Item 2.02. Results of Operations and Financial Condition.

On March 3, 2005, Seabulk International, Inc. (the "Company" or the "Registrant") issued a press release announcing its results of operations for the three months and fiscal year ended December 31, 2004. A copy of the press release is furnished herewith as Exhibit 99.1 and is incorporated herein by reference.

Item 7.01. Regulation FD Disclosure.

The Company held a conference call to discuss fourth quarter and year end results at 11:00 a.m. E.D.S.T. on Thursday, March 3, 2005, as previously announced in press releases on February 11 and 24, 2005, which included instructions as to when and how to access the presentation and location of the Company's website, where the information will be available. An audio replay of the presentation is currently available on the Company's website at www.seabulkinternational.com (click on the Investors link) and will continue to be available for the next 90 days.

In addition to the scripted remarks made by the Company, the Company made the following points in the Question and Answer period in response to questions from the audience:

- * New offshore support vessels on order are expected to produce day rates between \$9,000 and \$10,000, with operating expenses of about \$3,000 per day. The Company intends to exercise the options it holds to construct four offshore support vessels, in addition to the four vessels currently under construction in the same yard due for delivery in 2006. The amount of new debt which will be incurred for the four vessels currently under construction is expected to be \$28 million.
- * The Company is looking at a project to double hull some of its existing single hull vessels.
- * The Company's federal income tax liability in 2005 is expected to continue to be zero due to its NOLs. It expects to pay non-material amounts of state income and franchise taxes.
- * Uses for free cash flow in 2005 are likely to be selective new offshore vessel tonnage and debt reduction.
- * The Company's offshore vessels in West Africa are roughly 50% in the spot market and 50% in term business.
- * First quarter 2005 results are likely to look like fourth quarter 2004. There is some growth in January over the fourth quarter in the offshore business.
- * Most of the U.S.-flag double hull tankers currently have time charter rates in the high \$30,000's. We believe that the U.S.-flag double hull rates could increase to the \$40,000's over time.

Item 9.01. Financial Statements and Exhibits.

EXHIBITS

- 99.1 Press Release of Seabulk International, Inc. dated February 11, 2005
- 99.2 Script of Seabulk International, Inc. Teleconference Held March 3, 2005 to Discuss Fourth Quarter and Year-end 2004 Results

This information, including Exhibits 99.1 and 99.2 attached hereto, shall not be deemed "filed" for purposes of Section 18 of the Exchange Act or otherwise subject to the liability of that section, except if the Registrant specifically states that the information is to be considered "filed" under the Exchange Act or incorporates it by reference into a filing under the Securities Act or the Exchange Act.
