Economic review

Economic activity in the U.S. was mixed during the six months ended October 31, 2018 (the reporting period). Looking back, the U.S. Department of Commerce reported that first quarter 2018 U.S. gross domestic product (GDP growth was 2.2%. GDP growth then accelerated to 4.2% during the second quarter of 2018 the strongest reading since the third quarter of 2014. Finally, the U.S. Department of Commerce s second reading for third quarter 2018 GDP growth released after the reporting period ended was 3.5%. The deceleration in GDP growth in the third quarter of 2018 reflected a downturn in exports and decelerations in nonresidential fixed investment and personal consumption expenditures. Imports increased in the third quarter after decreasing in the second. These movements were partly offset by an upturn in private inventory investment.

Job growth in the U.S. was solid overall and supported the economy during the reporting period. As reported by the U.S. Department of Labor, when the reporting period ended on October 31, 2018, the unemployment rate was 3.7%, versus 3.8% when the period began. October 2018 s reading equaled the lowest unemployment rate since 1969. However, the percentage of longer-term unemployed rose during the reporting period. In October 2018, 22.5% of Americans looking for a job had been out of work for more than six months, versus 19.4% when the period began.

RISKS: The Fund is a diversified closed-end management investment company designed primarily as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program and, due to the uncertainty inherent in all investments, there can be no assurance that the Fund will achieve its investment objective. The Fund s common stock is traded on the New York Stock Exchange. Similar to stocks, the Fund s share price will fluctuate with market conditions and, at the time of sale, may be worth more or less than the original investment. Shares of closed-end funds often trade at a discount to their net asset value. Diversification does not assure against market loss. The Fund s investments are subject to a number of risks, such as credit risk, inflation risk and interest rate risk. As interest rates rise, bond prices fall, reducing the value of the Fund s holdings. The Fund may use derivatives, such as options and futures, which can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance. High-yield bonds, known as junk bonds, involve greater credit and liquidity risks than investment grade bonds. Foreign securities are subject to certain risks not associated with domestic investing, such as currency fluctuations and changes in political and economic conditions which could result in significant fluctuations. These risks are magnified in emerging markets. The Fund is also permitted purchases of equity securities. Equity securities generally have greater price volatility than fixed income securities. Leverage may result in greater volatility of NAV and the market price of common shares and increases a shareholder s risk of loss.

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.
