- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

## Section 1 Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

#### *Conflict Minerals Disclosure*

This Form SD of Ferro Corporation ( we or us ) is filed pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended, for the reporting period from January 1 through December 31, 2015.

Rule 13p-1 requires us to disclose annually whether any conflict minerals that are necessary to the functionality or production of products that we manufactured or contracted for manufacture during the reporting period originated in the Democratic Republic of the Congo or any adjoining country (each a Covered Country and collectively, the Covered Countries ), or were from recycled or scrap sources. Conflict minerals are gold, cassiterite, columbite-tantalite, wolframite or their derivatives, which are limited to tin, tantalum and tungsten.

Accordingly, we conducted in good faith a reasonable country of origin inquiry, which was reasonably designed to determine whether any of the necessary conflict minerals in our products originated in a Covered Country or came from recycled or scrap sources.

We used our enterprise resource planning systems and internal inquiries to identify suppliers who supplied us necessary conflict minerals during the reporting period that is the subject of this Form SD. We identified twenty-four (24) suppliers who supplied us necessary conflict minerals and compounds of conflict minerals during the reporting period. We sent each of those identified suppliers a Conflict Minerals Reporting Template (version 4.01b) ( CMRT ) developed by the Conflict-Free Sourcing Initiative and asked them to complete the template for products or materials supplied to us in 2015. We received responses (by either a letter or completed CMRT) from all of these suppliers and reviewed the responses against our conflict minerals policy. When we determined that our suppliers' CMRT responses contained information we believed to be incomplete or potentially inconsistent with our conflict minerals policy, we followed up with those suppliers by e-mail or by phone to seek additional information or clarification about those responses. As a result of those responses, we have no reason to believe that the necessary conflict minerals contained in products that we manufactured or contracted for manufacture during the reporting period may have originated in the Covered Countries.
