**Note:** ARPU data including intercompany revenue eliminations.

- **Total accesses** came to 79,414 thousand, reducing by 0.5% over the third quarter of 2014. Worthy of mention is the postpaid segment, which grew by 12.0% y-o-y with 30,435 thousand accesses, representing 38.3% of the mobile base, 4.3 p.p. higher in the annual comparison.

- **Total market share** came to 29.1% in August (+0.4 p.p. y-o-y). In the **postpaid segment** Telefônica Brasil achieved 52.5% of net additions between July and August 2015, recording a market share of 41.8% (+0.3 p.p. y-o-y), reflecting the superior quality offered by the Company, which is also the leader in number of 4G-technology terminals, with a market share of 38.5% in August 2015.

- The Company registered an increased number of prepaid disconnections in the third quarter, resulting in **net mobile disconnections** of 3,241 thousand accesses. On the other hand, net postpaid additions reached 849 thousand accesses in the quarter.

- The **prepaid customer base** reduced by 7.0% in 3Q15 over 3Q14, due to a restrictive policy for the disconnection of non-profitable clients. Despite that, the financial volume of recharges continued to increase and prepaid outgoing revenues grew 2.7% y-o-y showing the results of our focus on value.
- In the **machine-to-machine (M2M)** market, the access base continued to expand, reaching 4.1 million customers in September, 28.4% up y-o-y when compared to the 3Q14.
- **Total ARPU** climbed 3.3% y-o-y, fueled by the exceptional performance of **data ARPU**, which posted record increase of 33.5% in 3Q15 over 3Q14. Excluding MTR reduction in the period, Total ARPU posted annual growth of 6.3% in 3Q15.

Net handset revenues	422.3	383.4	10.1	308.5	36.9	1,144.4	915.1	25.1

Third-quarter net operating mobile revenue grew by 6.2% y-o-y, influenced by the increased data and VAS revenue. Net service mobile revenue posted variation of +4.5% in the quarter, despite the impact of the MTR reduction on February 24, 2015. Excluding this effect, third-quarter mobile service revenue increased by 7.5% over 3Q14.

**Outgoing voice** revenue declined by 12.6% over 3Q14, reflecting the higher proportion of data in postpaid plans and increased internet consumption by prepaid clients, with the growth in mobile internet more than offsetting the reduction in voice.

**Interconnection** revenue fell by 28.7% compared to the third quarter of 2014, especially due to the 33.0% MTR tariff reduction, occurred in February 2015. With the normalization of this effect, interconnection revenue raised by 2.0% y-o-y in the 3Q15.

**Data and VAS** revenue posted record performance in 3Q15, registering the highest growth in four years, 34.9% up y-o-y, due to successful sales of data plans and packages, and the higher penetration of smartphones within our customer base. Data and VAS revenue increased to 48.9% of net mobile service revenue in 3Q15, up by 11.0 p.p. y-o-y.

**SMS** revenue reverted the downward trend presented in the last seven quarters and climbed by 7.3% y-o-y in the 3Q15, reflecting the stronger adherence to higher value bundled offers, such as Vivo Tudo, which combine SMS, voice and data packages, as well as the control plans, which include unlimited SMS and encourage the consumption of the product. In 3Q15 over 2Q15, this increase came to 6.2%.

**Mobile internet** revenue posted new record growth, 54.1% up y-o-y, accounting for 68.3% of data revenue in 3Q15. This performance is directly linked to the strong growth in postpaid data accesses, especially with 4G plans, to the increased sales of stand-alone data packages to prepaid customers, and to the growing smartphone customer base. 73% of our customer base already has smartphones or webphones, an 11 p.p. increase compared to the same period last year.

**VAS revenue** moved up by 5.4% in 3Q15 over 3Q14. The contraction in annual growth was influenced by the change in the behavior of clients, who have given greater priority to the consumption of prepaid credits with data and voice services than value-added services. Vivo recently launched two services, *Vivo Meu Negócio* and *Vivo Meu Show*, which make clients protagonists, open entrepreneurial opportunities and offer cash prizes.

**Other services revenue** totaled R\$113.1 million, 31.7% up on 3Q14, due to the recurrent recovery of taxes on disputed invoices.

**Mobile handset revenue** increased by 36.9% y-o-y in 3Q15, mainly due to the sales of handsets to corporate and SME customers, the greater share of higher-value devices in the handset portfolio, besides the increase in prices due to the depreciation of the Real (R\$) against the U.S. Dollar (US\$).

- **Fixed voice accesses** remained virtually stable over 3Q14 (-0.8% y-o-y), totaling 14,879 thousand in 3Q15. Corporate accesses continue to increase, growing by 1.3% y-o-y in 3Q15. Voice ARPU remained stable over the previous year despite the negative pressure due to the VC reduction and the fixed to mobile substitution.
- **Fixed broadband accesses** recorded 7.2 million customers in 3Q15, 5.5% more than in 3Q14. The FTTX customer base reached 3,789 thousand accesses, 538 thousand of which in FTTH technology. Given the y-o-y customer base increase of 19.3%, UBB clients reached penetration of 52.8% of total broadband accesses, fueling the ARPU, which expanded growth to +3.1% y-o-y in 3Q15 (+1.9 y-o-y in 2Q15).
- **Pay TV accesses** climbed by 18.6% y-o-y, to 1,829 thousand subscribers in 3Q15, with 43 thousand net additions in the quarter. **Note:** Fixed Net Revenue includes revenue from the FWT solution (“Vivo Fixo”).

The growth in net revenue from the fixed line business increased to 3.9% in 3Q15 over 3Q14 (+3.1% y-o-y in 2Q15), mainly due to the upturn in broadband and Pay TV revenue. Fixed line revenue excluding GVT once again improved compared to the previous year, up by 1.3% in 3Q15 (-0.3% y-o-y in 2Q15 and -4.0% y-o-y in 1Q15). GVT's revenue grew by 8.9% y-o-y in 3Q15 (+10.2% y-o-y in 2Q15). Fixed line revenue was impacted by fixed to mobile tariff (VC) reductions on February 24, 2015. Excluding this effect, net fixed service revenue varied by 6.0% in the period.

**Voice** revenue remained stable in 3Q15 over 3Q14, despite the regulatory impact, up by 2.1% on 2Q15. Excluding the VC reduction, voice revenue climbed by 4.3% y-o-y.

**Interconnection** revenue fell 13.8% compared to 3Q14, due to the lower incoming fixed traffic, chiefly due to the fixed to mobile substitution. In 3Q15 over 2Q15, this line fell by 8.0%.

**Broadband** revenue grew by 9.1% y-o-y, reflecting the evolution of the broadband base, in addition to the efforts to expand the ARPU. To address this issue, the Company has been focusing on the migration of customers to higher speeds, mainly in FTTX, expanding the fiber customer base, which has higher ARPU and lower churn.

Revenue from **corporate data and IT** increased by 1.9% y-o-y. The corporate client segment continued to benefit from combination of Vivo's and GVT's capacities.

**Pay TV** revenue grew by 27.0% y-o-y. This increase was fueled by the fast growth of the DTH and IPTV subscriber base, with an increased adoption of HD

packages.

**Other service** revenue grew by 2.8% y-o-y, mainly influenced by equipment linked to the sales of integrated solutions to large clients.

The Company's operating costs excluding depreciation and amortization expenses totaled R\$7,401.4 million in 3Q15, 5.9% up over 3Q14, growing less than the inflation for the last 12 months. Said performance was mainly influenced by higher expenses linked to quality assurance and those directly linked to the increase in revenues, the higher provisions for bad debt and stronger collection efforts, in addition to the higher expenses with energy, offset by the improved efficiency in personnel and call center expenses. In 3Q15 over 2Q15, operating costs moved up by 1.4%.

**Personnel costs** increased by 3.9% y-o-y, impacted by the 7.0% pay rise due to the collective bargaining agreement granted in January 2015, and the organizational restructuring, which impacted 2.3 thousand employees and generated non-recurring costs of R\$19.2 million in 3Q15. The positive impact resulting from the organizational restructuring throughout the first half of 2015 partially offsets the other events. The recurring increase on personnel costs came to 1.6% y-o-y in 3Q15.

The **cost of services rendered** increased by 1.1% in 3Q15 over 3Q14, positively influenced by MTR reduction in February 2015. Excluding this effect, the y-o-y increase was 7.3%. This variation chiefly reflects the higher expenses with sites leasing and network maintenance, due to the expansion in 4G coverage and focus on service quality, the higher expenses with purchase of TV content, which grew proportionally to the increase in revenue, and the higher expenses with electricity, due to the increase in unit prices.

**Cost of goods sold (COGS)** increased by 33.4% in 3Q15 over 3Q14, due to increasing handset sales to corporate customers, the depreciation of the Real (R\$) against the U.S. Dollar and the increased share of higher-value devices in the equipment portfolio mix.

In 3Q15, **services selling expenses** reduced its annual variation to +5.1% (from +7.3% y-o-y in 2Q15), despite the strong pressure arising from the challenging economic scenario.

**Provisions for bad debt** closed 3Q15 at R\$349.4 million (+27.5% y-o-y), with default levels at 2.2% of total gross revenue (+0.4 p.p. y-o-y). The Company continued to adopt strict credit granting initiatives and more active collection measures, leveraging on best practices of both Vivo and GVT. The implemented actions already drove a declining trend of bad debt during the third quarter, expressing success in results.

**Third-party services** posted y-o-y increase of 2.8% in 3Q15, influenced mostly by higher commissioning expenses linked to the growth of the mobile subscriber base and the higher share of data, in addition to higher publicity and marketing expenses. The simplification of plans and offers and the virtualization of customer service channels continue to positively impact call center expenses.

**General and administrative expenses** posted a controlled increase of 4.1% y-o-y in 3Q15, underlying the results obtained with the Company's control of expenses efforts adopted in recent quarters.

**Other net operating revenues (expenses)** totaled an expense of R\$183.0 million in 3Q15, 35.2% up on 3Q14, mainly as a result of higher civil contingencies in the period.

## Ebitda

**Recurring EBITDA** (earnings before interest, taxes, depreciation and amortization) totaled R\$3,198.5 million in 3Q15, 4.3% up on 3Q14, due to the increase in fixed and mobile revenues, which were partially offset by the stronger commercial efforts, the higher provision for bad debt, higher costs related to quality assurance and capacity, and higher expenses with the purchase of TV content. The **recurring EBITDA margin** reached 30.2%, a y-o-y reduction of 0.3 p.p., compared to a margin of 30.5% of the combined Company in 3Q14.

(\*) Amortization of intangible assets generated by the incorporation of Vivo as of 2Q11 and of GVT as of 2Q15.

The **Depreciation and Amortization** line expanded by 11.1% y-o-y, particularly influenced by the acquisition of the 700MHz license in December 2014, besides additions to fixed assets in the period.

In 3Q15, **net financial expenses** increased by R\$52.9 million over 3Q14, chiefly fueled by charges related to derivatives, partially offset by the lower combined net debt in the period. In 9M15, net financial expenses increased by R\$659.6 million over 9M14, mostly due to losses with the exchange variation effect on GVT's loans and financing denominated in foreign currency (Euro) in the first 4 months of 2015, which were fully covered by hedge operations as of May, 2015 and partially paid in 3Q15.

## Net Income

**Net income** totaled R\$886.2 million in 3Q15, 16.1% down on 3Q14, chiefly due to the higher depreciation, amortization and financial expenses in the period. Year-to-date accounting net income, which considers the consolidation of GVT as of May, 2015, came to R\$2,335.7 million.

**Year-to-date operating cash generation** contracted by R\$1,232.3 million over the same period last year, due to higher inventories, as a result of a larger share of 4G higher-value devices, and the increase in accounts receivable, impacted by the migration of prepaid clients to postpaid plans. **Cash used in investment activities** increased by R\$8,618.9 million, particularly due to the acquisition of GVT. Thus, **cash flow after investment activities** recorded a consumption of R\$9,851.2 million. **Cash used in financing activities** recorded reduction of R\$11,077.6 million, due to the capital increase, partially offset by the higher amortization of loans, resulting in an increase by R\$1,226.4 million in **cash flow after financing activities**.

In comparison with 3Q14, net debt reduced by R\$2,524.7 million, mainly explained by the capital increase carried out by the Company, partially offset by the payment of the 700 MHz license to ANATEL.

## Additional Notes

On May 28, 2015, the Extraordinary Shareholders' Meeting approved the ratification of the Purchase and Sale Agreement and Other Covenants entered into between the Company, and Vivendi and its subsidiaries, through which all the shares issued by GVTPart were acquired by the Company.

The consideration for the acquisition of GVTPart's shares was executed as follows:

- One installment totaling €4,663.0 million on demand and in cash, after the adjustments envisaged in the agreement, on the closing date, and
- One installment in Company shares, delivered due to the merger of GVTPart's shares into the Company, equivalent to 12% of the Company's capital stock after the share merger.

In view of the merger of GVTPart's shares, the Company's capital stock increased by R\$9,666.0 million, through the issue of 68,597,306 common shares and 134,320,885 preferred shares, all non-par book-entry shares, considering the economic value of the merged shares, calculated using the discounted cash flow method, based on GVT's Economic Value Appraisal Report prepared by a specialized company, in accordance with article 252, paragraph 1 and article 8, both of Law 6,404/76.

With the conclusion of the acquisition on May 28, 2015, the Company became the direct controlling company of GVTPart and the indirect controlling company of GVT.

The Extraordinary Shareholders' Meeting held on May 28, 2015 approved the acquisition of all GVTPart's shares and 675,571 shares issued by GVT, as well as the merger of GVTPart's shares into the Company. As a result, the Company became the sole shareholder of GVTPart and the indirect controlling company of GVT, Pop Internet Ltda ("POP") and Innoweb Ltda ("Innoweb").

Completed the steps mentioned above, at a meeting of the Board of Directors held on September 22, 2015, it was considered the proposed corporate restructuring involving the Company, its wholly-owned subsidiary (GVTPar) and its indirectly controlled companies (GVT and POP), so that at the end of the process activities provided by GVT other than telecommunications services will be concentrated in POP and telecommunication services will be concentrated in the Company.

Considering that at the implementation of the Corporate Restructuring all companies involved are wholly-owned or indirectly controlled by the Company,

there will be no withdrawal rights to shareholders of the latter (in accordance with article 137 of Law 6,404/76, as amended), since the planned operations (i) will not affect the Company's ownership structure; and (ii) will not result in a capital increase and issue of new shares of the Company.

This Corporate Restructuring will be implemented only after prior approval of Agência Nacional de Telecomunicações - ANATEL, currently under analysis.
