D. Major Businesses

(1) Wireless business

The Company provides wireless telecommunications services, characterized by its competitive strengths in handheld devices, affordable pricing, network coverage and an extensive contents library. The Company continues to maintain its reputation as the unparalleled premium network operator in the 2G, 3G and LTE markets on the basis of its technological leadership and network management technology. In addition, the Company is leading the process of global technology standardization with the aim of being the world's first to commercialize 5G technology.

In order to strengthen its sales channels, the Company has been offering a variety of fixed-line and wireless telecommunication convergence products through its subsidiary, PS&Marketing Co., Ltd. (PS&Marketing). PS&Marketing provides differentiated service to customers through the establishment of new sales channels and product development. Through its subsidiaries Service Ace Co., Ltd. and Service Top Co., Ltd., the Company operates customer service centers in Seoul and provides telemarketing services. Additionally, Network O&S Co., Ltd., the Company's subsidiary responsible for the operation of the Company's 2G to 4G networks, provides customers with quality network services and provides the Company with technological know-how in network operations.

The Company plans to increase its profitability by strengthening its retention policy, which is the fundamental basis of competitiveness for telecommunication companies in this data-intensive era. The Company will lead the information and communication technology (ICT) trend by providing products through which customers can have a distinctive experience and by providing innovative services to transition to service-based competition.

In addition to the mobile network operator (MNO) business, the Company is building next-generation growth businesses in Internet of Things (IoT) solutions and artificial intelligence. In July 2016, the Company deployed the world's first low-cost Low Power Wide Area Network designed to support IoT devices based on LoRa technology. In September 2016, the Company launched NUGU, the first intelligent virtual assistant service launched in Korea with Korean language capabilities based on advanced voice recognition technologies. The Company plans to further utilize its big data analysis capabilities to achieve growth in new business areas such as artificial intelligence.

(2) Fixed-line business

SK Broadband Co., Ltd. (SK Broadband) is engaged in providing telecommunications, broadcasting and new media services and various other services that are permitted to be carried out by SK Broadband under relevant regulations, as well as business activities that are directly or indirectly related to providing those services. In 1999, SK Broadband launched its high-speed Internet service in Seoul, Busan, Incheon and Ulsan and currently provides such services nationwide. SK Broadband also commercialized its TV-Portal service in July 2006 and its IPTV service in January 2009 upon receipt of permit in September 2008.

(3) Other businesses

The Company is a leading player in the Korean e-commerce industry with 11st, an e-commerce platform service that connects various sellers and purchasers through its online and mobile platforms, and Shocking Deal, a mobile commerce curation service. In addition, the Company has rapidly grown into a top tier player in Turkey, Malaysia and Thailand after launching open market businesses in these countries by optimizing its businesses for the respective local markets and utilizing its expertise in the e-commerce platform business. In the online-to-offline (O2O) area, the Company is a leading player and continues to expand its market power with OK Cashbag, Korea's largest loyalty mileage program, SyrupWallet, which offers smart shopping services utilizing its network of business partners and information technology such as big data, and other Syrup-related services such as gifticon and 11Pay. The Company focuses on the mobile platform to connect various on- and offline commerce service platforms that provide various benefits and information at the right place and the right time to give consumers a pleasant and convenient shopping experience and retailers an integrated marketing solution to reach their target audience. The Company intends to continue its efforts to secure the market leading position in these markets.

In the location-based services business area, the Company provides real time traffic information and various local information through its T-Map Navigation service. In the digital contents business area, the Company provides high-quality digital contents in its leading mobile contents marketplace, Onestore.

The Company is also engaged in display advertising and search engine-based advertising and provides contents and other services. Display advertising provides exposure to the advertiser's brand in the form of flash media, images or videos. Search engine-based advertising provides exposure through the search results of specific keywords entered in the NATE search engine, and is utilized mostly by small and medium-sized advertisers. The Company also derives revenue by providing contents and other services.

[SK Broadband]

SK Broadband acquired subscribership of regional cable and other service providers on several different occasions. Such acquisitions were intended to secure a stable subscriber base for its broadband Internet service and, at the same time, increase the service coverage area. Because such acquisitions were conducted on a relatively small scale and involved the purchase of subscribership, SK Broadband did not believe that such acquisitions rose to the level of purchasing an entire business line from another company or were likely to have a material impact on its business, and therefore decided that such acquisitions did not require resolutions of its shareholders.

[Wireless Business]**A. Industry Characteristics**

The telecommunications services market can be categorized into telecommunications services (such as fixed-line, wireless, leased line and value-added services) and broadcasting and telecommunications convergence services. Pursuant to the Telecommunications Business Act, the telecommunications services market can be further classified into basic telecommunications (fixed-line and wireless telecommunications), special category telecommunications (resale of telecommunications equipment, facilities and services) and value-added telecommunications (internet connection and management, media contents and others). The size of the domestic telecommunications services market is determined based on various factors specific to Korea, including size of population that uses telecommunication services and telecommunications expenditures per capita. While it is possible for Korean telecommunication service providers to provide services abroad through acquisitions or otherwise, foreign telecommunication services markets have their own characteristics depending, among others, on the regulatory environment and demand for telecommunication services.

The Korean mobile communication market is considered to have reached its maturation stage with more than a 100% penetration rate. However, the Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology and the development of highly advanced LTE-A, LTE and 3G smartphones which enable the provision of convergence services for multimedia contents, mobile commerce, telematics, new media and other related services. In addition, through the commercialization of LTE network in July 2011 and LTE-A network in June 2013, B2B businesses, such as the corporate connected workforce business which can directly contribute to an enhancement in productivity, are expected to grow rapidly.

In the first half of 2014, wideband LTE-A service was commercialized and on December 29, 2014, tri-band LTE-A service with a maximum speed of 300 Mbps was also commercialized. Since June 2017, through the commercialization of 5band CA technology, which is considered the final stage of LTE development, the Company has provided 4.5G service at the speed of 700Mbps to 900Mbps. Since early 2018, the Company was the first to start providing LTE service with a speed of up to 1 Gbps. Such achievements were the building blocks towards the Company's LTE penetration reaching 77.1% as of March 31, 2018.

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Sales revenue related to data services is expected to increase due to the increasing popularity of smartphones and high-speed wireless networks. There is also a growing importance to the business-to-business segment, which creates added value by selling and developing various solutions. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

Set forth below is the historical market share of the Company.

D. Business Overview and Competitive Strengths

The Company is seeking to transform itself from a telecommunications service provider into a comprehensive ICT service provider. It has continued to innovate the scope of its services and achieved strong growth in subscribers amid fierce competition and rate cuts. As a result, for the first quarter of 2018, the Company recorded Won 4,182 billion in revenue and Won 326 billion in operating income on a consolidated basis and Won 2,989 billion in revenue and Won 369 billion in operating income on a separate basis. In particular, the number of subscribers subscribing to Band Data plans, which was launched in the second quarter of 2015, has continued to steadily increase in 2017, which in turn led to an increase in data usage. The success of Luna, a smartphone launched in September 2015 that was designed to run exclusively on the Company's networks, led to the launch of various other relatively low-priced devices and became an example of successfully targeting a niche market.

By continuing to be innovative in developing core competencies, the Company has more firmly established its position as the market leader in wireless telecommunications. The competitive environment of the wireless telecommunications industry has become more focused on retention especially through the reinforcement of marketing that is focused on innovation in increasing customer value. In the first quarter of 2018, the average monthly churn rate was 1.3%. The number of subscribers (including MVNO subscribers) as of March 31, 2018 was 30.4 million, an increase of approximately 150,000 since December 31, 2017. In particular, the number of LTE subscribers as of March 31, 2018, was 23.4 million, an increase of approximately 300,000 since December 31, 2017, solidifying the Company's market leadership. In addition, the Company continued to sell products targeted towards second devices such as the T Kids phone Joon and T Outdoor, which the Company believes shows a level of demand that can potentially lead to growth of the lifestyle enhancement platform.

Following the launch of commercial LTE services in July 2011, the Company became the first telecommunications service provider in the world to launch commercial wideband LTE-A services in June 2014. The Company launched tri-band LTE-A services in December 2014 and 5band 4.5G services in June 2017. In the first quarter of 2018, the Company commenced providing LTE service of up to 1 Gbps by utilizing five-band carrier aggregation technology and 4T4R technology. By launching various high quality services utilizing the LTE-A and wideband LTE networks such as group video conference call services and full high definition mobile IPTV streaming services, the Company plans to provide an innovative user experience, enhance customer satisfaction and increase profitability.

The Company has proved that it has superior network quality compared to its competitors according to the Korea Communications Commission quality evaluations. The Company has also proved to be the leader in Korea's top three customer satisfaction indices: according to the National Customer Satisfaction Index, Korean Customer Satisfaction Index and Korean Standard Service Quality Index, the Company has continued to hold the leading position for 21 years, 20 years and 18 years, respectively. The Company received the highest level of evaluation in 2016 by the Korea Commission for Corporate Partnership for the fifth consecutive year and was selected for the commission's Honored Corporation Award, demonstrating the Company's efforts to be fair and law-abiding in its path towards creating a New ICT ecosystem.

SK Telink, a consolidated subsidiary of the Company, expanded its operations to the MVNO business based on its technical expertise and know-how obtained in its international telecommunications business and launched its MVNO service, SK 7Mobile, which is offered at reasonable rates and provides excellent quality. SK Telink is increasing its efforts to develop low-cost distribution channels and create niche markets through targeted marketing towards customers including foreign workers, middle-aged adults and students. An MVNO leases the networks of an MNO and provides wireless telecommunication services under its own brand and fee structure, without owning telecommunication networks or frequencies.

Network O&S, a subsidiary of the Company responsible for the operation of the Company's base stations and related transmission and power facilities, offers quality fixed-line and wireless network services to customers, including mobile office products to business customers.

PS&Marketing, a subsidiary of the Company, provides a sales platform for products of the Company and SK Broadband including fixed-line and wireless telecommunication products that address customers' needs for various convergence products. PS&Marketing provides differentiated service to clients through the establishment of new sales channels and product development.

[Fixed-line Business]**A. Industry Characteristics**

The Korean fixed-line services industry is marked by a relatively low level of economic sensitivity and high level of market concentration, as the government is highly selective in granting telecommunications business licenses. The competitive landscape of the fixed-line and wireless services markets is dominated by its three leading operators, the Company (including SK Broadband), KT and LG U+. Growing competition within the industry has promoted rapid technological evolution, including the convergence of fixed-line and wireless services, as well as broadcasting and telecommunications. In general, the fixed-line and wireless services markets have been characterized by relatively high profitability, cash flows and financial stability.

In the backdrop of increasing regulation in the fixed-line industry, competition to provide Giga services has intensified and the growth of high-speed internet subscribers has slowed. It is currently expected that the rate of increase of IPTV subscribers will decrease, among others, due to the conversion to digital broadcasting. In order to differentiate itself from its competitors, the Company believes that it will need to provide customers with high quality media content on its IPTV platform. Additionally, the Company expects increased demand for ultra-high definition broadcasting. Such changing trends of broadcasting consumption present opportunities to incorporate the Company's IoT, cloud and big data technologies into the Company's home platform business to achieve new growth. The Company plans to increase its subscriber base by providing differentiated services and focusing on marketing strategies centered around high value services such as Giga services and ultra-high definition broadcasting services.

B. Growth Potential

(Unit: in 1,000 persons for high-speed Internet and fixed-line telephone, in 1,000 terminals for IPTV)

Classification		As of		
		As of March 31, 2018	December 31, 2017	December 31, 2016
Fixed-line Subscribers	High-speed Internet	21,206	21,196	20,556
	Fixed-line telephone	14,862	15,039	15,746
	IPTV (real-time)	N.A.	13,314	11,850

* Source: MSIT website.

* The number of IPTV subscribers as of March 31, 2018 is not available as the relevant report by the MSIT has not yet been released.

C. Cyclical Nature and Seasonality

High-speed Internet, fixed-line telephone and IPTV services are mature markets that are comparatively less sensitive to cyclical economic changes as such services have become more of a necessity and the market has matured. The telecommunications services market overall is not expected to be particularly affected by economic downturns due to the low income elasticity of demand for telecommunication services.

D. Market Shares

Set forth below is the historical market share of the Company.

Classification	(Unit: in percentages)		
	As of March 31, 2018	As of December 31, 2017	2016
High-speed Internet (including resales)	25.9	25.7	25.3
Fixed-line telephone (including Voice over Internet Protocol (VoIP)	16.9	16.9	16.9
IPTV	N.A.	30.6	30.7

* Source: MSIT website.

* With respect to Internet telephone, the market share was calculated based on market shares among the Company, KT and LG U+ and is based on the number of IP phone subscribers.

* The market share of IPTV subscribers as of March 31, 2018 is not available as the relevant report by the MSIT has not yet been released.

E. Business Overview and Competitive Strengths

For the first quarter of 2018, the Company recorded Won 750.7 billion in revenue, Won 22.1 billion in operating income and Won 6.9 billion in profit for the period for its fixed-line business. Although revenue continued to grow due to an increase in the number of premium subscriptions with higher monthly rates and purchases of video-on-demand content, operating profit decreased compared to the previous year due to an increase in operating costs related to its fixed-line business subsidiaries, among other things. The number of subscribers to each of its high-speed internet, residential fixed-line telephones, VoIP services and IPTV services was 5.48 million, 2.37 million, 1.69 million and 4.46 million, respectively (resulting in the total number of telephone subscribers being 4.06 million subscribers). In addition, SK Broadband was awarded first place for eight consecutive years, including in 2018, in the survey by the National Customer Satisfaction Index for its high-speed internet and IPTV services. This is the result of its continuous efforts to deliver new value to its customers through innovation.

Through upgrades to its infrastructure and expanding its network coverage, the Company has continued to enhance its customer base and increased the proportion of premium subscribers, mainly its Giga internet service subscribers, to 29%. In addition, by improving the distribution capabilities of its direct and indirect channels and Home & Service, it has achieved a net increase in the number of subscribers. In the future, the Company will continue to achieve qualitative growth of its subscriber base by expanding sales based on Home & Service, wireless and fixed-line bundled offerings and strengthening marketing towards its premium subscribers.

With an increase in the number of subscribers and purchases of paid content, the Company's IPTV service business continues to grow steadily and revenue from its IPTV service in the first quarter of 2018 increased by more than 20% compared to the first quarter of 2017. In particular, the proportion of premium subscribers with higher monthly rates increased to approximately 45% as of March 31, 2018 due to the steady sale of premium subscriptions. In addition, the number of subscribers and usage rate of B tv x NUGU, an artificial intelligence-based IPTV service launched in the first quarter of 2018, have steadily increased.

The number of Oksusu subscribers has increased due to an improved user experience through diversification of content and personalized offerings, leading to an increase in its value as a platform as the proportion of sales of paid content has increased. SK Stoa maintained its sales growth by strengthening its channel launch marketing and expanding direct sales of products. In addition, SK Stoa focused on improving its mobile platform service by upgrading its user interface and providing services such as product recommendations in order to enhance its competitiveness.

SK Telink, a provider of international telecommunications service, has been able to establish itself as a market leader as a result of its affordable pricing, proactive marketing and the quality of its services. It launched a mobile phone-based international calling service under the brand name 00700 in 1998, creating a new niche market within the long-distance telephony market that was otherwise dominated by existing service providers. In 2003, SK Telink was designated a common carrier for international calling services, which allowed the Company to expand its international calling services to fixed-line international calling services. In 2005, SK Telink obtained a license to operate VoIP services and local calling value-added services to develop into a versatile fixed-line telecommunications service provider. SK Telink plans to strategically target the convergence of wireless and fixed-line telecommunications and strengthen its existing business as a comprehensive ICT service provider, including international satellite calling services (internet, wireless and fixed-line calling services on ships, aircraft and in polar regions), and video conference call services while aiming to satisfy the diverse needs of customers by providing quality solutions at reasonable prices.

[Other Business]

A. Industry Characteristics

As the number of smartphones distributed in Korea exceeds 40 million, the growth in various mobile devices has spurred the rise of the service provider with a strong platform business as the leader in the ICT market. It is becoming increasingly important to enhance competitiveness by building a platform with large data capacity to handle the increase in data transmission.

A platform business acts as an intermediary by promoting interactions among various customer groups, thereby generating new values. It is important for a platform business to continually attract subscribers and users and to create an ecosystem with certain lock-in effects. A platform can exist in various forms, including as a technological standard (iOS, Android OS), a subscriber-based service platform (Facebook, Twitter) or a marketplace (Amazon, Onestore). Platform businesses are evolving and expanding globally.

A platform business has strong growth potential due to its connectivity with related services and ease of global expansion. Apple became a world-leading smartphone producer based on its innovative design and the competitive strength of its App Store platform. Google has created a new ecosystem of long-tail advertising by attracting millions of third parties to its advertising platform, as well as showing strong growth in mobile markets with its competitive platform based on Android OS. It is becoming increasingly important to enhance competitiveness through a database that can register and analyze purchase patterns of customers across all areas and a platform with large data capacity with which to utilize this database and provide differentiated services to customers.

B. Growth Potential

The scope and value generated by the platform business, including application and content marketplaces and N-screen services, continue to increase as smartphones and tablet computers become more popular and the bandwidth and speed of network infrastructure improve. As the wireless network evolves to LTE, business opportunities for the platform business exist, including multimedia streaming, N-screen service based on cloud technology and high-definition location-based services. Since the platform business realizes profit by connecting with advertisements or commerce sites after building a critical mass of subscribers and traffic, the recent growth in the advertising and commerce markets is expected to present an opportunity for platform businesses. The importance of building a platform with large data capacity that is connected to various digital contents and commerce is expected to increase in the future.

C. Domestic and Overseas Market Conditions

(1) Commerce markets

The Company expects that online/mobile commerce markets will continue to grow due to the growth potential of the Internet shopping population, the strengthening of online business models by off-line operators, and the rapid rise of mobile commerce. Recently, due to the widespread use of smartphones and social media, the commercialization of location-based services and the development of big data technology, online to offline (or, O2O) business, which is a concept of attracting customers to offline stores using online and mobile environments, is being highlighted as a new field in the online commerce market industry as new business models continue to emerge.

(2) Digital contents

The growth of application marketplaces, which started with Apple's App Store, provides the platform business with new opportunities for revenue generation. The competitive paradigm is shifting from a competition among platform operators toward a competition among eco-systems that include application developers as well as platform operators.

D. Business Overview and Competitive Strengths

The Company plans to expand its platform ecosystem in operating its commerce business which includes marketplace and O2O businesses, such as 11st, Syrup and OK Cashbag, thereby ultimately increasing its enterprise value.

(1) Commerce business

11st, an online marketplace, has continued its growth through effective marketing and customer satisfaction. Despite its later entry into the online commerce market (launched in 2008) which was already divided between Auction and G-Market, it is leading the domestic e-commerce market. Furthermore, 11st has established itself as the domestic market leader in mobile commerce, following its successful entry into and rapid growth in this market. Growth plans involving overseas joint ventures based on 11st's business expertise have resulted in the successful launch of an open online commerce market in Turkey in partnership with Doğuş Group in March 2013. In October 2014, SK Planet and Celcom Axiata Berhad, which is a leading telecommunications service provider in Malaysia, established a joint venture, Celcom Planet, and launched online commerce services tailored to the Malaysian market in April 2015. 11st is actively engaged in operating such business in Malaysia.

Syrup is a consumer-oriented commerce service with the goal of minimizing its customers' time and efforts while maximizing the economic benefits by providing information about coupons and events based on time, place and occasion. To achieve this goal, Syrup combines location-based services, such as geo-fencing, a virtual perimeter technology using a global positioning system (or, GPS) and Bluetooth Low Energy (or, BLE), with big data analysis of consumption patterns. Syrup's business partners can benefit from cost-effective marketing through Syrup by utilizing statistics and analysis regarding consumers' frequency of visits, preferred products, and consumption patterns.

OK Cashbag is a point-based loyalty marketing program which has grown to become a global top-tier loyalty marketing program since its inception in 1999. Customers have access to increased benefits through accumulation of loyalty reward points and partner companies use OK Cashbag as a marketing resource. As Korea's largest loyalty mileage program, OK Cashbag maintains a leading position in the industry. The Company is continuing to develop its service in light of market conditions and customers' needs to enhance its customers' perception of point value and is reviewing and pursuing various plans to develop OK Cashbag into a service that goes beyond a mileage program that leverages the key competitiveness of OK Cashbag such as its platform and partnership network.

(2) Location-based services

T-Map Navigation provides map, local information, real-time traffic information and navigation services. T-Map Navigation is one of the leading location-based service platforms in Korea. By entering the Online to Offline service area with T map Taxi, T map Public Transportation and others, the Company is expanding its mobile platform foundation that connects day to day life. In September 2016, the Company launched T-Map x NUGU, which provides a new form of intelligent car infotainment service in collaboration with the Company's artificial intelligence (AI) service, NUGU. The Company has continued to secure subscribers by differentiating its product T-map x NUGU as a unique artificial intelligence driving assistant. The Company has also focused on providing effective info-tainment platforms to commercial vehicle businesses as well as providing localized content, including region-specific information and advertisements. The Company plans to further develop the T-Map Navigation platform by initiating open application programming interface-based services, providing services to more diverse types of devices and providing local area-based services.

(3) Digital contents

Onestore, an application platform launched in 2016 through a joint venture between SK Telecom, KT, LG U+ and Naver's app store, launched Onestore 2.0, which showcases the particular benefits of the application platform. The Company intends to further develop Onestore into a personalized gateway and mobile playground through enhanced product and brand competitiveness, expansion of the scope of serviceable devices, reinforcement of digital content offerings and enhancement of search services, among other things.

(4) Social networking services (SNS) and Internet portal services

The Company's instant messenger service, Nate-On, had a market share of 12.3% in the instant messenger market in Korea with 2.2 million net users during the month of March 2018. Nate, the Company's Internet search portal service, realized a page-view market share of 3.5% as of March 31, 2018. (Source: Korean Click, based on fixed-line access)

(3) Policies for Allowance for Doubtful Accounts

The Company establishes allowances for doubtful accounts based on the likelihood of recoverability of trade and other receivables based on their aging at the end of the period and past customer default experience for the past two years. With respect to trade receivables relating to wireless telecommunications services, the Company considers the likelihood of recovery based on past customer default experience and the length of default in connection with the type of default (e.g., whether the customer's service has been terminated or is continued). For such trade receivables that have been overdue for more than two years after the customer's service has been terminated, the Company records an allowance of 100% of such receivables. For such trade receivables that have been overdue for less than two years after the customer's service has been terminated or relates to a customer that is continuing his service, the Company records an allowance of a certain percentage of such receivable. Consistent with customary practice, the Company writes off trade and other receivables for which the prescription period has passed or that are determined to be impossible or economically too costly to collect, including receivables that are less than Won 200,000 and more than six months overdue and receivables that have been determined to be the subject of identity theft.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed separate interim financial statements of SK Telecom Co., Ltd. (the Company), which comprise the condensed separate statement of financial position as of March 31, 2018, the related condensed separate statements of income, comprehensive income, changes in equity and cash flows for the three-month periods ended March 31, 2018 and 2017, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No.1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed separate interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034, *Interim Financial Reporting*.

Emphasis of matter

As a matter that does not have an impact on our review conclusion, we highlight the attention of the users of the above-mentioned financial statements of the Company for the following matter described in Note 3 to the condensed separate financial statements. The Company has initially adopted K-IFRS No. 1109 and 1115 for the year beginning on January 1, 2018, and the Company has taken an exemption not to restate the condensed separate financial statements as of December 31, 2017 or for the three-month period ended March 31, 2017, presented for comparative purposes, in accordance with transition requirements. The financial impacts of applying K-IFRS No. 1109 and 1115

are discussed in Note 3.

Other matters

The separate statement of financial position of the Company as of December 31, 2017, and the related separate statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 23, 2018, expressed an unqualified opinion. The accompanying condensed separate statement of financial position of the Company as of December 31, 2017, presented for comparative purposes, is consistent, in all material respects, with the audited separate financial statements from which it has been derived.

The procedures and practices utilized in the Republic of Korea to review such condensed separate interim financial statements may differ from those generally accepted and applied in other countries.

SK TELECOM CO., LTD.

Notes to the Condensed Separate Interim Financial Statements

For the three-month periods ended March 31, 2018 and 2017

1. Reporting Entity

SK Telecom Co., Ltd. (the Company) was incorporated in March 1984 under the laws of the Republic of Korea (Korea) to provide cellular telephone communication services in Korea. The Company mainly provides wireless telecommunications services in Korea. The head office of the Company is located at 65, Eulji-ro, Jung-gu, Seoul, Korea.

The Company's common shares and depositary receipts (DRs) are listed on the Stock Market of Korea Exchange, the New York Stock Exchange and the London Stock Exchange. As of March 31, 2018, the Company's total issued shares are held by the following shareholders:

	Number of shares	Percentage of total shares issued (%)
SK Holdings Co., Ltd.	20,363,452	25.22
National Pension Service, other institutional investors and other minority shareholders	50,245,708	62.23
Treasury shares	10,136,551	12.55
	80,745,711	100.00

2. Basis of Preparation

(1) Statement of compliance

These condensed separate interim financial statements were prepared in accordance with K-IFRS No. 1034, *Interim Financial Reporting*, as part of the period covered by the Company's K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since December 31, 2017. These condensed separate interim financial statements do not include all of the disclosures required for full annual financial statements.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027, *Separate Financial Statements*, presented by a parent, an investor with joint control of, of significant influence over, an investee, in which the investments are accounted for at cost.

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed separate interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements as of and for the year ended December 31, 2017 except significant judgments and key sources of estimation uncertainty related to the K-IFRS 1115 and 1109 that are described in Note 3.

(2) Use of estimates and judgments, Continued

2) Fair value measurement

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has an established policies and processes with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executives.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, are used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements are included in Note 26.

3. Significant Accounting Policies

The significant accounting policies applied by the Company in these condensed separate interim financial statements are the same as those applied by the Company in its separate financial statements as of and for the year ended December 31, 2017, except for the following changes in accounting policies described below. The following changes in accounting policies are also expected to be reflected in the Company's separate financial statements as at and for the year ending December 31, 2018.

(1) Changes in accounting policies

The Company has initially adopted K-IFRS No. 1115, *Revenue from Contracts with Customers*, and K-IFRS No. 1109, *Financial Instruments*, from January 1, 2018. A number of other amended standards are effective from January 1, 2018 but they do not have a material effect on the Company's condensed separate interim financial statements.

1) K-IFRS No. 1115, *Revenue from Contracts with Customers*

K-IFRS No. 1115, *Revenue from contracts with customers*, establishes a comprehensive framework for determining whether, how much and when revenue is recognized. K-IFRS No. 1115 replaced the revenue recognition guidance, including K-IFRS No. 1018 *Revenue*, K-IFRS No. 1011, *Construction Contracts*, K-IFRS No. 2031, *Revenue: Barter Transactions Involving Advertising Services*, K-IFRS No. 2113, *Customer Loyalty Programs*, K-IFRS No. 2115, *Agreements for the Construction of Real Estate*, and K-IFRS No. 2118, *Transfers of Assets from Customers*.

The Company has adopted K-IFRS No. 1115, *Revenue from contracts with customers*, from January 1, 2018 using the cumulative effect method with the effect of initially applying this standard as an adjustment to the opening balance of retained earnings as at January 1, 2018. The Company applied K-IFRS No. 1115 retrospectively only to contracts that are not completed contracts at the date of initial application, which is January 1, 2018 using the practical expedient permitted by K-IFRS No. 1115.

i) Incremental costs to acquire a contract

The Company pays commissions to its direct retail stores and authorized dealers in connection with acquiring service contracts. The commissions paid to these agents historically constituted a significant portion of the Company's operating expenses. These commissions would not have been paid if there have been no binding contracts with subscribers. K-IFRS No. 1115 requires the Company to capitalize certain costs associated with commissions paid to sales agents to obtain new customer contracts and amortize them over the expected contract periods with customers. As a result of applying K-IFRS No. 1115, the Company recognized ₩2,356,136 million of prepaid expenses as at January 1, 2018.

ii) Contract liability

Upon adoption of K-IFRS No. 1115, the Company reclassified the receipts in advance and unearned revenue amounting to ₩44,045 million that are related to prepaid rate plans and customer loyalty program, respectively, to contract liabilities as at January 1, 2018.

3. Significant Accounting Policies, Continued

(1) Changes in accounting policies, Continued

1) K-IFRS No. 1115, *Revenue from Contracts with Customers*, Continued

iii) Impact of adopting K-IFRS No. 1115 on the condensed separate interim financial statements

If K-IFRS No. 1018 were applied on the Company's condensed separate statements of financial position as of March 31, 2018, prepaid expenses and long-term prepaid expenses would be decreased by ₩1,657,821 million and ₩671,574 million, respectively, while deferred tax assets would be increased by ₩10,328 million. As a result, total assets would be decreased by ₩2,319,067 million. In addition, total liabilities would be decreased by ₩614,618 million, with decrease of contract liabilities, long-term contract liabilities and deferred tax liabilities by ₩49,705 million, ₩6,334 million and ₩614,618 million, respectively, while other liabilities such as receipts in advance would be increased by ₩56,039 million. In relation to these changes in assets and liabilities, retained earnings would be decreased by ₩1,704,449 million.

If K-IFRS No. 1018 were applied on the Company's condensed separate statements of income for the three-month period ended March 31, 2018, revenues would be increased by ₩4,357 million, while commissions would be decreased by ₩22,384 million. Operating profit and profit before income tax would be increased by ₩26,741 million. As a result, profit for the period would be increased by ₩19,536 million with increase in income tax expense of ₩7,205 million.

When compared to K-IFRS No. 1018, the adoption of K-IFRS No. 1115 did not have material impact on the Company's condensed separate statement of cash flows for the three-month period ended March 31, 2018.

2) K-IFRS No. 1109, *Financial Instruments*

K-IFRS No. 1109 sets out requirements for recognizing and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces K-IFRS No. 1039 *Financial Instruments: Recognition and Measurement*. The Company adopted K-IFRS No. 1109, *Financial Instruments*, from January 1, 2018, and the Company has taken an exemption not to restate the financial statements for prior years in accordance with the transition requirements.

The following table explains the impact of transition to K-IFRS No. 1109 on the opening balance of reserves and retained earnings as at January 1, 2018.

i) Classification of financial assets and financial liabilities

K-IFRS No. 1109 largely retains the existing requirements in K-IFRS No. 1039 for the classification and measurement of financial liabilities. However, it eliminates the previous K-IFRS No. 1039 categories for financial assets of held to maturity, available for sale, loans, and receivables.

Under K-IFRS No. 1109, on initial recognition, a financial asset is classified as measured at: amortized cost; FVOCI-debt investment; FVOCI-equity investment; or FVTPL. The classification of financial assets under K-IFRS No. 1109 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. If a contract contains embedded derivatives and the host is an asset within the scope of K-IFRS No. 1109, then such embedded derivatives are not separated.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

it is held within a business model whose objective is to hold assets to collect contractual cash flow; and

its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income (OCI). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

A financial asset (unless it is an account receivable - trade without a significant financing component that is initially measured at the transaction price) is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

- i) Classification of financial assets and financial liabilities, Continued

The following accounting policies apply to the subsequent measurement of financial assets.

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.
Financial assets at amortized cost	These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

i) Classification of financial assets and financial liabilities, Continued

The following table explains the original measurement categories under K-IFRS No. 1039 and the changes in measurement categories under K-IFRS No. 1109 for each class of the Company's financial assets as at January 1, 2018, Continued.

- (*1) As of January 1, 2018, available-for-sale financial assets such as beneficiary certificates and equity investments amounting to ₩122,910 million were reclassified to financial assets measured at FVTPL. As the contractual terms of these assets do not give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, these assets were not qualified to be designated as financial assets measured at amortized cost. As a result of this reclassification, as at January 1, 2018, accumulated OCI of ₩ (-)106 million was reclassified to retained earnings and, due to its new classification to financial assets measured at FVTPL, retained earnings was decreased by ₩4,389 million. In addition, change in the fair value of these financial assets of ₩181 million was recognized in loss before income tax during the three month period ended March 31, 2018.
- (*2) As of January 1, 2018, available-for-sale financial assets such as marketable equity instruments amounting to ₩649,076 million were reclassified to equity investments at FVOCI. As a result of this reclassification, as at January 1, 2018, accumulated OCI of ₩85,349 million was reclassified to retained earnings and accumulated OCI was increased by ₩5,441 million due to the fair value measurement of financial assets which were stated at cost under K-IFRS No. 1039. The Company designated equity instruments that are not held for trading as FVOCI on initial application of K-IFRS No. 1109 with no recycling of amounts from OCI to profit and loss.
- (*3) As of January 1, 2018, loans and receivables of ₩1,003,462 million, including of accounts receivable - other, were reclassified from loans and receivables to debt instruments at FVTPL. Upon the initial application of K-IFRS No. 1109, the Company reclassified the debt instruments to financial instruments at FVTPL whose objectives of the business model are achieved both by collecting contractual cash flows and selling financial assets. There was no material impact on retained earnings as at January 1, 2018 as the fair values of these debt instruments were not significantly different from the carrying amounts as of December 31, 2017.

ii) Impairment of financial assets

K-IFRS No. 1109 sets out a new expected credit loss (ECL) impairment model which replaces the incurred loss model under K-IFRS No. 1039 for recognizing and measuring impairment. The new impairment model applies to financial assets measured at amortized cost, contract assets and debt investments at FVOCI, but not to investments in equity instruments. Under K-IFRS No. 1109, credit losses are recognized earlier than under K-IFRS No. 1039.

ECLs are a probability-weighted estimate of credit losses. Cred losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ii) Impairment of financial assets, Continued

At each reporting date, the Company assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

As a result of applying K-IFRS No. 1109, as of January 1, 2018, the Company recognized the impairment loss on debt instruments at an amount equal to the lifetime expected credit losses. Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt instruments at FVOCI, the loss allowance is recognized in OCI, instead of reducing the carrying amount of the asset.

iii) Hedge accounting

When initially applying K-IFRS No. 1109, the Company elected as its accounting policy to apply hedge accounting requirements under K-IFRS No. 1109. The Company designates derivatives such as currency swaps as hedging instruments to hedge the risk of variability in cash flows associated with the foreign currency debentures and borrowings. As the Company's hedging instruments as of January 1, 2018 satisfy the hedge requirements of retrospective testing (80~125%) under K-IFRS No. 1039, there is no material effect of applying K-IFRS No. 1109.

4. Trade and Other Receivables, Continued

- (3) The Company applies the simplified approach that allows the Company to estimate the loss allowance for accounts receivables - trade at an amount equal to the lifetime expected credit losses. Assessing expected credit losses under K-IFRS 1109 incorporate the analysis of forward-looking information. To make that assessment, the Company used its historical credit loss experience and classified the accounts receivable - trade by their credit risk characteristics and days overdue.

As the Company is the wireless telecommunication service provider, the Company's financial assets measured at amortized cost consist primarily of receivables from a numerous of individual customers and, accordingly no significant credit concentration risk arises.

5. Prepaid expenses

As discussed in Note 3, the Company adopted K-IFRS No. 1115, *Revenue from Contracts with Customers*, for the year beginning on January 1, 2018.

- (1) Details of prepaid expenses as of March 31, 2018 and December 31, 2017 are as follows:

<i>(In millions of won)</i>	March 31, 2018
Incremental costs of obtaining a contract	₩ 2,329,395
Commissions	537,969

The Company pays commissions to its direct retail stores and authorized dealers for wireless telecommunications services for each service contract newly obtained or renewed. The Company capitalized certain costs associated with commissions paid to sales agents to obtain new customer contracts as prepaid expenses, which the Company previously expensed. These prepaid expenses are amortized over the period that the Company expects to maintain its customers.

26. Financial risk management

(1) Financial risk management

The Company is exposed to credit risk, liquidity risk and market risk. Market risk is the risk related to the changes in market prices, such as foreign exchange rates and interest rates. The Company implements a risk management system to monitor and manage these specific risks.

The Company's financial assets consist of cash and cash equivalents, financial instruments, investment securities, and accounts receivable - trade and other. Financial liabilities consist of accounts payable - other and other liabilities, borrowings, and debentures.

1) Market risk

(i) Currency risk

The Company is exposed to currency risk mainly on exchange fluctuations on forecasted transactions and recognized assets and liabilities which are denominated in a currency other than the functional currency of the Company.

Monetary assets and liabilities denominated in foreign currencies as of March 31, 2018 are as follows:

	Assets		Liabilities	
	Foreign currencies	Won translation	Foreign currencies	Won translation
<i>(In millions of won, thousands of foreign currencies)</i>				
USD	69,428	₩ 74,045	1,446,155	₩ 1,542,324
EUR	11,601	15,220		
JPY	15,284	153		
Others		598		35
		₩ 90,016		₩ 1,542,359

In addition, the Company has entered into cross currency swaps to hedge against currency risk related to foreign currency borrowings and debentures.

As of March 31, 2018, a hypothetical change in exchange rates by 10% would have increased (reduced) the Company's income before income taxes as follows:

Edgar Filing: SK TELECOM CO LTD - Form 6-K

<i>(In millions of won)</i>		If increased by 10%	If decreased by 10%
USD	₩	7,359	(7,359)

For the three-month periods ended March 31, 2018 and 2017

26. Financial Risk Management, Continued

(1) Financial risk management, Continued

1) Market risk, Continued

(ii) Interest rate risk

The interest rate risk of the Company arises from borrowings and debentures. Since the Company's interest bearing assets are mostly fixed-interest bearing assets, the Company's revenue and operating cash flows are not influenced by the changes in market interest rates.

The Company performs various analysis of interest rate risk to reduce interest rate risk and to optimize its financing. To minimize risks arising from changes in interest rates, the Company takes various measures such as refinancing, renewal, alternative financing and hedging.

As of March 31, 2018, the floating-rate debentures amount to ₩319,950 million and the Company has entered into interest rate swaps to hedge interest rate risk related to the floating-rate debentures. As a result, income before income taxes for the three-month period ended March 31, 2018 would not have been affected by the changes in interest rates of floating-rate borrowings and debentures.

2) Credit risk

The maximum credit exposure as of March 31, 2018 and December 31, 2017 are as follows:

<i>(In millions of won)</i>	March 31, 2018	December 31, 2017
Cash and cash equivalents	₩ 1,296,063	880,541
Financial instruments	84,882	94,382
Investment securities	900	900
Accounts receivable - trade	1,518,649	1,520,209
Loans and other receivables	1,631,740	1,524,714
Derivative financial assets	12,142	30,608
	₩ 4,544,376	4,051,354

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet his/her contractual obligations.

To manage credit risk, the Company evaluates the credit worthiness of each customer or counterparty considering the party's financial information, its own trading records and other factors. Based on such information, the Company establishes credit limits for each customer or counterparty.

The Company establishes an allowance for doubtful accounts that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been expected to occur. The collective loss allowance is determined based on historical data of collection statistics for similar financial assets. Also, the Company's credit risk can arise from transactions with financial institutions related to its cash and cash equivalents, financial instruments and derivatives. To minimize such risk, the Company has a policy to deal only with financial institutions with high credit ratings. The amount of maximum exposure to credit risk of the Company is the carrying amount of financial assets as of March 31, 2018.

26. Financial Risk Management, Continued

(1) Financial risk management, Continued

3) Liquidity risk

The Company's approach to managing liquidity is to ensure that it will always maintain sufficient cash and cash equivalents balances and have enough liquidity through various committed credit lines. The Company maintains enough liquidity with the maintenance of credit lines and robust operating activities.

Contractual maturities of financial liabilities as of March 31, 2018 are as follows:

<i>(In millions of won)</i>	Carrying amount	Contractual cash flows	Less than 1 year	1 - 5 years	More than 5 years
Borrowings(*)	₩ 54,366	58,074	13,293	44,781	
Debentures(*)	5,746,664	6,881,307	1,146,391	2,530,803	3,204,113
Accounts payable - other and others	4,163,660	4,302,387	3,121,486	874,940	305,961
	₩9,964,690	11,241,768	4,281,170	3,450,524	3,510,074

The Company does not expect that the cash flows included in the maturity analysis could occur significantly earlier or at different amounts.

(*) Includes interest payables.

As of March 31, 2018, periods in which cash flows from cash flow hedge derivatives are expected to occur are as follows:

<i>(In millions of won)</i>	Carrying amount	Contractual cash flows	Less than 1 year	1 - 5 years	More than 5 years
Assets	₩ 2,769	(4,825)	7,179	25,617	(37,621)

	₩(39,109)	(47,387)	(20,333)	10,567	(37,621)

(2) Capital management

The Company manages its capital to ensure that it will be able to continue as a business while maximizing the return to shareholders through the optimization of its debt and equity structure. The overall capital management strategy of the Company is the same as that of the Company as of and for the year ended December 31, 2017.

The Company monitors its debt-equity ratio as a capital management indicator. This ratio is calculated as total liabilities divided by total equity both from the financial statements.

The above information does not include fair values of financial liabilities of which fair values have not been measured as carrying amounts are reasonable approximation of fair values.

Available-for-sale financial assets amounting to ₩135,344 million as of December 31, 2017 are measured at cost in accordance with K-IFRS 1039 since they are equity instruments which do not have quoted price in an active market for the identical instruments and for which fair value cannot be reliably measured using other valuation methods.

Fair value of the financial instruments that are traded in an active market (Financial assets at FVOCI) is measured based on the bid price at the end of the reporting date.

The Company uses various valuation methods for determination of fair value of financial instruments that are not traded in an active market. Derivative financial contracts and long-term liabilities are measured using the discounted present value methods. Other financial assets are determined using the methods such as discounted cash flow and market approach. Inputs used to such valuation methods include swap rate, interest rate, and risk premium, and the Company performs valuation using the inputs which are consistent with natures of assets and liabilities measured.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed consolidated interim financial statements of SK Telecom Co., Ltd. and its subsidiaries (the Group), which comprise the condensed consolidated statement of financial position as of March 31, 2018, the related condensed consolidated statements of income, comprehensive income, changes in equity and cash flows for the three-month periods ended March 31, 2018 and 2017, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No.1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034, *Interim Financial Reporting*.

Emphasis of matter

As a matter that does not have an impact on our review conclusion, we highlight the attention of the users of the above-mentioned financial statements of the Group for the following matter described in Note 3 to the condensed consolidated financial statements. The Group has initially adopted K-IFRS No. 1109 and 1115 for the year beginning on January 1, 2018, and the Group has taken an exemption not to restate the condensed consolidated financial statements as of December 31, 2017 or for the three-month period ended March 31, 2017, presented for comparative

purposes, in accordance with transition requirements. The financial impacts of applying K-IFRS No. 1109 and 1115 are discussed in Note 3.

Other matters

The consolidated statement of financial position of the Group as of December 31, 2017, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 23, 2018, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2017, presented for comparative purposes, is consistent, in all material respects, with the audited consolidated financial statements from which it has been derived.

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

2. Basis of Preparation

- (1) Statement of compliance

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRS), as prescribed in the Act on External Audits of Stock Companies.

These condensed consolidated interim financial statements were prepared in accordance with K-IFRS No. 1034, *Interim Financial Reporting*, as part of the period covered by the Group's K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since December 31, 2017. These condensed consolidated interim financial statements do not include all of the disclosures required for full annual financial statements.

2. Basis of Preparation, Continued

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as of and for the year ended December 31, 2017 except significant judgments and key sources of estimation uncertainty related to the K-IFRS 1115 and 1109 that are described in Note 3.

2) Fair value measurement

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Group has established policies and processes with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executives.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, are used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements are included in Note 28.

3. Significant Accounting Policies

The significant accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as of and for the year ended December 31, 2017, except for the following changes in accounting policies described below. The following changes in accounting policies are also expected to be reflected in the Group consolidated financial statements as at and for the year ending December 31, 2018.

(1) Changes in accounting policies

The Group has initially adopted K-IFRS No. 1115, *Revenue from Contracts with Customers* and K-IFRS No. 1109, *Financial Instruments* from January 1, 2018. A number of other amended standards are effective from January 1, 2018 but they do not have a material effect on the Group's condensed consolidated interim financial statements.

1) K-IFRS No. 1115, *Revenue from Contracts with Customers*

K-IFRS No. 1115, *Revenue from contracts with customers*, establishes a comprehensive framework for determining whether, how much and when revenue is recognized. K-IFRS No. 1115 replaced the revenue recognition guidance, including K-IFRS No. 1018 *Revenue*, K-IFRS No. 1011, *Construction Contracts*, K-IFRS No. 2031, *Revenue: Barter Transactions Involving Advertising Services*, K-IFRS No. 2113, *Customer Loyalty Programs*, K-IFRS No. 2115, *Agreements for the Construction of Real Estate* and K-IFRS No. 2118, *Transfers of Assets from Customers*.

The Group has adopted K-IFRS No. 1115, *Revenue from contracts with customers*, from January 1, 2018 using the cumulative effect method with the effect of initially applying this standard as an adjustment to the opening balance of retained earnings as at January 1, 2018. The Group applied K-IFRS No. 1115 retrospectively only to contracts that are not completed contracts at the date of initial application, which is January 1, 2018 using the practical expedient permitted by K-IFRS No.1115.

i) Identification of performance obligations in the contract

A substantial portion of the Group's revenue is generated from providing wireless telecommunications services. K-IFRS No. 1115 requires the Group to evaluate goods or services promised to customers to determine if there are performance obligations other than wireless telecommunications service that should be accounted for separately. In the case that the Group provides the wireless telecommunications service and sells a handset together to one customer, the Group allocates considerations from the customer between handset sale revenue and wireless telecommunications service revenue. The handset sales revenue is recognized when handset is delivered and the wireless telecommunications service revenue is recognized as revenue over the period of the contract term as stated in the subscription contract.

(1) Changes in accounting policies, Continued

1) K-IFRS No. 1115, *Revenue from Contracts with Customers*, Continued

ii) Allocate the transaction price to the separate performance obligations

In accordance with K-IFRS No. 1115, the Group allocates the transaction price to each performance obligation in a contract in proportion to their stand-alone selling price when the Group provides the wireless telecommunications service and sells a handset together to one customer. The Group used adjusted market assessment method for estimating the stand-alone selling price. However, in some circumstances, the Group used expected cost plus a margin approach.

As a result of applying K-IFRS No. 1115, the Group recognized contract assets of ₩142,596 million which is the additional transaction price allocated to revenue from sales of handset as at January 1, 2018.

iii) Incremental costs to acquire a contract

The Group pays commissions to its direct retail stores and authorized dealers in connection with acquiring service contracts. The commissions paid to these agents historically constituted a significant portion of the Group's operating expenses. These commissions would not have been paid if there have been no binding contracts with subscribers. K-IFRS No. 1115 requires the Group to capitalize certain costs associated with commissions paid to sales agents to obtain new customer contracts and amortize them over the expected contract periods with customers. As a result of applying K-IFRS No. 1115, the Group recognized ₩2,389,097 million of prepaid expenses as at January 1, 2018.

iv) Contract liability

Upon adoption of K-IFRS No. 1115, the Group reclassified the receipts in advance and unearned revenue amounting to ₩109,555 million that are related to prepaid rate plans and customer loyalty program, respectively, to contract liabilities as at January 1, 2018.

v) Impact of adopting K-IFRS No. 1115 on the condensed consolidated interim financial statements

If K-IFRS No. 1018 were applied on the Group's condensed consolidated statements of financial position as of March 31, 2018, prepaid expenses, long-term prepaid expenses, contract assets and long-term contract assets would be

decreased by ₩1,641,693 million, ₩732,493 million, ₩98,524 million, ₩26,638 million, respectively, while accounts receivable - trade would be increased by ₩4,270 million. As a result, total assets would be decreased by ₩2,495,078 million. In addition,, total liabilities would be decreased by ₩606,095 million, with decrease of contract liabilities, long-term contract liabilities and deferred tax liabilities by ₩117,932 million, ₩18,401 million and ₩583,678 million , respectively, while other liabilities such as receipts in advance and unearned revenues would be increased by ₩113,916 million. In relation to these changes in assets and liabilities, retained earnings would be decreased by ₩1,888,983 million.

v) Impact of adopting K-IFRS No. 1115 on the condensed consolidated interim financial statements, Continued

If K-IFRS No. 1018 were applied on the Group's condensed consolidated statements of income for the three-month period ended March 31, 2018, revenue and advertising expense would be increased by ₩39,114 million and ₩13,888 million, respectively, while commissions expense would be decreased by ₩9,528 million. Operating profit and profit before income tax would be increased by ₩34,008 million with an increase in operating expenses by ₩5,106 million. As a result, profit for the period would be increased by ₩23,228 million with an increase in income tax expense of ₩10,780 million.

When compared to K-IFRS No. 1018, the adoption of K-IFRS No. 1115 did not have material impact on the Group's condensed consolidated statement of cash flows for the three-month period ended March 31, 2018.

2) K-IFRS No. 1109, *Financial Instruments*

K-IFRS No. 1109 sets out requirements for recognizing and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standards replaces K-IFRS No. 1039 *Financial Instruments: Recognition and Measurement*. The Group adopted K-IFRS No. 1109, *Financial Instruments*, from January 1, 2018, and the Group has taken an exemption not to restate the financial statements for prior years in accordance with the transition requirements.

The following table explains the impact of transition to K-IFRS No. 1109 on the opening balance of reserves and retained earnings as at January 1, 2018.

2) K-IFRS No. 1109, Financial Instruments, Continued

i) Classification of financial assets and financial liabilities

K-IFRS No. 1109 largely retains the existing requirements in K-IFRS No. 1039 for the classification and measurement of financial liabilities. However, it eliminates the previous K-IFRS No. 1039 categories for financial assets of held to maturity, available for sale, loans, and receivables.

Under K-IFRS No. 1109, on initial recognition, a financial asset is classified as measured at: amortized cost; FVOCI-debt investment; FVOCI-equity investment; or FVTPL. The classification of financial assets under K-IFRS No. 1109 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. If a contract contains embedded derivatives and the host is an asset within the scope of K-IFRS No. 1109, then such embedded derivatives are not separated.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

it is held within a business model whose objective is to hold assets to collect contractual cash flow; and

its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income (OCI). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

A financial asset (unless it is an account receivable - trade without a significant financing component that is initially measured at the transaction price) is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition.

i) Classification of financial assets and financial liabilities, Continued

The following accounting policies apply to the subsequent measurement of financial assets.

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.
Financial assets at amortized cost	These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

2) K-IFRS No. 1109, *Financial Instruments*, Continued

i) Classification of financial assets and financial liabilities, Continued

The following table explains the original measurement categories under K-IFRS No. 1039 and the changes in measurement categories under K-IFRS No. 1109 for each class of the Group's financial assets as at January 1 2018, Continued.

(*1) As of January 1, 2018, available-for-sale financial assets such as beneficiary certificates and equity investments amounting to ₩205,435 million were reclassified to financial assets measured at FVTPL. In addition, as derivatives embedded in contracts where the host is a financial asset in the scope of K-IFRS No. 1109 are never separated, the available-for sale financial assets related to the redeemable convertible preferred shares of ₩15,342 million and derivative financial assets of ₩222,257 million were reclassified to financial assets measured at FVTPL. As the contractual terms of these assets do not give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, these assets were not designated as financial assets measured at amortized cost. As a result of this reclassification, as at January 1, 2018, accumulated OCI of ₩5,336 million was reclassified to retained earnings and, due to its new classification to financial assets measured at FVTPL, retained earnings was decreased by ₩4,389 million. In addition, change in the fair value of these financial assets of ₩8,112 million was recognized in profit before income tax during the three-month period ended March 31, 2018.

(*2) As of January 1, 2018, available-for-sale financial assets amounting to ₩713,613 million including marketable equity instruments were reclassified to equity investments at FVOCI and debt instrument at FVOCI of ₩713,399 million and ₩214 million, respectively. As a result of this reclassification, as at January 1, 2018, retained earnings of ₩(-)90,322 million was reclassified to accumulated OCI and accumulated OCI was increased by ₩5,441 million due to the fair value measurement of financial assets which were stated at cost under K-IFRS No. 1039. The Group designated equity instruments that are not held for trading as FVOCI on initial application of K-IFRS No. 1109 with no recycling of amounts from OCI to profit and loss.

(*3)

As of January 1, 2018, loans and receivables of ₩1,074,063 million, including of accounts receivable - other, were reclassified from loans and receivables to debt instruments at FVTPL. Upon the initial application of K-IFRS No. 1109, the Group reclassified the debt instruments to financial instruments at FVTPL whose objectives of the business model are not achieved both by collecting contractual cash flows or selling financial assets. There was no material impact on retained earnings as at January 1, 2018 as the fair values of these debt instruments were not significantly different from the carrying amounts as of December 31, 2017.

ii) Impairment of financial assets

K-IFRS No. 1109 sets out a new expected credit loss (ECL) impairment model which replaces the incurred loss model under K-IFRS No. 1039 for recognizing and measuring impairment. The new impairment model applies to financial assets measured at amortized cost, contract assets and debt investments at FVOCI, but not to investments in equity instruments. Under K-IFRS No. 1109, credit losses are recognized earlier than under K-IFRS No. 1039.

3. Significant Accounting Policies, Continued

(1) Changes in accounting policies, Continued

2) K-IFRS No. 1109, *Financial Instruments*, Continued

ii) Impairment of financial assets, Continued

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

At each reporting date, the Group assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

As a result of applying K-IFRS No. 1109, as of January 1, 2018, the Group recognized the ₩13,049 million of impairment loss on debt instruments at an amount equal to the lifetime expected credit losses. Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt instruments at FVOCI, the loss allowance is recognized in OCI, instead of reducing the carrying amount of the asset.

iii) Hedge accounting

When initially applying K-IFRS No. 1109, the Group elected as its accounting policy to apply hedge accounting requirements under K-IFRS No. 1109. The Group designates derivatives such as currency swaps as hedging instruments to hedge the risk of variability in cash flows associated with the foreign currency debentures and borrowings. As the Group's hedging instruments as of January 1, 2018 satisfy the hedge requirements of retrospective testing (80~125%) under K-IFRS No. 1039, there is no material effect of applying K-IFRS No. 1109.

(2) Standards issued but not yet effective

The following new standard is effective for annual periods beginning after January 1, 2019 and earlier application is permitted; however, the Group has not early adopted the following new standard in preparing the accompanying condensed consolidated interim financial statements as of and for the three-month period ended March 31, 2018.

1) K-IFRS No. 1116, *Leases*

The Group currently plans to apply K-IFRS No.1116 in the period beginning on January 1, 2019 and to assess the financial impact on its consolidated financial statements resulting from the adoption of K-IFRS No. 1116 by December 31, 2018. The assessment results will be disclosed in its annual financial statements for the year ending December 31, 2018. As of March 31, 2018, there have been no significant changes related to the financial impact assessment of adopting K-IFRS No. 1116 which was disclosed in the Group's consolidated financial statements as of and for the year ended December 31, 2017.

4. Operating Segments

The Group's operating segments have been identified to be each business unit, by which the Group provides independent services and goods. The Group's reportable segments are cellular, which provides wireless voice and data transmission services, sales of wireless devices, IoT solutions and platform services; fixed-line telecommunication, which provides fixed-line telephone services, broadband Internet services, advanced media platform services (including IPTV) and business communications services; e-commerce, which runs open marketplace platform, 11st, and other commerce solutions; and other businesses, which include online portal service, hardware business and other operations that do not meet the quantitative thresholds to be separately considered reportable segments.

	₩ 369,332	9,217	(10,022)	9,997	378,524

- (*) The Group writes off the trade and other receivables when contractual payments are more than 5 years past due, or for reasons such as the counterparty's shut-down or liquidation.

- (3) The Group applies the simplified approach that allows the Group to estimate the loss allowance for accounts receivables - trade at an amount equal to the lifetime expected credit losses. Assessing expected credit losses under K-IFRS 1109 incorporate the analysis of forward-looking information. To make that assessment, the Group used its historical credit loss experience and classified the accounts receivable - trade by their credit risk characteristics and days overdue.

As the Group is the wireless telecommunication services provider, the Group's financial assets measured at amortized cost consist primarily of receivables from numerous individual customers and, accordingly, no significant credit concentration risk arises.

(2) Incremental costs of obtaining a contract

Incremental costs of obtaining a contract that are capitalized as of March 31, 2018 and the related amortization recognized as commissions during the three-month period ended March 31, 2018 are as follows:

<i>(In millions of won)</i>	March 31, 2018
Incremental costs of obtaining a contract	₩ 2,374,187
Commissions	580,650

The Group pays commissions to its direct retail stores and authorized dealers for wireless telecommunications services for each service contract newly obtained or renewed. The Group capitalized certain costs associated with commissions paid to sales agents to obtain new customer contracts as prepaid expenses, which the Group previously expensed. These prepaid expenses are amortized over the period that the Group expects to maintain its customers.
