Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class:

Name of each exchange on which registered:

**Preferred Shares, without par value
American Depositary Shares (as evidenced by American
Depositary Receipts), each representing one share of
Preferred Stock**

**New York Stock Exchange*
New York Stock Exchange**

* Not for trading purposes, but only in connection with the trading on the New York Stock Exchange of American Depositary Shares representing those preferred shares.

**Securities registered or to be registered pursuant to Section 12(g) of the Act:
None**

**Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:
7.50% Senior Notes Due 2017**

The number of outstanding shares of each class of stock of Gol Linhas Aéreas Inteligentes S.A. as of December 31, 2010:

137,032,734

Shares of Common Stock

133,303,934

Shares of Preferred Stock

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this is an annual or transition report, indicate by check mark if the registrant is not required to file pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated Filer

Accelerated Filer

Non-accelerated Filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting
Standards as issued by the
International Accounting Standards
Board

Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

EXPLANATORY NOTE

We are amending our Annual Report on Form 20-F for the year ended December 31, 2010 (the “Annual Report”) as originally filed with the U.S. Securities and Exchange Commission (the “SEC”) on April 8, 2011, as amended on September 8, 2011, to reflect the discovery of an error that led to a material weakness in internal controls over financial reporting. The facts leading to this discovery are as follows:

1 – In October 2010 the Company began implementation of a new revenue recognition system module to complement its previous reservations system. In April 2011 the Company completed implementation of this module. During the final stages of implementation of this module, when comparing available preliminary test data from the first quarter of 2011 from the new system module with the same data from the previous system, the Company identified an error relating to the manner in which the previous system assessed revenue on interline ticket sales. Interline ticket sales are sales of Company flights by other airline carriers under so-called interline agreements. Pursuant to these agreements another carrier may use the Company for specific segments and will pay a previously contracted price, which may be different than spot ticket prices. The previous system properly recorded interline sales as deferred revenue based on interline agreement prices. However, when the previous system released the deferred revenue into revenue, current spot prices were used. Consequently, the error could be an overstatement or understatement of revenue, depending on the difference between the interline agreement prices and the respective spot prices.

2 – This error was quantified at the end of April 2011, during the accounting closing process of March 31, 2011, after the Company’s publication of the annual financial statements for the year ended December 31, 2010 in Brazil on February 23, 2011, which were attached as an exhibit to its current report on form 6-K furnished to the SEC on February 24, 2011, and after the Company filed its annual report on Form 20-F for the year ended December 31, 2010 with the SEC, on April 8, 2011.

3 – However, by both the time it published its 2010 annual financial statements and filed its 2010 20-F the Company had determined that (i) interline sales were small, between 0.9% and 3.2% of total revenues in 2008, 2009, and 2010, (ii) the Company had controls and procedures in place to properly process and recognize revenues relating to more than 96% of its total revenues for the year ended December 31, 2010; and (iii) while the Company was aware that the difference between the interline agreement price and the spot price would directly impact net income, the Company determined that this difference was not expected to have a material impact.

4 – At that time, based on the above facts, the Company concluded that the deficiency in internal control relating to this error would not result in a reasonable possibility that a material misstatement of the Company’s financial statements existed. However, the Company did conclude that the previous system limitations were a significant deficiency and therefore, management communicated this deficiency to the audit committee given their responsibility of overseeing the company’s financial reporting.

5 – Recently, the Company performed additional analysis and concluded that in light of the previous system limitations there was a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements would not be prevented or detected on a timely basis.

Therefore, the Company has revised its classification of this deficiency from a “significant deficiency” to a “material weakness” as of December 31, 2010 and has filed this amendment no. 2 to its Annual Report to reflect the following changes:

- revise the disclosure in “Item 15 – Controls and Procedures” to reflect the material weakness relating to the interline revenue recognition error and to conclude that internal controls over financial reporting was not effective at December 31, 2010;

- include the reissued Management's Report on Internal Control over Financial Reporting to report the material weakness and the change in conclusion;
 - include the reissued report of Deloitte Touche Tohmatsu Auditores Independentes on management's conclusion on internal controls over financial reporting modified to report the material weakness; and
-

- revise the conclusion with respect to disclosure controls and procedures.

In addition, the Company confirms that as of April 2011, upon completing the implementation of the new revenue recognition system module, revenue on interline ticket sales is recognized appropriately. As a result, the material weakness has been remediated.

Other than as set forth above, this Form 20-F/A does not, and does not purport to, amend, update or restate the information in any other item of the Annual Report as originally filed with the SEC. As a result, this Form 20-F/A does not reflect any events that may have occurred after the Annual Report was filed on April 8, 2011.

Presentation of Financial and Other Data

The consolidated financial statements included in this annual report have been prepared in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB), in *reais*.

We have translated some of the *real* amounts contained in this annual report into U.S. dollars. The rate used to translate such amounts in respect of the year ended December 31, 2010 was R\$1.6662 to US\$1.00, which was the commercial rate for the purchase of U.S. dollars in effect on December 31, 2010, as reported by the Central Bank. The U.S. dollar equivalent information presented in this annual report is provided solely for the convenience of investors and should not be construed as implying that the *real* amounts represent, or could have been or could be converted into, U.S. dollars at the above rate. See “Exchange Rates” for more detailed information regarding the Brazilian foreign exchange system and historical data on the exchange rate of the *real* against the into U.S. dollars.

In this annual report, we use the terms “the Registrant” to refer to Gol Linhas Aéreas Inteligentes S.A., and “Gol”, “Company”, “we,” “us” and “our” to refer to the Registrant and its consolidated subsidiaries together, except where the context requires otherwise. The term VRG refers to VRG Linhas Aéreas S.A., a wholly owned subsidiary of the Registrant. References to “preferred shares” and “ADSs” refer to non-voting preferred shares of the Registrant and American depositary shares representing those preferred shares, respectively, except where the context requires otherwise.

The phrase “Brazilian government” refers to the federal government of the Federative Republic of Brazil, and the term “Central Bank” refers to the Banco Central do Brasil, or the Central Bank. The term “Brazil” refers to the Federative Republic of Brazil. The terms “U.S. dollar” and “U.S. dollars” and the symbol “US\$” refer to the legal currency of the United States. The terms “*real*” and “*reais*” and the symbol “R\$” refer to the legal currency of Brazil. “IFRS” refers to the international financial reporting standards issued by the International Accounting Standards Board, or IASB. “U.S. GAAP” refers to generally accepted accounting principles in the United States, and “Brazilian GAAP” refers to generally accepted accounting principles in Brazil, which are accounting principles derived from Law No. 6,404 of December 15, 1976, as amended, or the Brazilian corporation law and the pronouncements, guidance, and interpretations issued by the Committee of Accounting Standards (*Comitê de Pronunciamentos Contábeis*), or the CPC, approved by the rules of the CVM.

We make statements in this annual report about our competitive position and market share in, and the market size of, the Brazilian and international airline industry. We have made these statements on the basis of statistics and other information from third party sources, governmental agencies or industry or general publications that we believe are reliable. Although we have no reason to believe any of this information or these reports are inaccurate in any material respect, we have not verified the competitive position, market share and market size or market growth data provided by third parties or by industry or general publications. All industry and market data contained in this annual report is based upon the latest publicly available information as of the date of this annual report.

Certain figures included in this annual report have been rounded. Accordingly, figures shown as totals in certain tables may not be an arithmetic sum of the figures that precede them.

This annual report contains terms relating to operating performance in the airline industry that are defined as follows:

- “Revenue passengers” represents the total number of paying passengers flown on all flight segments.
- “Revenue passenger kilometers” represents the numbers of kilometers flown by revenue passengers.

- “Available seat kilometers” represents the aircraft seating capacity multiplied by the number of kilometers the seats are flown.
- “Load factor” represents the percentage of aircraft seating capacity that is actually utilized (calculated by dividing revenue passenger kilometers by available seat kilometers).

- “Breakeven load factor” is the passenger load factor that will result in passenger revenues being equal to operating expenses.
- “Aircraft utilization” represents the average number of block hours operated per day per aircraft for the total aircraft fleet.
- “Block hours” refers to the elapsed time between an aircraft’s leaving an airport gate and arriving at an airport gate.
- “Yield per passenger kilometer” represents the average amount one passenger pays to fly one kilometer.
- “Passenger revenue per available seat kilometer” represents passenger revenue divided by available seat kilometers.
- “Operating revenue per available seat kilometer” represents operating revenues divided by available seat kilometers.
- “Average stage length” represents the average number of kilometers flown per flight leg.
- “Operating expense per available seat kilometer” represents operating expenses divided by available seat kilometers.

Cautionary Statements about Forward-Looking Statements

This annual report includes forward-looking statements, principally under the captions “Risk Factors,” “Operating and Financial Review and Prospects” and “Business Overview.” We have based these forward-looking statements largely on our current beliefs, expectations and projections about future events and financial trends affecting our business. Many important factors, in addition to those discussed elsewhere in this annual report, could cause our actual results to differ substantially from those anticipated in our forward-looking statements, including, among other things:

- general economic, political and business conditions in Brazil and in other South American and Caribbean markets we serve;
- the effects of global financial markets and economic crises;
- management’s expectations and estimates concerning our future financial performance and financing plans and programs;
- our level of fixed obligations;
- our capital expenditure plans;
- our ability to obtain financing on acceptable terms;
- inflation and fluctuations in the exchange rate of the *real*;
- existing and future governmental regulations, including air traffic capacity controls;

- increases in fuel costs, maintenance costs and insurance premiums;
- changes in market prices, customer demand and preferences and competitive conditions;
- cyclical and seasonal fluctuations in our operating results;
- defects or mechanical problems with our aircraft;

- our ability to successfully implement our strategy;
- developments in the Brazilian civil aviation infrastructure, including air traffic control, airspace and airport infrastructure, and
- the risk factors discussed under “Risk Factors.”

The words “believe,” “may,” “will,” “aim,” “estimate,” “continue,” “anticipate,” “intend,” “expect” and similar words are intended to identify forward-looking statements. Forward-looking statements include information concerning our possible or assumed future results of operations, business strategies, financing plans, competitive position, industry environment, potential growth opportunities, and the effects of future regulation and the effects of competition. Forward-looking statements speak only as of the date they were made, and we undertake no obligation to update publicly or to revise any forward-looking statements after we distribute this annual report because of new information, future events or other factors. In light of the risks and uncertainties described above, the forward-looking events and circumstances discussed in this annual report might not occur and are not guarantees of future performance.

PART I

ITEM 1. Identity of Directors, Senior Management and Advisors

Not applicable.

ITEM 2. Offer Statistics and Expected Timetable

Not applicable.

ITEM 3. Key Information

A. Selected Financial Data

We changed our financial reporting from U.S. GAAP to IFRS, beginning with the financial statements as of and for the year ended December 31, 2008. We present in this section the following summary financial data:

- Summary financial and operating data derived from our audited financial statements included herein and prepared in accordance with IFRS as of and for the years ended December 31, 2010, 2009 and 2008;
- Summary financial and operating data derived from our audited financial statements not included herein and prepared in accordance with IFRS as of and for the year ended December 31, 2007; and
- Summary financial data derived from our audited financial statements not included herein and prepared in accordance with U.S. GAAP as of and for the year ended December 31, 2006.

The summary financial data prepared in accordance with IFRS and U.S. GAAP is not comparable.

The following tables present summary historical consolidated financial and operating data for us for each of the periods indicated. Solely for the convenience of the reader, *real* amounts as of and for the year ended December 31, 2010 have been translated into U.S. dollars at the commercial market rate in effect on December 31, 2010 as reported by the Central Bank of R\$1.6662 to US\$1.00.

Operating expense less fuel expense per available seat kilometer (cents)	8.9	9.4	9.4	8.8
Departures	237,287	268,540	273,602	295,160
Departures per day	650	736	750	811
Destinations served	66	59	59	59
Average stage length (kilometers)	960	933	890	907
Average number of operating aircraft during period	88.6	106.4	108.7	112.3
Full-time equivalent employees at period end	15,722	15,911	17,963	18,776
Fuel liters consumed (in thousands)	1,177,300	1,364,719	1,291,412	1,465,299
Percentage of sales through website during period (4)	90.0%	92.4%	92.4%	88.1%
Percentage of sales through website and call center during period	98.9%	99.2%	98.7%	95.1%

(1) Our preferred shares are not entitled to any fixed dividend preferences, but are instead entitled to receive dividends per share in the same amount of dividends per share paid to holders of our common shares. Consequently, our earnings (loss) per share are computed by dividing income by the weighted average number of all classes of shares outstanding during the year.

(2) Trade and other receivables related to receivables from credit card administrators, travel agencies, installment sales from the Voe Fácil program, cargo agencies and others. These receivables are stated at cost less allowances for doubtful receivables, which approximates their fair value given their short term nature.

(3) Operating margin represents operating income (loss) before financial results divided by net operating revenues.

(4) Considering sales through our website and API (*application programming interface*) systems.

(5) In October 2010, ANAC changed its calculation method for monthly traffic information and republished information for periods since January 2009. All operating data for 2009 and 2010 reflects the new methodology, whereas information for 2007 and 2008 was calculated pursuant to the old methodology and may not be fully comparable. According to ANAC, the changes were designed to align data with the concepts adopted by the International Civil Aviation Organization (ICAO). The change was necessary because Brazil has joined the ICAO's statistical program and supplies the latter's database with several industry data. Changes in the methodology refer to the calculation of ASK (seat supply) and the classification of domestic legs in international flights, which are now considered to be part of the domestic market. ANAC has stated that it will republish information for 2008 at a later date.

*U.S. GAAP Summary Financial Data**

	Year Ended December 31 2006 (in thousands)
Income Statement Data:	
Net operating revenues:	
	R\$
Passenger	3,580,919
Cargo and other	221,098
Total net operating revenues	3,802,017
Operating expenses:	
Salaries, wages and benefits	413,977
Aircraft fuel	1,227,001
Aircraft rent	292,548
Sales and marketing	414,597
Landing fees	157,695
Aircraft and traffic servicing	199,430
Maintenance, materials and repairs	146,505
Depreciation	69,313
Other operating expenses	179,494
Total operating expenses	3,100,560
Operating income before financial results	701,457
Interest expense	(66,378)
Financial income, net	163,883
Income before income taxes	798,962
Income taxes	(229,825)
Net income	R\$ 569,137
Earnings per share, basic(1)	R\$ 2.90
Earnings per share, diluted(1)	R\$ 2.90
Weighted average shares used in computing earnings per share, basic (in thousands)(1)	196,103

Short-term borrowings		128,304
Long-term debt		949,006
Shareholders' equity		2,205,158

* For a reconciliation of profit (loss) and shareholders' equity of our audited financial statements in U.S. GAAP to our audited financial statements in IFRS at January 1, 2007 and December 31, 2007 and for the year then ended, see note 23 under the caption "Reconciliation between US GAAP and IFRS as of and for the year ended December 31, 2007" to our financial statements included in our annual report on Form 20-F for the year ended December 31, 2008, as filed on May 8, 2009.

(1) Our preferred shares are not entitled to any fixed dividend preferences, but are instead entitled to receive dividends per share in the same amount of dividends per share paid to holders of our common shares. Consequently, our earnings (loss) per share are computed by dividing income by the weighted average number of all classes of shares outstanding during the year.

(2) Trade and other receivables related to receivables from credit card administrators, travel agencies, installment sales from the Voe Fácil program, cargo agencies and others. These receivables are stated at cost less allowances for doubtful receivables, which approximates their fair value given their short term nature

Exchange Rates

The Brazilian foreign exchange system allows the purchase and sale of foreign currency and the international transfer of *reais* by any person or legal entity, regardless of the amount, subject to certain regulatory procedures. The Brazilian currency has during the last decades experienced frequent and substantial variations in relation to the U.S. dollar and other foreign currencies. Between 2000 and 2002 the *real* depreciated significantly against the U.S. dollar, reaching an exchange rate of R\$3.53 per US\$1.00 at the end of 2002. Between 2003 and mid-2008, the *real* appreciated significantly against the U.S. dollar due to the stabilization of the macro-economic environment and a strong increase in foreign investment in Brazil, with the exchange rate reaching R\$1.56 per US\$1.00 in August 2008. With the crisis in the global financial markets beginning in mid-2008, the *real* depreciated 31.9% against the U.S. dollar over the year 2008, reaching R\$2.34 per US\$1.00 on December 31, 2008. Since 2009, the *real* appreciated against the U.S. dollar and on December 31, 2010 the exchange rate was R\$1.67 per US\$1.00 and on April 4, 2011, the exchange rate was R\$1.61 per US\$1.00. The Central Bank has intervened occasionally to control instability in foreign exchange rates. We cannot predict whether the Central Bank or the Brazilian government will continue to allow the *real* to float freely or will intervene in the exchange rate market through a currency band system or otherwise. The *real* may substantially depreciate or appreciate against the U.S. dollar.

The following tables present the selling rate, expressed in *reais* per U.S. dollar (R\$/US\$), for the periods indicated.

Year	Period-End	Average for Period ⁽¹⁾ (reais per U.S. dollar)	Low	High
2006	2.138	2.177	2.059	2.371
2007	1.771	1.948	1.733	2.156
2008	2.337	1.836	1.559	2.500
2009	1.741	1.994	1.702	2.422
2010	1.655	1.881	1.759	1.666
2011 (through April 4, 2011)	1.611	1.666	1.611	1.691

Month	Month-End	Average for Month ⁽²⁾ (reais per U.S. dollar)	Low	High
October 2010	1.701	1.711	1.684	1.701
November 2010	1.716	1.734	1.713	1.716
December 2010	1.666	1.711	1.693	1.666
January 2011	1.673	1.675	1.651	1.691
February 2011	1.661	1.668	1.661	1.678
March 2011	1.629	1.659	1.629	1.676
April 2011 (through April 4, 2011)	1.611	1.615	1.611	1.619

(2) Average of the lowest and highest rates in the month.

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

An investment in the ADSs or our preferred shares involves a high degree of risk. You should carefully consider the risks described below before making an investment decision. Our business, financial condition and results of operations could be materially and adversely affected by any of these risks. The trading price of the ADSs could decline due to any of these risks or other factors, and you may lose all or part of your investment. The risks described below are those that we currently believe may materially affect us.

Risks Relating to Brazil

The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. This involvement, as well as Brazilian political and economic conditions, could adversely affect our business and the trading price of our ADSs and our preferred shares.

The Brazilian government frequently has intervened in the Brazilian economy and occasionally makes significant changes in policy and regulations. The Brazilian government's actions to control inflation and other policies and regulations have often involved, among other measures, increases in interest rates, changes in tax policies, price controls, currency devaluations, capital controls and limits on imports. Our business, financial condition and results of operations may be adversely affected by changes in policy or regulations at the federal, state or municipal levels involving or affecting factors such as:

- interest rates;
- currency fluctuations;
- inflation;
- liquidity of domestic capital and lending markets;
- tax policies;
- exchange rates and exchange controls and restrictions on remittances abroad, such as those that were briefly imposed in 1989 and early 1990; and
- other political, social and economic developments in or affecting Brazil.

Exchange rate instability may adversely affect our financial condition and results of operations and the market price of the ADSs and our preferred shares.

The Brazilian currency has during the last decades experienced frequent and substantial variations in relation to the U.S. dollar and other foreign currencies. Between 2000 and 2002, the *real* depreciated significantly against the U.S. dollar, reaching an exchange rate of R\$3.53 per US\$1.00 at the end of 2002. Between 2003 and mid-2008, the *real* appreciated significantly against the U.S. dollar due to the stabilization of the macro-economic environment and a strong increase in foreign investment in Brazil, with the exchange rate reaching R\$1.56 per US\$1.00 in August 2008. In the context of the crisis in the global financial markets after mid-2008, the *real* depreciated against the U.S. dollar over the year 2008 and reached R\$2.34 per US\$1.00 at year end 2008. Since 2009, the *real* appreciated against the U.S. dollar and on December 31, 2010 the exchange rate was R\$1.67 per US\$1.00.

Depreciation of the *real* against the U.S. dollar could create inflationary pressures in Brazil and cause increases in interest rates, which could negatively affect the growth of the Brazilian economy as a whole and harm our financial condition and results of operations, may curtail access to foreign financial markets and may prompt government intervention, including recessionary governmental policies. Depreciation of the *real* against the U.S. dollar can also, as in the context of an economic slowdown, lead to decreased consumer spending, deflationary pressures and reduced growth of the economy as a whole. On the other hand, appreciation of the *real* relative to the U.S. dollar and other foreign currencies could lead to a deterioration of the Brazilian foreign exchange current accounts, as well as dampen export-driven growth. Depending on the circumstances, either depreciation or appreciation of the *real* could materially and adversely affect the growth of the Brazilian economy and our business, financial condition and results of operations.

Substantially all of our passenger revenue and cargo revenue and temporary investments are denominated in *reais*, and a significant part of our operating expenses, such as fuel, aircraft and engine maintenance services, aircraft rent payments and aircraft insurance, are denominated in, or linked to, U.S. dollars. We maintain U.S. dollar-denominated deposits and maintenance reserve deposits under the terms of some of our aircraft operating leases. For the year ended December 31, 2010, 54.7% of our operating expenses were either denominated in or linked to the U.S. dollar. In addition, the purchase price of the Boeing 737 Next Generation aircraft for which we had 100 firm purchase orders outstanding as of December 31, 2010, the 10 purchase rights and the 40 Boeing 737 Next Generation aircraft for which we currently have purchase options are denominated in U.S. dollars. At the end of 2010, 79.5% of our indebtedness was denominated in U.S. dollars. While in the past we have generally adjusted our fares in response to, and to alleviate the effect of, depreciation of the *real* and increases in the price of jet fuel (which is priced in U.S. dollars) and have entered into hedging arrangements to protect us against the effects of such developments, there can be no assurance we will be able to continue to do so. To the extent we are unable to adjust our fares or effectively hedge against any such developments, this may lead to a decrease in our profit margins or to operating losses caused by increases in U.S. dollar-denominated costs, increases in interest expense or exchange losses on unhedged fixed obligations and indebtedness denominated in foreign currency. We had total U.S. dollar-denominated future operating lease payment obligations of R\$2,105.7 million and R\$3,123.0 million regarding other U.S. dollar-denominated liabilities and indebtedness at December 31, 2010. We may incur substantial additional amounts of U.S. dollar-denominated operating lease or financial obligations and U.S. dollar-denominated indebtedness and be subject to fuel cost increases linked to the U.S. dollar.

Depreciation of the *real* also reduces the U.S. dollar value of distributions and dividends on the ADSs and the U.S. dollar equivalent of the market price of our preferred shares and, as a result, the ADSs.

Government efforts to combat inflation may hinder the growth of the Brazilian economy and could harm our business.

Brazil has in the past experienced extremely high rates of inflation and has therefore followed monetary policies that have resulted in one of the highest real interest rates in the world. Between 2004 and 2010, the base interest rate (SELIC) in Brazil varied between 19.25% p.a. and 8.75% p.a. Inflation and the Brazilian government's measures to fight it, principally through the Central Bank, have had and may have significant effects on the Brazilian economy and our business. Tight monetary policies with high interest rates may restrict Brazil's growth and the availability of credit. Conversely, more lenient government and Central Bank policies and interest rate decreases may trigger increases in inflation, and, consequently, growth volatility and the need for sudden and significant interest rate increases, which could negatively affect our business. In addition, we may not be able to adjust the fares we charge our customers to offset the effects of inflation on our cost structure.

Developments and the perception of risk in other countries, including the United States and emerging market countries, may adversely affect the market price of Brazilian securities, including the ADSs and our preferred shares.

The market value of securities of Brazilian issuers is affected by economic and market conditions in other countries, including the United States, the European Union and emerging market countries. Although economic conditions in those countries may differ significantly from economic conditions in Brazil, investor's reactions to developments in other countries may have an adverse effect on the market value of securities of Brazilian issuers. Crises in the United States, the European Union or emerging market countries may diminish investor interest in securities of Brazilian issuers, including ours. This could adversely affect the trading price of the ADSs or our preferred shares, and could also make it more difficult for us to access the capital markets and finance our operations in the future on acceptable terms or at all.

Risks Relating to Us and the Brazilian Airline Industry

Changes to the Brazilian civil aviation regulatory framework may adversely affect our business and results of operations.

Brazilian aviation authorities monitor and influence the developments in Brazil's airline market. For example, the predecessor of the National Civil Aviation Agency (*Agência Nacional de Aviação Civil*), or ANAC, the DAC (*Departamento de Aviação Civil*), had addressed overcapacity by establishing strict criteria that must be met before new routes or additional flight frequencies were awarded. ANAC (the successor of the DAC) has more recently set minimum turnaround times. The policies of the ANAC and other aviation supervisory authorities may negatively affect our operations.

The Brazilian congress is currently discussing a draft bill that would replace the current Brazilian Aeronautical Code (*Código Brasileiro de Aeronáutica*). In general, this draft bill deals with matters related to civil aviation, including airport concessions, consumer protection, limitation of airlines' civil liability, compulsory insurance, fines and the increase of limits to foreign ownership in voting stock of Brazilian airlines from 20% to 49% or higher, provided that the country of origin of the investor permits a higher ownership threshold for Brazilian investors. This draft bill is still under discussion in the House of Representatives and, if approved, must be submitted for approval to the Federal Senate, before being sent for presidential approval. If the Brazilian civil aviation framework changes in the future, or ANAC implements increased restrictions, our growth plans and our business and results of operations could be adversely affected.

Since 2009, the Brazilian government has been analyzing the privatization of airports or granting of rights for private concessionaries to operate currently existing airports or expansions of those airports. In January 2011, Mrs. Dilma Rousseff, the newly elected Brazilian president, announced that she intends to privatize certain Brazilian airports. Although such measures may serve as a potential positive catalyst to accelerate investments in airport infrastructure, we are unable to foresee the effects of any such measures on our business and results of operations.

In March 2011, the Civil Aviation Secretary (*Secretaria de Aviação Civil*), or SAC, was created to supervise civil aviation in Brazil. The Civil Aviation Secretary oversees the ANAC and INFRAERO and reports directly to the Brazilian President. We are unable to foresee how SAC will act as a regulator of Brazilian civil aviation and as its main policy agency, in the event SAC changes current policies or directs ANAC and INFRAERO to do so it may adversely affect our operations.

Changes to the Brazilian civil aviation regulatory framework may change the competitive dynamics of our industry and may adversely affect our operations, see “–We operate in a highly competitive industry.”

The airline industry is particularly sensitive to changes in economic conditions and continued negative economic conditions would likely continue to negatively impact our results of operations and our ability to obtain financing on acceptable terms.

Our operations and the airline industry in general are particularly sensitive to changes in economic conditions. Unfavorable general economic conditions, such as higher unemployment rates, a constrained credit market and increased business operating costs, can reduce spending for both leisure and business travel. Unfavorable economic conditions can also impact our ability to raise fares to counteract increased fuel, labor, and other costs. Any of these factors may negatively impact our results of operations.

Unfavorable economic conditions, a significant decline in demand for air travel, or continued instability of the credit and capital markets could also result in pressure on our borrowing costs, operating results and financial condition and would affect our growth and investment plans. These factors could also negatively affect our ability to obtain financing on acceptable terms and our liquidity generally.

Technical and operational problems in the Brazilian civil aviation infrastructure, including air traffic control systems, airspace and airport infrastructure may have a material adverse effect on our business, our results of operations and our strategy.

We are dependent on improvements in the coordination and development of Brazilian airspace control and airport infrastructure, which, mainly due to the large growth in civil aviation in Brazil in recent years, require substantial improvements and government investments. This is further emphasized by the need for additional infrastructure investments in the context of the Soccer Confederations Cup (2013) and World Cup (2014) and the Summer Olympics (2016) in Brazil. Infraero has announced a list of investments in major Brazilian airports of approximately R\$5.5 billion to be implemented between 2011 and 2014.

If the measures taken and investments made by the Brazilian government and regulatory authorities do not prove sufficient or effective, air traffic control, airspace management and sector coordination-related difficulties might reoccur or worsen, which might have a material adverse effect on our business, our results of operations and our growth strategy.

We operate in a highly competitive industry.

We face intense competition on domestic routes in Brazil from existing scheduled airlines and charter airlines and potential new entrants in our market. In addition to competition among scheduled airline companies and charter operators, the Brazilian airline industry faces competition from ground transportation alternatives, such as interstate buses. We may also face competition from international airlines as they introduce and expand flights between Brazil, other South American and Caribbean destinations.

Our existing competitors or potential new entrants into the markets in which we operate have in the past and may again undercut our fares, increase capacity on their routes in an effort to increase their market share or attempt to conduct low-fare or low-cost airline operations of their own, emulating our strategy. In any such event, we cannot assure you that our level of fares or passenger traffic would not be adversely affected and would not have an adverse impact on our business and results of operations or that our competitive advantage would not be reduced.

In 2010 ANAC approved the deregulation of international airfares for flights departing from Brazil to the U.S. and Europe, gradually removing the prior minimum fares. In addition, in 2010 the National Civil Aviation Council (*Conselho de Aviação Civil*), or CONAC, approved the continuity of bilateral agreements providing for open skies policies with other South American countries and a new open skies policy with the United States and began negotiations for an open skies policy with Europe, which we expect will be concluded this year. These regulations increase competition in the market and may negatively affect our results of operation.

Until 2010, landing fees charged in Brazilian airports were standard in all airports independent of whether they were busy or not. In February 2011, in the context of measures to increase the viability of airports for privatization, the Brazilian government announced that it will increase landing fees at the busiest airports as compared to less busy airports. As a result, secondary airports may benefit in light of the differences in fees for the airlines that choose to operate in these airports. Changes in landing or other fees may provide other market players with a cost advantage and negatively affect our competitive position and results of operation.

Changes in regulation may affect the competitive scenario. We cannot foresee the effects of changes in regulation on the competitive environment on us and our industry. See “–Changes to the Brazilian civil aviation regulatory framework may adversely affect our business and results of operations” above.

In addition, as a result of the competitive environment there may be further consolidation in the Brazilian and global airline industry, whether by means of acquisitions, joint ventures, partnerships or strategic alliances. We cannot predict the effects of further consolidation on the industry and, to the extent that we act as a consolidator, we may not be able to implement our growth strategy or make use of synergies, our costs may increase and our operational efficiency may be reduced. In the event we do not act as a consolidator our competitors may increase their scale and may have a competitive advantage over us, which would negatively affect our business and results of operations.

A failure to successfully implement our strategy would harm the market value of the ADSs and our preferred shares.

Our strategy involves capitalizing on our strong market position in Brazil and Latin America with the highest number of routes at the most important airports in Brazil, our consolidated flight network, our e-commerce platform and our *Smiles* mileage program, to increase our penetration of all traveler segments.

Slots at Congonhas Airport in São Paulo, the most important airport for our operations, are fully utilized. The Santos-Dumont airport in Rio de Janeiro, a highly utilized airport with half-hourly shuttle flights between São Paulo and Rio de Janeiro, has certain slot restrictions. Several other Brazilian airports, for example the Brasília, Campinas, Salvador, Confins and São Paulo (Guarulhos) international airports, have limited the number of slots per day due to infrastructural limitations at these airports. Any condition that would prevent or delay our access to airports or routes that are vital to our strategy, or our inability to maintain our existing slots, and obtain additional slots, could materially adversely affect our operations. In addition, we cannot assure that any investments will be made by the Brazilian government in the Brazilian aviation infrastructure to permit a capacity increase at busy airports and consequently additional concessions for new slots to airlines.

Our strategy involves developing new products and businesses in order to increase our ancillary revenues and therefore our total net revenues. Any condition that would prevent or delay our ability to develop such additional revenue sources may significantly impact our operating margins. In addition, a large portion of such ancillary revenues relies on developing partnerships to sell products through our e-commerce platform and on our flights. We do not have any experience in the operation of these businesses and if any of our partners fails to properly deliver products or services it offers, our brand, reputation and results of operations may be significantly adversely impacted and we may be exposed to contingencies with regard to those activities.

We have significant recurring aircraft lease costs, and we will incur significantly more fixed costs that could hinder our ability to meet our strategic goals.

We have significant costs, relating primarily to leases for our aircraft and engines, of which leases for 22 aircraft have floating-rate rent payments based on LIBOR or U.S. interest rates. As of December 31, 2010, we had commitments of R\$16.4 billion to purchase additional Boeing 737-800 Next Generation aircraft, based on aircraft list prices, although the actual price payable by us for the aircraft will be lower due to supplier discounts. As of December 31, 2010, we had R\$3.4 billion in long-term indebtedness, excluding our perpetual bonds in the amount of R\$297.9 million. We expect that we will incur additional fixed obligations and debt as we take delivery of the new aircraft and other equipment to implement our strategy.

Having significant fixed payment obligations could:

- limit our ability to obtain additional financing to support expansion plans and for working capital and other purposes;
- divert substantial cash flow from our operations to service our fixed obligations under aircraft operating leases and aircraft purchase commitments;
- if LIBOR or U.S. interest rates increase, require us to incur significantly more lease or interest expense than we currently do; and

- limit our ability to plan for or react to changes in our business and the airline industry and to general economic conditions.

Our ability to make scheduled payments on our fixed obligations, including indebtedness we will incur, will depend on our operating performance and cash flow, which will in turn depend on prevailing economic and political conditions and financial, competitive, regulatory, business and other factors, many of which are beyond our control. In addition, our ability to raise our fares to compensate for an increase in our fixed costs may be adversely affected by any imposition of fare control mechanisms by the Brazilian civil aviation authorities.

Agreements on a common approach between export credit agencies of the United States and the European Union on offering export credits for commercial aircraft are likely to increase our aircraft financing costs.

The Export-Import Bank of the United States (“Ex-Im Bank”) has recently agreed on a common approach with European export-credit agencies on offering export credits for commercial aircraft. Among other things, the new Sector Understanding on Export Credits for Civil Aircraft (the “ASU”) sets forth minimum guarantee premium rates applicable to aircraft delivered on or after January 1, 2011, or under firm contracts entered into after April 30, 2007. While subject to modification, the exposure fees paid by us on applicable aircraft are likely to increase. The amount of any such increase will depend upon the credit risk assigned to us by the participating export-agencies pursuant to the protocols of the ASU. In addition, we will no longer be able to finance the amortization payments of loans guaranteed by Ex-Im Bank with SOAR loan facilities. These developments are likely to increase our financing costs and may negatively affect our results of operation and our credit rating, which would further negatively affect our financing costs.

We may have to use our cash resources to finance a portion of our firm purchase order aircraft. We may not have sufficient cash resources to do so.

We currently finance our aircraft principally through operating leases. As a result of our 100 firm purchase orders for Boeing 737-800 Next Generation aircraft outstanding as of December 31, 2010, we expect to own a larger portion of our fleet as well as continue to lease aircraft through principally long-term operating leases. The firm purchase orders represent a significant financial commitment for us. We have in recent years financed and intend to continue financing our new Boeing 737-800 NG aircraft with a commitment we received from the Ex-Im Bank providing guarantees covering 85% of the aggregate purchase price for the firm purchase order aircraft. While we expect that the guaranty from the Ex-Im Bank will help us in obtaining low-cost financing for the purchase of the firm purchase order aircraft, we may be required to use our own cash resources for the remaining 15% of the aggregate purchase price for the firm purchase order aircraft. As of December 31, 2010, we had R\$2.0 billion of cash, cash equivalents, short-term investments in overnight deposits and deposit certificates of highly-rated Brazilian banks and marketable securities, mainly Brazilian government bonds. If the value or liquidity of these investments were to decrease, or we do not have sufficient cash resources, we may be required to modify our aircraft acquisition plans or to incur higher than anticipated financing costs, which would have an adverse impact on the execution of our strategy and business and could have an adverse impact on our results of operations.

Substantial fluctuations in fuel costs or the unavailability of fuel would harm our business.

Historically, international and local fuel prices have been subject to wide price fluctuations based on geopolitical issues and supply and demand. Fuel costs, which at times in 2007 and 2008 were at historically high levels, constitute a significant portion of our total operating expenses, accounting for 36.4% of our operating expenses for the year ended December 31, 2010. Fuel availability is also subject to periods of market surplus and shortage and is affected by demand for both home heating oil and gasoline. In the event of an international or local fuel supply shortage, our fuel prices may increase. Although we enter into hedging arrangements to reduce our exposure to fuel price fluctuations and have historically passed on the majority of fuel price increases by adjusting our fare structure, the price and future availability of fuel cannot be predicted with any degree of certainty. Our hedging activities or the extent of our ability to adjust our fares may not be sufficient to protect us from fuel price increases.

Substantially all of our fuel is supplied by one source, Petrobrás Distribuidora S.A. If Petrobrás Distribuidora is unable or unwilling to continue to supply fuel to us at the times and in the quantities that we require, our business and results of operations would be adversely affected.

Events resulting from prolonged instability in the Middle East or other oil-producing regions or the suspension of production by any significant producer, may result in substantial price increases, adverse exchange rates, or the unavailability of adequate supplies and adversely affect our profitability. In addition, the same effect may be caused by natural disasters or other large unexpected disrupting events in regions with significant consumption of other energy sources. No assurances can be given about trends in fuel prices, and average fuel prices for the 2011 fiscal year or for future years may be significantly higher than current prices.

We rely on one supplier for our aircraft and engines.

One of the key elements of our current business strategy is to save costs by operating a standardized aircraft fleet. After extensive research and analysis, we chose the Boeing 737-700/800 Next Generation aircraft and CFM 56-7B engines from CFM International. We expect to continue to rely on Boeing and CFM International into the foreseeable future. If either Boeing or CFM International were unable to perform its contractual obligations, we would have to find another supplier for a similar type of aircraft or engines.

If we had to lease or purchase aircraft from another supplier, we could lose the benefits we derive from our current fleet composition. We cannot assure you that any replacement aircraft would have the same operating advantages as the Boeing 737-700/800 Next Generation aircraft or that we could lease or purchase engines that would be as reliable and efficient as the CFM engines. We may also incur substantial transition costs, including costs associated with retraining our employees, replacing our manuals and adapting our facilities, to the extent that such costs would not be covered by the alternate supplier. Our operations could also be disrupted by the failure or inability of Boeing or CFM International to provide sufficient parts or related support services on a timely basis.

Our business would also be significantly harmed if a design defect or mechanical problem with the Boeing 737-700/800 Next Generation aircraft or the CFM engines used on our aircraft were discovered, causing our aircraft to be grounded while any such defect or problem is being corrected, assuming it could be corrected at all. The use of our aircraft could be suspended or restricted by the ANAC in the event of any actual or perceived mechanical, design or other problems while the ANAC conducts an investigation. Our business would also be significantly harmed if the public avoids flying on our aircraft due to an adverse perception of the Boeing 737-700/800 Next Generation aircraft or the CFM engines because of safety concerns or other problems, whether real or perceived, or in the event of an accident involving Boeing 737-700/800 Next Generation aircraft or the CFM engines.

When Boeing or CFM release new aircrafts or engines to replace the Boeing 737-700/800 Next Generation aircraft or the CFM engines used on our aircraft the market value of our aircrafts and engines may decrease, which would negatively affect the value of our assets and could result in us recording impairment charges.

We may be unable to maintain our company culture as our business grows.

We believe that our growth potential and the maintenance of our results-oriented corporate culture are directly linked to our capacity to attract and maintain the best professionals available in the Brazilian airline industry. We are dedicated to providing professional, high-quality service in a positive work environment and finding innovative ways to improve our business. We place great emphasis on the selection and training of enthusiastic employees with potential to add value to our business and who we believe fit in with and contribute to our company culture. As we grow domestically and internationally, we may be unable to identify, hire or retain enough people who meet these criteria, or we may have trouble maintaining this company culture as we become larger. Our company culture is crucial to our business plan, and failure to maintain that culture could adversely affect our business and results of operations.

We rely heavily on automated systems to operate our business, and any failure of these systems could harm our business.

We depend on automated systems to operate our business, including our computerized airline ticket sales system, our telecommunication systems, our scheduling system and our website. Our website and ticket sales system must be able to accommodate a high volume of traffic and deliver important flight information. Substantial or repeated website, ticket sales, scheduling or telecommunication systems failures could reduce the attractiveness of our services and

could cause our customers to purchase tickets from another airline. Any disruption in these systems could result in the loss of important data, increase our expenses and generally harm our business.

We rely on maintaining a high daily aircraft utilization rate to increase our revenues and reduce our costs. High aircraft utilization also makes us vulnerable to delays.

One of the key elements of our business strategy is to maintain a high daily aircraft utilization rate. High daily aircraft utilization allows us to generate more revenue from our aircraft and dilute our fixed costs, and is achieved in part by operating with quick turnaround times at airports so we can fly more hours on average in a day. Our rate of aircraft utilization could be adversely affected by a number of different factors that are beyond our control, including, among others, air traffic and airport congestion, adverse weather conditions and delays by third-party service providers relating to matters such as fueling and ground handling.

High aircraft utilization increases the risk that if an aircraft falls behind schedule during the day, it could remain behind schedule during the remainder of that day and potentially the next day, which can result in disruption in operating performance, leading to passenger dissatisfaction related to delayed or cancelled flights and missed connections, which may negatively affect our reputation, results of operation and the market price of our ADSs and preferred shares.

Temporary or permanent shortages of skilled labor, or mismanagement of our scheduling systems, could disrupt our business.

Our business depends significantly upon the availability of skilled labor, including hiring, training and retaining qualified pilots, co-pilots and other key employees. We may not be able to compete for skilled labor with airlines in other growing markets, or domestically and may be unable to hire or retain pilots and other key crew members. Training a pilot requires many years of extensive flight hours, including a significant amount of hours in flight simulators. If our pilots or key crew members leave our company we may not be able to find suitable replacements, losing our investment in training and increasing the probability of disruptions in our business caused by shortages of skilled labor.

In addition, restrictions on flight hours for our pilots and crew members or mismanagement of our scheduling systems in light of our high daily aircraft utilization rate may cause temporary shortages of skilled labor and could disrupt our business, harm our reputation and adversely affect our results of operation.

The airline industry is dynamic and volatile and our reputation, financial results and the market price of our ADSs and preferred shares could be harmed by events out of our control

Accidents or incidents involving our aircraft could involve significant claims by injured passengers and others, as well as significant costs related to the repair or replacement of a damaged aircraft and its temporary or permanent loss from service. We are required by ANAC and lessors of our aircraft under our operating lease agreements to carry liability insurance. Although we believe we currently maintain liability insurance in amounts and of the type generally consistent with industry practice, the amount of such coverage may not be adequate and we may be forced to bear substantial losses in the event of an accident. Substantial claims resulting from an accident in excess of our related insurance coverage would harm our business and financial results. Moreover, any aircraft accident or incident involving our aircraft, even if fully insured, or an accident or incident involving Boeing 737 Next Generation aircraft or the aircraft of any major airline could cause negative public perceptions about us or the air transport system, which would harm our business and results of operations as well as the market price of our ADSs and preferred shares.

We may also be affected by other events that affect travel behavior, such as the potential of epidemics or acts of terrorism. These events are out of our control and may affect us even if occurring in markets where we do not operate and/or in connection with other airlines. For example, in the second quarter of 2009, there was an outbreak of the H1N1 virus which had an adverse impact on global air travel and on our operations to and from Argentina. In addition, in the past there have been concerns about outbreaks or potential outbreaks of other diseases, such as avian flu and Severe Acute Respiratory Syndrome, or SARS, which had an adverse impact on global air travel. Any outbreak of a disease that affects travel behavior could have a material adverse impact on us and the trading price of shares of companies in the worldwide airline industry, including our ADRs and preferred shares. Outbreaks of disease could also result in quarantines of our personnel or an inability to access facilities or our aircraft, which could adversely affect our operations. The trading price of shares of companies in the worldwide airline industry are relatively volatile and investors' perception of the market value of these shares, including our ADSs and preferred shares, may also be negatively impacted with additional volatility and decreases in the price of our ADSs and preferred shares.

Our ability to use tax loss carryforwards to offset future taxable income is subject to limitation.

As of December 31, 2010, we had reported approximately R\$1.6 billion of tax loss carryforward as a result of the acquisition of VRG. Under Brazilian tax laws we may only use our tax loss carryforward to offset taxes payable up to 30% of the taxable profit for each year. Thus, despite having balance tax loss carryforward we may have to pay higher taxes in case we reach the compensation limits for any given year that we are entitled to use under Brazilian tax laws.

Our controlling shareholder has the ability to direct our business and affairs and its interests could conflict with yours.

Our controlling shareholder has the power to, among other things, elect a majority of our directors and determine the outcome of any action requiring shareholder approval, including transactions with related parties, corporate reorganizations, dispositions, and the timing and payment of any future dividends, subject to minimum dividend payment requirements imposed under the Brazilian corporation law. Although you are entitled to tag-along rights in connection with a change of control of our company and you will have specific protections in connection with transactions between our controlling shareholder and related parties, our controlling shareholder may have an interest in pursuing acquisitions, dispositions, financings or similar transactions that could conflict with your interests as a holder of the ADSs or our preferred shares.

Risks Relating to the ADSs and Our Preferred Shares

The relative volatility and illiquidity of the Brazilian securities markets may substantially limit your ability to sell the preferred shares underlying the ADSs at the price and time you desire.

Investing in securities that trade in emerging markets, such as Brazil, often involves greater risk than investing in securities of issuers in the United States, and such investments are generally considered to be more speculative in nature. The Brazilian securities market is substantially smaller, less liquid, more concentrated and can be more volatile than major securities markets in the United States. Accordingly, although you are entitled to withdraw the preferred shares underlying the ADSs from the depository at any time, your ability to sell the preferred shares underlying the ADSs at a price and time at which you wish to do so may be substantially limited. There is also significantly greater concentration in the Brazilian securities market than in major securities markets in the United States. The ten largest companies in terms of market capitalization represented 55.3% of the aggregate market capitalization of the BM&FBOVESPA S.A. Bolsa de Valores, Mercadorias & Futuros (“BM&FBOVESPA”) as of December 31, 2010. The top ten stocks in terms of trading volume accounted for 53.2%, 49.7% and 49.7% of all shares traded on the BM&FBOVESPA in 2008, 2009 and 2010, respectively.

Holders of the ADSs and our preferred shares may not receive any dividends.

According to our by-laws, we must pay our shareholders at least 25% of our annual net income as dividends, as determined and adjusted under Brazilian corporation law. This adjusted income may be capitalized, used to absorb losses or otherwise appropriated as allowed under the Brazilian corporation law and may not be available to be paid as dividends. We may not pay dividends to our shareholders in any particular fiscal year if our board of directors determines that such distributions would be inadvisable in view of our financial condition.

If you surrender your ADSs and withdraw preferred shares, you risk losing the ability to remit foreign currency abroad and certain Brazilian tax advantages.

As an ADS holder, you benefit from the electronic foreign capital registration obtained by the custodian for our preferred shares underlying the ADSs in Brazil, which permits the custodian to convert dividends and other distributions with respect to the preferred shares into non-Brazilian currency and remit the proceeds abroad. If you surrender your ADSs and withdraw preferred shares, you will be entitled to continue to rely on the custodian's electronic foreign capital registration for only five business days from the date of withdrawal. Thereafter, upon the disposition of or distributions relating to the preferred shares, you will not be able to remit abroad non-Brazilian currency unless you obtain your own electronic foreign capital registration.

If you attempt to obtain your own electronic foreign capital registration, you may incur expenses or suffer delays in the application process, which could delay your ability to receive dividends or distributions relating to our preferred shares or the return of your capital in a timely manner. The depositary's electronic foreign capital registration may also be adversely affected by future legislative changes.

Holders of ADSs may be unable to exercise preemptive rights with respect to our preferred shares.

We may not be able to offer our preferred shares to U.S. holders of ADSs pursuant to preemptive rights granted to holders of our preferred shares in connection with any future issuance of our preferred shares unless a registration statement under the Securities Act is effective with respect to such preferred shares and preemptive rights, or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement relating to preemptive rights with respect to our preferred shares, and we cannot assure you that we will file any such registration statement. If such a registration statement is not filed and an exemption from registration does not exist, The Bank of New York Mellon, as depositary, will attempt to sell the preemptive rights, and you will be entitled to receive the proceeds of such sale. However, these preemptive rights will expire if the depositary does not sell them, and U.S. holders of ADSs will not realize any value from the granting of such preemptive rights.

ITEM 4. Information on the Company

A. History and Development of the Company

General

The Registrant was formed on March 12, 2004 as a *sociedade por ações*, a stock corporation duly incorporated under the laws of Brazil with unlimited duration. The Registrant's material assets consist of the shares of VRG, three offshore finance subsidiaries, cash and cash equivalents and short-term investments. The Registrant owns all of VRG's shares, except for shares held by members of VRG's boards of directors for eligibility purposes. Our principal executive offices are located at Praça Comandante Linneu Gomes, S/N, Portaria 3, Jardim Aeroporto, CEP: 04626-020, São Paulo, SP, Brazil, and our general telephone number is +55 11 2128-4000. The telephone number of our investor relations department is +55 11 2128-4700. Our website address is www.voegol.com.br. Investor information can be found on our website www.voegol.com.br/ir. Information contained on our website is not incorporated by reference in, and shall not be considered a part of, this annual report.

Capital Expenditures

For a description of our capital expenditures, see below "Item 5. Operating and Financial Review and Prospects—Liquidity and Capital Resources."

B. Business Overview

We are one of the largest low-cost low-fare airlines in the world, according to IATA, in terms of passengers transported in 2010, and the largest low-cost low-fare airline in Latin America providing frequent service on routes connecting all of Brazil's major cities and from Brazil to major cities in South America and select touristic destinations in the Caribbean. With our young and standardized operating fleet of 110 Boeing 737 aircraft, we serve the most comprehensive network of any airline in the Brazilian air passenger transportation market.

Since the beginning of our operations in 2001, our affordable, reliable and simple service and our focus on markets that were either underserved or did not have a lower-fare alternative have led to a strong awareness of our brand and a rapid increase in our market share. We were the first company to successfully introduce low-cost carrier industry practices and technologies in Latin America. We have a diversified revenue base, with customers ranging from business passengers to leisure passengers traveling throughout Brazil and other South American and Caribbean destinations. Our strategy is to increase the size of the market by attracting new passengers as well as to diversify our revenue portfolio through our consolidated flight network, a modern aircraft fleet, targeted marketing and our loyalty program *Smiles* (one of the largest loyalty program in Latin America with more than 7.4 million members and more than 180 partners), a variety of attractive ancillary businesses such as our air cargo services (*Gollog*), and through a variety of payment mechanisms designed to make the purchase of our tickets easier for customers in lower income classes. Passenger transportation revenues represented 89.9% and ancillary revenues represented 10.1% of our net revenues of R\$7.0 billion in 2010.

In February, 2011, we offered approximately 900 daily flights per day to 59 destinations connecting the most important cities in Brazil as well as key destinations in Argentina, Barbados, Bolivia, Chile, Colombia, Paraguay, Uruguay and Venezuela and the Caribbean region. We strategically focus on the Brazilian and South American markets, and will continue to carefully evaluate opportunities to continue growing by increasing the frequency of flights to our existing high-demand markets and adding new routes in these markets (for example, in the Caribbean region), all of which can be reached with our Boeing 737 Next Generation (NG) aircraft.

Our Competitive Strengths

We Have a Strong Market Position Based on Slots at the Most Important Airports in Brazil. Since the VRG acquisition, we have been the carrier with the most flights connecting the busiest airports in Brazil: Congonhas (São Paulo), Santos Dumont and Galeão (Rio de Janeiro), Juscelino Kubitschek (Brasília), Confins (Belo Horizonte) Salvador (Bahia), Porto Alegre (Rio Grande do Sul), Recife (Pernambuco) and Curitiba (Paraná). Routes between these airports are among the most profitable routes in our markets, with strong yields achieved mostly from business travelers. In Congonhas, an airport with slot restrictions, we have been the leading airline in terms of the number of departures for these routes since 2008.

We Keep Our Operating Costs Low. Our operating expense per available seat kilometer (CASK) ex-fuel for the year ended December 31, 2010 was R\$8.76 cents. We believe that our CASK for the year ended December 31, 2010, adjusted for the average number of kilometers flown per flight, or adjusted by stage length, was over the year the lowest in the domestic market and among international low-cost carriers, based upon our analysis of data collected from publicly available information. Since 2008, we managed to reduce our CASK and CASK ex-fuel by 12.8% and 6.8%, respectively. Our business model is based on innovation and best practices adopted to improve our operating efficiency, including:

- ***Operation of a young and standardized fleet.*** At December 31, 2010, our operating fleet of 110 Boeing 737 aircraft was one of Latin America's largest and youngest fleets, with an average age of 6.5 years. We plan to continue keeping our operating fleet exclusively comprised of Boeing 737-800 and 737-700 NG aircraft. Having a standardized fleet reduces inventory costs, as it requires fewer spare parts, and reduces the need to train our pilots to operate different types of aircraft. It also simplifies our maintenance and operations processes. We had 100 firm purchase orders outstanding as of December 31, 2010, to be delivered until 2017, purchase rights for 10 additional Boeing 737 NG aircraft and purchase options for 40 additional Boeing 737 NG aircraft. We expect to be able to further decrease the age of our fleet, and therefore increase efficiency and better control maintenance costs. We have already announced the early return of 2 Boeing 767-300 aircraft to a leading aircraft leasing company. Until we are able to return the 4 remaining aircraft we will assign them to revenue generating uses to reduce their leasing costs.
- ***State of the art maintenance.*** We carry out heavy maintenance on our Boeing 737 aircraft internally at our Aircraft Maintenance Center at the Tancredo Neves International Airport located in Confins, in the State of Minas Gerais. We use this facility for airframe heavy checks, line maintenance, aircraft painting and aircraft interior refurbishment. We started the first of a two-stage expansion project in 2008, when the facility had a capacity to service 60 aircraft. The second stage was inaugurated in March 2010 and we now have a total capacity to perform full maintenance services for more than 120 Boeing 737 aircraft per year. With our system of phased maintenance for our Boeing NG 737-700 and 737-800 aircraft fleet, we are able to perform maintenance work every day without sacrificing aircraft revenue time, and schedule preventive maintenance with more regularity and around the utilization of our aircraft, which further dilutes fixed costs. We are one of the few airlines in the world that takes full advantage of the Boeing 737 NG phased maintenance philosophy, supported by extensive investments we have made in human resources, material, tools and equipment. We are currently seeking ratification by the Federal Aviation Administration (FAA), the U.S. civil aviation regulatory agency, that will allow us to undertake maintenance for international airlines

as well.

We Stimulate Demand for Our Service. We believe that through our differentiated services we create demand for air travel services. We identify and stimulate demand among both business and leisure passengers for air travel that is safe, convenient, simple and a reasonably priced alternative to traditional air, bus and car travel. By combining low fares with simple and reliable service, we have successfully improved our brand awareness, product quality, punctuality and regularity as well as strengthened customer loyalty and are attracting new groups of air travelers in our markets. We estimate that, on average, approximately between 5% and 10% of the customers on our flights are either first-time flyers or have not flown for more than a year.

We Have a Strong Brand Recognition. We believe that the Gol brand has become synonymous with innovation and value in the airline industry. Our customers identify Gol as being safe, accessible, friendly, fair, intelligent and reliable and distinguish Gol in Brazil's domestic airline industry on the basis of its modern and simplified approach to air travel services. Our *Smiles* and *Gollog* brands and our www.voegol.com website provide valuable customer recognition in various businesses and create a tool for brand diversification for us. Our Varig brand is widely known in the Brazilian and Latin American markets in which we operate.

We have one of the Largest Loyalty Program in Latin America. Since the VRG acquisition, we have a loyalty program (*Smiles*), which is available to all our passengers and which we consider a strong relationship tool. The *Smiles* loyalty program serves as a source of revenue for us, as it enables us to sell miles directly to corporate clients for marketing purposes or utilize them for co-branded credit cards. It supports partnerships with more than 180 partners, including hotel chains, car rental companies, restaurants, insurance companies, publishers and schools and also forms the basis for partnerships with some of Brazil and South America's largest banks and credit card companies. The *Smiles* loyalty program had over 7.4 million members at December 31, 2010.

We are one of the largest e-commerce companies in Brazil. Our effective use of technology helps us to keep our costs low and our operations highly scalable and efficient. We seek to keep our distribution channels streamlined and convenient so as to allow our customers to interact with us via the Internet. In 2010, we booked 88.1% of our ticket sales through a combination of our website and application programming interface, or API, systems, 7.0% through our call center and 4.9% through Global Distribution System, or GDS. In addition, our customers can check in online and through web-enabled cell phones. As a result of our emphasis on low-cost distribution channels, in 2010 we were one of the largest e-commerce companies in Brazil and Latin America, with R\$6.4 billion in net ticket sales through the internet, more than any other airline and publicly-held e-commerce company in Brazil. Our platform also has strong traffic statistics, with more than five million visitors per month. We enjoy significant cost savings associated with automated ticket sales, which also makes the selection of travel options more convenient for our customers. Our e-commerce platform is starting to allow us to cross-sell other travel-related products to our customers.

We Have Proven Management. Our top managers have broad experience in many sectors of the Brazilian economy, including air and ground transportation, telecommunications and home appliances and consumer products. This experience has helped us to develop the most effective elements of our low-cost model and we expect will help us to further penetrate the Brazilian middle class and to generate ancillary revenues through Voe Fácil and our e-commerce platform www.voegol.com.

We Have High Corporate Governance Standards. Our corporate governance practices go beyond those of most issuers in the transportation industry and emerging markets issuers, with the efficient and active use of specialized committees with highly qualified professionals and senior managers that add value to decisions made in the day-to-day management of our business. We have four independent board members, including the chairman of our board of directors. All members of our board of directors have broad and internationally recognized skills in the areas of corporate finance, business management, banking and in the transportation industry.

We Have a Strong Liquidity and Cash Position. We believe that a strong liquidity and cash position is key to our success. Our strong balance sheet increases our capacity to establish partnerships, negotiate with suppliers and to mitigate impacts of financial markets volatility on our results, to strengthen our financial resilience and to ensure the execution of our growth strategy. We have a strong balance sheet, especially our cash and cash equivalents position which as of December 31, 2010 amounted to approximately 28.3% of our trailing twelve months' net operating revenues. We are also committed to not having any significant financial debt coming due within any three-year horizon. In this view we believe that a stronger balance sheet, combined with our operating cash flow generation will further improve our operating flexibility in order to allow us to rapidly respond to market changes and to explore opportunities.

Our Strategies

Our strategy is to capitalize on our competitive advantages while further strengthening our financial resilience, based on four main strategic pillars: increase passenger revenue, expand ancillary revenues, further reduce costs and improve our financial resilience. In order to implement our strategies we intend to:

Capitalize on Our Strong Market Position in Brazil and Latin America. We intend to capitalize on our strong market position, with our high brand recognition, the highest number of routes and frequencies between the most important airports in Brazil, our consolidated flight network and our *Smiles* loyalty program and to increase penetration across all segments of travelers. We will focus on Brazilian operations and selected South American destinations that are, or we expect to become, profitable and fit into our flight network. In addition, we believe that the airline industry may experience further consolidation in the future and therefore partnerships and alliances are key success factors. In this environment we intend play a leading role and strengthen our position as a long-term player.

Improve Operating Efficiency and Financial Resilience. Continuing to reduce our operating expense per available seat kilometer is key to increased profitability. We aim to maintain our position as one of the lowest cost airlines in the world. We intend to further reduce the average age of our fuel-efficient fleet, while optimizing the size of our fleet to ensure high utilization rates. In 2010, our aircraft utilization rate was 12.9 block-hours per day, compared to 11.6 hours in 2009 and 12.1 hours in 2008.

We seek to continue to reduce our operating expense per available seat kilometer by using our aircraft efficiently, concentrating on minimizing our turnaround times at airports and maintaining a high number of daily flights per aircraft. In 2010, we invested in several initiatives to reduce our CASK as the implementation of zero based budget methodology (in which budgets are built from a zero base and not based on the previous budget), shared services center, ACARS (Aircraft Communications Addressing and Reporting System) and improvements in our online check-in systems. We will continue to utilize technological innovations wherever possible to reduce our distribution costs and improve our operating efficiency. We expect to benefit from economies of scale and reduce our average cost per available seat kilometer as we add aircraft to an established and efficient operating infrastructure.

We have a strong balance sheet and we seek to continuously set financial targets in order to further improve our financial resilience to support our growth strategy. We currently seek to maintain a cash position equivalent to more than 25% of our net revenues recorded in the trailing twelve-month period, to continuously improve debt ratios, deleverage our balance sheet through the generation of operating cash flow and extend our financial commitments, avoiding significant debt maturities in a three-year range.

Expand Our Customer Base. In planning the growth of our business, we will continue to select our routes and build the frequency of our service based on the extent and type of demand in the areas we serve in Brazil and South America. We are committed to providing air travel to a wide range of travelers. We will continue to popularize air travel, making low-fare flights more accessible to a larger portion of the population, including all types of business travelers, including with the following measures:

- **Stimulate Demand.** Our widely available service is designed to popularize air travel and stimulate demand, particularly from fare-conscious leisure travelers and small-to mid-size business travelers who might otherwise use alternative forms of transportation or not travel at all. The Brazilian middle class has grown significantly in the last five years. According to *Fundação Getúlio Vargas*, or FGV, and the Brazilian Geographical and Statistical Institute (*Instituto Brasileiro de Geografia e Estatística*), or IBGE, the new Brazilian middle class with monthly income between R\$1,126 and R\$4,854 has grown by 30 million, from 65 million in 2003 to 95 million 2010. We will continue to provide our customers with low fare alternatives and flexible payment mechanisms, such as debit

payments, credit card installment payments and monthly installment payments in the form of direct credit. For example, our *Voe Fácil* (“Fly Easy”) Program, which allows qualifying customers to pay for airline tickets in up to 36 monthly installments as our Voe Gol Stores opened in March 2011 in subway and bus stations and other high traffic locations.

- *Expand our network.* We will continue to carefully evaluate opportunities to meet demand for leisure travel by offering more seats at lower fares, expanding flight frequencies on existing routes and adding additional routes that contribute to our network and for which we perceive a market demand in Brazil. In addition, by offering flights to selected South American and Caribbean destinations with connections integrated in our network, we will create opportunities for incremental traffic, feeding our network and increasing our overall load factor and supporting our strategy of expanding our network and stimulating demand for our services.
- *Overhubbing.* We estimate that between 35% and 40% of our passengers are connecting flights and, as a result, we may expand our network by creating new direct flights between two given cities, avoiding the need to connect through a third city. This may also help us to increase our flights and the number of passengers we transport despite current limitations on slot availability in Brazil's busiest airports.
- *Expand our partnerships.* We believe we have the best platform to expand our customer base in the markets in which we operate. Our standardized services and lower fares attract leisure travelers from all income levels, and with the integration of the *Smiles* loyalty program into our operations we intend to increase our penetration in the corporate segment. In August 2009, we received our International Operating Safety Audit, or IOSA, airline safety registration from International Air Transport Association, or IATA, and we believe this certification, combined with the integration of the *Smiles* loyalty program into our consolidated flight network, makes us the preferred Brazilian partner of major international airlines operating in the country, with which we do not compete on inter-continental routes. Under these partnerships, our customers are able to use miles accumulated under the *Smiles* loyalty program to fly to destinations in North America, Europe and Asia. We intend to strengthen our existing partnerships and build new ones with large international airlines in the form of code-share arrangements to further increase our international feeder network, load factors and profitability. Since early 2010, we signed two important code share agreements, with Delta Air Lines in April 2010 and with Qatar Airways in January 2011. In February 2011, we entered into a strategic MRO (maintenance, repair and operations) partnership agreement with Delta TechOps, the maintenance division of Delta Air Lines, which will provide overhaul service for approximately 50 percent of our CFM 56-7 engines, maintenance for parts and components on our fleet of Boeing 737NG aircraft, and also, consulting services related to maintenance workflow planning, materials and facility optimization and tooling support. Delta TechOps will also assist us with our efforts to secure the FAA (Federal Aviation Administration) Certification. In addition, we will assist Delta with certain line maintenance services for Delta aircraft with extended ground time in Brazil. We also seek to evaluate partnerships with financial institutions, retail chain-stores, car rental and insurance companies. We believe that these agreements will generate passenger and ancillary revenues by feeding our route network, strengthening the *Smiles* loyalty program and increasing traffic and sales through our e-commerce platform.

Further Innovate, Establish and Increase Our Ancillary Revenue Businesses. Our ancillary revenues are derived from our e-commerce platform www.voegol.com.br and *Gollog* as well as ticket change fees, excess baggage charges and other incidental services. We expect further growth in these businesses, which will provide us with additional revenue at low incremental cost by:

- *Continuously innovating and introducing new businesses to the Brazilian market.* We have a strong track record of innovation and introduction of new business practices in Brazil. In June 2009, we introduced the sale of beverages and food on board (buy on board) in Brazil, providing a more flexible and robust board service, which proved extremely popular with our customers during the 2010 test phase. We plan to expand these services to more than 400 daily flights in 2011, generating ancillary revenue without increasing our cost structure or fare price. We are the first airline in Brazil to allow passengers to check-in entirely by mobile phone and the first to permit check-in on domestic flights via iPhone for passengers without checked baggage, simplifying customers' traveling. We are continuously developing an onboard wireless entertainment system which we expect to launch in the first semester of 2011, in order to provide onboard entertainment which will be sponsored by large corporations, particularly from the

media, entertainment and consumer segments. We believe that integrating travel-related products through the combination of partnerships, the development of new products, our e-commerce platform (www.voegol.com) and Smiles, will be key to a faster increase in our ancillary revenues. We intend to provide comfort and convenience to our clients by upgrading our current e-commerce platform into a fully-integrated portal that provides a wide range of integrated travel-related products to be charged in a single invoice. We are constantly evaluating opportunities, such as sales of travel insurance, marketing activities and other services, which may help us to better capitalize on the large number of passengers on our flights and the high volume of customers using our website.

- *Focusing on express delivery services.* Through *Gollog*, our cargo transportation service, we make efficient use of extra capacity in our aircraft by carrying cargo. With a comprehensive service portfolio, express delivery accounted for approximately 20% of our cargo revenue in 2010. Our express delivery products – *Gollog VOO CERTO*, *Gollog EXPRESS*, *Gollog DEZ HORAS* and *Gollog DOC* – were developed to meet growing demand for door-to-door deliveries, defined deadlines and additional optional services. We intend to intensify our efforts in the express delivery services by further strengthening our logistics capability, mainly by expanding our ground distribution network and further intensifying our commercial efforts. In September 2010, we opened a new cargo terminal in the Congonhas airport in the city of São Paulo. The new facilities are part of our strategy of increasing *Gollog*'s competitiveness in addition to offering low costs and attractive prices. *Gollog* currently has almost 100 stores, covers more than 2,000 cities in Brazil and is already among Brazil's leading logistics operators.
- *Increasing market penetration.* The *Voe Fácil* program allows select customers to pay for airline tickets in up to 36 monthly installments, with interest. By increasing the *Voe Fácil* program penetration we believe that we will be able to stimulate demand for our tickets and better utilize our yield management system by selling seats which, based on statistical analyses, we would otherwise expect to fly empty without the implementation of the program. In December 2009, we opened the first *Voe Fácil* store located in Largo 13 de Maio, a Brazilian middle-income shopping region through which one million persons pass every day, aiming to increase our presence among Brazil's new middle class, offering air fares that are competitive with intercity bus fares. In March 2011, we launched three small and low cost points of sale under the *Voe Gol* brand in main bus and subways terminals (Itaquera, Sé and Luz) allowing customers to not only be able to buy tickets, but also to change and cancel their reservations and obtain information, all of which with full customer support.

Routes and Schedules

Our operating model is a highly integrated, multiple-hub route network that is different from the point-to-point model used by other low-cost carriers worldwide. The high level of integration of flights at selected airports permits us to offer frequent, non-stop flights at low fares between Brazil's most important economic centers and ample interconnections through our network linking city pairs through a combination of two or more flights with little connecting or stop-over time. Our network also allows us to increase our load factors on our strongest city pair routes by using the airports in those cities to connect our customers to their final destinations. This strategy increases our load factor by attracting customers traveling to secondary markets who prefer to pay lower fares even if this means making one or more stops before reaching their final destination. Between 35% and 40% of our passengers connect or fly through one or more destinations before reaching their final travel destination. Our operating model allows us to build our flight routes to add destinations to cities that would not, individually, be economically viable to serve in the traditional point-to-point model, but that are feasible to serve when simply added as additional points on our multiple-stop route network. We do this by offering low-fare, early-bird, minimum stay or night (red-eye) flights to lower-traffic destinations, which can be the first or last stops on our routes, allowing us to increase our aircraft utilization and generate additional revenues. By offering international flights to South American and Caribbean destinations, and with stops integrated in our network, we create opportunities for incremental traffic, feeding our network and increasing our overall load factor and our competitive advantage and supporting our strategy of expanding our network and stimulating demand for our services.

We have been increasing the number of flights to and through the major Brazilian airports and prudently adding more routes to Caribbean destinations, which we expect to give us additional growth opportunities in the Brazilian and international markets. In addition, we consider expanding to up to 30 potential new destinations in Latin America in regions with medium density, represented by airports with a population of up to 1 million within a 200 km radius.

As of March 2011, we offered over 900 daily flights to 59 destinations connecting the most important cities in Brazil as well as the main destinations in Argentina, Barbados, Bolivia, Chile, Paraguay, Uruguay, Colombia, Venezuela and the Caribbean Region.

Services

Passenger Transportation

We recognize that we must offer excellent services to our customers. Since April 2009, we have offered lower priced seats to price-sensitive leisure travelers and more flexible tickets with higher *Smiles* miles allocation to our corporate customers. We pay particular attention to the details that help to make for a pleasant, complication-free flying experience, including:

- ticketless travel;
- convenient on-line sales, check-in, seat assignment and flight change and cancellation services;
- online flight status service;
- web-enabled cell phone ticket sales and check-in;
- self check-in at kiosks at designated airports;
- designated female lavatories;
- friendly and efficient in-flight service;
- modern aircraft interiors;
- quick turnaround times at airport gates;
- free or discounted shuttle services between airports and drop-off zones on certain routes;
- buy on board services on certain flights;
- Mobile check-in and boarding pass (100% paperless boarding); and
- iPhone application for check-in, electronic boarding pass and *Smiles* account management.

We seek to achieve punctual operations, which are of primary importance to our customers. According to our internal data, which are corrected for delays out of our control and pre-advised changes in flight schedules, our average punctuality rate for 2010 was 88.9%, as compared to 89.9% in 2009.

We experience greater passenger demand during the summer and winter vacation periods, in January and July, respectively, and during the last two weeks of December, during the holidays season.

Smiles Loyalty Program.

We have a loyalty program (*Smiles*), which we consider as a strong relationship tool and which is available to all our passengers. We intend to increase the *Smiles* penetration through creating marketing initiatives and additional benefits to our customers (*e.g.*, double miles promotions and the launch of several miles redemption options, allowing our customers to use part of their miles to complete the payment) increasing and establishing partnerships with

affiliated credit cards or using services and products at partner establishments. There are four tiers in our *Smiles* program (*Diamond, Gold, Silver* and *Blue*) and qualification for a particular tier is based on the miles flown. The *Smiles* program serves as a source of revenue for us, since we can sell miles directly to corporate clients for marketing purposes or utilize them for co-branded credit cards. It maintains partnerships with hotel chains, car rental companies, restaurants, insurance companies, publishers and schools and also maintains a partnership with some of Brazil and South America's largest banks and credit card companies. We expect that, through these partnerships, our customers could use their miles accumulated under the *Smiles* program to fly to international destinations in North America, Europe and Asia. For example, in April 2010, we entered into a commercial cooperation agreement with Delta Air Lines, which will allow for the integration of our *Smiles* and Delta Air Lines' Skymiles programs under a code-share agreement. In 2010, we implemented the technological platform using the Oracle Siebel system which will allow us to link the loyalty programs of the companies with which we have partnerships and also optimizing control of miles issued. The *Smiles* program had over 7.4 million members and more than 180 partners at the end of 2010.

Ancillary Revenues and Gollog Cargo Transportation

Ancillary revenues includes revenues from our Gollog services as well as baggage excess and ticket change fees, buy on board and travel insurance revenues are an increasingly important part of our revenues. The further development and growth of our Gollog services is part of our strategy.

We are constantly evaluating opportunities to generate additional ancillary revenues such as sales of travel insurance, marketing activities and other services which may help us to better capitalize on the large number of passengers on our flights and the high volumes of customers using our website.

We believe that integrating travel-related products in our e-commerce platform to be key to a faster increase in our ancillary revenues. We intend to provide comfort and convenience to our clients by upgrading our current e-commerce platform into a fully-integrated portal that provides a wide range of integrated travel-related products to be charged in a single invoice. In addition, we plan to integrate the *Smiles* and *Gollog* platforms into our air travel portal to further provide convenience and simplicity to our customers.

We make efficient use of extra capacity in the stronghold of our aircraft by carrying cargo, through our cargo transport service – Gollog. Gollog's success is the result of the unique service we offer to the market: the Electronic Air Waybill that can be completed via the Internet. The Gollog system provides online access to air waybills and allows customers to track their shipment from any computer with Internet access. Our 59 destinations throughout Brazil, South America and the Caribbean provide access to multiple locations in the region. With our capacity of over 900 daily flights, operated by 110 aircraft, in addition to a fleet of 360 vehicles, we can guarantee quick and reliable delivery. Packages are shipped in the freight hold of our passenger aircraft.

Aircraft Fleet

On December 31, 2010 we had an operational fleet of 114 operational aircraft and a total fleet of 125. We expect to have 115 aircraft in our operating fleet by the end of 2011.

The following table sets forth the composition of our fleet at the dates indicated:

Operating Fleet	Seats⁽¹⁾	At December 31,	
		2009	2010
B737-300	141	3	-
B737-700 NG	144	43	40
B737-800 NG	177	18	15
B737-800 NG Short-Field Performance	187	44	55
B767-300/200	218	-	4
Sub Total	-	108	114

Non-Operating Fleet	Seats⁽¹⁾	At December 31,	
		2009	2010
B737-300 ⁽²⁾	141	8	3
B737-700 NG ⁽³⁾	144	-	2
B737-800 NG ⁽³⁾	177	5	4
B767-300/200 ⁽⁴⁾	218	6	2
Sub Total	-	19	11

Total	–	127	125
--------------	---	-----	-----

(1) As of December 31, 2010.

(2) The three Boeing 737-300s excluded from our operational fleet but still part of the total fleet are grounded and in the final stages of return. These aircraft are no longer in our total fleet for 2011.

(3) Includes new aircraft received from Boeing in stages of technical acceptance and certification and spare aircrafts for our network

(4) One aircraft is sub-leased to an American airline and another is wet-leased to a Brazilian airline for flights between Brazil and Angola.

In line with our strategy of combining the renovation of our fleet with disciplined growth in our seat supply, we concluded the following initiatives in 2010:

- Return of eleven Boeing 737-300s (three of which are grounded and in the final stages of redelivery), all replaced with brand new 737-800 NGs, and six Boeing 737-800s.
- Reactivation of five Boeing 767-300/200s, of which four for incorporation in the operating fleet for international long-haul charter flights and one for sub-leasing to a charter company in the United States from January 2010 to the end of January 2011.

At December 31, 2010, of our total 125 aircraft 86 were under operating leases and 39 under finance leases.

The average age of our operating aircraft at December 31, 2010 was 6.5 years. The average daily utilization rate of our operating fleet in 2010 was 12.9 block hours (11.6 block hours in 2009).

Each Boeing 737 aircraft in our fleet is powered by two CFM International Model CFM 56-7B22 engines or two CFM International Model CFM 56-7B24 engines. All Boeing 737-800 NG Short-Field Performance are equipped with an upgrade thrust plug in each engine, which allows it to operate as a CFM 56-7B27/B3 engine with 27,000 lbs.

The following table sets forth our year-end projected operating fleet through 2015:

Operating Fleet Plan	2011	2012	2013	2014	2015
B737-700 NG	40	40	40	40	40
B737-800 NG *	75	79	81	85	91
Total	115	119	121	125	131

* Includes SFP aircrafts (Short Field Performance)

We will revise this fleet plan according to our expectations for the growth potential in the markets in which we operate.

The Boeing 737-700 Next Generation and Boeing 737-800 Next Generation aircraft currently comprising our fleet are fuel-efficient and very reliable. They suit our cost efficient operations well for the following reasons:

- they have comparatively standardized maintenance routines;
- they require just one type of standardized training for our crews;
- they use an average of 7% less fuel than other aircraft of comparable size, according to Boeing; and
- they have one of the lowest operating costs in their class.

In addition to being cost-efficient, the Boeing 737-700/800 Next Generation aircraft are equipped with advanced technology that promotes flight stability, providing a more comfortable flying experience for our customers. We use a single type of aircraft to preserve the simplicity of our operations. As a result, the introduction of any new aircraft type to our fleet will only be done if, after careful consideration, we determine that such a step will reduce our operating costs. Most of our leased Boeing 737-800 Next Generation aircraft are equipped with blended winglets and all Boeing 737-800 Next Generation aircraft from our purchase order will be equipped with winglets, which reduce our fuel and maintenance costs. Our experience with the new winglets has shown operating fuel consumption

reductions from 3% to 5%. In addition, the winglets improve airplane performance during take-off and landing on short runways. The new Boeing 737-800 NG aircraft will be delivered with short-field performance (SFP) with technical modifications that we expect to significantly improve flight performance, the ability to operate non-stop flights, reduce noise during take-off and to enable us to fly with our Boeing 737-800 Next Generation aircraft to the airport of Santos Dumont in Rio de Janeiro, an important link to the most important routes in Brazil.

At the end of 2010, we leased 86 of our 125 aircraft under operating lease agreements that have an average remaining term of 85 months. We believe that leasing our aircraft fleet under operating leases provides us with flexibility to adjust our fleet size. We make monthly rental payments, some of which are based on floating rates. We but are not required to make termination payments at the end of our leases. Under our operating lease agreements, we do not have purchase options and for some of our lease agreements we are required to maintain maintenance reserve deposits and to return the aircraft and engine in the agreed condition at the end of the lease term. Title to the aircraft remains with the lessor. We are responsible for the maintenance, servicing, insurance, repair and overhaul of the aircraft during the term of the lease. As of December 31, 2010, our operating leases had terms of up to 144 months from the date of delivery of the relevant aircraft.

At the end of 2010, we had 39 aircraft acquired under our firm purchase order with Boeing under finance lease arrangements that had an average remaining term of 121 months.

Sales and Distribution

Our customers can purchase tickets directly from us through a number of different channels, such as our website including our Booking Web Services (BWS), our call center, at airport ticket counters and, to a lesser extent, GDS.

Our low cost low fare business model utilizes website ticket sales as its main distribution channel especially in the local market. For the year ended December 31, 2010, 88.1% of our passenger revenues, whether directly to the customer or through travel agents, were booked via the Internet, making us one of the worldwide industry leaders in this area. In the same period, 7.0% of our passenger revenues were booked through call centers, airport sales counters, and our BWS and 4.9% of our total sales were made through the GDS, respectively.

Our customers can purchase tickets indirectly through travel agents, who are a widely-used travel service resource in Brazil and South America, Europe, North America and other regions. For the year ended December 31, 2010, travel agents provide us with more than 10,000 distribution outlets throughout these regions.

GDSs allows us access to a large number of tourism professionals who are able to sell our tickets to customers throughout the globe, and enables us to enter into interline agreements with other airlines to offer more flights and connection options to our passengers and add incremental international passenger traffic, especially to our international network.

On October 21, 2009 we became an issuer of cards for Universal Air Travel Plan, or UATP, a payment network owned and operated by several foreign airlines. UATP allows us access to a payment network with lower costs than those offered by credit cards and other means of payment. In addition, as an UATP card issuer we are able to maintain a closer relationship with our corporate customers.

Partnerships and Alliances

Our strong market positioning enables us to successfully negotiate a number of arranged partnerships with supplementary major carriers worldwide, mostly in the form of code share agreements and interline agreements. Strategically, the additional passenger inflows generated from those partnerships aim to improve revenues at low incremental costs.

At December 31, 2010, we had code share agreements with American Airlines, Delta Air Lines, Iberia, Air France KLM, Aero Mexico, Copa Airlines and, in January, 2011 we signed a code share agreement with Qatar Airways. We have a frequent flyer tie between our *Smiles* program and the code share partners enabling travelers to accrue and

redeem miles between our *Smiles* and each of the partners (however, the partnerships are not integrated among themselves). In addition, passengers are able to connect with Gol operated flights within Brazil, marketed as a code-share partner flight. We intend to enter into similar agreements with other long haul airlines serving or intending to serve Brazil.

At December 31, 2010 we had interline agreements with 71 airlines, including Korean Airlines, Emirates Airlines, Avianca, Continental Airlines, Japan Airlines, TAP Air Portugal, and others. An interline agreement is a commercial agreement between individual airlines to handle passengers traveling on itineraries that require multiple airlines and allow its customers to utilize a single ticket, and to check their baggage through to the customers final destination. Interline agreements differ from code sharing agreements in that code sharing agreements usually refer to numbering a flight with the airline's code (abbreviation) even though the flight is operated by another airline. This provides for better marketing and customer recognition of the links between the airlines.

In February 2011, we entered into a strategic MRO (maintenance, repair and operations) partnership agreement with Delta TechOps, the maintenance division of Delta Air Lines, which will provide overhaul service for approximately 50 percent of our CFM 56-7 engines, maintenance for parts and components on our fleet of Boeing 737NG aircraft and also, consulting services related to maintenance workflow planning, materials and facility optimization and tooling support. Delta TechOps will also assist us with our efforts to secure the FAA (Federal Aviation Administration) Certification. In addition, we will assist Delta with certain line maintenance services for Delta aircraft with extended ground time in Brazil.

An important element of our business strategy is to cater to the corporate client. To further develop our business relationship with our corporate customers, we have entered into partnerships with hotel chains, rental car service and insurance providers to offer our corporate customers the convenience of the combination of transportation and accommodation arrangements.

Pricing

Brazilian airlines are permitted to establish their own domestic fares without previous government approval. Airlines are free to offer price discounts or follow other promotion activities. Airlines must submit, 30 days after the end of each month, a file containing fares sold and quantity of passengers for each fare amount, for all markets. This file lists regular fares and excludes all contracted, corporate and private fares. The objective is to monitor the average market prices. The procedure same applies for international fares. The only difference is that all fares sold for interline itineraries are also excluded from the file sent to ANAC.

Yield Management

Yield management involves the use of historical data and statistical forecasting models to produce knowledge about our markets and guidance on how to compete to maximize our operating revenues. Yield management forms the backbone of our revenue generation strategy and is strongly linked to our route and schedule planning and our sales and distribution methods. Our yield management practices enable us to react quickly in response to market changes. For example, our yield management systems are instrumental in helping us to identify the flight times and routes for which we offer promotions. By offering lower fares for seats that our yield management indicates would otherwise remain unsold, we capture additional revenue and also stimulate customer demand.

Maintenance

According to ANAC regulation, we are directly responsible for the execution and control of all maintenance services performed on our aircraft. The maintenance performed on our aircraft can be divided into two general categories: line and heavy maintenance. Line maintenance consists of routine, scheduled maintenance checks on our aircraft, including pre-flight, daily and overnight checks and any diagnostics and routine repairs. All of our line maintenance is performed by our own highly experienced technicians at our line maintenance service bases throughout Brazil and South America. We believe that our practice of performing daily preventative maintenance helps to maintain a high aircraft utilization rate and reduces maintenance costs. Heavy maintenance consists of more complex inspections and servicing of the aircraft that cannot be accomplished overnight. Heavy maintenance checks are performed following a pre-scheduled agenda of major overhauls defined by the aircraft's manufacturer, based on the number of hours and flights flown by the aircraft. Our continued high aircraft utilization rate will result in shorter periods of time between heavy maintenance checks for our aircraft in comparison to carriers with lower aircraft utilization rates. In addition, engine maintenance services are rendered in different MRO (Maintenance, Repair and Operations) facilities. We do not believe that our high aircraft utilization rate will necessarily result in the need to make more frequent repairs to our aircraft, given the durability of the aircraft type in our fleet. Our aircraft are covered by warranties that have an

average term of three to five years. The warranties on the aircraft we received in 2011 under our firm purchase order with Boeing will start expiring in 2015.

We internalized heavy maintenance on our Boeing 737 aircraft in our Aircraft Maintenance Center at the Tancredo Neves International Airport in Confins, in the State of Minas Gerais. We use this facility for airframe heavy checks, line maintenance, aircraft painting and aircraft interior refurbishment. We started the first of a two-stage expansion project in 2008, when the facility had a capacity to service 60 aircraft. The second stage was inaugurated in March, 2010 and we now have a total capacity to perform full maintenance services for more than 120 Boeing 737 aircraft per year.

With our system of phased maintenance for our Boeing Next Generation 737-700 and 737-800 aircraft fleet, we are able to perform maintenance work every day without sacrificing aircraft revenue time and to schedule preventive maintenance with more regularity and around the utilization of our aircraft, which helps to maintain high levels of block hours per day and reduces costs. We are one of the few airlines in the world that takes full advantage of the Boeing 737 Next Generation phased maintenance philosophy, supported by extensive investments we made in human resources, material, tools and equipment.

We have also entered into a strategic MRO (maintenance, repair and operations) partnership agreement with Delta TechOps, the maintenance division of Delta Air Lines, in order to provide overhaul service for approximately 50 percent of our CFM 56-7 engines, maintenance for parts and components on our fleet of Boeing 737 NG aircraft and also, consulting services related to maintenance workflow planning, materials and facility optimization and tooling support. Delta TechOps will also assist us with our efforts to secure FAA (Federal Aviation Administration) Certification. In addition, we will assist Delta with certain line maintenance services for Delta aircraft with extended ground time in Brazil.

We have been certified by the ANAC under the Brazilian Aeronautical Certification Regulations to perform heavy maintenance services for third parties. We expect to utilize this certification, a potential source for ancillary revenues, now that the construction of an additional maintenance facility has been completed.

Fuel

Our fuel costs totaled R\$2,287.4 million in 2010, representing 36.4% of our operating expenses for the year. In 2010, we purchased substantially all of our fuel from Petrobrás Distribuidora S.A., a retail subsidiary of Petrobrás, principally under an into-plane contract under which the supplier supplies fuel and also fills our aircraft tanks. In 2010, fuel prices under our contracts were re-set every 30 days and were composed of a variable and a fixed component. The variable component is defined by the refinery and follows international crude oil price fluctuations and the *real*/U.S. dollar exchange rate. The fixed component is a spread charged by the supplier and is usually a fixed cost per liter during the term of the contract. We currently operate a tankering program under which we fill the fuel tanks of our aircraft in regions where fuel prices are lower. We also provide our pilots with training in fuel management techniques, such as carefully selecting flight altitudes to optimize fuel efficiency.

Fuel costs are extremely volatile, as they are subject to many global economic and geopolitical factors that we can neither control nor accurately predict. Because international prices for jet fuel are denominated in U.S. dollars, our fuel costs, though payable in *reais*, are subject not only to price fluctuations but also to exchange rate fluctuations. We maintain a fuel and foreign exchange hedging program, based upon policies which define volume, price targets and instruments for multi-year periods, under which we enter into fuel and currency hedging agreements with various counterparties providing for price protection in connection with the purchase of fuel. Our hedging positions cover short-term periods, and are adjusted weekly or more frequently as conditions require. Our hedging practices are executed by our internal risk management committee and overseen by the risk policies committee of our board of directors. The risk policies committee of our board of directors meets quarterly or more often, if called, and its main responsibilities are to assess the effectiveness of our hedging policies, recommend amendments when and where appropriate and establish its views regarding fuel price trends. We use risk management instruments that have a high correlation with the underlying assets so as to reduce our exposure. We require that all of our risk management instruments be liquid so as to allow us to make position adjustments and have prices that are widely disclosed. We also avoid concentration of credit and product risk. We have not otherwise entered into arrangements to guarantee our supply of fuel and we cannot provide assurance that our hedging program is sufficient to protect us against significant increases in the price of fuel. As of December 31, 2010, we had hedged 21% on average for our projected fuel requirements for 2011, 6% in average for our projected expenditures in foreign currency and 39% for our financial

leases aircraft contracts. The fuel and foreign exchange expenditures hedges are based on call options and the financial leases hedges are based on in futures contracts.

The following chart summarizes our fuel consumption and costs for the periods indicated:

	Year Ended December 31,	
	2009	2010
Liters consumed (in thousands)	1,291,412	1,465,299
Total cost (in thousands)	R\$1,813,104	R\$ 2,287,410
Average price per liter	R\$1.40	R\$1.56
% change in price per liter	(27.26)	11.50
Percent of operating expenses	32.3%	36.4%

Safety and Security

Our most important priority is the safety of our passengers and employees. We maintain our aircraft in strict accordance with manufacturer specifications and all applicable safety regulations, and perform routine line maintenance every day. Our pilots have extensive experience, with flight captains having more than 10,000 hours of career flight time, and we conduct ongoing courses, extensive flight simulation training and seminars addressing the latest developments in safety and security issues. We closely follow the standards established by the Air Accident Prevention Program of the ANAC and we have installed the Flight Operations Quality Assurance System, which maximizes proactive prevention of incidents through the systematic analysis of the flight data recorder system. All of our aircraft are also equipped with Maintenance Operations Quality Assurance, a troubleshooting program that monitors performance and aircraft engine trends. The Brazilian civil aviation market follows the highest recognized safety standards in the world. We are also an active member of the Flight Safety Foundation, a foundation for the exchange of information about flight safety. In June 2009, we created the office of Safety Officer which reports directly to our board of directors and whose main goal is to oversee flight safety and report directly to our highest management level.

Environmental Sustainability

We constantly invest in becoming more environmentally sustainable and have recently implemented the following actions:

- Expansion of our Aircraft Maintenance Center at the Tancredo Neves International Airport located in Confins, in the State of Minas Gerais (completed in March 2010): we have reduced cost by decreasing the need to fly our aircraft overseas to be serviced and we treat all of the effluents generated in our facilities and reuse water.
- We were the first Brazilian airline selected to join the Sustainable Aviation Fuel Users Group (SAFUG), an international aviation biofuel research group, and we participate in biofuel feasibility tests. When these fuels are approved they will substantially reduce green house gas emissions in the aviation industry. We also participate in the Brazilian Alliance for Aviation Biofuels, which aims to promote public and private initiatives that seek the development and certification of sustainable biofuels for aviation. In May 2010, in São Paulo, was formed Abraba (*Aliança Brasileira de Biocombustíveis de Aviação* - Brazilian Aviation Biofuels Alliance), composed of airlines and research of biofuels, biomass producers and manufacturers aircraft companies.
- We were one of Latin America's first airlines to present an emission control plan for the inventory of the DEHST (*Deutsches Emissionshandelsregister*), a German authority responsible for monitoring emissions and the clean development mechanism projects of the Kyoto Protocol. Based on this survey, we are able to record our emissions and develop plans to reduce them.

- We have a partnership agreement with the Fuel and Carbon Services Division of GE Aviation, which envisages the creation of studies and systems to reduce fossil fuel consumption and green house gas emissions.
- Our use of electrostatic painting has reduced aircraft weight by 300 kg and has also reduced the amount of paint used and emission of carbon dioxide.

- To provide a reduction in fuel consumption in soil (and therefore reduced emissions of GEEs emissions), each of our flight crews follows an internal procedure for the shutdown of one engine of the aircraft during taxi.
- The GSE sector (Ground Support Equipment) of Maintenance Line ordered 23 GPUs (Ground Power Unit and Energy Unit of Soil), responsible for converting the mechanical energy generated by a diesel engine into electrical energy used to power aircraft on ground.
- We started using Aircraft Communications Addressing and Reporting System, or ACARS, in 2010 and we expect to have the system implanted in all our fleet by 2012. ACARS provides real time flight data via satellite and allow us to better anticipate maintenance needs, increasing flight safety, efficiency and gains of scale.
- We started using GPS Landing System in January 2010 and we expect to have the system implemented in all our fleet by the end of 2014. This system reduces fuel consumption during take-off and landing, increases precision and safety.
- Inauguration of GOL Institute, a nonprofit association, created to meet the demand for skilled labor in the aviation sector. Its goal is to promote technical education and training of professionals in the aviation industry, and contribute to the promotion of socioeconomic development in Belo Horizonte, as the Maintenance Center is the headquarters of the Institute.
- All waste of our offices and headquarters is recycled.

Insurance

We maintain passenger liability insurance in an amount consistent with industry practice and we insure our aircraft against losses and damages on an “all risks” basis. We are required by the ANAC to maintain insurance coverage for general liability against terrorist acts or acts of war with a minimum amount of US\$800 million. We have obtained all insurance coverage required by the terms of our leasing agreements. We believe our insurance coverage is consistent with airline industry standards in Brazil and is appropriate to protect us from material loss in light of the activities we conduct. No assurance can be given, however, that the amount of insurance we carry will be sufficient to protect us from material loss.

Competition

Domestic

Airlines in Brazil compete primarily on the basis of routes, fare levels, frequency of flights, capacity, airport operating rights and presence, reliability of services, brand recognition, frequent flyer programs and customer service.

Our main competitor in Brazil is TAM Linhas Aéreas S.A., or TAM, which is a full-service scheduled carrier offering flights on domestic routes and international routes. We also face domestic competition from other domestic scheduled carriers, regional airlines and charter airlines, which mainly have regional networks.

As the growth in the Brazilian airline sector evolves, we may face increased competition from our primary competitors and charter airlines as well as other entrants into the market that reduce their fares to attract new passengers in some of our markets.

The following table sets forth the historical market shares on domestic routes, based on revenue passenger kilometers, of the significant airlines in Brazil for each of the periods indicated:

Domestic Market Share⁽¹⁾— Scheduled Airlines	2007	2008	2009	2010
Gol	43.0%	42.4%	41.7%	39.5%
TAM	48.8%	50.4%	45.4%	42.8%
Others	8.2%	7.2%	12.9%	17.7%

Source: Advanced Comparative Data (Dados Comparativos Avançados) 2007—2010

(1) In October 2010, ANAC changed its calculation method for monthly traffic information and republished information for periods since January 2009. All operating data for 2009 and 2010 reflects the new methodology, whereas information for 2007 and 2008 was calculated pursuant to the old methodology and may not be fully comparable. According to ANAC, the changes were designed to align data with the concepts adopted by the ICAO. The change was necessary because Brazil has joined the ICAO's statistical program and supplies the latter's database with several industry data. Changes in the methodology refer to the calculation of ASK (seat supply) and the classification of domestic legs in international flights, which are now considered to be part of the domestic market. ANAC has stated that it will republish information for 2008 at a later date.

Until 2010, landing fees charged in Brazilian airports were standard in all airports independent of whether they were busy or not. In February 2011, in the context of measures to increase the viability of airports for privatization, the Brazilian government announced that it will increase landing fees at the busiest airports as compared to less busy airports. As a result, secondary airports may benefit in light of the differences in fees for the airlines that choose to operate in these airports.

Domestically, we also face competition from ground transportation alternatives, primarily interstate bus companies. In 2010, interstate bus companies transported over 67 million passengers, according to data from the National Ground Transportation Agency (*Agência Nacional de Transportes Terrestres*), and given the absence of meaningful passenger rail services in Brazil, travel by bus has traditionally been the only low-cost option for long-distance travel for a significant portion of Brazil's population. We believe that our low-cost business model has given us flexibility in setting our fares to stimulate demand for air travel among passengers who in the past have traveled long distances primarily by bus. In particular, the highly competitive fares we have offered for travel on our night flights, which have often been comparable to bus fares for the same destinations, have had the effect of providing direct competition for interstate bus companies on these routes.

International

As we expand our international services in South America and the Caribbean, our pool of competitors will increase and we will face competition from Brazilian and South American airlines that are already established in the international market and that participate in strategic alliances and code sharing arrangements. In addition, non-Brazilian airlines may decide to enter or increase their schedules in the market for routes between Brazil and other South American and Caribbean countries.

Industry Overview

Since air transportation has historically been affordable only to the higher income segment of Brazil's population, resulting in a comparatively low level of air travel, we believe that the low-cost, low-fare business model has the

potential to significantly increase the use of air transportation in Brazil. Brazil is the fifth largest domestic aviation market in the world and, according to the ANAC, there were 58.5 million domestic enplanements and 4.4 million international enplanements on Brazilian carriers in Brazil in 2010, out of a total population of approximately 190 million, according to IBGE. In contrast, according to the U.S. Department of Transportation, the United States had 621 million domestic enplanements and 88.5 million international enplanements in 2009, out of a total population of approximately 308 million, based on the latest U.S. census estimates.

The business travel segment is the largest component of Brazilian air transportation demand and the most profitable in the market. According to company data, business travel represented more than 65% of the total demand for domestic air travel in 2010, which we believe is significantly higher than the business travel portion of domestic air travel in the global aviation sector. According to data collected from the ANAC, flights between Rio de Janeiro and São Paulo accounted for 8.2% of all domestic passengers in 2009. The ten busiest routes accounted for 15.6% of all domestic air passengers in 2009, while the ten busiest airports accounted for 72.6% and 68.3% of all domestic passenger traffic through INFRAERO airports in terms of arrivals and departures in 2009 and 2010, respectively.

In light of economic growth, the domestic market has significantly increased in the last years from 76 million in 2003 to more than 98 million in 2010, according to FGV and IBGE, due to increased passenger volumes and both the soccer confederations and world cup scheduled for 2013 and 2014, respectively, in Brazil and the summer Olympics scheduled for 2016 in Rio de Janeiro, the Brazilian airport infrastructure will need substantial improvements.

In 2009 the CONAC announced that it would propose to the Brazilian Government a change to the regulatory limit of foreign ownership in Brazilian airline companies from 20% to 49%. This proposal may be accepted by the Brazilian Government and become a draft bill during 2011.

Since 2009, the Brazilian government has been analyzing the privatization of airports or granting of rights for private concessionaries to operate currently existing airports or expansions of those airports but has not yet made any formal announcements as to its decision.

Brazilian Civil Aviation Market Evolution

Since 1970, Brazil has for the most part had stable growth in revenue passenger kilometers. From 1970 to 2009 domestic revenue passenger kilometers grew at a compound annual rate of 8.9%. In the past 9 years, the domestic market generally experienced year-over-year growth in revenue passenger kilometers except in times of significant economic or political distress, such as the petroleum crisis in the 1970s, the Brazilian sovereign debt crisis in the early 1980s and the economic and political distress in Brazil in the early 1990s.

From 2006 to 2010, the compound annual growth rate in industry passenger traffic, in terms of domestic revenue passenger kilometers, was 15.2%, versus a compound annual growth rate in available industry domestic capacity, in terms of available seat kilometers, of 16.4%. Domestic industry load factors, calculated as revenue passenger kilometers divided by available seat kilometers, have averaged 67.9% over the same period. The table below shows the figures of domestic industry passenger traffic and available capacity for the periods indicated:

	2006	2007	2008	2009	2010
	(in millions, except percentages)				
Available Seat Kilometers	55,608	64,597	72,841	86,471	102,030
Available Seat Kilometers Growth	10.8%	16.2%	12.8%	18.7%	18.0%
Revenue Passenger Kilometers	39,802	44,446	47,838	56,864	70,210
Revenue Passenger Kilometers Growth	12.3%	11.7%	7.4%	18.9%	23.5%
Load Factor	71.6%	68.8%	65.5%	65.8%	68.8%

Source: ANAC, Dados Comparativos Avançados.

Note: In October 2010, ANAC changed its calculation method for monthly traffic information and republished information for periods since January 2009. All operating data for 2009 and 2010 reflects the new methodology, whereas information for 2007 and 2008 was calculated pursuant to the old methodology and may not be fully comparable. According to ANAC, the changes were designed to align data with the concepts adopted by the ICAO. The change was necessary because Brazil has joined the ICAO's statistical program and supplies the latter's database with several industry data. Changes in the methodology refer to the calculation of ASK (seat supply) and the classification of domestic legs in international flights, which are now considered to be part of the domestic market. ANAC has stated that it will republish information for 2008 at a later date.

In 2009 Brazil was the fourth largest market in domestic revenue passenger kilometers and, as compared to 2008, the second fastest growing market.

Regulation of the Brazilian Civil Aviation Market

The Brazilian Aviation Authorities and Regulation Overview

Air transportation services are considered a public service and are subject to extensive regulation and monitoring by the CONAC and the ANAC. Air transportation services are also regulated by the Brazilian Federal Constitution and the Brazilian Aeronautical Code. The Brazilian civil air transportation system is controlled by several authorities. The ANAC is responsible for the regulation of the airlines, the DECEA is responsible for airspace control and INFRAERO is responsible for airport administration.

The following chart illustrates the main regulatory bodies, their responsibilities and reporting lines within the Brazilian governmental structure.

In March 2011, the SAC was created to supervise civil aviation in Brazil. The Civil Aviation Secretary oversees the ANAC and INFRAERO and reports directly to the Brazilian President.

The ANAC is currently responsible for guiding, planning, stimulating and supporting the activities of public and private civil aviation companies in Brazil, and also regulates flying operations generally and economic issues affecting air transportation, including matters relating to air safety, certification and fitness, insurance, consumer protection and competitive practices.

The Department of Air Space Control (*Departamento de Controle do Espaço Aéreo*), or DECEA, reports indirectly to the Brazilian Minister of Defense which is responsible for planning, administrating and controlling activities related to airspace, aeronautical telecommunications and technology. This includes approving and overseeing the implementation of equipment as well as of navigation, meteorological and radar systems. The DECEA also controls and supervises the Brazilian Airspace Control System.

INFRAERO, a state-controlled corporation reporting to the Civil Aviation Secretary, is in charge of managing, operating and controlling federal airports, including control towers and airport safety operations. See “Airport Infrastructure” below.

The CONAC is an advisory body of the President of Brazil and its upper level advisory board is composed of the Minister of Defense, the Minister of Foreign Affairs, the Minister of Treasury, the Minister of Development, Industry and International Trade, the Minister of Tourism, the Minister Chief of the Civil Cabinet, the Minister of Planning, Budget and Management, the Minister of Justice, the Minister of Transportation and the Commandant of the Air Force. The CONAC has the authority to establish national civil aviation policies that may be adopted and enforced by the High Command of Aeronautics and by the ANAC. The CONAC establishes guidelines relating to the proper representation of Brazil in conventions, treaties and other actions related to international air transportation, airport infrastructure, the granting of supplemental funds to be used for the benefit of airlines and airports based on strategic, economic or tourism-related aspects, the coordination of civil aviation, air safety, the granting of air routes and concessions, as well as permission for the provision of commercial air transportation services.

The Brazilian Aeronautical Code provides for the main rules and regulations relating to airport infrastructure and operation, flight safety and protection, airline certification, lease structuring, burdening, disposal, registration and licensing of aircraft; crew training; concessions, inspection and control of airlines; public and private air carrier services; civil liability of airlines; and penalties in case of infringements.

In February 2009, the Federal Government approved the new Civil Aviation National Policy (*Política Nacional de Aviação Civil*), or PNAC. Although the PNAC does not establish any immediate measure, it contains the main guidelines for the national civil aviation system. It encourages the Ministry of Defense, CONAC and ANAC to issue regulations on strategic matters such as safety, competition, environmental, and consumers' issues, as well as to inspect, review and value the activities of all operating companies.

The Brazilian government recognized and ratified, and must comply with, the Warsaw Convention of 1929, the Chicago Convention of 1944, and the Geneva Convention of 1948, the three leading international conventions relating to worldwide commercial air transportation activities.

Route Rights

Domestic routes. For the granting of new routes and changes to existing ones, the ANAC evaluates the actual capacity of the airport infrastructure where such route is or would be operated. In addition, route frequencies are granted subject to the condition that they are operated on a frequent basis. Any airline's route frequency rights may be terminated if the airline (a) fails to begin operation of a given route for a period exceeding 15 days, (b) fails to maintain at least 75% of flights provided for in its air transportation schedule (*Horário de Transporte Aéreo*), or HOTRAN, for any 90-day period or (c) suspends its operation for a period exceeding 30 days. The ANAC approval of new routes or changes to existing routes is given in the course of an administrative procedure and requires no changes to existing concession agreements.

Once routes are granted, they must be immediately reflected in the HOTRAN, which is the official schedule report of all routes that an airline can operate. The HOTRAN provides not only for the routes but also the times of arrival at and departure from certain airports, none of which may be changed without the prior consent of the ANAC. According to Brazilian laws and regulations, an airline cannot sell, assign or transfer its routes to another airline.

International routes. In general, requests for new international routes, or changes to existing routes, must be filed by each interested Brazilian airline that has been previously qualified by the ANAC to provide international services, with the SRI (International Relations Superintendence of the ANAC), which, based on the provisions of the applicable bilateral agreement and general policies of the Brazilian aviation authorities, will submit a non-binding recommendation to the ANAC president, who will decide on approval of the request. International route rights for all countries, as well as the corresponding transit rights, derive from bilateral air transport agreements negotiated between Brazil and foreign governments. Under such agreements, each government grants to the other the right to designate one or more of its domestic airlines to operate scheduled service between certain destinations in each country. Airlines are only entitled to apply for new international routes when they are made available under these agreements. For the granting of new routes and changes to existing ones, the ANAC has the authority to approve Brazilian airlines to operate new routes, subject to the airline having filed studies satisfactory to the ANAC demonstrating the technical and financial viability of such routes and fulfilling certain conditions in respect of the concession for such routes. Any airline's international route frequency rights may be terminated if the airline fails to maintain at least 80% of flights provided for in its air transportation schedule HOTRAN for any 180-day period or suspends its operation for a period exceeding 180 days.

Slots Policy

Domestic. Under Brazilian law, a domestic slot is a concession of the ANAC, which is reflected in the airline's HOTRAN. Each HOTRAN represents the authorization for an airline to depart from and arrive at specific airports within a predetermined timeframe. Such period of time is known as an "airport slot" and provides that an airline can operate at the specific airport at the times established in the HOTRAN. An airline must request an additional slot from the ANAC with a minimum of two months' prior notice.

Congonhas airport in the city of São Paulo is a coordinated airport, where slots must be allocated to an airline company before it starts its operations there. Although it is difficult to obtain a slot in Congonhas airport, on March 8, 2010 ANAC reallocated 202 Congonhas' slots that were idle. When the capacity at the airport increases and more slots become available, 20% of those slots must be distributed to new entrants who will have a preference to their assignment. The remaining slots will be allocated to the other airline companies, including us. The Santos-Dumont airport in Rio de Janeiro, a highly utilized airport with half-hourly shuttle flights between São Paulo and Rio de Janeiro, is also a coordinated airport with certain slot restrictions. Several other Brazilian airports, for example the Brasília International Airport and São Paulo International Airport in Guarulhos have limited the number of slots per day due to infrastructural limitations at these airports.

ANAC has imposed schedule restrictions to several Brazilian airports from which we operate. Operating restrictions, including the prohibition of international flights' operations and the prohibition of civil aircraft's operation after 11:00 p.m. and before 6:00 a.m., were imposed for Congonhas Airport, one of the busiest Brazilian airports and the most important airport for our operations. No assurance can be given that these or other government measures will not have a material adverse effect on our business and results of operations.

CONAC has taken measures to minimize the recent technical and operational problems in the São Paulo airports, redistributing air traffic from the Congonhas airport to the airports of Guarulhos and has mentioned its intention to adjust tariffs for the use of busy airport hubs to encourage further redistribution of air traffic.

In the last quarter of 2008, the ANAC proposed a new regulation for the allocation of slots to domestic airlines. This regulation governs the manner of allocation of slots, by organizing rotations among the concessionaires, determining the procedures for registration, qualification, judgment and homologation of a request for slot concessions in coordinated airports. Additionally, such regulation also establishes the rules permitting transfers of slots between concessionaires. ANAC's resolution has not yet been released.

Also, in 2008, the ANAC enacted a regulation providing that the minimum ground time for aircraft between landing and take-off must be 40 minutes at the International Airport of Sao Paulo in Guarulhos, the international airport of Rio de Janeiro Galeão and at the Brasília airports, and 30 minutes at all other Brazilian airports. This regulation negatively affected our ability to increase aircraft utilization by minimizing turnaround times between flights.

Airport Infrastructure

INFRAERO, a state-controlled corporation, is in charge of managing, operating and controlling federal airports, including control towers and airport safety operations.

Smaller, regional airports may belong to states or municipalities within Brazil and, in such cases, are often managed by local governmental entities. At most important Brazilian airports, INFRAERO performs safety and security activities, including passenger and baggage screening, cargo security measures and airport security.

The use of areas within federal airports, such as hangars and check-in counters, is subject to a concession by INFRAERO. If there is more than one applicant for the use of a specific airport area, INFRAERO may conduct a public bidding process for the granting of the concession.

We have renewable concessions with terms varying from one to five years from INFRAERO to use and operate all of our facilities at each of the major airports that we serve. Our concession agreements for our terminals' passenger service facilities, which include check-in counters and ticket offices, operations support area and baggage service offices, contain provisions for periodic adjustments of the lease rates and the extension of the concession term.

Of the 67 Brazilian airports managed by INFRAERO, approximately 20 airports are receiving infrastructure investments and upgrades. The airport upgrade plan does not require contributions or investments by the Brazilian airlines and is not expected to be accompanied by increases in landing fees or passenger taxes on air travel.

Concession for Air Transportation Services

According to the Brazilian Federal Constitution, the Brazilian government is responsible for public services related to airspace as well as airport infrastructure, and may provide these services directly or through third parties under concessions or authorizations. According to the Brazilian Aeronautical Code and regulations issued by the CONAC, the application for a concession to operate regular air transportation services is subject to a license granted by the ANAC to operate an airline and to explore regular air transportation services. The applicant is required by the ANAC to have met certain economic, financial, technical, operational and administrative requirements in order to be granted such license. Additionally, a concession applicant must be an entity incorporated in Brazil, duly registered with the Brazilian Aeronautical Registry (*Registro Aeronáutico Brasileiro*), or RAB, must have a valid airline operating certificate (*Certificado de Homologação de Empresa de Transporte Aéreo*), or CHETA, and must also comply with certain ownership restrictions. See “—Restrictions to the Ownership of Shares Issued by Concessionaires of Air Transportation Services.” The ANAC has the authority to revoke a concession for failure by the airline to comply with the terms of the Brazilian Aeronautical Code, the complementary laws and regulations and the terms of the concession agreement.

Our concession was granted on January 2, 2001 by the High Command of Aeronautics of the Ministry of Defense. The concession agreement can be terminated if, among other things, we fail to meet specified service levels, cease operations or declare bankruptcy.

The Brazilian Aeronautical Code and the regulations issued by the CONAC and ANAC do not expressly provide for public bidding processes and currently it is not necessary to conduct public bidding processes prior to granting of concessions for the operation of air transportation services. Due to the intense growth of the civil aviation sector, this rule may be changed by the government, in order to allow more competition or to achieve other political purposes.

Import of Aircraft into Brazil

The import of civil or commercial aircraft into Brazil is subject to prior certification of the aircraft by ANAC. Import authorizations usually follow the general procedures for import of goods into Brazil, after which the importer must request the registration of the aircraft with the RAB.

Registration of Aircraft

The registration of aircraft in Brazil is governed by the Brazilian Aeronautical Code, under which no aircraft is allowed to fly in Brazilian airspace, or land in or take off from Brazilian territory, without having been properly registered. In order to be registered and continue to be registered in Brazil, an aircraft must have a certificate of registration (*certificado de matrícula*) and a certificate of airworthiness (*certificado de aeronavegabilidade*), both of which are issued by the RAB after technical inspection of the aircraft by the ANAC. A certificate of registration attributes Brazilian nationality to the aircraft and is evidence of its enrollment with the competent aviation authority. A certificate of airworthiness is generally valid for six years from the date of the ANAC’s inspection and authorizes the aircraft to fly in Brazilian airspace, subject to continuing compliance with certain technical requirements and conditions. The registration of any aircraft may be cancelled if it is found that the aircraft is not in compliance with the requirements for registration and, in particular, if the aircraft has failed to comply with any applicable safety requirements specified by the ANAC or the Brazilian Aeronautical Code.

All information relating to the contractual status of an aircraft, including purchase and sale agreements, operating leases and mortgages, must be filed with the RAB in order to provide the public with an updated record of any amendments made to the aircraft certificate of registration.

Restrictions on the Ownership of Shares Issued by Concessionaires of Air Transportation Services

According to the Brazilian Aeronautical Code, in order to be eligible for a concession for operation of regular services, the entity operating the concession must have at least 80% of its voting stock held directly or indirectly by Brazilian citizens and must have certain management positions entrusted to Brazilian citizens. The Brazilian Aeronautical Code also imposes certain restrictions on the transfer of capital stock of concessionaires of air transportation services, such as VRG, including the following:

- the voting shares have to be nominative and non-voting shares cannot be converted into voting shares;
- prior approval of the Brazilian aviation authorities is required for any transfer of shares, regardless of the nationality of the investor, which results in the change of the company's corporate control, causes the assignee to hold more than 10% of the company's capital stock or represents more than 2% of the company's capital stock;
- the airline must file with the ANAC, in the first month of each semester, a detailed shareholder chart including a list of shareholders, as well as a list of all share transfers effected in the preceding semester; and
- based on its review of the airline's shareholder chart, the ANAC has the authority to subject any further transfer of shares to its prior approval.

The Registrant holds substantially all of the shares of VRG, which are public concessionaires of air transportation services in Brazil. Under the Brazilian Aeronautical Code, the restrictions on the transfer of shares described above apply only to companies that hold concessions to provide regular air transportation services. Therefore, the restrictions do not apply to the Registrant.

Environmental Regulation

Brazilian airlines are subject to various federal, state and municipal laws and regulations relating to the protection of the environment, including the disposal of materials and chemical substances and aircraft noise. These laws and regulations are enforced by various governmental authorities. The non-compliance with such laws and regulations may subject the violator to administrative and criminal sanctions, in addition to the obligation to repair or to pay damages caused to the environment and third parties. As far as civil liabilities are concerned, Brazilian environmental laws adopt the strict and joint liability regime. In this regard we may be liable for violations by third parties hired to dispose of our waste. Moreover, pursuant to Brazilian environmental laws and regulations, the piercing of the corporate veil of a company may occur in order to ensure enough financial resources to the recovery of damages caused against the environment.

We adopted several Environmental Management System (EMS) procedures with our suppliers and use technical audits to enforce compliance. We exercise caution, and may reject goods and services from companies that do not meet our environmental protection parameters unless confirmation of compliance is received.

We are monitoring and analyzing the developments regarding amendments to Kyoto protocol and emissions regulations in the United States and Europe and may in the future be obliged to acquire carbon credits for the operation of our business. No legislation on this matter has yet been enacted in Brazil.

Pending Legislation

The Brazilian congress is currently discussing a draft bill that would replace the current Brazilian Aeronautical Code (*Código Brasileiro de Aeronáutica*). In general, this draft bill deals with matters related to civil aviation, including airport concessions, consumer protection, limitation of airlines' civil liability, compulsory insurance, fines and the increase of limits to foreign ownership in voting stock of Brazilian airlines from 20% to 49% or higher, provided that the country of origin of the investor permits a higher ownership threshold for Brazilian investors. This draft bill is still under discussion in the House of Representatives and, if approved, must be submitted for approval to the Federal Senate, before being sent for presidential approval. If the Brazilian civil aviation framework changes in the future, or ANAC implements increased restrictions, our growth plans and our business and results of operations could be adversely affected.

Since 2009, the Brazilian government has been analyzing the privatization of airports or granting of rights for private concessionaries to operate currently existing airports or expansions of those airports. In January 2011, Mrs. Dilma Roussef, the newly elected Brazilian president, announced that she intends to privatize certain Brazilian airports. Although such measures may serve as a potential positive catalyst to accelerate investments in airport infrastructure, we are unable to foresee the effects of any such measures on our business and results of operations.

In 2010 ANAC approved the deregulation of international airfares for flights departing from Brazil to the U.S. and Europe, gradually removing the prior minimum fares. In addition, in 2010 the National Civil Aviation Council (*Conselho de Aviação Civil*), or CONAC, approved the continuity of bilateral agreements providing for open skies policies with other South American countries and a new open skies policy with the United States and began negotiations for an open skies policy with Europe, which we expect will be concluded this year. These regulations increase competition in the market and may negatively affect our results of operation.

Currently, landing fees charged in Brazilian airports are standard in all airports independent of whether they are busy or not. In February 2011, the Brazilian government announced that it will increase landing fees at the busiest airports as compared to less busy airports. As a result secondary airports may be created with more competitive fees for the airlines that choose to operate in these airports. Changes in landing or other fees may provide other market players with a cost advantage and negatively affect our competitive position and results of operation.

Aircraft Financing by Export Credit Agencies

Ex-Im Bank has recently agreed on a common approach with European export-credit agencies on offering export credits for commercial aircraft. Among other things, the new ASU sets forth minimum guarantee premium rates applicable to aircraft delivered on or after January 1, 2011, or under firm contracts entered into after April 30, 2007. While subject to modification, the exposure fees paid by Gol on applicable aircraft are likely to increase. The amount of any such increase will depend upon the credit risk assigned to us by the participating export-agencies pursuant to the protocols of the ASU. In addition, we will no longer be able to finance the amortization payments of loans guaranteed by Ex-Im Bank with SOAR loan facilities.

C. Organizational Structure

The Registrant is a holding company, which owns directly or indirectly shares of four subsidiaries: VRG and three offshore finance subsidiaries Gol Finance Cayman and GAC Inc., which owns Sky Finance II. VRG is the Registrant's operating subsidiary, under which we conduct our business. Gol Finance, GAC Inc. and Sky Finance II are off-shore companies established for the purpose of facilitating cross-border general and aircraft financing transactions. In June 2010 we wound down one of our finance subsidiary Sky Finance, after the last repayment of all funds raised through it.

D. Property, Plant and Equipment

Our primary corporate offices are located in two buildings in São Paulo. Our commercial, operations, technology, finance and administrative staff is based primarily at our headquarters. We have concessions to use other airport buildings and hangars throughout Brazil, including a part of a hangar at Congonhas airport where we perform aircraft maintenance. As of December 31, 2010, we have 39 Boeing 737s classified as finance lease aircrafts. We own a state-of-the-art Aircraft Maintenance Center in Confins, in the State of Minas Gerais. The certification of our aircraft maintenance center authorizes maintenance services for Boeing 737-300s and Boeing Next Generation 737-700 and 800s. In 2008, we started a two-stage expansion project of our aircraft maintenance center, when the facility had a capacity to service 60 aircraft. The second stage was inaugurated in March 2010 and we now have a total capacity to perform full maintenance services for more than 120 Boeing 737 aircraft per year. With our system of phased maintenance for our Boeing NG 737-700 and 737-800 aircraft fleet, we are able to perform maintenance work every day without sacrificing aircraft revenue time, and schedule preventive maintenance with more regularity and around the utilization of our aircraft, which further dilutes fixed costs. We use the new facility for airframe heavy checks, line maintenance, aircraft painting and aircraft interior refurbishment. See also "Item 4—Business Overview—Aircraft" and note 14 to our financial statements as of and for the year ended December 31, 2010.

ITEM 4A. Unresolved Staff Comments

None.

ITEM 5. Operating and Financial Review and Prospects

You should read this discussion in conjunction with our consolidated financial statements and the related notes and the other financial information included elsewhere in this annual report.

A. Operating Results**Revenues**

We derive our revenues primarily from transporting passengers on our aircraft. In 2010, 89.9% of our revenues were derived from passenger fares, and the remaining 10.1% of our revenues were derived from ancillary revenues principally from our cargo business, which utilizes available cargo space on our passenger flights. Nearly all of our passenger revenue and cargo revenue is denominated in *reais*. Passenger revenue, including revenue from our *Smiles* loyalty program, is recognized either when transportation is provided or when the ticket expires unused. Cargo revenue is recognized when transportation is provided. Other ancillary revenue consists primarily of ticket change fees, excess baggage charges, interest on installment sales and other incidental services. Passenger revenues are based upon our capacity, load factor and yield. Our capacity is measured in terms of available seat kilometers, which represents the number of seats we make available on our aircraft multiplied by the number of kilometers the seats are flown. Load factor, or the percentage of our capacity that is actually used by paying customers, is calculated by dividing revenue passenger kilometers by available seat kilometers. Yield is the average amount that one passenger pays to fly one kilometer.

The following table demonstrates our main operating performance indicators in 2009 and 2010.

	Year Ended December 31,	
	2009	2010
Operating Data:		
Load-factor	63.6%	67.1%
Break-even load-factor	59.2%	60.4%
Aircraft utilization (block hours per day)	11.6	12.9
Yield per passenger kilometer (cents)	20.7	20.5
Passenger revenue per available seat kilometer (cents)	13.1	13.8
Operating revenue per available seat kilometer (cents)	14.9	15.3
Number of departures	273,602	295,160
Operating aircraft	108	114

Our revenues are net of certain taxes, including state-value added taxes, *Imposto sobre Circulação de Mercadorias e Serviços*, or ICMS; federal social contribution taxes, including *Programa de Integração Social*, or PIS; and the *Contribuição Social para o Financiamento da Seguridade Social*, or COFINS. ICMS does not apply to passenger revenues. The average rate of ICMS on cargo revenues varies by state from 4% to 12%. As a general rule, PIS and COFINS are imposed at rates of 1.65% and 7.6%, respectively, of total revenues.

Generally, the revenues from and profitability of our flights reach their highest levels during the January (summer) and July (winter) vacation periods and in the final two weeks of December during the Christmas holiday season. The week during which the annual Carnival celebrations take place in Brazil is generally accompanied by a decrease in load factors. Given our high proportion of fixed costs, this seasonality is likely to cause our results of operations to

vary from quarter to quarter. We generate most of our revenue from ticket sales through our website, and we are one of the largest and leading e-commerce companies in Brazil in terms of net sales through the Internet.

The ANAC and the aviation authorities of the other countries in which we operate may influence our ability to generate revenues. In Brazil, the ANAC approves the concession of slots, entry of new companies, launch of new routes, increases in route frequencies and lease or acquisition of new aircraft. Our ability to grow and to increase our revenues is dependent on the receipt of approvals for new routes, increased frequencies and additional aircraft from the ANAC.

Operating Expenses

We seek to lower our operating expenses by operating a standardized fleet with a single-class of service, having one of the newest fleets in the industry, utilizing our aircraft efficiently, using and encouraging low-cost ticket sales and distribution processes. The main components of operating expenses include those related to aircraft fuel, aircraft rent, aircraft maintenance, sales and marketing, and salaries, wages and benefits provided to employees, including provisions for our profit sharing plan.

Our aircraft fuel expenses are higher than those of low-cost airlines in the United States and Europe because the Brazilian infrastructure to produce, transport and store fuel is expensive and underdeveloped, especially in the north and northeast regions of the country. In addition, taxes applicable to the sale of jet fuel are high and are passed along to us. Our aircraft fuel expenses are variable and fluctuate based on global oil prices. Since global oil prices are U.S. dollar-based, our aircraft fuel costs are also linked to fluctuations in the exchange rate of the *real* versus the U.S. dollar. In 2010, fuel expenses represented 36.4% of our total operating expenses, as compared to 32.2% in 2009. In 2008, the price of West Texas Intermediate crude oil, a benchmark widely used for crude oil prices that is measured in barrels and quoted in U.S. dollars, varied significantly, reaching an all-time high of US\$145 in March, 2008 and decreasing to US\$44.60 per barrel at the end of 2008. At year end 2009 the price per barrel was US\$79.36 and increasing to US\$91.40 at the end of 2010. We currently enter into short-term arrangements to hedge against increases in oil prices and foreign exchange fluctuations.

Our aircraft rent expenses are in U.S. dollars and have increased in line with the expansion of our operations. We use short-term arrangements to hedge against exchange rate exposure related to our lease payment obligations. In addition, leases for 22 of our aircraft are subject to floating-rate payment obligations that are based on fluctuations in international interest rates. We currently have hedging policies in place to manage our interest rate exposure.

Our maintenance, material and repair expenses consist of light (line) and scheduled heavy (structural) maintenance of our aircraft. Line maintenance and repair expenses are charged to operating expenses as incurred. Structural maintenance for aircraft leased under finance leases is capitalized and amortized over the life of the maintenance cycle. Once the maintenance is performed, accrual does not commence again until the maintenance status is reduced below the return condition. Since the average age of our operating fleet was 6.5 years at December 31, 2010 and most of the parts on our aircraft are under multi-year warranties, our aircraft have required a low level of maintenance and therefore we have incurred low maintenance expenses. Our aircraft are covered by warranties that have an average term of three to five years. The warranties on the aircraft we received in 2010 under our firm purchase order with Boeing will start expiring in 2014. Thus, with regard to the accounting for aircraft maintenance and repair costs, our current and past results of operations may not be indicative of future results. Our Aircraft Maintenance Center in Confins, in the State of Minas Gerais is certificated for the maintenance services for Boeing 737-300s and Boeing Next Generation 737-700 and 800s. We currently use the new facility for airframe heavy checks, line maintenance, aircraft painting and aircraft interior refurbishment. We believe that we have an advantage compared to industry peers in maintenance, materials and repairs expenses due to the use of Boeing 737 Next Generation aircraft that allows for phased maintenance as described in this annual report, and due to the internalization of our maintenance. We believe that this advantage will remain in the future.

Our sales and marketing expenses include commissions paid to travel agents, fees paid for our own and third-party reservation systems and agents, fees paid to credit card companies and advertising. Our distribution costs are lower than those of other airlines in Brazil on a per available seat kilometer basis because a higher proportion of our customers purchase tickets from us directly through our website instead of through traditional distribution channels, such as ticket offices, and we have comparatively fewer sales made through higher cost global distribution systems. We generated 88.1% of our consolidated passenger revenues through our website and API systems in the years ended

December 31, 2010 and 92.4% in 2009, including internet sales through travel agents. For these reasons, we believe that we have an advantage compared to industry peers in sales and marketing expenses and expect this advantage will remain in the future.

Salaries, wages and benefits paid to our employees include annual cost of living adjustments and provisions made for our profit sharing plan. We have no seniority-related increases in these costs due to our salary structure. We believe that we have an advantage compared to industry peers in salaries, wages and benefits expenses due to generally lower labor costs in Brazil as compared to other countries. We believe that these advantages will continue to exist in the future.

Aircraft and traffic servicing expenses include ground handling and the cost of airport facilities. Other operating expenses consist of general and administrative expenses, purchased services, equipment rentals, passenger refreshments, communication costs, supplies and professional fees.

Brazilian Economic Environment

As a company with most of its operations currently in Brazil, we are affected by general economic conditions in the country. While our growth since 2001 has been primarily driven by our expansion into new markets and increased flight frequencies, we have also been affected by macroeconomic conditions in Brazil. Our growth outpaced that of our primary competitors because of strong demand for our lower fare service. In 2010, we grew 17.0% in terms of revenue passenger kilometers in the domestic market and considering both international and domestic market 19.2%. The relatively higher consolidated growth rate compared to the domestic market is due to mainly due to the continuing recovery of the Latin American economy, combined with the high demand in Southern Cone routes, especially in Argentina, Chile and Uruguay, the appreciation of the Brazilian *real* against the U.S. dollar. We believe the rate of growth in Brazil is important in determining our future growth capacity and our results of operations.

Our results of operations are affected by currency fluctuations. The vast majority of our revenues are denominated in *reais* (with a small portion of our revenues from our international flights being denominated in other currencies), but a significant part of our operating expenses are either payable in or affected by the U.S. dollar, such as our aircraft operating lease payments, related maintenance reserves and deposits, and jet fuel expenses. Based on a statistical analysis of our first seven years of operations, we believe that our revenues are highly correlated with the *real*/U.S. dollar exchange rate and jet fuel prices because *real* fluctuations and increases in jet fuel prices are generally incorporated into the fare structures of Brazilian airlines. In 2010, 54.7% of our operating expenses (including aircraft fuel) are denominated in, or linked to, U.S. dollars and therefore vary with the *real*/U.S. dollar exchange rate. We believe that our foreign exchange and fuel hedging programs protect us against short-term swings in the *real*/U.S. dollar exchange rate and jet fuel prices. Overall, we believe that the combination of our revenue stream, with its correlation to movements in the *real*/U.S. dollar exchange rate, and short-term hedges on the U.S. dollar-linked portion of our expenses, will mitigate the adverse effect on our operating expenses of abrupt movements in the *real*/U.S. dollar exchange rate.

Inflation has also had, and may continue to have, effects on our financial condition and results of operations. In 2010, 45.3% of our operating expenses (excluding aircraft fuel) were denominated in *reais*, and the suppliers and service providers of these expense items generally attempt to increase their prices to reflect Brazilian inflation.

The following table shows data for real GDP growth, inflation, interest rates, the U.S. dollar exchange rate and crude oil prices for and as of the periods indicated.

	2008	December 31, 2009	2010
Real growth in gross domestic product	5.1%	(0.2)%	7.5%
Inflation (IGP-M) ⁽¹⁾	9.8%	(1.7)%	11.30%
Inflation (IPCA) ⁽²⁾	5.9%	4.3%	5.90%
CDI rate ⁽³⁾	13.5%	8.6%	10.60%
LIBOR rate ⁽⁴⁾	1.4%	0.3%	0.30%
Depreciation (appreciation) of the <i>real</i> vs. U.S. dollar	32.2%	(25.5)%	-4.31%
Period-end exchange rate—US\$1.00	R\$ 2.337	R\$ 1.7412	R\$1.6662
Average exchange rate—US\$1.00	R\$ 1.8364	R\$ 1.9946	R\$1.7593
Period-end West Texas intermediate crude (per barrel)	US\$ 44.6	US\$ 79.36	US\$91.40
Period-end Increase (decrease) in West Texas intermediate crude (per barrel)	(53.5)%	(77.9)%	15.2%
West Texas Intermediate crude (average per barrel during period)	US\$ 99.92	US\$ 62.09	US\$79.63
Average Increase (decrease) in West Texas Intermediate crude (per barrel)	(38.3)%	(37.8)%	28.2%

- (1) Inflation (IGP-M) is the general market price index measured by the Fundação Getúlio Vargas.
- (2) Inflation (IPCA) is a broad consumer price index measured by the Instituto Brasileiro de Geografia e Estatística.
- (3) The CDI rate is average of inter-bank overnight rates in Brazil (accumulated for period-end month, annualized).
- (4) Three-month U.S. dollar LIBOR rate as of the last date of the period. The LIBOR rate is the London inter-bank offer rate.
- (5) Represents the average of the exchange rates on the last day of each month during the period.

Critical Accounting Policies

The preparation of our consolidated financial statements in conformity with IFRS requires our management to adopt accounting policies and make estimates and judgments to develop amounts reported in our consolidated financial statements and related notes. We strive to maintain a process to review the application of our accounting policies and to evaluate the appropriateness of the estimates that are required to prepare our consolidated financial statements. We believe that our estimates and judgments are reasonable; however, actual results and the timing of recognition of such amounts could differ from those estimates. In addition, estimates routinely require adjustment based on changing circumstances and the receipt of new or better information.

Critical accounting policies and estimates are those that are reflective of significant judgments and uncertainties, and potentially result in materially different outcomes under different assumptions and conditions. For a discussion of these and other accounting policies, see Note 2 to our consolidated financial statements.

Accounting for Property, Plant and Equipment. Property, plant and equipment, including rotatable parts, are recorded at cost and are depreciated to estimated residual values over their estimated useful lives using the straight-line method. Each component of property, plant and equipment that has a cost that is significant in relation to the overall cost of the item is depreciated separately. Aircraft and engine spares acquired on the introduction or expansion of a fleet, as well as rotatable spares purchased separately, are carried as fixed assets and generally depreciated in line with the fleet to which they relate. Pre-delivery deposits refer to prepayments made based on the agreements entered into with Boeing Company for the purchase of Boeing 737-800 Next Generation aircraft and includes interest and finance charges incurred during the manufacture of aircraft and the leasehold improvements.

Under IAS 16 “Property, Plant and Equipment,” major engine overhauls including replacement spares and labor costs, are treated as a separate asset component with the cost capitalized and depreciated over the period to the next major overhaul. All other replacement spares and costs relating to maintenance of fleet assets are charged to the income statement on consumption or as incurred. Interest costs incurred and exchange differences on borrowings that fund progress payments on assets under construction, including pre-delivery deposits to acquire new aircraft, are capitalized and included as part of the cost of the assets through the earlier of the date of completion or aircraft delivery. Exchange differences are capitalized to the extent that they are regarded as an adjustment to interest costs.

In estimating the lives and expected residual values of its aircraft, the Company primarily has relied upon actual experience with the same or similar aircraft types and recommendations from Boeing, the manufacturer of the Company's aircraft. Aircraft estimated useful lives are based on the number of "cycles" flown (one-take-off and landing). The Company has made a conversion of cycles into years based on both its historical and anticipated future utilization of the aircraft. Subsequent revisions to these estimates, which can be significant, could be caused by changes to the Company's maintenance program, changes in utilization of the aircraft (actual cycles during a given period of time), governmental regulations related to aging aircraft, and changing market prices of new and used aircraft of the same or similar types. The Company evaluates its estimates and assumptions each reporting period and, when warranted, adjusts these estimates and assumptions. These adjustments are accounted for on a prospective basis through depreciation and amortization expense, as required by IFRS.

We evaluate annually whether there is an indication that our property, plant and equipment may be impaired. Factors that would indicate potential impairment may include, but are not limited to, significant decreases in the market value of the long-lived asset(s), a significant change in the long-lived asset's physical condition, and operating or cash flow losses associated with the use of the long-lived assets. We have not identified any impairments related to our existing aircraft fleet. As of 31 December 2010 and 2009, no impairment on property, plant and equipment assets was recognized.

Lease accounting. Aircraft lease agreements are accounted as either operating or capital leases (finance leases). When the risks and benefits of the lease are transferred to us, as lessee, the lease is classified as capital lease. Capital leases are accounted as an acquisition obtained through a financing, with the aircraft recorded as a fixed asset and a corresponding liability recorded as a loan. Capital leases are recorded based on the lesser of the fair value of the aircraft or the present value of the minimum lease payments, discounted at an implicit interest rate, when it is clearly identified in the lease agreement, or market interest rate. The aircraft is depreciated through the lesser of its useful life or the lease term. Interest expense is recognized through the effective interest rate method, based on the implicit interest rate of the lease. Lease agreements that do not transfer de risks and benefits to us are classified as operating leases. Operating leases are accounted as a rent, and the lease expense is recognized when incurred through the straight line method.

Sale-lease back transactions that result in a subsequent operating lease have different accounting treatments depending on the fair value, the price and the cost of the sale. If the fair value is less than the carrying amount of the asset, the difference is recognized as a loss immediately. When the sale gives rise to a gain it is recognized up to the fair value, the excess is deferred and amortized throughout the term of the lease. When the sale results in a loss and the carrying amount is not greater than fair value, the loss is deferred if compensated by future lease payments. If the carrying amount is greater than fair value it is written down to fair value, and if there is still a loss it is deferred if compensated by future lease payments.

Lease accounting is critical for us because it requires an extensive analysis of the lease agreements in order to classify and measure the transactions in our financial statements and significantly impacts our financial position and results of operations. Changes in the terms of our outstanding lease agreements and the terms of future lease agreements may impact the accounting for the lease transactions and our future financial position and results of operations.

Goodwill and Intangible Assets. We have allocated goodwill and intangible assets with indefinite lives acquired through business combinations for the purposes of impairment testing to a single cash-generating unit, the operating subsidiary VRG. Goodwill is tested for impairment annually by comparing the carrying amount to the recoverable amount of the cash-generating unit level that has been measured on the basis of its value-in-use, by applying cash flow projections in the functional currency based on the Company's approved business plan covering a five-year period followed by the long-term growth rate of 3%. The pre-tax discount rate applied to the cash flow projections is 20.46%

. Considerable judgment is necessary to evaluate the impact of operating and macroeconomic changes to estimate future cash flows and to measure the recoverable amount. Assumptions in the Company's impairment evaluations are consistent with internal projections and operating plans. Airport operating rights were acquired as part of the acquisition of VRG and were capitalized at fair value at that date and are not amortized. Those rights are considered to have indefinite useful lives due to several factors and considerations, including requirements for necessary permits to operate within Brazil and limited slot availability in the most important airports in terms of traffic volume. VRG tradenames were acquired as part of the VRG acquisition and were capitalized at fair value at that date. The tradenames are considered to have an indefinite useful life (and are not amortized) due to several factors and considerations, including the brand awareness and market position, customer recognition and loyalty and the continued use of the VARIG tradenames. The carrying values of the airport operating rights and tradenames are reviewed for impairment at each reporting date and are subject to impairment testing when events or changes in circumstances indicate that carrying values may not be recoverable. Costs related to the purchase or development of computer software that is separable from an item of related hardware is capitalized separately and amortized over a period not exceeding five years on a straight-line basis. The carrying value of these intangibles is reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. The Company assesses at each balance sheet date whether intangibles with indefinite useful lives are impaired using discounted cash flow analyses, which considers the creditworthiness of the issuer of the security, as further described in Note 15 to our financial statements. As of 31 December 2010 and 2009, no impairment on goodwill and other intangible assets was recognized.

Derivative Financial Instruments. The Company accounts for derivative financial instruments in accordance with IAS 39. In executing the risk management program, management uses a variety of financial instruments, to protect against sharp changes in market prices and to mitigate the volatility of its expenditures related to these prices. The Company does not hold or issue derivative financial instruments for speculative purposes.

Derivative financial instruments are initially recognized at fair value and subsequently the change in fair value is recorded in profit or loss, unless the derivative meets the strict criteria for cash flow hedge accounting.

For hedge accounting purposes, according to IAS 39, the hedge instrument is classified as a: (i) cash flow hedge when it protects against the exposure to fluctuations in cash flow that are attributable to a particular risk associated with an asset or liability recognized regarding an operation that is highly likely to occur or to an exchange rate risk for an unrecognized firm commitment, and (ii) fair value hedge when it protects from the results of a change in the fair value of a recognized liability, or a part thereof, that could be attributed to exchange risk.

At the beginning of a hedge transaction, the Company designates and formally documents the item covered by the hedge, as well as the objective of the hedge and the risk policy strategy. Documentation includes identification of the hedge instrument, the item or transaction to be protected, the nature of the risk to be hedged and how the entity will determine the effectiveness of the hedge instrument in offsetting exposure to variations in the fair value of the item covered or the cash flows attributable to the risk covered. The purpose is that such hedge instruments will be effective in offsetting the changes in fair value or cash flows and they are constantly appraised to determine if they really have been effective throughout the entire period for which they have been designated.

Amounts classified in equity are transferred to profit or loss each period in which the hedged transaction affects profit or loss. If the hedged item is the cost of a non-financial asset, the amounts classified in equity are transferred to the initial carrying amount of the non-financial asset.

If the forecast transaction or the firm commitment is no longer expected to occur, amounts previously recognized in equity are transferred to profit or loss. If the hedging instrument expires, is terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognized in equity are recognized in profit or loss.

We measure quarterly the effectiveness of the hedge instruments in offsetting changes in prices. Derivative financial instruments are effective if they offset between 80% and 125% of the changes in price of the item for which the hedge has been contracted. Any gain or loss resulting from changes in the fair value of the derivative financial instruments during the quarter in which they are not qualified for hedge accounting, as well as the ineffective portion of the instruments designated for hedge accounting are recognized as other finance income (expenses).

At December 31, 2010 we had the following derivative financial instruments classified as cash flow hedge: petroleum call options and foreign currency call options denominated in U.S. dollars; classified as fair value hedge: forward contracts for U.S. dollars.

Aircraft maintenance and repair costs. Our aircraft lease agreements specifically provide that we, as lessee, are responsible for maintenance of the leased aircraft and engines, and we must meet specified airframe and engine return conditions upon lease expiration. Under certain of our existing lease agreements, we pay maintenance deposits to aircraft and engine lessors that are to be applied to future maintenance events. These deposits are calculated based on a performance measure, such as flight hours or cycles, and are available for reimbursement to us upon the completion of the maintenance of the leased aircraft. If there are sufficient funds on deposit to reimburse us for our maintenance costs, such funds are returned to us. The maintenance deposits paid under our lease agreements do not transfer either the obligation to maintain the aircraft or the cost risk associated with the maintenance activities to the aircraft lessor.

In addition, we maintain the right to select any third-party maintenance provider or to perform such services in-house. Therefore, we record these amounts as a deposit on our balance sheet and recognize maintenance expense when the underlying maintenance is performed, in accordance with our maintenance accounting policy. Certain of our lease agreements provide that excess deposits at the end of the lease term are not refundable to us. Such excess could occur if the amounts ultimately expended for the maintenance events were less than the amounts on deposit. Any excess amounts held by the lessor or retained by the lessor upon the expiration of the lease, which are not expected to be significant, would be recognized as additional aircraft rental expense at the time it is no longer probable that such amounts will be used for maintenance for which they were deposited. The amount of aircraft and engine maintenance deposits expected to be utilized in the next twelve months is classified in current assets.

At the inception of the leases, our initial estimates of the maintenance expenses are equal to or in excess of the amounts required to be deposited. This demonstrates it is probable the amounts will be utilized for the maintenance for which they are to be deposited and the likelihood of an impairment of the balance is remote. There has been no impairment of our maintenance deposits.

A summary of activity in the Aircraft and Engine Maintenance Deposits is as follows:

	2009	2010
	(in thousands of reais)	
Beginning of year	391,989	446,530
Amounts paid in	103,480	206,151
Reimbursement of expense incurred	(48,939)	(196,015)
End of year	446,530	456,666

Our fleet plan contemplates the replacement of some operating leases with financing lease agreements, in line with our plan to further standardize our fleet with Boeing Next Generation 737-700 and 737-800 aircraft. Due to the performance advantages of Boeing Next Generation 737-700 and 737-800 aircraft, we believe these aircraft should sustain attractive market valuations over the next years. We therefore intend to increase the number of financing leases. In light of this trend, our maintenance deposit accounts should decrease in the near term, subject to significant potential variations, including the actual cost of maintenance, the timing of the maintenance, aircraft cycles and potential new maintenance requirements.

Revenue Recognition. Passenger revenue is recognized either when transportation is provided or when the unused ticket expires. Tickets sold but not yet used are recorded as advance ticket sales that represents primarily deferred revenue for tickets sold for future travel dates.

Mileage Program. Since the acquisition of VRG, the Company operates a frequent flyer program, (“Smiles Program”) that provides travel and other awards to members based on accumulated mileage credits. The obligations assumed under the Smiles Program were valued at the acquisition date at estimated fair value that represents the estimated price the Company would pay to a third party to assume the obligation for miles expected to be redeemed under the Smiles Program. The fair value of mileage credits, net of estimated non-use of miles (breakage) is determined by the weighted average according to (i) the average amount charged per seat by VRG to airlines that participate in the loyalty program divided by the amount of miles required to issue a ticket using miles and (ii) the average sale price of miles sold to airlines that participate in the loyalty program Smiles. This fair value is updated every six months.

Share-Based Payments. The Company measures the fair value of equity-settled transactions with employees at the grant date using the Black&Scholes valuation model. The resulting amount, as adjusted for forfeitures is charged to income over the period in which the options vest. At each balance sheet date before vesting, the cumulative expense is calculated; representing the extent to which the vesting period has expired and management’s best estimate of the number of equity instruments that will ultimately vest. The change in cumulative expense since the previous balance sheet date is recognized in the income statement prospectively over the remaining vesting period of the instrument.

Provisions. For certain operating leases, the Company is contractually obligated to return aircraft in a defined condition. The Company accrues for restitution costs related to aircraft held under operating leases at the time the asset does not meet the return condition criteria throughout the duration of the lease. Other provisions are recorded for probable losses and are reviewed based on the development of lawsuits and the background of losses on labor and civil claims, based on the best current estimate.

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset when the reimbursement is virtually certain. The expense relating to any provision is presented in profit or loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Deferred taxes. Deferred taxes are calculated based on tax losses, temporary differences arising on differences between tax bases and carrying amounts for financial reporting purposes of our assets and liabilities.

Even though unused tax losses and temporary differences have no expiration date in Brazil, deferred tax assets are recorded when there is evidence that future taxable profit will be available to use such tax credits. We record our deferred tax assets based on projections for future taxable profits, which considers a number of assumptions for revenue increase, for operating costs such as jet fuel prices, leasing expenses and etc. Our business plan is revised annually in order to reevaluate the amounts to be recorded as deferred tax assets.

Deferred taxes is a critical accounting policy for us because it requires a number of assumptions and is based on our best estimate of our projections related to future taxable profit. In addition, because the preparation of our business plan is subject to a variety of market conditions, the results of our operations may vary significantly from our projections and as such, the amounts recorded as deferred tax assets may be impacted significantly in the future.

Results of Operations

Year 2010 Compared to Year 2009

Our results of operations in 2010 were affected by the following key drivers:

Strong growth in domestic market: In 2010, the improved economic scenario in Brazil and South America as a whole, especially from the consumer confidence point of view and the expansion of the country's emerging middle class, which led to a greater number of people opting for air transport, were the main factors for the increase in domestic demand. As a result we grew 17.0% as compared to 2009 in terms of revenue passenger kilometers in the domestic market.

Implementation of new cost reduction initiatives: We have completed our fleet renewal plan in 2010, with the return of the remaining 11 Boeing 737-300 aircraft. This will benefit future years with a reduction of approximately R\$9 million per quarter of leasing expenses. We will replace more aircrafts with new Boeing 737-800 and 700s NGs aircrafts that will provide lower cost of inventories and spare parts, less fuel consumption and lower crew training costs. We also have implemented several measures for cost reduction resulting in a reduction of other operating expenses, including: the implementation of the Shared Services Center, the adoption of zero based budgeting methodology and investments linked to IT improvements of internal controls systems in order to improve operational

efficiency. Our high aircraft utilization rate of 12.9 block hours per day in 2010, an increase of 10.4% compared to the 11.6 block hours per day recorded in 2009, also contributed to dilute fixed costs.

We present in the following table information regarding our results of operations in IFRS in 2010 and 2009.

	Year Ended December 31,	
	2009	2010
	(in thousands of reais)	
Income Statement Data:		
Net operating revenues:		
Passenger	5,306,530	6,277,657
Cargo and other	718,852	701,790
Total net operating revenues	6,025,382	6,979,447
Operating expenses:		
Salaries, wages and benefits	(1,100,953)	(1,252,402)
Aircraft fuel	(1,813,104)	(2,287,410)
Aircraft rent	(650,683)	(555,645)
Sales and marketing	(364,551)	(367,757)
Landing fees	(312,637)	(331,883)
Aircraft and traffic servicing	(381,721)	(427,853)
Maintenance, materials and repairs	(417,212)	(422,950)
Depreciation and amortization	(142,853)	(281,604)
Other operating expenses	(428,376)	(354,147)
Total operating expenses	(5,612,090)	(6,281,652)
Operating income before financial results	413,292	697,795
Interest expense	(288,112)	(338,609)
Financial income, net	630,956	27,310
Income before income taxes	756,136	386,496
Income taxes	134,696	(172,299)
Net income for the year	890,832	214,197

We had operating income of R\$697.8 million in 2010 compared to R\$413.2 million in 2009. Our operating margin was 10.0% in 2010, and 6.9% in 2009. We reported net income in 2010 of R\$214.2 million compared to R\$890.8 million for 2009. Income before income tax was R\$386.5 million in 2010 compared to R\$756.1 million in 2009.

Net Operating Revenues. Net operating revenues increased 15.8% to R\$6,979.5 million in 2010 as compared to 2009 as a result of the increased demand for domestic flights emerging from the Brazilian middle class due to the positive macroeconomic scenario, in addition to our: (i) dominant position and increased frequency between the Brazilian leading airports; (ii) high operating quality indices (punctuality, regularity, client service and safety); (iii) dynamic fare management, which combines the strengthening quarterly yields with stimulation demand for leisure travelers; (iv) growth of the Smiles mileage program and; (vi) focus on short-haul flights in a range of three hours or less, benefiting business travelers. Our consolidated demand increased 19.2%. Our domestic market demand increased by 17.0%, while international market demand increased 46.2% as a result of our international network expansion with the introduction of new routes in the Southern Cone and Caribbean regions and the introduction of new regional destinations in Brazil in addition to markets operated by our new regional airline partners. The higher demand was partially offset by a 0.8% decrease in yields to R\$20.5 cents in 2010 from R\$20.7 cents in 2009 due to a variety of factors: (i) a more stable capital markets scenario, (ii) lower selling expenses in the domestic market due to a gradual decrease during 2009 of commissions paid to travel agencies in the domestic market (valid for all players in the industry) which were fully extinguished in February 2010, (iii) the upturn in economic activity and consumer confidence, reflected in increased demand for leisure trips that consequently, generate larger forward bookings; (iv) an

increase in the average stage length by 1.9% and; (v) lower U.S. dollar and WTI oil price volatility.

Our load factor increased 1.9 percentage points from 65.3% in 2009 to 67.1% in 2010, mainly due to lower increase in available seat kilometers by 14.0% compared to the increase of 17.3% in revenue passenger kilometers.

Our ancillary and other revenues decreased 2.4% from R\$718.9 million in 2009 to R\$701.8 million in 2010, representing 10.1% of our total net revenues, mainly due to the decrease in no-show fee and tickets rescheduling revenue and due to revenues of R\$48.1 million in 2009 related to image rights and rental of our *Smiles* client database as part of the co-branded credit card contract.

Operating Expenses. Operating expenses per available seat kilometer decreased 1.8% from R\$13.91 cents in 2009 to R\$13.78 cents in 2010, primarily due to the (i) increased available seats kilometers by 14.0%; (ii) 10.4% increase in aircraft utilization; (iii) 1.8% extension of the average stage length, offset by an increase of 10.8% in fuel cost from R\$4.53 cents to R\$5.02 cents per available seat kilometers. Operating expenses per available seat kilometer excluding fuel decreased 7.8% from R\$9.41 cents to R\$8.76 cents in 2010, mainly due to lower aircraft rent, maintenance, sales and marketing and other operating expenses; offset by the non-recurring costs arising from the fleet renewal carried out in 2010 to return eleven Boeing 737-300 aircraft and the maintenance expenses for reactivation of five Boeing 767, four for long-haul international charter and one for sub-leasing operations.

Our breakeven load factor increased 1.2 percentage points to 60.4% in 2010 compared to 59.2% in 2009, primarily due to (i) higher fuel cost per liter; (ii) 0.8% decline in yields and; (iii) a 3.5 percentage points increase in load factor.

The breakdown of our operating expenses on a per available seat kilometer basis for 2010 compared to 2009 is as follows.

	Year Ended December 31,	
	2009	2010
	(cost per available seat kilometer in R\$ cents)	
Operating expenses:		
Salaries, wages and benefits	2.73	2.75
Aircraft fuel	4.49	5.02
Aircraft rent	1.61	1.22
Sales and marketing	0.90	0.81
Landing fees	0.78	0.73
Aircraft and traffic servicing	0.95	0.94
Maintenance materials and repairs	1.03	0.93
Depreciation and amortization	0.36	0.62
Other operating expenses	1.06	0.77
Total operating expenses	13.91	13.79
Cost per flight hour	14.88	14.95

Note: In October 2010, ANAC changed its calculation method for monthly traffic information and republished information for periods since January 2009. All operating data for 2009 and 2010 reflects the new methodology, whereas information for 2007 and 2008 was calculated pursuant to the old methodology and may not be fully comparable. According to ANAC, the changes were designed to align data with the concepts adopted by the ICAO. The change was necessary because Brazil has joined the ICAO's statistical program and supplies the latter's database with several industry data. Changes in the methodology refer to the calculation of ASK (seat supply) and the classification of domestic legs in international flights, which are now considered to be part of the domestic market. ANAC has stated that it will republish information for 2008 at a later date.

Salaries, wages and benefits increased 13.8%, or R\$151.4 million, due to (i) a 6% partial cost of living increase on salaries effected in December 2010; (ii) higher constituted provisions for employee profit sharing based on the stock option plan and; (iii) a 4.5% increase in the number of employees from 17,963 in 2009 to 18,776 in 2010, especially in the operational, airport and call center areas, in turn fueled by the need to adjust to the growth in our operations and the growth of 15.8% in passengers transported. Salaries, wages and benefits per available seat kilometer increased 0.8% due to the same reasons, although diluted by the increase in available seat kilometers in 2010.

Aircraft fuel expense increased 26.2%, or R\$ 474.3 million, primarily due to a 22.4% increase in average oil (WTI) prices, 3.4% increase in fuel consumption due to the growth in the operations and higher number of average operating aircrafts (from 108 in 2009 to 111 in 2010). Aircraft fuel expense per available seat kilometer increased 11.7% due to the same reasons, although diluted by the increase in available seat kilometers in 2010.

Aircraft rent, which we incur in U.S. dollars, decreased 14.6%, or R\$ 95.1 million, due to a 11.7% average depreciation of the U.S. dollar against *real* and a 18.2% increase in the total fleet under finance leases from 33 in 2009 to 39 in 2010. Aircraft rent per available seat kilometer decreased 24.4%, due to the same reasons, although emphasized by an increase in available seat kilometers in 2010.

Sales and marketing expense increased 0.9%, or R\$ 3.2 million, resulting from (i) additional advertising expenses in order to revitalize our Smiles mileage program; (ii) advertising expenses from a new institutional campaign and; (iii) higher commissions paid to credit card administrators due to the increase in direct sales, partially offset by the elimination of ticket sales commissions for travel agents as of the beginning of February, 2010. Sales and marketing per available seat kilometer decreased 10.7% due to the increase in available seat kilometers in 2010.

Landing fees increased 6.2%, or R\$19.3 million, mainly due to a 7.9% increase in departures. Landing fees per available seat kilometer decreased 6.0% due to the increase in available seat kilometers in 2010.

Aircraft and traffic servicing expense increased 12.1%, or R\$46.2 million, primarily due to an increase in the average operating fleet (from 108 in 2009 to 111 in 2010), increased handling expenses as a result of increased arrivals and departures and additional IT and consulting services related to (i) the implementation of the new budget planning method (zero base budget), (ii) the Shared Service Center aiming to improve the quality and productivity of our operations, (iii) the migration of our Smiles system from IBM to Oracle (Siebel) and (iv) the improvement of internal software (related to check-in developments, buy on board services and wireless entertainment service). Aircraft and traffic servicing expense per available seat kilometer decreased 0.8% due to the same reasons, although diluted by the increase in available seat kilometers in 2010.

Maintenance, materials and repairs increased 1.4%, or R\$5.8 million, due to increase in scheduled aircraft maintenance events during the year, reflecting the larger average operating fleet and non-recurring expenses related to the fleet renovation and standardization program, with return of eleven remaining Boeing 737-300 and reactivation of five Boeing 767 to long-haul international charters and sub-leasing operations. Maintenance, materials and repairs per available seat kilometer decreased 10.7% primarily due to the increase in available seat kilometers in 2010.

Depreciation and amortization increased 97.1% or R\$138.7 million, due primarily to (i) the higher number of aircrafts under finance leases (from 33 in 2009 to 39 in 2010); (ii) a change in 2010 in the estimate for the depreciation of maintenance costs for engines under finance leases, which now have a 5-year depreciation period, whereas the remaining items continue to depreciate over 25 years. Depreciation and amortization per available seat kilometer increased 74.5% due to the same reasons, although diluted by the increase in available seat kilometers in 2010.

Other operating expenses (mainly comprising accommodation, crew travel and accommodation, direct passenger expenses, equipment leasing and general and administrative expenses) decreased 17.3%, or R\$74.3 million, due to several factors: (i) more efficient controls over general and administrative expenses (telephone, water, gas and electricity), as well as losses of inventories, uniforms and other inputs in the operational bases, (ii) gains from the automation of our internal systems (inventories, accounts, billing, legal affairs and accounts receivable), which led to better controls over provisions and reduction in general and administrative expenses; (iii) optimization of our route network; (iv) fewer flight cancellations; and (v) greater volume of IT equipment under finance leases, reducing expenses from equipment rentals. Other operating expenses per available seat kilometer decreased 26.8% due to the same reasons, although emphasized by the increase in available seat kilometers in 2010.

Financial Income (Expense). Financial expense in 2010 totaled R\$311.3 million compared to a financial income of R\$342.8 million in 2009, mainly as a result of: (i) lower non-cash foreign exchange variation gains on our assets and liabilities of R\$661.7 million due to the impact of the 4.3% appreciation of the *real* against the U.S. dollar during 2010 (compared to a 25.5% appreciation in 2009); (ii) higher interest expenses related to the increase in our indebtedness with the issue of senior notes in July 2010 and debentures in September, 2010; (iii) partially offset by the R\$33.9 million increase of interest revenue due to the higher cash position since the end of 2009.

Income Taxes. Our income taxes totaled R\$172.3 million in 2010, compared to an income tax benefit of R\$134.7 million in 2009, mainly as a result of higher current income tax in 2010 due to higher taxable income basis calculated in accordance with Brazilian corporation law (No. 6,404/76) and higher deferred income tax expense caused by: (i) temporary differences arising mainly from the exchange variation on financial leasing operations which generate deferred income tax liabilities; (ii) recognition in 2009 of deferred income tax credits resulting from tax losses generated by VRG acquisition and; (iii) tax credits from temporary differences recorded in 2009 based on expectations for future taxable income.

Year 2009 Compared to Year 2008

Our results of operations in 2009 were affected by the following key drivers:

VRG Merger: Our corporate restructuring, which allowed us to fully integrate VRG into our operations, was concluded in the last quarter of 2008 and therefore we were operating on a fully integrated basis since January 2009. The merger was the key driver to the cost reduction and optimization of our route network, enabling us to gather the expected synergies from the VRG acquisition in 2007 (including the revamp of our *Smiles* loyalty program), benefit from our high frequency route network and generate operating profits in all quarters of 2009.

Better market positioning and focus on our competitive strengths: since the merger of VRG into our operations, we have focused on our core competitive strengths. We discontinued our intercontinental flights to the EU in mid-2008 and relied on our operations in Brazil and South America. According to TMC Brasil and Favecc, the largest business travel agency associations in Brazil, our market share among business passengers increased by 6.1 and 8.3 percentage points, from 34.5% to 40.7% and from 25.7% to 33.8%, respectively. These advantages combined with our low cost structure and dynamic yield management enabled us to also continue to offer low fares to compete against airlines and interstate buses and stimulate demand from the growing Brazilian middle class, resulting in a 6% increase in market share among first time travelers.

Positive macroeconomic scenario: demand in the Brazilian airline industry was, during the recent global financial crisis, not as significantly affected as worldwide air travel demand and demand in other consumer based industries in Brazil or worldwide. In 2009, volatility in the financial and oil markets was relatively low, which benefited our yield management and cost structure. The second half of 2009 was particularly positive, principally due to improved consumer confidence levels and an ongoing change in customer behavior, shifting towards a relative increase in leisure expenditures in the disposable income share of wallet. According to the Brazilian Ministry of Tourism, the Brazilian middle class will increase their share in the leisure segment from 35.5% between 2007 and 2009 to 58.5% between 2009 and 2011. In light of the combination of these factors, demand grew 17.7% in 2009 in the domestic market, the vast majority of which was generated during the second half, when the industry experienced domestic growth averaging more than 30% year over year from the last quarter 2008 as compared to the last quarter 2009. These positive factors were partially offset by a highly competitive scenario in the domestic market, principally during the months of September and October 2009.

We present in the following table information regarding our results of operations in IFRS in 2009 and 2008.

	Year Ended December 31,	
	2008	2009
	(in thousands of reais)	
Income Statement Data:		
Net operating revenues:		
Passenger	5,890,104	5,306,530
Cargo and other	516,089	718,852
Total net operating revenues	6,406,193	6,025,382
Operating expenses:		
Salaries, wages and benefits	(983,783)	(1,100,953)
Aircraft fuel	(2,630,834)	(1,813,104)
Aircraft rent	(645,089)	(650,683)
Sales and marketing	(588,735)	(364,551)
Landing fees	(338,370)	(312,637)
Aircraft and traffic servicing	(422,177)	(381,721)
Maintenance, materials and repairs	(388,030)	(417,212)
Depreciation and amortization	(125,127)	(142,853)
Other operating expenses	(372,696)	(428,376)
Total operating expenses before financial results	(6,494,841)	(5,612,090)
Operating income (loss) before financial results	(88,648)	413,292
Interest expense	(269,278)	(288,112)
Financial income (expense), net	(837,116)	630,956
Income (loss) before income taxes	(1,195,042)	756,136
Income taxes	(44,305)	134,696
Net income (loss) for the year	(1,239,347)	890,832

We note that in October 2010, ANAC changed its calculation method for monthly traffic information and republished information for periods since January 2009. For the purposes of the comparison between the years ended December 31, 2009 and 2008 presented below we have not reflected the new methodology, whereas information for the comparison between the years ended December 31, 2010 and 2009 presented above were calculated and presented pursuant to the new methodology. As a result these two comparisons may not be fully comparable. According to ANAC, the changes were designed to align data with the concepts adopted by the ICAO. The change was necessary because Brazil has joined the ICAO's statistical program and supplies the latter's database with several industry data. Changes in the methodology refer to the calculation of ASK (seat supply) and the classification of domestic legs in international flights, which are now considered to be part of the domestic market. ANAC has stated that it will republish information for 2008 at a later date.

We had operating income of R\$413.2 million in 2009 compared to operating losses of R\$88.6 million in 2008. Our operating margin was 6.9% in 2009, and a negative 1.4% in 2008. We reported net income in 2009 of R\$890.8 million compared to a net loss of R\$1,239.3 million for 2008. Income before income tax was R\$756.1 million in 2009 compared to losses before income tax of R\$1,195.0 million in 2008.

Net Operating Revenues. Net operating revenues decreased 5.9% to R\$6,025.4 million in 2009 as a result of our decision to discontinue intercontinental flights since the second half of 2008, focusing our operations in the domestic market, South America and deploying new routes to the Caribbean Region (Aruba and Curacao). Consolidated

demand increased 3.1% . Domestic market demand increased by 14.9%, while in the international market dropped 44.2% as a result of the discontinuation of our intercontinental flights to the EU in mid 2008 and the low demand to our routes to Argentina and Chile, due to the swine flu, especially during the second and third quarter of 2009. The higher demand was partially offset by a 12.6% decrease in yields to R\$20.34 cents in 2009 from R\$23.27 cents in 2008 due to a variety of factors: (i) more stable capital markets scenario, (ii) lower selling expenses in the domestic market due to a gradual decrease during 2009 of commissions paid to travel agencies in the domestic market (valid for all players in the industry) which were fully extinguished in February 2010, (iii) a highly competitive scenario in the domestic market, principally during the months of September and October 2009 and (iv) high demand growth from Brazilian consumers during the second half of 2009, mainly due to the positive economic scenario and improved consumer confidence.

Despite the 1.8% increase in the average number of operating aircraft from 106.4 in 2008 to 108.7 in 2009, our operating capacity decreased 2.7% in terms of available seat kilometers, from 41,107 million in 2008 to 39,998 million in 2009. The lower capacity was mainly due to the discontinuation of the long haul flights and our focus on fine tuning our capacity to demand growth by adjusting our aircraft utilization rate, especially during the first half of 2009, when the macroeconomic environment was still not as positive as during the second half of 2009. As a consequence, our utilization rate dropped 4.1% from 12.2 in 2008 to 11.6 in 2009. The number of departures increased 1.9% from 268,540 in 2008 to 273,602 in 2009 driven by our strategy to focus our operations in Brazil, South America and Caribbean markets, reflecting our average stage length to decrease by 4.7% from 933 km in 2008 to 890 km in 2009.

Our load factor increased 3.7 percentage points from 61.6% in 2008 to 65.3% in 2009, mainly due a 2.7% decrease in available seat kilometers and a 3.1% increase in revenue passenger kilometers.

Our ancillary revenues are derived from the *Gollog* and *Voe Fácil* businesses as well as ticket change fees, excess baggage charges, *Smiles* co-branded credit card and other incidental services, and are an increasingly important part of our revenue composition. Our ancillary and other revenues increased 39.3% from R\$516.1 million in 2008 to R\$718.9 million in 2009, representing 11.9% of our total net revenues, mainly due to one off revenues of R\$48.1 million related to image rights and rental of our *Smiles* client database as part of the co-branded credit card contract, higher revenues from cargo transportation and other fees related to flight rescheduling and excess baggage.

Operating Expenses. Operating expenses per available seat kilometer decreased 11.2% to R\$14.03 in 2009, primarily due to (i) a 29.2% decrease in fuel cost from R\$6.40 cents in 2008 to R\$4.53 cents in 2009, (ii) a more favorable macroeconomic scenario in Brazil and (iii) the better cost structure after fully integrated VRG into our operations in the last quarter of 2008. Operating expenses per available seat kilometer excluding fuel increased by 1.2% to R\$9.50 in 2009, mainly due to non-recurring expenses related to (i) the fleet renewal carried out in 2009 in order to further standardize our fleet, which, since January 2010, has been fully comprised of Boeing Next Generation aircraft Boeing 737-700, and 737-800, and (ii) non-recurring expenses related to VRG merger concentrated in the first half of 2009, and recurring expenses related to Boeing 767 aircrafts.

Our breakeven load factor decreased 1.6% percentage points to 60.8% in 2009 compared to 62.4% in 2008, primarily due the lower fuel cost per liter and lower cost structure, a 3.7 percentage points increase in load factor, partially offset by a 12.6% decline in yields.

The breakdown of our operating expenses on a per available seat kilometer basis for 2009 compared to 2008 is as follows.

	Year Ended December 31,	
	2008	2009
	(cost per available seat kilometer in R\$ cents)	
Operating expenses:		
Salaries, wages and benefits	2.39	2.75
Aircraft fuel	6.40	4.53
Aircraft rent	1.57	1.63
Sales and marketing	1.43	0.91
Landing fees	0.82	0.78
Aircraft and traffic servicing	1.03	0.95
Maintenance materials and repairs	0.94	1.04

Depreciation and amortization	0.30	0.36
Other operating expenses	0.91	1.08
Total operating expenses	15.80	14.03
Cost per flight hour	16.84	14.88

Salaries, wages and benefits increased 11.9%, or R\$117.2 million, due to a 8% cost of living increase on salaries effected in December 2008, a 12.9% increase in the number of employees from 15,911 in 2008 to 17,963 in 2009 (mainly due to the internalization of our call center) and a provision for our profit sharing plan of R\$71 million, due to the company's return to profitability. Salaries, wages and benefits per available seat kilometer increased 15.2% due to the same reasons, although less diluted due to the decrease in available seat kilometers in 2009.

Aircraft fuel expense decreased 31.1%, or R\$817.7 million, primarily due to a 37.9% decrease in average oil (WTI) prices, partially offset by an 8.5% average appreciation of the U.S. dollar against the *real*. Aircraft fuel expense per available seat kilometer decreased 29.2% due to the same reasons, although less diluted by the decrease in available seat kilometers in 2009.

Aircraft rent, which we incur in U.S. dollars, increased 0.9%, or R\$5.6 million, due to a 4.4% increase in the total fleet under operational leases from 90 in 2008 to 94 in 2009. This tendency was partially offset by an 8.5% average appreciation of the U.S. dollar against the *real*. Aircraft rent per available seat kilometer increased 3.6%, reflecting a lower expense dilution due to the lower available seat kilometers in 2009.

Sales and marketing expense decreased 38.1%, or R\$224.2 million, resulting from the integration of VRG's reservation systems that optimized selling expenses as well as the progressive decrease in travel agent commissions for domestic market sales. Sales and marketing per available seat kilometer decreased 36.2% due to the same reasons, although diluted by the decrease in available seat kilometers in 2009.

Landing fees decreased 7.6%, or R\$25.7 million, mainly due to the discontinuation of intercontinental flights in the second half of 2008 resulting in lower fares, partially offset by the 1.9% increase in the number of departures. Landing fees per available seat kilometer increased 4.7% due to the same reasons, although less diluted by the decrease in available seat kilometers in 2009. Aircraft and traffic servicing expense increased 9.6%, or R\$40.5 million, primarily due to same reasons that impacted landing fees. Aircraft and traffic servicing expense per available seat kilometer decreased 7.3% due to the decrease in the total capacity as a result of our decision to discontinue intercontinental flights as of July 2008.

Maintenance, materials and repairs increased 7.5%, or R\$29.2 million, due to increased maintenance expenses related to the return of part the Boeing 737-300 fleet as part of the further fleet standardization and renovation plan, partially offset by a 8.8% decrease in engine overhauls from 58 in 2008 to 51 in 2009. Maintenance, materials and repairs per available seat kilometer decreased 11.0% primarily due to the same reasons, although less diluted by the decrease in available seat kilometers in 2009.

Depreciation and amortization increased 14.2% or R\$17.7 million, due primarily to the increase in fixed assets resulting from the addition of 8 aircraft as finance leases during 2009. Depreciation and amortization per available seat kilometer increased 19.1% due to the same reasons, although less diluted by the decrease in available seat kilometers in 2009.

Other operating expenses increased 14.9%, or R\$55.7 million, due to expenses of R\$73.0 million related to the integration of accounting systems that provided further automation of our consolidation process and adherence to the Brazilian Federal Taxes Installment Payment Program (REFIS), to finance past due taxes in up 180 installments. Other operating expenses per available seat kilometer decreased 18.7% due to the same reasons, although diluted by the increase in available seat kilometers in 2008.

Financial Income. Financial income totaled R\$342.8 million as of December 31, 2009, compared to a financial expense of R\$1.106.4 million in 2008, mainly as a result of non-cash foreign exchange variation gain on our assets and liabilities of R\$713.4 million due to the impact of the appreciation of the *real* against the U.S. dollar during 2009.

Income Taxes. We recorded an income tax benefit of R\$134.7 million in 2009, compared to an expense of R\$44.3 million, mainly due to the use of tax credits in the amount of R\$135.3 million from tax losses generated by VRG, acquired in 2007. This change was possible due to our positive operating profit for the last six quarters and we expect that this trend will continue in the next years

B. Liquidity and Capital Resources

Cash Flow Analysis

Operating Activities. Our strategy is to rely primarily on cash flows from operations to provide working capital for current and future operations. In 2010, we generated R\$723.9 million in cash from our operating activities reflecting the increase in our operating profitability. In 2009 and 2008 net cash provided by operating activities was R\$457.3 million and R\$151.7 million, respectively. Cash flows from operating activities for 2010 were also driven by R\$214.2 million in net income, plus noncash depreciation and amortization expense of R\$281.6 million, noncash interest on loans of R\$297.3 million, and a R\$208.5 million increase in accounts receivable. Cash flows associated with financial derivative instruments, which are also classified as operating cash flows, were net inflows of R\$117.0 million in 2010. These increases were partially offset by an increase of R\$146.6 million in accounts payable, an outflow of R\$162.2 million in advance from customers and an increase R\$124.7 million in provisions. In 2009, we generated R\$457.3 million cash from our operating activities, mainly driven by our net income of R\$890.8 million, and partially offset by the decrease in accounts receivable of R\$182.0 million and a decrease in deposits of R\$124.2 million. The lower cash flows from operations activities in 2008, was mainly due to the net operating losses for the year.

Our operating cash flows are affected by the requirement under the terms of certain of our aircraft operating lease agreements that we establish maintenance reserve deposit accounts for our aircraft that must be funded at specified levels. At December 31, 2010, we had R\$456.7 million of deposits under our aircraft operating leases for maintenance. Funds will be drawn from the maintenance reserve accounts to reimburse for certain structural maintenance expenditures incurred. We believe the amounts deposited and to be deposited plus our own cash resources will be sufficient to service our future aircraft and maintenance costs for the duration of the applicable operating leases.

Investing Activities. Net cash used in investing activities was R\$279.5 million primarily due to acquisitions of property and equipment, including spare parts and aircraft modifications, investments in the expansion of Confins Maintenance Center and pre-delivery deposits for the acquisition of Boeing 737 aircrafts. During 2009, capital expenditures were R\$130.5 million, due to investments in airport infrastructure and stores, especially in South American destinations, information technology, rotables and spare parts. In 2008, capital expenditures were R\$346.0 million related to acquisitions of property, plant and equipment and cash generated was R\$40.6 million.

Financing Activities. Net cash provided by financing activities totaled R\$139.9 million in 2010 and consisted primarily of capital we raised in our issuance of R\$525.5 million senior notes (equivalent to US\$300 million on the date of issuance) maturing in 2020, and the issuance of our 4th series of debentures in the amount of R\$600 million that we used to repay the remaining balance of R\$378 million from our 3rd series of debentures. These proceeds were partially offset by the prepayment of working capital lines and other debt maturing within 3 years range, and by the decrease in the dividends paid during the period. Net cash provided by financing activities totaled R\$769.2 million in 2009, as compared to net cash used in financing activities of R\$611.3 million in 2008, mainly due to receipt of net proceeds from a follow-on offering of common and preferred shares in the amount of R\$600.3 million concluded in October 2009 and receipt of net proceeds from a rights offering in the amount of R\$203.5 million concluded in the second quarter of 2009.

Liquidity

In managing our liquidity, we take into account our cash and cash equivalents and short-term investments as well as our accounts receivable balances. Our accounts receivable balance is affected by the payment terms of our credit card

receivables. Our customers can purchase seats on our flights using a credit card and pay in installments, typically creating a one-or two-month lag between the time that we pay our suppliers and expenses and the time that we receive payment for our services. When necessary, we obtain working capital loans, which can be secured by our receivables, to finance the sale-to-cash collection cycle.

We have a strong balance sheet, especially our cash and cash equivalents position which as of December 31, 2010 was equivalent to 28.3% of our trailing twelve months' net operating revenues and already surpasses our initial target of to at least 25% of trailing twelve months' net operating revenues. This position also covers 5.7 times our short-term obligations, which we believe currently is an appropriate level of liquidity. We are also committed to have no significant financial debt maturities coming due within any three-year horizon.

The following table sets forth certain key liquidity data in IFRS at the dates indicated:

	2009	At December 31, 2010	% Change
	(in millions of reais)		
<i>Real Denominated</i>	1,968.2	2,316.1	17.68%
Cash and Cash Equivalents	1,382.4	1,955.9	41.49%
Short-Term Investments and Restricted Cash	66.5	57.1	(14.14)%
Short-term Receivables	519.3	303.1	(41.63)%
<i>Foreign Exchange Denominated</i>	804.6	323.7	(59.77)%
Advances for acquisition of aircraft	804.6	323.7	(59.77)%
Total Cash Deposits	2,772.8	2,639.8	(4.80)%

At December 31, 2010, cash, short-term investments and restricted cash were R\$2,013.0 million, comprised by R\$1,955.9 in cash and cash equivalents balance, R\$22.6 million in short-term investments representing immediate liquid financial assets and R\$34.5 million in restricted cash. The increase in total liquidity as compared to 2009 is mostly due to operating cash flow generation and the several measures in 2010 towards increasing our liquidity such as (i) our 4th debenture issuance in the amount of R\$600 million, which were used to finance working capital, pay suppliers and settle the outstanding balance of our 3rd debenture issue in the amount of R\$378 million; and (ii) the R\$525.5 million senior notes issue (equivalent to US\$300 million on the date of issuance) in July 2010, which proceeds were used to settle the working capital credit lines and other debt maturing within 3-years range.

Short-term receivables include credit card sales, the *Voe Fácil* installment payment program, accounts receivables from travel agencies and cargo transportation. At the end of 2010, we had decreased the volume of short-term receivables as compared to 2009, due to increase in the volume of discounted receivables.

At December 31, 2010, we had R\$308.5 million deposited with Boeing as advances for aircraft acquisitions, a decrease of 39.1% as compared to December 31, 2009, mainly due to the higher number of aircraft delivered in 2010 with the deposit returned to us and the lower number of new aircraft deliveries scheduled to be delivered from Boeing under our fleet plan in the next 18 months as compared to the same period in 2009.

As a result, our total cash deposits was R\$2,605.2 million at December 31, 2010 as compared to R\$2,765.5 million at December 31, 2009.

Indebtedness

The following table sets forth our loans and financings at December 31, 2010 and 2009:

	2009	At December 31, 2010	% Change
	(in millions of reais)		
Loans and Financing	1,003.1	1,709.4	70.41%
Aircraft Financing*	1,800.8	1,680.1	(6.70)%
Interest	19.9	53.7	169.80%
Perpetual Bonds	310.1	297.9	(3.92)%

Total Loans and Financing	3,133.9	3,741.1	19.37%
----------------------------------	----------------	----------------	---------------

* As of December 31, 2010 there were no PDP facilities outstanding.

At the close of fiscal year 2010, our total debt was R\$3.7 billion, with an average term of 8.6 years (excluding aircraft financing and perpetual notes) and an average interest rate of 11.2% for obligations in local currency and of 6.5% for U.S. dollar denominated obligations. Excluding our perpetual bonds, which have no maturity date, total loans and financing totaled R\$3.4 billion at December 31, 2009, with a positive foreign exchange effect due to the appreciation of the *real* against the U.S. dollar of 4.3% between the two periods. The increase compared to 2009 was due to the 4th issuance of debentures in the amount of R\$600 million and the R\$525.5 million issuance of senior notes (equivalent to US\$300 million on the date of issuance) in July 2010, partially offset by the settlement of our PDP Facility line and working capital credit lines and other debt maturing within three years.

Loans and Financing

The following table sets forth our short- term and long-term loans (excluding aircraft financings) as of December 31, 2009 and 2010:

	2009*	At December 31, 2010*	% Change
	(in millions of reais)		
Short-Term Debt			
Local Currency	177.2	129.1	(27.16)%

Perpetual Bonds**	310.1	297.9	(3.92)%
Total Loans - including Perpetual Bonds	1,313.1	2,007.3	52.87%

* Does not include interest

** No maturity term bonds

(1) Credit line with Banco Nacional de Desenvolvimento Econômico e Social (the Brazilian Development Bank), or BNDES, used to finance the development of our Confins maintenance center.

(2) Credit line with BNDES used to finance the modernization of engines.

(3) Credit line with Banco de Desenvolvimento de Minas Gerais (Minas Gerais State Development Bank) used to finance the development of our Confins maintenance center.

(4) Credit line with International Finance Corporation used to finance spare parts.

(5) Credit line with Banco do Brasil used to finance import of rotables parts.

Aircraft Financings

The following table sets forth our aircraft financings as of December 31, 2009 and 2010:

	2009	At December 31, 2010	% Change
		(in millions of reais)	
Short-Term Debt (Foreign Currency - U.S. Dollars)			
PDP Facility	243.4	-	(100.00)%
Financial Leasings	136.7	146.6	7.27%
Total Short-Term Debt (Foreign Currency - U.S. Dollars)	380.1	146.6	(61.42)%
Long-Term Debt (Foreign Currency - U.S. Dollars)			
Financial Leasings	1,420.7	1,533.5	7.94%
Total Long-Term Debt (Foreign Currency - U.S. Dollars)	1,420.7	1,533.5	7.94%
Total Aircraft Financings*	1,800.8	1,680.1	(6.70)%

* As of December 31, 2010 there were no PDP facilities outstanding.

On December 31, 2010, aircraft financing debt totaled R\$1.7 billion, including finance leases paid in monthly installments with funds generated from our operations. Financial expenses related thereto are booked as financial expenses on the income statement.

Total short-term debt at December 31, 2010 totaled R\$346.0 consisting of finance leases of R\$146.6 million, working capital of R\$83.3 million, interest of R\$53.7 million and loans of R\$61.8 million.

The following table sets forth the maturities and interest rates of our indebtedness:

	Maturity	Contractual Interest	Effective Interest p.a.	Currency
Working Capital	Aug/10	118.0% of CDI	2.68%	Real
BNDES	Jul/12	TJLP +2.65%	8.66%	Real
BNDES-Safra	Mar/14	TJLP +5.5%	11.46%	Real
BDMG	Jan/14	IPCA +6%	8.05%	Real
Debentures	Sep/15	118.0% of CDI	12.63%	Real
IFC Loan	Jul/13	Libor +3.750%	4.15%	U.S. dollar
Senior Notes 2017	Apr/17	7.50%	7.50%	U.S. dollar
Senior Notes 2020	Jul/20	9.25%	9.25%	U.S. dollar
Perpetual Bonds	n/a	8.75%	8.75%	U.S. dollar

The following table sets forth the loans and financings amortization schedule:

**excluding interest expenses and aircraft financing*

For further information on our financing activities, see note 16 to our consolidated financial statements as of December 31, 2010.

Covenant Compliance

Our long term financings (excluding the perpetual bonds and aircraft financings) in the aggregate amount of R\$1,563.7 million at December 31, 2010 contain customary covenants and restrictions, including but not limited to those that require us to maintain defined debt liquidity and interest expense coverage ratios.

We are subject to certain financial and performance indicators (covenants) based on consolidated financial statements such as: (1) net debt/EBITDAR, (2) current assets/current liabilities, (3) EBITDA/debt service, (4) short-term debt/EBITDA, (5) current ratio and (6) debt coverage index (DCI). At December 31, 2010, we were in compliance with all covenants.

The debentures we issued during the third quarter of 2010 require the maintenance of certain debt service coverage index, which is defined as the ratio between our cash flow and debt service (total of the principal amortized plus interest paid) for any given fiscal year. VRG must obtain an index of at least 130%, to be in compliance at the end of each respective period. In addition, VRG must also maintain its financial leverage ratio, which is defined as net adjusted debt divided by EBITDAR, below 3.5x. At December 31, 2010, we met the minimum required performance indicators for the debentures.

Other Financing Sources and Measures

We declared aggregate dividends of R\$50.9 million, for the fiscal year 2010. We declared dividends of R\$185.8 million for the fiscal year 2009.

On May 5, 2010, our board of directors approved a capital increase, in the amount of R\$119.0 million, with the issuance of 4,883,756 shares, of which 3,833,076 were common shares and 1,050,680 were preferred shares. During 2010, our executive officers exercised stock options for an aggregate of 173,374 preferred shares.

Capital Resources

We typically finance our leased aircraft through operating and finance lease financings. Although we believe that debt and/or operating lease financings should be available for our future aircraft deliveries, we cannot assure you that we will be able to secure financings on terms attractive to us, if at all. To the extent we cannot secure financing, we may be required to modify our aircraft acquisition plans or incur higher than anticipated financing costs. We expect to continue to require working capital investment due to the use of credit card installment payments by our customers. We expect to meet our operating obligations as they become due through available cash and internally generated funds, supplemented as necessary by short-term credit lines.

Our growth plans contemplate operating 121 aircraft by the end of 2013. As of December 31, 2010, we had 100 firm purchase orders with The Boeing Company for 737-800 Next Generation aircraft outstanding and we have 10 purchase rights and purchase options for an additional 40 737-800 Next Generation aircraft. Committed expenditures for these aircraft, based on aircraft list price and including estimated amounts for contractual price escalations and pre-delivery deposits, are US\$191.2 million in 2011, US\$402.0 million in 2012, US\$478.8 million in 2013 and US\$444.1 million in 2014, US\$360.9 million in 2015 and US\$67.0 million beyond 2015. We expect to meet our pre-delivery deposits by using long term loans from private financial institutions guaranteed by triple A rated institutions and capital markets financings such as long term and perpetual bonds.

The firm aircraft orders represent a significant financial commitment for us. Pending the application of the proceeds from financing activities, we have invested these proceeds in overnight deposits and deposit certificates with

highly-rated Brazilian banks and short-term investments, mainly highly-rated Brazilian government bonds.

We expect that the continuance of the commitment to us from the Ex-Im Bank to provide guarantees covering 85% of the aggregate purchase price for the firm order aircraft will assist us in obtaining low-cost financing for the purchase of the firm order aircraft. The remaining 15% of the aggregate purchase price for the firm order aircraft is expected to be funded by our cash or other financing alternatives. To the extent that we do not have sufficient cash resources to do so, we may be required to modify our aircraft acquisition plans or to incur higher than anticipated financing costs, which would have an adverse impact on the execution of our strategy and business. The Company believes that it has and will in the future have appropriate funding resources available with the combination of Ex-Im Bank supported financing, local development bank funding and sale and leaseback transactions.

Ex-Im Bank has recently agreed on a common approach with European export-credit agencies on offering export credits for commercial aircraft. Among other things, the new ASU sets forth minimum guarantee premium rates applicable to aircraft delivered on or after January 1, 2011, or under firm contracts entered into after April 30, 2007. While subject to modification, the exposure fees paid by Gol on applicable aircraft are likely to increase. The amount of any such increase will depend upon the credit risk assigned to us by the participating export-agencies pursuant to the protocols of the ASU. In addition, we will no longer be able to finance the amortization payments of loans guaranteed by Ex-Im Bank with SOAR loan facilities.

Recent Accounting Pronouncements

As of the date of our consolidated financial statements included elsewhere in this annual report we had adopted all new and revised standards and interpretations except for the following:

- **IFRS 9 - Financial Instruments:** Introduces new requirements for the classification and measurement of assets and liabilities. It establishes that all financial assets recognized that are inserted in the scope of IAS 39 - Financial Instruments: Recognition and Measurement are subsequently measured at amortized cost or fair value. Required from the period beginning on or after January 1st, 2013.
- **Change of IFRS 3 – Business Combinations,** introduces the following requirements:

i. *Measurement of non-controlling participations* - Specifies that the option to measure non-controlling interests, both at their fair value as the proportionate share of non-controlling interest on the acquiree's identifiable net assets at the acquisition date, is only applicable to the non-controlling interests that are effective and warrant holders a proportionate share of net assets acquired in the event of a liquidation. All other components of the non-controlling interests should be measured at their fair value at the acquisition date, unless another measurement basis is required by IFRSs.

ii. *Payment of share-based awards not replaced or replaced voluntarily* – Specifies that the current requirement that the awards measure by the buyer should replace the share-based payments of acquiree, in accordance with IFRS 2, on the purchase date (market-based measurement) are applicable to transactions of share-based payments of the acquiree that are not replaced. Specifies that the current requirements for placement of the measurement of market-based awards replaced between the consideration transferred in a business combination and compensation expense in the period after the business combination is applicable to all prizes being replaced, regardless of whether the buyer is obliged to replace them or if he does voluntarily.

iii. *Requirements transition to compensatory quotas of a business combination that occurred prior to mandatory adoption of IFRS 3 (2008)* - Clarifies that IAS 32 - Financial Instruments: Presentation, IAS 39 – “Financial Instruments: Recognition and Measurement” and IFRS 7 – “Financial Instruments: Disclosures” are not applicable to compensatory quotas which arose from business combinations whose acquisition date is prior to the application of IFRS 3 (2008).

- **Change of IFRS 7 – “Financial Instruments: Disclosures”** - Encourages qualitative disclosures in the context of quantitative disclosures required to assist users to form an overview of the nature and extent of risks arising from financial instruments. Clarifies the required level of disclosures about credit risk and collateral held and provides exemption for disclosures of loans renegotiated.
- **Amendment of IAS 34 - Interim Financial Reporting** – Provides emphasis to the principle in IAS 34 that the disclosures about significant events and transactions in interim periods should update the relevant information that has been presented in the most recent annual financial statements. Explains how to apply this principle in relation to financial instruments and their fair values.

- Amendments to IAS 32 - Classification of rights issues - Discusses the classification of certain rights in foreign currency as an equity instrument or financial liability. Until the present date, we have not entered into any agreement that would fit into the scope of these changes. However, if we acquire rights within the scope of changes in future accounting periods, the amendments to IAS 32 will take effect on the classification of these rights.
- Amendment of IAS 12 - Income Tax (Deferred Tax: Recovery of Underlying Assets) - Requires an entity to measure the deferred tax asset depending on whether the entity expects to recover the carrying value of assets through use or sale. When an asset is measured at fair value model of IAS 40 - Investment Property it can be subjective and difficult to assess whether the recovery of assets is through the use or sale. The change presents a practical solution to the problem by introducing the assumption that recovery of the carrying value will normally be by sale. As a result of the changes, SIC-21 - Income Taxes - Recovery of revalued Non-depreciable Assets will no longer apply to investment properties held at fair value. The changes must be adopted for fiscal years beginning on or after January 1, 2012 and earlier adoption is permitted.

C. Research and Development, Patents and Licenses, etc.

We believe that the Gol brand has become synonymous with innovation and value in the Brazilian airline industry. We have filed requests for registration of the trademarks “GOL” and “GOL LINHAS AÉREAS INTELIGENTES” with trademark offices in Brazil and in other countries, and have already been granted final registration of these trademarks, for example: in Argentina, Bolivia, Chile, Colombia, the European Union, the United States, Paraguay and Uruguay. VRG holds trademark registrations for the “*Varig*” brand and trademark applications for the “*Smiles*” brand in various countries.

D. Trend Information

We believe in a strong recovery in the Brazilian economy, especially in the growth of the Brazilian middle class in the next years. We are forecasting demand for the Brazilian domestic airline industry to increase by between 2.5x and 3.0x the growth of the Brazilian GDP, combined with the continuous expansion of Brazil’s potential market led by the accelerated growth in demand from South America and the Caribbean. We also plan to continue to add capacity in a conservative basis, at a proportionally lower rate than the growth in demand in our network, and believe that nominal yields in our network should remain stable as compared to 2010. This positive macroeconomic and operating scenario, combined with our strategy to continue to grow passenger revenue and developing new sources of ancillary revenues, while further reducing and diluting unitary costs, should further improve operating margins.

E. Off-Balance Sheet Arrangements

None of our 86 aircraft recognized as operating lease obligations are reflected on our balance sheet. At December 31, 2010, we had 39 aircraft recognized as finance leases on our balance sheet. We are responsible for all maintenance, insurance and other costs associated with operating these aircraft; however, we have not made any residual value or other guarantees to our lessors.

F. Tabular Disclosure of Contractual Obligations

Our non-cancelable contractual obligations at December 31, 2010 included the following:

	Total	2011	2012	2013	2014	2015	Beyond 2015
	(in thousands of <i>reais</i>)						
Non-derivative financial instruments							
Aircraft and engine operating leases	2,105.7	222.9	224.3	225.8	226.8	221.5	984.4

(1) Does not include short-term finance leases.

ITEM 6. Directors, Senior Management and Employees**A. Directors and Senior Management**

Under our by-laws, we are managed by our *Conselho de Administração*, or board of directors, which is composed of at least five members and at most eleven members, and a *Diretoria*, or board of executive officers, which is composed of at least two and at most seven members. According to the Differentiated Corporate Governance Practices Level 2 introduced by BM&FBOVESPA, at least 20% of the members of our board of directors shall be “independent directors,” as defined by the BM&FBOVESPA.

Our management and board of directors is supported and advised by a number of committees which comprise highly specialized and qualified individuals. These committees actively participate in the strategic and other key decisions of our management and we believe they add substantial value to our business. We currently have audit, human resources and corporate governance, financial and risk policy, and accounting committees, comprised of members of our board of directors and non-board members. We also have a tax and financial statement policy subcommittee.

We are committed to achieving and maintaining high standards of corporate governance. In working towards this goal, we have established a human resources and corporate governance committee to monitor and make recommendations with respect to corporate governance “best practices” to our board of directors. In addition, in connection with listing as a Level 2 company on the BM&FBOVESPA, we have entered into an agreement with the BM&FBOVESPA to grant certain additional rights not required of Level 2 companies to our shareholders, such as tag-along rights offering our preferred shareholders 100% of the price paid per common share of controlling block shareholders. We conduct our business with a view towards transparency and the equal treatment of all of our shareholders. We have implemented policies to help to ensure that all material information that our shareholders require to make informed investment decisions is made available to the public promptly and that we at all times accurately reflect the state of our operations and financial position through press releases, filings with the SEC and Brazilian Securities Commission (“CVM”), and by keeping the investor relations section of our website current and complete. We have also adopted formal policies that restrict trading in our preferred shares by company insiders.

In addition, according to the Level 2 practices, the company shall cause all new members of the board of directors, board of executive officers and fiscal committee must sign a statement of consent in which they undertake to comply with the regulations of the Differentiated Corporate Governance Practices Level 2. Their taking office is conditioned to signing of such document. Also the members of the board of directors, board of executive officers and fiscal committee must sign a statement of consent, in which they undertake to refer to arbitration under the auspices of the BM&FBOVESPA Arbitration Chamber any disputes and/or controversies arising out of the application of the listing rules of the Differentiated Corporate Governance Practices Level 2, the listing agreement with BM&FBOVESPA, the regulations of the BM&FBOVESPA, the provisions of the Brazilian corporation law, guidelines issued by the Brazilian authorities and the other rules applicable to the capital markets in general, involving the company, the shareholders, the managers and the members of the fiscal committee.

Board of Directors

Our board of directors is dedicated to providing our overall strategic guidelines and, among other things, is responsible for establishing our general business policies and for electing our executive officers and supervising their management. Currently, our board of directors is comprised of nine members. Four of the board members qualify as independent based upon New York Stock Exchange criteria. The board of directors meets an average of five times per year or whenever requested by the president or three members of our board of directors.

Under the Brazilian corporation law, each director must hold at least one of our common or preferred shares and be a Brazilian resident, and is elected by the holders of our common shares at the *Assembléia Geral Ordinária*, or the annual general meeting of shareholders. There are no provisions in our by-laws restricting (i) a director's power to vote on a proposal, arrangement or contract in which such director is materially interested, or (ii) the borrowing powers exercisable by our directors from us. However, under the Brazilian corporation law, a director is prohibited from voting on any matter in which such director has a conflict of interest with our company.

Additionally, under the Brazilian corporation law, shareholders of publicly traded companies, such as we are, who together hold non-voting or voting-right restricted preferred shares representing at least 10% of our total share capital for at least three months are entitled to appoint one member of our board of directors.

Under our by-laws, the members of the board of directors are elected by the holders of our common shares at the annual general meeting of shareholders. Members of our board of directors serve simultaneous one-year terms and may be re-elected. The terms of our current directors expire in April 2011. Our by-laws do not provide for a mandatory retirement age for our directors.

The following table sets forth the name, age and position of each member of our board of directors. A brief biographical description of each member of our board of directors follows the table.

Name	Age	Position
Alvaro de Souza*	62	Chairman
Henrique Constantino	39	Vice-Chairman
Antonio Kandir*	57	Director
Constantino de Oliveira Junior	42	Director
Joaquim Constantino Neto	46	Director
Luiz Kaufmann*	65	Director
Paulo Kakinoff*	36	Director
Ricardo Constantino	48	Director
Richard F. Lark, Jr	44	Director

* Denotes an independent director

Alvaro de Souza has been a member of our board of directors since August 2004 and became our chairman of the board in April 2009. Mr. Souza is an officer of AdS—Gestão, Consultoria e Investimentos Ltda., and chairman of the board of directors of World Wildlife Fund in Brazil (WWF). He is also a member of the board of directors of the following companies and organizations: WWF International Board of Trustees, the Brazilian Biodiversity Fund (FUNBIO), Unidas S.A., Triangle Bank S.A. (Tribanco), CSU-CardSystem and Santos Soccer Club. He is also

member of the audit and fiscal committee of AMBEV. Mr. Souza is a certified director by IBGC - Brazilian Institute of Corporate Governance. He was Chief Executive Officer of Citibank Brazil from 1991 to 1994 and an Executive Vice-President of Citigroup in New York from 1995 to 2003. Mr. Souza holds a bachelor's degree in Economics and Business Administration from Pontifícia Universidade Católica de São Paulo. Mr. Souza is an independent member of our board of directors under the requirements of the SEC and NYSE listing standards and is a member of our audit committee and human resources and corporate governance committee.

Henrique Constantino has been a member of our board of directors since March 2004 and became our vice-chairman of the board in June 2010. He participated in the creation of Gol and served as its chief financial officer from January 2001 to March 2003, when he became a member of the board. Mr. Henrique Constantino is also a member of the board of directors of Providência S.A. and BR Vias S.A. Mr. Constantino has a law degree from *CEUB—Centro de Ensino Unificado de Brasília* and has a post-graduate degree in Business Administration from *EAESP—FGV (Fundação Getúlio Vargas—São Paulo)*. Mr. Constantino is a member of our financial and risk policy committee and human resources and corporate governance committee.

Antonio Kandir has been a member of our board of directors since August 2004. Mr. Kandir is an economic consultant. Mr. Kandir is also partner of Governança e Gestão and is a member of the board of directors of Providência S.A. Mr. Kandir served in the Brazilian government as a Federal Lower House Representative for two terms of office, and served as Planning and Budget Minister and Secretary of Economic Policy and President of the Privatization Council. He has a bachelor degree in production engineering from the Escola Politécnica at USP and bachelors, masters and doctoral (PhD) degrees in Economics from Unicamp. Mr. Kandir is an independent member of our board of directors under the requirements of the SEC and NYSE listing standards and is a member of our audit committee.

Constantino de Oliveira Junior has been a member of GOL's board of directors and its Chief Executive Officer since the Company was founded in 2001. Mr. de Oliveira introduced the "low-cost, low-fare" concept to the Brazilian airline industry and was named "Most Valuable Executive" by the Brazilian newspaper *Valor Econômico* in 2001 and 2002. He was also elected the Leading Executive in the logistics sector by the readers of *Gazeta Mercantil*, a Brazilian financial newspaper, in 2003, and in 2008, was named a "Distinguished Executive" in the Air Transportation category at the GALA (Latin American Aeronautics Gallery) awards, sponsored by IATA. Between 1994 and 2000 he served as director in passenger land transportation company. Mr. de Oliveira studied Business Administration at the *Universidade do Distrito Federal* and attended the Executive Program on Corporate Management for Brazil conducted by the Association for Overseas Technical Scholarships. He is also member of our human resources and corporate governance committee.

Joaquim Constantino Neto has been a member of our board of directors since March 2004. He has been the chief operations officer of the Comporte group since 1994. From 1984 to 1990, he was in charge of operations of *Empresas Reunidas Paulista de Transportes Ltda.* Since 1990 to the present, he has been the President of *Breda Serviços*, a bus transportation company.

Luiz Kaufmann has been a member of our board of directors since December 2004. Mr. Kaufmann is the Managing Partner of *L. Kaufmann Consultores Associados*. Mr. Kaufmann has presided over several companies such as *Aracruz Celulose S.A.*, *Medial Saúde*, *Kroton Educacional*, *Petropar*, *Grupo Multiplic*, *Arthur D. Little*, and was a partner at *GP Investimentos*. He was a member of several companies' board of directors, including *Pioneer Hi-Bred International*, *América Latina Logística* and *Lojas Americanas*. He was a member of the Global Corporate Governance Advisory Board, which was comprised of 20 internationally renowned business leaders from 16 different countries, created to advance knowledge on the roles and responsibilities of boards of directors of international companies. Mr. Kaufmann is an independent member of our board of directors under the requirements of the SEC and NYSE listing standards. He is a member of our audit committee and our audit committee financial expert as defined by the current SEC rules.

Paulo Kakinoff has been a member of our Board of Directors since January 2010. Mr. Kakinoff is currently CEO of *Audi Brasil* and vice president of the Brazilian Automobile Importers Association (*Associação Brasileira de Importadores de Veículos Automotores – ABEIVA*). He is also a member of the board of directors of *Volkswagen Participações Ltda.* (Finance Services of Volkswagen Group in Brasil) since March 2011. Mr. Kakinoff has 18 years

of experience in the auto industry, having served as Sales & Marketing Director at Volkswagen do Brasil and as Executive Director for South America at the Volkswagen Group's head offices in Germany. He holds a bachelor's degree in Business Administration from

Ricardo Constantino has been a member of our board of directors since March 2004. He has been the chief technical and maintenance officer of the Comporte group since 1994. Mr. Ricardo Constantino Neto is also member of the board of directors of BRVias S.A. and Providência S.A.

Mackenzie University. Mr. Kakinoff is an independent member of our board of directors under the requirements of the SEC and NYSE listing standards.

Richard F. Lark, Jr. has been a member of our board of directors since June 2008. Mr. Lark served as our executive vice president, chief financial and investor relations officer from April 2003 to June 2008. He is a director of Endurance Capital Partners, an investment management firm (participant of Anbima and ABVCAP), and a member of the board of directors of Renar Maçãs S.A. (BM&FBOVESPA: RNAR). From 2000 to 2003, Mr. Lark served as chief financial officer of Americanas.com, one of the leading Brazilian e-commerce companies. Prior to joining Americanas.com, Mr. Lark was an executive in the investment banking divisions of Morgan Stanley & Co., Citicorp and The First Boston Corporation. Mr. Lark is a member of the Board of Governors of the American Society of São Paulo since 2003, having served as its president during 2005-2007. Mr. Lark holds a Master in Business Administration degree from the Anderson School at UCLA and bachelor degrees in finance and business economics and philosophy from the University of Notre Dame. He is also a Portfolio Manager authorized by the CVM and is associated with the Brazilian Institute of Corporate Governance (IBGC). Mr. Lark is a member of our financial and risk policy committee and accounting, tax and financial statement policy subcommittee.

Constantino de Oliveira Junior, Henrique Constantino, Joaquim Constantino Neto and Ricardo Constantino are brothers. Constantino de Oliveira Junior, Henrique Constantino, Joaquim Constantino Neto and Ricardo Constantino control our major shareholder Fundo de Investimento em Participações Volluto on an equal basis.

Executive Officers

Our executive officers have significant experience in the domestic and international passenger transportation industries, and we have been able to draw upon this extensive experience to develop our low-cost operating structure. The executive officers are responsible for our day-to-day management. The executive officers have individual responsibilities established in our by-laws and by our board of directors. The business address of each of our executive officers is the address of our principal executive office.

Under our by-laws, we must have at least two and at most seven executive officers that are elected by the board of directors for a one-year term. Any executive officer may be removed by the board of directors before the expiration of his term. The current term of all our executive officers ends in February 2012.

The following table sets forth the name, age and position of each of our executive officers elected in February 2011. A brief biographical description of each of our executive officers follows the table.

Name	Age	Position
Constantino de Oliveira Junior	42	President and Chief Executive Officer
Adalberto Cambaúva Bogdan	45	Vice President – Technical
Cláudia Jordão Ribeiro Pagnano	43	Vice President – Marketing
Leonardo Porciúncula Gomes Pereira	52	Vice President – Chief Financial Officer and Investor Relations Officer
Ricardo Khauaja	41	Vice President – Management and Human Resources

Constantino de Oliveira Junior. See “—Board of Directors.”

Adalberto Cambaúva Bogdan has been an officer since October, 2010. He joined us in April 2002 and served as the line captain of the Boeing 737-300 aircraft, assistant of head of Operations, head of Operations and Operational

Control departments. He is also a well-experienced captain, with more than 13,000 flying hours, Mr. Bogsan is specifically qualified in airline management and holds an MBA from the Fundação Getúlio Vargas (FGV). Mr. Bogsan started his career at the Brazilian airline Rio-Sul from 1988 to 2002, where he served in as captain of several aircraft models, and also served as instructor for 8 years and was captain instructor and flight inspector of Boeing 737-300/500 Next Generation aircraft when he left that airline.

Cláudia Jordão Ribeiro Pagnano has been an officer since March 2010. Before joining Gol, Mrs. Pagnano worked for two years as Perdigão's Business Unit Officer of BRF Brasil Foods. Mrs. Pagnano also served for two years as Business Unit Officer of Grupo Pão de Açúcar and worked as Business and Marketing Officer of several consumer and financial services companies, such as BankBoston, Unibanco, Kodak and Colgate. Mrs. Pagnano holds a bachelor's degree in marketing from Escola Superior de Propaganda Marketing (ESPM) and specialization in Finances from Fundação Getúlio Vargas (FGV-SP).

Leonardo Porciúncula Gomes Pereira has been our Chief Financial Officer and Investor Relations officer since February 2009. Prior to joining Gol, Mr. Pereira served two years as the Director President of Companhia do Vale do Araguaia, a Brazilian commercial foresting company, and six years as the Executive Director Finance and Investor Relations of NET Serviços, a leading cable provider in Latin America listed on the BM&FBOVESPA (Level II), NASDAQ and Latibex. He previously served five years as Planning Director at Globopar, a media industry holding company, and 13 years in a number of roles at Citibank Corporate Finance Bank in Brazil, Asia, Latin America and the United States, including leader of the Latin American Aviation team. He is member of the Corporate Governance Committee of the São Paulo chapter of the American Chamber of Commerce. Mr. Pereira holds degrees in Production Engineering from the Universidade Federal do Rio de Janeiro (UFRJ) and Economics from the Universidade Candido Mendes; he received his MBA from Warwick University (England). Mr. Pereira has also studied Finance at IMD in Switzerland and General Management at Wharton Business School, attended The Association for Overseas Technical Scholarship (AOTS) in Japan, and completed Columbia University's Senior Executive Education Program.

Ricardo Khauaja has been an officer since July 2009. Mr. Khauaja worked for beverage company Ambev for ten years, where he served in several positions, including Corporate Human Resources manager from 2001 to 2003. After this, he worked for six years at home appliance manufacturer Whirlpool, first as the Human Resources Officer for Latin America (three years), followed by vice-president (three years). Mr. Khauaja has a degree in Production Engineering from the Federal University of Rio de Janeiro (UFRJ) and a MBA in Finance from the Brazilian Capital Market Institute (IBMEC/RJ). He also completed "The Transition from Functional to General Management" course at Columbia University in the United States.

B. Compensation

Under our by-laws, our shareholders are responsible for establishing the aggregate amount we pay to the members of our board of directors and our executive officers. Once our shareholders establish an aggregate amount of compensation for our board of directors and executive officers, the members of our board of directors are then responsible for setting individual compensation levels in compliance with our by-laws.

For the fiscal year ended December 31, 2010, the aggregate compensation, including cash and benefits-in-kind but excluding stock options, that we paid to the members of our board of directors and executive officers was R\$8.5 million.

Stock Option Plan

Our stock option plan was approved at a special shareholders' meeting held on December 9, 2004. The stock option plan is aimed at promoting our interests by encouraging management employees to contribute substantially to our success, by motivating them with stock options. The plan is managed by both our human resources and corporate governance committee and our board of directors.

Participants in the plan are selected by the human resources and corporate governance committee, provided that they have been either president, vice-president, officer, advisor to the president or to the vice-president, general manager or manager. The stock options to be granted under the plan confer rights related only to our preferred shares, and over a number of preferred shares that does not, at any time, exceed 5% of our shares. The human resources and corporate governance committee establishes each year the strike price of the options to be granted, which must be equal to the average price of the preferred shares recorded in the last 60 trading sessions prior to the granting date, adjusted pursuant to the IGP-M inflation index.

The plan is valid for a ten-year term. In case of termination of our legal relationship with the option holder, with or without cause (except in the case of retirement, permanent disability or death) all options that have been granted to the participant, and which were not yet exercisable, automatically expire.

In 2008, we issued stock options of up to 190,296 at a weighted average exercise price of R\$45.46 per share. In 2009, we issued 1,142,473 stock options, of which only 652,998 were outstanding on December 31, 2010 after the cancellation of 530,480 stock options due to the departure of their respective holders from the company, the exercise of 175,668 stock options and the complementary grant of 216,673 stock options in 2010 under the 2009 plan. These stock options were issued at a weighted average exercised price of R\$10.52 per share. In 2010, we issued 2,774,640 stock options, of which only 2,593,938 were outstanding on December 31, 2010, after the cancellation of 170,786 stock options due to the departure of their respective holders from the company and the exercise of 9,916 stock options. These stock options were issued at a weighted average exercised price of R\$20.65 per share. On December 20, 2010, our board of directors approved the granting of 2,722,444 options at the price of R\$27.83 per share for the year 2011. The total number of options granted in the last three years, excluding the 779,964 options cancelled and the 185,584 options exercised, is 3,358,534, or 1.2% of our total shares and 2.5% of the total preferred shares. The vesting period of the stock options is 5 years for the options granted until 2009 and 3 years for the options granted until 2011, and options can be exercised up to 10 years after the grant date. The purpose of our stock option plan is to align shareholder and top management interests.

C. Board Practices

Currently, our board of directors is comprised of nine members. The terms of our current directors will expire on April 30, 2011. See “—Board of Directors.”

Fiscal Committee

Under the Brazilian corporation law, the *Conselho Fiscal*, or fiscal committee, is a corporate body independent of management and of our external auditors. The fiscal committee may be either permanent or non-permanent, in which case it is appointed by the shareholders to act during a specific fiscal year. A fiscal committee is not equivalent to, or comparable with, a U.S. audit committee. The primary responsibility of the fiscal committee is to review management’s activities and a company’s financial statements, and to report its findings to the company’s shareholders. The Brazilian corporation law requires fiscal committee members to receive as remuneration at least 10% of the average annual amount paid to a company’s executive officers. The Brazilian corporation law requires a fiscal committee to be composed of a minimum of three and a maximum of five members and their respective alternates.

Under the Brazilian corporation law, the fiscal committee may not contain members that (i) are on our board of directors, (ii) are on the board of executive officers, (iii) are employed by us or a controlled company, or (iv) are spouses or relatives of any member of our management, up to the third degree. Our by-laws provide for a non-permanent fiscal committee to be elected only by our shareholders’ request at a general shareholders’ meeting. The fiscal committee, when elected, will be comprised of a minimum of three and a maximum of five members and an equal number of alternate members. In 2010, our shareholders did not request the election of a fiscal committee.

Committees of the Board of Directors and Board of Executive Officers

Our board of directors also has audit, human resources and corporate governance, and financial and risk policy committees and an accounting, tax and financial statement policy subcommittee. Our board of executive officers has management, executive policy, budget, investment, corporate governance and risk policies committees. In most cases, members of the committees do not need to be members of our board of directors or board of executive officers. The responsibilities and composition of these committees are described below.

Audit Committee. Our audit committee, which is not equivalent to, or comparable with, a U.S. audit committee, provides assistance to our board of directors on matters involving accounting, internal controls, financial reporting and compliance. The audit committee recommends the appointment of our independent auditors to our board of directors and reviews the compensation of our independent auditors and helps coordinate their activities. It also evaluates the effectiveness of our internal financial and legal compliance controls. The audit committee comprises three members elected by the board of directors for a one-year term with the right to re-election, all three of which are independent. The current members of our audit committee are Álvaro de Souza, Antônio Kandir and Luiz Kaufmann. All members meet the independent membership requirements of the SEC and NYSE as well as other NYSE requirements. Luiz Kaufmann is the committee’s “financial expert” within the scope of the SEC rules covering the disclosure of financial experts on audit committees in periodic filings pursuant to the U.S. Securities Exchange Act of 1934.

Human Resources and Corporate Governance Committee. The human resources and corporate governance committee is responsible for the coordination, implementation and periodic review of best corporate governance practices and for monitoring and keeping our board of directors informed of legislation and market recommendations addressing corporate governance. It also reviews and recommends to our board of directors human resources policies, forms of compensation, including salary, bonus and stock options, to be paid to our employees, as well as analyzing management's career and succession plans. The committee consists of up to six members elected by our board of directors for a one-year term, with the right to re-election, comprising the chairman and the vice-chairman of the board of directors, three members of the board of directors, two outside specialists and the management and human resources officer. The human resources and corporate governance committee currently consists of Álvaro de Souza, Henrique Constantino and Constantino de Oliveira Junior, members of our board of directors, Ricardo Khauaja, our management and human resources officer, Betânia Tanure de Barros and Paulo César Aragão.

Financial and Risk Policy Committee. The financial and risk policy committee conducts periodic reviews of the measures we take to protect the company against foreign exchange, jet fuel price and interest rate changes and analyzes the effect of these changes on our revenues and expenses, cash flow and balance sheet. It also prepares and approves our corporate finance policies, examines their efficiency and oversees their implementation, periodically examines our investment and financing plans and makes recommendations to our board of directors, determines the parameters for maintaining the desired liquidity and capital structures, monitors their execution and approves the policies to be adopted in the following quarter. It further assesses the effectiveness of hedging measures taken during the previous quarter, approves recommendations for future changes and also conducts reviews of cash management activities. The financial and risk policy committee meets on a quarterly basis and consists of seven members elected by the board of directors for a one-year term with the right to re-election, comprising three members of our board of directors, our chief financial officer, an internal auditor and two outside specialists. The committee currently consists of Henrique Constantino, Richard F. Lark, Jr., Luiz Kauffman, all members of our board of directors, Leonardo P. Gomes Pereira, our chief financial and investor relations officer, Charles B. Holland, Barry Siler, respectively a fuel hedging specialist and chief executive officer of Kodiak Fuels, and Marco Provetti.

Accounting, Tax and Financial Statement Policy Subcommittee. The accounting, tax and financial statement policy subcommittee conducts periodic reviews of, and evaluates and monitors the company's accounting policies and financial statements and makes observations and recommendations to the board of directors on these matters. The subcommittee meets on a quarterly basis and consists of three members elected by the board of directors for a one-year term with the right to re-election, comprising the company's chief financial officer, a member of the board of directors or a member of the audit committee, and an independent member. The committee currently consists of Richard F. Lark, Jr., a member of our board of directors, Leonardo Pereira, our chief financial and investor relations officer, Charles B. Holland and Marcos da Cunha Carneiro.

Our board of directors had a strategy committee that was dissolved in January 2010 upon completing its task of preparing our five year business plan. The strategy committee made recommendations to the board of directors concerning the company's basic strategy and institutional positioning, as well as the periodic revision of its mission and values and the revision of the strategic plan proposed by the board of executive officers. It also made recommendations to the board of directors regarding the revision of the company's annual business plan, targets and budget, and advised the board of executive officers on the methodology used to prepare the business plan in order to ensure that it was both participatory and comprehensive. The strategy committee consisted of up to nine members elected by the board of directors for a six-month term of office, comprising the chairman of the board of directors, the chief executive officer, the chief financial officer, the management and human resources officer, the marketing officer, the information technology and planning officer and three members of the board of directors. The last committee members were Álvaro de Souza, Henrique Constantino, Antônio Kandir, Constantino de Oliveira Junior and Luiz Kaufmann, all members of our board of directors, Leonardo Pereira, our chief financial and investor relations officer,

and Ricardo Khauaja, our management and human resources officer.

D. Employees

We believe that our growth potential and the achievement of our results-oriented corporate goals are directly linked to our ability to attract and maintain the best professionals available in the airline business. We place great emphasis on the selection and training of enthusiastic employees with potential to add value to our business and who we believe fit in with and contribute to our business culture.

As of December 31, 2010, we had 18,776 active employees.

We invest significant resources promoting the well being of our employees. In 2010, we spent R\$388.1 million on health and safety matters, training, social contributions, employee meals, transportation and profit sharing.

We train our own pilots. We also provide extensive ongoing training for our pilots, flight attendants and customer service representatives. In addition to the required technical training, which follows the strictest international standards, we also provide comprehensive managerial training to our pilots and flight attendants through Crew Resource Management and Line Oriented Flight Training programs, emphasizing the importance of resource management to provide the best service to our passengers. In February 2011, we launched the *GOL Institute* located in our Confins Maintenance Center, in the state of Minas Gerais, aiming to provide technical training, promoting social inclusion and improving the learning of the professionals in the aviation sector. We expect to reduce the cost and average time of training for mechanics and co-pilots.

In order to help retain our employees, we encourage open communication channels between our employees and management and offer career development opportunities in the company and periodic evaluations. We offer in-house post-graduate business school training in conjunction with the *Fundação Getúlio Vargas*, a leading Brazilian business school, to provide management training to selected employees. Our compensation strategy reinforces our determination to retain talented and highly motivated employees and is designed to align the interests of our employees with our shareholders. Our compensation packages include competitive salaries and participation in our profit sharing program. We have agreements with medical and insurance companies to offer affordable health and pension plan options to our employees.

A national aviators' union represents Brazil's pilots and flight attendants, and seven other regional aviation unions represent ground employees of air transportation companies. Approximately 6% of our employees are members of unions. Negotiations in respect of cost of living wage and salary increases are conducted annually between the workers' unions and a national association of airline companies. There is no salary differential or seniority pay escalation among our pilots. Work conditions and maximum work hours are regulated by government legislation and are not the subject of labor negotiations. Since the commencement of our operations, we have not had a work stoppage by our employees and we believe that our relationship with our employees is good.

To motivate our employees and align their interests with our results of operations, we provide an annual profit sharing program to all of our employees. Under Brazilian law, companies may provide profit sharing programs that define mechanisms for distributing a portion of a company's profits based upon the achievement of pre-defined targets established by the company. Our annual profit sharing programs are negotiated with a commission formed by our employees and approved by labor unions for the benefit of all of our unionized and non-unionized employees. For the purposes of our profit sharing program, a portion of profit sharing distributions are based upon the achievement of corporate profit targets and a portion of the distributions are based on the achievement of operational targets set for each of our departments. We have established a stock option plan for our management and employees vesting over a 3 year period. As of March 2011, a total of 78 of our management and employees were granted stock options under this plan.

E. Share Ownership

The members of our board of directors and our executive officers, on an individual basis and as a group, directly own approximately 1.6% of our preferred stock. See "Item 7A. Major Shareholdings and Related Party Transactions—Major Shareholders." *Fundo de Investimento em Participações Asas* is a fund directly controlled by Messrs. Constantino de Oliveira Júnior, Henrique Constantino, Joaquim Constantino Neto and Ricardo Constantino, respectively.

For a description of stock options granted to our board of directors and our executive officers, see “—Compensation—Executive Stock Options” and “—Compensation—Stock Option Plan.”

ITEM 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

The following table sets forth information relating to the beneficial ownership of our common shares and preferred shares as of December 31, 2010, by each person known by us to beneficially own 5% or more of our common shares or preferred shares and all our directors and officers as a group.

Each shareholder's percentage ownership in the following table is based on the 137,032,734 common shares and 133,303,934 preferred shares outstanding as of December 31, 2010.

(1) Fundo de Investimento em Participações Volluto (formerly named Fundo de Investimento em Participações Asas) is controlled equally by Constantino de Oliveira Junior, Henrique Constantino, Joaquim Constantino Neto and Ricardo Constantino.

(2) On June 09, 2010 Alliance Bernstein L.P, and its affiliate AXA Investment Managers informed it had acquired 8,748,869 of our preferred shares, equivalent to 6.57% of this class. As of December 31, 2010, they held 8,510,417 preferred shares equivalent to 6.38% of this class. On March 16, 2011 Alliance Bernstein L.P, and its affiliate AXA Investment Managers informed us that they had sold 7,673,669 of our preferred shares, equivalent to 5.76% of this class. After this sale they held 1,075,200 preferred shares equivalent to 0.81% of this class of shares.

According to our internal share record, which contains information regarding the ownership of our shares and the ADSs as filed by the holders of such shares and ADS, there were, at December 31, 2010, 112 record holders of ADSs in the United States.

On May 5, 2010 our board of directors approved a capital increase, in the amount of R\$119.0 million, with the issuance of 4,883,756 shares, of which 3,833,076 were common shares and 1,050,680 were preferred shares. During 2010, our executive officers exercised stock options for an aggregate of 173,374 preferred shares.

Shareholders' Agreement

No shareholders' agreements have been filed with us.

B. Related Party Transactions

According to the Level 2 regulations, the company shall forward and disclose to BM&FBOVESPA the information regarding every and any agreement entered by and between Gol and its affiliates and associate companies, its administrators, its controlling shareholder, as the case may be, as well as other corporations that make a group with any such persons, whether factual or by law, whenever they reach, with a single agreement or with successive agreements, with or without the same purpose, at any period of one year, an amount of R\$0.2 million or more, or a value of 1% or more over the net equity of the company, whichever is higher.

Such announced information shall describe the scope of the agreement, the term, the price, the termination or completion conditions and any possible influence of the agreement upon administration or company business conducting.

We have engaged in a number of transactions with related parties, none of which have involved the issuance of guarantees.

Transportation, Graphic and Consultancy Agreements with Comporte Participações S.A.

We have exclusive bus transportation agreements with Expresso União Ltda. and Breda Serviços for the transportation of our passengers, their luggage and our employees. We also have operating agreements with Serviços Gráficos Ltda. and HK Consultoria e Participações, for graphic and consultancy services, respectively. We are the tenant of a property located at Rua Tamoios, 246, in São Paulo, SP, owned by an affiliate, Patrimony Administradora de Bens. The entities mentioned above belong to the same economic group and are all controlled by Comporte Participações S.A.

In 2009 and 2010, we made total payments of R\$10.5 million and R\$9.0 million, respectively, under these operating agreements.

Commercial Agreement with Unidas Rent a Car

In May, 2009, we entered into a commercial agreement with Unidas Rent a Car, a Brazilian car rental company, which gives Unidas' customers a 50% discount on the daily car rental charges when these customers purchase their Gol tickets through our website. Gol's chairman, Álvaro de Souza, is also a member of Unidas Rent a Car board of directors.

For further information on our related party transactions, see note 11 to our consolidated financial statements.

C. Interests of Experts and Counsel

Not applicable.

ITEM 8. Financial Information

A. Consolidated Statements and Other Financial Information

See "Item 3. Key Information—Selected Financial Data" and "Item 18. Financial Statements."

Legal Proceedings

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to our operations, in large part linked to the routine demands related to the rights of consumers. At December 31, 2010, we were parties in 15,947 judicial lawsuits and administrative proceedings, including 10,135 civil claims, and 5,812 labor claims. We believe that the outcome of the proceedings to which we are currently a party will not have a material adverse effect on our financial position, results of operations and cash flows. We have established provisions for all amounts in dispute that represent a probable loss in the view of our legal advisors and in relation to those disputes that are covered by laws, administrative decrees, decrees or court rulings that have proven to be unfavorable.

We are party to approximately 9,434 civil proceedings arising from the normal course of our business, which includes flight delays or cancellations and baggage loss or damage, and 701 civil proceedings against Varig S.A. in which plaintiffs claim we would be a successor in interest of Varig S.A. The vast majority of these proceedings involve minor cases relating to customer relations. At December 31, 2010, we had established provisions to address these contingencies in the total amount of R\$29.8 million.

We are party to approximately 1,454 labor proceedings arising from the normal course of our business, which includes overtime, hazardous work premium, health exposure allowance and differences in salary, and 4,358 labor proceedings against Varig S.A. in which plaintiffs claim we would be a successor in interest of Varig S.A.. At December 31, 2010, we have established provisions to address these contingencies in the total amount of R\$40.8 million.

We are subject to 19 labor proceedings related to employees' claims against Varig S.A. in Spain. We have established provisions in the amount of R\$21.3 million for these proceedings.

In 2001, we commenced proceedings against the Brazilian state revenue service, in which we claim an exemption from the payment of Brazilian value added tax (ICMS) due on imported aircraft, parts and engines. On May 30, 2007, the *Supremo Tribunal Federal* (Federal Supreme Court) ruled in our favor in respect of one of these cases. Various of the proceedings relating to this matter are still pending. We have not established any provisions for the amounts in question, which were, as of December 31, 2010, R\$193.2 million.

In 2007, we commenced an arbitration before the International Chamber of Commerce against the sellers of VRG and their controlling shareholders relating to a purchase price adjustment. In January 2011, the arbitral tribunal ruled in our favor and granted us an award of R\$93.0 million plus interest and costs against the sellers of VRG and their controlling shareholders. We have initiated enforcement proceedings to collect the award amount in U.S. federal courts. The sellers of VRG and their controlling shareholders are contesting the enforcement proceedings. We believe that the chance of success in the enforcement proceedings is possible.

We are questioning the applicability of certain provisions regarding the calculation and rates of social contribution taxes (PIS and COFINS) in Brazil. As of December 31, 2010 we had a provision of R\$83.9 million for these lawsuits in addition to judicial deposits of R\$67.0 million. As of December 31, 2009 these amounts were R\$64.0 million and R\$ 49.5 million, respectively.

For further information on our legal proceedings and contingencies, see notes 19 and 20 to our consolidated financial statements.

Dividends and Dividend Policy

Amounts Available for Distribution

At each annual general shareholders' meeting, our board of directors is required to propose how our earnings for the preceding fiscal year are to be allocated. For purposes of Brazilian corporation law, a company's non-consolidated net income after federal income tax and social contribution on net income for such fiscal year, net of any accumulated losses from prior fiscal years and amounts allocated to employees' and management's participation in earnings, represents its "income" for such fiscal year. In accordance with the Brazilian corporation law, an amount equal to the company's "income," as adjusted (the "distributable amount"), will be available for distribution to shareholders in any particular year. The distributable amount will be affected by the following:

- reduced by amounts allocated to the legal reserve;
- reduced by amounts allocated to the statutory reserve, if any;
- reduced by amounts allocated to the contingency reserve, if any; reduced by amounts allocated to the unrealized profits reserve established by the company in compliance with applicable law (as discussed below);
- reduced by amounts allocated to the reserve for investment projects (as discussed below); and
- increased by reversals of reserves recorded in prior years.

Our by-laws do not provide for statutory or contingency reserves. Under the Brazilian corporation law and according to our by-laws, we are required to maintain a "legal reserve" to which we must allocate 5% of our "income" for each fiscal year until the amount of the reserve equals 20% of paid-in capital. We are not required to make any allocations to our legal reserve in respect of any fiscal year in which such reserve, when added to our capital reserves, exceeds 30% of

our capital. Accumulated losses, if any, may be charged against the legal reserve. Other than that, the legal reserve can only be used to increase our capital. The legal reserve is subject to approval by the shareholders voting at the annual shareholders' meeting and may be transferred to capital but is not available for the payment of dividends in subsequent years. Our calculation of net income and allocations to reserves for any fiscal year are determined on the basis of our non-consolidated financial statements prepared in accordance with the Brazilian corporation law.

Under the Brazilian corporation law, a portion of a corporation's "income" may be allocated for discretionary appropriations for plant expansion and other fixed or working capital investment projects, the amount of which is based on a capital budget previously presented by management and approved by the shareholders in a general shareholders' meeting. After completion of the relevant capital projects, the company may retain the appropriation until shareholders vote to transfer all or a portion of the reserve to capital or retained earnings. The Brazilian corporation law provides that, if a project to which the reserve for investment projects account is allocated has a term exceeding one year, the budget related to the project must be submitted to the shareholders' meeting each fiscal year until the relevant investment is completed.

Under the Brazilian corporation law, the amount by which the mandatory distribution exceeds the "realized" portion of net income for any particular year may be allocated to the unrealized profits reserve and the mandatory distribution may be limited to the "realized" portion of net income. The "realized" portion of net income is the amount by which "income" exceeds the sum of (a) our net positive results, if any, from the equity method of accounting for earnings and losses of our subsidiaries and certain affiliates, and (b) the profits, gains or income obtained on transactions maturing after the end of the following fiscal year. As amounts allocated to the unrealized income reserve are realized in subsequent years, such amounts must be added to the dividend payment relating to the year of realization.

Under Brazilian tax legislation, a portion of the income taxes payable may also be transferred to a general "fiscal incentive reserve" in amounts equivalent to the reduction in the company's income tax liability which results from the option to deposit part of that liability into investment in approved projects in investment incentive regions established by government.

Under the Brazilian corporation law, any company may create a "statutory" reserve, which reserve must be described in the company's by-laws. Those by-laws which authorize the allocation of a percentage of a company's net income to the statutory reserve must also indicate the purpose, the criteria for allocation and the maximum amount of the reserve. The Brazilian corporation law provides that all discretionary allocations of "income," including the unrealized profits reserve and the reserve for investment projects, are subject to approval by the shareholders voting at the general shareholders' meeting and may be transferred to capital or used for the payment of dividends in subsequent years. The fiscal incentive reserve and the legal reserve are also subject to approval by the shareholders voting at the general shareholders' meeting and may be transferred to capital or used to absorb losses, but are not available for the payment of dividends in subsequent years.

The amounts available for distribution may be further increased by a reversion of the contingency reserve for anticipated losses constituted in prior years but not realized. Allocations to the contingency reserve are also subject to approval by the shareholders voting at the general shareholders meeting. The amounts available for distribution are determined on the basis of our non-consolidated financial statements prepared in accordance with Brazilian GAAP.

The balance of the profit reserve accounts, except for the contingency reserve and unrealized profits reserve, may not exceed the share capital. If this happens, a shareholders' meeting must resolve whether the excess will be applied to pay in the subscribed and unpaid capital, to increase and pay in the subscribed stock capital or to distribute dividends.

Pursuant to Law No. 10,303, net income unallocated to the accounts mentioned above must be distributed as dividends.

Mandatory Distribution

The Brazilian corporation law generally requires that the by-laws of each Brazilian corporation specify a minimum percentage of the amounts available for distribution by such corporation for each fiscal year that must be distributed to

shareholders as dividends, also known as the mandatory distribution.

The mandatory distribution is based on a percentage of adjusted non-consolidated net income, not lower than 25%, rather than a fixed monetary amount per share. If the by-laws of a corporation are silent in this regard, the percentage is deemed to be 50%. Under our by-laws, at least 25% of our adjusted non-consolidated net income, as calculated under Brazilian GAAP and adjusted under the Brazilian corporation law (which differs significantly from net income as calculated under IFRS), for the preceding fiscal year must be distributed as a mandatory annual dividend. Adjusted net income means the net income after any deductions for the legal reserve and contingency reserves and any reversals of the contingency reserves created in previous fiscal years. The Brazilian corporation law, however, permits a publicly held company, such as we are, to suspend the mandatory distribution of dividends in any fiscal year in which the board of directors reports to the shareholders' meeting that the distribution would be inadvisable in view of the company's financial condition. The suspension is subject to the approval at the shareholders' meeting and review by members of the fiscal committee. While the law does not establish the circumstances in which payment of the mandatory dividend would be "inadvisable" based on the company's financial condition, it is generally agreed that a company need not pay the mandatory dividend if such payment threatens the existence of the company as a going concern or harms its normal course of operations. In the case of publicly held corporations, the board of directors must file a justification for such suspension with the CVM within five days of the relevant general meeting. If the mandatory dividend is not paid and funds are available, those funds shall be attributed to a special reserve account. If not absorbed by subsequent losses, those funds shall be paid out as dividends as soon as the financial condition of the company permits.

The board of directors can also decide to make the mandatory dividend distribution in the form of interest attributable to shareholders' equity, which is deductible when calculating income and social contribution taxes.

Payment of Dividends

We are required by the Brazilian corporation law to hold an annual general shareholders' meeting by no later than April 30 of each year, at which time, among other things, the shareholders have to decide on the payment of an annual dividend. Additionally, interim dividends may be declared by the board of directors. Any holder of record of shares at the time of a dividend declaration is entitled to receive dividends. Dividends on shares held through depositaries are paid to the depositary for further distribution to the shareholders.

Under the Brazilian corporation law, dividends are generally required to be paid to the holder of record on a dividend declaration date within 60 days following the date the dividend was declared, unless a shareholders' resolution sets forth another date of payment, which, in either case, must occur prior to the end of the fiscal year in which such dividend was declared. Pursuant to our by-laws, unclaimed dividends do not bear interest, are not monetarily adjusted and revert to us three years after dividends were declared. See "Item 10.B. Memorandum of Articles of Association—Description of Capital Stock."

Our board of directors may declare interim dividends or interest attributable to shareholders' equity based on income verified in semi-annual financial statements. The board of directors may also declare dividends based on financial statements prepared for shorter periods, provided that the total dividends paid in each six-month period do not exceed the capital reserves amount required by Brazilian corporation law. The board of directors may also pay interim dividends or interest attributable to shareholders' equity out of retained earnings or income reserves recorded in the last annual balance sheet. Any payment of interim dividends may be set off against the amount of mandatory dividends relating to the net income earned in the year in which the interim dividends were paid.

Our by-laws do not require that we adjust the amount of any dividend payment to inflation.

In general, shareholders who are not residents of Brazil must register their equity investment with the Central Bank to have dividends, sales proceeds or other amounts with respect to their shares eligible to be remitted outside Brazil. The preferred shares underlying the ADSs are held in Brazil by Banco Itaú S.A., also known as the custodian, as agent for the depositary, that is the registered owner on the records of the registrar for our shares. The current registrar is Banco Itaú. The depositary registers the preferred shares underlying the ADSs with the Central Bank and, therefore, is able to have dividends, sales proceeds or other amounts with respect to registered preferred shares remitted outside Brazil.

Payments of cash dividends and distributions, if any, are made in *reais* to the custodian on behalf of the depositary, which then converts such proceeds into U.S. dollars and causes such U.S. dollars to be delivered to the depositary for distribution to holders of ADSs. In the event that the custodian is unable to convert immediately the Brazilian currency received as dividends into U.S. dollars, the amount of U.S. dollars payable to holders of ADSs may be adversely affected by depreciation of the Brazilian currency that occur before the dividends are converted. Under the current Brazilian corporation law, dividends paid to persons who are not Brazilian residents, including holders of ADSs, will not be subject to Brazilian withholding tax, except for dividends declared based on profits generated prior to December 31, 1995, which will be subject to Brazilian withholding income tax at varying tax rates. See "Item 10. Taxation—Material Brazilian Tax Considerations."

Holders of ADSs have the benefit of the electronic registration obtained from the Central Bank, which permits the depositary and the custodian to convert dividends and other distributions or sales proceeds with respect to the preferred shares represented by ADSs into foreign currency and remits the proceeds outside Brazil. In the event the holder exchanges the ADSs for preferred shares, the holder will be entitled to continue to rely on the depositary's registration for five business days after the exchange. Thereafter, in order to convert foreign currency and remit outside Brazil the sales proceeds or distributions with respect to the preferred shares, the holder must obtain a new registration in its own name that will permit the conversion and remittance of such payments. See "Item 10.B. Memorandum of Articles of Association—Description of Capital Stock—Regulation of Foreign Investment and Exchange Controls."

Under current Brazilian legislation, the federal government may impose temporary restrictions of foreign capital abroad in the event of a serious imbalance or an anticipated serious imbalance of Brazil's balance of payments.

Interest Attributable to Shareholders' Equity

Under Brazilian tax legislation effective January 1, 1996, Brazilian companies are permitted to pay "interest" to holders of equity securities and treat such payments as an expense for Brazilian income tax purposes and, beginning in 1997, for social contribution purposes. The purpose of the tax law change is to encourage the use of equity investment, as opposed to debt, to finance corporate activities. Payment of such interest may be made at the discretion of our board of directors, subject to the approval of the shareholders at a general shareholders' meeting. The amount of any such notional "interest" payment to holders of equity securities is limited in respect of any particular year to the daily pro rata variation of the Long-Term Interest Rate (*Taxa de Juros de Longo Prazo*), or TJLP, as determined by the Central Bank from time to time, and may not exceed the greater of:

- 50% of net income (after social contribution on net profits but before taking into account the provision for income tax and the interest attributable to shareholders' equity) for the period in respect of which the payment is made; or
- 50% of the sum of retained earnings and profit reserves as of the beginning of the year in respect of which such payment is made.

Payment of interest to a holder that is not domiciled in Brazil for Brazilian tax and regulatory purposes (a "non-Brazilian holder") is subject to withholding income tax at the rate of 15%, or 25% if the non-Brazilian holder is domiciled in a country or location that does not impose income tax or where the income tax rate is lower than 20% ("Low or Nil Tax Jurisdiction") or where applicable local laws impose restrictions on the disclosure of the shareholding composition or the ownership of investments or the ultimate beneficiary of the income derived from transactions carried out and attributable to a non-Brazilian holder. These payments may be included, at their net value, as part of any mandatory dividend. To the extent payment of interest on net equity is so included, the corporation is required to distribute to shareholders an additional amount to ensure that the net amount received by them, after payment of the applicable withholding income tax, plus the amount of declared dividends is at least equal to the mandatory dividend.

Under current Brazilian legislation, the sum of the amount distributed as interest on shareholders' equity and as dividends must be at least equal to the mandatory dividend. For Brazilian GAAP accounting purposes, although the interest charge must be reflected in the statement of operations to be tax deductible, the charge is reversed before calculating net income in the statutory financial statements and deducted from shareholders' equity in a manner similar to a dividend. Any payment of interest in respect of preferred shares (including the ADSs) is subject to Brazilian withholding income tax at the rate of 15%, or 25% in the case of a shareholder domiciled in a Low or Nil Tax Jurisdiction or where applicable local laws impose restrictions on the disclosure of the shareholding composition or

the ownership of investments or the ultimate beneficiary of the income derived from transactions carried out and attributable to a non-Brazilian holder (see “Item 10. Taxation—Material Brazilian Tax Considerations”). If such payments are accounted for, at their net value, as part of any mandatory dividend, the tax is paid by the company on behalf of its shareholders, upon distribution of the interest. In case we distribute interest attributed to shareholders’ equity in any year, and that distribution is not accounted for as part of mandatory distribution, Brazilian income tax would be borne by the shareholders. For IFRS accounting purposes, interest attributable to shareholders’ equity is reflected as a dividend payment.

Under our by-laws, interest attributable to shareholders' equity may be treated as a dividend for purposes of the mandatory dividend.

In 2008 we distributed R\$36.3 million to our shareholders, equivalent to a payment of R\$0.18 per share or ADS. In 2009 we distributed R\$185.8 million to our shareholders, equivalent to a payment of R\$0.70 per share or ADS. In 2010 we declared R\$50.9 million to our shareholders, equivalent to a payment of R\$0.19 per share or ADS.

Dividend Policy

We intend to declare and pay dividends and/or interest attributed to shareholders' equity, as required by the Brazilian corporation law and our by-laws. The declaration of annual dividends, including dividends in excess of the mandatory distribution, requires approval by the vote of the majority of the holders of our common shares. The amount of any distributions will depend on many factors, such as our results of operations, financial condition, cash requirements, prospects and other factors deemed relevant by our board of directors and shareholders. Within the context of our tax planning, we may in the future continue determining that it is to our benefit to distribute interest attributed to shareholders' equity.

B. Significant Changes

None.

ITEM 9. The Offer and Listing

A. Offer and Listing Details

In the United States, our preferred shares trade in the form of ADS. Since December 2005 each ADS represents one preferred share, issued by The Bank of New York Mellon, as Depositary pursuant to a Deposit Agreement. On December 13, 2005, we executed a 2:1 ADS split, changing to ratio of one ADS representing two preferred shares to one ADS representing one preferred share, as approved by a meeting of the Board of Directors of the Company on November 8, 2005. The ADSs commenced trading on the NYSE on June 24, 2004. As of December 31, 2010, the ADSs represented 27.1% of our preferred shares and 38.0% of our current global public float.

The following table sets forth the reported high and low closing sales prices for the ADSs on the NYSE for the periods indicated.

	Low	US\$ per ADS High	Average⁽¹⁾
2008			
Annual	3.06	23.94	11.51
2009

Not applicable.

C. Markets

Trading on the BM&FBOVESPA

In 2000, the São Paulo Stock Exchange was reorganized through the execution of memoranda of understanding by the Brazilian stock exchanges. Under the memoranda, all securities are now traded only on the São Paulo Stock Exchange, with the exception of electronically traded public debt securities and privatization auctions, which are

traded on the Rio de Janeiro Stock Exchange.

On May 8, 2008, the São Paulo Stock Exchange and the Brazilian Mercantile and Futures Exchange merged, creating BM&FBOVESPA. Together, the companies have formed one of the largest exchanges worldwide in terms of market value, the second largest in the Americas, and the leading exchange in Latin America.

When shareholders trade in common and preferred shares on the BM&FBOVESPA, the trade is settled in three business days after the trade date without adjustment of the purchase price for inflation. The seller is ordinarily required to deliver the shares to the exchange on the second business day following the trade date. Delivery of and payment for shares are made through the facilities of the clearinghouse, *Companhia Brasileira de Liquidação e Custódia*, or CBLC.

The BM&FBOVESPA is a for-profit listed company that has regulatory authority over its trading markets. Trading on the BM&FBOVESPA is limited to member brokerage firms and a limited number of authorized

nonmembers. The BM&FBOVESPA has two open outcry trading sessions each day from 10:00 a.m. to 5:00 p.m., São Paulo time, for all securities traded on all markets, except during daylight savings time in Brazil. During daylight savings time in Brazil, usually the sessions are from 11:00 a.m. to 6:00 p.m., São Paulo time, to closely mirror the NYSE trading hours. Trading is also conducted between 11:00 a.m. and 6:00 p.m., or between 10:00 a.m. and 5:00 p.m. during daylight savings time in the United States, on an automated system known as the Computer Assisted Trading System (*Sistema de Negociação 77 Assistida por Computador*) on the BM&FBOVESPA and on the National Electronic Trading System (*Sistema Eletrônico de Negociação Nacional*). This system is a computerized system that links electronically with the seven smaller regional exchanges. The BM&FBOVESPA also permits trading from 5:45 p.m. to 7:00 p.m., São Paulo time, or from 6:45 p.m. to 7:30 p.m. during daylight savings time in Brazil, on an online system connected to traditional and Internet brokers called the “after market.” Trading on the after market is subject to regulatory limits on price volatility and on the volume of shares transacted through Internet brokers. There are no specialists or officially recognized market makers for our shares in Brazil.

In order to better control volatility, the BM&FBOVESPA adopted a “circuit breaker” system pursuant to which trading sessions may be suspended for a period of 30 minutes or one hour whenever the indices of the BM&FBOVESPA falls below the limits of 10% or 15%, respectively, in relation to the index registered in the previous trading session.

The BM&FBOVESPA is significantly less liquid than the NYSE or other major exchanges in the world. As of December 2009, the aggregate market capitalization of the BM&FBOVESPA was equivalent to R\$2.3 trillion and the 10 largest companies listed on the BM&FBOVESPA represented 52.5% of the total market capitalization of all listed companies. In contrast, as of December 2009, the aggregate market capitalization of the NYSE was US\$18.9 trillion. Although any of the outstanding shares of a listed company may trade on the BM&FBOVESPA, in most cases fewer than half of the listed shares are actually available for trading by the public, the remainder being held by small groups of controlling persons, by government entities or by one principal shareholder. See “Item 3. Risk Factors—Risks Relating to the ADSs and Our Preferred Shares—The relative volatility and illiquidity of the Brazilian securities markets may substantially limit your ability to sell the preferred shares underlying the ADSs at the time and price you desire.”

Trading on the BM&FBOVESPA by a non-Brazilian holder, is subject to certain limitations under Brazilian foreign investment legislation. With limited exceptions, non-Brazilian holders may only trade on Brazilian stock exchanges in accordance with the requirements of Resolution No. 2,689, of January 26, 2000, of the National Monetary Council (*Conselho Monetário Nacional*), or CMN, or Resolution No. 2,689. Resolution No. 2,689 requires that securities held by non-Brazilian holders be maintained in the custody of, or in deposit accounts with, financial institutions and be registered with a clearinghouse. Such financial institutions and clearinghouses must be duly authorized to act as such by the Central Bank and the CVM. In addition, Resolution No. 2,689 requires non-Brazilian holders to restrict their securities trading to transactions on Brazilian stock exchanges or qualified over-the-counter markets. With limited exceptions, non-Brazilian holders may not transfer the ownership of investments made under Resolution No. 2,689 to other non-Brazilian holders through a private transaction. See “Item 10. Taxation—Material Brazilian Tax Considerations—Taxation on Gains” for a description of certain tax benefits extended to non-Brazilian holders who qualify under Resolution No. 2,689.

Corporate Governance Practices

In 2000, the São Paulo Stock Exchange introduced three special listing segments, known as Level 1 and 2 of Differentiated Corporate Governance Practices and New Market (*Novo Mercado*), aiming at fostering a secondary market for securities issued by Brazilian companies with securities listed on the BM&FBOVESPA, by prompting such companies to follow good practices of corporate governance. The listing segments were designed for the trading of shares issued by companies voluntarily undertaking to abide by corporate governance practices and disclosure requirements in addition to those already imposed by Brazilian law. These rules generally increase shareholders’ rights and enhance the quality of information provided to shareholders.

To become a Level 1 (*Nível 1*) company, in addition to the obligations imposed by current Brazilian law, an issuer must agree to (a) ensure that shares of the issuer representing 25% of its total capital are effectively available for trading, (b) adopt offering procedures that favor widespread ownership of shares whenever making a public offering, (c) comply with minimum quarterly disclosure standards including cash flow statements, (d) follow stricter disclosure policies with respect to transactions made by controlling shareholders, directors and officers involving securities issued by the issuers; (e) submit any existing shareholders’ agreements and stock option plans to the BM&FBOVESPA and (f) make an annual calendar announcing scheduled corporate events, bringing information on the company, the event, date and time it is going to take place; any changes in the schedule shall be promptly forwarded to BM&FBOVESPA and published.

To become a Level 2 (*Nível 2*) company, in addition to the obligations imposed by current Brazilian law, an issuer must agree to (a) comply with all of the listing requirements for Level 1 companies, (b) grant tag-along rights for all shareholders in connection with a transfer of control of the company, offering the same price paid per share for controlling block common shares and 80% of the price paid per share for controlling block preferred shares, (c) grant voting rights to holders of preferred shares in connection with certain corporate restructurings and related party transactions, such as: (i) any transformation of the company into another corporate form, (ii) any merger, consolidation or spin-off of the company, (iii) approval of any transactions between the company and its controlling shareholder, including parties related to the controlling shareholder, (iv) approval of any valuation of assets to be delivered to the company in payment for shares issued in a capital increase, (v) appointment of an independent company, with renowned expertise, to ascertain the economic value of the company in connection with any deregistration and delisting tender offer, and (vi) any changes to these voting rights, (d) have a board of directors comprised of at least five members, of which at least 20% shall be “independent,” as defined by the BM&FBOVESPA, with a term limited to two years, (e) if it elects to delist from the Level 2 segment, hold a tender offer by the company’s controlling shareholder (the minimum price of the shares to be offered will be the economic value determined by an appraisal process), and, for the same purposes, in the case of companies with diffuse control (controlling power exercised by the shareholder holding less than 50% of the voting capital and per group of shareholders who are not signatories of voting agreements and which is not under a common control and does not act as a representative of a common interest) to comply with complementary rules to be issued by BM&FBOVESPA, (f) disclose: (i) quarterly financial statements in English or prepared in accordance with U.S. GAAP or IFRS and (ii) annual financial statements in English, including cash flow statements, prepared in accordance with U.S. GAAP or IFRS, in U.S. dollars or *reais* and (g) adhere exclusively to the rules of the BM&FBOVESPA Arbitration Chamber for resolution of disputes involving the controlling shareholders, the managers and the members of the fiscal committee.

To be listed in the *Novo Mercado*, an issuer must meet all of the requirements described above, in addition to (a) issuing only voting shares and ensure that all the shares will be composed exclusively of common shares, (b) granting tag-along rights for all shareholders in connection with a transfer of control of the company, offering the same price paid per share for controlling block common shares.

In May 2004, we entered into an agreement with the BM&FBOVESPA to comply with the requirements to become a Level 2 company. In addition to complying with Level 2 requirements, we have granted tag-along rights that entitle our preferred shareholders to receive 100% of the price paid per common share of controlling block shareholders in connection with a transaction resulting in a transfer of control of our company. Furthermore, we prepare quarterly financial statements in accordance with IFRS. We were included in the following indexes (a) since 2005: IbrX-100 (*Índice Brasil, Index Brazil*), IGC (*Índice de Ações com Governança Corporativa Diferenciada, Special Corporate Governance Index*), ITAG (*Índice de Ações com Tag Along Diferenciado, Special Tag Along Stock Index*) and MSCI (*Morgan Stanley Capital International Index*), (b) since 2006: IbrX-50 (*Índice Brasil 50, Index Brazil 50*): and (c) since 2007: *Índice BM&FBOVESPA*, all of which reflect our increased market capitalization and liquidity of our preferred shares.

Regulation of the Brazilian Securities Market

The Brazilian securities markets are regulated by the CVM, which has regulatory authority over the stock exchanges and securities markets, as well as by the Central Bank, which has, among other powers, licensing authority over brokerage firms and regulates foreign investment and foreign exchange transactions. The Brazilian securities markets are governed by Law No. 10,198 dated February 14, 2001, Law No. 10,303 dated October 31, 2001, known as Law No. 10,303 and Law No. 10,411 dated February 26, 2002, which introduced new concepts and several changes to Law No. 6,385 dated December 7, 1976, as amended and supplemented, the principal law governing the Brazilian securities markets, by Brazilian corporation law, and by regulations issued by the CVM, the CMN and the Central

Bank. These laws and regulations, among others, provide for disclosure requirements applicable to issuers of traded securities, criminal sanctions for insider trading and price manipulation, and protection of minority shareholders. They also provide for licensing and oversight of brokerage firms and governance of Brazilian stock exchanges. However, the Brazilian securities markets are not as highly regulated and supervised as U.S. securities markets.

Under the Brazilian corporation law, a company is either publicly held, a *companhia aberta*, or privately held, a *companhia fechada*. All listed companies are registered with the CVM and are subject to reporting and regulatory requirements. A company registered with the CVM may trade its securities either on the BM&FBOVESPA or in the Brazilian over-the-counter market. Shares of companies listed on the BM&FBOVESPA may not simultaneously trade on the Brazilian over-the-counter market. The shares of a listed company may also be traded privately, subject to several limitations. To be listed on the BM&FBOVESPA, a company must apply for registration with the BM&FBOVESPA and the CVM.

The trading of securities on the BM&FBOVESPA may be halted at the request of a company in anticipation of a material announcement. Trading may also be suspended on the initiative of the BM&FBOVESPA or the CVM, among other reasons, based on or due to a belief that a company has provided inadequate information regarding a significant event or has provided inadequate responses to inquiries by the CVM or the BM&FBOVESPA.

Trading on the BM&FBOVESPA by non-residents of Brazil is subject to limitations under Brazilian foreign investment and tax legislation. The Brazilian custodian for the preferred shares underlying the ADSs must, on behalf of the depositary for the ADSs, obtain registration from the Central Bank to remit U.S. dollars abroad for payments of dividends, any other cash distributions, or upon the disposition of the shares and sales proceeds thereof. If you exchange your ADSs for preferred shares, you will be entitled to continue to rely on the custodian's electronic foreign capital registration for five business days after the exchange. Thereafter, you may not be able to obtain and remit abroad non-Brazilian currency upon the disposition of or distributions relating to the preferred shares, and will be subject to a less favorable tax treatment on gains with respect to the preferred shares, unless you obtain a new electronic foreign capital registration on your own name. See "Item 10.B. Memorandum of Articles of Association—Description of Capital Stock—Regulation of Foreign Investment."

Disclosure Requirements

According to Law No 6,385, a publicly held company must submit to CVM and BM&FBOVESPA certain periodic information, including annual and quarterly reports prepared by management and independent auditors. This legislation also requires us to file with CVM our shareholders' agreements, notices of shareholders' meetings and copies of the related minutes.

Pursuant to CVM Rule No. 358, of January 3, 2002, as amended, the CVM revised and consolidated the requirements regarding the disclosure and use of information related to material facts and acts of publicly held companies, including the disclosure of information in the trading and acquisition of securities issued by publicly held companies.

Such requirements include provisions that:

- establish the concept of a material fact that gives rise to reporting requirements. Material facts include decisions made by the controlling shareholders, resolutions of the general meeting of shareholders and of management of the company, or any other facts related to the company's business (whether occurring within the company or otherwise somehow related thereto) that may influence the price of its publicly traded securities, or the decision of investors to trade such securities or to exercise any of such securities' underlying rights;
- specify examples of facts that are considered to be material, which include, among others, the execution of agreements providing for the transfer of control, the entry or withdrawal of shareholders that maintain any managing, financial, technological or administrative function with or contribution to the company, and any corporate restructuring undertaken among related companies;

- oblige the officer of investor relations, controlling shareholders, other officers, directors, members of the audit committee and other advisory boards to disclose material facts;

- require simultaneous disclosure of material facts to all markets in which the corporation's securities are admitted for trading;
- require the acquirer of a controlling stake in a corporation to publish material facts, including its intentions as to whether or not to de-list the corporation's shares, within one year;
- establish rules regarding disclosure requirements in the acquisition and disposal of a material stockholding stake; and
- forbid trading on the basis of insider information.

In addition to the disclosure requirements under the Brazilian corporation law and the CVM regulations, we must also observe the following disclosure requirements:

- we must disclose our consolidated financial statements at the end of each quarter (except for the last quarter of each year) and at the end of each fiscal year, including a statement of cash flows, which must indicate, at least, the changes in cash and cash equivalents, separated into operating, financing and investing cash flows;
- we must, no later than four months after the end of the fiscal year: disclose our financial statements and consolidated financial statements in accordance with IFRS, in *reais* or U.S. dollars, which must be fully disclosed, in English, together with a management report, explanatory notes that shall include the net income and shareholders' equity calculated at the end of such fiscal year, as well as the proposal for distribution or other use of net income, and the independent auditors' report; and
- within no longer than 15 days following the term established by the Brazilian corporation law for disclosure of our quarterly information, we must also: disclose our quarterly information translated into English.

CVM Rule No. 480 provides for periodical information that shall be submitted to the market. For instance the submission of the following documents: (i) financial statements, (ii) standard form and (iii) *Formulário de Referência*, a new annual report that replaces IAN.

The *Formulário de Referência* shall be annually presented until the fifth month following the termination of the fiscal year. Additionally whenever the company decides to make a public offering an updated *Formulário de Referência* shall be filed. In addition, category A issuers, which includes us, shall always update its *Formulário de Referência* within seven business days from the occurrence of one of the following events:

- (i) change of any of company's managers or member of the Audit Committee;
- (ii) change of the corporate capital of the company;
- (iii) issuance of securities;
- (iv) change of the rights and advantages of the issued securities;
- (v) change of the majority shareholder or variation in its position equal or superior to five percent (5%);
- (vi) whenever a shareholder achieves a participation equal or superior to five percent (5%) of shares of the same class, considering that the issuer known it;

- (vii) change or disclosure of new projections or estimates;
- (viii) consolidation, merger of shares, merger and spin-off involving the company;
- (ix) execution, change or termination of shareholders agreement; or
- (x) file for reorganization or petition for bankruptcy.

CVM Rule No. 481 which sets forth (i) the procedures relating to the public solicitation of proxies for the exercise of voting rights at shareholders' meetings of public held companies; and (ii) disclosure requirements to be followed by public held companies before the shareholders meetings. It provides that: (i) shareholders that own 0.5% or more of the company's corporate capital may indicate members to the Board of Directors and to the Fiscal Council in public solicitation of proxies conducted by the company's management, being thus required that the shareholders be able to vote on the referred candidates; (ii) the companies that accept digital proxies sent via world wide web must allow shareholders who hold 0.5% or more of the company's corporate capital to make public solicitation of proxies through the company's referred system; and (iii) the publicly held companies that do not accept digital proxies sent via world wide web must pay part of the costs of the public solicitation of proxies made by shareholders that own 0.5% or more of the company's corporate capital.

In addition, all information that shall be disclosed jointly with the call notice for General Shareholders Meetings of public held companies must be made available to shareholders through the CVM website and that the following documents shall be disclosed at least with thirty (30) in advance of the Annual Shareholders Meeting:

- (i) the management report on the corporation's affair and major administrative events of the last fiscal year;
- (ii) copies of the accounts and financial statements;
- (iii) the opinion of the independent auditors, if any;
- (iv) comments of the managers in the terms provided in the Section ten (10) of the *Formulário de Referência*; and
- (v) the Audit Committee report, if any.

Changes in Brazilian Corporation Law

During 2008 and 2009, the CPC issued over 40 standards, interpretations and application guidance documents, in order to converge Brazilian GAAP to IFRS, except in a limited number of areas in which there are legal restrictions preventing complete convergence. Such legal restrictions do not prevent consolidated Brazilian GAAP financial statements from complying with IFRS, but limit certain options permitted by IFRS.

ITEM 10. Additional Information

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

The Registrant was formed on March 12, 2004 as a *sociedade por ações*, a stock corporation duly incorporated under the laws of Brazil with unlimited duration. The Registrant is registered with the São Paulo Commercial Registry (*Junta Comercial do Estado de São Paulo*) under number NIRE 35.300.314.441.

Description of Capital Stock

General

The Registrant became the parent company of Gol on March 29, 2004, when all of the common shares, Class A preferred shares and Class B preferred shares of Gol (except for five common shares of Gol that are held by members of Gol's board of directors for eligibility purposes) were contributed to the Registrant by the shareholders of Gol in exchange for the applicable number of either common shares or preferred shares of the Registrant. As a result of this reorganization, 41,499,995 common shares of Gol were exchanged for 109,448,497 common shares and 6,751,719 preferred shares of the Registrant, 10,375,000 Class A preferred shares of Gol were exchanged for 29,049,994 preferred shares and six common shares of the Registrant and 8,408,206 Class B preferred shares of Gol were exchanged for 23,542,977 preferred shares of the Registrant. The reorganization did not affect our operations in any respect. The aggregate number of our common and preferred shares outstanding was increased to 168,793,243 as the result of a 2.80 -for-one stock split on May 25, 2004 (which includes 224 common shares and 56 preferred shares of the Registrant that were issued in connection with its formation on March 12, 2004). On June 24, 2004, the Registrant completed its initial public offering through the issuance of 18,750,000 preferred shares in the form of ADSs in the United States and other countries outside Brazil and in the form of preferred shares in Brazil. On April 28, 2005, the Registrant completed a primary and secondary offering of 16,905,000 preferred shares in the form of ADSs in the United States and other countries outside Brazil and in the form of preferred shares in Brazil. In addition, during 2005, our executive officers exercised stock options for an aggregate of 703,579 preferred shares. During 2006, our executive officers exercised stock options for an aggregate of 233,833 preferred shares. In 2007, we increased our capital and, as a result of 6.1 million shares issued for the VRG acquisition and 11,569 shares issued related to our stock option program. On March 20, 2009, our board of directors approved a capital stock increase issuing 6,606,366 voting and 19,487,356 preferred shares. On October 19, 2009, we concluded a global share offering of 19,002,500 common shares and 43,187,500 preferred shares. On May 5, 2010 our board of directors approved a capital increase, in the amount of R\$119.0 million, with the issuance of 4,883,756 shares, of which 3,833,076 were common shares and 1,050,680 were preferred shares. During 2010, our executive officers exercised stock options for an aggregate of 173,374 preferred shares. As of December 31, 2010 our capital structure consisted of 137,032,734 common shares and 133,303,934 preferred shares, each with no par value. We are a stock corporation (*sociedade anônima*) incorporated under the laws of Brazil.

Issued Share Capital

Under our by-laws, our authorized capital as of December 31, 2010 was R\$4.0 billion, and can be increased by the issuance of preferred or common shares, after approval by our board of directors. Our shareholders must approve any capital increase that exceeds our authorized capital. Under our bylaws and the Brazilian corporation law, if we issue additional shares in a private transaction, the existing shareholders have preemptive rights to subscribe for shares on a pro rata basis according to their holdings. See “—Preemptive Rights.”

Regulation of Foreign Investment

There are no general restrictions on ownership of our preferred shares or common shares by individuals or legal entities domiciled outside Brazil, except for those regarding airline companies (see “—Regulation of the Brazilian Civil Aviation Market”). However, the right to convert dividend payments and proceeds from the sale of preferred shares or common shares into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, the registration of the relevant investment with the Central Bank.

Foreign investors may register their investment under Law No. 4,131 of September 3, 1962, or Law No. 4,131, or Resolution No. 2,689 of January 26, 2000 of the CMN, or Resolution No. 2,689. Registration under Law No. 4,131 or under Resolution No. 2,689 generally enables foreign investors to convert into foreign currency dividends, other distributions and sales proceeds received in connection with registered investments and to remit such amounts abroad. Resolution No. 2,689 affords favorable tax treatment to foreign investors who are not resident in a tax haven jurisdiction, which is defined under Brazilian tax laws as a country that does not impose taxes or where the maximum income tax rate is lower than 20% or that restricts the disclosure of shareholder composition or ownership of investments.

Under Resolution No. 2,689, foreign investors may invest in almost all financial assets and engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are fulfilled. In accordance with Resolution No. 2,689, the definition of foreign investor includes individuals, legal entities, mutual funds and other collective investment entities that are domiciled or headquartered abroad. Investors may not transfer the ownership of investments made under Resolution No. 2,689 to other non-Brazilian holders through private transactions.

Pursuant to Resolution No. 2,689, foreign investors must:

- appoint at least one representative and a custodian in Brazil with powers to perform actions relating to the foreign investment;
- complete the appropriate foreign investor registration form;
- register as a foreign investor with the CVM;
- register the foreign investment with the Central Bank;
- appoint a tax representative in Brazil; and
- obtain a taxpayer identification number from the Brazilian federal tax authorities.

Amounts invested in our preferred shares by a non-Brazilian holder who qualifies under Resolution 2,689 and obtains registration with the CVM, or by the depositary representing an ADS holder, are eligible for registration with the Central Bank. This registration (the amount so registered is referred to as registered capital) allows the remittance outside Brazil of foreign currency, acquired with the proceeds of distributions on, and amounts realized through, dispositions of our preferred shares. The registered capital per preferred share purchased in the form of an ADS, or purchased in Brazil and deposited with the depositary in exchange for an ADS, will be equal to its purchase price (stated in U.S. dollars). The registered capital per preferred share withdrawn upon cancellation of an ADS will be the U.S. dollar equivalent of (i) the average price of a preferred share on the Brazilian stock exchange on which the most preferred shares were traded on the day of withdrawal or (ii) if no preferred shares were traded on that day, the average price on the Brazilian stock exchange on which the most preferred shares were traded in the fifteen trading sessions immediately preceding such withdrawal. The U.S. dollar equivalent will be determined on the basis of the average rates quoted by the Central Bank on these dates.

A non-Brazilian holder of preferred shares may experience delays in effecting Central Bank registration, which may delay remittances abroad. This delay may adversely affect the amount in U.S. dollars, received by the non-Brazilian holder.

A registration has been obtained in the name of the depositary with respect to the ADSs and is maintained by the custodian on behalf of the depositary. Pursuant to the registration, the custodian and the depositary are able to convert dividends and other distributions with respect to the preferred shares represented by our ADSs into foreign currency and remit the proceeds outside Brazil. In the event that a holder of ADSs exchanges such ADSs for preferred shares, such holder will be entitled to continue to rely on the depositary's registration for five business days after such exchange, following which such holder must seek to obtain its own registration with the Central Bank.

Thereafter, any holder of preferred shares may not be able to convert into foreign currency and remit outside Brazil the proceeds from the disposition of, or distributions with respect to, such preferred shares, unless the holder is a duly

qualified investor under Resolution 2,689.

If the shareholder does not qualify under Resolution 2,689 by registering with the CVM and the Central Bank and appointing a representative and a custodian in Brazil, the holder will be subject to less favorable Brazilian tax treatment than a holder of ADSs. Regardless of qualification under Resolution 2,689, residents in tax haven jurisdiction are subject to less favorable tax treatment than other foreign investors. See “—Taxation—Brazilian Tax Considerations.”

Under current Brazilian legislation, the federal government may impose temporary restrictions on remittances of foreign capital abroad in the event of a serious imbalance or an anticipated serious imbalance of Brazil's balance of payments. For approximately six months in 1989 and early 1990, the Brazilian government froze all dividend and capital repatriations held by the Central Bank that were owed to foreign equity investors, in order to conserve Brazil's foreign currency reserves. These amounts were subsequently released in accordance with federal government directives. There can be no assurance that the Brazilian government will not impose similar restrictions on foreign repatriations in the future. See "Item 3. Risk Factors—Risks Relating to Brazil."

Description of Preferred Shares

According to our by-laws, our preferred shares are non-voting. However, under certain limited circumstances provided for in the Brazilian corporation law and as described in this section, holders of our preferred shares may be entitled to vote. Upon liquidation, holders of preferred shares are entitled to receive distributions prior to the holders of our common shares.

According to our by-laws, holders of our preferred shares are entitled to be included in a public tender offer in case our controlling shareholder sells its controlling stake in us, and the minimum price to be offered for each preferred share is 100% of the price paid per share of the controlling stake.

Under Brazilian law, the protections afforded to minority shareholders are different from those in the United States. In particular, judicial guidance with respect to shareholder disputes is less established under Brazilian law than U.S. law and there are different procedural requirements for bringing shareholder lawsuits, such as shareholder derivative suits. As a result, in practice it may be more difficult for our minority shareholders to enforce their rights against us or our directors or controlling shareholder than it would be for shareholders of a U.S. company.

Redemption and Rights of Withdrawal

Under the Brazilian corporation law, a dissenting or non-voting shareholder has the right to withdraw from a company and be reimbursed for the value of the preferred or common shares held whenever a decision is taken at a general shareholders' meeting by a vote of shareholders representing at least 50% of the total outstanding voting capital to:

- create a new class of preferred shares or increase disproportionately an existing class of preferred shares relative to the other classes of shares, unless such action is provided for or authorized by our by-laws (our by-laws allow us to do so);
- modify a preference, privilege or condition of redemption or amortization conferred on one or more classes of preferred shares, or create a new class with greater privileges than the existing classes of preferred shares;
- reduce the mandatory distribution of dividends;
- merge or consolidate us with another company;
- participate in group of companies as defined in the Brazilian corporation law and subject to the conditions set forth therein;
- change our corporate purpose, including a sale of the voting control to a third party;

- transfer all of our shares to another company or receive shares of another company in order to make the company whose shares were transferred a wholly owned subsidiary of such company, known as *incorporação de ações*;
- conduct a spin-off that results in (a) a change of our corporate purposes, except if the assets and liabilities of the spin-off company are contributed to a company that is engaged in substantially the same activities, (b) a reduction in the mandatory dividend or (c) any participation in a centralized group of companies, as defined under the Brazilian corporation law; or

- dissolution of the company or terminating a state of liquidation.

In the event that the entity resulting from a merger, consolidation, or *incorporação de ações*, or spin-off of a listed company fails to become a listed company within 120 days of the shareholders meeting at which such decision was taken, the dissenting or non-voting shareholders may also exercise their withdrawal right.

If there is a resolution to (a) merge or consolidate us with another company; (b) conduct a *incorporação de ações*; (c) participate in a group of companies, as defined under the Brazilian corporation law or (d) acquire control of another company, the withdrawal rights are exercisable only if our shares do not satisfy certain tests of liquidity and dispersal of the type or class of shares in the market at the time of the general meeting.

Only holders of shares adversely affected by the changes mentioned in the first and second items above may withdraw their shares.

The right of withdrawal lapses 30 days after publication of the minutes of the relevant general shareholders' meeting that approved the corporate actions described above. In the case of the changes mentioned in items (a) and (b) above, the resolution is subject to confirmation by the preferred shareholders, which must be obtained at a special meeting held within one year. In those cases, the 30-day term is counted from the date of publication of the minutes of the special meeting. We would be entitled to reconsider any action triggering appraisal rights within 10 days following the expiration of such rights if the redemption of shares of dissenting or non-voting shareholders would jeopardize our financial stability. Shares to be purchased by us from the dissenting or non-voting shareholders exercising appraisal rights will be valued at an amount equal to the lesser of the ratable portion attributable to such shares of our shareholders' equity as shown on the last balance sheet approved at a general shareholders' meeting (book value) and the ratable portion attributable to such shares of the economic value of the company, pursuant to an appraisal report produced in accordance with the provisions of the Brazilian corporation law. If more than 60 days have elapsed since the date of such balance sheet, dissenting shareholders may require that the book value of their shares be calculated on the basis of a new balance sheet. As a general rule, shareholders who acquire their shares after the first notice convening the general shareholders' meeting or after the relevant press release concerning the meeting is published will not be entitled to appraisal rights.

For purposes of the right of withdrawal, the concept of "dissenting shareholder," under the Brazilian corporation law, includes not only those shareholders who vote against a specific resolution, but also those who abstain from voting, who fail to attend the shareholders meeting or who do not have voting rights.

Preemptive Rights

Each of our shareholders generally has a preemptive right to subscribe for shares or convertible securities in any capital increases, in proportion to its shareholdings. A minimum period of 30 days, unless a shorter period is established by our board of directors, following the publication of notice of the capital increase is allowed for the exercise of the right and the right is negotiable. In the event of a capital increase which would maintain or increase the proportion of capital represented by preferred shares, holders of ADSs or preferred shares would have preemptive rights to subscribe only to newly issued preferred shares.

In the event of a capital increase which would reduce the proportion of capital represented by preferred shares, holders of ADSs or preferred shares would have preemptive rights to subscribe for preferred shares, in proportion to their shareholdings, and for common shares, only to the extent necessary to prevent dilution of their equity participation. (See "Risks Relating to the ADSs and Our Preferred Shares—Holders of ADSs may be unable to exercise preemptive rights with respect to our preferred shares"). Our by-laws provide that our board of directors may, within the limit of

its authorized capital, withdraw preemptive rights to existing shareholders in connection with an increase in share capital through sale in stock exchanges, public offerings or public exchange offers. In addition, Brazilian corporation law provides that the granting or exercise of stock options pursuant to certain stock option plans is not subject to preemptive rights.

Voting Rights

Each common share entitles its holder to one vote at our shareholders' meetings. Preferred shares have no voting rights, except that each preferred share entitles its holder to one vote at our shareholders' meeting to decide on certain specific matters, such as:

- any transformation of the company into another corporate type; any merger, consolidation or spin-off of the company;
- approval of any transactions between the company and its controlling shareholder or parties related to the controlling shareholder;
- approval of any evaluation of assets to be delivered to the company in payment for shares issued in a capital increase;
- appointment of an expert to ascertain the fair value of the company in connection with any deregistration and delisting tender offer;
- any changes to these voting rights; and
- approval of a change of our corporate purpose.

Holders of preferred shares are entitled to attend shareholders' meetings and to participate in the discussions. The Brazilian corporation law provides that non-voting shares, such as preferred shares, may acquire voting rights if the company fails to distribute fixed or minimum dividends in connection with such shares for three consecutive fiscal years and will retain such voting rights until the distribution of such fixed or minimum dividends. (See "Risks Relating to the ADSs and Our Preferred Shares—Holders of the preferred shares may not receive any dividends").

According to the Brazilian corporation law, any change in the preferences or rights of our preferred shares, or the creation of a class of shares having priority over our preferred shares, unless such change is authorized by our by-laws, would require the approval of our preferred shareholders in a special shareholders' meeting in addition to approval by a majority of the holders of our outstanding voting shares. The holders of preferred shares would vote as a class at the special meeting.

The Brazilian corporation law grants (i) holders of preferred shares without voting rights (or with restricted voting rights) representing 10% of the total issued capital stock and (ii) holders of our common shares that are not part of the controlling group, and represent at least 15% of the voting capital stock, the right to appoint a member to the board of directors, by voting during the annual shareholders' meeting. If none of our non-controlling holders of common or preferred shares meets the respective thresholds described above, holders of preferred or common shares representing at least 10% of the share capital would be able to combine their holdings to appoint one member and an alternate to our board of directors. Such rights may only be exercised by those shareholders who prove that they have held the required stake with no interruption during at least the three months directly preceding our annual shareholders meeting.

Holders of common shares are entitled to certain rights that cannot be amended by changes in the by-laws or at a general shareholders' meeting, which include (i) the right to vote at general shareholders' meetings; (ii) the right to participate in distributions of dividends and interest on capital and to share in the remaining assets of the company in

the event of liquidation; (iii) preemptive rights in certain circumstances and (iv) the right to withdraw from the company in certain cases. In addition to those rights, the by-laws or a majority of the voting shareholders may establish additional rights and, likewise, remove them. Currently, our by-laws do not establish any rights in addition to those already set forth by the Brazilian corporation law. The Level 2 of Differentiated Corporate Governance Practices, which we comply with, provides for the granting of voting rights to holders of preferred shares in connection with certain matters, including corporate restructurings, mergers and related party transactions.

Controlling shareholders may nominate and elect a majority of the members of the board of directors of Brazilian companies. In a Brazilian company, management is not entitled to nominate directors for election by the shareholders. Non-controlling shareholders and holders of non-voting shares are entitled to elect representatives to the board, as described above. Holders of a threshold percentage of the voting shares may also request, up to 48 hours prior to any general shareholders' meeting, that the election of directors be subject to cumulative voting. The threshold percentage required for cumulative voting for a corporation such as ours is currently 5% of the outstanding shares. Shareholders who vote to elect a representative of the non-controlling shareholders may not cast cumulative votes to elect other members of the board.

- dissolution of the company or terminating a state of liquidation.

In the event that the entity resulting from a merger, consolidation, or *incorporação de ações*, or spin-off of a listed company fails to become a listed company within 120 days of the shareholders meeting at which such decision was taken, the dissenting or non-voting shareholders may also exercise their withdrawal right.

If there is a resolution to (a) merge or consolidate us with another company; (b) conduct a *incorporação de ações*; (c) participate in a group of companies, as defined under the Brazilian corporation law or (d) acquire control of another company, the withdrawal rights are exercisable only if our shares do not satisfy certain tests of liquidity and dispersal of the type or class of shares in the market at the time of the general meeting.

Only holders of shares adversely affected by the changes mentioned in the first and second items above may withdraw their shares.

The right of withdrawal lapses 30 days after publication of the minutes of the relevant general shareholders' meeting that approved the corporate actions described above. In the case of the changes mentioned in items (a) and (b) above, the resolution is subject to confirmation by the preferred shareholders, which must be obtained at a special meeting held within one year. In those cases, the 30-day term is counted from the date of publication of the minutes of the special meeting. We would be entitled to reconsider any action triggering appraisal rights within 10 days following the expiration of such rights if the redemption of shares of dissenting or non-voting shareholders would jeopardize our financial stability. Shares to be purchased by us from the dissenting or non-voting shareholders exercising appraisal rights will be valued at an amount equal to the lesser of the ratable portion attributable to such shares of our shareholders' equity as shown on the last balance sheet approved at a general shareholders' meeting (book value) and the ratable portion attributable to such shares of the economic value of the company, pursuant to an appraisal report produced in accordance with the provisions of the Brazilian corporation law. If more than 60 days have elapsed since the date of such balance sheet, dissenting shareholders may require that the book value of their shares be calculated on the basis of a new balance sheet. As a general rule, shareholders who acquire their shares after the first notice convening the general shareholders' meeting or after the relevant press release concerning the meeting is published will not be entitled to appraisal rights.

For purposes of the right of withdrawal, the concept of "dissenting shareholder," under the Brazilian corporation law, includes not only those shareholders who vote against a specific resolution, but also those who abstain from voting, who fail to attend the shareholders meeting or who do not have voting rights.

Preemptive Rights

Each of our shareholders generally has a preemptive right to subscribe for shares or convertible securities in any capital increases, in proportion to its shareholdings. A minimum period of 30 days, unless a shorter period is established by our board of directors, following the publication of notice of the capital increase is allowed for the exercise of the right and the right is negotiable. In the event of a capital increase which would maintain or increase the proportion of capital represented by preferred shares, holders of ADSs or preferred shares would have preemptive rights to subscribe only to newly issued preferred shares.

In the event of a capital increase which would reduce the proportion of capital represented by preferred shares, holders of ADSs or preferred shares would have preemptive rights to subscribe for preferred shares, in proportion to their shareholdings, and for common shares, only to the extent necessary to prevent dilution of their equity participation. (See "Risks Relating to the ADSs and Our Preferred Shares—Holders of ADSs may be unable to exercise preemptive rights with respect to our preferred shares"). Our by-laws provide that our board of directors may, within the limit of

its authorized capital, withdraw preemptive rights to existing shareholders in connection with an increase in share capital through sale in stock exchanges, public offerings or public exchange offers. In addition, Brazilian corporation law provides that the granting or exercise of stock options pursuant to certain stock option plans is not subject to preemptive rights.

Conversion Right

Our shareholders may, at any time, convert common shares into preferred shares, at the rate of one common share to one preferred share, to the extent such shares are duly paid and provided that the amount of preferred shares does not exceed 50% of the total amount of shares outstanding. Any request for conversion must be delivered to our board of executive officers and, once accepted by the board of executive officers, must be confirmed by our board of directors at the first meeting after the date of the request for conversion.

Special and General Meetings

Unlike the laws governing corporations incorporated under the laws of the State of Delaware, the Brazilian corporation law does not allow shareholders to approve matters by written consent obtained as a response to a consent solicitation procedure. All matters subject to approval by the shareholders must be approved in a general meeting, duly convened pursuant to the provisions of Brazilian corporation law. Shareholders may be represented at a shareholders' meeting by attorneys-in-fact who are (i) shareholders of the corporation, (ii) a Brazilian attorney, (iii) a member of management or (iv) a financial institution.

General and special shareholders' meetings may be called by publication of a notice in the *Diário Oficial do Estado de São Paulo* and in a newspaper of general circulation in our principal place of business at least 15 days prior to the meeting. Special meetings are convened in the same manner as general shareholders' meetings and may occur immediately before or after a general meeting.

At duly called and convened meetings, our shareholders are empowered to take any action regarding our business. Shareholders have the exclusive right, during our annual shareholders' meetings required to be held within 120 days of the end of our fiscal year, to approve our financial statements and to determine the allocation of our net income and the distribution of dividends related to the fiscal year immediately preceding the meeting. The members of our board of directors are generally elected at annual shareholders' meetings. However, according to Brazilian corporation law, they can also be elected at extraordinary shareholders' meetings. At the request of shareholders holding a sufficient number of shares, a fiscal council can be established and its members elected at any shareholders' meeting.

An extraordinary shareholders' meeting may be held concurrently with the annual shareholders' meeting and at other times during the year. Our shareholders may take the following actions, among others, exclusively at shareholders' meetings:

- election and dismissal of the members of our board of directors and our fiscal council, if the shareholders have requested the set up of the latter;
- approval of the aggregate compensation of the members of our board of directors and board of executive officers, as well as the compensation of the members of the fiscal council, if one has been established;
- amendment of our bylaws;
- approval of our merger, consolidation or spin-off;
- approval of our dissolution or liquidation, as well as the election and dismissal of liquidators and the approval of their accounts;
- granting stock awards and approval of stock splits or reverse stock splits;

- approval of stock option plans for our management and employees, as well as for the management and employees of other companies directly or indirectly controlled by us;
- approval, in accordance with the proposal submitted by our board of directors, of the distribution of our net income and payment of dividends;
- authorization to delist from the Level 2 of Differentiated Corporate Governance Practices and to become a private company, except if the cancellation is due to a breach of the Level 2 regulations by management, and to retain a specialized firm to prepare a valuation report with respect to the value of our shares, in any such events;
- approval of our management accounts and our financial statements;
- approval of any primary public offering of our shares or securities convertible into our shares; and
- deliberate upon any matter submitted by the board of directors.

Anti-Takeover Provisions

Our by-laws require any party that acquires our control to extend a tender offer for common and preferred shares held by non-controlling shareholders at the same purchase price paid to the controlling shareholder.

Arbitration

In connection with our listing with Level 2 of Differentiated Corporate Governance Practices, we and our controlling shareholders, directors, officers and members of our fiscal committee have undertaken to refer to arbitration any and all disputes arising out of the Level 2 rules or any other corporate matters. See “Market Information.” Under our by-laws, any disputes among us, our shareholders and our management with respect to the application of Level 2 rules, the Brazilian Corporation law or the application of the rules and regulations regarding Brazilian capital markets, will be resolved by arbitration conducted pursuant to the BM&FBOVESPA Arbitration Chamber and rules. Any disputes among shareholders, including holders of ADSs, and disputes between us and shareholders, including holders of ADSs, will be submitted to arbitration in accordance with the BM&FBOVESPA Arbitration Chamber and rules.

Going Private Process

Pursuant to our bylaws, we may become a privately-held company only if we, our controlling shareholders or our group of controlling shareholders make a public tender offer for all outstanding shares.

According to the Level 2 regulations and our bylaws, the minimum price of the shares in the public tender offer required to be made in case we go private shall be equivalent to the economic value determined in the appraisal report prepared by a specialized and independent company, with renowned expertise, to be selected at the annual shareholders’ meeting from among the three companies suggested by the board of directors.

In addition to the requirements set out in the Level 2 regulations and our bylaws, according to the Brazilian corporation law, our registration as a publicly held company with shares traded on stock exchanges will be canceled only if we or our direct or indirect controlling shareholders make a public tender offer for the total outstanding shares in the market (which may be the same tender offer required by Level 2 regulations and our bylaws), at a fair value, for a price at least equal to our evaluation, determined based on the following criteria, separately or jointly adopted: stockholders’ equity book value, stockholders’ equity at market price, discounted cash flow, multiple comparisons,

market price of our shares or any other criteria accepted by the CVM. Shareholders holding at least 10% of our outstanding shares may require our management to review the price offered for the shares, and in this event our management shall call a special shareholders` meeting to determine whether to perform another valuation using the same or a different valuation method. Such request must be made within 15 days following the disclosure of the price to be paid for the shares in the public tender offer, and shall be duly justified. The shareholders who make such request, as well as those who vote in its favor, shall reimburse us for any costs involved in preparing the new valuation if the valuation price is lower than or equal to the original valuation price. If the new valuation price is higher than the original valuation price, the public tender offer must be made at the new valuation price.

Delisting from Differentiated Corporate Governance Practices Level 2

We may, at any time, delist our shares from the Level 2 segment, provided that this is approved by shareholders representing the majority of our voting share capital at an annual shareholders' meeting and that we provide written notice to the BM&FBOVESPA at least 30 days in advance. If we decide to delist from the Level 2 segment, in order to make our shares available to be traded outside the Level 2 segment, our controlling shareholders must conduct a public tender offer for the acquisition of our shares within the legal timeframe, based on the economic value calculated in the appraisal report prepared by a specialized and independent company, to be selected at an annual shareholders' meeting from among three companies suggested by the board of directors. The public tender offer notice must be communicated to the BM&FBOVESPA and immediately disclosed to the market after the shareholder's meeting during which the delisting was approved. If the delisting from the Level 2 segment is a result of the cancellation of our registration as a publicly held company, our controlling shareholders must follow the other requirements applicable to going private.

The delisting from the Level 2 segment does not imply the cancellation of the trading of our shares on the BM&FBOVESPA.

If our share control is transferred within the 12 months subsequent to the delisting from the Level 2, the selling controlling shareholder and the buyer shall offer to our other shareholders the acquisition of their shares at the price and conditions provided to the controlling shareholder selling the shares, adjusted for inflation.

After delisting from the Level 2 segment, we may not request the listing of our shares in the Level 2 segment for two years subsequent to the cancellation, except if there is a change of our share control after delisting from the Level 2 segment.

Form and Transfer

Because our preferred shares are in registered book-entry form, Banco Itaú S.A., as registrar, must effect any transfer of shares by an entry made in its books, in which it debits the share account of the transferor and credits the share account of the transferee. When our shares are acquired or sold on a Brazilian stock exchange, the transfer is effected on the records of our registrar by a representative of a brokerage firm or the stock exchange's clearing system. Transfers of shares by a foreign investor are executed in the same way by that investor's local agent on the investor's behalf except that, if the original investment were registered with the Central Bank pursuant to Resolution No. 2,689, the foreign investor should also seek amendment through its local agent, if necessary, of the electronic registration to reflect the new ownership. The BM&FBOVESPA operates a clearinghouse through CBLC. The fact that such shares are subject to custody with the relevant stock exchange will be reflected in our registry of shareholders. Each participating shareholder will, in turn, be registered in the register of our beneficial shareholders that is maintained by CBLC and will be treated in the same way as registered shareholders.

American Depositary Receipts

The Bank of New York Mellon, as depositary, has executed and delivered the ADRs representing our preferred shares. Each ADR is a certificate evidencing a specific number of American Depositary Shares, also referred to as ADSs. After our 2:1 ADS ratio change in December 2005, each ADS represents one preferred share (or a right to receive one preferred share) deposited with the principal São Paulo office of Banco Itaú S.A., as custodian for the depositary in Brazil. Each ADS also represents any other securities, cash or other property which may be held by the depositary. The depositary's office at which the ADRs are administered is located at 101 Barclay Street, New York, New York 10286.

You may hold ADSs either directly (by having an ADR registered in your name) or indirectly through your broker or other financial institution. If you hold ADSs directly, you are an ADR holder. We do not treat ADR holders as our shareholders and ADR holders have no shareholder rights. Brazilian law governs shareholder rights. The depositary is the holder of the preferred shares underlying the ADSs. Holders of ADRs have ADR holder rights. A deposit agreement among us, the depositary and you, as an ADR holder, and the beneficial owners of ADRs sets out ADR holder rights as well as the rights and obligations of the depositary. New York law governs the deposit agreement and the ADRs.

C. Material Contracts

Our material contracts are directly related to our operating activities, such as contracts relating to aircraft leasing and fuel supply as well as contracts relating to our concession to operate as a commercial airline. We do not have material contracts that are not related to our operating activities.

Aircraft General Terms Agreement between The Boeing Company and VRG Linhas Aéreas S.A.

In 2004, we entered into an agreement, as amended, with The Boeing Company for the purchase of aircraft, installation of buyer furnished equipment provided by us, customer support services and product assurance. In addition to the aircraft supplied, The Boeing Company will provide maintenance training and flight training programs, as well as operations engineering support.

Commercial Sale Promise Agreement between Petrobrás Distribuidora S.A. and VRG Linhas Aéreas S.A.

In 2001, we entered into a commercial sale promise agreement for the purchase of fuel from Petrobrás, which was renewed July 7, 2006. We agreed to purchase fuel exclusively from Petrobrás in all of the airports where Petrobrás maintains aircraft fueling facilities. Petrobrás, in turn, agreed to provide us with all of our fuel needs in the supplying airports.

Reservation Services and Software License Use Agreement between Navitaire Inc. and VRG Linhas Aéreas S.A.

On May 1, 2004, we entered into an agreement, as amended and updated, with Navitaire Inc. for host reservation services and obtained a license to use the Navitaire software to provide reservation services to our customers. Navitaire provides a number of ancillary services in addition to the host reservation services, including data center implementation services, network configuration and design services, system integration services, customer site installation services and initial training services.

D. Exchange Controls

The right to convert dividend or interest payments and proceeds from the sale of shares into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, that the relevant investments have been registered with the Central Bank and the CVM. Such restrictions on the remittance of foreign capital abroad may hinder or prevent the custodian for our preferred shares represented by our ADSs or the holders of our preferred shares from converting dividends, distributions or the proceeds from any sale of these preferred shares into U.S. dollars and remitting the U.S. dollars abroad. Holders of our ADSs could be adversely affected by delays in, or refusal to grant any, required government approval to convert Brazilian currency payments on the preferred shares underlying our ADS and to remit the proceeds abroad.

Resolution No. 1,927 of the National Monetary Council provides for the issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers. The ADS program was approved under the Annex V Regulations by the Central Bank and the CVM prior to the issuance of the ADSs. Accordingly, the proceeds from the sale of ADSs by ADR holders outside Brazil are not subject to Brazilian foreign investment controls, and holders of the ADSs are entitled to favorable tax treatment under certain circumstances. See “Taxation—Material Brazilian Tax Considerations.”

E. Taxation

The following discussion addresses the material Brazilian and United States federal income tax consequences of acquiring, holding and disposing of our preferred shares or ADSs.

This discussion is not a comprehensive discussion of all the tax considerations that may be relevant to a decision to purchase our preferred shares or ADSs and is not applicable to all categories of investors, some of which may be subject to special rules, and does not specifically address all of the Brazilian and United States federal income tax considerations applicable to any particular holder. It is based upon the tax laws of Brazil and the United States as in effect on the date of this annual report, which are subject to change, possibly with retroactive effect, and to differing interpretations. Each prospective purchaser is urged to consult its own tax advisor about the particular Brazilian and United States federal income tax consequences to it of an investment in our preferred shares or ADSs. This discussion is also based upon the representations of the depositary and on the assumption that each obligation in the deposit agreement among us, The Bank of New York Mellon, as depositary, and the registered holders and beneficial owners of our ADSs, and any related documents, will be performed in accordance with its terms.

Although there presently is no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. We cannot assure you, however, as to whether or when a treaty will enter into force or how it will affect holders of our preferred shares or ADSs.

Material Brazilian Tax Considerations

The following discussion, in the opinion of Mattos Filho, Veiga Filho, Marrey Jr. e Quiroga Advogados addresses the material Brazilian tax consequences of the acquisition, ownership and disposition of our preferred shares or ADSs by a non-Brazilian holder.

This discussion is based on Brazilian law as currently in effect, which are subject to change, possibly with retroactive effect, and to differing interpretations. Any change in such law may change the consequences described below. Each non-Brazilian holder should consult his or her own tax adviser concerning the Brazilian tax consequences of an investment in the preferred shares or ADSs.

Taxation of Dividends. Dividends, including dividends in kind, paid by us to the depository in respect of the preferred shares underlying the ADSs or to a non-Brazilian holder of preferred shares will not be subject to Brazilian withholding income tax, provided that such amounts are related to profits earned after January 1, 1996.

Taxation of Gains. According to Law No. 10,833, enacted on December 29, 2003, capital gains realized on the disposition of assets located in Brazil by a non-Brazilian holder are subject to taxation in Brazil, regardless of whether the sale or the disposition is made by a non-Brazilian holder to another non-Brazilian resident or to a Brazilian resident.

With respect to the disposition of preferred shares, as they are assets located in Brazil, the non-Brazilian holder will be subject to income tax on the gains assessed, following the rules described below, regardless of whether the disposition is conducted in Brazil or with a Brazilian resident.

With respect to the ADSs, arguably the gains realized by a non-Brazilian holder on the disposition of ADSs to another non-Brazilian resident are not taxed in Brazil, based on the argument that ADSs would not constitute assets located in Brazil for purposes of Law No. 10,833/03. However, we cannot assure you how Brazilian courts would interpret the definition of assets located in Brazil in connection with the taxation of gains realized by a Non-Brazilian Holder on the disposition of ADSs to another non-Brazilian resident. As a result, gains on a disposition of ADSs by a non-Brazilian holder to Brazilian resident, or even to non-Brazilian holder in the event that courts determine that ADSs would constitute assets located in Brazil, may be subject to income tax in Brazil according to the rules described ahead. It is important to clarify that, for purposes of Brazilian taxation, the income tax rules on gains related to disposition of preferred shares or ADSs vary depending on the domicile of the non-Brazilian holder, the form by which such non-Brazilian holder has registered its investment with the Central Bank and/or how the disposition is carried out, as described below.

The deposit of preferred shares in exchange for ADSs may be subject to Brazilian tax on capital gains at the rate of 15%, or 25% in the case of investors domiciled in a Low or Nil Tax Jurisdiction, if the acquisition cost of the preferred shares is lower than (a) the average price per preferred share on a Brazilian stock exchange on which the greatest number of such shares were sold on the day of deposit or (b) if no preferred shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred shares were sold in the 15 trading sessions immediately preceding such deposit. In such case, the difference between the acquisition cost and the average price of the preferred shares calculated as described above, will be considered to be a capital gain subject to taxation. In some circumstances, there may be arguments to sustain that such taxation is not applicable in the case of a non-Brazilian holder that is a 2,689 Holder (as defined below) and is not resident in a Low or Nil Tax Jurisdiction.

The withdrawal of ADSs in exchange for preferred shares should not be considered as giving rise to a capital gain subject to Brazilian income tax, provided that on the receipt of the underlying preferred shares, the non-Brazilian holder complies with the regulatory rules observed in respect to the registration of the investment before the Central Bank.

Gains assessed on the disposition of the preferred shares carried out on the Brazilian stock exchange (which includes the transactions carried out on the organized over-the-counter market) are:

- exempt from income tax, when assessed by a non-Brazilian holder that (1) has registered its investment in Brazil with the Central Bank under the rules of Resolution No. 2,689/00 (“2,689 Holder”) and (2) is not resident in a Low or Nil Tax Jurisdiction; or
- subject to income tax at a rate of 15% in any other case, including the gains assessed by a non-Brazilian holder that is not a 2,689 Holder and/or is a resident in a Low or Nil Tax Jurisdiction. In these cases, a withholding income tax of 0.005% shall be applicable and can be offset with the eventual income tax due on the capital gain.

Any other gains assessed on the disposition of the preferred shares that are not carried out on the Brazilian stock exchange are subject to income tax at a rate of 15%, except for a resident of a Low or Nil Tax Jurisdiction, or yet where local regulations impose restrictions on disclosure of share ownership and identity of beneficiary holders which, in this case, is subject to income tax at a rate of 25%. If these gains are related to transactions conducted on the Brazilian non-organized over-the-counter market with intermediation, the withholding income tax of 0.005% shall also be applicable and can be offset against the eventual income tax due on the capital gain.

In the case of a redemption of preferred shares or ADSs or a capital reduction by a Brazilian corporation, the positive difference between the amount received by the non-Brazilian holder and the acquisition cost of the preferred shares or ADSs redeemed is treated as capital gain derived from the sale or exchange of shares not carried out on a Brazilian stock exchange market and is therefore subject to income tax at the rate of 15%, or 25%, as the case may be.

As a general rule, the gains realized as a result of a disposition transaction of preferred shares or ADSs are determined by the difference between the amount realized on the sale or exchange of the shares and their acquisition cost.

There can be no assurance that the current preferential treatment for non-Brazilian holder of ADSs and 2,689 Holder of preferred shares will continue or will not be changed in the future.

Any exercise of preemptive rights relating to the preferred shares or ADSs will not be subject to Brazilian income tax. Any gain on the sale or assignment of preemptive rights relating to preferred shares or the ADSs by a non-Brazilian holder will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of preferred shares.

Distributions of Interest on Shareholders' Equity. In accordance with Law No. 9,249, dated December 26, 1995, as amended, Brazilian corporations may make payments to shareholders characterized as distributions of interest on the company's shareholders' equity as an alternative to making individual distributions. Such interest is calculated by reference to the TJLP as determined by the Central Bank from time to time and cannot exceed the greater of:

- 50% of net income (after social contribution on profits and before taking such distribution and the provision for corporate income tax into account) for the period in respect of which the payment is made; or

- 50% of the sum of retained profits and profits reserves, as of the date of the beginning of the period in respect of which the payment is made.

Distributions of interest on shareholders' equity in respect of the preferred shares paid to shareholders who are either Brazilian residents or non-Brazilian holders, including non-Brazilian holders of ADSs, are subject to Brazilian withholding income tax at the rate of 15%, or 25% in case of a resident of a Low or Nil Tax Jurisdiction or where applicable local laws impose restrictions on the disclosure of the shareholding composition or the ownership of investments or the ultimate beneficiary of the income derived from transactions carried out and attributable to a non-Brazilian holder. The distribution of interest on shareholders' equity may be determined by our board of directors. We cannot assure you that our board of directors will not determine that future distributions of profits may be made by means of interest on shareholders' equity instead of by means of dividends.

The amounts paid as distribution of interest on shareholders' equity are deductible for corporation income tax and social contribution on profit, both of which are taxes levied on our profits, as far as the limits and rules described above are observed by us.

Low or Nil Taxation Jurisdictions.

Law No. 9,779, dated as of January 01, 1999 states that, except for limited prescribed circumstances, income derived from transactions by a person resident or domiciled in a Low or Nil Tax Jurisdiction will be subject to withholding income tax at the rate of 25%. A Low or Nil Tax Jurisdiction is generally considered to be a country or other jurisdiction which does not impose any income tax or which imposes such tax at a maximum rate lower than 20%. Under certain circumstances, non-transparency rules are also taken into account for determining whether a country or other jurisdiction is a Low or Nil Tax Jurisdiction. In addition, on June 24, 2008, Law No. 11,727 introduced the concept of "privileged tax regime", considered as such the tax regime that (i) does not tax income or taxes it at a maximum rate lower than 20%; (ii) grants tax benefits to non-resident entities or individuals (a) without the requirement to carry out a substantial economic activity in the country or dependency or (b) contingent to the non-exercise of a substantial economic activity in the country or dependency; or (iii) does not tax or that taxes the income generated abroad at a maximum rate lower than 20%; or (iv) does not provide access to information related to shareholding composition, ownership of assets and rights or economic transactions carried out. We consider that the best interpretation of Law No. 11,727/08 that the new concept of "privileged tax regime" would be applicable solely for purposes of transfer pricing and thin capitalization rules. However, due to the recent enactment of this Law, we are unable to ascertain whether or not the privileged tax regime concept will be extended to the concept of Low or Nil Taxation Jurisdiction although the Brazilian tax authorities appear to agree with our position, in view of the provisions of the recently introduced Normative Ruling No. 1,037, dated as of June 4, 2010, which presents two different lists (Low or Nil Tax Jurisdictions – taking into account the non-transparency rules – and privileged tax regimes).

Notwithstanding the above, we recommend that you consult your own tax advisors regarding the consequences of the implementation of Law No. 11,727, Normative Ruling No. 1,037 and of any related Brazilian tax law or regulation concerning Low or Nil Tax Jurisdictions or "privileged tax regimes."

Other Relevant Brazilian Taxes

There are no Brazilian inheritance, gift or succession taxes applicable to the ownership, transfer or disposition of preferred shares or ADSs by a non-Brazilian holder except for gift and inheritance taxes which are levied by some states of Brazil on gifts made or inheritances bestowed by the non-Brazilian holder to individuals or entities resident or domiciled within such states in Brazil. There are non-Brazilian stamp, issue, registration or similar taxes or duties payable by a non-Brazilian holder of preferred shares or ADSs.

Tax on foreign exchange transactions

Pursuant to Decree No. 6,306/07, the conversion into foreign currency or the conversion into Brazilian currency of the proceeds received or remitted by a Brazilian entity from a foreign investment in the Brazilian securities market, including those in connection with the investment by a non-Brazilian holder in the preferred shares and ADSs may be subject to the Tax on Foreign Exchange Transactions, or IOF/Exchange. Currently applicable rate for most foreign currency exchange transactions is 0.38%. Effective as of October 5, 2010, currency exchange transactions carried out for the inflow of funds in Brazil for investment made by a foreign investor (including a non-Brazilian holder, as applicable) are subject to IOF/Exchange at (i) 2% rate in case of variable income transactions carried out on the Brazilian stock, futures and commodities exchanges, as well as in the acquisitions of shares of Brazilian publicly-held companies in public offerings or subscription of shares related to capital contributions, provided that the issuer company has registered its shares for trading in the stock exchange (ii) 0% for the outflow of resources from Brazil related to these type of investments, including payments of dividends and interest on shareholders' equity and the repatriation of funds invested in the Brazilian market. In any case, the Brazilian Government is permitted to increase at any time the rate to a maximum of 25%, but only in relation to future transactions.

Tax on Bonds and Securities Transactions

Pursuant to Decree 6,306/07, the Tax on Bonds and Securities Transactions (“IOF/Bonds”) may be imposed on any transactions involving bonds and securities even if the transactions are performed on a Brazilian stock exchange. The rate of IOF/Bonds applicable to transactions involving preferred or common shares is currently zero. In particular, the IOF/Bonds levies at a rate of 1.5% on the transfer of shares traded on the Brazilian stock exchange with the purpose of the issuance of depositary receipts to be traded outside Brazil. The Brazilian government may increase such rate up to 1.5% per day, but only with respect to future transactions.

Registered Capital

The amount of an investment in preferred shares held by a non-Brazilian holder who qualifies under Resolution No. 2,689 and obtains registration with the CVM, or by the depositary, as the depositary representing such holder, is eligible for registration with the Central Bank. Such registration allows the remittance outside of Brazil of any proceeds of distributions on the shares, and amounts realized with respect to disposition of such shares. The registered capital for preferred shares purchased in the form of ADSs or purchased in Brazil, and deposited with the depositary in exchange for ADSs will be equal to their purchase price (in U.S. dollars) to the purchaser. The registered capital for preferred shares that are withdrawn upon surrender of ADSs, as applicable, will be the U.S. dollar equivalent of the average price of preferred shares, as applicable, on a Brazilian stock exchange on which the greatest number of such preferred shares, as applicable, was sold on the day of withdrawal. If no preferred shares, as applicable, were sold on such day, the registered capital will refer to the average price on the Brazilian stock exchange on which the greatest number of preferred shares, as applicable, were sold in the 15 trading sessions immediately preceding such withdrawal. The U.S. dollar value of the preferred shares, as applicable, is determined on the basis of the average rate quoted by the Central Bank on such date or, if the average price of preferred shares is determined under the last preceding sentence, the average of such average quoted rates on the same 15 dates used to determine the average price of the preferred shares.

A non-Brazilian holder of preferred shares may experience delays in effecting such action, which may delay remittances abroad. Such a delay may adversely affect the amount, in U.S. dollars, received by the non-Brazilian holder.

Material United States Federal Income Tax Consequences

The following discussion describes the material United States federal income tax consequences of purchasing, holding and disposing of our preferred shares or ADSs. This discussion applies only to beneficial owners of ADSs or preferred shares that are “U.S. Holders,” as defined below. This discussion is based on the United States Internal Revenue Code of 1986, as amended, or the Code, its legislative history, existing final, temporary and proposed Treasury Regulations, administrative pronouncements by the United States Internal Revenue Service, or IRS, and judicial decisions, all as currently in effect and all of which are subject to change (possibly on a retroactive basis) and to different interpretations. This summary does not describe any state, local or non-U.S. tax law considerations, or any aspect of U.S. federal tax law (such as the estate tax, gift tax or the Medicare tax on net investment income) other than income taxation. U.S. Holders should consult their own tax advisors regarding these matters.

This discussion does not purport to address all United States federal income tax consequences that may be relevant to a particular U.S. Holder and you are urged to consult your own tax advisor regarding your specific tax situation. The discussion applies only to U.S. Holders who hold preferred shares or ADSs as “capital assets” (generally, property held for investment) under the Code and does not address the tax consequences that may be relevant to U.S. Holders in special tax situations including, for example:

- insurance companies;
- tax-exempt organizations;
- broker-dealers;
- traders in securities that elect to mark to market;
- banks or other financial institutions;
- U.S. Holders whose functional currency is not the United States dollar;
- United States expatriates;
- U.S. Holders that hold our preferred shares or ADSs as part of a hedge, straddle, conversion or other integrated transaction; or
- U.S. Holders that own, directly, indirectly, or constructively, 10% or more of the total combined voting power, if any, of our voting stock.

Except where specifically described below, this discussion assumes that we are not a passive foreign investment company, or PFIC, for United States federal income tax purposes. Please see the discussion under “Passive foreign investment company rules” below. Further, this discussion does not address the alternative minimum tax consequences of holding preferred shares or ADSs or the indirect consequences to holders of equity interests in partnerships or other entities that own our preferred shares or ADSs. In addition, this discussion does not address the state, local and foreign tax consequences of holding our preferred shares or ADSs.

You should consult your own tax advisor regarding the United States federal, state, local and foreign income and other tax consequences of purchasing, owning and disposing of our preferred shares or ADSs in your particular circumstances.

You are a “U.S. Holder” if you are a beneficial owner of preferred shares or ADSs and you are for United States federal income tax purposes:

- an individual who is a citizen or resident of the United States;
- a corporation, or any other entity taxable as a corporation, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income tax regardless of its source; or
- a trust if a court within the United States is able to exercise primary supervision over its administration and one or more United States persons have the authority to control all substantial decisions of the trust (or otherwise if the trust has a valid election in effect under current Treasury regulations to be treated as a United States person).

If a partnership (or any other entity taxable as a partnership for United States federal income tax purposes) holds preferred shares or ADSs, the United States federal income tax treatment of a partner will generally depend upon the

status of the partner and upon the activities of the partnership. A partnership that holds our preferred shares or ADSs and partners in such partnerships should consult their own tax advisors regarding the United States federal income tax consequences of the purchase, ownership and disposition of our preferred shares or ADSs.

For United States federal income tax purposes, a U.S. Holder of an ADS will generally be treated as the beneficial owner of the preferred shares represented by the ADS. However, see the discussion below under –"Distribution on preferred shares or ADSs" regarding certain statements made by the United States Treasury concerning depository arrangements.

Distributions on preferred shares or ADSs

Cash distributions (including amounts withheld to pay Brazilian withholding taxes and distributions of notional interest payments on shareholders' equity, but excluding distributions in redemption of the preferred shares treated as exchanges or sales under the Code) made by us to or for the account of a U.S. Holder with respect to preferred shares or ADSs generally will be taxable to such U.S. Holder as ordinary dividend income when such distribution is paid, actually or constructively, out of our current or accumulated earnings and profits (as determined for United States federal income tax purposes). Distributions in excess of our current or accumulated earnings and profits will be treated first as a non-taxable return of capital reducing such U.S. Holder's adjusted tax basis in the preferred shares or ADSs. Any distribution in excess of such U.S. Holder's adjusted tax basis will be treated as capital gain and will be long-term capital gain if the U.S. Holder held the preferred shares or ADSs for more than one year. As used below, the term "dividend" means a distribution that constitutes a dividend for United States federal income tax purposes.

A U.S. Holder will be entitled, subject to a number of complex limitations and conditions (including a minimum holding period requirement), to claim a United States foreign tax credit in respect of any Brazilian withholding taxes imposed on dividends received on preferred shares or ADSs. U.S. Holders who do not elect to claim a foreign tax credit with regard to any foreign income taxes paid or accrued during the taxable year may instead claim a deduction in respect of such withholding taxes. Dividends received with respect to the preferred shares or ADSs will be treated as foreign source income, which may be relevant in calculating such U.S. Holder's United States foreign tax credit limitation. For purposes of the United States foreign tax credit limitation, foreign source income is separated into different "baskets," and the credit for foreign taxes on income in any basket is limited to the United States federal income tax allocable to such income. Dividends paid with respect to our preferred shares or ADSs should generally constitute "passive category income" for most U.S. Holders. Holders are urged to consult their tax advisors regarding the availability of the foreign tax credit in their particular circumstances. The United States Treasury has expressed concern that intermediaries in connection with depository arrangements may be taking actions that are inconsistent with the claiming of foreign tax credits by United States persons who are holding depository shares. Accordingly, investors should be aware that the discussion above regarding the ability to credit Brazilian withholding tax on dividends and the availability of the reduced tax rate for dividends received by certain non-corporate holders described below could be affected by actions taken by parties to whom the ADSs are released and the IRS.

Dividends paid by us generally will not be eligible for the dividends received deduction available under the Code to certain United States corporate shareholders. Subject to the above-mentioned concerns by the United States Treasury and certain exceptions for short-term and hedged positions, the United States dollar amount of dividends received by certain U.S. Holders (including individuals) prior to January 1, 2011 with respect to the ADSs will be subject to taxation at a maximum rate of 15% if the dividends represent "qualified dividend income." Dividends paid on the ADSs will be treated as qualified dividend income if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) we were not in the year prior to the year in which the dividend was paid, and are not in the year in which the dividend is paid, a PFIC. Our ADSs are listed on the New York Stock Exchange, and therefore the ADSs will qualify as readily tradable on an established securities market in the United States so long as they are so listed. However, no assurances can be given that the ADSs will be or will remain readily tradable. Subject to the discussion of passive foreign investment company rules below, based upon the nature of our current and projected income, assets and activities, we do not believe the preferred shares or the ADSs have been, nor do we expect them to be, shares of a PFIC for United States federal income tax purposes.

Based on existing guidance, it is not entirely clear whether dividends received with respect to the preferred shares will be treated as qualified dividends, because the preferred shares are not themselves listed on a United States exchange. In addition, the United States Treasury Department has announced its intention to promulgate rules pursuant to which holders of ADSs or preferred stock and intermediaries through whom such securities are held will be permitted to rely

on certifications from issuers to establish that dividends are treated as qualified dividends. Because such procedures have not yet been issued, we are not certain that we will be able to comply with them. U.S. Holders of ADSs and preferred shares should consult their own tax advisors regarding the availability of the reduced dividend tax rate in the light of their own particular circumstances.

The amount of any cash distribution paid in Brazilian currency will equal the United States dollar value of the distribution, calculated by reference to the exchange rate in effect at the time the distribution is received by the depository (in the case of ADSs) or by the U.S. Holder (in the case of preferred shares held directly by such U.S. Holder), regardless of whether the payment is in fact converted to U.S. dollars at that time. A U.S. Holder should not recognize any foreign currency gain or loss in respect of such distribution if such Brazilian currency is converted into U.S. dollars on the date received. If the Brazilian currency is not converted into United States dollars on the date of receipt, however, gain or loss may be recognized upon a subsequent sale or other disposition of the Brazilian currency. Such foreign currency gain or loss, if any, will be United States source ordinary income or loss.

Because our preferred shares will not be treated as “preferred stock” for purposes of Section 305 of the Code, distributions to U.S. Holders of additional shares of our “non-preferred stock” or preemptive rights relating to such “non-preferred stock” with respect to their preferred shares or ADSs that are made as part of a pro rata distribution to all shareholders in most instances will not be subject to United States federal income tax. However, if the holders of ADSs are restricted in their ability to participate in the exercise of preemptive rights, the preemptive rights may give rise to a deemed distribution to holders of the preferred shares under Section 305 of the Code. Any deemed distribution will be taxable as a dividend to the extent of our earnings and profits as discussed above.

Sale or exchange or other taxable disposition of preferred shares or ADSs

Deposits and withdrawals of preferred shares by U.S. Holders in exchange for ADSs will not result in the realization of gain or loss for United States federal income tax purposes.

A U.S. Holder generally will recognize capital gain or loss upon the sale, exchange or other taxable disposition of preferred shares or ADSs measured by the difference between the amount realized and the U.S. Holder’s adjusted tax basis in the preferred shares or ADSs. Any gain or loss will be long-term capital gain or loss if the preferred shares or ADSs have been held for more than one year. Long-term capital gains of certain U.S. Holders (including individuals) are eligible for reduced rates of United States federal income taxation. The deductibility of capital losses is subject to certain limitations under the Code.

If a Brazilian tax is withheld on the sale, exchange or other taxable disposition of a preferred share or ADS, the amount realized by a U.S. Holder will include the gross amount of the proceeds of that sale, exchange or other taxable disposition before deduction of the Brazilian tax. Capital gain or loss, if any, realized by a U.S. Holder on the sale, exchange or other taxable disposition of a preferred share or ADS generally will be treated as United States source income or loss for United States foreign tax credit purposes. Consequently, in the case of a sale, exchange or other taxable disposition of a preferred share or ADS that is subject to Brazilian tax imposed on the gain (or, in the case of a deposit, in exchange for an ADS or preferred share, as the case may be, that is not registered pursuant to Resolution No. 2,689, on which a Brazilian capital gains tax is imposed (see above under “— Material Brazilian Tax Considerations — Taxation of Gains”), the U.S. Holder may not be able to benefit from the foreign tax credit for that Brazilian tax unless the U.S. Holder can apply the credit against United States federal income tax payable on other income from foreign sources in the appropriate income category. Alternatively, the U.S. Holder may take a deduction for the Brazilian tax if it does not elect to claim a foreign tax credit for any foreign income taxes paid or accrued during the taxable year.

Passive foreign investment company rules

In general, a foreign corporation is a PFIC with respect to a U.S. Holder if, for any taxable year in which the U.S. Holder holds stock in the foreign corporation, at least 75% of its gross income is passive income or at least 50% of the value of its assets (determined on the basis of a quarterly average) produce passive income or are held for the production of passive income. In determining whether a foreign corporation is a PFIC, a pro rata portion of the

income and assets of each corporation in which it owns, directly or indirectly, at least 25% interest (by value) is taken into account. For this purpose, passive income generally includes, among other things, dividends, interest, rents, royalties and gains from the disposition of investment assets (subject to various exceptions). Based upon the nature of our current and projected income, assets and activities, we do not believe the preferred shares or ADSs are, nor do we expect them to be, shares of a PFIC for United States federal income tax purposes. However, the determination of whether the preferred shares or ADSs constitute shares of a PFIC is a factual determination made annually and thus may be subject to change. Because these determinations are based on the nature of our income and assets from time to time, and involve the application of complex tax rules, no assurances can be provided that we will not be considered a PFIC for the current or any past or future tax year.

If, contrary to the discussion above, we are treated as a PFIC, a U.S. Holder would be subject to special rules (and may be subject to increased United States federal income tax liability and form filing requirements) with respect to (a) any gain realized on the sale, exchange or other disposition of preferred shares or ADSs and (b) any “excess distribution” made by us to the U.S. Holder (generally, any distribution during a taxable year in which distributions to the U.S. Holder on the preferred shares or ADSs exceed 125% of the average annual distributions the U.S. Holder received on the preferred shares or ADSs during the preceding three taxable years or, if shorter, the U.S. Holder’s holding period for the preferred shares or ADSs). Under those rules, (a) the gain or excess distribution would be allocated ratably over the U.S. Holder’s holding period for the preferred shares or ADSs, (b) the amount allocated to the taxable year in which the gain or excess distribution is realized and to taxable years before the first day on which we became a PFIC would be taxable as ordinary income, (c) the amount allocated to each prior year in which we were a PFIC would be subject to United States federal income tax at the highest tax rate in effect for that year and (d) the interest charge generally applicable to underpayments of United States federal income tax would be imposed in respect of the tax attributable to each prior year in which we were a PFIC. A U.S. Holder who owns preferred shares or ADSs during any taxable year that we are a PFIC generally must file IRS Form 8621. U.S. Holders should also be aware that recently enacted legislation may broaden the current IRS Form 8621 filing requirements or impose an additional annual filing requirement for United States persons owning shares of a PFIC. The legislation does not describe what information would be required to be included in either situation, but grants the Secretary of the United States Treasury power to make this determination. U.S. Holders should consult their own tax advisors regarding the application of the PFIC rules to our preferred shares or ADSs and the application of the recently enacted legislation to their particular situation. U.S. Holders should also consult their own tax advisors regarding the application of the PFIC rules to our preferred shares and ADSs and the application of the recently enacted legislation to their particular situation.

In general, if we are treated as a PFIC, the rules described above can be avoided by a U.S. Holder that elects to be subject to a mark-to-market regime for stock in a PFIC. A U.S. Holder may elect mark-to-market treatment for its preferred shares or ADSs, provided the preferred shares or ADSs, for purposes of the PFIC rules, constitute “marketable stock” as defined in United States Treasury regulations. The ADSs will be “marketable stock” for this purpose if they are regularly traded on the New York Stock Exchange, other than in de minimis quantities on at least 15 days during each calendar quarter. A U.S. Holder electing the mark-to-market regime generally would compute gain or loss at the end of each taxable year as if the preferred shares or ADSs had been sold at fair market value. Any gain recognized by the U.S. Holder under mark-to-market treatment, or on an actual sale, would be treated as ordinary income, and the U.S. Holder would be allowed an ordinary deduction for any decrease in the value of preferred shares or ADSs as of the end of any taxable year, and for any loss recognized on an actual sale, but only to the extent, in each case, of previously included mark-to-market income not offset by previously deducted decreases in value. Any loss on an actual sale of preferred shares or ADSs would be a capital loss to the extent in excess of previously included mark-to-market income not offset by previously deducted decreases in value. A U.S. Holder’s adjusted tax basis in preferred shares or ADSs would increase or decrease by gain or loss taken into account under the mark-to-market regime. A mark-to-market election is generally irrevocable. If we are determined to be a PFIC, a U.S. Holder may be treated as indirectly holding any subsidiary of ours that is itself a PFIC (a lower-tier PFIC) and may be subject to the PFIC rules on indirect distributions or sales of the lower-tier PFIC, even if the U.S. Holder does not receive of the proceeds of such distribution or sales. In addition, a mark-to-market election with respect to preferred shares or ADSs would not apply to any lower-tier PFIC, and a U.S. Holder would not be able to make such a mark-to-market election in respect of its indirect ownership interest in that lower-tier PFIC. Consequently, the PFIC rules could apply with respect to income of a lower-tier PFIC, the value of which would already have been taken into account indirectly via mark-to-market adjustments in respect of preferred shares or ADSs.

If we are deemed to be a PFIC for a taxable year, dividends on our ADSs would not be “qualified dividend income” subject to preferential rates of United States federal income tax, as described above. See “— Distributions on preferred

shares or ADSs.”

Backup withholding and information reporting

In general, dividends on preferred shares or ADSs, and payments of the proceeds of a sale, exchange or other disposition of preferred shares or ADSs, paid within the United States or through certain United States-related financial intermediaries to a U.S. Holder are subject to information reporting and may be subject to backup withholding of United States federal income tax at a current maximum rate of 28% unless the U.S. Holder (i) is a corporation or other exempt recipient or (ii) provides an accurate taxpayer identification number and certifies that it is a U.S. person and that no loss of exemption from backup withholding has occurred.

The amount of any backup withholding tax from a payment to a U.S. Holder will be allowed as a credit against the U.S. Holder's United States federal income tax liability, provided that the required information is timely furnished to the IRS. You generally may obtain a refund of any amounts withheld under the backup withholding rules that exceed your United States federal income tax liability by timely filing a refund claim with the IRS.

In addition, U.S. Holders should be aware that recently enacted legislation imposes new reporting requirements with respect to the holding of foreign financial assets, including stock of foreign issuers, if the aggregate value of all of such assets exceeds \$50,000. U.S. Holders should consult their own tax advisors regarding the application of the information reporting rules to our common shares and the application of the recently enacted legislation to their particular situation.

Other Brazilian taxes

You should note that any Brazilian IOF/Exchange Tax or IOF/Bonds tax may not be treated as a creditable foreign tax for United States federal income tax purposes, although you may be entitled to deduct such taxes, subject to applicable limitations under the Code. You should consult your tax advisors regarding the United States federal income tax consequences of these taxes.

F. Dividends and Paying Agents

Not applicable.

G. Statement by Experts

Not applicable.

H. Documents on Display

We are subject to the informational requirements of the U.S. Securities Exchange Act of 1934, which is also known as the Exchange Act. Accordingly, we are required to file reports and other information with the Commission, including annual reports on Form 20-F and reports on Form 6-K. You may inspect and copy reports and other information to be filed with the Commission at the public reference facilities maintained by the Commission at 100 F Street, N.W., Washington D.C. 20549 and at the Commission's regional offices at 500 West Madison Street, Suite 1400, Chicago Illinois 60661, and 233 Broadway, New York, New York 10279. Copies of the materials may be obtained from the Public Reference Room of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549 at prescribed rates. The public may obtain information on the operation of the Commission's Public Reference Room by calling the Commission in the United States at 1-800-SEC-0330. In addition, the Commission maintains an Internet website at <http://www.sec.gov>, from which you can electronically access the registration statement and its materials.

As a foreign private issuer, we are not subject to the same disclosure requirements as a domestic U.S. registrant under the Exchange Act. For example, we are not required to prepare and issue quarterly reports. However, we furnish our shareholders with annual reports containing financial statements audited by our independent auditors and make available to our shareholders quarterly reports containing unaudited financial data for the first three quarters of each fiscal year. We file quarterly financial statements with the Commission within two months of the end of the first three quarters of our fiscal year, and we file annual reports on Form 20-F within the time period required by the Commission, which is currently six months from December 31, the end of our fiscal year.

We will send the depositary a copy of all notices that we give relating to meetings of our shareholders or to distributions to shareholders or the offering of rights and a copy of any other report or communication that we make generally available to our shareholders. The depositary will make all these notices, reports and communications that it receives from us available for inspection by registered holders of ADSs at its office. The depositary will mail copies of those notices, reports and communications to you if we ask the depositary to do so and furnish sufficient copies of materials for that purpose.

We also file financial statements and other periodic reports with the CVM located at Rua Sete de Setembro, 111, Rio de Janeiro, Rio de Janeiro 20159-900, Brazil.

I. Subsidiary Information

Not applicable.

ITEM 11. Quantitative and Qualitative Disclosures about Market Risk

The risk inherent in our market risk sensitive instruments and positions is the potential loss arising from adverse changes to the price of fuel, the *real*/U.S. dollar exchange rate and interest rates. The Company purchases jet fuel at prevailing market prices, but seeks to manage market risk through execution of a documented hedging program. The Company incurs a portion of its costs and operating expenses in U.S. dollars. The Company has interest rate risk in its floating rate leases and debt obligations. We have a fleet of 125 aircraft, 86 of which were under operating leases and 39 were under finance leases. However, fixed rate leases are not considered market sensitive financial instruments and, therefore, are not included in the interest rate sensitivity analysis below.

Aircraft Fuel

Our results of operations are affected by changes in the price of aircraft fuel required to operate our aircraft fleet. To manage the price risk, we utilize crude oil and heating oil derivative contracts. All of our derivative instruments must be liquid so as to allow us to make position adjustments and have prices that are widely disclosed. We avoid concentration of credit risk. All existing contracts settle on a monthly basis. We do not purchase or hold any derivative instruments for trading purposes. At December 31, 2010, we had crude oil derivative contracts outstanding for up to 2,109 barrels of oil. The fair value of such contracts was R\$33.2 million. If the price of fuel increased by 10% in relation to the average 2010 price, based on expected fuel consumption in 2010, would result in an increase to aircraft fuel expense of approximately R\$225.8 million in 2010. If the price of fuel decreased by 10% in relation to the average 2010 price, based on expected fuel consumption in 2010, would result in a decrease to aircraft fuel expense of approximately R\$225.8 million in 2010. We acquire substantially all of our fuel and oil from one supplier.

Foreign Currencies

A significant part of our costs and operating expenses, such as aircraft and engine maintenance services, aircraft lease payments and aircraft insurance, are denominated in U.S. dollars. To manage exchange rate risk, we enter into derivative contracts with various counterparties to protect ourselves against a possible depreciation or devaluation of the *real* in relation to the U.S. dollar. At December 31, 2010, we had outstanding currency futures contracts. The fair value of such contracts was R\$0.1 million. As a measure of our market risk with respect to our foreign currency exposure, an increase in aircraft and engine maintenance expense, aircraft operating lease payments and aircraft insurance from a hypothetical 10% depreciation of the *real* against the U.S. dollar would be approximately R\$237.0 million. The hypothetical 10% appreciation of the *real* against the U.S. dollar, would result in a decrease of approximately R\$237.0 million in these expenses.

Interest Rates

Our earnings are affected by changes in interest rates due to the impact those changes have on interest expense from variable-rate debt instruments, variable-rate leasing contracts and on interest income generated from our cash and short-term investment balances. At December 31, 2010, leases for 22 aircraft have floating-rate rent payments. A hypothetical 10% increase in market interest rates as of December 31, 2010 would result in an increase on our aircraft

rental and interest expense by approximately R\$0.05 million. A hypothetical 10% decrease in market interest rates as of December 31, 2010 would result in a decrease on our aircraft rental and interest expense by approximately R\$0.05 million. These amounts are determined by considering the impact of the hypothetical interest rates on our variable-rate debt, variable-rate leasing contracts and cash equivalent and short-term investment balances at December 31, 2010.

ITEM 12. Description of Securities other than Equity Securities

A. American Depositary Shares

In the United States, our preferred shares trade in the form of ADS. Since December 2005 each ADS represents one preferred share, issued by The Bank of New York Mellon, as Depositary pursuant to a Deposit Agreement. On December 13, 2005, we executed a 2:1 ADS split, changing to ratio of one ADS representing two preferred shares to one ADS representing one preferred share, as approved by a meeting of the Board of Directors of the Company on November 8, 2005. The ADSs commenced trading on the NYSE on June 24, 2004.

We do not treat ADR holders as our shareholders and ADR holders have no shareholder rights. Brazilian law governs shareholder rights. The depositary is the holder of the preferred shares underlying the ADSs. Holders of ADRs have ADR holder rights.

Fees and Expenses

The following table summarizes the fees and expenses payable by holders of ADRs:

Persons depositing preferred shares or ADR holders mustFor:

<p><i>pay:</i> US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs)</p>	<p>Issuance of ADSs, including issuances resulting from a distribution of preferred shares or rights or other property Cancellation of ADSs for the purpose of withdrawal, including if the deposit agreement terminates</p>
<p>US\$0.02 (or less) per ADS (to the extent not prohibited by the rules of any stock exchange on which the ADSs are listed for trading)</p>	<p>Any cash distribution to you</p>
<p>A fee equivalent to the fee that would be payable if securities distributed to you had been preferred shares and the shares had been deposited for issuance of ADSs</p>	<p>Distribution of securities distributed to holders of deposited securities which are distributed by the depositary to ADR holders</p>
<p>US\$0.02 (or less) per ADS per calendar year (to the extent the depositary has not collected a cash distribution fee of \$.02 per ADS during the year)</p>	<p>Depositary services</p>
<p>Registration or transfer fees</p>	<p>Transfer and registration of preferred shares on our preferred share register to or from the name of the depositary or its agent when you deposit or withdraw preferred shares.</p>
<p>Expenses of the depositary in converting foreign currency to U.S. dollars</p>	
<p>Expenses of the depositary</p>	<p>Cable, telex and facsimile transmissions (when expressly provided in the deposit agreement)</p>
<p>Taxes and other governmental charges the depositary or the custodian have to pay on any ADR or preferred share underlying an ADR, for example, stock transfer taxes, stamp duty or withholding taxes</p>	<p>As necessary</p>
<p>Any charges incurred by the depositary or its agents for servicing the deposited securities</p>	<p>No charges of this type are currently made in the Brazilian market</p>

Payment of Taxes

The depositary may deduct the amount of any taxes owed from any payments to you. It may also sell deposited securities, by public or private sale, to pay any taxes owed. You will remain liable if the proceeds of the sale are not sufficient to pay the taxes. If the depositary sells deposited securities, it will, if appropriate, reduce the number of ADSs to reflect the sale and pay to you any proceeds, or send to you any property, remaining after it has paid the taxes.

Reimbursement of Fees

The Bank of New York Mellon, as depositary, has agreed to reimburse us for expenses we incur that are related to establishment and maintenance expenses of the ADS program. The depositary has agreed to reimburse us for our continuing annual stock exchange listing fees. The depositary has also agreed to pay the standard out-of-pocket

maintenance costs for the ADRs, which consist of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of United States federal tax information, mailing required tax forms, stationery, postage, facsimile, and telephone calls. It has also agreed to reimburse us annually for certain investor relationship programs or special investor relations promotional activities. In certain instances, the depository has agreed to provide additional payments to us based on any applicable performance indicators relating to the ADR facility. There are limits on the amount of expenses for which the depository will reimburse us, but the amount of reimbursement available to the Company is not necessarily tied to the amount of fees the depository collects from investors.

The depositary collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depositary services by deduction from cash distributions or by directly billing investors or by charging the book-entry system accounts of participants acting for them. The depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

Reimbursement of Fees Incurred in 2010

From January 1, 2010 until the date of this annual report, the Company received from the depositary US\$100,000 for standard out-of-pocket maintenance costs for the ADRs (consisting of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of U.S. Federal tax information, mailing required tax forms, stationery, postage, facsimile, and telephone calls), any applicable performance indicators relating to the ADR facility, underwriting fees and legal fees.

PART II

ITEM 13. Defaults, Dividend Arrearages and Delinquencies

None.

ITEM 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

None.

ITEM 15. Controls and Procedures

Disclosure Controls and Procedures. The Registrant maintains controls and procedures designed to ensure that it is able to collect the information it is required to disclose in the reports it files with the SEC, and to process, summarize and disclose this information within the time periods specified in the rules of the SEC. Based on an evaluation of the Registrant's disclosure controls and procedures as of the end of the period covered by this report conducted by the Registrant's management, with the participation of the chief executive and chief financial officers, after evaluating together with other members of management the effectiveness of our disclosure controls and procedures (as defined in the U.S. Securities Exchange Act of 1934 under Rule 13a-15(e)) have concluded that our disclosure controls and procedures were not effective, because of the material weakness in internal control over financial reporting described above in the explanatory note, to ensure that the Registrant is able to collect, process and disclose the information it is required to disclose in the reports it files with the SEC within the required time periods.

Based on that evaluation, our chief executive officer and chief financial officer concluded that the design and operation of our disclosure controls and procedures are ineffective to ensure that information required to be disclosed in the reports that we file and submit under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (2) collected and communicated to management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure as of the end of our most recent fiscal year.

Management's Report on Internal Control over Financial Reporting. Management of the Registrant is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) under the Securities Exchange Act of 1934. The Registrant's internal control over financial reporting is designed to provide reasonable assurance to the Registrant's management and board of directors regarding the preparation and fair presentation of published financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Management assessed the effectiveness of the Registrant's internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework.

A material weakness is a significant deficiency, or combination of significant deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. During management's assessment of the effectiveness of our internal control over financial reporting for the year ended December 31, 2010, a material weakness related to revenue recognition of ticket sales under interline agreements has been identified. This material weakness had the potential to cause a material misstatement of our financial statements. However, we have already taken the necessary remediation measures to ensure accuracy and effectiveness of our monitoring controls over this process and completed our corrective measures in April 2011.

Based on the assessment and the control deficiency abovementioned, management has concluded that the Company has not maintained effective internal control over financial reporting as of December 31, 2010.

Attestation Report of the Independent Registered Public Accounting Firm. The effectiveness of internal controls over financial reporting as of December 31, 2010 has been audited by Deloitte Touche Tohmatsu Auditores Independentes, or Deloitte, the independent registered public accounting firm who also audited the Company's consolidated financial statements. Deloitte's report on the Company's internal controls over financial reporting is included herein.

ITEM 16.[Reserved]

ITEM 16A. Audit Committee Financial Expert

Our board of directors has determined that Luiz Kaufmann, a member of our audit committee, is an "audit committee financial expert" as defined by current SEC rules and meets the independence requirements of the SEC and the NYSE listing standards. For a discussion of the role of our audit committee, see "Item 6C. Board Practices—Audit Committee."

ITEM 16B. Code of Ethics

Our board of directors has adopted a Code of Ethics applicable to our directors, officers and employees, including our principal executive officer and principal financial officer. The Code of Ethics can be found at www.voegol.com.br under the heading "Investor Relations." Information found at this website is not incorporated by reference into this document.

ITEM 16C. Principal Accountant Fees and Services

The following table sets forth by category of service the total fees for services performed by our principal accountants during the fiscal years ended December 31, 2010 and 2009. Ernst & Young Terco Auditores Independentes S.S., or E&Y, was our principal accountant until March 31, 2009, and Deloitte was our principal accountant during the fiscal

years ended December 31, 2009 and 2010.

	2009	2010
	(in reais)	
Audit Fees	1,695,392 ⁽¹⁾	2,716,313
Audit-Related Fees	605,089 ⁽²⁾	603,540
Tax Fees	—	-
All Other Fees	—	-
Total	2,300,481	3,319,853

(1) Does not include fees of R\$537,462 paid to E&Y for its review of our interim financial statements as of March 31, 2009.

(2) Does not include R\$165,067 paid to E&Y for services in connection with securities offerings.

Audit Fees

Audit fees include the audit of our consolidated annual financial statements and internal controls, the audit of our Brazilian GAAP financial statements, review of our quarterly reports and required statutory audits and regulatory filings such as the *Formulário de Referência*.

Audit-Related Fees

Audit-related fees include fees for the preparation and issuance of comfort letters in connection with our senior notes offering and attest service related to sustainability.

In 2009, audit-related fees for services performed by E&Y amounted to R\$165,067 and for services performed by Deloitte amounted to R\$605,089.

In 2010, audit-related fees for services performed by Deloitte amounted to R\$603,540.

Tax Fees

There were no tax advisory services provided by Deloitte in 2009 and 2010.

All Other Fees

There were no other fees for services performed by Deloitte during the fiscal years ended December 31, 2009 and 2010.

Pre-Approval Policies and Procedures

Our audit committee approves all audit, audit-related services, tax services and other services provided by Deloitte or E&Y. Any services provided by Deloitte or E&Y that are not specifically included within the scope of the audit must be pre-approved by the audit committee in advance of any engagement. Pursuant to Rule 2-01 of Regulation S-X, audit committees are permitted to approve certain fees for audit-related services, tax services and other services pursuant to a *de minimis* exception prior to the completion of an audit engagement. In 2010 and 2009, none of the fees paid to E&Y and Deloitte were approved pursuant to the *de minimis* exception.

ITEM 16D. Exemptions from the Listing Standards for Audit Committees

None.

ITEM 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None

ITEM 16F. Change in Registrant's Certifying Accountant

None

ITEM 16G. Corporate Governance

Significant Differences between our Corporate Governance Practices and NYSE Corporate Governance Standards

We are subject to the NYSE corporate governance listing standards. As a foreign private issuer, the standards applicable to us are considerably different than the standards applied to U.S. listed companies. Under the NYSE rules, we are required only to: (a) have an audit committee or audit board, pursuant to an applicable exemption available to foreign private issuers, that meets certain requirements, as discussed below, (b) provide prompt certification by our chief executive officer of any material non-compliance with any corporate governance rules, and (c) provide a brief description of the significant differences between our corporate governance practices and the NYSE corporate governance practice required to be followed by U.S. listed companies. The discussion of the significant differences between our corporate governance practices and those required of U.S. listed companies follows below.

Majority of Independent Directors

The NYSE rules require that a majority of the board must consist of independent directors. Independence is defined by various criteria, including the absence of a material relationship between the director and the listed company. Brazilian law does not have a similar requirement. Under Brazilian law, neither our board of directors nor our management is required to test the independence of directors before their election to the board. However, both the Brazilian Corporation law and the CVM have established rules that require directors to meet certain qualification requirements and that address the compensation and duties and responsibilities of, as well as the restrictions applicable to, a company's executive officers and directors. While our directors meet the qualification requirements of the Brazilian Corporation law and the CVM, we do not believe that a majority of our directors would be considered independent under the NYSE test for director independence. The Brazilian Corporation law requires that our directors be elected by our shareholders at a general shareholders' meeting. All of our directors are elected by our controlling shareholder and five of our directors represent our controlling shareholder.

Executive Sessions

NYSE rules require that the non-management directors must meet at regularly scheduled executive sessions without management present. The Brazilian Corporation law does not have a similar provision. According to the Brazilian Corporation law, up to one-third of the members of the board of directors can be elected from management. Constantino de Oliveira Jr., our president and chief executive officer, is a member of our board of directors. There is no requirement that non-management directors meet regularly without management. As a result, the non-management directors on our board do not typically meet in executive session.

Fiscal Committee

Under the Brazilian corporation law, the *Conselho Fiscal*, or fiscal committee, is a corporate body independent of management and a company's external auditors. The fiscal committee may be either permanent or non-permanent, in which case it is appointed by the shareholders to act during a specific fiscal year. A fiscal committee is not equivalent to, or comparable with, a U.S. audit committee. The primary responsibility of the fiscal committee is to review management's activities and a company's financial statements, and to report its findings to a company's shareholders. The Brazilian corporation law requires fiscal committee members to receive as remuneration at least 10% of the average annual amount paid to a company's executive officers. The Brazilian corporation law requires a fiscal committee to be composed of a minimum of three and a maximum of five members and their respective alternates.

Under the Brazilian corporation law, the fiscal committee may not contain members that (i) are on our board of directors, (ii) are on the board of executive officers, (iii) are employed by us or a controlled company, or (iv) are spouses or relatives of any member of our management, up to the third degree. Our by-laws provide for a non-permanent fiscal committee to be elected only by our shareholders' request at a general shareholders' meeting. The fiscal committee, when elected, will be comprised of a minimum of three and a maximum of five members and an equal number of alternate members. In 2010, our shareholders did not request the election of a fiscal committee.

Audit Committee

NYSE rules require that listed companies have an audit committee that (i) is composed of a minimum of three independent directors who are all financially literate, (ii) meets the SEC rules regarding audit committees for listed companies, (iii) has at least one member who has accounting or financial management expertise and (iv) is governed by a written charter addressing the committee's required purpose and detailing its required responsibilities. However, as a foreign private issuer, we need only to comply with the requirement that the audit committee meet the SEC rules regarding audit committees for listed companies to the extent compatible with Brazilian corporation law. Our audit committee, which is not equivalent to, or comparable with, a U.S. audit committee, provides assistance to our board of directors on matters involving accounting, internal controls, financial reporting and compliance. The audit committee recommends the appointment of our independent auditors to our board of directors and reviews the compensation of our independent auditors and helps coordinate their activities. It also evaluates the effectiveness of our internal financial and legal compliance controls. The audit committee comprises three members elected by the board of directors for a one-year term with the right to re-election, all three of which are independent. The current members of our audit committee are Álvaro de Souza, Antônio Kandir and Luiz Kaufmann. All members meet the independent membership requirements of the SEC and NYSE as well as other NYSE requirements. Luiz Kaufmann is the committee's "financial expert" within the scope of the SEC rules covering the disclosure of financial experts on audit committees in periodic filings pursuant to the U.S. Securities Exchange Act of 1934.

Nomination/Corporate Governance and Compensation Committees

NYSE rules require that listed companies have a nominating/corporate governance committee and a compensation committee composed entirely of independent directors and governed by a written charter addressing the committee's required purpose and detailing its required responsibilities. Required responsibilities for the nominating/corporate governance committee include, among other things, identifying and selecting qualified board member nominees and developing a set of corporate governance principles applicable to the company. Required responsibilities for the compensation committee include, among other things, reviewing corporate goals relevant to the chief executive officer's compensation, evaluating the chief executive officer's performance, approving the chief executive officer's compensation levels and recommending to the board non-chief executive officer compensation, incentive-compensation and equity-based plans.

We are not required under applicable Brazilian law to have a nomination/corporate governance committee or compensation committee. Under the Brazilian Corporation law, the total amount available for compensation of our directors and executive officers and for profit-sharing payments to our executive officers is established by our shareholders at the annual general meeting. The board of directors is then responsible for determining the individual compensation and profit-sharing of each executive officer, as well as the compensation of our board and committee members. In making such determinations, the board reviews the performance of the executive officers, including the performance of our chief executive officer, who typically excuses himself from discussions regarding his performance and compensation.

Our human resources and corporate governance committee is responsible for the coordination, implementation and periodic review of best corporate governance practices and for monitoring and keeping our board of directors informed of legislation and market recommendations addressing corporate governance. It also reviews and recommends to our board of directors human resources policies, forms of compensation, including salary, bonus and stock options, to be paid to our employees, as well as analyzing management's career and succession plans. The committee consists of up to five members elected by our board of directors for a one-year term, with the right to re-election, comprising the chairman of the board of directors, one member of the board of directors, two outside specialists and the management and human resources officer. The human resources and corporate governance committee currently consists of Henrique Constantino, a member of our board of directors, Betânia Tanure de Barros, Álvaro de Souza, Paulo César Aragão and Ricardo Khauaja.

Shareholder Approval of Equity Compensation Plans

NYSE rules require that shareholders be given the opportunity to vote on all equity compensation plans and material revisions thereto, with limited exceptions. Under the Brazilian Corporation law, shareholders must approve all stock option plans. In addition, any issuance of new shares that exceeds our authorized share capital is subject to shareholder approval.

Corporate Governance Guidelines

NYSE rules require that listed companies adopt and disclose corporate governance guidelines. We have not adopted any formal corporate governance guidelines beyond those required by applicable Brazilian law. We have adopted and observe a disclosure policy, which requires the public disclosure of all relevant information pursuant to guidelines set forth by the CVM, as well as an insider trading policy, which, among other things, establishes black-out periods and requires insiders to inform management of all transactions involving our securities.

Code of Business Conduct and Ethics

NYSE rules require that listed companies adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers. Applicable Brazilian law does not have a similar requirement. We have adopted a Code of Ethics and Conduct applicable to our officers, directors and employees worldwide, including at the subsidiary level. We believe this code addresses the matters required to be addressed pursuant to the NYSE rules. For a further discussion of our Code of Ethics and Conduct, see "Item 16B. Code of Ethics."

Internal Audit Function

NYSE rules require that listed companies maintain an internal audit function to provide management and the audit committee with ongoing assessments of the company's risk management processes and system of internal control. Our

internal audit and compliance department was created in 2004 under the supervision of our chief financial officer and our audit committee and is responsible for our compliance with the requirements of Section 404 of the U.S. Sarbanes Oxley Act of 2002 regarding internal control over financial reporting. The internal audit and compliance department reports to our chief executive officer and the audit committee.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Gol Linhas Aéreas Inteligentes S.A.
São Paulo - SP, Brazil

We have audited the accompanying consolidated statements of financial position of Gol Linhas Aéreas Inteligentes S.A. and subsidiaries (the "Company") as of December 31, 2010 and 2009, and the related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for each of the two years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's Management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States) - PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by Management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Gol Linhas Aéreas Inteligentes S.A. and subsidiaries as of December 31, 2010 and 2009, and the consolidated results of their operations and their consolidated cash flows for each of the two years in the period ended December 31, 2010, in conformity with International Financial Reporting Standards - IFRS as issued by the International Accounting Standards Board - IASB.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) - PCAOB, the Company's internal control over financial reporting as of December 31, 2010, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission - COSO, and our report, dated April 8, 2011, April 9, 2012 as to the effects of the material weakness described in Management's Report on Internal Control over Financial Reporting as revised, expressed an adverse opinion on the Company's internal control over financial reporting because of a material weakness.

*Gol Linhas Aéreas
Inteligentes S.A.*

*Internal Control over Financial Reporting for the Year Ended December 31, 2010 and Report of
Independent Registered Public Accounting Firm*

Deloitte Touche Tohmatsu Auditores Independentes

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Gol Linhas Aéreas Inteligentes S.A.
São Paulo - SP, Brazil

We have audited the internal control over financial reporting of Gol Linhas Aéreas Inteligentes S.A. and subsidiaries (the “Company”) as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission - COSO. The Company’s Management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) - PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included: obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s Board of Directors, Management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards - IFRS. A company’s internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with International Financial Reporting Standards - IFRS, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company’s assets that could have a material effect on the financial statements.

F-2

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness related to revenue recognition of ticket sales under interline agreements has been identified and included in Management's assessment. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the consolidated financial statements as of and for the year ended December 31, 2010 of the Company and this report does not affect our report on such financial statements.

In our opinion, because of the effect of the material weakness identified above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2010, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission - COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) - PCAOB, the consolidated statement of financial position of the Company as of December 31, 2010, and related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for the year then ended. Our report, dated April 8, 2011, expressed an unqualified opinion on those consolidated financial statements.

DELOITTE TOUCHE TOHMATSU

Auditores Independentes

April 8, 2011 (April 9, 2012 as to the effects of the material weakness described in Management's Report on Internal Control over Financial Reporting as revised)

F-3

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Gol Linhas Aéreas Inteligentes S.A.

We have audited the accompanying consolidated statements of operations, comprehensive loss, changes in shareholders' equity and cash flows of Gol Linhas Aéreas Inteligentes S.A. for the year ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated results of their operations, changes in shareholders' equity and cash flows for the year ended December 31, 2008, in conformity with International Financial Reporting Standards, issued by the International Accounting Standards Board.
