Sponsored Enterprise Mortgage-Backed Securities are securities at fair value pledged to secure public deposits and repurchase agreements amounting to \$213,639,000 and \$220,482,000 at March 31, 2016 and December 31, 2015, respectively. Also included in securities available-for-sale are securities pledged for borrowing at the Federal Home Loan Bank of Boston amounting to \$19,103,000 and \$20,056,000 at March 31, 2016 and December 31, 2015, respectively. There were no realized gains on sales of investments for the three months ended March 31, 2016 and March 31, 2015, respectively.

Debt securities of Government Sponsored Enterprises primarily refer to debt securities of Fannie Mae and Freddie Mac.

Table of Contents

The following table shows the maturity distribution of the Company's securities available-for-sale at March 31, 2016.

	Amortized Cost	Fair Value
	(in thousands)	
Within one year	\$ 129,038	\$ 129,037
After one but within five years	160,638	161,034
After five but within ten years	83,228	83,391
More than 10 years	5,699	5,283
Non-maturing	1,616	1,604
Total	\$ 380,219	\$ 380,349

The weighted average remaining life of investment securities available-for-sale at March 31, 2016 was 3.3 years. Included in the weighted average remaining life calculation at March 31, 2016 were \$5,000,000 of U.S. Government Sponsored Enterprises obligations that are callable at the discretion of the issuer. The contractual maturities, which were used in the table above, of mortgage-backed securities, will differ from the actual maturities, due to the ability of the issuers to prepay underlying obligations.

As of March 31, 2016 and December 31, 2015, management concluded that the unrealized losses of its investment securities are temporary in nature since they are not related to the underlying credit quality of the issuers, and the Company does not intend to sell these debt securities and it is not more likely than not that it will be required to sell these debt securities before the anticipated recovery of its remaining amortized cost. In making its other-than-temporary impairment evaluation, the Company considered that the principal and interest on these securities are from issuers that are investment grade. The change in the unrealized losses on the state and municipal securities and the nonagency mortgage-backed securities was primarily caused by changes in credit spreads and liquidity issues in the marketplace.

The unrealized loss on U.S. Treasury, SBA Backed Securities, and U.S. Government Agency and Sponsored Enterprises Mortgage Backed Securities, related primarily to interest rates and not credit quality and because the Company has the ability and intent to hold these investments until recovery of fair value, which may be maturity. The Company does not consider these investments to be other-than-temporarily impaired.

In evaluating the underlying credit quality of a security, management considers several factors such as the credit rating of the obligor and the issuer, if applicable. Internal reviews of issuer financial statements are performed as deemed necessary. In the case of privately issued mortgage-backed securities, the performance of the underlying loans is analyzed as deemed necessary to determine the estimated future cash flows of the securities. Factors considered include the level of subordination, current and estimated future default rates, current and estimated prepayment rates, estimated loss severity rates, geographic concentrations and origination dates of underlying loans. In the case of marketable equity securities, the severity of the unrealized loss, the length of time the unrealized loss has existed, and the issuer's financial performance are considered.

Table of Contents

The following table shows the temporarily impaired securities of the Company's available-for-sale portfolio at March 31, 2016. This table shows the unrealized market loss of securities that have been in a continuous unrealized loss position for 12 months or less and a continuous loss position for 12 months and longer. There are 20 and 10 securities that are temporarily impaired for less than 12 months and for 12 months or longer, respectively, out of a total of 267 holdings at March 31, 2016.

Temporarily Impaired Investments	Less than 12 months Unrealized		March 31, 2016 12 months or longer Unrealized		Total Unrealized

Total	\$ 1,412,702	\$ 25,876	\$ 1,373	\$ 1,437,205	\$ 1,438,903	\$ 9,781	\$ 9,724	\$ 1,438,960

Included in U.S. Government and Agency Securities are securities pledged to secure public deposits and repurchase agreements at fair value amounting to \$1,001,953,000 and \$1,004,743,000 at March 31, 2016 and December 31, 2015, respectively. Also included are securities pledged for borrowing at the Federal Home Loan Bank of Boston at fair value amounting to \$368,956,000 and \$432,965,000 at March 31, 2016 and December 31, 2015, respectively.

At March 31, 2016 and December 31, 2015, all mortgage-backed securities are obligations of U.S. Government Agencies and Government Sponsored Enterprises. Government Sponsored Enterprises primarily refer to debt securities of Fannie Mae and Freddie Mac.

The following table shows the maturity distribution of the Company's securities held-to-maturity at March 31, 2016.

	Amortized Cost (in thousands)	Fair Value
Within one year	\$ 9,242	\$ 9,343
After one but within five years	1,205,411	1,223,805
After five but within ten years	193,283	199,272
More than ten years	4,766	4,785
Total	\$ 1,412,702	\$ 1,437,205

The weighted average remaining life of investment securities held-to-maturity at March 31, 2016 was 3.9 years. Included in the weighted average remaining life calculation at March 31, 2016 were \$54,658,000 of U.S. Government Sponsored Enterprises obligations that are callable at the discretion of the issuer. The actual maturities, which were used in the table above, of mortgage-backed securities, will differ from the contractual maturities, due to the ability of the issuers to prepay underlying obligations.

As of March 31, 2016 and December 31, 2015, management concluded that the unrealized losses of its investment securities are temporary in nature since they are not related to the underlying credit quality of the issuers, and the Company does not intend to sell these debt securities and it is not likely that it will be required to sell these debt securities before the anticipated recovery of their remaining amortized costs. In making its other-than-temporary impairment evaluation, the Company considered the fact that the principal and interest on these securities are from issuers that are investment grade.

The unrealized loss on U.S. Government Sponsored Enterprises and U.S. Government Agency and Sponsored Enterprises Mortgage-Backed Securities related primarily to interest rates and not credit quality, and because the Company does not intend to sell any of these securities and it is not likely that it will be required to sell these securities before the anticipated recovery of the remaining amortized cost, the Company does not consider these investments to be other-than-temporarily impaired at March 31, 2016 and December 31, 2015.

Table of Contents

In evaluating the underlying credit quality of a security, management considers several factors such as the credit rating of the obligor and the issuer, if applicable. Internal reviews of issuer financial statements are performed as deemed necessary.

The following table shows the temporarily impaired securities of the Company's held-to-maturity portfolio at March 31, 2016. This table shows the unrealized market loss of securities that have been in a continuous unrealized loss position for 12 months or less and a continuous loss position for 12 months and longer. There are 20 and 24 securities that are temporarily impaired for less than 12 months and for 12 months or longer, respectively, out of a total of 326 holdings at March 31, 2016.

Note 4. Allowance for Loan Losses

The Company maintains an allowance for loan losses in an amount determined by management on the basis of the character of the loans, loan performance, financial condition of borrowers, the value of collateral securing loans and

other relevant factors.

The following table summarizes the changes in the Company's allowance for loan losses for the periods indicated.

	Three months ended	
	March 31,	
	2016	2015
	(in thousands)	
Allowance for loan losses, beginning of period	\$ 23,075	\$ 22,318
Loans charged off	(69)	(81)
Recoveries on loans previously charged-off	88	92
Net recoveries (charge-offs)	19	11
Provision charged to expense	450	200
Allowance for loan losses, end of period	\$ 23,544	\$ 22,529

The Company utilizes a six grade internal loan rating system for commercial real estate, construction and commercial loans as follows:

Loans rated 1-3 (Pass):

Loans in this category are considered pass rated loans with low to average risk.

Loans rated 4 (Monitor):

These loans represent classified loans that management is closely monitoring for credit quality. These loans have had or may have minor credit quality deterioration as of March 31, 2016 and December 31, 2015.

Loans rated 5 (Substandard):

Substandard loans represent classified loans that management is closely monitoring for credit quality. These loans have had more significant credit quality deterioration as of March 31, 2016 and December 31, 2015.

Loans rated 6 (Doubtful):

Doubtful loans represent classified loans that management is closely monitoring for credit quality. These loans had more significant credit quality deterioration as of March 31, 2016 and December 31, 2015 and are doubtful for full collection.

Impaired:

Impaired loans represent classified loans that management is closely monitoring for credit quality. A loan is classified as impaired when it is probable that the Company will be unable to collect all amounts due.

Table of Contents

A loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is impaired, the Company measures impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate, except that as a practical expedient, the Company measures impairment based on a loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Loans are charged-off

when management believes that the collectability of the loan's principal is not probable. The specific factors that management considers in making the determination that the collectability of the loan's principal is not probable include: the delinquency status of the loan, the fair value of the collateral, if secured, and the financial strength of the borrower and/or guarantors. For collateral dependent loans, the amount of the recorded investment in a loan that exceeds the fair value of the collateral is charged-off against the allowance for loan losses in lieu of an allocation of a specific allowance amount when such an amount has been identified definitively as uncollectible. The Company's policy for recognizing interest income on impaired loans is contained within Note 1 of the consolidated financial statements contained in the Company's Annual Report for the fiscal year ended December 31, 2015.

Tax (expense) or benefit	161	142	Provision for income taxes
Net of tax	\$ (242)	\$ (213)	Net income
Total reclassifications for the period	\$ (1,226)	\$ (948)	Net income, net of tax

(a) Amount in parentheses indicates reductions to net income.

(b) These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see employee benefits footnote (Note 7) for additional details).

Note 6. Earnings per Share (EPS)

Class A and Class B shares participate equally in undistributed earnings. Under the Company's Articles of Organization, the holders of Class A Common Stock are entitled to receive dividends per share equal to at least 200% of dividends paid, if any, from time to time, on each share of Class B Common Stock.

Diluted EPS includes the dilutive effect of common stock equivalents; basic EPS excludes all common stock equivalents. The Company had no common stock equivalents outstanding for the periods ended March 31, 2015 and 2016.

Table of Contents

The following table is a reconciliation of basic EPS and diluted EPS for the three months ended March 31,

(in thousands except share and per share data)	Three Months Ended	
	March 31,	
	2016	2015
Basic EPS Computation:		
Numerator:		
Net income, Class A	\$ 4,168	\$ 3,895
Net income, Class B	1,139	1,064

Weighted average shares outstanding, Class B	1,967,180	1,967,180
Diluted EPS, Class A	\$ 0.95	\$ 0.89
Diluted EPS, Class B	0.58	0.54

Note 7. Employee Benefits

The Company provides pension benefits to its employees under a noncontributory, defined benefit plan which is funded on a current basis in compliance with the requirements of the Employee Retirement Income Security Act of 1974 (ERISA) and recognizes costs over the estimated employee service period.

The Company also has a Supplemental Executive Insurance/Retirement Plan (the Supplemental Plan) which is limited to certain officers and employees of the Company. The Supplemental Plan is accrued on a current basis and recognizes costs over the estimated employee service period.

Executive officers of the Company and its subsidiaries who have at least one year of service may participate in the Supplemental Plan. The Supplemental Plan is voluntary and participants are required to contribute to its cost. Life insurance policies, which are owned by the Company, are purchased covering the lives of each participant.

Effective January 1, 2016, the Company changed its estimate of the service and interest components of the net periodic benefit cost. Previously, the Company estimated the service and interest cost components utilizing a single

weighted-average discount rate derived from the yield curve used to measure the benefit obligation. The new estimate utilizes a full yield curve approach in the estimation of these components by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to their underlying projected cash flows. The new estimate provided a more precise measurement of service and interests costs by improving the correlation between projected benefit cash flows and their corresponding spot rates. The change does not affect the measurement of the Company's benefit obligations and it is accounted for as a change in accounting estimate, which is applied prospectively.

Table of Contents**Components of Net Periodic Benefit Cost (Credit) for the Three Months Ended March 31,**

	Pension Benefits		Supplemental Insurance/ Retirement Plan	
	2016	2015	2016	2015
	(in thousands)			
Service cost	\$ 318	\$ 336	\$ 455	\$ 397
Interest	340	394	334	341
Expected return on plan assets	(694)	(688)		
Recognized prior service cost (benefit)	(26)	(26)	29	29
Recognized net actuarial losses	200	203	200	150
Net periodic benefit (credit) cost	\$ 138	\$ 219	\$ 1,018	\$ 917

Contributions

The company intends to contribute \$2,075,000 to the Pension Plan in 2016. As of March 31, 2016, \$1,325,000 has been contributed.

Note 8. Fair Value Measurements

The Company follows FASB ASC 820-10, *Fair Value Measurements and Disclosures*, (formerly SFAS 157, *Fair Value Measurements*,) which among other things, requires enhanced disclosures about assets and liabilities carried at fair value. ASC 820-10 establishes a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring financial instruments at fair value. The three broad levels of the hierarchy are as follows:

Level I Quoted prices are available in active markets for identical assets or liabilities as of the reported date. The type of financial instruments included in Level I are highly liquid cash instruments with quoted prices such as G-7 government, agency securities, listed equities and money market securities, as well as listed derivative instruments.

Level II Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these financial instruments include cash instruments for which quoted prices are available but traded less frequently, derivative instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Instruments which are generally included in this category are corporate bonds and loans, mortgage whole loans and municipal bonds.

Level III Instruments that have little to no pricing observability as of the reported date. These financial instruments do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation. Instruments that are included in this category generally include certain commercial mortgage loans, certain private equity investments, and distressed debt and non-investment grade residual interests in securitizations.

Table of Contents

The results of the fair value hierarchy as of March 31, 2016, are as follows:

Financial Instruments Measured at Fair Value on a Recurring Basis:

	Carrying Value	Securities AFS Fair Value Measurements Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
U.S. Treasury	\$ 1,997	\$	\$ 1,997	\$
U.S. Government Sponsored Enterprises	5,008		5,008	
SBA Backed Securities	5,931		5,931	
U.S. Government Agency and Sponsored Mortgage Backed Securities	226,293		226,293	
Privately Issued Residential Mortgage Backed Securities	1,345		1,345	
Obligations Issued by States and Political Subdivisions	135,089			135,089
Other Debt Securities	4,469		4,469	
Equity Securities	217	217		
Total	\$ 380,349	\$ 217	\$ 245,043	\$ 135,089

Financial Instruments Measured at Fair Value on a Non-recurring Basis:

Impaired Loans	1,044	1,044
-----------------------	--------------	--------------

Impaired loan balances represent those collateral dependent loans where management has estimated the credit loss by comparing the loan's carrying value against the expected realizable fair value of the collateral. Fair value is generally determined through a review process that includes independent appraisals, discounted cash flows, or other external assessments of the underlying collateral, which generally include various Level 3 inputs which are not identifiable. The Company discounts the fair values, as appropriate, based on management's observations of the local real estate market for loans in this category.

Appraisals, discounted cash flows and real estate tax assessments are reviewed quarterly. There is no specific policy regarding how frequently appraisals will be updated. Adjustments are made to appraisals and real estate tax assessments based on management's estimate of changes in real estate values. Within the past twelve months there have been no updated appraisals, however, all impaired loans have been reviewed during the past quarter using either a discounted cash flow analysis, appraisal of collateral or other type of real estate tax assessment. The types of adjustments that are made to specific provisions (credits) relate to impaired loans recognized for the three month

period ended March 31, 2016 amounted to (\$14,000).

There were no transfers between level 1, 2 and 3 for the three months ended March 31, 2016. There were no liabilities measured at fair value on a recurring or nonrecurring basis during the three month period ended March 31, 2016.

The following table presents additional information about assets measured at fair value on a recurring and nonrecurring basis for which the Company has utilized Level 3 inputs to determine fair value (dollars in thousands). Management continues to monitor the assumptions used to value the assets listed below.

Asset	Fair Value	Valuation Technique	Unobservable Input	Unobservable Input Value or Range
Securities AFS				
(4)	\$ 135,089	Discounted cash flow	Discount rate	0%-1% (3)
Impaired				
Loans	1,044	Appraisal of collateral (1)	Appraisal adjustments (2)	0%-30% discount

- (1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable.
- (2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated expenses.
- (3) Weighted averages.
- (4) Municipal securities generally have maturities of one year or less and, therefore, the amortized cost equates to the fair value.

Table of Contents

The changes in Level 3 securities for the three-month period ended March 31, 2016 are shown in the table below:

	Auction Rate Securities	Obligations Issued by States & Political Subdivisions	Equity Securities	Total
	(in thousands)			
Balance at December 31, 2015	\$ 3,820	\$ 153,140	\$ 37	\$ 156,997
Purchases		15,935		15,935
Maturities and calls		(38,251)	(37)	(38,288)
Amortization		(33)		(33)
Changes in fair value	478			478
Balance at March 31, 2016	\$ 4,298	\$ 130,791	\$	\$ 135,089

The amortized cost of Level 3 securities was \$135,490,000 at March 31, 2016 with an unrealized loss of \$401,000. The securities in this category are generally equity investments, municipal securities with no readily determinable fair value or failed auction rate securities. Management evaluated the fair value of these securities based on an evaluation of the underlying issuer, prevailing rates and market liquidity.

The changes in Level 3 securities for the three-month period ended March 31, 2015, are shown in the table below:

	Auction Rate Securities	Obligations Issued by States & Political Subdivisions	Equity Securities	Total
	(in thousands)			
Balance at December 31, 2014	\$ 3,820	\$ 92,964	\$ 102	\$ 96,886
Purchases		41,909		41,909
Maturities and calls		(19,914)		(19,914)
Amortization		(6)		(6)
Changes in fair value				
Balance at March 31, 2015	\$ 3,820	\$ 114,953	\$ 102	\$ 118,875

The amortized cost of Level 3 securities was \$119,750,000 at March 31, 2015 with an unrealized loss of \$875,000. The securities in this category are generally equity investments, municipal securities with no readily determinable fair value or failed auction rate securities. Management evaluated the fair value of these securities based on an evaluation of the underlying issuer, prevailing rates and market liquidity.

Table of Contents

The results of the fair value hierarchy as of December 31, 2015, are as follows:

Financial Instruments Measured at Fair Value on a Recurring Basis:

	Carrying Value	Securities AFS Fair Value Measurements Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
		(in thousands)		
U.S. Treasury	\$ 1,989	\$	\$ 1,989	\$
U.S. Government Sponsored Enterprises SBA Backed Securities	5,989		5,989	
U.S. Government Agency and Sponsored Mortgage Backed Securities	233,526		233,526	
Privately Issued Residential Mortgage Backed Securities	1,434		1,434	
Obligations Issued by States and Political Subdivisions	156,960			156,960
Other Debt Securities	4,473		4,473	
Equity Securities	252	215		37
Total	\$ 404,623	\$ 215	\$ 247,411	\$ 156,997

Financial Instruments Measured at Fair Value on a Non-recurring Basis:

Impaired Loans	\$ 1,056	\$	\$	\$ 1,056
----------------	----------	----	----	----------

Impaired loan balances represent those collateral dependent loans where management has estimated the credit loss by comparing the loan's carrying value against the expected realizable fair value of the collateral. Fair value is generally determined through a review process that includes independent appraisals, discounted cash flows, or other external assessments of the underlying collateral, which generally include various Level 3 inputs which are not identifiable. The Company discounts the fair values, as appropriate, based on management's observations of the local real estate market for loans in this category.

Appraisals, discounted cash flows and real estate tax assessments are reviewed quarterly. There is no specific policy regarding how frequently appraisals will be updated. Adjustments are made to appraisals and real estate tax assessments based on management's estimate of changes in real estate values. Within the past twelve months there have been no updated appraisals, however, all impaired loans have been reviewed during the past quarter using either a discounted cash flow analysis, appraisal of collateral or other type of real estate tax assessment. The types of adjustments that are made to specific provisions (credits) relate to impaired loans recognized for the period ended 2015 for the estimated credit loss amounted to \$165,000.

There were no transfers between level 1, 2 and 3 for the year ended December 31, 2015. There were no liabilities measured at fair value on a recurring or nonrecurring basis during the year ended December 31, 2015.

The following table presents additional information about assets measured at fair value on a recurring and nonrecurring basis for which the Company has utilized Level 3 inputs to determine fair value (dollars in thousands). Management continues to monitor the assumptions used to value the assets listed below.

Asset	Fair Value	Valuation Technique	Unobservable Input	Unobservable Input Value or Range
Securities AFS				
(4)	\$ 156,997	Discounted cash flow	Discount rate	0%-1% (3)
Impaired Loans	1,056	Appraisal of collateral (1)	Appraisal adjustments (2)	0%-30% discount

- (1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable.
- (2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated expenses.
- (3) Weighted averages
- (4) Municipal securities generally have maturities of one year or less and, therefore, the amortized cost equates to the fair value.

Table of Contents

Note 9. Fair Values of Financial Instruments

The following methods and assumptions were used by the Company in estimating fair values of its financial instruments. Excluded from this disclosure are all nonfinancial instruments. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

The assumptions used below are expected to approximate those that market participants would use in valuing these financial instruments.

Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including estimates of timing, amount of expected future cash flows and the credit standing of the issuer. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. In some cases, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. Care should be exercised in deriving conclusions about our business, its value or financial position based on the fair value information of financial instruments presented below.

Securities held-to-maturity: The fair values of these securities were based on quoted market prices, where available, as provided by third-party investment portfolio pricing vendors. If quoted market prices were not available, fair values provided by the vendors were based on quoted market prices of comparable instruments in active markets and/or based on a matrix pricing methodology which employs The Bond Market Association's standard calculations for cash flow and price/yield analysis, live benchmark bond pricing and terms/condition data available from major pricing sources. Management regards the inputs and methods used by third party pricing vendors to be Level 2 inputs and methods as defined in the fair value hierarchy provided by FASB.

Loans Held-for-Sale: Fair value is measured using quoted market prices when available. These assets are typically categorized as Level 1. If quoted market prices are not available, comparable market values may be utilized. These assets are typically categorized as Level 2.

Loans: For variable-rate loans, that reprice frequently and with no significant change in credit risk, fair values are based on carrying amounts. The fair value of other loans is estimated using discounted cash flow analysis, based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Incremental credit risk for nonperforming loans has been considered.

Time deposits: The fair value of time deposits was estimated using a discounted cash flow approach that applies prevailing market interest rates for similar maturity instruments. The fair values of the Company's time deposit liabilities do not take into consideration the value of the Company's long-term relationships with depositors, which may have significant value.

Other borrowed funds: The fair value of other borrowed funds is based on the discounted value of contractual cash flows. The discount rate used is estimated based on the rates currently offered for other borrowed funds of similar remaining maturities.

Subordinated debentures: The fair value of subordinated debentures is based on the discounted value of contractual cash flows. The discount rate used is estimated based on the rates currently offered for other subordinated debentures of similar remaining maturities.

Table of Contents

The following presents (in thousands) the carrying amount, estimated fair value, and placement in the fair value hierarchy of the Company's financial instruments as of March 31, 2016 and December 31, 2015. This table excludes financial instruments for which the carrying amount approximates fair value. Financial assets for which the fair value approximates carrying value include cash and cash equivalents, short-term investments, FHLBB stock and accrued interest receivable. Financial liabilities for which the fair value approximates carrying value include non-maturity deposits, short-term borrowings and accrued interest payable.

	Carrying Amount	Estimated Fair Value	Fair Value Measurements		
			Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
(in thousands)					
March 31, 2016					
Financial assets:					
Securities held-to-maturity	\$ 1,412,702	\$ 1,437,205	\$ 1,437,205	\$	
Loans Held-for-Sale	48,180	48,958		48,958	
Loans (1)	1,738,914	1,750,498			1,750,498
Financial liabilities:					
Time deposits	446,185	448,690		448,690	
Other borrowed funds	356,000	365,342		365,342	
Subordinated debentures	36,083	36,083			36,083
December 31, 2015					
Financial assets:					
Securities held-to-maturity	1,438,903	1,438,960		1,438,960	
Loans (1)	1,708,461	1,677,270			1,677,270
Financial liabilities:					
Time deposits	473,426	474,046		474,046	
Other borrowed funds	368,000	372,209		372,209	
Subordinated debentures	36,083	36,083			36,083

(1) Comprised of loans (including collateral dependent impaired loans), net of deferred loan costs and the allowance for loan losses.

Note 10. Recent Accounting Developments

In January 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-1, Financial Instruments-Overall (Subtopic 825-10) *Recognition and Measurement of Financial Assets and Financial Liabilities*. This ASU significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair value. It also amends certain disclosure requirements associated with the fair value of financial instruments. This ASU is effective for fiscal years beginning after December 15, 2017, including interim periods therein. The Company is currently assessing the applicability of this ASU and has not determined the impact, if any, as of March 31, 2016.

In February 2016, the FASB issued ASU 2016-02, Leases. This ASU requires lessees to put most leases on their balance sheet but recognize expenses on their income statements in a manner similar to today's accounting. This ASU also eliminates today's real estate-specific provisions for all companies. For lessors, this ASU modifies the

classification criteria and the accounting for sales-type and direct financing leases. This ASU is effective for fiscal years beginning after December 15, 2018, including interim periods therein. Early adoption is permitted. The Company is currently assessing the applicability of this ASU and has not determined the impact, if any, as of March 31, 2016.

In March 2016, the FASB issued ASU 2016-07, Investments – Equity Method and Joint Ventures (Topic 323) *Simplifying the Transition to the Equity Method of Accounting*. This ASU requires that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. This ASU is effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. The effect of this update is not expected to have a material impact on the Company's consolidated financial position.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**
Executive Overview

Century Bancorp, Inc. (together with its bank subsidiary, unless the context otherwise requires, the Company) is a Massachusetts state-chartered bank holding company headquartered in Medford, Massachusetts. The Company is a Massachusetts corporation formed in 1972 and has one banking subsidiary (the Bank): Century Bank and Trust Company formed in 1969. At March 31, 2016, the Company had total assets of \$4.1 billion. Currently, the Company operates 27 banking offices in 20 cities and towns in Massachusetts, ranging from Braintree in the south to Andover in the north. The Bank's customers consist primarily of small and medium-sized businesses and retail customers in these communities and surrounding areas, as well as local governments and institutions throughout Massachusetts, New Hampshire, Rhode Island, Connecticut and New York.

The Company's results of operations are largely dependent on net interest income, which is the difference between the interest earned on loans and securities and interest paid on deposits and borrowings. The results of operations are also affected by the level of income and fees from loans, deposits, as well as operating expenses, the provision for loan losses, the impact of federal and state income taxes and the relative levels of interest rates and economic activity.

The Company offers a wide range of services to commercial enterprises, state and local governments and agencies, non-profit organizations and individuals. It emphasizes service to small and medium sized businesses and retail customers in its market area. In recent quarters, the Company has increased business to larger institutions, specifically, healthcare and higher education. The Company makes commercial loans, real estate and construction loans and consumer loans, and accepts savings, time, and demand deposits. In addition, the Company offers its corporate and institutional customers automated lock box collection services, cash management services and account reconciliation services, and actively promotes the marketing of these services to the municipal market. Also, the Company provides full service securities brokerage services through a program called Investment Services at Century Bank, which is supported by LPL Financial, a third party full-service securities brokerage business.

The Company has municipal cash management client engagements in Massachusetts, New Hampshire and Rhode Island comprising of approximately 250 government entities.

Net income for the quarter ended March 31, 2016 was \$5,307,000, or \$0.95 per Class A share diluted, compared to net income of \$4,959,000, or \$0.89 per Class A share diluted, for the quarter ended March 31, 2015.

Earnings per share (EPS) for each class of stock and time period is as follows:

		Three months ended March 31, 2016	Three months ended March 31, 2015
Basic EPS	Class A common	\$ 1.16	\$ 1.08
Basic EPS	Class B common	\$ 0.58	\$ 0.54
Diluted EPS	Class A common	\$ 0.95	\$ 0.89
Diluted EPS	Class B common	\$ 0.58	\$ 0.54

Net interest income totaled \$17.9 million for the quarter ended March 31, 2016 compared to \$16.4 million for the same period in 2015. The 8.8% increase in net interest income for the period is primarily due to an increase in average

earning assets. The net interest margin increased from 2.12% on a fully taxable equivalent basis for the first quarter of 2015 to 2.18% on the same basis for 2016. This was primarily the result of an increase in rates on earning assets. The average balances of earning assets increased by 6.8% combined with a similar increase in average deposits. Also, interest expense increased 13.6% as a result of an increase in deposit balances.

Table of Contents

The trends in the net interest margin are illustrated in the graph below:

Net Interest Margin

The net interest margin declined slightly throughout 2014 and the first quarter of 2015. During the second and third quarter of 2015 the net interest margin increased primarily as a result of an increase in higher yielding assets as well as prepayment penalties collected. The increase in higher yielding assets was primarily the result of increased purchases of securities held-to-maturity. The margin decreased during the fourth quarter of 2015 primarily as a result of lower yielding loan originations. The margin increased during the first quarter of 2016 primarily as a result of an increase in rates on earning assets.

While management will continue its efforts to improve the net interest margin, there can be no assurance that certain factors beyond its control, such as the prepayment of loans and changes in market interest rates, will continue to positively impact the net interest margin.

The provision for loan losses increased by \$250,000 from \$200,000 for the quarter ended March 31, 2015 to \$450,000 for the same period in 2016, primarily as a result of an increase in loan balances. During the second quarter of 2015, the Company enhanced its approach to the development of the historical loss factors on certain loans within the portfolio. This was done in response to the changing composition of the portfolio. Further discussion relating to changes in portfolio composition is discussed in the allowance for loan loss section of the management discussion and analysis. Non-performing assets totaled \$1.5 million at March 31, 2016, compared to \$2.3 million at December 31, 2015.

For the first three months of 2016, the Company's effective income tax rate was 1.2% compared to 4.2% for last year's corresponding period. The effective income tax rate decreased primarily as a result of an increase in tax-exempt income.

During March 2014, the Company entered into a lease agreement to open a branch located on Boylston Street in Boston, Massachusetts. This property is leased from an entity affiliated with Marshall M. Sloane, Chairman of the Board of the Company. This agreement was approved by the Board of Directors in the absence of the Chairman of the Board. The branch opened on April 22, 2015. The deposits from the Kenmore Square, Boston Massachusetts branch, which closed on September 30, 2014, were moved to the new Boylston Street branch.

Recent Market Developments

The financial services industry continues to face challenges in the aftermath of the recent national and global economic crisis. Since June 2009, the U.S. economy has been recovering from the most severe recession and financial crisis since the Great Depression. There have been some improvements in private sector employment, industrial production and U.S. exports; nevertheless, the pace of economic recovery has been slow. Financial markets have improved since the depths of the crisis but are still unsettled and volatile. There is continued concern about the U.S. economic outlook.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) became law. The Act was intended to address many issues arising in the recent financial crisis and is exceedingly broad in scope, affecting many aspects of bank and financial market regulation. The Act requires, or permits by implementing regulation,

enhanced prudential standards for banks and bank holding companies inclusive of capital, leverage, liquidity, concentration and exposure measures. In addition, traditional bank regulatory principles such as restrictions on transactions with affiliates and insiders were enhanced. The Act also contains reforms of consumer mortgage lending practices and creates a Bureau of Consumer Financial Protection, which is granted broad authority

Table of Contents

over consumer financial practices of banks and others. It is expected as the specific new or incremental requirements applicable to the Company become effective that the costs and difficulties of remaining compliant with all such requirements will increase. The Act broadened the base for FDIC assessments to average consolidated assets less tangible equity of financial institutions and also permanently raises the current standard maximum FDIC deposit insurance amount to \$250,000. The Act extended unlimited deposit insurance on non-interest bearing transaction accounts through December 31, 2012. In addition, the Act added a new Section 13 to the Bank Holding Company Act, the so-called Volcker Rule, (the Rule) which generally restricts certain banking entities such as the Company and its subsidiaries or affiliates, from engaging in proprietary trading activities and owning equity in or sponsoring any private equity or hedge fund. The Rule became effective July 21, 2012. The final implementing regulations for the Rule were issued by various regulatory agencies in December, 2013 and under an extended conformance regulation compliance must be achieved by July 21, 2015. The conformance period for investments in and relationships with certain legacy covered funds has been extended to July 21, 2016 and is expected to be extended further to July 31, 2017. Under the Rule, the Company may be restricted from engaging in proprietary trading, investing in third party hedge or private equity funds or sponsoring new funds unless it qualifies for an exemption from the rule. The Company has little involvement in prohibited proprietary trading or investment activities in covered funds and the Company does not expect that complying with the requirements of the Rule will have any material effect on the Company's financial condition or results of operation.

Federal banking regulators have issued risk-based capital guidelines, which assign risk factors to asset categories and off-balance-sheet items. Also, the Basel Committee has issued capital standards entitled Basel III: A global regulatory framework for more resilient banks and banking systems (Basel III). The Federal Reserve Board has finalized its rule implementing the Basel III regulatory capital framework. The rule that came into effect in January 2015 sets the Basel III minimum regulatory capital requirements for all organizations. It includes a new common equity Tier I ratio of 4.5 percent of risk-weighted assets, raises the minimum Tier I capital ratio from 4 percent to 6 percent of risk-weighted assets and would set a new conservation buffer of 2.5 percent of risk-weighted assets. The implementation of the framework did not have a material impact on the Company's financial condition or results of operations.

Financial Condition**Loans**

On March 31, 2016, total loans outstanding were \$1.8 billion, up by \$30.9 million from the total on December 31, 2015. At March 31, 2016, commercial real estate loans accounted for 40.6% and residential real estate loans, including home equity loans, accounted for 22.3% of total loans.

Commercial and industrial loans increased to \$529.2 million March 31, 2016 from \$452.2 million at December 31, 2015, primarily as a result of an increase in larger loan originations to large institutions. Construction loans decreased to \$26.6 million at March 31, 2016 from \$27.4 million on December 31, 2015, primarily as a result of payoffs. Municipal loans decreased slightly to \$85.2 million from \$85.7 million, primarily as a result of payoffs. In recent quarters, the Company has increased business to larger institutions, specifically, healthcare and higher education. Further discussion relating to changes in portfolio composition is discussed in the allowance for loan loss section of the management discussion and analysis.

Allowance for Loan Losses

The allowance for loan loss at March 31, 2016 was \$23.5 million as compared to \$23.1 million at December 31, 2015. The level of the allowance for loan losses to total loans was 1.34% at March 31, 2016 and 1.33% at December 31, 2015.

During 2015, the Company enhanced its approach to the development of the historical loss factors and qualitative factors used on certain loan portfolios. The methodology enhancement was in response to the changes in the risk characteristics of the Company's new loan originations, as the Company has continued to increase its exposure to larger loan originations to large institutions with strong credit quality. The Company has limited internal loss history experience with these types of loans, and has determined a more appropriate representation of loss expectation is to utilize external historical loss factors based on public credit ratings, as there is a great deal of default and loss data available on these types of loans from the credit rating agencies. As of June 30, 2015, the Company incorporated this information into the development of the historical loss rates for these loan types. During the first quarter of 2016, the Company's loan portfolio risk profile has remained consistent with year-end. There have been no changes to the allowance methodology which has resulted in a relatively stable ratio of allowance for loan losses to total loans. The combination of the enhancements made to the allowance methodology to address the changing risk profile of the Company's new loan originations and the increase in these loan types as a percentage of the overall portfolio, has resulted in a relatively stable ratio of allowance for loan losses to total loans.

Table of Contents

In addition, the Company monitors the outlook for the industries in which these institutions operate. Healthcare and higher education are the primary industries. The Company also monitors the volatility of the losses within the historical data.

By combining the credit rating, the industry outlook and the loss volatility, the Company arrives at the quantitative loss factor for each credit grade.

The Company has increased its exposure to larger loans to large institutions with publically available credit ratings beginning in 2015. These ratings are tracked as a credit quality indicator for these loans. Credit ratings issued by national organizations were utilized as credit quality indicators as presented in the following table at March 31, 2016.

	Commercial and Industrial	Municipal (in thousands)	Commercial Real Estate	Total
Credit Rating:				
Aaa Aa3	\$ 281,922	\$ 63,407	\$ 7,311	\$ 352,640
A1 A3	167,389	7,400	130,512	305,301
Baa1 Baa3		8,890	166,796	175,686
Ba2		4,480		4,480
Total	\$ 449,311	\$ 84,177	\$ 304,619	838,107

The Company has increased its exposure to larger loans to large institutions with publically available credit ratings beginning in 2015. These ratings are tracked as a credit quality indicator for these loans. Credit ratings issued by national organizations were utilized as credit quality indicators as presented in the following table at December 31, 2015.

	Commercial and Industrial	Municipal (in thousands)	Commercial Real Estate	Total
Credit Rating:				
Aaa Aa3	\$ 234,733	\$ 63,865	\$ 7,547	\$ 306,145
A1 A3	140,419	7,400	130,872	278,691
Baa1 Baa3		8,890	167,489	176,379
Ba2		4,480		4,480
Total	\$ 375,152	\$ 84,635	\$ 305,908	\$ 765,695

The allowance for loan losses is an estimate of the amount needed for an adequate reserve to absorb losses in the existing loan portfolio. This amount is determined by an evaluation of the loan portfolio, including input from an independent organization engaged to review selected larger loans, a review of loan experience and current economic

conditions. Although the allowance is allocated between categories, the entire allowance is available to absorb losses attributable to all loan categories.

The following table summarizes the changes in the Company's allowance for loan losses for the periods indicated.

	Three months ended	
	March 31,	
	2016	2015
	(in thousands)	
Allowance for loan losses, beginning of period	\$ 23,075	\$ 22,318
Loans charged off	(69)	(81)
Recoveries on loans previously charged-off	88	92
Net recoveries (charge-offs)	19	11
Provision charged to expense	450	200
Allowance for loan losses, end of period	\$ 23,544	\$ 22,529

The Company may experience increased levels of nonaccrual loans if borrowers are negatively impacted by future negative economic conditions. Management continually monitors trends in the loan portfolio to determine the appropriate level of allowance for loan losses. At the current time, management believes that the allowance for loan losses is adequate.

Table of ContentsNonperforming Assets

The following table sets forth information regarding nonperforming assets held by the Bank at the dates indicated:

	March 31, 2016	December 31, 2015
	(Dollars in thousands)	
Nonaccruing loans	\$ 1,490	\$ 2,336
Total nonperforming assets	\$ 1,490	\$ 2,336
Loans past due 90 days or more and still accruing	\$	\$
Nonaccruing loans as a percentage of total loans	0.08%	0.13%
Nonperforming assets as a percentage of total assets	0.04%	0.06%
Accruing troubled debt restructures	\$ 2,865	\$ 2,893

Cash and Cash Equivalents

Cash and cash equivalents increased from \$220.7 million to \$304.7 million during the first three months of 2016. This was primarily the result of an increase in higher yielding interest-bearing deposits in other banks during the period.

Short-term Investments

Short-term investments remained stable during the three-month period.

Investments

Management continually evaluates its investment alternatives in order to properly manage the overall balance sheet mix. The timing of purchases, sales and reinvestments, if any, will be based on various factors including expectation of movements in market interest rates, deposit flows and loan demand. Notwithstanding these events, it is the intent of management to grow the earning asset base mainly through loan originations while funding this growth through a mix of retail deposits, FHLB advances, and retail repurchase agreements.

Securities Available-for-Sale (at Fair Value)

The securities available-for-sale portfolio totaled \$380.3 million at March 31, 2016, a decrease of 6.0% from December 31, 2015. The portfolio decreased mainly as a result of calls and maturities. Purchases of securities available-for-sale totaled \$20.7 million for the three months ended March 31, 2016. The portfolio is concentrated in United States Government Sponsored Enterprises, Mortgage-backed Securities and Obligations issued by States and Political Subdivisions and had an estimated weighted average remaining life of 3.3 years.

At March 31, 2016, 64.4% of the Company's securities available-for-sale are classified as Level 2. The fair values of these securities are generally obtained from a pricing service, which provides the Company with a description of the inputs generally utilized for each type of security. These inputs include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. Market indicators and industry and economic events are also monitored.

Securities available-for-sale totaling \$135.1 million, or 35.5% of securities available-for-sale are classified as Level 3. These securities are generally equity investments or municipal securities with no readily determinable fair value. The securities are carried at fair value with periodic review of underlying financial statements and credit ratings to assess the appropriateness of these valuations.

Table of Contents

During the first three months of 2016, net unrealized gains on the securities available-for-sale increased to \$130,000 from a net unrealized loss of \$354,000 at December 31, 2015. Net unrealized gains on the available-for-sale portfolio increased mainly as a result of one obligation issued by States and Political Subdivisions. The following table sets forth the fair value of securities available-for-sale at the dates indicated.

	March 31, 2016	December 31, 2015
	(in thousands)	
U.S. Treasury	\$ 1,997	\$ 1,989
U.S. Government Sponsored Enterprises	5,008	
Small Business Administration	5,931	5,989
U.S Government Agency and Sponsored Enterprise		
Mortgage-backed Securities	226,293	233,526
Privately Issued Residential Mortgage-backed		
Securities	1,345	1,434
Obligations issued by States and Political Subdivisions	135,089	156,960
Other Debt Securities	4,469	4,473
Equity Securities	217	252
Total Securities Available for-Sale	\$ 380,349	\$ 404,623

There were no realized gains on sales of investments for the first three months of 2016.

Securities Held-to-Maturity (at Amortized Cost)

The securities held-to-maturity portfolio totaled \$1.4 billion on March 31, 2016, a decrease of 1.8% from the total on December 31, 2015. Purchases of securities held-to-maturity totaled \$85.7 million for the three months ended March 31, 2016. The portfolio is concentrated in United States Government Sponsored Enterprises and Mortgage-backed Securities and had an estimated weighted average remaining life of 3.9 years. The following table sets forth the fair value of securities held-to-maturity at the dates indicated.

	March 31, 2016	December 31, 2015
	(in thousands)	
U.S. Government Sponsored Enterprises	\$ 152,732	\$ 186,734
U.S. Government Agency and Sponsored		
Enterprise Mortgage-backed Securities	1,259,970	1,252,169
Total Securities Held-to-Maturity	\$ 1,412,702	\$ 1,438,903

At March 31, 2016 and December 31, 2015, all mortgage-backed securities are obligations of U.S. Government Sponsored Enterprises.

Debt securities of Government Sponsored Enterprises primarily refer to debt securities of Fannie Mae and Freddie Mac.

Federal Home Loan Bank of Boston Stock

The Bank, as a member of the Federal Home Loan Bank of Boston (FHLBB) system, is required to maintain an investment in capital stock of the FHLBB. Based on redemption provisions, the stock has no quoted market value and is carried at cost. At its discretion, the FHLBB may declare dividends on the stock. The Company reviews for impairment based on the ultimate recoverability of the cost basis in the stock. During the first three months of 2016, the Company redeemed \$4.9 million of FHLBB stock. As of March 31, 2016, no impairment has been recognized.

Table of Contents

Deposits and Borrowed Funds

On March 31, 2016, deposits totaled \$3.2 billion, representing a 3.0% increase from December 31, 2015. Total deposits increased primarily as a result of increases in demand deposits, and savings and NOW deposits. Savings and NOW deposits increased, mainly as a result of municipal deposits, as the Company continued to offer attractive rates for these types of deposits during the first three months of the year. Borrowed funds totaled \$574.2 million at March 31, 2016 compared to \$565.9 million at December 31, 2015. Borrowed funds increased mainly as a result of an increase in securities sold under agreements to repurchase. This increase was primarily attributable to an increase in large institutional balances. Other borrowed funds decreased mainly as a result of maturing funds.

Stockholders' Equity

At March 31, 2016, total equity was \$220.8 million compared to \$214.5 million at December 31, 2015. The Company's equity increased primarily as a result of earnings and a decrease in other comprehensive loss, net of taxes, offset somewhat by dividends paid. Other comprehensive loss, net of taxes, decreased as a result of a decrease in unrealized losses on securities available-for-sale and securities transferred from available-for-sale to held-to-maturity and amortization of the pension liability. The Company's leverage ratio stood at 6.72% at March 31, 2016, compared to 6.79% at December 31, 2015. The decrease in the leverage ratio is primarily due to an increase in quarterly average assets, offset somewhat by an increase in stockholders' equity. Book value as of March 31, 2016 was \$39.66 per share compared to \$38.53 at December 31, 2015.

Table of Contents**Results of Operations**

The following table sets forth the distribution of the Company's average assets, liabilities and stockholders' equity, and average rates earned or paid on a fully taxable equivalent basis for each of the three-month periods indicated.

	Three Months Ended					
	March 31, 2016			March 31, 2015

Total interest expense	461	187	648
Change in net interest income	\$ 3,477	\$ (1,446)	\$ 2,031

Net Interest Income

For the three months ended March 31, 2016, net interest income on a fully taxable equivalent basis totaled \$21.0 million compared to \$19.0 million for the same period in 2015, an increase of \$2.0 million or 10.7%. This increase in net interest income for the period is primarily due to an increase in interest earning assets and a six basis point increase in the net interest margin. The average balance of earning assets increased by 6.8% combined with a similar increase in average deposits. The net interest margin increased from 2.12% on a fully taxable equivalent basis in 2015

to 2.18% on the same basis for 2016. This was primarily the result of an increase in rates on earning assets. Also, interest income on a fully taxable equivalent basis increased 11.3%, mainly as a result of an increase in interest earning assets and interest expense increased 13.6% as a result of an increase in deposit balances.

Provision for Loan Losses

For the three months ended March 31, 2016, the loan loss provision was \$450,000 compared to a provision of \$200,000 for the same period last year. The increase in the provision was primarily as a result of an increase in loan balances. During the second quarter of 2015, the Company enhanced its approach to the development of the historical loss factors on certain loans within the portfolio. During the first quarter of 2016, the Company's loan portfolio risk profile has remained consistent with year-end. This was done in response to the changing risk profile of the Company's new loan originations and related methodology enhancements to address these changes. Further discussion relating to changes in portfolio composition is discussed in the allowance for loan loss section of the management discussion and analysis.

Table of Contents

Non-Interest Income and Expense

Other operating income for the quarter ended March 31, 2016 increased by \$149,000 from the same period last year to \$3.7 million. This was mainly attributable to an increase in insurance gains of \$75,000, credit card fees of \$52,000, brokerage commissions of \$45,000, and other fees of \$52,000. Also, service charges on deposit accounts increased by \$24,000, primarily as a result of an increase in debit card fees. Offsetting these increases is a decrease in gains on sales of mortgage loans of \$99,000.

For the quarter ended March 31, 2016, operating expenses increased by \$1.1 million or 7.9% to \$15.7 million, from the same period last year. The increase in operating expenses for the quarter was mainly attributable to an increase of \$642,000 in salaries and employee benefits, \$421,000 in other expenses, \$65,000 in FDIC assessments, and \$43,000 in equipment costs. Occupancy cost decreased by \$26,000, primarily as a result of increased prior year snow plowing expenses. Salaries and employee benefits increased mainly as a result of merit increases and bonus accruals. Other expenses increased mainly as a result of increases in telephone costs and increased contributions. Equipment costs increased mainly as a result of depreciation of capital improvements. FDIC assessments increased mainly as a result of an increase in the assessment base.

Income Taxes

For the first quarter of 2016, the Company's income tax expense totaled \$64,000 on pretax income of \$5.4 million resulting in an effective tax rate of 1.2%. For last year's corresponding quarter, the Company's income tax expense totaled \$215,000 on pretax income of \$5.2 million resulting in an effective tax rate of 4.2%. The decrease in the effective income tax rate was primarily the result of an increase in tax-exempt income.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest rate risk inherent in its lending and deposit taking activities. To that end, management actively monitors and manages its interest rate risk exposure. The Company's profitability is affected by fluctuations in interest rates. A sudden and substantial increase or decrease in interest rates may adversely impact the Company's earnings to the extent that the interest rates tied to specific assets and liabilities do not change at the same speed, to the same extent, or on the same basis. The Company monitors the impact of changes in interest rates on its net interest income using several tools. The Company's primary objective in managing interest rate risk is to minimize the adverse impact of changes in interest rates on the Company's net interest income and capital, while structuring the Company's asset-liability structure to obtain the maximum yield-cost spread on that structure. Management believes that there has been no material changes in the interest rate risk reported in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, filed with the Securities and Exchange Commission. The information is contained in the Form 10-K within the Market Risk and Asset Liability Management section of Management's Discussion and Analysis of Results of Operations and Financial Condition.

Item 4. Controls and Procedures

The Company's management, with participation of the Company's principal executive and financial officers, has evaluated its disclosure controls and procedures as of the end of the period covered by this quarterly report. Based on this evaluation, the Company's management, with participation of its principal executive and financial officers, has concluded that the Company's disclosure controls and procedures are effective. The disclosure controls and procedures

also effectively ensure that information required to be disclosed in the Company's filings and submissions with the Securities and Exchange Commission under the Exchange Act is accumulated and reported to Company management (including the principal executive officer and the principal financial officer) as appropriate to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission. In addition, the Company has evaluated its internal control over financial reporting and during the first quarter of 2016 there were no changes that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

Part II Other Information

Item 1 Legal proceedings At the present time, the Company is not engaged in any legal proceedings which, if adversely determined to the Company, would have a material adverse impact on the Company's financial condition or results of operations. From time to time, the Company is party to routine legal proceedings within the normal course of business. Such routine legal proceedings, in the aggregate, are believed by management to be immaterial to the Company's financial condition and results of operation.

Item 1A Risk Factors Please read Risk Factors in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015. There have been no material changes since this 10-K was filed. These risks are not the only ones facing the Company. Additional risks and uncertainties not currently known to the Company or that the Company currently deems to be immaterial also may materially adversely affect the Company's business, financial condition and operating results.
