Global economic activity is showing gradual signs of a recovery. The U.S. economy continues to grow moderately, while most of the European countries managed to reverse in 2014, the shrinkage of recent years. The emerging economies, however, have been presenting a slower growth pace.

The global Purchasing Managers Index (PMI) closed March at 53.5 points. The IMF expects global GDP growth of 3.5% this year and 3.7% in 2016.

USA

The U.S. activity indicators are pointing to a moderate economic growth. GDP growth of 0.2% in 1Q15 was negatively impacted by the rigorous winter and port strikes on the west coast, which jeopardized exports. The FED estimates 2015 GDP growth of between 2.3% and 2.7%.

Although industrial production fell by 0.6% in March over February, the 12-month figure moved up by 2.0%, with installed capacity use of 78.4%.

Unemployment fell to 5.5% in March, 1.1 p.p. down on the same month last year and within the 5.2% to 5.5% band considered by most of the FOMC (the FED's Monetary Policy Committee) to be full employment.

In the 12 months through March, the Consumer Price Index dipped by 0.2%, well below the FOMC's target of 2% p.a.

Given this scenario, at its last meeting in April the FOMC deemed it appropriate to maintain interest rates at between 0 and 0.25% until the labor market improves and inflation

converges towards the 2% p.a. target.

Europe

The Eurozone is showing signs of a recovery in activity, with the adoption of an expansionist monetary policy by the ECB. The block's compound PMI reached 54.0 points in March 2015, versus 53.3 points in February, while industrial production increased by 1.1% in February over previous month.

According to Eurostat, unemployment rate was 11.3% in March 2015, flat over the previous month, but below the 11.7% recorded in March of last year. Of the member nations, Germany posted the lowest rate, with 4.7%, while Greece and Spain had the highest, with 25.7% and 23%, respectively.

Also according to Eurostat, retail sales fell by 0.2% in February 2015 over January but moved up by 3% year-on-year.

In the UK, manufacturing PMI closed March at 54.4 points, the highest figure for the last eight months. According to the British Treasury, the consensus of estimates points to GDP growth of 2.7% in 2015. The consumer price index edged up by 0.3% in 1Q15 over 1Q14.

Asia

China has been showing signs of a slowdown in growth. Preliminary figures from the Chinese Bureau of Statistics indicate GDP expansion of 7.0% in 1Q15, versus 7.4% in 1Q14, but still within the target defined by the government. Manufacturing PMI, disclosed by HSBC, has been signaling a deterioration in economic conditions since December 2014 and closed March at 49.6 points.

The growth rate of Investments in fixed assets fell from 17.6% in 1Q14 to 13.5% in 1Q15, while industrial production growth of 5.6% in the 12 months through March 2015 was below the average of 7.9% recorded in the previous 12 months.

The deceleration in the construction industry was even more apparent. According to the National Bureau of Statistics, sector investments increased by 8.5% in 1Q15, close to half the 16.8% recorded in 1Q14.

Given this scenario, the Chinese government once again reduced the reserve requirements rate by 1 p.p. and further monetary and fiscal stimuli are expected ahead.

Japan continued to stage a moderate recovery. Manufacturing PMI fell to 50.3 points in March 2015 from 51.6 points in the previous month, while retail sales declined from 1.3% in January 2015 over December 2014. Despite the government measures to stimulate the economy, inflation remained below the target of 2% p.a. determined by the Japanese Central Bank, whose Monetary Policy Committee estimates GDP growth of between 1.5% and 2.1% in 2015.

Brazil

Against a background of political uncertainty, Brazil's economy slowed, accompanied by increased inflation, higher interest rates and the depreciation of the currency.

GDP in 2014 remained virtually flat over the previous year, while in the 12 months through February 2015, the seasonally-adjusted Central Bank Economic Activity Index (IBC-Br) fell by 0.6%.

According to a survey by the CNI (National Confederation of Industry), industrial production fell in March, with the index closing at 48.2 points, under 50 points.

The Central Bank's FOCUS report estimates GDP shrinkage of 1.18% in 2015, followed by growth of 1.0% in 2016.

Inflation measured by the IPCA consumer price index increased by 1.32% in March, giving 8.13% in 12 months, above the ceiling of the inflationary target defined by the Monetary Policy Committee (COPOM). As a result, the COPOM has been maintaining a restrictive monetary policy, raising the Selic benchmark interest rate by 0.5 p.p. to 13.25% p.a. at its last meeting in April. The FOCUS report expects 2015 inflation of 8.26%, with a Selic of 13.50% at

year-end.

On the foreign exchange front, the dollar appreciated by 20.8% against the real in 1Q15, closing March at R\$3.208.

Consolidated net revenue totaled R\$4,010 million in 1Q15, 5.0% up on the previous quarter, chiefly due to higher net revenue from the steel segment, which offset the reduction in revenue from the mining segment.

In 1Q15, consolidated COGS came to R\$3,025 million, 4% more than in 4Q14, mainly due to lower steel product sales volume.

Gross profit totaled R\$985 million in 1Q15, 7% up on the previous three months, primarily due to the gross profit from the steel segment.

SG&A expenses totaled R\$411 million in 1Q15, 9% down on the R\$450 million recorded in 4Q14, mainly due to lower expenses with iron ore freight, given the Company's sales strategy.

Other Operating Expenses (Revenues) amounted to R\$214 million in 1Q15, 28% less than the R\$295 million posted in quarter before, basically due to the non-recurring negative impact of R\$133 million in 4Q14, related to the reclassification of accrued losses from investments in shares recorded as available for sale, partially offset by the addition of tax provisions of R\$34 million in 1Q15.

The Company uses Adjusted EBITDA to measure the segments' performance and operating cash flow capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, results from investees and other operating revenue (expenses).

Adjusted EBITDA includes the Company's proportional interest in Namisa, MRS Logística and CBSI.

Adjusted EBITDA totaled R\$911 million in 1Q15, 10% down on 4Q14, basically due to the EBITDA from the steel and mining segments. The adjusted EBITDA margin EBITDA came to 22%, 3 p.p. down on the previous quarter.

The 1Q15 equity result totaled R\$398 million, 62%, or R\$152 million more than in 4Q14, essentially due to the positive result from the joint controlled entity, Namisa.

The 1Q15 net financial result was negative by R\$870 million, chiefly due to the following factors:

- Interest on loans and financing totaling R\$803 million;
- Expenses of R\$11 million with the monetary restatement of tax installments;
- Other financial expenses totaling R\$47 million;
- Monetary and exchange variations amounting to R\$65 million;

These negative effects were partially offset by consolidated financial revenues of R\$56 million.

Gross debt, net debt and the net debt/EBITDA ratio presented below reflect the Company's proportional interest in Namisa, MRS Logística and CBSI, as well as the impact from the partial spin-off of Transnordestina Logística S/A.

On March 31, 2015, consolidated net debt came to R\$20.0 billion, R\$1.1 billion more than the R\$18.9 billion recorded at the end of 4Q14, mainly due to:

**CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL

**Version:

- Dividend payments of R\$0.5 billion;
- Investments of R\$0.4 billion in fixed assets;
- A R\$0.7 billion effect related to the cost of debt;
- Net foreign exchange variation of R\$0.4 billion.

These effects were partially offset by 1Q15 EBITDA of R\$0.9 billion.

The net debt/EBITDA ratio based on LTM adjusted EBITDA closed the first quarter at 4.8x, 0.8x up on the ratio recorded at the end of the previous quarter.

CSN posted consolidated net income of R\$392 million in 1Q15, R\$325 million higher than in 4Q14, primarily due to the upturn in gross profit, reduced operating expenses, the improved equity result and the timing difference between the tax and accounting treatment of the foreign exchange variation.

Investments reflect the Company's proportional interest in Namisa, MRS Logística and CBSI. The Company has ceased consolidating its interest in Transnordestina Logística S/A, due to the latter's partial spin-off at the end of 2013, and the consequent entry into effect of the new shareholders' agreement.

CSN invested R\$407 million in 1Q15, allocated as follows:

- ü Mining: R\$123 million;
- ü Steel: R\$121 million;
- ü Cement: R\$90 million;
- ü Logistics: R\$73 million.

At the close of 1Q15, working capital allocated to the Company's businesses totaled R\$2.65 billion, very close to the end-of-2014 figure, given that the increase in accounts receivable and the reduction in the suppliers line were virtually offset by the reduction in inventories, due to the sending of finished products to the subsidiaries abroad and the upturn in taxes payable. The inventory turnover period narrowed by 11 days, offsetting the 5-day increase in the average receivables period and the 6-day reduction in the average supplier payment period.

Scenario

According to the World Steel Association (WSA), global crude steel production totaled 400 million tonnes in 1Q15, 1.8% less than in the same period last year, with China, responsible for 200 million tonnes, recording a 1.7% downturn. Existing global capacity use fell by 1 p.p. in March/2015 over the close of 2014 to 71.6%.

The WSA expects apparent steel consumption to edge up by 0.5% worldwide in 2015 and dip by 0.5% in China.

According to the Brazilian Steel Institute (IABr), domestic crude steel production came to 8.4 million tonnes in 1Q15, 0.7% up on 1Q14, while rolled flat output totaled 6.6 million tonnes, up by 4.4% in the same period last year.

Apparent domestic steel product consumption amounted to 6.1 million tonnes in 1Q15, 2.7% less than in 1Q14, while sales of rolled flat and long steel, both produced in the country totaled 5.1 million tonnes, down by 5.1% over 1Q14.

On the other hand, imports of long and flat steel came to 1.0 million tonnes in 1Q15, 13% more than in 1Q14, while exports climbed by 39% to 2.8 million tonnes.

The IABr estimates domestic sales of 19.1 million tonnes, 8% less than in 2014, accompanied by a 8% decline in apparent consumption to 22.7 million tonnes. On the other hand, imports are expected to fall by 6% to 3.6 million tonnes, with exports increasing by 38% to 13.5 million tonnes.

Automotive

According to ANFAVEA (the Auto Manufacturers' Association), vehicle production totaled 663,000 units in 1Q15, 16% down on 1Q14, while domestic sales in 1Q15 came to 674,000 units, down by 17% in the same period last year, reflecting the slowdown in domestic economic activity. Also according to ANFAVEA, exports amounted to 79,000 units in 1Q15, up by 6% over the same quarter last year.

FENABRAVE (the Vehicle Distributors' Association), on the other hand, estimated a 15% year-on-year reduction in sales in 1Q15, led by the truck segment with a decline of 36%.

ANFAVEA expects vehicle production and sales to fall by 10% and 13%, respectively, in 2015, accompanied by a 1% upturn in exports.

Construction

According to SECOVI (the São Paulo Residential Builders' Association), new residential real estate launches in the city of São Paulo totaled 1,418 units in the first two months of 2015, 4.8% up on the 1,353 units recorded in the same period last year. In the 12 months through February 2015, however, there was a 1% year-on-year reduction to 31,679 units.

According to ABRAMAT (the Construction Material Manufacturers' Association), domestic sales of building materials fell by 8.8% in 1Q15 over 1Q14, reflecting reduced building activity in the real estate and infrastructure areas. The Association expects sales to inch up by 1% in 2015.

Home Appliances

Production by the home appliance industry fell by 10% in the first two months of 2015 over the same period the year before, due to the reduced pace of economic activity.

Eletros (the Home Appliance and Consumer Electronics Manufacturers' Association) expects a 15% decline in the sale of stoves, automatic washing machines and refrigerators in 1Q15.

Distribution

According to INDA (the Brazilian Steel Distributors' Association), flat steel purchases by distributors in 1Q15 totaled 1.0 million tonnes, 6.1% down year-on-year.

Domestic sales by the associated network came to 982,000 tonnes, 16% less than in 1Q14. On the other hand, inventories closed March at 1.1 million tonnes, 1.8% up on the previous month and representing 3.2 months of sales.

INDA expects domestic flat steel sales by distributors to fall by 5% in 2015.

Sales Volume

CSN sold 1.4 million tonnes of steel in 1Q15, 12% up on 4Q14. Of this total, 63% went to the domestic market, 34% were sold by overseas subsidiaries and 3% went to exports.

Domestic Sales Volume

Domestic steel sales totaled 881,000 tonnes in 1Q15, 2% more than in 4Q14.

Foreign Sales Volume

Foreign steel sales amounted to 526,000 tonnes in 1Q15, 36% up on the previous three months. Of this total, the overseas subsidiaries sold 476,000 tonnes, 212,000 tonnes of which by SWT, 84,000 tonnes by Lusosider and 180,000 tonnes by LLC, continuing with the Company's strategy begun in 4Q14 of increasing its sales abroad. Direct exports came to 50,000 tonnes in 1Q15.

Prices

Net revenue per tonne averaged R\$2,162 in 1Q15, 1% higher than the 4Q14 average.

Net Revenue

Net revenue from steel operations totaled R\$3,123 million, a 14% improvement over 4Q14, chiefly due to the upturn in sales volume.

Cost of Goods Sold (COGS)

Steel segment COGS came to R\$2,366 million in 1Q15, 17% up on the previous quarter, also mainly due to the increase in sales volume.

Adjusted EBITDA

Adjusted steel segment EBITDA totaled R\$683 million in 1Q15, with an adjusted EBITDA margin of 22%.

Production (Parent Company)

The Presidente Vargas Steelworks (UPV) produced 1.1 million tonnes of crude steel in 1Q15, 5% more than in 4Q14, while consumption of slabs purchased from third parties fell by 29% to 69,000 tonnes.

Production of rolled steel came to 1.0 million tonnes, virtually flat over the previous quarter.

Production Costs (Parent Company)

In 1Q15, the Presidente Vargas Steelworks' total production costs came to R\$1.55 billion, 3% up on 4Q14, chiefly due the R\$84 million rise in expenses with reducing agents as a result of the devaluation of the real, and higher consumption of imported coke due to the revamp of the coke plants, partially offset by the R\$42 million reduction in depreciation expenses as a result of the revision of the working life of fixed assets carried out at the end of 2014.

STEEL PRODUCTION COSTS (Parent Company)

Scenario

In 1Q15, prices in the seaborne iron ore market continued to fall, reaching their lowest levels since the index was created in mid-2008. On the supply side, high output from the main Australian mining companies and the resilience of the high-cost producers were chiefly responsible for the decline. On the demand side, the slowdown on the real estate sector and the reduced pace of industrial activity in China jeopardized local demand for steel, limiting

steel production and iron ore consumption growth.

Given this scenario, the Platts Fe62% CFR China index averaged US\$62.40/dmt in 1Q15, 16% down on the 4Q14 average. The iron ore quality premium varied between US\$1.10/dmt and US\$1.30/dmt per 1% of Fe content, while freight costs on the Tubarão/Qingdao route fell by a hefty 44% over 4Q14, averaging US\$10.56/wmt.

Considering the significant drop in seaborne iron ore prices , CSN is focused on several measures to reduce its production costs , including extraction and processing of seaborne iron ore and port and freight costs, to remain among the most competitive mining companies of the world.

Brazil exported 79 million tonnes of iron ore in the first quarter, 17% down on 4Q14.

Iron Ore Sales

Iron ore sales totaled 5.4 million tonnes¹ in 1Q15, 28% less than in the previous quarter, given the optimization of the product mix. Of this total, 4.8 million tonnes came from Casa de Pedra mine and 0.6 million tonnes from Namisa¹. The Tecar terminal shipped 6.3 million tonnes, while own consumption came to 1.4 million tonnes.

¹ Sales volumes include 100% of the stake in NAMISA.

Net Revenue

Net revenue from mining operations came to R\$658 million in 1Q15, 21% down on the quarter before, due to the decline in international iron ore prices and the reduction in sales volume, partially offset by the devaluation of the real and improvement in the product mix.

Cost of Goods Sold (COGS)

Mining COGS totaled R\$567 million in 1Q15, 23% less than in 4Q14 due to the cost reduction programs implemented by the Company, lower costs with iron ore purchases from third-parties, and the reduction in sales volume.

Adjusted EBITDA

Adjusted first-quarter EBITDA came to R\$156 million, 22% down on 4Q14, with an adjusted EBITDA margin of 24%, identical to the previous quarter's figure.

Scenario

Port Logistics

According to ANTAQ (National Waterway Transport Agency), Brazil's port installations handled

around 969 million tonnes in 2014, 4.3% up on the year before. Bulk solids totaled 590 million tonnes and containers came to 9.3 million TEUs¹, 3.7% and 4.7% more, respectively, than in 2013.

¹ TEU (Twenty-Foot Equivalent Unit) – transportation unit equivalent to a standard 20-foot intermodal container

Analysis of Results

Railway Logistics

Scenario

According to the IBGE's Monthly Industrial Survey, Brazilian cement production in the first two months of 2015 fell by 8.9% year-on-year, chiefly due to the impacts of the slowdown in economic activity.

Analysis of Results

In 1Q15, cement sales totaled 525,000 tonnes, 4% down on 4Q14 due to sales seasonality, but 7% up on 1Q14. 1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, joint ventures, joint operations and associates collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN has shares listed on the São Paulo Stock Exchange (BM&F BOVESPA) and the New York Stock Exchange (NYSE). Accordingly, it reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas Steel Mill (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and performing excellent services for final consumers. Its steels are used in the home appliances, civil construction and automobile industries. CSN holds the concession to operate TECAR a solid bulk terminal, one of the four terminals that form the Port of Itaguaí, located in Rio de Janeiro. Imports of coal and coke are made through this terminal.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, in the State of Minas Gerais. It further mines tin in the State of Rondônia to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties.

Iron ore is substantially sold in the international market, especially in Europe and Asia. The prices in force in these markets are historically cyclical and subject to significant fluctuations over short periods as a result of many factors related to global demand, to the strategies adopted by major steel producers and to the exchange rate. All these factors are beyond the Company's control. The outflow of the ore is done by TECAR.

- **Cement:**

CSN entered the cement market boosted by the synergy between this new activity and its already existing businesses. Next to the Presidente Vargas Steel Mill in Volta Redonda (RJ), it installed a new business unit: CSN Cimentos, which produces CP-III type cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arches drive in the State of Minas Gerais, to supply the needs of UPV and of the cement plant.

- **Logistics**

Railroads:

CSN has equity interests in three railroad companies: MRS Logística S. A., which manages the former Southeast Railway System of Rede Ferroviária Federal S.A., Transnordestina Logística S. A. ("TLSA") and FTL - Ferrovia Transnordestina Logística S.A. ("FTL"), which operate the Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the sections of Missão Velha - Salgueiro, Salgueiro - Trindade, Trindade - Eliseu Martins, Salgueiro - Porto de Suape and Missão Velha - Porto de Pecém (Railway System II) and FTL being responsible for the sections of São Luiz - Mucuripe, Arrojado - Recife, Itabaiana - Cabedelo, Paula Cavalcante - Macau and Propriá - Jorge Lins (Railway System I).

Ports:

In the State of Rio de Janeiro, by means of its subsidiary Sepetiba Tecon S. A., the Company operates the Container Terminal (Tecon) at the Itaguaí Port. Located in the Bay of Sepetiba, this port has privileged highway, railroad and maritime access.

Tecon handles the shipments of CSN steel products, movement of containers, as well as storage, consolidation and deconsolidation of cargo.

- **Energy:**

As energy is fundamental in its production process, the Company has assets for generation of electric power to guarantee its self-sufficiency.

- NACIONAL MINÉRIOS S.A. - ("Namisa")

New strategic alliance with the Asian Consortium

On December 11, 2014, CSN's Board of Directors approved the formation of a strategic alliance with the Asian Consortium.

This transaction consists of creating a joint venture between CSN and the Asian Consortium, under which the Asian Consortium will contribute its 40% stake in Namisa to Congonhas Minérios S.A. ("Congonhas Minérios"), a non-operating subsidiary of CSN, and to which CSN will contribute its Casa de Pedra iron ore mine, its 60% stake in Namisa, its 8.63% stake in MRS, and the assets of and the rights to manage and operate the TECAR Port concession.

As a result of CSN's and the Asian Consortium's contributions and the agreements reached during the negotiations between the parties, immediately after the transaction is closed CSN and the Asian Consortium will hold 88.25% and 11.75% of Congonhas Minérios' capital on a debt free and cash basis, respectively. The final stakes will be determined taking into account the debt and cash adjustments, and the working capital difference on the closing date.

The transaction also provides for an earn-out mechanism, under which a qualifying liquidity event occurring within certain valuation parameters and a given period of time agreed after the transaction is closed could dilute the Consortium's equity interest in Congonhas Minérios from 11.75% up to 8.21%.

The transaction's primary purpose is to capture synergies among the businesses involved in this reorganization and generate shareholder value to create a world-class company. The main synergies identified are related to procedure optimization, increasing operation efficiencies and cutting operating costs, and capital expansion.

Part of Congonhas Minérios' iron ore production will be sold to members of the Asian Consortium and CSN. These rights are laid down in long-term supply agreements.

The transaction closing is subject to the parties reaching a consensus on a business plan, regulatory approvals by antitrust authorities and the governmental authorities responsible for regulating mining rights, and other conditions precedent usual in this type of transaction. The closing date is scheduled for the end of 2015.

II – Investments in financial instruments classified as available for sale and measured at fair value through OCI

These consist mainly of investments in shares acquired in Brazil involving top ranked companies, which are recognized in non-current assets, and any gains or losses are recognized in shareholders' equity, where they will remain until actual realization of the securities or when any loss is considered unrecoverable.

Impairment of financial assets classified as available for sale

The Company has investments in common (USIM3) and preferred (USIM5) shares (“Usiminas Shares”), designated as available-for-sale financial assets as they do not meet the criteria to be classified within any of the other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset under line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA).

Considering the volatility of the quotations of Usiminas shares, the Company evaluated whether, at the end of the reporting period, there was objective evidence of impairment of these financial assets, i.e., the Company’s management evaluated if the decline in the market value of Usiminas shares should be considered either significant or prolonged. In turn, this valuation requires judgment based on CSN’s policy, prepared according to practices used in the domestic and international markets, and consists of an instrument by instrument analysis based on quantitative and qualitative information available in the market, from the time an instrument shows a drop of 20% or more in its market value or from the time there is a significant drop in its market value as compared to its acquisition price during more than twelve months.

As of March 31, 2015, after a new decline in the quoted prices of the common shares (USIM5) as compared with the quoted prices as of December 31, 2014, the Company reclassified the accumulated losses for the quarter recognized in other comprehensive income, amounting to R\$5,555, net of income tax and social contribution, to profit (loss) for the period, recognizing R\$8,417 in other operating expenses and R\$2,862 in deferred taxes

Beginning this date, pursuant to a Company's policy, gains and losses arising from the variation of the quotation of shares were recognized in other comprehensive income.

The Company's interest in Usiminas has not changed as compared with the percentage disclosed in the financial statements as of December 31, 2014.

- **Share Market risks**

The Company is exposed to the risk of changes in share prices due to the investments made and classified as available-for-sale.

The Company considers as probable scenario the amounts carried at market values as of March 31, 2015, net of tax of R\$741,796. Therefore, there is no impact on the financial instruments classified as available-for-sale.

According to the Company's accounting policies, any negative changes in the investment in Usiminas considered significant (impairment) are recognized in profit or loss, and positive changes are recognized in comprehensive income until the investment is realized.

III - Financial Instrument Policies:

As of March 31, 2015, there were no changes in the financial risk management policies in relation to those disclosed in the Company's financial statements for the year ended December 31, 2014.

(**) The positions of the swap transactions were settled in May 2014, together with their guarantee deposit.

Fixed rate-to-CDI swap

The purpose of this transaction is to peg obligations subject to a post-fixed rate (CDI) to a fixed rate. Basically, the Company contracted swaps for its obligations indexed to CDI, in which it receives interest on the notional amount (long position) and pays a pre-fixed rate on the notional amount of the contract date (short position). The gains and losses on this contract are directly related to CDI fluctuations. In general, these are transactions conducted in the Brazilian over-the-counter market that have as counterparty a prime financial institution.

- **Hedge accounting**

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to protect highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on its profit, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising on translating the designated liabilities will be temporarily recognized in shareholders' equity and allocated to profit or loss when such exports are carried out, which will allow recognizing the US dollar impact on liabilities and exports concurrently.

The table below shows a summary of the hedging relationships:

(*) The Company taxes foreign exchange differences on a cash basis to calculate income tax and social contribution.

As of March 31, 2015, the information related to the Group's income tax and social contribution loss carryforwards did not have significant changes in relation to that disclosed in the Company's financial statements as of December 31, 2014 (note 13). As a result, the estimated recovery of the deferred tax assets remains the same as previously disclosed by the Company.

The Company's corporate structure includes foreign subsidiaries whose profits are subject to income tax levied by the related countries, recognized at tax rates lower than in Brazil.

In the 2011 period to the first quarter of 2015, these subsidiaries generated profits amounting to R\$3,870,350, which tax authorities may understand that have already been distributed, hence, it would be subject to additional taxation in Brazil, in the approximate amount of R\$1,315,919. The Company, based on its legal counsel's opinion, assessed the likelihood of loss in a potential challenge by tax authorities as possible and, therefore, no provision was recognized in the condensed interim financial statements.

- **Law 12.973/14**

Law 12.973, enacted in May 2014, brought significant changes to tax legislation, which among others, revoked the Transition Tax Regime (RTT). These changes directly impact the determination of the income tax and social contribution basis. As from 2015, the application of the Law is mandatory and CSN applied the Law's requirements to the interim financial statements as of March 31, 2015.

Adjusted EBITDA is the tool based on which the chief operating decision maker measures segment performance and the capacity to generate recurring operating cash, and consists of profit for the year less net finance income (costs), income tax and social contribution, depreciation and amortization, share of profits of investments, and other operating income (expenses), plus the proportional EBITDA of jointly controlled entities.

Even though it is an indicator used in segment performance measurements, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of

Companhia Siderúrgica Nacional

São Paulo – SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Companhia Siderúrgica Nacional (the “Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the three-month period ended March 31, 2015, which comprises the balance sheet as of March 31, 2015 and the related statements of income, comprehensive income, changes in equity and cash flows for the three-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of the Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the interim financial information referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the CVM.

These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.
