three world-class investment management groups-- Franklin, Templeton and Mutual Series.

SPECIALIZED EXPERTISE

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

FRANKLIN. Founded in 1947, Franklin is a recognized leader in fixed income investing and also brings expertise in growth- and value-style U.S. equity investing.

TEMPLETON. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with offices in over 25 countries, Templeton offers investors a truly global perspective.

MUTUAL SERIES. Founded in 1949, Mutual Series is dedicated to a unique style of value investing, searching aggressively for opportunity among what it believes are undervalued stocks, as well as arbitrage situations and distressed securities.

TRUE DIVERSIFICATION

Because our management groups work independently and adhere to different investment approaches, Franklin, Templeton and Mutual Series funds typically have distinct portfolios. That's why our funds can be used to build truly diversified allocation plans covering every major asset class.

RELIABILITY YOU CAN TRUST

At Franklin Templeton Investments, we seek to consistently provide investors with exceptional risk-adjusted returns over the long term, as well as the reliable, accurate and personal service that has helped us become one of the most trusted names in financial services.

Franklin Templeton
Limited Duration Income Trust

YOUR FUND'S GOALS AND MAIN INVESTMENTS: Franklin Templeton Limited Duration Income Trust seeks to provide high, current income, with a secondary objective of capital appreciation to the extent it is possible and consistent with the Fund's primary objective, through a portfolio consisting primarily of high yield corporate bonds, floating rate bank loans, and mortgage- and other asset-backed securities.

Dear Shareholder:

We are pleased to bring you Franklin Templeton Limited Duration Income Trust's semiannual report for the period ended September 30, 2009.

PERFORMANCE OVERVIEW

For the six months under review, Franklin Templeton Limited Duration Income Trust had cumulative total returns of +30.65% based on net asset value and +37.49% based on market price. Net asset value increased from \$10.15 per share on March 31, 2009, to \$12.76 at period-end, and the market price rose from \$8.92 to \$11.76 over the same time. You can find the Fund's performance data in the Performance Summary on page 7.

ECONOMIC AND MARKET OVERVIEW

During the six-month period ended September 30, 2009, the U.S. economy began to show signs of recovery as many of the forces that had hindered the

economy dissipated. Financial markets stabilized in response to the federal stimulus package and the Federal Reserve Board's (Fed's) interventions, and investor risk appetite improved. In March, many investors reentered the stock market and started a rally that brought the major indexes off this cycle's lows. In 2009's third quarter, a number of blue-chip companies released reports that showed better-than-expected profits resulting from cost-cutting measures. Manufacturing activity improved over the period. Consumer confidence rebounded in the second quarter of 2009 due to improved expectations. Economic activity as measured by gross domestic product (GDP) improved from earlier in 2009. GDP was an annualized -0.7% in 2009's second quarter and an estimated annualized 3.5% in the third quarter. These positive signs, however, were constrained by a rising unemployment rate, which reached 9.8% by period-end, a 26-year high.⁽¹⁾ Despite improving economic data, most industries eliminated jobs.

As economic conditions improved, oil prices increased from \$49 per barrel in March to \$70 in September, still well below 2008 highs. September's inflation rate was an annualized -1.3%.⁽¹⁾ Core inflation, which excludes food and energy costs, rose at a 1.5% annualized rate, which was within the Fed's informal target range of 1.5% to 2.0%.⁽¹⁾ The core personal consumption expenditures price index reported a 12-month increase of 1.3%.⁽²⁾

During the period under review, an improving economy and decelerating inflation prompted policymakers to maintain low interest rates and discontinue certain stimulus plans. Noting it now believes the recession has ended, the Fed left the

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

federal funds target rate unchanged at a range of 0% to 0.25% for an extended period and began to lay the groundwork for an eventual tightening of monetary policy. Near period-end, the Fed assessed which support programs it created or expanded could be phased out.

Most Treasury prices fell during the period, and fixed income spreads narrowed relative to Treasury yields due to reduced market turbulence and increased risk tolerance. The spread between two-year and 10-year Treasury yields rose to 236 basis points (100 basis points equal one percentage point) at the end of September from 190 basis points at the beginning of the reporting period. The two-year Treasury bill yield rose from 0.81% to 0.96% over the six-month period, while the 10-year Treasury note yield rose from 2.71% to 3.31%.

INVESTMENT STRATEGY

We invest in a diversified mix of fixed income securities, predominantly high yield corporate bonds, senior secured floating rate bank loans, and mortgage- and other asset-backed securities. Our top-down analysis of macroeconomic trends combined with a bottom-up fundamental analysis of market sectors, industries and issuers drives our investment process. We seek to maintain a limited duration, or interest rate sensitivity, to moderate the impact that fluctuating interest rates might have on the Fund's fixed income portfolio. Within the corporate bond and bank loan sectors, we seek securities trading at reasonable valuations from issuers with characteristics such as strong market positions, stable cash flows, reasonable capital structures, supportive asset values, strong sponsorship and improving credit fundamentals. In the mortgage- and other asset-backed securities sector, we look to capture an attractive income stream and total return through our analysis of security prepayment assumptions, pricing inefficiencies and underlying collateral characteristics.

MANAGER'S DISCUSSION

The period under review was marked by a remarkable recovery in most financial markets, including those that represent the majority of the Fund's investments. Buoyed by hopes that government stimulus plans would cause the desired effect, the markets seized on an improvement in the rate of economic decline, if not on economic growth itself, to propel securities prices higher. First and second fiscal quarter corporate earnings also came in ahead of reduced expectations, as cost cutting helped offset a decline in revenues. This positive earnings news, along with the forward-looking nature of the stock market, helped to propel the Standard & Poor's 500 Index (S&P 500) up 34.02% for the six-month period.⁽³⁾ Conversely, U.S. Treasury returns were negative, as expectations for an improving economy and the resulting fears of inflationary pressures drove up the 10-year Treasury yield. Money market yields remained near zero as the government kept short-term rates low to provide further economic stimulus. In this environment, investors moved into riskier asset classes in search of yield and returns. Accordingly, high yield corporate bonds and leveraged loans generated impressive returns. The more conservative mortgage-backed securities (MBS) market generated positive, if more muted, returns. During the period under review, we increased our holdings of high yield corporate bonds, partially offset by a reduction in holdings of investment grade corporate bonds. We reduced our exposure to MBS, while our exposure to bank loans remained relatively unchanged.

HIGH YIELD CORPORATE BONDS

High yield corporate bonds enjoyed an explosive rebound, with the Credit Suisse (CS) High Yield Index returning +37.20% as concerns about deteriorating

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

fundamentals and a rise in default levels gave way to expectations of an economic recovery. (4) Actual defaults, while elevated from prerecession levels, proved to be more benign than expected. In addition, capital markets reopened and allowed companies to refinance debt to extend maturities or remove onerous covenants, which reduced future default expectations. Highlighting the high yield sector's improvement was the fact that spreads over Treasuries fell by nearly half during the period, from 14.95 percentage points to 7.64 percentage points. At period-end, the spread level was still higher than the historical average of approximately six percentage points since 1990. (5) Given what we believed were still favorable valuations and attractive investment opportunities particularly in the new-issue market, we increased the Fund's exposure to high yield corporate bonds during the period under review.

FLOATING RATE BANK LOANS

For the six months ended September 30, 2009, the bank loan asset class rallied strongly and returned +30.42%, as measured by the CS Leveraged Loan Index. (6) The loan market's strength was driven by loan repayments from net proceeds raised from new high yield bond and equity issuance that gave investors more cash. As liquidity and credit market conditions improved, investors saw value in the lower-rated loans (rated CCC and below), and this category rallied the most, including those loans closest to covenant or payment default. As a result, secondary loan prices rebounded from 75.2 cents on the dollar at the beginning of the period to 91.5 at period-end. (7) The average discounted spread to maturity narrowed from 991 basis points to 487 basis points. (7)

4 | Semiannual Report

Amendment activity continued to increase during the period, including traditional covenant-changing amendments and a new type of amendment known as "amend and extend." An "amend and extend" transaction allowed an issuer to extend the maturity on existing term loans in exchange for higher fees and pricing, thereby pushing out near-term maturities and paving the way for a comprehensive refinancing when better market conditions return. This exchange improved the loan's risk/reward profile, which often led to price increases in the secondary market. The increased amendment activity also resulted in a slower increase in the overall default rate.

MORTGAGE- AND OTHER ASSET-BACKED SECURITIES

During the six months under review, the overall MBS market delivered positive results, but lagged the robust performance of the high yield corporate bond and bank loan sectors. During the period, the Fed's \$1.25 trillion agency mortgage purchase program provided support to the agency mortgage-backed securities

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

market. The Fed introduced the program, first announced in November 2008, to facilitate mortgage credit availability during the financial downturn, and it is expected to conclude by March 31, 2010. As the end of the program approaches, the market has begun to focus on the Fed's strategy to exit the program, which created a less favorable technical environment.

The Fund's coupon allocation remained relatively constant over the period. The increase in Treasury and mortgage rates, along with declining home prices, loss of home equity and tighter underwriting standards, reduced the prospect for prepayment risk for higher coupon MBS. Our heaviest MBS allocation was to coupons in the 5.0% through 6.5% range. We continued to invest in bonds from higher quality securitized sectors as we found fundamentally sound bonds at what we considered attractive yields in these markets, and we remained allocated to higher quality asset-backed securities and commercial MBS.

Performance Summary as of 9/30/09

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities. Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not reflect any sales charges paid at inception or brokerage commissions paid on secondary market purchases. The performance table does not reflect any taxes that a shareholder would pay on Fund dividends, capital gains distributions, if any, or any realized gains on the sale of Fund shares.

ENDNOTES

INTEREST RATE MOVEMENTS AND MORTGAGE PREPAYMENTS WILL AFFECT THE FUND'S SHARE PRICE AND YIELD. THE RISKS ASSOCIATED WITH HIGHER YIELDING, LOWER-RATED SECURITIES INCLUDE HIGHER RISK OF DEFAULT AND LOSS OF PRINCIPAL.

- (1.) Figures are for common shares. As of 9/30/09, the Fund had leverage in the amount of 31.68% of the Fund's total assets. The Fund employs leverage through the issuance of Auction Preferred Shares and purchase of Mortgage Dollar Rolls. The use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares). The cost of leverage rises and falls with changes in short-term interest rates. Such increases/decreases in the cost of the Fund's leverage may be offset by increased/decreased income from the Fund's floating rate investments.
- (2.) Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Six-month return has not been annualized.
- (3.) Assumes reinvestment of distributions at net asset value.
- (4.) Assumes reinvestment of distributions based on the dividend reinvestment plan.
- (5.) Distribution rate is based on an annualization of the Fund's 7.6 cent per share September dividend and the NYSE Amex closing price of \$11.76 on 9/30/09.

Dividend Reinvestment Plan

The Fund's Dividend Reinvestment Plan (Plan) offers you a prompt and simple way to reinvest dividends and capital gain distributions (Distributions) in shares of the Fund. PNC Global Investment Servicing (Agent), P.O. Box 43027, Providence, RI 02940-3027, will act as your Agent in administering the Plan. The Agent will open an account for you under the Plan in the same name as your outstanding shares are registered. The complete Terms and Conditions of the Dividend Reinvestment Plan are contained in the Fund's Dividend Reinvestment Plan Brochure. A copy of that Brochure may be obtained from the Fund at the address on the back cover of this report.

You are automatically enrolled in the Plan unless you elect to receive Distributions in cash. If you own shares in your own name, you should notify the Agent, in writing, if you wish to receive Distributions in cash.

If the Fund declares a Distribution, you, as a participant in the Plan, will automatically receive an equivalent amount of shares of the Fund purchased on your behalf by the Agent.

If on the payment date for a Distribution, the net asset value per share is equal to or less than the market price per share plus estimated brokerage commissions, the Agent shall receive newly issued shares, including fractions, from the Fund for your account. The number of additional shares to be credited shall be determined by dividing the dollar amount of the Distribution by the greater of the net asset value per share on the payment date, or 95% of the then current market price per share.

If the net asset value per share exceeds the market price plus estimated brokerage commissions on the payment date for a Distribution, the Agent (or a broker-dealer selected by the Agent) shall try, for a purchase period of 30 days, to apply the amount of such Distribution on your shares (less your pro rata share of brokerage commissions incurred) to purchase shares on the open market. The weighted average price (including brokerage commissions) of all shares it purchases shall be your allocated price per share. If, before the Agent has completed its purchases, the market price plus estimated brokerage commissions exceeds the net asset value of the shares as of the payment date, the purchase price the Agent paid may exceed the net asset value of the shares, resulting in the acquisition of fewer shares than if such Distribution had been paid in shares issued by the Fund. Participants should note that they will not be able to instruct the Agent to purchase shares at a specific time or at a specific price. The Agent may make open-market purchases on any securities exchange where shares are traded, in the over-the-counter market or in negotiated transactions, and may be on such terms as to price, delivery and otherwise as the Agent shall determine.

The market price of shares on a particular date shall be the last sales price on NYSE Amex, or, if there is no sale on the exchange on that date, then the mean between the closing bid and asked quotations on the exchange on such date. The net asset value per share on a particular date shall be the amount most recently calculated by or on behalf of the Fund as required by law.

The Agent shall at all times act in good faith and agree to use its best efforts within reasonable limits to ensure the accuracy of all services performed under this agreement and to comply with applicable law, but assumes no responsibility and shall not be liable for loss or damage due to errors unless such error is caused by the Agent's negligence, bad faith, or willful misconduct or that of its employees. Your uninvested funds held by the Agent will not bear interest. The Agent shall have no responsibility for the value of shares acquired. For the purpose of cash investments, the Agent may commingle your funds with those of other participants in the same Fund.

There is no direct charge to participants for reinvesting Distributions, since the Agent's fees are paid by the Fund. However, when shares are purchased in the open market, each participant will pay a pro rata portion of any brokerage commissions incurred. If you elect by notice to the Agent to have it sell part or all of your shares and remit the proceeds, the Agent will deduct brokerage commissions from the proceeds.

The automatic reinvestment of Distributions does not relieve you of any taxes that may be payable on Distributions. In connection with the reinvestment of Distributions, shareholders generally will be treated as having received a Distribution equal to the cash Distribution that would have been paid.

The Agent will forward to you any proxy solicitation material and will vote any shares so held for you first in accordance with the instructions set forth on proxies you return to the Fund, and then with respect to any proxies you do not return to the Fund in the same portion as the Agent votes proxies the participants return to the Fund.

As long as you participate in the Plan, the Agent will hold the shares it has acquired for you in safekeeping, in its name or in the name of its nominee. This convenience provides added protection against loss, theft or inadvertent destruction of certificates. However, you may request that a certificate representing your Plan shares be issued to you. Upon your written request, the Agent will deliver to you, without charge, a certificate or certificates for the full shares. The Agent will send you a confirmation of each acquisition made for your account as soon as practicable, but not later than 60 days after the acquisition date. Although from time to time you may have an undivided fractional interest in a share of the Fund, no certificates for a fractional share will be issued.

Distributions on fractional shares will be credited to your account. If you terminate your account under the Plan, the Agent will adjust for any such undivided fractional interest in cash at the market value of shares at the time of termination.

You may withdraw from the Plan at any time, without penalty, by notifying the Agent in writing at the address above or by telephone at (800) 331-1710. Such termination will be effective with respect to a Distribution if the Agent receives your notice prior to the Distribution record date. The Agent or the

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

Fund may terminate the Plan upon notice to you in writing mailed at least 30 days prior to any record date for the payment of any Distribution. Upon any termination, the Agent will issue, without charge, stock certificates for all full shares you own and will convert any fractional shares you hold at the time of termination to cash at current market price and send you a check for the proceeds.

The Fund or the Agent may amend the Plan. You will receive written notice at least 30 days before the effective date of any amendment.

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Franklin Templeton Limited Duration Income Trust (Fund) is registered under the Investment Company Act of 1940, as amended, (1940 Act) as a closed-end investment company.

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

Equity and other securities listed on a securities exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Over-the-counter securities and listed securities for which there is no reported sale are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities. Investments in open-end mutual funds are valued at the closing net asset value.

Corporate debt securities, government securities, mortgage backed securities, asset-backed securities, collateralized debt obligations and other debt securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from bond dealers, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services may use valuation models or matrix pricing which considers information with respect to comparable bond and note transactions, quotations from bond dealers, or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves, to determine current value. Debt securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the date that the values of the foreign debt securities are determined.

Senior secured corporate loans with floating or variable interest rates generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from loan dealers and other financial institutions, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services use independent market quotations from loan dealers or financial institutions and may incorporate valuation methodologies that consider multiple bond characteristics such as dealer quotes, issuer type, coupon, maturity, weighted average maturity, interest rate spreads and yield curves, cash flow and credit risk/quality analysis, to determine current value.

A. SECURITY VALUATION (CONTINUED)

The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. Methods for valuing these securities may include: fundamental analysis based upon the underlying investment book value, anticipated future cash flows, market changes in comparable or similar

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

securities, matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. Due to the inherent uncertainty of valuations of such securities, the fair values may differ significantly from the values that would have been used had a ready market for such investments existed. Occasionally, events occur between the time at which trading in a security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a portfolio security held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services. All security valuation procedures are approved by the Fund's Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. SECURITIES PURCHASED ON A WHEN-ISSUED, DELAYED DELIVERY AND TBA BASIS

The Fund may purchase securities on a when-issued, delayed delivery and to-be-announced (TBA) basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Fund will generally purchase these securities with the intention of holding the securities, it may sell the securities before the settlement date. Sufficient assets have been segregated for these securities.

D. DERIVATIVE FINANCIAL INSTRUMENTS

The Fund may invest in derivative financial instruments (derivatives) in order to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives may contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and the potential for market movements which may expose the Fund to gains or losses in excess of the amounts shown on the Statement of Assets and Liabilities.

Derivatives are marked to market daily based upon quotations from market makers or the Fund's independent pricing services and the Fund's net benefit or obligation under the contract, as measured by the fair market value of the contract, is included in net assets. Realized gain and loss and unrealized appreciation and depreciation on these contracts for the period are included in the Statement of Operations.

The Fund enters into forward exchange contracts in order to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency for a specific exchange rate on a future date.

See Note 10 regarding other derivative information.

E. MORTGAGE DOLLAR ROLLS

The Fund may enter into mortgage dollar rolls, typically on a TBA basis. Mortgage dollar rolls are agreements between the Fund and a financial institution to simultaneously sell and repurchase mortgage-backed securities at a future date. Gains or losses are realized on the initial sale, and the difference between the repurchase price and the sale price is recorded as an unrealized gain or loss to the fund upon entering into the mortgage dollar roll. In addition, the Fund may invest the cash proceeds that are received from the initial sale. During the period between the

E. MORTGAGE DOLLAR ROLLS (CONTINUED)

sale and repurchase, the Fund is not entitled to principal and interest paid on the mortgage backed securities. The risks of mortgage dollar roll transactions include the potential inability of the counterparty to fulfill its obligations.

The Fund is investing in mortgage dollar rolls as an alternate form of leverage. As a result, the mortgage dollar rolls are considered indebtedness or a "senior security" for purposes of the asset coverage requirements under the 1940 Act.

F. SENIOR FLOATING RATE INTERESTS

Senior secured corporate loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR). Senior secured corporate loans often require prepayment of principal from excess cash flows or at the discretion of the borrower. As a result, actual maturity may be substantially less than the stated maturity.

Senior secured corporate loans in which the Fund invests are generally readily marketable, but may be subject to some restrictions on resale.

G. INCOME TAXES

No provision has been made for U.S. income taxes because it is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code and to distribute to shareholders substantially all of its taxable income and net realized gains.

The Fund has reviewed the tax positions, taken on federal income tax returns, for each of the three open tax years and as of September 30, 2009, and has determined that no provision for income tax is required in the Fund's financial statements.

H. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Facility fees are recognized as income over the expected term of the loan. Dividend income is recorded on the ex-dividend date. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with accounting principles generally accepted in the United States of America. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact

on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

I. ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

J. GUARANTEES AND INDEMNIFICATIONS

Under the Fund's organizational documents, its officers and trustees are indemnified by the Fund against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. Currently, the Fund expects the risk of loss to be remote.

2. SHARES OF BENEFICIAL INTEREST

At September 30, 2009, there were 28,290,000 common shares authorized (without par value). During the period ended September 30, 2009 and the year ended March 31, 2009 there were no shares issued; all reinvested distributions were satisfied with previously issued shares purchased in the open market.

3. AUCTION RATE PREFERRED SHARES

On November 7, 2003 the Fund issued 2,534 Preferred Shares Series M, 2,533 Preferred Shares Series W and 2,533 Preferred Shares Series F, each with a \$25,000 liquidation preference per share totaling \$190,000,000. During the year ended March 31, 2009, there was a pro rata preferred redemption of each series totaling 4,000 shares and \$100,000,000 leaving 1,200 Preferred Shares Series M, 1,200 Preferred Shares Series W and 1,200 Preferred Shares Series F, each with a \$25,000 liquidation preference totaling \$90,000,000. Dividends to preferred shareholders are cumulative and are declared weekly, at rates established through an auction process. The weekly auctions for Series M, W and F have all failed during the period ended September 30, 2009; consequently, the dividend rate paid on the Preferred Shares has moved to the maximum rate as

3. AUCTION RATE PREFERRED SHARES (CONTINUED)

defined in the prospectus. During the period ended September 30, 2009, the dividends on Preferred Shares ranged from 1.49% to 1.66%.

The Fund is required to maintain, on a weekly basis, a specified discounted value of its portfolio in compliance with guidelines established by Fitch Ratings and Moody's Investor Services Inc., and is required to maintain asset coverage for the Preferred Shares of at least 200%.

The Preferred Shares are redeemable by the Fund at any time and are subject to mandatory redemption if the asset coverage or discounted value requirements are not met. During the period ended September 30, 2009, all requirements were met.

4. TRANSACTIONS WITH AFFILIATES

Franklin Resources, Inc. is the holding company for various subsidiaries that

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

SUBSIDIARY -----	AFFILIATION -----
Franklin Advisers, Inc. (Advisers)	Investment manager
Franklin Templeton Services, LLC (FT Services)	Administrative manager

The Fund pays an investment management fee and administrative fee to Advisers and FT Services of 0.50% and 0.20%, respectively, per year of the average daily managed assets. Managed assets are defined as the Fund's gross asset value minus the sum of accrued liabilities, other than the liquidation value of the Preferred Shares and other financial leverage.

5. EXPENSE OFFSET ARRANGEMENT

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the period ended September 30, 2009, the custodian fees were reduced as noted in the Statement of Operations.

6. INCOME TAXES

For tax purposes, capital losses may be carried over to offset future capital gains, if any. At March 31, 2009, the capital loss carryforwards were as follows:

Capital loss carryforwards expiring in:	
2014	\$ 682,502
2015	895,575
2016	726,440
2017	11,687,026

	\$13,991,543
	=====

For tax purposes, realized capital losses occurring subsequent to October 31, may be deferred and treated as occurring on the first day of the following fiscal year. At March 31, 2009, the Fund deferred realized capital losses of \$17,185,747.

At September 30, 2009, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

Cost of investments	\$510,937,478
	=====
Unrealized appreciation	\$ 19,936,569
Unrealized depreciation	(24,922,696)

Net unrealized appreciation (depreciation) ...	\$ (4,986,127)
	=====

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of defaulted securities, foreign currency transactions, mortgage dollar rolls, paydown losses, payments-in-kind, and bond discounts and premiums.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatments of wash sales, foreign currency transactions, mortgage dollar rolls, paydown losses, payments-in-kind, and bond discounts and premiums.

7. INVESTMENT TRANSACTIONS

Purchases and sales of investments (excluding short term securities) for the period ended September 30, 2009, aggregated \$489,900,898 and \$471,222,562, respectively.

8. INVESTMENTS IN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

The Fund may invest in the Institutional Fiduciary Trust Money Market Portfolio (Sweep Money Fund), an open-end investment company managed by Advisers. Management fees paid by the Fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management and administrative fees paid by the Sweep Money Fund.

9. CREDIT RISK AND DEFAULTED SECURITIES

At September 30, 2009, the Fund had 64.72% of its portfolio invested in high yield, senior secured floating rate notes, or other securities rated below investment grade. These securities may be more sensitive to economic conditions causing greater price volatility and are potentially subject to a greater risk of loss due to default than higher rated securities.

The Fund held defaulted securities and/or other securities for which the income has been deemed uncollectible. At September 30, 2009, the aggregate value of these securities was \$10,019,796, representing 1.98% of the Fund's portfolio. The Fund discontinues accruing income on securities for which income has been deemed uncollectible and provides an estimate for losses on interest receivable. The securities have been identified on the accompanying Statement of Investments.

10. OTHER DERIVATIVE INFORMATION

At September 30, 2009, the Fund has invested in derivative contracts which are

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSRS

reflected on the Statement of Assets and Liabilities as follows:

DERIVATIVE CONTRACTS NOT ACCOUNTED FOR AS HEDGING INSTRUMENTS	ASSET DERIVATIVES		LIABILITY DERIVATIVES

11. OTHER CONSIDERATIONS

From time to time, officers, directors or employees of the Fund's Investment Manager may have discussions or enter into agreements with issuers, underwriters or creditors' committees which, pursuant to the Fund's policies and requirements of applicable securities laws, could prevent the Fund from trading in the securities of such company for limited or extended periods of time.

12. FAIR VALUE MEASUREMENTS

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

- Level 1 - quoted prices in active markets for identical securities
- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of September 30, 2009, in valuing the Fund's assets and liabilities carried at fair value:

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's instructions and/or policies.

To assist it in analyzing proxies, the manager subscribes to RiskMetrics Group (RiskMetrics), an unaffiliated third-party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. In addition, the manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third-party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies. Although RiskMetrics' and/or Glass Lewis' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from RiskMetrics, Glass Lewis or any other third party to be determinative of the manager's ultimate decision. As a matter of policy, the officers, directors/trustees and employees of the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, distributor, broker dealer and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund with the manager's recommendation regarding the vote for approval. If the conflict is not resolved by the Fund, the Proxy Group may refer the matter, along with the recommended course of action by the manager, if any, to an interdepartmental Proxy Review Committee (which may include portfolio managers and/or research analysts employed by the manager), for evaluation and voting instructions. The Proxy Review Committee may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund. Where the Proxy Group or the Proxy Review Committee refers a matter to the Fund, it may rely upon the instructions of a representative of the Fund, such as the board or a committee of the board.

Where a material conflict of interest has been identified, but the items on which the manager's vote recommendations differ from Glass Lewis, RiskMetrics, or another independent third-party provider of proxy services relate specifically to (1) shareholder proposals regarding social or environmental issues or political contributions, (2) "Other Business" without describing the matters that might be considered, or (3) items the manager wishes to vote in opposition to the recommendations of an issuer's management, the Proxy Group may defer to the vote recommendations of the manager rather than sending the proxy directly to the Fund for approval.

To avoid certain potential conflicts of interest, the manager will employ echo voting, if possible, in the following instances: (1) when the Fund invests in an underlying fund in reliance on any one of Sections 12(d)(1)(E), (F), or (G) of the 1940 Act, or pursuant to an SEC exemptive order; (2) when the Fund invests uninvested cash in affiliated money market funds pursuant to an SEC exemptive order ("cash sweep arrangement"); or (3) when required pursuant to the Fund's governing documents or applicable law. Echo voting means that the investment manager will vote the shares in the same proportion as the vote of all of the other holders of the Fund's shares.

The recommendation of management on any issue is a factor that the manager considers in determining how proxies should be voted. However, the manager does not consider recommendations from management to be determinative of the manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

MANAGER'S PROXY VOTING POLICIES AND PRINCIPLES The manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS. The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

RATIFICATION OF AUDITORS OF PORTFOLIO COMPANIES. The manager will closely scrutinize the role and performance of auditors. On a case-by-case basis, the manager will examine proposals relating to non-audit relationships and non-audit fees. The manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence.

MANAGEMENT AND DIRECTOR COMPENSATION. A company's equity-based compensation plan should be in alignment with the shareholders' long-term interests. The manager believes that executive compensation should be directly linked to the performance of the company. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the RiskMetrics quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The manager will generally

oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen" feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES. The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. However, as with all proxy issues, the manager conducts an independent review of each anti-takeover proposal. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. In addition, the manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE. The manager realizes that a company's financing decisions have a significant impact on its shareholders, particularly when they involve the issuance of additional shares of common or preferred stock or the assumption of additional debt. The manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES. The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE. Many of the tenets discussed above are applied to the manager's proxy voting decisions for international investments. However, the manager must be flexible in these instances and must be mindful of the varied market practices of each region.

The manager will attempt to process every proxy it receives for all domestic and foreign issuers. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. If a security is on loan, the manager may determine that it is not in the best interests of the Fund to recall the security for voting purposes. Also, the manager may abstain from voting under

certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.

ITEM 11. CONTROLS AND PROCEDURES.

(A) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Shareholder Report on Form N-CSR, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(B) CHANGES IN INTERNAL CONTROLS. There have been no significant changes in the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Shareholder Report on Form N-CSR.
