## GOL Conquers Corporate Client and Reaches 24% Market Share

**São Paulo, December 29, 2004** GOL Linhas Aéreas Inteligentes S.A. (NYSE: GOL and Bovespa: GOLL4), Brazil's low-fare, low-cost airline, developed a strategy to conquer the corporate client, one of the most demanding and traditional customers in the market. In November 2004, the strategy helped the Company to reach a 24% overall domestic market share. Currently, corporate clients account for 60% of GOL's business volume. More importantly, this customer has provided greater stability in the Company's demand, as business travelers fly regularly and not only during peak travel seasons.

As increasing flight frequencies is the greatest challenge to conquering the corporate market, the Company expanded its routes by adding 30 new destinations and increased its fleet from 6 to 27 Boeing 737 aircraft from 2001 to 2004. A constant focus on planning and logistics were key factors to achieve client loyalty. These efforts led GOL to a 97% average regularity and punctuality rate in 2004, one of the corporate market's chief concerns.

In November this year, the case "Vencendo Desafios do Mercado Corporativo" (Overcoming Corporate Market Challenges), developed by GOL, received the "TOP de Vendas" Award (TOP of Sales), organized by ADVB (Sales and Marketing Directors Association). The case study's success was mainly due to a precise diagnostic of the corporate client, as well as GOL's increased attendance at events, charter sales, fairs and congresses, and the constant focus on planning and logistics. Furthermore, the intensive use of technological resources also contributed to the case study's success. In the third quarter of 2004, the Company's website accounted for 79% of total bookings. These positive results were achieved thanks to increasing our integrated and continuous relationship with our customers, says Lincoln Amano, GOL's Commercial Director.

### About GOL Linhas Aéreas Inteligentes

GOL Linhas Aéreas Inteligentes, a low-cost, low-fare airline, is one of the most profitable and fastest growing airlines in the industry worldwide. GOL operates a simplified fleet with a single-class of service. It also has one of the youngest and most modern fleets in the industry that results in low maintenance, fuel and training costs, and therefore high aircraft utilization and efficiency ratios. In addition, safe and reliable services, which stimulate GOL's brand recognition and customer satisfaction, allow GOL to have the best cost-benefit service in the market. GOL currently offers service to 37 major business and travel destinations in Brazil and one international destination, with substantial expansion opportunities. In 2005, GOL plans to grow by increasing frequencies in existing markets and adding service to additional markets in both Brazil and other high-traffic South American travel destinations. GOL listed its shares on the NYSE and the Bovespa in June 2004.
