3Q12 Earnings Results Conference Call

November 13, 2012

> 8am US EST

FOR IMMEDIATE RELEASE - São Paulo, November 12, 2012 – Gafisa S.A. (Bovespa: GFSA3; NYSE: GFA), Brazil's leading diversified national homebuilder, today reported financial results for the third quarter ended September 30, 2012.

Duilio Calciolari, Chief Executive Officer, said: "Our 3Q12 results demonstrate that the execution of Gafisa's operations advanced in the direction of our planned full-year targets. The cash generation and the deleveraging of our balance sheet remain a priority and following the delivery of over 17,700 units, we have already exceeded the mid-point of our annual cash flow (CFO) guidance, resulting in increased CFO guidance of R\$600-800mn for 2012. In addition to our focus on cash generation coming from our core business, we are also selling non-strategic land and generating new profitable businesses."

"The Gafisa brand is now concentrated in the states of Sao Paulo and Rio de Janeiro. In the first nine months of the year we launched projects valued at over R\$795 million, all of which are aligned to our guidelines for profitability and have strong levels of initial sales with a velocity of 59%. The completion of developments in non-strategic areas will still impact our profitability in the near-term. Thereafter we will have reduced the complexity of our business and substantially increased our execution capacity."

“At Tenda, we remain focused on delivering existing and in-progress developments. Year-to-date we have transferred around 9,600 units to financial institutions, and delivered over 10,000 units. Of those contracts that have been cancelled, 70% have already been resold. We are postponing new Tenda launches to the first half of 2013 in order for the team to continue their good work and remain totally focused on completing and delivering current units. As a result we will not be launching the R\$300 million originally planned for the year.”

“Our AlphaVille business continues to be a strong contributor to the Group’s profits. The brand has grown to represent almost half of year-to-date launches and we expect launches to increase sequentially to more than R\$1 billion. Given the returns achieved by this brand and further development opportunities in Brazil, we continue to favor the allocation of resources to opportunities that provide the right balance of growth and profitability.”

Consolidated Free Cash Generation Was Positive at R\$149 Million in the 3Q12

Chart 1. Cash Generation (Cash burn) (3Q10 – 3Q12)

Gafisa ended the third quarter with R\$1.23 billion in cash, a 13% increase over a balance R\$1.1 billion at the end of the second quarter. Across the Group, unit deliveries in the first nine months of the year were consistent with our full-year target and we have achieved the mid range of our previous operating cash flow full year guidance of R\$500-R\$700 million. Operational consolidated cash flow reached R\$607 million in the 9M12, 87% of the mid range of the updated guidance established for 2012 of R\$600-R\$800 million. Consolidated free cash generation was positive at R\$149 million in the 3Q12.

Updated Status of AlphaVille Acquisition

The arbitration has been submitted to the Brazil-Canada Chamber of Conciliation and Arbitration as prescribed in the Agreement. As a recap, according to the terms of the Investment Agreement signed between Gafisa and Alphapar when Gafisa acquired control of AlphaVille in 2006, as the Parties have not reached an agreement on the acquisition of the remaining 20% stake in AlphaVille, the process was submitted to arbitration on an exclusive and final basis.

Updated Status of the Results by Brand

Gafisa has been successfully implementing the strategic plan set in 2011 and has focused squarely on obtaining and maintaining operational consistency.

Gafisa: (1) Gafisa was able to launch 53% of the mid-range of 2012 guidance of R\$1.5 billion for the segment. (2) New Market projects, where Gafisa had lower margins will be delivered and should be substantially completed in the beginning of 2013. (3) Sales performance related to inventory has improved. (4) Gafisa has been contributing to the generation of operating cashflow.

Tenda: (1) Tenda posted healthy sales speed, better execution and improved quality in the portfolio of receivables. (2) In the first nine months, Tenda transferred 9,567 units to financial institutions reflecting 80% of the mid-range of guidance provided for the full year of 10,000–14,000 customers. (3) Units delivery consistent with full year guidance. (4) Tenda is contributing to the consolidated positive operating cash flow posted.

AlphaVille: (1) Continues to launch developments with good demand - two projects (AlphaVille Minas Gerais and Terras Alpha Sergipe) were launched with sales of 94%. (2) The results underscore the growing share of AlphaVille in the product mix. The brand accounted for 46% share of 9M12 consolidated launches, up from a 21% a year ago. (3) The quality and size of AlphaVille landbank is a strong indication of the future prospects of the company.

Units Delivery Consistent with Full Year Guidance

Chart 2. Delivered units (2007 – 3Q12)

In the third quarter of 2012, the Company was able to achieve operational consistency in unit deliveries. Gafisa delivered 27 projects encompassing 5,531 units, a 35% decrease on the 8,459 delivered during 3Q11. In the first nine months, the Gafisa Group achieved unit deliveries of 17,729 units, representing a 9% year-over-year increase. See the accompanying chart for detailed information.

Tenda Status

With the introduction of the new strategy and organizational structure, Gafisa is progressing toward established guidance for the year. The restructuring of the Tenda brand, which focuses on affordable entry level developments, is progressing according to plan. Since the beginning of the year the Gafisa Group has implemented corrective actions focused on execution and the delivery of units. In the meantime the launch of Tenda units was halted until Tenda could be relaunched under a profitable business model. These corrective actions have been successful as Tenda has been able to transfer units to financial institutions in line with guidance and contribute to consolidated positive operating cash flow. As a result, the Company expects the launch cycle to resume next year when the appropriate processes will be in place to ensure a profitable business model. Accordingly, official guidance for Tenda launches of between R\$270-R\$330 million for 2012 has been revised down to zero.

The turnaround process at Tenda has been based on three pillars: (1) the expedition of the financing process through the immediate transfer of mortgages to financial institutions; (2) the revision of the supply chain to ensure the availability of material and labor to execute works; (3) the standardization of production processes. This determines the profitability of projects in the economic segment, where margins tend to be lower and can render developments unviable.

The contracted launch and transferred sale model means that the sale of a unit is only realized following a complete customer credit analysis by the CEF, the chief financial agent for Tenda's clients. It is also contingent upon bank approval. This means Tenda's customers will learn whether they fit the profile required by the bank during financing approval. Since the start of the year, approximately 70% of sales have been transferred or are awaiting customer signatures. The remainder are in an advanced stage of being contracted with the CEF.

The review of the supply chain and suppliers is part of a move to better control the construction process at Tenda and provide assurance to engineers as they carry out their projects. The Supply Chain unit, which was created in early 2012, has full access to works from start to finish. As a result, basic inputs and services are negotiated in large quantities, rather than individually, to maximize efficiencies. Previously, materials were ordered by engineers; today the division controls materials and verifies all amendments to avoid technical issues in the supply chain or with suppliers.

One of the main technologies used by Tenda to achieve standardization in projects is the aluminum mold method. Light, durable and sized for easy handling by operators, the metal modules are assembled and filled directly with concrete for much higher-quality walls and slabs when compared to structural blocks. This also makes the process of finishing the walls unnecessary. This technology, in addition to superior process controls and reduced operational risks, reduces the construction cycle by up to 30%. Since 2010, approximately 80% of Tenda's construction has employed this technology and this proportion should increase with new launches.

The plan to resume launches at Tenda is based on the elements mentioned above, always with a conservative capital allocation. Our initial focus will be on four regions: Sao Paulo, Rio de Janeiro, Minas Gerais and Salvador, where we have already established a strong base to relaunch operations.

CONSOLIDATED DATA FOR THE GAFISA GROUP**Consolidated Launches**

Third quarter 2012 launches totaled R\$451.9 million, an 17% decrease over 2Q12. Y-o-Y launches decreased 57% due to the implementation of the turnaround strategy announced at the end of 2011. The result represents 49% of the mid-range of the previous full-year launch guidance of R\$3.0 billion and 54% of the mid-range of the previous full-year launch guidance of R\$2.7 billion. The delays in the approval of a few projects to be launched in 3Q12, in Sao Paulo, that slipped to the 4Q12, explains the drop in launches Y-o-Y. During the 9M12, 18 projects/phases were launched across 7 states, with Gafisa accounting for 54% of launches and AlphaVille the remaining 46%.

Consolidated Sales over Supply (SoS)

Consolidated sales over supply reached 18.7%, compared to 23.1% in 3Q11, reflecting fewer launches to pursue corrective remedial/action at the Tenda business. Excluding the Tenda brand, third-quarter sales over supply was 22.7%, compared to 20.1% in 2Q12 and 27.4% in 3Q11. The lower VSO is attributed to the lower contribution of launches as compared to the previous year period. The consolidated sales speed of launches reached 66.7%.

Tenda Segment Pre-Sales

Third quarter gross pre-sales decreased 15% Q-o-Q to R\$293.8 million, compared to R\$344.8 million in 2Q12. Since 1Q12, pre-sales recognition and the remuneration of the Tenda sales force have been contingent upon the ability to pass mortgages onto financial institutions. Third quarter net pre-sales (gross pre-sales less dissolutions) were R\$30.0 million compared with R\$15.7 million in 2Q12.

The Third quarter net pre-sales results reflect the dissolution of contracts with potential homeowners who no longer qualify for bank mortgages of R\$263.7 million versus R\$329.1 million in the previous quarter.

Despite ongoing dissolutions expected in 2012, the Gafisa Group is experiencing good demand for these units. Of the units returned to inventory, 70% have already been resold at a premium to qualified customers within 9M12.

Selling, General and Administrative Expenses (SG&A)

SG&A expenses totaled R\$151 million in the 3Q12, a 10% increase on the R\$137 million in SG&A expenses posted in 3Q11 and 12% over the R\$171 million posted in the 2Q12. Selling expenses decreased 10% on a year-over-year basis to R\$70 million, given the reduction of the launches volume in the period.

During the 9M12, administrative expenses reached R\$253 million, a 43% increase compared to the R\$176 million posted in the 9M11. The main reasons for the increase in SG&A expenses were:

- (1) a provision related to the distribution of variable compensation, including stock options plan, which accounted for 48% and 14%, of the annual change in the G&A registered in the period, respectively;
- (2) other expenses related to services rendered, mainly auditing, which accounted for 20% of the annual change in the G&A registered in the period;

(3) administrative expenses related to the expansion of AlphaVille's operations given the increased contribution in Gafisa Group mix, which accounted for 15% of the annual change in G&A registered in the period.

The net debt and investor obligations to equity and minorities ratio was 106% compared to 112% in the 2Q12. Excluding project finance, this net debt/equity ratio reached 28% from 34% in the 2Q12.

Currently we have access to a total of R\$1.6 billion in construction finance lines contracted with banks and R\$665 million of construction credit lines in the process of being approved. Also, Gafisa has R\$2.4 billion available in construction finance lines of credit for future developments. The following tables provide information on our debt position:

OUTLOOK

With the introduction of the new strategy and organizational structure, Gafisa is progressing toward established guidance for the year. The implementation and development of the operating and financial plan to support the restructuring of Tenda indicates that we are on the right track. Although the direct results of these adjustments to the Tenda operation over recent quarters have been positive, the launch cycle should resume next year. Reflecting the purpose of implementing corrective actions and focusing on execution and delivery, we have not launched any residential tower products via Tenda in 2012. As a result, our official guidance for Tenda launches of R\$270-R\$330 million for 2012 has been revised down to zero for this year.

As a result, consolidated launches for 2012 are now expected to be between R\$2.4 and R\$3.0 billion, reflecting a new, more targeted regional focus and the deliberate slowdown of the Tenda business. Gafisa should represent around 55% of launches and AlphaVille 45%. In the first nine months of 2012, the Gafisa Group launched R\$1.46 billion or 53% of the mid-range of 2012 guidance of R\$1.5 billion for the segment. AlphaVille's launches were in line with the internal projections and planning, representing 56% of the guidance for the year.

As of September 30, 2012, the Company had R\$1.23 billion in cash and cash equivalents. During the 9M12 operational consolidated cash flow reached approximately R\$607 million, representing 87% of the mid point of the updated guidance established for the full year of 2012, of R\$600 – R\$800 million. The key drivers of cash flow generation include: (1) our ability to deliver and transfer/customers at Gafisa; (2) the transfer of Tenda units to financial institutions; (3) the sale of inventory and new projects launched; (4) the securitization of receivables and; (5) the sale of non-strategic land, which had a minor contribution to the results posted in the period.

The Gafisa Group plans to deliver between 22,000 and 26,000 units in 2012 of which 30% will be delivered by Gafisa, 50% by Tenda and the remaining 20% by AlphaVille. During the first nine months of the year of 2012, the Gafisa Group delivered 17,729 units and transferred 9,567 Tenda customers to financial institutions, achieving 80% of the mid-range of the guidance for both targets.

1. Operations

Gafisa S.A. ("Gafisa" or "Company") is a publicly traded company with headquarter at Avenida das Nações Unidas, nº 8.501, 19º andar, in the City of São Paulo, State of São Paulo, Brazil and started its operations in 1997 with the objectives of: (i) promoting and managing all forms of real estate ventures on its own behalf or for third parties, taking into consideration that in the case of the later, as construction company and proxy; (ii) selling and purchasing real estate properties in general; (iii) carrying out civil construction and civil engineering services and (iv) developing and implementing marketing strategies related to its own or third party real estate ventures.

Real estate development projects entered into by the Company with third parties are structured through specific purpose partnerships ("Sociedades de Propósito Específico" or– "SPEs") or the formation of consortia and condominiums. Controlled entities substantially share the managerial and operating structures and the corporate, managerial and operating costs with the Company. SPEs, condominiums and consortia operate solely in the real estate industry and are linked to specific ventures.

In the 4th quarter of 2011, the Company conducted an extensive review of its operations and business strategy, as well as those of its subsidiaries. As a result of this review, the following changes were made:

- Establishment of a new organizational structure divided into brands, with indication of the professionals responsible for the respective structures;

- Temporary reduction of the activities of the Tenda brand, until the Company is able to operate efficiently based on the fundamentals of this segment, that is, production at competitive costs (using the technology of steel structures) and immediate transfer, soon after the sale, of clients to a financial institution;
- Increase in investments in the Alphaville brand, as it is the most profitable segment of the product portfolio; and
- Focus the Gafisa brand on the markets of São Paulo and Rio de Janeiro.

1. Operations --Continued

As a consequence of this review and of the newly established structure, a series of measures were taken:

- Extensive review of all budgets of the costs of works in progress;
- Review of all portfolio of Tenda customers in order to confirm whether they fulfill the requirements of financial institutions; and
- Analysis of the recoverability of lands located in non-priority regions.

Because of these changes and reviews made, the Company recognized adjustments and provisions amounting to approximately R\$639,482 for 2011, of which R\$211,417 for the nine-month period ended September 30, 2011 (Note 2.3). Such adjustments and provisions did not produce an impact on the capital flow of the Company neither shall impact its capacity to fulfill commitments, as mentioned in Note 1 to the financial statements as of December 31, 2011.

2. Presentation of interim financial information and summary of significant accounting policies

The Board of Directors of the Company has power to amend the individual and consolidated interim financial information (“quarterly information”) of the Company after they are issued. On November 12, 2012, the Company’s Board of Directors approved the individual and consolidated quarterly information of the Company and authorized their issuance.

The individual and consolidated quarterly information were prepared and presented according to the same accounting practices adopted in the presentation and preparation, as mentioned in Note 2.1, of the financial statements for the year ended December 31, 2011, which shall be read together with this Quarterly Information.

Pursuant to CVM/SNC/SEP Circular Letter No. 03/2011, the Company states that the significant accounting judgments, estimates and assumptions, as well as the significant accounting practices are the same as those disclosed in the annual financial statements for 2011, and continue valid for the quarterly information hereof. Therefore, the corresponding information shall be read in Notes 2.1 and 2.2 of those financial statements.

In order to enhance the information described in Note 2.2 of the financial statements, as of December 31, 2011, particularly in relation to the determination of fair value for recognition of revenue from units sold and under construction, which is appropriated to income throughout the construction period, we disclosed the criteria adopted by the Company:

- The fair value of the revenue from units sold is stated at present value based on the discount rate which its fundamentals and assumption are the average rate of the financing obtained by the Company, net of adjustment for inflation, between the contract signature date and the estimated date to handover the keys of the completed property to the buyer (from the handover of keys, an interest of 12% p.a. plus adjustment for inflation is applied to the accounts receivable);
- The discount rates adopted by the Company and its subsidiaries are 1.36% to 4.89% for the period ended September 30, 2012 (4.18% as of December 31, 2011), net of INCC;
- Subsequently, interests accrue over time on the new fair value to calculate the revenue to be appropriated, on which the percentage of completion will be applied; and,

--Continued

- In compliance with the provisions of item 9 of CPC 30, items 33 and 34 of OCPC01, and item 33 of CPC 12, the Company, in relation to installment sale of unfinished units, recognizes receivables adjusted for inflation, including the portion related to the handover of keys, without interest charges, and are discounted to present value, once the agreed-upon inflation indexes do not include the interest component. The reversal of the present value adjustment, considering that an important part of the Company operations consists of financing its clients until key delivery, was carried out as contra-entry to the group of real estate development revenue, consistently with interest incurred on the portion of receivables balance related to period subsequent to the handover of keys. The discount rate adopted is based on fundamentals and assumption of an average rate of loans and financing obtained by the Company, net of the inflation effect, as mentioned in Note 2.2.20 to the financial statements as of December 31, 2011.

In order to determine the most significant risks and benefits inherent in the ownership of real estate units sold that are transferred to real estate buyers, the Company follows the Technical Orientation OCPC 04. It requires significant judgment, and in this context, the Management considered all discussions on the theme that were held in the scope of the Task Group coordinated by the Brazilian Securities Commission (CVM) in which the Company was represented by the Brazilian Association of Publicly-Held Companies (ABRASCA), which led to a presentation to the CPC of the minutes of the OCPC 04, which it approved and guided the Technical Interpretation ICPC 02 to Brazilian real estate entities.

2. Presentation of interim financial information and summary of significant accounting policies

--Continued

Certain matters related to the meaning and application of the continuous transfer of the risks, benefits and control over the real estate unit sales have been analyzed by the International Financial Reporting Interpretation Committee (IFRIC), at the request of some countries, including Brazil. However, in view of the project for issuing a revised standard relating to revenue recognition, IFRIC has been discussing this topic in its agenda, understanding that the concept for recognizing revenue is included in the standard that is currently under discussion. Accordingly, this issue is expected to be resolved only after the revised standard relating to revenue recognition is issued.

The individual and consolidated quarterly information was prepared based on historical cost basis, except if otherwise stated. The historical cost is usually based on the considerations paid in exchange for assets.

All amounts reported in this quarterly information are in thousands of Reais, except as otherwise stated.

The non-financial data included in this quarterly information, such as sales volume, contractual data, revenue and costs not recognized in units sold, economic projections, insurance and environment, were not reviewed.

Except for the loss for the period, the Company does not have other comprehensive loss or income.

The explanatory notes that did not undergo significant changes in relation to the individual and consolidated statements as of December 31, 2011 were not included in the accompanying quarterly information.

2.1. Functional currency

The individual and consolidated quarterly information are presented in Reais (presentation currency), which is also the functional currency of the Company and its subsidiaries.

2.3. Restatement of consolidated quarterly information at September 30, 2011

As mentioned in Note 1, in line with the new strategic direction of the Company, during the fourth quarter of 2011, the executives who assumed the management of the operations of Gafisa and its subsidiaries Tenda and AUSA, conducted an extensive review of the budgets of construction works while reviewing the short and long-term business plan of the Company, and estimated the costs necessary for their completion. In the review process, adjustments to budgets that should have been recorded in the nine-month period ended September 30, 2011 were identified and that were not identified through the internal controls operating at that period.

We highlight that the adjustments to costs that were identified are mainly from the operational problems in the performance of construction works by franchise partners and contractors, renegotiation of supplier's contracts and project changes.

The Company's management, with the objective of identifying the retroactive effects, reviewed the costs of earth moving construction and brickwork stages; contracts for the replacement of contractors and franchise partners and additional costs of completed units.

The retrospective effects of adjustments to the budgets of costs for period ended September 30, 2011, disclosed and accounted for in accordance with CPC 23 – Accounting Practices, Changes in Accounting Estimates and Errors (equivalent to IAS 8), are as follows:

However, the Company invests in short term (up to 20 working days) through securities purchased under agreement to resell which interest is lower (from 75% of CDI). On the other hand, these investments are exempt from the tax on financial transactions (IOF), which is not the case of CDBs.

(a) In relation to the individual financial statements, in January 2008, the Company formed an unincorporated venture (SCP), the main objective of which is to hold interest in other real estate development companies, as mentioned in Note 9 (i) (a). As of September 30, 2012, the SCP received contributions of R\$213,084 (represented by 13,084,000 Class A units of interest fully paid-in by the Company and 200,000,000 Class B units of interest from the other venture partners). The SCP will preferably use these funds to acquire equity investments and increase the capital of its investees. As a result of this operation, due to the prudence and considering that the decision to invest or not is made jointly by all members, thus independent from Company management decision, as of September 30, 2012 payables to venture partners were recognized in the amount of R\$200,000, maturing on January 31, 2014. The venture partners receive an annual declared dividend substantially equivalent to the variation in the Interbank Deposit Certificate (CDI) rate; as of September 30, 2012, the amount accrued totaled R\$2,532. The SCP's charter provides for the compliance with certain covenants by the Company, in its capacity as lead partner, which include the maintenance of minimum indices of net debt and receivables. At a meeting

of the venture partners held on February 2, 2012, they decided to reduce the SCP capital by 100,000,000 Class B units and, as consequence of this resolution, the SCP paid R\$100,000 to the partners that held such units. As of September 30, 2012, the SCP and the Company is in compliance with these clauses.

In the consolidated financial statements, in April 2010, the subsidiary Alphaville Urbanismo S.A. paid-in the capital of an entity, the main objective is the holding of interest in other companies, which shall have as main objective the development and carrying out of real estate ventures. As of September 30, 2012, this entity subscribed capital and paid-in capital reserve amounting to R\$161,720 (comprising 81,719,641 common shares held by the Company and 80,000,000 preferred shares held by other shareholders). As a result of this transaction, due to prudence and taking into consideration the rights to which the holders of preferred shares are entitled, such as payment of fixed dividends and redemption, as of September 30, 2012, payables to investors/venture partners are recognized at R\$58,759 (net of the payment mentioned below), with final maturity on March 31, 2014. The preferred shares shall pay cumulative fixed dividends, substantially equivalent to the variation of the General Market Prices Index (IGP-M) plus 7.25% p.a. As of September 30, 2012, the balance accrued amounts to R\$5,427. The Company's articles of incorporation sets out that certain matters shall be submitted for approval from preferred shareholders through vote, such as the rights conferred by such shares, increase or reduction in capital, use of profits, set up and use of any profit reserve, and disposal of assets. On April 2, 2012, the Company paid R\$26,667 to partners who hold preferred shares. As of September 30, 2012, the Company is in compliance with the above-described clauses.

Dividends are reclassified as financial expenses in the financial statements.

(b) As part of the funding through issuance of Certificates of Bank Credit– CCB, described in Note 11, the Company and subsidiary AUSA entered into a paid usufruct agreement in connection with 100% of the preferred shares in SPE-89 Empreendimentos Imobiliários S.A. and Alphaville Ribeirão Preto Empreendimentos Imobiliários S.A., for a period of six years, having raised R\$45,000 and R\$35,000, respectively, recorded based on effective interest method of amortization in the statement of operations. As of September 30, 2012, the total amount of dividends paid to partners who hold preferred shares was R\$13,400 and R\$8,600, respectively.

As of September 30, 2012, the provisions related to civil claims include R\$74,696 related to lawsuits in which the Company is included as successor in enforcement actions and in which the original debtor is a former shareholder of Gafisa, Cimob Companhia Imobiliária (“Cimob”), among other companies. The plaintiff understands that the Company should be liable for the debts of Cimob. Some lawsuits, amounting to R\$6,237, are backed by guarantee insurance; in addition, there are judicial deposits amounting to R\$61,157, in connection with the restriction of the usage of the Gafisa’s bank account; and there is also the restriction referring to the use of Gafisa’s treasury stock to guarantee the enforcement as well.

16. Provisions for legal claims and commitments--Continued

(a) Civil, tax and labor claims--Continued

The Company is filing appeals against all decisions, as it considers that the inclusion of Gafisa in the claims is legally unreasonable; these appeals aim at releasing amounts and obtaining the recognition that it cannot be held liable for the debt of a company that does not have any relationship with Gafisa. The final decision on the Company's appeal, however, cannot be predicted at present.

(i) The subsidiary AUSA is a party to legal and administrative claims related to Excise Tax (IPI) and State VAT (ICMS) on two imports of aircraft in 2001 and 2005, respectively, under leasing agreements without purchase option. The likelihood of loss in the ICMS case is rated by legal counsel as (i) Probable in regard to the principal and interest, and (ii) Remote in regard to the fine for noncompliance with accessory liabilities. The amount of contingency, rated by legal counsel as a probable loss, amounts to R\$12,217 and is provisioned at September 30, 2012.

(ii) As of September 30, 2012, the Company was subject to labor lawsuits, which had the most varied characteristics and at various court levels and is awaiting judgment. These claims corresponded to a total maximum risk of R\$186,261. Based on the opinion of the Company's legal counsel and the expected favorable outcome, and on the negotiation that shall be made, the provisioned amount is considered sufficient by management to cover expected losses.

As of September 30, 2012, the Company and its subsidiaries have judicially deposited the amount of R\$101,530 (R\$85,702 as of December 31, 2011) in the Company's interim financial information, and R\$130,768 (R\$108,436 as of December 31, 2011) in the consolidated interim financial information (Note 7) in connection with the aforementioned legal claims.

(iii) Environmental risk

There are various environmental laws at the federal, state and municipal levels. These environmental laws may result in delays for the Company in connection with adjustments for compliance and other costs, and impede or restrict ventures. Before acquiring a land, the Company assesses all necessary and applicable environmental issues, including the possible existence of hazardous or toxic materials, residual substance, trees, vegetation and the proximity of the land to permanent preservation areas. Therefore, before acquiring land, the Company obtains all governmental approvals, including environmental licenses and construction permits.

In addition, the environmental legislation establishes criminal, civil and administrative sanctions to individuals and legal entities for activities considered as environmental infringements or offense. The penalties include the stop of development activities, loss of tax benefits, confinement and fines.

(iv) Lawsuits in which likelihood of loss is rated as possible

In addition, as of September 30, 2012, the Company and its subsidiaries are aware of other claims and civil, labor and tax risks. According to the opinion of the legal counsel, the likelihood of loss is rated as possible, in the amount of R\$694,309 (R\$489,549 as of December 31, 2011), based on average past outcomes adjusted to current estimates, for which the Company's Management believes it is not necessary to recognize a provision for occasional losses. The change in the period was caused by the higher volume of lawsuits with smaller amounts and review of the involved amounts.

(iii) As mentioned in Note 9, the Company informs that the amount negotiated to acquire the remaining 20% interest in the capital stock of AUSA amounts to R\$359 million, which will be settled through the issuance of Gafisa (parent company) shares estimated at 70,251,551 common shares. The number of shares that shall be issued to settle this transaction is being decided at an arbitration process initiated by the non-controlling shareholders of AUSA.

(i) Risk considerations

a) *Credit risk*

The Company and its subsidiaries restrict their exposure to credit risks associated with cash and cash equivalents, investing in financial institutions considered highly rated and in short-term securities.

With regards to account receivable, the Company restricts its exposure to credit risks through sales to a broad base of customers and ongoing credit analysis. Additionally, there is no history of losses due to the existence of liens for the recovery of its products in the cases of default during the construction period. As of September 30, 2012 and December 31, 2011, there was no significant credit risk concentration associated with clients.

b) *Derivative financial instruments*

The Company adopts the policy of participating in operations involving derivative financial instruments with the objective of mitigating or eliminating currency, index and interest rate risks to its operations, when

considered necessary.

The Company holds derivative instruments to mitigate its exposure to index and interest volatility recognized at their fair value directly as part of the year income. Pursuant to its treasury policies, the Company does not own or issue derivative financial instruments other than for hedging purposes.

(i) Risk considerations --Continued

c) *Interest rate risk*

It arises from the possibility that the Company and its subsidiaries earn gains or incur losses because of fluctuations in the interest rates of its financial assets and liabilities. Aiming to mitigating this kind of risk, the Company and its subsidiaries seek to diversify funding in terms of fixed and floating rates. The interest rates on loans, financing and debentures are disclosed in Notes 11 and 12. The interest rates contracted on financial investments are disclosed in Note 4. Accounts receivable from real estate units delivered (Note 5), are subject to annual interest rate of 12%, appropriated on a pro rata basis.

d) *Liquidity risk*

The liquidity risk consists of the possibility that the Company and its subsidiaries do not have sufficient funds to meet their commitments in view of settlement terms of their rights and obligations.

To mitigate the liquidity risks, and the optimization of the weighted average cost of capital, the Company and its subsidiaries permanently monitor the indebtedness levels according to the market standards and the fulfillment of covenants provided for in loan, financing and debenture agreements, in order to guarantee that the operating-cash generation and the advance funding, when necessary, are sufficient to maintain the schedule of commitments, not posing liquidity risk to the Company or its subsidiaries (Notes 11 and 12).

The maturities of financial instruments, loans, financing, suppliers and debentures are as follows:

Fair value classification

The Company uses the following classification to determine and disclose the fair value of financial instruments by the valuation technique:

Level 1: quoted prices (without adjustments) in active markets for identical assets or liabilities;

Level 2: other techniques for which all data that may have a significant effect on the recognized fair value is observable, direct or indirectly;

Level 3: techniques that use data which has significant effect on the recognized fair value, not based on observable market data.

The classification level of fair value for financial instruments measured at fair value through profit or loss of the Company, presented in the Interim Financial Information as of September 30, 2012 and December 31, 2011:

| As of September 30, 2012 | Company | | | Consolidated | | |

(ii) Fair value of financial instruments

a) *Fair value measurement*

The following estimate fair values were determined using available market information and proper measurement methodologies. However, a considerable amount of judgment is necessary to interpret market information and estimate fair value. Accordingly, the estimates presented in this document are not necessarily indicative of amounts that the Company could realize in the current market. The use of different market assumptions and/or estimates methodology may have a significant effect on estimated fair values.

The following methods and assumptions were used in order to estimate the fair value for each financial instrument type for which the estimate of values is practicable.

(i) The amounts of cash and cash equivalents, short-term investments, accounts receivable and other receivables, suppliers, and other current liabilities approximate to their fair values, recorded in the financial statements.

(ii) The fair value of bank loans and other financial debts is estimated through future cash flows discounted using rates that are annually available for similar and outstanding debts or terms.

(c) The Company participates in the development of real estate ventures with other partners, directly or through related parties, based on the formation of condominiums and/or consortia. The management structure of these enterprises and the cash management are centralized in the lead partner of the enterprise, which manages the construction schedule and budgets. Thus, the lead partner ensures that the investments of the necessary funds are made and allocated as planned. The sources and use of resources of the venture are reflected in these balances, observing the respective interest of each investor, which are not subject to indexation or financial charges and do not have a fixed maturity date. Such transactions aim at simplifying business relations that demand the joint management of amounts reciprocally owed by the involved parties and, consequently, the control over the change of amounts reciprocally granted which offset against each other at the time the current account is closed. The average term for the development and completion of the projects in which the resources are invested is between 24 and 30 months. The Company receives a compensation for the management of these ventures.

The recognition of the provision for Company bonus for 2012 takes into consideration two metrics: (1) generation of cash from operations and (2) indebtedness ratio (net debt / equity). Accordingly, as of September 30, 2012, the Company recorded a provision for profit sharing amounting to R\$19,500 in the Company's interim financial information and R\$42,906 in the consolidated interim financial information (R\$6,425 in 2011 related to the subsidiary AUSA) under the account "general and administrative expenses" (Note 23). Of this amount, R\$10,105 refers to expenses for profit sharing of the statutory executive boards of the Company and subsidiaries Tenda and Alphaville. In 2011, the metrics used to recognize the provision for bonus were different, and these were only reached by the subsidiary AUSA.

Comments on Company's Business projections

OUTLOOK

With the introduction of the new strategy and organizational structure, Gafisa is progressing toward established guidance for the year. The implementation and development of the operating and financial plan to support the restructuring of Tenda indicates that we are on the right track. Although the direct results of these adjustments to the Tenda operation over recent quarters have been positive, the launch cycle should resume next year. Reflecting the purpose of implementing corrective actions and focusing on execution and delivery, we have not launched any residential tower products via Tenda in 2012. As a result, our official guidance for Tenda launches of R\$270-R\$330 million for 2012 has been revised down to zero for this year.

As a result, consolidated launches for 2012 are now expected to be between R\$2.4 and R\$3.0 billion, reflecting a new, more targeted regional focus and the deliberate slowdown of the Tenda business. Gafisa should represent around 55% of launches and AlphaVille 45%. In the first nine months of 2012, the Gafisa Group launched R\$1.46 billion or 53% of the mid-range of 2012 guidance of R\$1.5 billion for the segment. AlphaVille's launches were in line with the internal projections and planning, representing 56% of the guidance for the year.

As of September 30, 2012, the Company had R\$1.23 billion in cash and cash equivalents. During the 9M12 operational consolidated cash flow reached approximately R\$607 million, representing 87% of the mid point of the updated guidance established for the full year of 2012, of R\$600 – R\$800 million. The key drivers of cash flow generation include: (1) our ability to deliver and transfer/customers at Gafisa; (2) the transfer of Tenda units to financial institutions; (3) the sale of inventory and new projects launched; (4) the securitization of receivables and; (5) the sale of non-strategic land, which had a minor contribution to the results posted in the period.
