### Management s Discussion of Funds Performance (unaudited)

#### **Economic Environment**

Over the fiscal year ended August 31, 2016, the global economy continued to expand, but at a slower pace. Despite keeping markets on edge for much of 2015, the U.S. Federal Reserve (Fed) decided to begin the path to raising rates in December 2015. In its announcement, the Fed increased the band of the Federal Funds Rate target from 0 to 25 basis points to 25 to 50 basis points. In doing so, it sought to emphasize that it intended to gradually normalize short term interest rates.

2016 began with selloffs in global markets as investors questioned the ability of central banks to revive growth; and fears and headlines about a potential U.S. recession began to surface. However, as commodity markets began to stabilize and the assumed pace of Fed tightening was pushed back, risk assets rebounded to end the quarter unchanged. Since falling as low as \$26 a barrel in February, crude oil prices have since rallied to \$45 a barrel by the end of August. The rebound in oil was seen as a barometer for the broader commodity complex as well as global growth expectations. Many emerging market (EM) countries are net commodity exporters and have been net beneficiaries. On the contrary, after a four-year rally, the U.S. dollar has generally been experiencing a period of consolidation. On the back of a weaker U.S. dollar and a stronger commodity outlook, EM currencies broadly rebounded throughout most of the fiscal year.

In June 2016, British voters surprised markets by voting to leave the European Union (EU). After the vote, global bond yields fell, pricing in expectations of slower economic growth across the United Kingdom and Europe at large. Global markets sold off and yields on the 10-Year U.S. Treasury note declined to 1.47% by the end of June as investors flocked toward safe haven assets. Curiously, in the weeks following the Brexit vote, global equity markets rebounded erasing earlier losses. This was primarily due to the likely delay in the triggering of Article 50 of the Lisbon treaty which sets out how an EU country might voluntarily leave the union. The global economy continues to muddle along despite heightened concerns about valuations.

To conclude, the global outlook largely remains policy dependent. Despite much speculation for potentially multiple rate hikes in 2016, the Fed has continued to revise down the number of hikes. Going back to last August, economists and portfolio managers alike were mixed in their opinions about if and when the Fed would even begin to raise the Fed Funds Rate.

### Foreign Exchange and Fixed Income Markets

In the developed world, Japanese policy makers have joined the European Central Bank in moving their target policy rates below zero. European government bond yields continued to grind lower, with some countries experiencing negative bond yields out through 10 years. Last year, European Central Bank President Mario Draghi told investors around the world to brace for an uptick in bond market volatility. Despite nascent sparks of volatility in August 2016, volatility in the bond market is significantly lower than in August 2015.

In the U.S., 10-year treasury yields experienced approximately a 100 basis point range, but ended the fiscal year about 64 basis points lower than where they started in August 2015 (2.22% vs. 1.58%). With the Fed signaling for a low and slow rate hiking cycle, both corporate and high yield spreads tightened. High yield spreads tightened by about 54 basis points over the fiscal year (5.44% vs. 4.90%), and about 349 basis points since its 1-year high in February (8.39% vs. 4.90%). Crude oil strength benefitted high yield issuers with significant exposure to commodities after a difficult 2015. Similarly, yields in EM bonds (both sovereign and corporates) fell, resulting in positive performance. For the first time in over three years, locally-denominated EM sovereign debt provided positive returns, in the form of declining local bond yields and EM currency appreciation.

On the currency front, contrary to performance last year, the U.S. dollar has since given back some its previous gains. A lack of continued divergent monetary policies from the Fed against that of European and Japanese foreign central banks supported a stronger

WisdomTree Currency Strategy, Fixed Income and Alternative Funds

### Management s Discussion of Funds Performance audited) (continued)

European euro and Japanese yen over the fiscal year. Several risk-off trading sessions propelled the Japanese yen even higher as the currency was viewed as a haven asset. Additionally, currencies of heavy commodity exporters such as the Norwegian krone, Canadian dollar, Australian dollar, and the New Zealand dollar have all ended the fiscal year positive as China concerns subsided and commodity prices roared back. Resounding crude oil strength and easing geopolitical concerns contributed to two of the best performing currencies, the Brazilian real and the Russian ruble, each appreciating around 23% and 13%, respectively, year to date.

### Fixed Income and Currency Strategy Funds Performance

### **Currency Strategy Funds**

Income return was a strong driver of fund performance over the last fiscal year, while the currency strategy funds continued to achieve exposure to the applicable currency markets by investing primarily in short-term U.S. money market securities and/or forward currency contracts. Among the single currency funds for the fiscal year, all 3 funds produced total returns based on NAV which exceeded the change in value of the underlying currency. Of the strongest performing single currency funds, the **WisdomTree Brazilian Real Strategy Fund** and the **WisdomTree Indian Rupee Strategy Fund**, generated total returns for the fiscal year that were significantly greater than the underlying change in the spot return of the currency. Spot currency returns represent the change in foreign exchange rates versus the U.S. dollar available for immediate delivery. The WisdomTree Brazilian Real Strategy Fund increased 25.66% for the fiscal year based on NAV, outperforming the 12.63% appreciation in the Brazilian real versus the U.S. dollar. The WisdomTree Indian Rupee Strategy Fund increased by 4.71% in value for the fiscal year based on NAV, while the Indian rupee spot currency returned -1.04%. The **WisdomTree Chinese Yuan Strategy Fund**, which returned -1.01% for the fiscal year based on NAV, boosted relative performance versus the Chinese yuan through investments made in both onshore and offshore Chinese yuan forwards, outperforming the spot currency return of -4.14%.

The **WisdomTree Emerging Currency Strategy Fund** posted a 5.64% return over the fiscal year, outperforming its industry reference benchmark, the JP Morgan Emerging Local Markets Index Plus, which returned 5.62%. The Fund s overweights to Colombia, Brazil, and Indonesia were the largest contributors to the outperformance as these currencies were among the best performers over the past year. Underweights to Mexico helped as the peso was the worst performing EM currency over the same period. The Fund s underweight to Russia and overweight to South Africa detracted from overall Fund performance.

The **WisdomTree Commodity Currency Strategy Fund** increased by 8.19% over the fiscal year ended August 31, 2016 based on NAV. The Equal-Weighted Commodity Currency Composite returned 9.07% over the same period. Despite a poor start to the fiscal year, commodity currencies largely rebounded along with the broader commodity complex.

The WisdomTree Bloomberg U.S. Dollar Bullish Fund returned -2.05% over the fiscal year, underperforming its reference benchmark, the Bloomberg Dollar Total Return Index, which returned -1.70%. Concerns about the economic outlook of the United Kingdom and Europe contributed to U.S. dollar strength against the British pound and European euro, and therefore contributed positively to Fund performance for the fiscal year. However, a tremendously strong Japanese yen was a major detractor to performance, and more than offset those gains. The underperformance to its reference benchmark was primarily due to changes in the value of forward currency contracts.

# Fixed Income Funds

The **WisdomTree Emerging Markets Local Debt Fund** s return of 10.34% based on NAV for the fiscal year was primarily driven by strong local bond returns that contributed both income and principal returns. The rebound in commodity prices in 2016 sparked a sharp

2 WisdomTree Currency Strategy, Fixed Income and Alternative Funds

### Management s Discussion of Funds Performance audited) (continued)

appreciation in EM currencies. Commodity exporters experienced the greatest gains as Brazil, Russia, and Colombia were prominent beneficiaries. As a region, Asian bonds fared better than those of Latin America, Europe, and South Africa sovereigns. Despite posting positive returns, the WisdomTree Emerging Markets Local Debt Fund underperformed its reference benchmark, the JP Morgan GBI-EM Global Diversified Index, by 0.99%.

Local Asian bonds performed well relative to local debt of other EM countries. The **WisdomTree Asia Local Debt Fund** gained 8.81% of its value based on NAV for the fiscal year ending August 31, 2016, underperforming its industry benchmark, the Markit iBoxx Asian Local Bond Index, by 2.42%. The Fund s positive returns were most notably attributed to exposure to Indonesia, South Korea, and New Zealand. The Fund s strategic exposure to Australia and New Zealand versus the Index were significant. Australia and New Zealand yields fell, while their currencies appreciated, both positive contributors for Fund returns.

The **WisdomTree Emerging Markets Corporate Bond Fund** invests in the dollar-denominated debt of emerging market corporate issuers and utilizes the JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad as its industry reference benchmark. During the recently ended fiscal year, the Fund generated a total return of 8.71% based on NAV, underperforming its industry reference benchmark by 2.15% which returned 10.86% during the period. An overall bias to energy and commodity-related sectors, and underweights to financials contributed to Fund performance.

The **WisdomTree Australia & New Zealand Debt Fund** seeks to achieve a high level of total return consisting of both income and capital appreciation through investments in debt securities denominated in Australian or New Zealand dollars. The Fund employs a structured approach in balancing its investments between debt of sovereign and semi-government issuers (local, state, and territory governments of Australia) within the two countries and the debt of supranational and other agencies (for example, developmental organizations such as the World Bank or International Monetary Fund) in these countries. The Fund utilizes the Citigroup Australian Broad Investment-Grade Bond Index as its industry reference benchmark. The Fund outperformed its industry reference benchmark, which returned 12.89% versus the Fund s return of 13.58% based on NAV for the fiscal year. The Fund benefitted positively from both currency and a local bond returns. Over the fiscal period, the Australian dollar and New Zealand dollar appreciated approximately 6% and 14% respectively. Falling Australian and New Zealand yields added to positive bond returns for the same period.

The **WisdomTree Strategic Corporate Bond Fund** seeks to achieve a high level of total return consisting of both income and capital appreciation through investments in the debt of corporate entities that are organized in or maintain their principal place of business in countries throughout the world, including the U.S. The Fund utilizes the Bloomberg Barclays Global Credit Index (Hedged) as its industry reference benchmark. The Bloomberg Barclays Global Credit Index (Hedged) contains investment-grade and high-yield credit securities from the Bloomberg Barclays Multiverse Index, which is a broad-based measure of the global fixed-income bond market. The Bloomberg Barclays Multiverse Index is the union of the Bloomberg Barclays Global Aggregate Index and the Bloomberg Barclays Global High Yield Index and captures investment grade and high yield securities in all eligible currencies. The Bloomberg Barclays Multiverse Index family includes a wide range of standard and customized subindices by sector, quality, maturity, and country. The Fund underperformed its industry reference benchmark, which returned 8.95% versus the Fund s return of 7.85% based on NAV for the fiscal year.

The **WisdomTree Barclays U.S. Aggregate Bond Zero Duration Fund** seeks to track the price and yield performance, before fees and expenses, of the Bloomberg Barclays Rate Hedged U.S. Aggregate Bond Index, Zero Duration. For the fiscal year ended August 31, 2016, the Index returned 1.86% versus the Fund s return of 1.35% based on NAV. The difference between the Index and Fund returns are primarily due to representative

WisdomTree Currency Strategy, Fixed Income and Alternative Funds

### Management s Discussion of Funds Performance audited) (continued)

sampling, changes in the futures to cash bond basis, deductions for Fund expenses and transaction costs. During the fiscal year, the Fund invested in derivatives, specifically short futures contracts on U.S. Treasury bonds, to hedge against a rise in interest rates. At August 31, 2016, yields on 5-year, 10-year, and 30-year U.S. Treasury bonds all ended the period lower than where they began a year ago. As a result of the overall decline in U.S. Treasury yields, the Fund s use of derivatives detracted from Fund performance during the fiscal period.

The **WisdomTree Barclays U.S. Aggregate Bond Negative Duration Fund** seeks to track the price and yield performance, before fees and expenses, of the Bloomberg Barclays Rate Hedged U.S. Aggregate Bond Index, Negative Five Duration. For the fiscal year ended August 31, 2016, the Index returned -2.50% versus the Fund s return of -3.11% based on NAV. The difference between the Index and Fund returns are primarily due to representative sampling, deductions for Fund expenses and transaction costs. During the fiscal year, the Fund invested in derivatives, specifically short futures contracts on U.S. Treasury bonds, to hedge against a rise in interest rates. At August 31, 2016, yields on 5-year, 10-year, and 30-year U.S. Treasury bonds all ended the period lower than where they began a year ago. As a result of the overall decline in U.S. Treasury yields, the Fund s use of derivatives detracted from Fund performance during the fiscal period.

The **WisdomTree BofA Merrill Lynch High Yield Bond Zero Duration Fund** seeks to track the price and yield performance, before fees and expenses, of the BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Zero Duration Index. For the fiscal year ended August 31, 2016, the Index returned 6.23% versus the Fund s return of 5.92% based on NAV. The underperformance between the Fund and Index returns is primarily due to representative sampling and Fund expenses. During the fiscal year, the Fund invested in derivatives, specifically short futures contracts on U.S. Treasury bonds, to hedge against a rise in interest rates. At August 31, 2016, yields on 5-year, 10-year, and 30-year U.S. Treasury bonds all ended the period lower than where they began a year ago. As a result of the overall decline in U.S. Treasury yields, the Fund s use of derivatives detracted from Fund performance during the fiscal period.

The **WisdomTree BofA Merrill Lynch High Yield Bond Negative Duration Fund** seeks to track the price and yield performance, before fees and expenses, of the BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Negative Seven Duration Index. For the fiscal year ended August 31, 2016, the Index returned -0.12% versus the Fund s return of -2.22% based on NAV. The underperformance is primarily due to representative sampling and Fund expenses. During the fiscal year, the Fund invested in derivatives, specifically short futures contracts on U.S. Treasury bonds, to hedge against a rise in interest rates. At August 31, 2016, yields on 5-year, 10-year, and 30-year U.S. Treasury bonds all ended the period lower than where they began a year ago. As a result of the overall decline in U.S. Treasury yields, the Fund s use of derivatives detracted from Fund performance during the fiscal period.

The **WisdomTree Japan Interest Rate Strategy Fund** seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Japan Interest Rate Strategy Index. For the fiscal year ended August 31, 2016, the Index returned -6.67% versus the Fund s return of -8.10% based on NAV. The difference between the Index and Fund returns are primarily due to deductions for Fund expenses and transaction costs. During the period, the Fund utilized short forward currency contracts and short Japan Government Bond futures contracts in a strategy designed to rise in value when the Japanese yen depreciates against the U.S. dollar and/or Japanese interest rates rise. For the fiscal year ended August 31, 2016, the Fund s use of short forward currency contracts detracted from Fund performance as the Japanese yen strengthened against the U.S. dollar by approximately 17% during the period. For the fiscal year ended August 31, 2016, the Fund s use of short Japan Government Bond futures contracts detracted from Fund performance as the yields on 10-year Japan Government Bonds decreased overall by approximately 44 basis points year-over-year.

4 WisdomTree Currency Strategy, Fixed Income and Alternative Funds

### Management s Discussion of Funds Performance audited) (continued)

The **WisdomTree Bloomberg Floating Rate Treasury Fund** seeks to track the price and yield performance, before fees and expenses, of the Bloomberg U.S. Treasury Floating Rate Bond Index. For the fiscal year ended August 31, 2016, the Index returned 0.46% versus the Fund s return of 0.28% based on NAV. The difference between the Index and Fund returns are primarily due to deductions for Fund expenses and transaction costs.

The **WisdomTree Western Asset Unconstrained Bond Fund** seeks to achieve a high level of return within the parameters of a focused risk-based target through investments across the global fixed income markets. The Fund is not managed to a benchmark. For the fiscal year ended August 31, 2016, the Fund has returned 5.09% based on NAV, with the main contributor to positive performance being a tightening in credit spreads of U.S. corporate and emerging market bonds. In comparison, the BofA Merrill Lynch U.S. Dollar 3-Month Deposit Offered Rate Constant Maturity Index has returned 0.46% in the same period. During the fiscal period ended August 31, 2016, the Fund utilized short futures contracts on U.S. Treasury bonds to hedge interest rate risk. At August 31, 2016, yields on 10-year and 30-year U.S. Treasury bonds ended the period 64 and 73 basis points lower, respectively, than at the start of the period. As a result of the overall decline in U.S. Treasury yields, the Fund s use of short futures contracts to hedge against a rise in interest rates detracted from Fund performance during the fiscal period.

The **WisdomTree Barclays U.S. Aggregate Bond Enhanced Yield Fund** seeks to achieve the returns of the Bloomberg Barclays U.S. Aggregate Enhanced Yield Index. The Bloomberg Barclays U.S. Aggregate Enhanced Yield Index uses a rules-based approach to re-weight subcomponents of the Bloomberg Barclays U.S. Aggregate Index with the aim of earning a higher yield while broadly retaining the risk characteristics of the U.S. Aggregate. For the fiscal year ended August 31, 2016, the Fund has returned 7.81% based on NAV while the Index has returned 7.75%. During the same period, the Fund outperformed the Bloomberg Barclays U.S. Aggregate Index (5.97%) by 184 basis points. As a result of its longer duration profile and overweight to corporate bonds relative to the Bloomberg Barclays U.S. Aggregate Index, the Fund benefitted from falling yields and tightening corporate spreads.

### **Alternative Funds**

The **WisdomTree Managed Futures Strategy Fund** posted a -0.12% return based on NAV for the fiscal year ended August 31, 2016. The Fund underperformed its industry benchmark, the Diversified Trends Indicator Index by 1.25% based on NAV for the fiscal year. This was primarily due to deductions for Fund expenses and transaction costs.

Despite the Fed raising interest rates away from zero bound, longer term treasury yields generally fell over the fiscal year ended August 31, 2016. The market continues to grapple with the pace and timing of interest rate hikes in the U.S. At the beginning of 2016, there were expectations of up to 4 rate hikes. Since then, the Fed has yet to act on their second. Consequently, the U.S. dollar weakened and ended the fiscal year ending August 31, 2016 in negative territory. Although the European euro and British pound depreciated against the U.S. dollar on the back of concerns on Europe and United Kingdom growth, the Japanese yen sharply appreciated over the fiscal year. Gains from investments in Japanese yen more than offset losses from investments in the European euro and the British pound. Energy markets were significantly negative towards the end of 2015 before reversing course around the end first quarter of 2016. As a result, energy investments were a detractor to performance this year. Sugar ended the fiscal year nearly up 92%. Since peaking in 2014, livestock as a group continues to underperform. Live cattle and lean hog were among the bottom performing investments. Since hitting multiyear lows in December of 2015, both silver and gold picked up steam in the beginning of 2016, and never took the foot off the gas pedal. Led by 27% and 16% returns from silver and gold, the precious metals sector were strong contributors to Fund performance. In summary, investment positions in the sugar, the Japanese yen, and silver were the most significant contributors to performance. Conversely, positions in wheat, live cattle and corn were the largest detractors. Overall, the Fund s use of derivatives contributed positively to performance for the fiscal year.

WisdomTree Currency Strategy, Fixed Income and Alternative Funds

Management s Discussion of Funds Performance audited) (concluded)

The **WisdomTree Global Real Return Fund** posted a 5.29% return over the fiscal year ended August 31, 2016, underperforming its industry reference benchmark, the BofA Merrill Lynch Global Diversified Inflation-Linked Index, which returned 8.24%. Over the course of the fiscal year, expectations for global inflation broadly improved as the Fed began its path to normalizing rates. Global inflation-linked investments contributed positively to performance. During the same period, the Fund utilized foreign currency contracts as hedges to offset currency risk from positions in international inflation linked bonds and international equities. The Fund s use of forward foreign currency contracts broadly contributed positively to performance. These currency gains were primarily attributed to deprecation in the European euro and Mexican peso against the U.S. dollar.

The **WisdomTree CBOE S&P 500 PutWrite Strategy Fund** posted a 7.77% return since its inception on February 24, 2016 through the fiscal period ended August 31, 2016, underperforming its industry reference benchmark, the CBOE S&P 500 PutWrite Index, which returned 8.00%. The difference between the Index and Fund returns are primarily due to deductions for Fund expenses and transaction costs. During the fiscal period, to implement its investment strategy, the Fund employed the use of derivatives, specifically by writing put options on the S&P 500 Index (SPX) in return for a premium from the option buyer. By selling SPX Put options, the Fund receives a premium from the option buyer, which increases the Fund s return if the option is not exercised and expires worthless (i.e. out-of-the-money). If, however, the value of the SPX increases beyond the amount of premiums received, the Fund s returns would not be expected to increase accordingly. Further, if the value of the SPX falls below the SPX Put option s strike price, the option finishes in-the-money and the Fund pays the option buyer the difference between the SPX Put option strike price and the value of the SPX which would result in a loss to the Fund and detract from Fund performance. During the fiscal period, the S&P 500 Index returned 13.79% which translated overall into positive performance for the Fund as the written SPX put options were generally out-of-the-money.

6 WisdomTree Currency Strategy, Fixed Income and Alternative Funds

Performance Summary (unaudited)

### WisdomTree Bloomberg U.S. Dollar Bullish Fund (USDU)

Investment Breakdown as of 8/31/16

Investment Type	% of Net Assets
U.S. Government Obligations	98.4%
Other Assets less Liabilities	1.6%
Total	100.0%

The Fund s investment breakdown may change over time. It does not include derivatives (if any).

Other assets includes investment of cash collateral for securities on loan (if any).

**Top Holdings\*** as of 8/31/16

Description	% of Net Assets
U.S. Treasury Bill,	
0.23%, 10/20/16	63.2%
U.S. Treasury Bill,	
0.25%, 9/15/16	35.2%

<sup>\*</sup> The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security. Excludes derivatives and investment of cash collateral for securities on loan (if any).

The WisdomTree Bloomberg U.S. Dollar Bullish Fund (the Fund ) seeks to provide total returns, before fees and expenses, that exceed the performance of the Bloomberg Dollar Total Return Index (the Index ).

The following performance table is provided for comparative purposes and represents the period noted. The Fund sper share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated January 1, 2016, the Fund s annual expense ratio was 0.50%.

Performance as of 8/31/16

	Average Annua	Average Annual Total Return	
		Since	
	1 Year	Inception <sup>1</sup>	
Fund NAV Returns	-2.05%	4.76%	
Fund Market Price Returns	-2.02%	4.77%	
Bloomberg Dollar Total Return Index	-1.70%	5.37%	
Bloomberg Dollar Spot Index	-1.57%	5.77%	

<sup>&</sup>lt;sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on December 18, 2013.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

WisdomTree Currency Strategy, Fixed Income and Alternative Funds

Performance Summary (unaudited)

### WisdomTree Brazilian Real Strategy Fund (BZF)

Investment Breakdown as of 8/31/16

<sup>\*</sup> The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security. Excludes derivatives and investment of cash collateral for securities on loan (if any).

Fully collateralized by U.S. Government securities.

The WisdomTree Brazilian Real Strategy Fund (the Fund ) seeks to achieve total returns reflective of both money market rates in Brazil available to foreign investors and changes in value of the Brazilian real relative to the U.S. dollar. The Brazilian real is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage

commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated January 1, 2016, the Fund s annual expense ratio was 0.45%.

Performance as of 8/31/16

	Average Annual Total Return			
	1	1		Since
	Year	3 Year	5 Year	Inception <sup>1</sup>
Fund NAV Returns	25.66%	-0.16%	-5.67%	0.19%
Fund Market Price Returns	25.84%	0.16%	-5.49%	0.12%
JP Morgan Emerging Local Markets Index Plus (ELMI+) Brazil	26.83%	0.42%	-5.15%	1.19%
Brazilian real	12.63%	-9.75%	-13.26%	-7.73%

<sup>&</sup>lt;sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on May 14, 2008.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The WisdomTree Commodity Currency Strategy Fund (the Fund ) seeks to achieve total returns reflective of money market rates in selected commodity-producing countries and changes in value of such countries currencies relative to the U.S. dollar. The term commodity currency generally is used to describe the currency of a country whose economic success is commonly identified with the production and export of commodities (such as precious metals, oil, agricultural products or other raw materials) and whose value is closely linked to the value of such commodities. The Fund invests in commodity-producing countries, such as Australia, Brazil, Canada, Chile, Colombia, Indonesia, Malaysia, New Zealand, Norway, Peru, Russia and South Africa. This list may change based on market developments. Although this Fund invests in very short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The following performance table is provided for comparative purposes and represents the period noted. The Fund sper share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. The WisdomTree Australia & New Zealand Debt Fund (the Fund ) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its investment objective through investments in fixed income instruments denominated in Australian or New Zealand dollars.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated January 1, 2016, the Fund s annual expense ratio was 0.45%.

Performance as of 8/31/16

		Average Annı	ıal Total Return	
	1			Since
	Year	3 Year	5 Year	Inception <sup>1</sup>
Fund NAV Returns <sup>2</sup>	13.58%	0.54%	-1.93%	1.50%
Fund Market Price Returns <sup>2</sup>	14.14%	0.66%	-1.96%	1.40%
Citigroup Australian Broad Investment-Grade Bond Index	12.89%	1.02%	-0.75%	4.50%
Spliced Australia & New Zealand Debt Composite	14.33%	1.72%	-0.58%	2.56%

<sup>&</sup>lt;sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on June 25, 2008.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated January 1, 2016, the Fund s annual expense ratio was 0.43%.

Performance as of 8/31/16

	Average Annua	Average Annual Total Return	
		Since	
	1 Year	Inception <sup>1</sup>	
Fund NAV Returns	5.92%	1.68%	
Fund Market Price Returns	6.44%	1.65%	
BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Zero Duration Index	6.23%	1.97%	

<sup>&</sup>lt;sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NASDAQ on December 18, 2013.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The WisdomTree Emerging Markets Corporate Bond Fund (the Fund) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its objective through investments in debt securities issued by corporate entities that are domiciled in, or economically tied to, emerging market countries.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated April 14, 2016, the Fund s annual expense ratio was 0.60%.

The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated February 19, 2016, the Fund s net and gross annual expense ratios were 0.38% and 0.44%, respectively. WisdomTree Asset Management, Inc. has contractually agreed to limit the management fee to 0.38% through December 31, 2016, unless earlier terminated by the Board of Trustees of the Trust for any reason at any time.

Performance as of 8/31/16

Cumulative Total Return
Since

	Inception <sup>1</sup>
Fund NAV Returns	7.77%
Fund Market Price Returns	7.76%
CBOE S&P 500 PutWrite Index	8.00%
S&P 500® Index	13 79%

<sup>&</sup>lt;sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on February 24, 2016.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

<sup>\*</sup>The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security. Excludes derivatives and investment of cash collateral for securities on loan (if any).

The WisdomTree Global Real Return Fund (the Fund ) seeks total returns (capital appreciation plus income) that exceed the rate of inflation over long-term investment horizons.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated January 1, 2016, the Fund s annual expense ratio was 0.65%. The prospectus expense ratio includes 0.05% of acquired fund fees and expenses ( AFFEs ). The prospectus expense ratio may not correlate to the expense ratio in the Fund s financial highlights and financial statements because the financial highlights and financial statements reflect only the operating expenses of the Fund and do not include AFFEs, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

28 WisdomTree Currency Strategy, Fixed Income and Alternative Funds

<sup>&</sup>lt;sup>2</sup> Diversified Trends Indicator Index through June 30, 2016; WisdomTree Managed Futures Index thereafter.

#### **Description of Terms and Indexes** (unaudited)

Below are descriptions of certain terms and of each index referenced in this report.

#### **Barclays Commodity Producers Currency Index:**

The Barclays Commodity Producers Currency Index ( CPCI-6 ) tracks the performance of long positions in the equally weighted six commodity currencies versus the U.S. dollar, expressed through one-month cash settled forward rate agreements. The six commodity currencies included in CPCI-6 are the Australian dollar, Brazilian real, Canadian dollar, Norwegian krone, Russian ruble, and South African rand. These currencies are selected to represent six resource rich economies, diversified in terms of geography, major commodities items exported and across developed and emerging economies. Index performance is only through June 6, 2016, as the index in no longer calculated.

#### **Bloomberg Barclays Global Credit Index (Hedged):**

The Bloomberg Barclays Global Credit Index (Hedged) contains investment-grade and high-yield credit securities from the Bloomberg Barclays Multiverse Index, which is a broad-based measure of the global fixed-income bond market. The Bloomberg Barclays Multiverse Index is the union of the Bloomberg Barclays Global Aggregate Index and the Bloomberg Barclays Global High Yield Index and captures investment grade and high yield securities in all eligible currencies. The Bloomberg Barclays Multiverse Index family includes a wide range of standard and customized subindices by sector, quality, maturity, and country.

#### Bloomberg Barclays Rate Hedged U.S. Aggregate Bond Index, Negative Five Duration:

The Bloomberg Barclays Rate Hedged U.S. Aggregate Bond Index, Negative Five Duration combines long positions in the Bloomberg Barclays U.S. Aggregate Bond Index with short positions in U.S. Treasury Bonds to provide a duration exposure of -5 years. Market values of long and short positions are rebalanced at month-end.

# Bloomberg Barclays Rate Hedged U.S. Aggregate Bond Index, Zero Duration:

The Bloomberg Barclays Rate Hedged U.S. Aggregate Bond Index, Zero Duration combines long positions in the Bloomberg Barclays U.S. Aggregate Bond Index with short positions in U.S. Treasury Bonds to provide a duration exposure of 0 years. Market values of long and short positions are rebalanced at month-end.

#### Bloomberg Barclays U.S. Aggregate Enhanced Yield Index:

The Bloomberg Barclays U.S. Aggregate Enhanced Yield Index uses a rules-based approach to reallocate across subcomponents in the Bloomberg Barclays U.S. Aggregate Bond Index seeking to enhance yield while maintaining a similar risk profile.

#### **Bloomberg Dollar Spot Index:**

The Bloomberg Dollar Spot Index tracks the performance of a basket of 10 leading global currencies versus the U.S. dollar. Each currency in the basket and its weight is determined annually based on its share of international trade and foreign exchange (FX) liquidity.

#### **Bloomberg Dollar Total Return Index:**

The Bloomberg Dollar Total Return Index is structured to potentially benefit as the U.S. dollar appreciates relative to a basket of global currencies. The index tracks a long position in the U.S. dollar measured against a basket of developed and emerging market currencies which (i) have the highest liquidity in the currency markets and (ii) represent countries that make the largest contribution to trade flows with the United States. The

WisdomTree Currency Strategy, Fixed Income and Alternative Funds

29

#### **Description of Terms and Indexes** (unaudited) (continued)

index also incorporates differences in money market rates between the U.S. and the countries (or regions) represented by the foreign currencies.

#### Bloomberg U.S. Treasury Floating Rate Bond Index:

The Bloomberg U.S. Treasury Floating Rate Bond Index is a rules-based, market-value weighted index engineered to measure the performance and characteristics of floating rate coupon U.S. Treasuries which have a maturity greater than 12 months. To be included in the index a security must have a minimum par of 1,000MM.

#### Bloomberg/EFFAS Bond Indices Japan Government 5-10 Year Total Return Index:

The Bloomberg/EFFAS indices are designed as transparent benchmarks for government bond markets. Indices are grouped by country and maturity sectors. Bloomberg computes daily returns and index characteristics for each sector.

#### BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Negative Seven Duration Index:

The BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Negative Seven Duration Index tracks the performance of the combination of a long position in short maturity U.S. high yield bonds and a short position in on the run U.S. Treasuries where the net interest rate exposure of the index is adjusted to a negative seven year duration. Market values of long and short positions are rebalanced at month-end.

# BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Zero Duration Index:

The BofA Merrill Lynch 0-5 Year U.S. High Yield Constrained, Zero Duration Index tracks the performance of the combination of a long position in short maturity U.S. high yield bonds and a short position in on the run U.S. Treasuries where the net interest rate exposure of the index is adjusted to a zero year duration. Market values of long and short positions are rebalanced at month-end.

#### **BofA Merrill Lynch Global Diversified Inflation-Linked Index:**

The BofA Merrill Lynch Global Diversified Inflation-Linked Index is a broad, market value-weighted, capped total return index designed to measure the performance of inflation-linked sovereign debt that is publicly issued and denominated in the issuer sown domestic market and currency.

#### **BofA Merrill Lynch Global Diversified Inflation-Linked Index (Hedged):**

The BofA Merrill Lynch Global Diversified Inflation-Linked Index (Hedged) is a broad, market value-weighted, capped total return index designed to measure the performance of inflation-linked sovereign debt that is publicly issued and denominated in the issuer s own domestic market and currency but hedges the foreign currency exposures using forward currency contracts.

#### BofA Merrill Lynch U.S. Dollar 3-Month Deposit Offered Rate Constant Maturity Index:

The BofA Merrill Lynch U.S. Dollar 3-Month Deposit Offered Rate Constant Maturity Index tracks the performance of a synthetic asset paying Libor to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that day s fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.

30 WisdomTree Currency Strategy, Fixed Income and Alternative Funds

#### **Description of Terms and Indexes** (unaudited) (continued)

#### Citigroup Australian Broad Investment-Grade Bond Index:

The Citigroup Australian Broad Investment-Grade Bond Index is a market capitalization-weighted index designed to represent the Australian fixed-coupon bond market, including government, semi-government, and investment grade credit markets (including supranational issuers).

#### **Diversified Trends Indicator Index:**

The Diversified Trends Indicator ( DTI ) Index is a long/short rules-based index that consists of ten commodity sectors and eight financial sectors. Each month the DTI Index sector exposure is rebalanced back to the fixed weights, 50% physical commodities and 50% financials (when energy is long) and approximately 40% commodities and 60% financials (when energy is flat). Each sector (other than the energy sector) is positioned either long or short depending on the current market environment (the energy sector is positioned as either long or flat (i.e., no exposure)). The DTI Index individual market components, sectors and related weightings, as well as other aspects of the calculation of the DTI Index, are subject to change at any time.

#### **Equal-Weighted Commodity Currency Composite:**

A composite incorporating equal-weighted exposures to the currencies within the Commodity Currency Strategy Fund was constructed as a benchmark for Fund performance. Returns for the individual emerging market currencies are represented by the return of the country subindices of the JP Morgan Emerging Local Markets Index Plus (ELMI+). Returns for the individual developed market countries are represented by the returns of the BofA Merrill Lynch One-Month Constant Maturity LIBID Index for each country. The JP Morgan indices use a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the returns for emerging currency positions. The BofA Merrill Lynch indices track a consistent investment in one-month bank deposits denominated in the specified currency. Within the composite, currency exposures are rebalanced back to equal-weight at the end of the month in which the Fund rebalances its portfolio. Changes to currencies within the Fund are reflected in the composite at the end of the month they are added to, or deleted from, the Fund.

#### **Equal-Weighted Emerging Currency Composite:**

A composite incorporating equal-weighted exposure to the currencies within the Emerging Currency Strategy Fund was constructed as an additional gauge of Emerging Currency Strategy Fund performance. Currently, the composite tracks the returns for the currencies of the following countries: Brazil, Chile, Mexico, Poland, Indonesia, South Africa, Turkey, India, China, Russia and South Korea, using the total returns of the country subindices of the JP Morgan Emerging Local Markets Index Plus (ELMI+). Each subindex uses a weighted basket of one-month, two-month and three-month currency forwards (deliverable or nondeliverable) collateralized with U.S. money market rates to proxy the total returns of an investment in local-currency money market instruments. Currency exposures are rebalanced back to equal-weighting at the end of the month in which the Emerging Currency Strategy Fund intends to rebalance, and currency changes are reflected in the composite at the end of the month they are reflected in the Fund.

## **Forward Currency Contracts:**

A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A forward contract may either be deliverable or non-deliverable. A **deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date upon which each party delivers the promised currency. A **non-deliverable forward ( NDF ) currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date and then cash settle the agreement with a simple exchange of the market value difference between the current market rate and the initial agreed-upon rate.

WisdomTree Currency Strategy, Fixed Income and Alternative Funds

Table of Contents 60

31

#### **Description of Terms and Indexes** (unaudited) (continued)

#### **Global Corporate Composite (Hedged):**

The Global Corporate Composite (Hedged) consists of a blend of 75% Bloomberg Barclays Global Aggregate Corporate Index Hedged USD and 25% Bloomberg Barclays Global High Yield Index Hedged USD. The Bloomberg Barclays Global Aggregate Index provides a broad-based measure of the global investment grade fixed-rate debt markets. The Bloomberg Barclays Global High-Yield Index provides a broad-based measure of the global high-yield fixed income markets.

#### JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad:

The JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad is a market capitalization-weighted index consisting of U.S. dollar-denominated emerging market corporate bonds. The index serves as a global corporate benchmark representing Asia, Latin America, Europe and Middle East/Africa. U.S. dollar-denominated corporate issues from index-eligible countries are narrowed further by only including issues with more than \$300 million current face outstanding and at least five years to maturity (at the time of inclusion into the index).

#### JP Morgan Emerging Local Markets Index Plus (ELMI+):

The JP Morgan Emerging Local Markets Index Plus (ELMI+) and its underlying country and regional subindices track the total returns for local-currency denominated money market instruments in emerging market countries.

#### JP Morgan Emerging Local Markets Index Plus (ELMI+) Brazil:

The Brazil subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Brazilian real money market instruments. The returns are reported in U.S. dollar terms.

#### JP Morgan Emerging Local Markets Index Plus (ELMI+) China:

The China subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Chinese yuan money market instruments. The returns are reported in U.S. dollar terms.

#### JP Morgan Emerging Local Markets Index Plus (ELMI+) India:

The India subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Indian rupee money market instruments. The returns are reported in U.S. dollar terms.

#### JP Morgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified Index:

The JP Morgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified Index tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base. The index incorporates a constrained market capitalization methodology in which individual issuer exposures are capped at 10% (with the excess distributed to smaller issuers) for greater diversification among issuing governments. The returns are reported in U.S. dollar terms.

#### LIBID:

London Interbank Bid Rate or the rate at which banks are willing to borrow for a discrete period of time.

32 WisdomTree Currency Strategy, Fixed Income and Alternative Funds

#### **Description of Terms and Indexes** (unaudited) (continued)

#### Markit iBoxx Asian Local Bond Index:

The Markit iBoxx Asian Local Bond Index ( ALBI ) tracks the total return performance of a bond portfolio which consists of local currency denominated, high quality and liquid bonds in Asia ex-Japan. The ALBI includes bonds from the following countries: South Korea, Hong Kong, India, Singapore, Taiwan, Malaysia, Thailand, the Philippines, Indonesia and China.

#### **Sovereign Debt:**

Debt that is the direct obligation of a government issuer.

#### Spliced Australia & New Zealand Debt Composite:

A spliced index which tracks the BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index through October 24, 2011. Thereafter, the composite tracks a weighted exposure to the local currency bond markets of Australia and New Zealand. Performance for Australia is proxied by the total returns of the Citigroup Australian Broad Investment-Grade Bond Index. Performance for the New Zealand bond market is proxied by the JP Morgan New Zealand Government Bond Index. Country exposures are rebalanced back to target weighting quarterly. The BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month New Zealand dollar-denominated bank deposits. The JP Morgan New Zealand Government Bond Index is a market capitalization-weighted index of locally denominated, fixed rate government debt.

#### **Spot Rate and NDF Rate Returns:**

A spot rate is the foreign exchange rate on foreign exchange contracts settled generally within two business days from the trade date. The NDF rate is the foreign exchange rate on non-deliverable forward currency contracts settled on a future date that is generally greater than two business days from the trade date. The **Brazilian real** and **Indian rupee** spot return rate relative to the U.S. dollar calculated by WisdomTree is the rate of return percentage difference between the end of period spot and the beginning of period spot rate using WM/Reuters London closing rates and WM/Reuters Singapore closing rates, respectively. The **Chinese yuan** NDF return rate relative to the U.S. dollar calculated by WisdomTree is the rate of return percentage difference between the end of period NDF rate and the beginning of period NDF rate using WM/Reuters Singapore closing rates.

#### WisdomTree Japan Interest Rate Strategy Index:

The WisdomTree Japan Interest Rate Strategy Index is designed to provide long exposure to monthly U.S. Treasury Bill returns plus short exposure to the monthly performance of Japanese government bonds while at the same time offsetting a portion of the exposure to fluctuations of the Japanese yen relative to the U.S. dollar (the amount of currency exposure to be offset is determined periodically with reference to its contribution to the overall volatility of the index).

#### WisdomTree Managed Futures Index:

The WisdomTree Managed Futures Index is a long/short, rules-based Index designed to provide exposure to a portfolio consisting of diversified futures contracts for commodities, currencies and interest rates. On a monthly basis, assets with lower realized volatility will be selected, and a determination to go long or short the futures contracts of the selected assets under a proprietary composite momentum framework will be made. The composite momentum framework incorporates multiple momentum signals to decide the direction and weight in the Index.

# Description of Terms and Indexes (unaudited) (concluded)

affiliates or the Chicago Board Options Exchange, Incorporated, and none of such parties make any representation regarding the advisability of investing in such product(s), nor do they have any liability for any errors, omissions or interruptions of the CBOE S&P 500 Put Write Index.

WisdomTree Investments, Inc. and WisdomTree Asset Management, Inc. (together, WisdomTree) and the Funds make no representation or warranty, express or implied, to the owners of shares of the Funds or any member of the public regarding the advisability of investing in securities generally or in the Funds particularly or the ability of the underlying Indexes to track the performance of their underlying securities. WisdomTree Investments is the licensor of certain trademarks, service marks and trade names of the Funds. WisdomTree Investments has no obligation to take the needs of the Funds or the owners of shares of the Funds into consideration in determining, composing, or calculating the underlying WisdomTree Indexes of the applicable Funds. WisdomTree Investments is not responsible for, and has not participated in, the determination of the timing of, prices of, or quantities of shares of the Funds to be issued or in the determination or calculation of the equation by which the shares of the Funds are redeemable. WisdomTree and the Funds do not guarantee the accuracy, completeness, or performance of the underlying Indexes or the data included therein and shall have no liability in connection with the underlying Indexes or their calculation.

Index returns do not reflect expenses paid by the Funds. Index returns assume reinvestment of distributions. It is not possible to invest directly in an index.

# **Shareholder Expense Examples** (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of cost: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from March 1, 2016 to August 31, 2016.

#### **Actual expenses**

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 3/1/16 to estimate the expenses you paid on your account during the period.

#### Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

The annualized expense ratio does not include AFFEs, which are fees and expenses incurred indirectly by a Fund through its investments in certain underlying investment companies.

Expenses are calculated using each Fund s annualized expense ratio, multiplied by the average account value for the period, multiplied by 184/366 (to reflect the one-half year period).

- \* WisdomTree Asset Management, Inc. has contractually agreed to limit its management fee to 0.12%, 0.15%, 0.45%, 0.55% and 0.38% for WisdomTree Barclays U.S. Aggregate Bond Enhanced Yield Fund, WisdomTree Bloomberg Floating Rate Treasury Fund, WisdomTree Strategic Corporate Bond Fund, WisdomTree Western Asset Unconstrained Bond Fund and WisdomTree CBOE S&P 500 PutWrite Strategy Fund, respectively, through December 31, 2016, unless earlier terminated by the Board of Trustees of the WisdomTree Trust for any reason.
- 1 Effective November 10, 2015, WisdomTree Asset Management, Inc. has voluntarily agreed to waive 0.15% of its management fee. This voluntary waiver may be reduced or discontinued at any time without notice.
- 2 Effective June 30, 2016, WisdomTree Asset Management, Inc. has contractually agreed to limit the management fee to 0.65% through December 31, 2017, unless earlier terminated by the Board of Trustees of the WisdomTree Trust for any reason.

#### Schedule of Investments (concluded)

#### WisdomTree Asia Local Debt Fund (ALD)

August 31, 2016

Principal amount is reported in U.S. dollars unless otherwise noted.

- (a) Security, or portion thereof, was on loan at August 31, 2016 (See Note 2).
- (b) Rate shown represents annualized 7-day yield as of August 31, 2016.
- (c) At August 31, 2016, the total market value of the Fund s securities on loan was \$736,981 and the total market value of the collateral held by the Fund was \$753,900.
- Reg S Regulation S provides an exclusion from the registration requirements of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

Portfolio turnover rate <sup>6</sup>		0%		0%		0%		0%		0%

<sup>\*</sup> Commencement of operations.

Based on average shares outstanding.

<sup>2</sup> Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. Includes a voluntary reimbursement from the sub-advisor for investment losses on certain foreign exchange transactions during the period. Excluding this voluntary reimbursement, total return would have been 0.04% lower. Annualized. <sup>5</sup> Included in the expense ratio are proxy expenses (which are not annualized). Without these proxy expenses, the annualized expense ratio would have been 0.50%. 6 Portfolio turnover rate is not annualized. Short-term securities with maturities less than or equal to 365 days are excluded from portfolio turnover calculation as well. Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio would have been 0.45%. 8 Includes a voluntary reimbursement from the sub-advisor of \$0.01 per share for investment losses on certain foreign exchange transactions during the period. See Notes to Financial Statements. WisdomTree Currency Strategy, Fixed Income and Alternative Funds 108

1 - · · · · · · · · · · · · · · · · · ·										

Based on average shares outstanding.

- <sup>2</sup> Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. The total return would have been lower if certain expenses had not been waived by the investment adviser for WisdomTree Australia & New Zealand Debt Fund (Notes 2 and 3).
- <sup>3</sup> Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio would have been 0.55%.
- <sup>4</sup> Portfolio turnover rate is not annualized and excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund s capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation as well.
- The information reflects the investment objective and strategy of the WisdomTree Dreyfus New Zealand Dollar Fund through October 24, 2011 and the investment objective of the WisdomTree Australia & New Zealand Debt Fund thereafter.
- <sup>6</sup> Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio (net of expense waiver) would have been 0.45% and the expense ratio (prior to expense waivers) would have been 0.45%.

See Notes to Financial Statements.
