Message from Management

GOL continued its recovery in 2014. Despite the challenging economic scenario, especially after the World Cup period, the Company generated consistent results as showed in its main indicators.

Annual net revenue totaled R\$10 billion, a new Company record, led by the increase in international revenue to R\$1.2 billion and the increase in ancillary revenue, which reached R\$1.0 billion.

GOL captured 49% of domestic market growth in 2014. Domestic supply fell by 1.7%, thanks to the maintenance of the Company's flexible capacity management strategy in place since April 2012, while demand for seats (RPK) grew by 9.8%, leading to an average domestic load factor of 77.8%, a new Company record.

Annual operating income (EBIT) came to R\$505 million, virtually double the prior year's figure of R\$266 million, while the EBIT margin improved by 2 percentage points to 5%. In 4Q14, EBIT totaled R\$171 million, with a margin of 6.3%, versus 6% in 4Q13. These results reflect the continuity and consistent delivery of our "Flight Plan", launched in 2012. With this operating margin, operating cash generation was neutral, before oil hedge expenses. We closed 2014 with a cash position of R\$2.5 billion, representing 25% of last 12 months net revenues.

The year was marked by the expansion of our route network through the addition of new routes and destinations, including Santiago (Chile), direct flights to Punta Cana (Dominican Republic), and the Fortaleza-Buenos Aires (Argentina) and Viracopos-Miami (EUA) routes. In Brazil, we began flying to Caldas Novas, Altamira and Carajás, and will begin flights to Ribeirão Preto in March 2015. We added five new destinations and 44 new domestic and international routes. The expansion is aligned with two important strategies: increasing our international presence and expanding services to regional destinations. We closed 2014 with flights to 71 destinations in 11 countries.

In 2014, we also achieved the leadership in the domestic market in terms of numbers of passengers transported, which reached 37.7 million customers, 3.5 million more than the second-place airline. According to Abracorp (Brazilian Association of Corporate Travel Agencies), the Company is also a leader in the corporate segment in number of ticket sold with a market share of 31.2%.

In February, we entered into a long-term strategic partnership and commercial cooperation agreement with Air France KLM, which acquired 1.5% of GOL's total capital. In October, we also expanded our partnership with Aerolíneas Argentinas, when we began selling the airline's tickets through our sales channels. TAP, Etihad and Aeroméxico were also added as codeshare partners. We closed the year with nine codeshare partnerships, offering even more destinations to our customers and aligned with our strategy to increase our Dollar revenue.

We also concluded implementation of the GOL+ project to improve comfort onboard, increasing the distance between all seats, and assuming the leadership with the highest offer of ANAC category A seats in the domestic market. On international flights, we offer our Comfort Class product, where as well as the above-mentioned increased space, we offer a blocked middle seat and additional on-board services, bonus miles and priority access. Since February 23, 2015, the Comfort Class product was expanded to all GOL international routes.

We also concluded implementation of the GOL+ project to improve comfort onboard, increasing the distance between all seats, and assuming the leadership with the highest offer of ANAC category A seats in the domestic market. On international flights, we offer our Comfort Class product, where as well as the above-mentioned increased space, we offer a blocked middle seat and additional on-board services, bonus miles and priority access. Since February 23, 2015, the Comfort Class product was expanded to all GOL international routes.

We launched Conte Comigo (Count on Me), an exclusive service inside an airport secured area (post security screening). Unprecedented in Brazil, the project was created to provide customers with additional support in case of questions or specific needs, equipped with self-service totems, phones connected directly to the Call Center and personal service whenever necessary. Sao Paulo-Congonhas and Rio de Janeiro-Santos Dumont airports are already equipped with this service and we will be extending it to other airports throughout 2015.

Aiming to standardize and simplify our dialogue with customers, we implemented new tools and functionalities with the main objective to improve our customer care service. Informing passengers of the status of their flight by e-mail or mobile SMS, which has been available since December, is one feature of this project.

We expanded the Ganhando Asas (Gaining Wings) project to all airports where we operate in Brazil. This initiative is aimed at helping first-time fliers throughout the entire flight experience, from check-in to arrival. They all receive a commemorative badge, facilitating their identification by the Company's attendants.

Combining customer comfort and enhanced efficiency, we added even more features in our self-service channels: airport totems, mobile site, new website and a smartphone app. We also launched in 2015 a new globally innovative functionality in our GOL app – geolocation, which allows customers to receive information on how long it should take to arrive at the airport.

Also in 2014, we launched Bagagem Expressa (Express Baggage), an exclusive service in Brazil giving passengers greater autonomy, allowing for self-weighting and tagging of their baggage at the self-service totems, as well as the functionality to pay for any excess luggage with a credit card, if necessary.

Safety is an absolute priority for our business. For the fourth consecutive time, we received the IOSA (Iata Operational Safety Audit) certification, valid until 2016, which is recognized throughout the world as the standard for evaluating an airline operational safety management.

As to the financial results, the annual net loss can be mainly explained by the devaluation of the Real against the Dollar and by the decision of unwinding our oil hedge positions aiming to limit losses from sharper decreases in oil commodity prices, resulting in negative shareholders' equity. Our high liquidity and appropriate debt amortization profile, together with a liquid asset pool, created sufficient financial resilience to confront this period.

Continuing with our long-term strategy of strengthening our already recognized corporate governance practices, on January 22, 2015, we informed our shareholders of a proposed long-term structural solution to remove important regulatory restrictions on our capitalization capacity, giving us the same competitive condition as our competitors. At the extraordinary shareholders' meeting held on March 23, 2015, the proposal was approved by 99% of the votes cast. The meeting was attended by shareholders representing 81.7% of GOL's total capital stock (100% of common shares and 62.79% of preferred shares). The new structure will allow GOL, at the appropriate moment, to access capital markets for an eventual capitalization.

The macroeconomic scenario became even more challenging at the beginning of 2015. As part of our plan for this year, we will be concentrating on the domestic market and will continue to evaluate international opportunities. With the best value proposition for our customers, we will continue to prioritize the corporate segment. Our strategy for confronting this turbulence is to continue to focus on the values that have guided the Company: Safety, Intelligence, Service and Lowest Cost.

Once again, GOL would like to thank our customers for their increased loyalty, our employees and Team of Eagles for their commitment throughout the entire year, and our investors for their confidence, increasingly reinforcing our vision of being the best company to fly with, work for and invest in.

Paulo Sérgio Kakinoff

CEO of GOL Linhas Aéreas Inteligentes S.A.

Aviation Market – Industry

The **aviation industry** maintained its capacity discipline in managing **seat supply (ASK)** in 2014, with a 0.4% increase while accompanied by a 5.6% increase in **demand (RPK)** in year-over-year comparison. **Load factor increased** by 4 p.p. to 80.4%. In the quarter, industry **supply** and **demand** increased by 4.2% and 6.8%, respectively. As a result, **load factor** came to 81.2%, 2 percentage points higher than in 4Q13.

The number of **revenue passengers transported** in the **domestic market** increased by 6.6% in the year, reaching 95.9 million. In the **international market** more than 6.4 million passengers were transported, 5.7% more than in the same period in the previous year.

Domestic Market - GOL

Domestic supply in 2014 decreased by **1.7%**, in line with the Company's guidance of **reduction of between 3% and 1%**. In 4Q14, **domestic supply** increased by **1.8%** over 4Q13, reflecting GOL's substantial capacity management flexibility, allowing it to take advantage of seasonal market opportunities.

Domestic demand increased by **8.0%** in 2014 over 2013, representing 49% of the increase in total Brazilian industry demand. In 4Q14, demand increased by **7.5%** over the same period the year before.

The **domestic load factor was 78% for** the year, **7 percentage points** up on 2013, and **80%** in the fourth quarter, **4.3 percentage points** more than in 4Q13.

GOL transported **37.7 million passengers in the domestic market** in 2014, **9.1% more** than in 2013, and **10.2 million** in 4Q14, **6.6%** up on the same quarter in the previous year. In 4Q14, the total passengers transported reached **10.2 million**, an increase of **6.6%** when compared to 2013.

For the second consecutive time, GOL was **the leader in corporate passengers of tickets sold** in 2014, with a share of 31.2%, according to the Brazilian Association of Corporate Travel Agencies

(Abracorp).

International Market - GOL

International supply increased by **11%** in 2014. The Company announced several new flights during the year, including São Paulo to Santiago (Chile), Fortaleza (Ceará) to Buenos Aires (Argentina) and Campinas to Miami (EUA), as well as to Punta Cana (Dominican Republic) from Sao Paulo, Belo Horizonte (Minas Gerais) and Brasília.

International demand grew by **25.7%** in 2014, raising the load factor to **71%**, a growth of **8.3 percentage points**. In 4Q14, the load factor increased by **2.7p.pto** to **70.7%**.

GOL transported **2.1 million passengers in the international market** in 2014, **18.1% more** than in 2013, and **540 thousand** in 4Q14, a year-over-year increase of **16.6%**. The Company maintained its focus on gradually increasing its frequencies and destinations in other countries, expanding the share of foreign-currency revenue.

PRASK and Yield

In 2014, **PRASK** moved up by **11.7%** over the year before, fueled by the **7 percentage point** increase in load factor and **1.4%** increase in yield. In 4Q14, **PRASK** fell by 4% and yield by 8.8%, accompanying Brazil's challenging economic activity scenario and higher competition in the domestic aviation industry.

Independent auditor's report on financial statements

The Shareholders, Board of Directors and Officers

Gol Linhas Aéreas Inteligentes S.A.

São Paulo – SP

We have audited the accompanying individual and consolidated financial statements of Gol Linhas Aéreas Inteligentes S.A. ("Company"), identified as Company and Consolidated, respectively, which comprise the balance sheet as at December 31, 2014 and the related statement of operations, of comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting practices and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of the individual and consolidated financial statements in accordance with the accounting practices adopted in Brazil and in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Brazilian and International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance

about whether these financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the Company's financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting practices used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the individual and consolidated financial statements referred to above present fairly, in all material respects, the individual and consolidated financial position of Gol Linhas Aéreas Inteligentes S.A. as at December 31, 2014, and its individual and consolidated financial performance and cash flows for the year then ended in accordance with the accounting practices adopted in Brazil and with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

Other matters

Statements of value added

We have also audited the individual and consolidated statements of value added for the year ended December 31, 2014, prepared under the responsibility of Company's management, the presentation of which is required by Brazilian corporation law for publicly held companies, and as supplementary information under the IFRS, whereby no statement of value added presentation is required. These statements have been subject to the same auditing procedures previously described and, in our opinion, are presented fairly, in all material respects, in relation to the overall financial statements.

Audit of the financial statements for the year ended December 31, 2013

The individual and consolidated financial statements of Gol Linhas Aéreas Inteligentes S.A. for the year ended December 31, 2013 were audited by other independent auditors who expressed an unmodified opinion thereon on their report dated March 25, 2014.

1. General information

Gol Linhas Aéreas Inteligentes S.A. (“Company” or “GLAI”) is a publicly-listed company established on March 12, 2004, in accordance with the Brazilian Corporate Laws. The Company is engaged in controlling its subsidiaries: (i) VRG Linhas Aéreas S.A. (“VRG”), which essentially explores (a) the regular and non-regular flight transportation services of passengers, cargo and mailbags, domestically or internationally, according to the concessions granted by the competent authorities; and (b) complementary activities of flight transport services provided in its bylaws; and (ii) Smiles S.A., which mainly operates (a) the development and management of its own or third party’s customer loyalty program, and (b) sale of redemption rights of awards related to the loyalty program.

Additionally, the Company is the direct parent Company of the wholly-owned subsidiaries GAC Inc. (“GAC”), Gol Finance (“Finance”), Gol LuxCo S.A. (“Gol LuxCo”), Gol Dominicana Lineas Aereas SAS (“Gol Dominicana”) and indirect parent Company of Webjet Linhas Aéreas S.A. (“Webjet”).

On February 28, 2011, the subsidiary VRG constituted a Participation Account Company (“SCP BOB”) engaged in developing and operating on-board sales of food and beverages in domestic flights. On November 2014, SCP BOB was diluted, and all the operations were fully absorbed by VRG.

The Company’s shares are traded on BM&FBOVESPA and on the New York Stock Exchange (“NYSE”). The Company adopted Differentiated Corporate Governance Practices of Level 2 from BM&FBOVESPA and is included in the Special Corporate Governance Stock Index (“IGC”) and the Special Tag Along Stock Index (“ITAG”), which were created to identify companies committed to the differentiated corporate governance practices.

2. Approval and summary of significant accounting policies applied in preparing the financial statements

The financial statements were authorized for issuance at the Board of Directors' meeting held on March 26, 2015. The Company's registered Office is at Pça. Comandante Linneu Gomes, s/n, portaria 3, prédio 24, Jardim Aeroporto, São Paulo, Brazil.

2.1. Declaration of conformity

a) Consolidated financial statements

The Company's consolidated financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and interpretations issued by International Financial Reporting Interpretations Committee ("IFRIC"), settled in Brazil through Comitê de Pronunciamentos Contábeis ("CPC") and its technical accounting interpretations ("ICPC") and guidelines ("OCPC"), approved by the Brazilian Securities Commission - Comissão de Valores Mobiliários ("CVM").

b) Individual financial statements

The individual financial statements of the parent Company were prepared in accordance with accounting practices adopted in Brazil, which comprise the corporate law requirements, under law nº6,404/76 with amendments to law nº11,638/07 and law nº11,941/09, and the accounting pronouncements, interpretations and guidelines issued by CPC, approved by CVM. Until December 31, 2013, these practices were different from IFRS applicable to separate financial statements, only in related to the evaluation of investments in subsidiaries, associates and jointly controlled entities using the equity method, whereas under IFRS would be by cost or fair value.

With the issuance of the IAS 27 standard ("Separate financial statements") reviewed by IASB in 2014, the separate financial statements in accordance with IFRS were allowed to apply the equity method for valuation of investments in subsidiaries, associates and jointly controlled entities. On December, 2014, CVM issued the resolution nº733/14, which approved the Standards Review Technical Document nº07 regarding the Pronouncements CPC 18, CPC 35 and CPC 37, supporting the review on IAS 27 and allowing its adoption from the year ended December 31, 2014. Accordingly, the individual financial statements of the parent Company is in accordance with IFRS from this year.

2.2. Basis of preparation

These financial statements were prepared based on historical cost, except for certain financial assets and liabilities that are measured at fair value and investments measure through the equity method.

Except the subsidiary Gol Dominicana, which Dollar is the functional currency, all the other entities of the group hold the Real as the functional currency. The presentation currency of these financial statements is the Brazilian Real.

The summary of significant accounting policies adopted by the Company is as follows:

(*) The extensions are the entities organized for the specific purpose of continuing the headquarter operation, or yet, present rights and/or obligations in order to supply the headquarter requirements. Besides, do not hold an independent management itself and do not have autonomy on taking decisions. These entities present the consolidated assets and liabilities side by side on the individual financial statements. On this category are the VRG's offshores (South America, Caribbean and United States), which assets and liabilities are presented on the consolidated financial statements.

The accounting policies were applied consistently in all the consolidated entities and are consistent with those used in previous years. All the transactions, balances, income and expenses between the entities are fully eliminated in the consolidated financial statements.

b) Cash and cash equivalents, short-term investments and restricted cash

In this line are classified the bank deposits and short term investments with maturities of less than 90 days (or with no deadlines for redemption) which have high liquidity and are readily convertible into an amount of cash and have an insignificant risk of value changes, measured at fair value through income. Restricted cash consists on financial applications measured at fair value through profit or loss, as guarantees related to financial instruments and short and long-term financing. Financial applications include exclusive investment funds, which are fully consolidated.

c) Trade receivable

Are measured based on cost (less allowances for doubtful accounts), which approximates its fair value, due to its short-term features. The allowance for doubtful accounts is made for all accounts overdue for more than 90 days for installment sales by Voe Fácil Program, travel and cargo agencies, and 180 days for airline partners. Additionally, in some cases, the Company performs individual analysis of the receivable risks.

GOL Linhas Aéreas Inteligentes S.A.

Notes to the consolidated Financial Statements

December 31, 2014

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

d) Inventories

Inventories are composed primarily of maintenance and spare parts and materials. The costs of inventories are determined under the average cost method and include expenses incurred in their acquisition and transportation to their current location. The provision for inventory obsolescence is recorded when losses are probable.

e) Financial assets and liabilities

Initially, the Company measures financial assets and liabilities at fair value. The subsequent measurement of certain asset and liability depends on the instrument classification, which is determined at initial recognition and annually reviewed according with the Company's intentions.

Consist of non-derivate financial investments and include investments in debt instruments, accounts receivable and other receivables, short and long-term loans, other accounts payable, other debts and derivative agreements.

i. Measured at amortized cost: financial itens with fixed or ascertainable payments that are not regularly traded before maturity are registered at amortized cost based on effective interest rate method. Inflation adjustment, interest and foreign exchange changes, net of impairment losses (if applicable), are registered in statement of operations as financial revenue or expenses, when incurred. The main assets that the Company held under this category are accounts receivable, deposits in guarantee and other credits, short and long-term debts (including finance leases) and trade accounts payable.

ii. Measured at fair value or available for sale (mainly acquired to be sold on short term): interest, inflation adjustment, foreign exchange changes and changes arising from the adjustment to fair value are recognized in statement of operations, as financial income or expenses. The Company holds short-term investments classified as cash equivalents under this category.

iii. Derivatives: the Company and its subsidiaries contract derivatives financial instruments in order to hedge against fuel prices fluctuations, interest currency and interest rate. The derivatives can be or not designated as hedge accounting, and, if designated as hedge accounting, are classified as fair value hedge or cash flow hedge. At the beginning of the hedge operation, the Company and its subsidiaries document the relationship between the hedging instrument and the hedged item with the objectives of the risk management, and the operation to be designated as hedge accounting. The Company follows the international practices to account the fair value hedge (counterpart in statement of operations) and cash flow hedge (portion related to "Other comprehensive result" and ineffective portion to statement of operations under financial result).

GOL Linhas Aéreas Inteligentes S.A.

Notes to the consolidated Financial Statements

December 31, 2014

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

On financial instruments designated as cash flow hedge, the moment that the hedged item affects the profit or loss, the amounts previously registered and accumulated in equity under “Other comprehensive result” are reclassified to profit or loss, on the same group that the hedged item is registered.

iv. Derecognition and offsetting: the Company offsets a financial item only when the contractual right or obligation of the cash flow from this item expires, or when the asset is transferred and all the risks and benefits of this asset goes to a third part. If the Company neither transfers nor retains substantially all the risks and benefits of the financial item transferred, but continues to control it, recognizes its retained portion and the related liability to the amounts payable. If maintains all the risks and benefits of the financial asset transferred, the Company maintains the register of the asset. The hedge register is discontinued prospectively when the Company and its subsidiaries (i) cancel the hedge operation; (ii) the derivative matures or is sold, terminated, or exercised, or (iii) when no longer qualifies as hedge accounting. If the operation is discontinued, any gains or losses previously registered and accumulated on equity as “Other comprehensive result” until that date are registered on statement of operations as the operation is registered. When the Company expects that the hedge operation no longer occurs, the accumulated and deferred gains or losses on equity are immediately registered on the statement of operations.

f) Deposits

i. Aircraft and engine maintenance deposits: refer to payments made in U.S. Dollars by the Company to commercial lease companies to be used in future aircraft and engine maintenance work. The realization of these assets occurs substantially by the receipts of funds, according to the renegotiations with the lessors. The exchange rate variations arising from payments, net of uses for maintenance, are recognized as an expense or revenue in the financial result. Management performs regular reviews of the recovery of maintenance deposits and believes that the values reflected in the consolidated balance sheet are recoverable.

Certain lease agreements establish that when the amounts previously used in maintenance services are lower than the amounts deposited, the existing deposits are not refundable. Any excess amounts retained by the lessor upon the lease contract termination date, which are not considered material, are recognized as additional aircraft lease expense.

Additionally, the Company maintains agreements with some lessors to replace deposits by letters of credit, which can be claimed by the lessor if the aircraft maintenance does not occur as established with the scheduled review. Many of the aircraft lease agreements do not require maintenance deposits and have the letters of credit as a guarantee that the maintenance periods will be executed as scheduled. Until December 31, 2014, no letter of credit had been executed.

ii. Deposits in guarantee and collaterals for lease agreements: The deposits in guarantee and collaterals are represented by amounts deposited to lessors of the lease monthly payments, as required at the inception of the lease agreements. The deposits in guarantee and collaterals are denominated in U.S. Dollars, do not bear interest and are reimbursable to the Company upon termination of the agreements.

g) Sale-leaseback transactions

Lease payments under operating lease is recognized as an expense on a straight-line basis over the lease term in "Aircraft leasing". Future payments are not recognized in the financial statements but are future commitments undertaken are presented on Note 29a.

The gains or losses from sale-leaseback transactions classified as operating lease after the sale are recorded as below:

- Immediately in statement of operations when the transaction is measured at fair value;
- If the transaction price is established below the fair value, the profit or loss is recognized in the statement of operations, except if the loss is offset by leasing future payments established below the market value (the gains or losses are amortized proportionally as the leasing is paid during the year the asset is expected to be used);
- If the sale price is higher than the fair value of the asset, the exceed value is deferred and amortized during the year that the asset is expected to be used. The amortization of these gains is registered as a decrease of the leasing expenses.

The amount of deferred losses is registered as prepaid expenses, and the amount of deferred gains is registered as other liabilities. The breakdown between short and long-term is in accordance with the leasing agreement maturity.

h) Property, plant and equipment

The property, plant and equipment items, including rotatable parts, are recorded at acquisition or construction costs, including interest and other financial charges. Each component of property, plant and equipment that has a cost that is significant in relation to the overall cost of the item is depreciated separately. The estimated useful life for property and equipment, for depreciation purposes, is disclosed in Note 15.

The estimated market value at the end of its useful life is a premise for measuring the residual value of the Company's property, plant and equipment. Except for aircraft with purchase option at the end of the agreements, the other items have no residual value. The residual value and the useful life of assets are reviewed and adjusted, if necessary, at every year.

The carrying amount of the property, plant and equipment is analyzed in order to verify possible impairment losses when events or changes in circumstances indicate that the book amount is higher than the estimated recoverable amount.

A write-off of a fixed asset item occurs after disposal or when there is no future economic benefits resulting from continued use of the asset. Any gains or losses on fixed asset sales or write-offs are determined by the difference between the values received in the sale and the asset's book value, and are recognized in the statement of operations.

i. Pre-delivery deposits: refer to prepayments made based on the agreements entered into with Boeing Company for the purchase of Boeing 737-800 Next Generation and 737- MAX aircraft, by historical rate.

ii. Leasing agreements: assets held through financial leasing, when the risks and rewards are transferred to the Company, the asset is registered on the balance sheet. At the beginning of the leasing agreement, the Company registers the financial leasing as asset and liability at fair value, or, if lower, the present value of the minimum leasing payments.

The leased asset is depreciated over the useful life of the asset. However, when the Company does not hold the certainty that will obtain the asset property at the end of the leasing agreement, the asset is depreciated along with its expected useful life or the contractual lease term period, the lower from both.

The other engine and aircraft leaseings are classified as operating leases and are registered as expenses on the statement of operations on a straight-line basis for the agreement maturity period.

iii. Expenses due to aircraft reconfiguration: the Company registers provisions for aircraft reconfiguration based on the return requirements, considering the costs regarding the return conditions on engines held under operating leases (see Note 15). After the initial recognition, the asset is linearly depreciated over the terms of the contract.

iv. Capitalization of the costs from major maintenances: costs on major maintenance (including replacement and labor parts) are capitalized only when there is an extension of the estimated useful life of the engine. Such costs are capitalized and depreciated until the next major maintenance.

i) Intangible assets

Intangible assets are non-monetary assets without physical property, which book value is reviewed annually as to its recoverable amount, or when strong evidence of changes in circumstances indicates that the carrying amount may not be recoverable.

i. Goodwill: The goodwill value is tested annually by comparing the balance amount to fair value recoverable from the cash-generating units (VRG and Smiles). The Management performs considerable judgment to assess the impact of operating and macroeconomic changes in order to estimate the future cash flows and measure the recoverable amount of that asset. The assumptions adopted by the Company in the impairment tests are consistent with internal projections and operating plans.

ii. Airport operating rights: were acquired as part of the acquisition of VRG and of Webjet, and were capitalized at fair value at the acquisition date and are not amortized. Those rights are considered to have an indefinite useful life due to several factors and considerations, including requirements and necessary permits to operate within Brazil and limited slot availability in the most important airports in terms of traffic volume. The carrying value of these rights is evaluated annually as to its recoverable amount or in case of changes in circumstances indicates that carrying values may not be recoverable. No impairment has been recorded until the present date.

iii. Software: The costs related to the acquisition or development of computer software that is separable from an item of related hardware is capitalized separately and amortized over a period on a straight-line basis in accordance with the software agreement.

j) Income taxes

The income tax and social contribution expenses are represented by the sum of current and deferred income taxes.

i. Current taxes: the provision for income tax and social contribution is based on the years' taxable income and tax loss carryforwards. The provisions for income and social contribution taxes are calculated individually for each Company in the group based on effective rates at the end of the year.

ii. Deferred tax: is recognized on temporary differences, tax losses and negative basis at the end of every period between the balances of assets and liabilities recognized in the financial statements and tax bases used in calculation of taxable income.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that is not probable that sufficient taxable profits will be incurred to allow all or part of the deferred tax asset to be realized.

Deferred tax related to items recognized directly in equity also has its deferred tax recognized in equity and not in the income statement. Deferred tax items are recognized in accordance with the transaction that gave rise to deferred tax in other comprehensive income or directly in equity.

The tax credits from tax losses and negative basis of social contribution are registered based on the future tax profit expected from the individual Company and its subsidiaries, in accordance with legal limitations.

The forecasts of future tax profits under tax losses and negative basis of social contribution are prepared based on the business plan, and are annually reviewed and approved by the Company's Board of Directors.

k) Provisions

Provisions are recognized when the Company has a present obligation (legal or presumed) as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation.

i. Aircraft return provision: for some aircraft operating leases, the Company is contractually required to return the equipment in a predefined level of operational capability. In these cases, the Company accrues the cost of returning, since these are present obligations arising from past events that will generate future disbursements, which measurement is made with reasonable assurance. These costs are primarily related to expenses of aircraft reconfiguration (interior and exterior), obtaining licenses and certifications techniques, painting, etc. according to return agreement clauses. The estimated cost is initially recorded at present value and the consideration of the provision for aircraft return is made under "other flight equipment" of fixed assets (see note 16). After initial recognition, the asset is depreciated on a straight-line basis and liabilities updated according to the discount rate with the result shown in financial result.

GOL Linhas Aéreas Inteligentes S.A.

Notes to the consolidated Financial Statements

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

ii. Engine return provisions: are estimated based on the minimum contractual conditions that the equipment must have when returned to the lessor, considering the historical costs incurred and the conditions of the equipment at the time of evaluation. These provisions are recorded in the income statement from the time that the minimum contract requirements are reached and the next maintenance is scheduled for a date later than the date set for the return of the engine.

iii. Provisions for lawsuits: Provisions are registered for all the lawsuits that represent probable loss according to its individual assessment, considering the estimated financial expense. If the Company expects that some or all of the provision to be reimbursed, the reimbursement is registered as a separate asset. The expense related to any provision is presented in the statement of operations, net of any reimbursement.

l) Revenue recognition

The passenger revenue is recognized when air transportation services are actually provided to the passenger. Tickets sold but not yet used are recognized as advance ticket sales and correspond to deferred revenue from sold tickets to be transported in a future date, net of tickets that will expire in accordance with the Company's expectations (breakage). Breakage consists of the statistical calculation, on a historical basis, of expired tickets not utilized, i.e., passengers to be transported that have a high probability of not flying. The Company periodically records adjusted deferred revenues based on tickets which have actually expired.

In the consolidated financial statements, the revenue due to exchange of miles from the program and the flight tickets sales is only recognized when the flight transportation is provided.

Revenues from cargo shipment are recognized when transportation is provided. Other revenues include charter services, onboard sales services, tickets exchange rates, and other additional services, and are recognized when the service is provided.

m) Share-based payments

The fair value of the stock options is registered on a straight-line basis as an expense in statement of operations for the year over the vesting period, based on estimates on which options granted will become eventually vested, with a corresponding increase in shareholders' equity. The fair value of restricted shares was estimated on the date of grant of the options using the Black-Scholes model pricing. The impact of the review of the amount of stock options or restricted shares related to original estimates, if any, is prospectively recognized in statement of operations of the year, so that the cumulative expense reflects the revised estimates with a corresponding adjustment in equity under the group that registers the benefits to employees.

n) Segment information

CPC 22 and IFRS 8 – “Operating Segments” require that operations by segment are identified based on internal reports which are regularly reviewed by the Company’s management in order to allocate resources to its segments and measure its performance individually.

The Company considers that its operations hold two reportable segments, as described below:

i. Flight transportation segment: the operations are derived from its subsidiary VRG and consist in to provide air transportation services and the major assets earning revenue are its aircraft. Other revenues primarily arise from cargo, excess baggage charges and cancellation fares, all directly attributable to flight transportation services. Under this segment, the Company report the net revenue by geographic segment as described in Note 25.

ii. Smiles loyalty program: the operations in this segment are represented by mile sales transactions to airline and non-airline partners. Under this context are the program management, marketing and rights of redemption of prizes and creating and managing the database of individuals and corporations. The main cash-generating asset is its portfolio of program participants.

o) Foreign currency transactions

Transactions in foreign currencies are recorded at the exchange rate prevailing at the time that the transaction occurs. Monetary assets and liabilities denominated in foreign currencies are subsequently calculated based on the conversion using the exchange rate at the balance sheet date and differences resulting from the currency calculated based on conversion are recognized in the income statements under “exchange variation, net”.

p) Statement of value added (“DVA”)

The purpose of this statement is to disclose the wealth created by the Company and its distribution during a certain reporting period, and is presented by the Company, as required by the Brazilian Corporate Law, as an integral part of its individual financial statements, and as additional disclosure of the consolidated financial statements, since this statement is not expected nor required by IFRS.

The DVA was prepared based on information obtained in the accounting records that serve as basis for the preparation of financial statements and in accordance with the provisions of CPC 09 – Statement of Value Added. The first part of the DVA presents the wealth created by the Company, represented by revenues (gross sales revenue, including taxes levied on sales, other revenues and the effects of the allowance for doubtful accounts), inputs purchased from third parties (cost of sales and purchases of materials, power and services from third parties, including the taxes levied on purchase, the effects of impairment and recovery of assets, and depreciation and amortization) and the value added received from third parties (equity in subsidiaries, financial income and other income). The second part of the DVA presents the distribution of wealth among employees, taxes and contributions, compensation to third parties and shareholders.

q) Main accounting estimates and assumptions adopted

The elaborating process of the Financial Statements often requires that the Management adopt assumptions, judgments and estimates that may affect the application of the policies and amounts of assets and liabilities, revenues and expenses. The actual results may differ from the adopted estimates, since such use historical experience and some assumptions that are believed to be appropriate under the circumstances. The reviews of accounting estimates are recognized in the same period in which the assumptions are reviewed and the effects are recognized on a prospective basis.

The estimates and assumptions that have a significant risk of material adjustments on the accounted amounts of assets and liabilities are discussed below:

i. Impairment of financial assets: the Company estimates any impairment losses at every closing balance date, or when there are evidences that the carrying amounts may not be recoverable. Problems in repatriation or usage of financial assets in other countries are indicative for impairment tests.

ii. Impairment of non-financial assets: at the end of every year, the Company assesses if there are indications of impairment for all non-financial assets, specially property, plant and equipment and intangibles. The recoverable amounts of the cash generating unit are calculated by its value in use, based on discounted cash flow. The recoverable amount is estimated in order to measure the approximated loss amount.

iii. Income tax: The Company believes that the tax positions taken are reasonable. However, it recognizes that the authorities may question the positions taken which may result in additional liabilities for taxes and

interest. The Company recognizes provisions that involve considerable judgment of the management. The provisions are reviewed and adjusted to account for changes in circumstances, such as lapsing of applicable statutes of limitations, conclusions of tax authorities, additional exposures based on identification of new issues or court decisions affecting a particular tax issue. Actual results can differ from estimates. The analysis of the recovery of the deferred income taxes is detailed on Note 8.

iv. Breakage: As part of the process of revenue recognition, the flight tickets issued that will not be used and the miles issued that will not be redeemed are estimated and recognized as revenue at the moment of the sale and issuance, respectively. These estimates, referred to as breakage, are reviewed annually and are based on historical data of expired flight tickets and expired miles.

v. Allowance for doubtful accounts: the allowance for doubtful accounts is recorded in the amount considered sufficient by the management in order to cover possible losses on accounts receivable arising from receivables, considering the risks involved. The Company periodically evaluates its receivables and, based on historical data, combined with risk analysis per client, registers the allowance for losses.

vi. Provisions for judicial processes: provisions are recorded for all lawsuits that represent probable losses, according to the loss probability, which includes the assessment of available evidence, including the legal consultants' opinion, internal and external, the proceedings nature and past experiences. Additionally, the provisions are periodically reviewed and the management believes that the provisions recorded are sufficient, based on the probability of loss. However, significant changes in judicial decisions can have significant impacts on the Company's financial statements.

vii. Aircraft return provision: the Company estimates the provision for aircraft returns considering the costs in accordance with returns conditions agreements as set out in the return conditions, with counterpart on property, plant and equipment.

viii. Engine return provision: are calculated based on the corresponding estimate of the agreement obligation of each engine return and recorded in the statement of operations only in the period between the last maintenance and the date of return of the components.

ix. Fair value of financial instruments: when the fair value of financial assets and liabilities presented in the balance sheet can not be obtained in active markets is determined using valuation techniques, including discounted cash flow method. The data for these methods are based on market conditions, when possible; however, when this is not feasible, a certain level of judgment is required to determine the fair value. The judgment includes consideration of data used, for example, liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

r) New accounting estimates, changes and assumptions of 2014

i. New standards and interpretations issued and revised in 2014:

Standard	Application
CPC 36 (R3), CPC 45 and CPC 35 (R2)	Investment entities
CPC 39	Offsetting of financial assets
CPC 38	Derivatives renovation and continued hedge accounting
ICPC 19	Taxes

The Company's management assessed the rules and issued accounting pronouncements and/or existing standards changed from January 01, 2014 as above, and did not identify impacts of the changes made since such statements are not applicable to the Company.

ii. New standards and interpretations issued but not applicable to December 31, 2014:

Standard	Application
IFRS 9	Financial instruments
IFRS 14	Regulatory deferral accounts
IFRS 15	Revenue from contracts with customers
Amendments to IFRS 11	Joint arrangements: accounting for acquisitions of interests
Amendments to IAS 19	Defined benefit plans: employee contributions

Repatriation of the generated cash in Venezuela

On January 23, 2014, the Venezuela government announced that the airline companies could request the repatriation of their resources generated by sales in Venezuela through CADIVI ("Comisión de Administración de Divisas") by the official rate of BS 6.30/US\$1.00. This rate experienced a level increase and the rate as of December 31, 2014 was BS 12.00/US\$1.00. The exchange variation control in Venezuela is determined on a weekly basis by its Federal Reserve (SICAD).

Given this increase, the Company recorded a currency depreciation justified by the intention to repatriate its values related to the operations performed in Venezuela as of January, 2014. During the year ended December 31, 2014, the Company repatriated the amount of BS 227,220 (US\$20,226) at weighted average rate of BS 11.23/US\$1.00, equivalent to R\$47,300.

The total amount of the cash in Venezuela registered under "Cash and bank deposits" as of December 31, 2014 was BS 943,466. Cash related to 2013 sales is started at the official exchange rate of 6.3 bolivars per U.S. Dollar. Cash related to 2014 sales and repatriation requests are started using SICAD 1 at the exchange rate of 12.0 bolivars per U.S. Dollar. The portion accrued as an impairment from the Venezuelan Bolívar related to U.S. Dollar was R\$72,972 with counterpart on "Foreign exchange variation, net" (see Note 27). The net recoverable balance of R\$325,831 is recorded as "Cash and bank deposits". While the cash is available for use in Venezuela with no restriction, the Company ability to repatriate these funds has been limited due to Venezuelan government controls.

The register is subject to future changes due to the doubtful economic scenario in Venezuela, with the possibility of new limitations in the cash flows by CADIVI or sanctions by the government that may difficult the cash repatriation of the amounts.

The Company and its direct subsidiary VRG and indirect subsidiary Webjet have tax losses and negative basis of social contribution in the calculation of taxable income, to compensate with 30% of annual taxable profits, without time limit for expiration, in the following amounts:

	Individual		Direct subsidiary		Indirect subsidiary	
	(GLAI)		(VRG)		(Webjet)	
	12/31/2014	12/31/2013	12/31/2014	12/31/2013	12/31/2014	12/31/2013

Negative basis of social contribution	189,522	235,907	2,801,620	2,602,369	818,159	712,849

As of December 31, 2014, the tax credits arising from tax loss carryforwards and negative social contribution basis were valued based on the reasonably expected generation of future taxable income of the parent Company and its subsidiaries, subject to legal limitations. The forecast of future taxable income on tax losses and negative tax base of social contribution were prepared based on the business plan and approved by the Board of Directors on December 19, 2014.

The Company and its subsidiaries hold the total amount of R\$1,295,162, of which R\$64,437 is related to its parent Company GLAI and R\$1,230,725 is related to its subsidiaries VRG and Webjet.

Every year the Company performs an impairment analysis of deferred tax assets. The forecast of the parent Company presents sufficient taxable profits to be realized over future periods. For the indirect subsidiary Webjet, the forecast did not present sufficient taxable profits to be realized over future periods, and as a

result, a provision was recorded for unrealizable loss tax credits of R\$267,878 for Webjet. For the subsidiary VRG such forecasts indicate sufficient taxable profits for such to be realized in the next 10 years. However, due to tax losses presented during the recent years, the Administration conducted a sensitivity analysis on the forecast results, and considering significant changes in the macroeconomic scenario, registered the deferred tax assets on tax losses based on the lowest value obtained in this analysis. As a result, the Company and its subsidiaries did not recognized of R\$566,933 in its subsidiary VRG.

a) Escrow deposits

Deposits and blocked escrows represent guarantees of lawsuits related to tax, civil and labor claims deposited in escrow until the resolution of the related claims. Part of the blocked amount in escrow is related to civil and labor claims arising on the succession orders on claims against Varig S.A. and proceedings filed by employees that are not related to the Company or any related party (third-party claims). As the Company is not correctly classified as the defendant of these lawsuits, whenever such blockages occur, the exclusion of such is requested in order to release the resources. As of December 31, 2014 the blocked amounts regarding the Varig' succession and the third-party lawsuits are R\$85,558 and R\$66,970 respectively (R\$71,457 and R\$52,343 as of December 31, 2013, respectively).

b) Maintenance deposits

The Company and its subsidiaries VRG and Webjet made deposits in U.S. Dollars for maintenance of aircraft and engines that will be used in future events as set forth in some leasing contracts. The maintenance deposits do not exempt the Company and its subsidiaries, as lessee, neither from the contractual obligations relating to the maintenance of the aircraft nor from the risk associated with maintenance activities. The Company and its subsidiaries hold the right to select any of the maintenance service providers or to perform such services internally.

c) Deposits in guarantee for lease agreements

As required by the lease agreements, the Company and its subsidiaries hold guarantee deposits in U.S. Dollars on behalf of the leasing companies, whose full refund occurs upon the contract expiration date.

11. Transactions with related parties

a) Loan agreements - Noncurrent assets and liabilities

Parent Company

The Company maintains loan agreements, assets and liabilities, with its subsidiary VRG without interest, maturity or guarantees prescribed, as set forth below:

	Asset		Liability

The Company's Stock Options Plan had changes approved by the Company's Annual Shareholders' Meeting held on April 30, 2010. The beneficiaries of the shares are allowed to purchase the option after 3 years from the grant date, with an acquisition condition that the beneficiary maintains its employment relationship up to the end of this period.

For plans granted beginning 2010, 20% of the options become vested as from the first year, an additional 30% as from the second, and the remaining 50% as from the third year. On all the granted plans, the options may also be exercised within 10 years after the grant date.

On all the stock options, the expected volatility of the options is based on the historical volatility of 252 working days of the Company's shares traded on BM&FBOVESPA, and the fair value of the restricted shares granted was estimated on the grant date using the Black-Scholes pricing model, as follows:

SmilesThe Stock Option Plan

On February 22, 2013, the Smiles' Board of Directors, during the Extraordinary General Meeting, approved the grant of a stock options plan, and on August 08, 2013, the Company's Board of Directors approved the grant of 260,020 to employees of its affiliate VRG.

The expected volatility of Smiles shares is based on the historical volatility of 252 working days of the Bovespa index and the fair value of the shares was estimated on the grant date using the Black-Scholes option pricing model, as follows:

Stock Options Plan								
Option year	Board Meeting	Total options granted	Exercise price of the option (In Reais)	The fair value of the option at grant date (In Reais)	Estimate volatility of share price	Expected dividend	Risk-free rate of return	Length of the option (in years)
2013	08/08/2013	1,058,043	21.70	4.25 (a)	36.35%	6.96%	7.40%	10
2014	02/04/2014	1,150,000	31.28	4.90 (b)	33.25%	10.67%	9.90%	10
		2,208,043						

(a) The fair value calculated for the plan was R\$4.84, R\$4.20 and R\$3.73 for the respective periods of vesting from 2013 to 2016.

(b) The fair value calculated for the plan was R\$4.35, R\$4.63, R\$4.90, R\$5.15 and R\$5.17 for the respective periods of vesting from 2014 to 2018.

13. Investments

The investments in foreign subsidiaries, GAC, Finance and Gol LuxCo were considered as an extension of the Company and are consolidated on a line by line basis on the individual company GLAI. Accordingly, only the subsidiaries Smiles, VRG and Gol Dominicana were considered as an investment.

On February 21, 2014, the subsidiary Smiles S.A., acquired 25% of the capital of Netpoints Fidelidade S.A., with consequent dilution of this portion to 21.3% on July, 2014. The consolidated investment balance was generated by this transaction, among with the investment on SCP Trip, both registered as equity.

14. Losses per share

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. Rather, preferred stockholders are entitled to receive dividends per share in the same amount of the dividends per share paid to common stockholders. Therefore, the Company understands that, substantially, there is no difference between preferred shares and common shares, and, accordingly, basic and diluted result per share is calculated equally for both shares.

Consequently, result per share is calculated by dividing the net income or loss by the weighted average number of all classes of shares outstanding during the period. Diluted earnings or loss per share are computed including stock options granted to key management and employees using the treasury shares method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

(a) Smiles holds a Stock Options Plan for its employees. These equity instruments have a dilutive effect on earnings per share of this subsidiary, impacting, therefore, the loss considered on the basis calculation of Company's diluted result per share, in accordance with CPC 41.

(b) The weighted average considers the split of common shares approved at the Extraordinary General Meeting held on March 23, 2015, in accordance with CPC 41 (IAS 33). Earnings per share presented reflects of the economic strenght of each class of shares.

Notes to the consolidated Financial Statements

December 31, 2014

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

Diluted result per share is calculated by the weighted average number of outstanding shares, in order to assume the conversion of all potential dilutive shares. Diluted result per share is calculated based on considering the instruments that may have a potential dilutive effect in the future, such as share-based payment transactions, described in Note 12. However, due to the losses reported for the years ended on December 31, 2014 and 2013, these instruments issued have anti-dilutive effect and, therefore, are not considered in the total number of outstanding shares.

15. Property, plant and equipmentIndividual

The balance corresponds to advances for acquisition of aircraft and are related to prepayments made based on the contracts with Boeing Company to acquire 21 aircraft 737-800 Next Generation (30 aircraft as of December 31, 2013) and 109 aircraft 737-MAX (109 aircraft as of December 31, 2013) in the amount of R\$ 434,387 (R\$463,532 as of December 31, 2013) and the right to the residual value of aircraft in the amount of R\$427,300 (R\$427,300 as of December 31, 2013), both held by the subsidiary GAC.

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

On May, 2014, the provisional measure was converted to Law n. 12,973, resulting in significant changes to the previously established, along with dividends, return on own capital and investments measurement through equity. A change from provisional measure n. 627 to Law nº12,973, was the unconditional non-taxation for the profits and dividends calculated based on the results from January 01, 2008 to December 31, 2013.

In order to ensure tax neutrality established in Law n. 11,941, from 2009, since dividend payments occurred until the date of the law's publication, the Company and its subsidiary Smiles S.A.'s managements chose the early adoption of the Law through DCTF related to May, 2014. Thus, it will be guaranteed the usage of the equity measured in accordance with the Law no. 6404 from 1976, for purposes of calculating the limits as per laws related to the tax effects of interest on capital.

The Company analyzed the potential effects on the Law n. 12,973 adoption and concluded that there are no significant effects on its Financial Statements as of December 31, 2014 and December 31, 2013 on GLAI and Smiles. On VRG and Webjet, the Company will analyse the impacts of the adoption of the Law and the related effects will be registered starting as from January 01, 2015.

a) Provision for anticipated return of aircraft

In 2011, according to the strategic planning of Webjet, a provision for the anticipated return of aircraft was recorded. This provision was calculated based on the expected return of 18 aircraft Boeing 737-300 with operating lease agreements, as part of the Webjet's fleet renewal. As of December 31, 2014 the Company completed 6 aircraft return with the following prefixes: PR-WJA, PR-WJV, PR-WJB, PR-WJD, PR-WJF and PR-WJH.

b) Return of aircraft and engines

The returns provisions consider the costs that meet the contractual conditions for the return of engines maintained under operating leases, as well as the costs to reconfigure the aircraft without purchase option, as prescribed in the returns conditions of the lease contracts, and which is capitalized in fixed assets (aircraft reconfigurations/overhauling), as described in Note 15.

c) Lawsuits

As of December 31, 2014 the Company and its subsidiaries are parties to 28,738 (8,195 labor and 20,543 civil) lawsuits and administrative proceedings. The lawsuits and administrative proceedings are classified into Operation (those arising from the Company's normal course of operations), and Succession (those arising from the succession of former Varig S.A. obligations).

Under this classification, the number of proceedings is as follows:

	Operation	Succession	Total
Civil lawsuits	17,537	396	17,933
Civil proceedings	2,600	10	2,610
Labor lawsuits	4,685	3,318	8,003
Labor proceedings	190	2	192
	25,012	3,726	28,738

The civil lawsuits are primarily related to compensation claims generally related to flight delays and cancellations, baggage loss and damage. The labor claims primarily consist of discussions related to overtime, hazard pay, and wage differences.

The provisions related to civil and labor suits, whose likelihood of loss is assessed as probable are as follows:

	12/31/2014	12/31/2013
Civil	55,097	66,294
Labor	46,996	51,271
	102,093	117,565

Provisions are reviewed based on the progress of the proceedings and history of losses based on the best current estimate for labor and civil lawsuits.

There are other civil and labor lawsuits assessed by management and its legal counsel as possible risks, in the estimated amount as of December 31, 2014 of R\$15,786 for civil claims and R\$2,341 for labor claims (R\$13,226 and R\$3,929 as of December 31, 2013 respectively), for which no provisions are recognized.

The tax lawsuits below were evaluated by the Company's management and its legal consultants as being relevant and with probable risk as of December 31, 2014:

- GLAI is discussing the non-incidence of taxation of PIS and COFINS on revenues generated by the interest on capital in the amount of R\$37,750, related to the years from 2006 to 2008, paid by its subsidiary GTA Transportes Aéreos S.A., succeeded by VRG on September 25, 2008. According to the opinion of the Company's legal counsel and based on the jurisprudence occurred in recent events, the Company classified this case as possible loss, without a provision registered for the related amount. Additionally, the Company maintains a letter of credit with Bic Banco with a partial guarantee on the lawsuit value of R\$21,579 as disclosed in Note 5.

- Tax on Services (ISS), the amount of R\$16,470 arising from assessment notices issued by the Prefeitura do Município de São Paulo against the Company, in the period from January, 2007 to December, 2010 regarding a possible ISS taxation on partners agreements. The classification of the possible risk stems from the matters under discussion and are interpretative, and involves discussions of factual and evidential materials, and has no final positioning of the Superior Courts.
- Customs Penalty in the amount of R\$33,956 relating to assessment notices issued against the Company for alleged breach of customs rules regarding procedures for temporary import of aircraft. The classification of possible risk is a result of the absence of a final positioning of the Superior Courts.
- BSSF goodwill (BSSF Air Holdings), in the amount of R\$43,246 related to Infraction notices due to the deductibility of the goodwill allocated to future profitability. The classification of possible risk is a result of the absence of a final positioning of the Superior Courts.
- VRG's goodwill in the amount of R\$17,894 resulted from summons of violation related to the deductibility of the goodwill classified as future payment. The classification of probable risk arises from the absence of a final opinion from the Superior Courts.

There are other lawsuits considered by the Company's management and its legal counsel as possible risk, in the estimated amount of R\$27,538 which added to the lawsuits mentioned above, amount to R\$176,854 as of December 31, 2014.

The Company and its subsidiaries are challenging in the court the ICMS levied on aircraft and engines imported under aircraft lease transactions without purchase options in transactions carried out with lessors' registered in foreign countries. The Company and its subsidiaries' management understand that these transactions represent simple leases in view of the contractual obligation to return the assets that are the subject matter of the contract.

The Management believes that there is no evidence of goods circulation and so, there are no legal events to generate the ICMS taxation. Based on the legal counsel opinion and supported by similar lawsuits with favorable decisions to taxpayers by the Superior Court of Justice (STJ) and Supreme Federal Court (STF) in the second quarter of 2007, the Company understands that the likelihood of loss is remote, and thus did not recognize provisions for these amounts. As of December 31, 2014 the estimated aggregated amount of the ongoing lawsuits related to the non-levy of ICMS tax on said imports is R\$243,293 (R\$229,450 as of December 31, 2013) adjusted for inflation, not including late payment charges. On September 11, 2014, the Federal Supreme Court (STF) granted the lawsuit declaring the non-levy of ICMS on imports of merchandise under financial leasing.

28. Operating segment

Operating segments are defined as business activities from which it may earn revenues and incur expenses, which operating results are regularly reviewed by the relevant decision makers to evaluate performance and allocate resources to the segments. The Company holds two operating segments: the airline industry and the loyalty program. For more details, see Note 2.2n.

The accounting policies of the operating segments are the same as those applied to the consolidated financial statements. Additionally, the Company has distinct natures between the two reportable segments, which prevent any form of cost allocation, so there are no common costs and revenues between operating segments.

The Company is the majority shareholder of the subsidiary Smiles, being the non-controlling portion on its capital of 45.7% and 42.7% as of December 31, 2014 and 2013, respectively.

The information below presents the summarized financial position related to reportable segments for the years ended December 31, 2014 and 2013:

In the individual Financial Statements of the subsidiary Smiles, which represents the segment Smiles Loyalty Program and in the information provided to the relevant decision makers, the revenue recognition occurs upon redemption of the miles by the participants. Under this perspective, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to its suppliers the obligation to provide services or deliver products to its customers.

However, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the consolidated assets, liabilities and results, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, besides eliminations entries, consolidating adjustments to adjust the accounting practices related to Smiles' revenues. In this case, under the perspective of the consolidated financial statements, the miles that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

29. Commitments

As of December 31, 2014 the Company holds 130 firm orders for aircraft acquisitions with Boeing. These aircraft acquisition commitments include estimates for contractual price increases during the construction phase. The approximate amount of firm orders, not including the contractual discounts, is R\$39,441,845 (corresponding to US\$14,848,974 at the reporting date) and are segregated according to the following years:

	12/31/2014	12/31/2013
2014	-	1,764,882
2015	1,323,818	1,167,524
2016	1,385,110	1,221,579
2017	2,132,740	1,880,941
2018	1,456,740	1,284,752
Beyond 2018	33,143,437	29,230,410
	39,441,845	36,550,088

As of December 31, 2014, from the total orders mentioned above, the Company holds the amount of R\$5,292,882 (corresponding to US\$1,992,882 at the reporting date) related to advances for aircraft acquisition, to be disbursed in accordance with the following schedule:

	12/31/2014	12/31/2013
2014	-	163,368
2015	289,945	255,714

Beyond 2018	3,929,699	3,465,745
	5,292,882	4,831,355

The installment financed by long-term debt with aircraft guarantee through the U.S. Ex-Im Bank corresponds approximately to 85% of the aircraft total cost. Other establishments finance the acquisitions with equal or higher percentages, reaching up to 100%.

The Company performs payments related to aircraft acquisition through its own funds, short and long-term debt, cash provided by operating activities, short and medium-term line of credit and supplier financing.

The Company leases its entire aircraft fleet through a combination of operational and financial leases. As of December 31, 2014, the total fleet leased was comprised of 141 aircraft, excluding 3 aircraft from Webjet's fleet, of which 96 were under operating leases and 45 were recorded as financial leases. The Company holds 40 aircraft under financial leasing with purchase option. During the year ended December 31, 2014, the Company received 9 aircraft under operating lease contracts and completed the return of 8 aircraft under operating lease and 1 return under financial lease.

Additionally, during the year ended on December 31, 2014, the Company recorded a gain of R\$81,224 resulting from 9 aircraft received during the year (R\$126,084 related to 15 aircraft received during the year ended December 31, 2013) that were used as sale-leaseback transactions and resulted in operating leases. Given that the gains and losses from sale-leaseback transactions will not be offset against future lease payments and were negotiated at fair value, such gain was recognized directly in profit or loss.

30. Financial instruments and risks management

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks related to the Company operations. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks can be mitigated by using exchange swap derivatives, futures and options contracts based on oil, U.S. Dollar and interest markets. The contracts may be held by means of exclusive investment funds, as described in the Risk Management Policy of the Company.

Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee (CPR), and approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains or losses on these transactions and the application of risk management controls are part of the Committee's monitoring and have been satisfactory when considering the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available in the market and according to valuation methodologies.

Most of the derivative financial instruments are engaged with the purpose of hedging against fuel and exchange rates risks based on scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments contracted, can presents ineffective positions for hedge accounting purposes upon settlement, which are presented in the tables below.

The description of the consolidated account balances and the categories of financial instruments included in the balance sheet as of December 31, 2014 and 2013 is as follows:

As of December 31, 2014 the Company had no financial assets available for sale.

Risks

The operating activities expose the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks. These risks are originated by, essentially, leasing agreements of aircraft purchase.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least yearly in compliance with the strategies determined in the Risk Policies Committees. The relevant information on the main risks affecting the Company's and its subsidiaries' operation is as follows:

GOL Linhas Aéreas Inteligentes S.A.

Notes to the consolidated Financial Statements

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

a) *Fuel price risk*

As of December 31, 2014, fuel expenses accounted for 40.7% of the costs and operating expenses of the Company. The aircraft fuel price fluctuates both in the short and in the long term, in line with crude oil and oil byproduct price fluctuations.

To mitigate the risk of fuel price, the Company holds derivative financial instruments referenced mainly to crude oil and, eventually, to their derivatives, also contracted, directly with the local supplier, are future fuel deliveries to aircraft at predetermined prices.

As of December 31, 2014, there are no open transactions of derivatives instruments of fuel price variation hedge.

b) *Exchange rate risk*

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated trade accounts payable, leasing provision and leases and financing.

The Company's revenues are mainly denominated in Brazilian Reais, except for a small portion in U.S. Dollar, Argentinean pesos, Bolivian bolivianos, Chilean peso, Colombian peso, Paraguay Guarani, Uruguayan peso, Venezuela bolivar etc.

To mitigate the risk of exchange rate, the Company holds derivative financial instruments that are referenced to the U.S. Dollar.

c) *Interest rate risk*

The Company and its subsidiaries are exposed to fluctuations in domestic and foreign interest rates, substantially the CDI and Libor, respectively. The highest exposure is related to lease transactions, of which the installments to be paid are indexed to the Libor after date that the aircraft are delivered. Another relevant exposure is the local investments and debts indexed to the CDI rate.

To mitigate the interest rate risk the Company holds swap derivatives.

d) *Credit risk*

The credit risk is inherent in the Company's operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, and short-term investments.

The trade receivable credit risk consists of amounts falling due from the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

As defined in the Risk Management Policy, the Company is required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are contracted with counterparties rated at least as investment grade by S&P and Moody's. The financial instruments are mostly contracted on

commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigate the credit risk, derivative transactions contracted on the OTC market (OTC) have counterparts with a minimum rating of "investment grade". The Company's Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

e) *Liquidity risk*

Liquidity risk takes on two distinct forms: market and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the agreed dates.

GOL Linhas Aéreas Inteligentes S.A.

Notes to the consolidated Financial Statements

December 31, 2014

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

As a way of managing the liquidity risk, the Company invests its funds in liquid assets (governmental bonds, CDBs, and investment funds with daily liquidity), and the Cash Management Policy establishes that the Company's and its subsidiaries' weighted average debt maturity should be higher than the weighted average maturity of the investment portfolio. As of December 31, 2014, the weighted average maturity of the Company's financial assets was 20 days and of financial debt, excluding perpetual bonds, was 4.3 years.

(*) Classified as "Rights with derivative operations" if the amount results in an asset or "Obligation with derivative operations" if the amount results in a liability. Includes R\$10,328 of assets related to hedges held in an exclusive fund.

The Company adopts the hedge accounting. The derivatives contracted to hedge interest rate risk and fuel price risk are classified as "cash flow hedge", according to the parameters described in CPC 38.

Classification of derivatives financial instrumentsi) *Cash flow hedges*

The Company and its subsidiaries use cash flow hedges to hedge against future revenue or expense fluctuations resulting from changes in the exchange rates, interest rates or fuel price, and accounts for actual fluctuations of the fair value of derivative financial instruments in stockholders' equity until the hedged revenue or expense is recognized.

The Company estimates the effectiveness based on statistical correlation methods and the ratio between gains and losses on the financial instruments used as hedge, and the cost and expense fluctuation of the hedged items. The instruments are considered as effective when the fluctuation in the value of derivatives offsets between 80 % to 125% the impact of the price fluctuation on the cost or expense of the hedged item.

The balance of the actual fluctuations in the fair values of the derivatives designated as cash flow hedges is transferred from stockholders' equity to profit or loss for the period in which the hedged costs or expenses impacts profit or loss. Gains or losses on effective cash flow hedges are recorded in balancing accounts of the hedged expenses, by reducing or increasing the operating cost, and the ineffective gains or losses are recognized as financial income or financial expenses for the year.

ii) *Derivative financial instruments not designated as hedge*

GOL Linhas Aéreas Inteligentes S.A.

Notes to the consolidated Financial Statements

December 31, 2014

(In thousands of Brazilian Reais - R\$, except when indicated otherwise)

The Company holds derivative financial instruments that are not formally designated for hedge accounting. This occurs when transactions are in the short term and the control and disclosure complexity.

iii) *Derivative equity instruments*

In April 2013, the Company entered into an investment agreement with General Atlantic Service Company LLC. ("G.A.") that established the grant by the Company of an option to purchase its Smiles shares enabling the secondary acquisition by G.A. (or other person designated by it), of Smiles S.A. shares held by the Company. These stock options were exercised on February 27, 2014 and, during the year ended December 31, 2014, the Company registered a loss in derivative instruments on the financial result in the amount of R\$15,901 related to the derivative market pricing. As of December 31, 2014, the Company performed a reversal of this derivative obligation to the equity in the amount of R\$46,216.

Hedge activities

a) *Fuel hedge*

Due to the low liquidity of jet fuel derivatives traded in commodities exchanges, the Company and its subsidiaries contracts crude oil derivatives (WTI, Brent) and its byproducts (Heating Oil) to hedge against fluctuations in jet fuel prices. Historically, oil prices are highly correlated with aircraft fuel prices.

As of December 31, 2014, the Company and its subsidiaries does not have contracts designated as cash flow hedge accounting of fuel.

The gains and losses from the derivative contracts for the years ended December 31, 2014 and 2013 are summarized below:

Sensitivity analysis of derivative financial instruments

The sensitivity analysis of financial instruments was prepared according to CVM Instruction 475/08, in order to estimate the impact on the fair value of financial instruments operated by the Company, considering three scenarios considered in the risk variable: most likely scenario, the assessment of the Company; deterioration of 25% (possible adverse scenario) in the risk variable, deterioration 50% (remote adverse scenario).

The estimates presented, since they are based on simple statistics, do not necessarily reflect the amounts to be reported in the next financial statements. The use of different methodologies and/ or assumptions may have a material effect on the estimates presented.

The tables below show the sensitivity analysis for market risks and financial instruments considered relevant by management, open position as of December 31, 2014 and based on the scenarios described above.

The probable scenario of the Company is the maintaining of the market rates.

In the tables, positive values are displayed as asset exposures (assets higher than liabilities) and negative values are exposed liabilities (liabilities higher than assets).

Individual

i) *Foreign exchange risk*

As of December 31, 2014, the Company has a currency exposure of R\$1,848,334 (see Note 30b). On this date, the exchange rate adopted was R\$2.6562/US\$, corresponding to the closing rate of the month published by Banco Central do Brasil as a likely scenario, and the impacts analyzed from the variation of 25% and 50% over the current rate are shown below:

III) *Interest risk factor*

As of December 31, 2014, the Company holds financial investments and financial liabilities indexed to several rates, and Libor interest.

In the sensitivity analysis of non-derivative financial instruments it was considered the impacts on yearly interest of the exposed values as of December 31, 2014 (see Note 17), arising from fluctuations in interest rates according to the scenarios presented below:

Instruments	Risk	Exposed amount	Probable Scenario	Possible Adverse Scenario	Adverse Scenario Remote
				25%	50%
Financial investments -					
Short and Long-term debt, net (*)	Increase in the CDI rate	(200,334)	(22,078)	(44,155)	(200,334)
Derivative	Decrease in the Libor rate	(81,672)	(78,121)	(153,459)	(81,672)

(*) Refers to the sum of the values invested and raised in the market and indexed to CDI, the negative amounts means more debt than application.

Measurement of the fair value of financial instruments

In order to comply with the disclosure requirements for financial instruments measured at fair value, the Company and its subsidiaries must classify its instruments in Levels 1 to 3, based on observable fair value levels:

- a) Level 1: Fair value measurements are calculated based on quoted prices (without adjustment) in active market or identical liabilities;
- b) Level 2: Fair value measurements are calculated based on other variables besides quoted prices included in Level 1, that are observable for the asset or liability directly (such as prices) or indirectly (derived from prices); and
- c) Level 3: Fair value measurements are calculated based on valuation methods that include the asset or liability but that are not based on observable market variables (unobservable inputs).

The following table shows a summary of the Company's and its subsidiaries' financial instruments measured at fair value, including their related classifications of the valuation method, as of December 31, 2014 and 2013:
