Eni announces results for the second quarter and first half of 2012

San Donato Milanese, August 1, 2012 - Eni, the international oil and gas company, today announces its group results for the second quarter and the first half of 2012 (unaudited).

Financial Highlights*

Adjusted net profit: euro 3.94 billion for the first half (up 8%); euro 1.46 billion for the quarter (up 2%);

Net profit: euro 3.84 billion for the first half; euro 0.23 billion for the quarter;

Results from continuing operations:

Adjusted operating profit: euro 10.37 billion for the first half (up 19%); euro 4.24 billion for the quarter (up 14%);

Adjusted net profit: euro 3.79 billion for the first half (up 4%); euro 1.38 billion for the quarter (up 0.3%);

**Cash flow: euro 8.34 billion for the first half; euro 4.22 billion for the quarter;
Interim dividend proposal of euro 0.54 per share.**

Operational Highlights

Oil and gas production grew by 10.6% to 1.647 mmboe/d in the second quarter (up 4.7% in the first half);

Natural gas sales: down by 4% in the quarter to 20.15 bcm (down 4.8% in the first half);

Finalized the contract for the sale of 30% less one share in Snam to Cassa Depositi e Prestiti; already divested a 5% stake to institutional investors;

Divested a 5% stake in Galp to Amorim Energia BV;

New giant gas discoveries at the Mamba North East 2 and Coral 1 prospects offshore Mozambique, which increased the full potential of Area 4 to 70 Tcf of gas in place;

Acquired exploration blocks in promising areas of Vietnam, Kenya and Indonesia;

**Strengthened the portfolio of unconventional resources in Ukraine;
Started exploration off the Russian section of the Barents Sea and the Black Sea in partnership with Rosneft;
Exploration success increased by 2.2 billion boe the Company's resource base in the first half.**

Paolo Scaroni, Chief Executive Officer, commented:

"In the first half of 2012, Eni delivered excellent results with strong production growth, supported by the recovery in Libyan output. We have achieved unprecedented exploration success with major new discoveries and secured promising opportunities in high potential areas. Gas & Power and Refining & Marketing have contained the impact of widespread market weakness. Through the divestment of our stakes in Snam and Galp our balance sheet will be transformed, securing our capacity to finance robust long-term growth in any market environment. Our confidence in Eni's outlook underpins my proposal of an interim dividend of euro 0.54 per share to Eni's Board on September 20."

On the same occasion of reviewing this press release, the Board has approved the interim consolidated report as of June 30, 2012, which has been prepared in accordance to Italian listing standards as per Article 154-ter of the Code for securities and exchanges (Testo Unico della Finanza).

The document was immediately submitted to the Company's external auditor. Publication of the interim consolidated report is scheduled within the first half of August 2012 alongside completion of the auditor's review.

* Following the announced divestment plan of the Regulated Businesses in Italy, results of Snam are represented as discontinued operations throughout this press release.

(a) Attributable to Eni's shareholders.

(b) For a detailed explanation of adjusted operating profit and net profit see paragraph "Reconciliation of reported operating and net profit to results on an adjusted basis".

(c) Fully diluted. Dollar amounts are converted on the basis of the average EUR/USD exchange rate quoted by the ECB for the periods presented.

(d) One ADR (American Depositary Receipt) is equal to two Eni ordinary shares.

Adjusted operating profit

In the second quarter of 2012, adjusted operating profit from continuing operations was euro 4.24 billion, up 14.2% from the second quarter of 2011. The result reflected a better operating performance reported by the Exploration & Production Division (up 10.8%) due to the ongoing production recovery in Libya. In spite of continued weakness in demand and rising competitive pressures, the Merchant business of the Gas & Power Division reported operating losses in line with the second quarter of 2011 leveraging on an improved cost position due to the benefits of renegotiating supply contracts and the recovery of Libyan supplies. On a similar note, the Refining & Marketing and Chemical Divisions reported stable losses in the face of a deteriorating trading environment. Eni's adjusted operating profit benefited from the appreciation of the US dollar against the euro (up 11%). In the first half of 2012, adjusted operating profit from continuing operations was euro 10.37 billion, an increase of 18.8% from the first half of 2011. This was due to the above mentioned drivers as explained in the review of the second quarter operating profit and the better operating performance recorded by the Gas & Power Division, which recorded profit retroactive to the beginning of 2011 following the renegotiations of certain gas supply contracts.

Adjusted net profit

In the second quarter of 2012, adjusted net profit from continuing operations was euro 1.38 billion, in line with the same period of the previous year. The better operating performance was offset by higher consolidated tax rate from continuing operations (up approximately 4 percentage points). This was due to an increasing taxable profit earned by the Exploration & Production subsidiaries which incurred higher-than-average tax rates. In the first half of 2012, adjusted net profit from continuing operations was euro 3.79 billion, up 4% compared with a year ago.

Capital expenditure

Capital expenditure made by continuing operations for the second quarter of 2012 amounted to euro 3.02 billion (euro

5.65 billion for the first half of 2012) mainly related to development of oil and gas reserves, and the upgrading of rigs and offshore vessels in the Engineering & Construction Division. The Group also incurred expenditures of euro 0.3 billion in finance acquisitions, joint-venture projects and equity investees.

Cash flow

Net cash generated by operating activities attributable to continuing operations amounted to euro 4,219 million for the second quarter of 2012 (euro 8,340 million for the first half of 2012). This flow and cash from disposals of euro 774 million were used to fund the financing requirements associated with capital expenditure and dividend payments of euro 2,298 million (of which euro 1,884 million relating to the Eni payment of the balance dividend for fiscal year 2011) and pay down net borrowings¹ which were down by euro 1,123 million from December 31, 2011 to euro 26,909 million. The reduction in net borrowings also reflected redemption of an intercompany loan from Snam which arranged financing with third-party lenders (euro 1.5 billion). Cash flow from operating activities for the quarter was impacted by a lower amount of receivables due beyond the end of the reporting period transferred to financing institutions compared to the amount transferred at the end of the previous quarter (down by euro 450 million in the second quarter of 2012).

(1) Information on net borrowings composition is furnished on page 33.

Table of Contents

The ratio of net borrowings to shareholders' equity including minority interest leverage decreased to 0.42 at June 30, 2012 from 0.46 as of December 31, 2011 (0.43 as of March 31, 2012) reflecting, an increased total equity, as well as the re-financing of an intercompany loan due by Snam which was reported as discontinued operations and thus reduced the Group's net debt. In July 2012, Snam continued re-financing the intercompany loans, reducing Eni's debt by further euro 1 billion as of July 30, 2012.

Interim dividend 2012

In light of the financial results achieved for the first half of 2012 and management's expectations for the full-year results, the interim dividend proposal to the Board of Directors on September 20, 2012, will amount to euro 0.54 per share³ (euro 0.52 per share in 2011). The interim dividend is payable on September 27, 2012, with September 24, 2012 being the ex dividend date.

Exploration & Production

In the second quarter of 2012, Eni's liquids and gas production grew by 10.6% to 1,647 kboe/d from the second quarter of 2011. Oil and gas production resulted in 1,661 kboe/d in the first half of 2012, up 4.7% from the same period a year ago. The performance was driven by an ongoing recovery in Libyan production, as well as starting-up and ramping-up new fields in Australia, Russia and Egypt. These positives were partly offset by the shutdown of the Elgin/Franklin field (Eni's interest 21.87%) in the UK due to a gas leak and by crude oil losses in Nigeria due to rapidly escalating acts of sabotage and theft, in addition to mature field declines.

Gas & Power

In the second quarter of 2012 Eni's worldwide natural gas sales declined by 4% to 20.15 bcm from the second quarter of 2011 (down by 4.8% from the first half of 2011 to 50.76 bcm) due to weak demand and ongoing competitive pressures. Volumes marketed on the domestic market declined by 8.3% in the quarter (down by 2.2% in the first half) mainly dragged down by sharply lower volumes supplied to the power generation segment which was affected by higher competitiveness of coal and growing use of renewable sources. Other declines were registered at wholesalers and industrial customers, while spot sales trended higher and sales to the residential segment increased due to the positive impact of weather conditions.

Eni's sales volumes at European markets decreased slightly by 1.3% mainly in UK/Northern Europe and Germany/Austria, partly offset by increases in Turkey and France. The 3.8% decline registered in the first half of 2012 was mainly due to lower sales in Benelux reflecting increased competitive pressures and in the UK/Northern Europe

(mainly due to lower equity production), partly offset by higher sales in Germany/Austria, Turkey and France. Sales to importers to Italy experienced a substantial decrease (down 57.1% and 57.7%, respectively) due to the expiration of certain supply contracts, partly offset by the recovery of Libyan supplies.

Refining & Marketing

In the second quarter of 2012 refining margins in the Mediterranean area showed a remarkable recovery from the depressed levels registered in the same period a year ago (the benchmark margin on TRC Brent crude averaged \$5.89 per barrel in the quarter 2012, \$1.09 per barrel in the second quarter 2011). However, results of Eni refining activities continued to be adversely impacted by shrinking price differentials between light and heavy crudes and by the weak fuel demand. In the second quarter of 2012, Eni marketed lower volumes at its Italian retail outlets, down by 7.5% to 1.98 million tonnes (down by 7.1% in the first half). The Company implemented a number of commercial initiatives intended to increase its market share in the face of a demand downturn, and achieved a share of 30.8% in the second quarter compared to a 30.3% share in the same quarter of the previous year, peaking at 33% in June 2012. In the second quarter of 2012, retail sales in the European market were stable at 0.76 million tonnes, while they increased slightly to 1.48 million tonnes in the first half, mainly in Austria and Switzerland, and were offset by declines in other European markets.

- (2) Non-GAAP financial measures disclosed throughout this press release are accompanied by explanatory notes and tables to help investors to gain a full understanding of said measures in line with guidance provided for by CESR Recommendation No. 2005-178b. See page 33 for leverage.
 - (3) Dividends are not entitled to tax credit and, depending on the receiver, are subject to a withholding tax on distribution or are partially cumulated to the receiver's taxable income.

Table of Contents

Currency

Results of operations for the second quarter and the first half of 2012 were positively impacted by the appreciation of the US dollar vs the euro (up by 11% in the quarter and 7.6% in the first half).

Portfolio developments

Mozambique

The exploration campaign offshore Mozambique achieved new exploration success with two new giant gas discoveries, for a total of five exploration wells successfully drilled in the area so far. In May 2012 the Coral 1 discovery well found an estimated 7 to 10 Tcf of gas in place. The exploration well was drilled in the Southern section of Area 4, at a water depth of 2,261 meters and reaching a total depth of 4,869 meters. This discovery is particularly significant since it confirms a new exploration play, which is independent of those drilled so far in previous Mamba wells.

On August 1, 2012 a new giant natural gas discovery was achieved in the Eastern part of Area 4, at the Mamba North East 2 exploration prospect. Mamba North East 2, where Eni will conduct a production test, was drilled in 1,994 meters of water and reached total depth of 5,365 meters. The new discovery adds at least 10 Tcf of gas in place to Area 4, confirming at least 62 Tcf of gas in place already discovered. The resources exclusively located in Area 4 are at least 20 Tcf plus of gas in place. The discovery further increases the total potential of the Mamba complex found so far in Area 4, which is now estimated to hold 70 Tcf of gas in place. Eni plans to drill at least another five wells to fully establish the upside potential of Area 4.

Kenya

In July 2012, Eni was awarded three product sharing contracts by the government of Kenya for the acquisition of exploration blocks L-21, L-23 and L-24 located in the deep and ultra-deep waters of the Lamu Basin, off the coast of Kenya, covering an area of more than 35,000 square kilometers, thus marking the entry of Eni in the Country. The initial exploration phase will consist of the execution of a seismic acquisition program.

Vietnam

In June and July 2012, Eni acquired the operatorship (Eni's interest 50%) of three exploration blocks located offshore Vietnam, in the Song Hong and Phu Khanh basins. The three blocks cover approximately 21,000 square kilometers of acreage. These basins are estimated to contain 10% of Vietnam's hydrocarbon resources, mainly gas. The Company plans to make significant investment to explore for hydrocarbons in the acquired acreage by drilling four wells. The deal is subject to the authority approval.

Ukraine

In June 2012, Eni signed a Share Purchase Agreement with Ukrainian state-owned National Joint Stock Company, Nak Nadra Ukrayny and Cadogan Petroleum Plc to acquire a 50.01% interest and operatorship of the Ukrainian company LLC WESTGASINVEST which currently holds subsoil rights to nine unconventional (shale) gas license areas in the Lviv Basin of Ukraine. These licenses cover approximately 3,800 square kilometers of acreage.

Indonesia

In May 2012, Eni has been awarded the East Sepinggan block, located offshore the Kutei Basin. The block covers an area of approximately 2,900 square kilometers in a very rich hydrocarbon province, supported by the Bontang LNG processing facility.

The exploration activity includes the drilling of one well.

Russia

In June 2012, following the strategic cooperation agreement signed in April 2012, Eni and Rosneft defined the terms to set up the joint ventures (Eni's interest 33.33%) which will operate the exploration of the Fedynsky and Tsentralno-Barentsevsky licenses offshore the Russian section of the Barents Sea, and the Zapadno-Cernomorsky license offshore the Russian section of the Black Sea.

Karachaganak

On June 28, 2012, the international Contracting Companies of the final production sharing agreement of the giant Karachaganak gas-condensate field and the Republic of Kazakhstan closed a settlement agreement of all pending claims relating to the recovery of costs incurred to develop the field. The Contracting Companies will transfer 10% of their rights and interest in the project to Kazakhstan's KazMunaiGas for a \$1 billion net cash consideration (\$325 million being Eni's share). From the effective date of June 28, 2012, Eni's interest in the Karachaganak project has been reduced to 29.25% from the 32.5% previously held. The agreement also includes the allocation of an additional 2 million tonnes per year capacity in the Caspian Pipeline Consortium export pipeline (CPC) over the remaining life of the FPSA, which will be fully operational within the next three years, as well as a final settlement on all tax and customs claims up to the end of 2009.

Table of Contents

Exploration success

In addition to the above-mentioned exploration successes in Mozambique, it is worth mentioning that exploration activities performed well in:

- Egypt, with the important Emry Deep 1X discovery in the Meleiha license with volumes of oil in place estimated to range between 150 and 250 million barrels;
- Angola, (i) in Block 15/06 (Eni's interest 35%, operator), with the oil Vandumbu 1 discovery, which is the first committed field of the second exploration phase; (ii) in Block 2 (Eni's interest 20%), with the oil and gas Etele Tampa 7 field;
- The United States, Block Green Canyon 903 (Eni's interest 12.25%) in the Gulf of Mexico, with the exploration outlining of the Heidelberg Discovery, increasing recoverable resources up to approximately 200 mmbbl.

Start-up

In June 2012, Eni started up the offshore field of Seth, located in the Ras El Barr concession in Egypt. The field is expected to produce approximately 4.8 million cubic meters of gas per day, of which Eni's equity is 1.7 million cubic meters (approximately 11,000 boe/d) net to Eni.

Divestment of Eni's interest in Snam

On May 30, 2012, Eni and Cassa Depositi e Prestiti SpA ("CDP"), an entity controlled by the Italian Ministry of Economy and Finance, agreed the principal terms and conditions of the divestment of 30% less 1 share of the voting shares of Snam at a price of euro 3.47 a share for a total consideration of euro 3,517 million. The sale and purchase contract was signed on June 15, 2012. The closing of the transaction could occur on or after October 15, 2012, and is subject to certain conditions precedent, including, in particular, antitrust approval. By the time the transaction closes, Eni will lose control over Snam.

The total consideration is expected to be paid by CDP in three tranches: the first is to be paid at the closing of the transaction for a total amount of euro 1,759 million; the second is to be paid by December 31, 2012 for a total amount of euro 879 million, and the third, for a total amount of euro 879 million, is to be paid no later than May 31, 2013.

The transaction implements the provisions of Article 15 of Law Decree No. 1 of January 24, 2012 (enacted into Law No. 27 of March 24, 2012), pursuant to which Eni shall divest its shareholding in Snam in accordance with the model of ownership unbundling set out in Article 19 of Legislative Decree No. 93 of June 1, 2011, and in accordance with the criteria, terms and conditions defined in the Decree of the President of the Council of Ministers issued on May 25, 2012 (the "DPCM") and designed to ensure the complete independence of Snam from the largest gas production and sale company in Italy.

Furthermore, the DPCM provides the divestment of the residual shareholding of Eni in Snam through transparent and non-discriminatory sales procedures targeted to both retail and institutional investors. On July 18, 2012, Eni finalized the sale of a further 5% interest in Snam (178,559,406 ordinary shares). The total consideration amounted to euro 612.5 million, corresponding to euro 3.43 per share. The deal was carried out through an accelerated book-building procedure aimed at Italian and foreign institutional investors.

The divestment of the Italian regulated businesses will strengthen Eni's financial position, targeting a debt to equity ratio in line with that of other major integrated international oil companies. Eni will achieve greater financial flexibility in context of the Company's new upstream-focused business model, maximum financial resources required to fund production growth and development of new discoveries, as well as tight credit markets.

Divestment of Eni's interest in Galp

On July 20, 2012, Eni concluded the sale of 41,462,532 shares to Amorim Energia BV ("Amorim Energia"), at the price of euro 14.25 per share, equal to 5% of the share capital of Galp Energia. As per the agreements signed by Eni, Amorim Energia and Caixa Geral de Depositos and announced to the market on March 29, 2012, following the sale Eni ceased to be part of the existing shareholders' agreement between the companies.

Table of Contents**Outlook**

Eni expects the outlook for 2012 to be a challenging one as the global economic recovery loses steam, and is weighted down by weakening growth prospects in the euro-zone.

The energy commodities markets are expected to remain volatile. In relation to short-term financial projections, Eni assumes a full-year oil price of \$117 a barrel for the Brent crude benchmark as steady demand from China and other emerging economies, and ongoing geopolitical risks and uncertainties support the oil market, which are partly offset by a recovery in the Libyan output. Management expects unfavorable trading conditions to continue in the European gas sector. Gas demand is projected to fall sharply as a consequence of the economic slowdown as well as a big drop in thermoelectric consumption. In the meantime the marketplace is seen as well supplied, including very liquid continental hubs for spot transactions. Against this backdrop, management expects stiff price competition among operators, taking into account minimum off-take obligations in gas purchase take-or-pay contracts and reduced sales opportunities which lead to continued margin pressure. Refining margins are anticipated to remain at unprofitable levels due to high costs of oil supplies and oil-linked energy utilities, falling demand and excess capacity. Against this backdrop, key volumes trends for the year are expected to be the following:

- **Production of liquids and natural gas:** production is expected to grow compared to 2011 (in 2011 hydrocarbons production was reported at 1.58 million boe/d) driven by an ongoing recovery in the Company's Libyan output to achieve the pre-crisis level. This driver will help the Company absorb the impact of project rescheduling at important fields, the shutdown of the Elgin-Franklin platform off the British section of the North Sea, and crude oil losses in Nigeria due to rapidly escalating acts of sabotage and theft;
- **Worldwide gas sales:** management expects natural gas sales to be roughly in line with 2011 (in 2011, worldwide gas sales were reported at 96.76 bcm and included sales of both consolidated subsidiaries and equity-accounted entities, as well as upstream direct sales in the US and the North Sea). Against the backdrop of widespread weakness in demand, management is targeting to boost sales volumes and market share and to retain and develop its retail customer base. Outside Italy, the main engines of growth will be sales expansion in the key markets of France, Germany/Austria and Belgium and opportunities in the global LNG market. Management intends to leverage on an improved cost position due to the benefits of contract renegotiations, integration of recently-acquired assets in core European markets, development of the commercial offer through a multi-Country platform, and service excellence. Management is also planning to enhance trading activities to draw value from existing assets;
- **Refining throughputs on Eni's account:** management expects to reduce processed volumes at the Company's refineries (in 2011 refining throughputs on Eni's account were reported at 31.96 million tonnes) in response to falling demand and a negative trading environment. Management will seek to reduce the business exposure to the market volatility and improve profit and loss by means of better yields, plant re-configuration and flexibility, as well as efficiency gains by cutting fixed and logistics costs and energy savings;
- **Retail sales of refined products in Italy and the Rest of Europe:** management foresees retail sales volumes to decline from 2011 (in 2011, retail sales volumes in Italy and Rest of Europe were reported at 11.37 million tonnes) dragged down by an expected sharp contraction in domestic consumption of fuels. In Italy where competition has

been increasing remarkably, management intends to preserve the Company's market share by leveraging marketing initiatives tailored to customers' needs, the strength of the Eni brand targeting to complete the rebranding of the network, the development of non-oil activities and an excellent service. Outside Italy, the Company will target stable volumes on the whole;

- **Engineering & Construction:** the profitability outlook of this business remains bright due to an established competitive position and a robust order backlog.

For the full year of 2012, management expects a capital budget in its continuing operations almost in line with 2011 (in 2011 capital expenditure of the continuing operations amounted to euro 11.91 billion, while expenditures incurred in joint venture initiatives and other investments amounted to euro 0.36 billion). Management plans to continue spending on exploration to appraise the mineral potential of recent discoveries (Mozambique, Norway, Ghana and Indonesia) and invest large amounts on developing growing areas and maintaining field plateaus in mature basins. Other investment initiatives will target the completion of the EST project in the refining business, strengthening selected petrochemicals plants and the continued upgrading of the Saipem vessels and rigs. The ratio of net borrowings to total equity leverage is expected to improve from the level achieved at the end of 2011, assuming a Brent price of \$117 a barrel and the positive impacts of the ongoing divestments.

Table of Contents

This press release has been prepared on a voluntary basis in accordance with the best practices in the marketplace. It provides data and information on the Company's business and financial performance for the second quarter and the first half of 2012 (unaudited). Results of operations for the first half of 2012 and material business trends have been extracted from the interim consolidated report 2012 which has been prepared in compliance with Article 154-ter of the Italian code for securities and exchanges ("Testo Unico della Finanza" - TUF) and approved by the Company's Board of Directors yesterday. The interim report has been transmitted to the Company's external auditor as provided by applicable regulations. Publication of the interim report is scheduled in the first half of August, alongside the Company's external auditor report upon completion of relevant audits. In this press release results and cash flows are presented for the second and first quarter and the first half of 2012 and for the second quarter and the first half of 2011. Information on liquidity and capital resources relates to the end of the periods as of June 30, 2012, March 31, 2011 and December 31, 2011. Tables contained in this press release are comparable with those presented in management's disclosure section of the Company's annual report and interim report. Quarterly and semi-annual accounts set forth herein have been prepared in accordance with the evaluation and recognition criteria set by the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and adopted by the European Commission according to the procedure set forth in Article 6 of the European Regulation (CE) No. 1606/2002 of the European Parliament and European Council of July 19, 2002.

The Decree of the President of the Council of Ministers issued on May 25, 2012 (the "DPCM") defined the criteria, terms and conditions to implement the provisions of Article 15 of Law Decree No. 1 of January 24, 2012 (enacted into Law No. 27 of March 24, 2012), pursuant to which Eni shall divest its shareholding in Snam in accordance with the model of ownership unbundling set out in Article 19 of Legislative Decree No. 93 of June 1, 2011.

The Italian regulated businesses managed by Snam represent a major line of business and therefore they have been reported as discontinued operations within results for the second quarter 2012 and first half of 2012 in accordance with the guidelines of IFRS 5. The suspension of the amortization process of Snam tangible and intangible assets as requested by the above mentioned accounting standard was immaterial to the Group results for both reporting periods as the deal was finalized late in the quarter. Assets and liabilities, results of operations and cash flow of the discontinued operations are reported separately from the Group's continuing operations. Accordingly, considering that Snam and its subsidiaries are fully consolidated in Eni's accounts, results of the discontinued operations are those deriving from transactions with third parties and therefore profits earned by the discontinued operations on sales to the continuing operations are eliminated on consolidation from the discontinued operations and attributed to the continuing operations and vice versa. This representation does not indicate the profits earned by continuing or discontinued operations, as if they were stand-alone entities. Results of the previous reporting periods have been restated accordingly.

Non-GAAP financial measures and other performance indicators disclosed throughout this press release are accompanied by explanatory notes and tables to help investors to gain a full understanding of said measures in line with guidance provided by recommendation CESR/05-178b.

Eni's Chief Financial Officer, Alessandro Bernini, in his position as manager responsible for the preparation of the Company's financial reports, certifies, that data and information disclosed in this press release correspond to the Company's evidence and accounting books and records, pursuant to rule 154-bis paragraph 2 of Legislative Decree No. 58/1998.

Disclaimer

This press release, in particular the statements under the section "Outlook", contains certain forward-looking statements particularly those regarding capital expenditures, development and management of oil and gas resources, dividends, allocation of future cash flow from operations, future operating performance, gearing, targets of production and sales growth, new markets, and the progress and timing of projects. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that will or may occur in the future. Actual results may differ from those expressed in such statements, depending on a variety of factors, including the timing of bringing new fields on stream; management's ability in carrying out industrial plans and in succeeding in commercial transactions; future levels of industry product supply; demand and pricing; operational problems; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; development and use of new technology; changes in public expectations and other changes in business conditions; the actions of competitors and other factors discussed elsewhere in this document. Due to the seasonality in demand for natural gas and certain refined products and the changes in a number of external factors affecting Eni's operations, such as prices and margins of hydrocarbons and refined products, Eni's results from operations and changes in net borrowings for the second quarter cannot be extrapolated on an annual basis.

Group results

Net profit attributable to Eni's shareholders from continuing operations for the second quarter of 2012 decreased by euro 1,041 million to euro 156 million (down 87%). The result was driven by a decreased operating performance (down 22.9%) mainly driven by the Gas & Power and Refining & Marketing Divisions due to weak demand and continuing margin pressure. Results were also impacted by the recognition of impairment losses amounting to euro 1.1 billion relating to goodwill allocated to the European gas market cash generating unit and refinery assets based on a reduced profitability outlook. These negatives were partly offset by the excellent performance reported by the Exploration & Production Division, which was boosted by production growth and the depreciation of the euro vs. the US dollar.

Net profit was also impacted by an increased tax rate reflecting higher taxable profit reported by subsidiaries of the Exploration & Production Division which incurred higher-than average tax rates, as well as a significant amount of non-deductible charges (mainly the goodwill impairment).

Net profit attributable to Eni's shareholders including results from discontinued operations was euro 227 million, a decrease of euro 1,027 million, or 81.9%, from the second quarter of 2011.

In the first half of 2012, **net profit attributable to Eni's shareholders from continuing operations** was euro 3,700 million, a decrease of euro 111 million, down by 2.9% from the first half of 2011.

Operating profit increased by 1.4% from the first half of 2011 due to the above mentioned drivers as explained in the review of the second quarter profit, as well as the fact that in the first quarter of 2012 the Gas & Power Division reported profit retroactive to the beginning of 2011 following the renegotiations of certain gas supply contracts.

In addition, the Group's net profit was helped by an extraordinary gain amounting to euro 835 million registered on Eni's interest in Galp in the first quarter. This was recognized in connection with a capital increase made by Galp's subsidiary Petrogal whereby a new shareholder, Sinopec, subscribed its share by contributing a cash amount which was fairly in excess of the net book value of the interest acquired. These positives were more than offset by higher net finance and exchange rate charges (down euro 231 million) due to an increased average net finance debt, fair value losses recorded on certain derivatives on interest rates (which did not meet the formal criteria for hedging accounting

provided by IAS 39) and the negative impact of estimate revision at certain discounted provisions due to a changed interest rate environment. Net profit was also impacted by higher income taxes (down euro 1,037 million) reflecting increased Group reported tax rate (up 7 percentage points) due to the above mentioned drivers as explained in the review of the second quarter, which were partly offset by the aforementioned extraordinary gain at the Galp investment which was a non-taxable item.

In the first half of 2012, **net profit attributable to Eni s shareholders** which includes results reported from the discontinued operations was euro 3,844 million, increasing by 1.1% from the same period of the previous year.

In the second quarter of 2012, **adjusted operating profit from continuing operations** was euro 4,243 million, up 14.2% from the second quarter of 2011 (euro 10,371 million in the first half, or 18.8%).

Adjusted net profit attributable to Eni s shareholders from continuing operations amounted to euro 1,381 million in the second quarter, almost in line with adjusted net profit registered in the same period of the previous year.

Adjusted net profit was calculated by excluding an inventory holding gain which amounted to euro 209 million and special losses of euro 1,016 million, net of exchange rate differences and exchange rate derivative instruments reclassified in operating profit (euro 207 million), which resulted in a net positive adjustment of euro 1,225 million.

Table of Contents

Special items in operating profit from continuing operations (net charges of euro 1,137 million and euro 1,140 million in the second quarter and the first half of 2012, respectively) mainly regarded: (i) impairment losses of euro 1,153 million mainly relating to goodwill and tangible assets in the gas marketing and refining businesses. These were based on management's outlook pointing to declining commodity demand due to the economic downturn and rising competitive pressure which are expected to negatively impact unit margins. Minor impairment losses were recorded at certain oil&gas properties in the United States reflecting a changed pricing environment and downward reserve revisions; (ii) exchange rate differences and exchange rates derivative instruments reclassified as operating items (euro 207 million); (iii) provisions for redundancy incentives (euro 49 million) and environmental issues (euro 35 million). These losses were partly offset by a gain due to the divestment of a 10% interest in the Karachaganak project to the Kazakh partner KazMunaiGas as part of the settlement agreement.

In the first half of 2012, **adjusted operating profit from continuing operations** was euro 10,371 million, up 18.8% from a year ago. **Adjusted net profit attributable to Eni's shareholders from continuing operations** of euro 3,787 million increased by euro 147 million, or 4%, from the same period of the previous year.

Adjusted net profit was calculated by excluding an inventory holding gain amounting to euro 70 million and special losses of euro 157 million, resulting in a net adjustment of plus euro 87 million. Special charges recorded in the first half related to net losses posted in the second quarter offset by the extraordinary gain on the Galp interest (euro 835 million).

Results by Division

The increase in the Group's adjusted net profit reported in the second quarter of 2012 reflected higher adjusted operating profit achieved by the Exploration & Production and Engineering & Construction Divisions. The Gas & Power and Refining & Marketing Divisions reported slightly lower results.

In the first half of 2012, net profit increased by 4% reflecting a better operating performance (up 18.8%) reported by the Exploration & Production and Gas & Power Divisions and, to a lesser extent, the Engineering & Construction Division. The results of the Gas & Power Division reflected the economic benefits, posted in the first quarter 2012 results, associated with the renegotiations of the gas supply contracts with retroactive effect to the beginning of 2011.

Exploration & Production

In the second quarter of 2012, the Exploration & Production Division reported improved adjusted operating profit, which was up by 10.8% to euro 4,234 million (up 17.3% in the first half) driven by an ongoing recovery in Libyan activities. Results were boosted by the depreciation of the euro against the dollar. These positives were partly offset by rising expenses incurred in connection with exploration activities reflecting greater activity. Adjusted net profit was up by 2% and 5.3% from the second quarter and the first half of the previous year, respectively, as it was impacted by a higher adjusted tax rate (up 2.1 and 3.4 percentage points) due to a larger share of taxable profit reported in Countries with higher taxation.

Engineering & Construction

The Engineering & Construction business reported steady operating results at euro 388 million (up 2.6%) and euro 762 million (up 5.8%) for the second quarter and the first half of 2012, respectively. This trend reflected higher revenues and better margins on the works executed in both the reporting periods, mainly in the Engineering & Construction business unit. Adjusted net profit increased by 1.8% and 3% in the second quarter and the first half of 2012, respectively.

Gas & Power

In the second quarter of 2012, the Gas & Power Division reported wider adjusted operating losses at minus euro 369

million, down by euro 55 million from the second quarter of 2011. This was negatively affected by lower results reported by the International transport activity, which were down by 29.5% and 20% in the quarter and the first half of 2012 respectively, due to the asset divestments finalized in 2011. The Marketing business managed to achieve stable losses at minus euro 460 million in the second quarter of 2012 leveraging an improved cost position due to the benefits of contract renegotiations and a recovery of Libyan supply which helped the Company withstand a tough trading environment with lower gas demand and strong competitive pressure impacting both selling margins and volumes. Adjusted net loss for the second quarter of 2012 was euro 90 million, improving by euro 60 million from the second quarter of 2011.

In the first half of 2012 the Gas & Power Division reported an adjusted operating profit of euro 553 million, increasing by euro 532 million from the first half of 2011.

The main driver was profit retroactive at the beginning of 2011, relating to the renegotiations of certain gas supply contracts. The other factors behind the first half results were the same as in the quarterly review. In the first half of 2012, adjusted net profit increased by euro 399 million to euro 587 million.

Table of Contents

Refining & Marketing

In the second quarter of 2012, the Refining & Marketing Division reported an adjusted operating loss of minus euro 144 million (minus euro 370 million for the first half of 2012), representing a decrease of euro 20 million from the second quarter of 2011, or 16.1% (down by euro 97 million from the first half of 2011, or 35.5%). The deeper operating losses reflected shrinking price differentials between light and heavy crudes and the weak fuel demand. Management has stepped up efforts to boost efficiency. Adjusted net loss widened by euro 25 million and euro 89 million in the second quarter and first half of 2012, respectively.

Chemicals

In the second quarter of 2012, the Chemicals Division reported an adjusted operating loss of minus euro 26 million, slightly better than the second quarter of 2011, against the backdrop of weak commodity demand impacted by the downturn. The operating loss incurred in the first half of 2012 was minus euro 195 million, sharply lower compared with the first half of 2011 as commodity margins in the first quarter of 2012 plunged due to the escalating cost of oil-based feedstock leading to a negative benchmark margin of cracking. This trend has improved somewhat during the second quarter. The adjusted net loss for the second quarter of 2012 was minus euro 23 million, in line with the second quarter of 2011. The first-half loss was sharply lower than a year ago (down by euro 113 million).

The Group's balance sheet as of June 30, 2012 was impacted by the depreciation of the euro against the US dollar, which was down by 2.7% from December 31, 2011 (from 1.294 to 1.259 dollars per euro as of June 30, 2012). This trend increased net capital employed, net equity and net borrowings by euro 1,270 million, euro 1,147 million and euro 123 million, respectively, as a result of exchange rate differences.

Fixed assets amounted to euro 80,336 million, representing a decrease of euro 13,031 million from December 31, 2011, reflecting the reclassification of Snam and its subsidiaries' assets to the line-item "Discontinued operations and assets held for sale including related liabilities". Other differences reported in the period were due to capital expenditure incurred (euro 5,647 million) and exchange differences, partly offset by depreciation, depletion, amortization and impairment charges (euro 5,741 million). The item "Equity-accounted investments" increased by

euro 616 million due to the increased book value of Eni's interest in Galp due to the extraordinary gain recorded in the period. Net payables related to investing activities decreased following recognition of a receivable relating to the divestment of a 10% interest in the Karachaganak project to the Kazakh partner KazMunaiGas as part of the settlement agreement (euro 258 million).

Net working capital amounted to a negative euro 4,037 million, representing an increase of euro 72 million mainly due to increased tax payables (down euro 1,531 million) and the negative impact of estimate revision of certain discounted provisions due to a changed interest rate environment (euro 565 million). The item "Other current assets, net" posted an increase relating to the reclassification of other current assets and liabilities of Snam as assets held for sale and the payments of receivables due to the Company's gas suppliers on the take-or-pay position accrued in 2011.

-
- (5) The summarized group balance sheet aggregates the amount of assets and liabilities derived from the statutory balance sheet in accordance with functional criteria which consider the enterprise conventionally divided into the three fundamental areas focusing on resource investments, operations and financing. Management believes that this summarized group balance sheet is useful information in assisting investors to assess Eni's capital structure and to analyze its sources of funds and investments in fixed assets and working capital. Management uses the summarized group balance sheet to calculate key ratios such as the proportion of net borrowings to shareholders' equity (leverage) intended to evaluate whether Eni's financing structure is sound and well-balanced.

Table of Contents

Discontinued operations and net assets held for sale including related liabilities (euro 15,154 million) represented the net assets attributable to Snam and its subsidiaries due to the ongoing divestment procedure of a controlling stake to Cassa Depositi e Prestiti and the residual shareholdings to institutional and retail investors, and non strategic assets in the Exploration & Production, Gas & Power and Refining & Marketing Divisions.

Shareholders equity including non controlling interest was euro 63,574 million, representing an increase of euro 3,181 million from December 31, 2011. This was due to comprehensive income for the period (euro 5,443 million) as a result of net profit (euro 4,297 million) and foreign currency translation differences, partly offset by dividend payments to Eni's shareholders and other equity movements (euro 2,275 million).

(2,181)	(6)	(2,274)	Dividends paid and changes in non-controlling interest and reserves	(2,176)	(2,280)	(104)
(1,027)	606	517	CHANGE IN NET BORROWINGS	141	1,123	982

Net cash provided by operating activities of continuing operations (euro 8,340 million) and cash from disposals of euro 774 million funded cash outflows relating to capital expenditure totaling euro 5,647 million and investments (euro 306 million) relating to the acquisition of Nuon in Belgium and joint venture projects, as well as dividend payments amounting to euro 2,298 million (of which euro 1,884 million related to dividends to Eni's shareholders and the remaining part related to other dividend payments to non-controlling interests). These flows and the re-financing of an intercompany loan due by Snam which was reported, as prescribed by IFRS 5, as discontinued operations, reduced the Group net debt by euro 1,123 million from December 31, 2011. Disposals of assets mainly regarded the divestment of a 10% interest in the Karachaganak field and other non strategic assets in the Exploration & Production Division.

-
- (6) Eni's summarized group cash flow statement derives from the statutory statement of cash flows. It enables investors to understand the link existing between changes in cash and cash equivalents (deriving from the statutory cash flows statement) and in net borrowings (deriving from the summarized cash flow statement) that occurred from the beginning of the period to the end of period. The measure enabling such a link is represented by the free cash flow which is the cash in excess of capital expenditure needs. Starting from free cash flow it is possible to determine either: (i) changes in cash and cash equivalents for the period by adding/deducting cash flows relating to financing debts/receivables (issuance/repayment of debt and receivables related to financing activities), shareholders' equity (dividends paid, net repurchase of own shares, capital issuance) and the effect of changes in consolidation and of exchange rate differences; (ii) changes in net borrowings for the period by adding/deducting cash flows relating to shareholders' equity and the effect of changes in consolidation and of exchange rate differences. The free cash flow is a non-GAAP measure of financial performance.

Other information

Continuing listing standards provided by Article No. 36 of Italian exchanges regulation about issuers that control subsidiaries incorporated or regulated in accordance with laws of extra-EU Countries.

Certain provisions have been recently enacted regulating continuing Italian listing standards of issuers controlling subsidiaries that are incorporated or regulated in accordance with laws of extra-EU Countries, also having a material impact on the consolidated financial statements of the parent company. Regarding the aforementioned provisions, as of June 30, 2012, ten of Eni's subsidiaries – Burren Energy (Bermuda) Ltd, Eni Congo SA, Eni Norge AS, Eni Petroleum Co Inc, NAOC-Nigerian Agip Oil Co Ltd, Nigerian Agip Exploration Ltd, Trans Tunisian Pipeline Co Ltd, Burren Energy (Congo) Ltd, Eni Finance USA Inc and Eni Trading & Shipping Inc – fall within the scope of the new continuing listing standard. Eni has already adopted adequate procedures to ensure full compliance with the new regulation.

Financial and operating information by Division for the second quarter and the first half of 2012 is provided in the following pages.

Results

In the **second quarter of 2012** the Exploration & Production Division reported an adjusted operating profit amounting to euro 4,234 million, representing an increase of euro 412 million from the second quarter of 2011, up by 10.8%. This was driven by increased sales volumes on the back of organic production growth and an ongoing recovery in Libyan activities. Furthermore, the depreciation of the euro over the dollar helped results from operations by an estimated amount of euro 380 million. The profit and loss was impacted by rising expenses incurred in connection with ongoing exploration activities.

Table of Contents

Special items excluded from adjusted operating profit amounted to a net gain of euro 219 million in the quarter (euro 218 million in the first half) and mainly related to the euro 339 million gain on the divestment of a 10% interest in the Karachaganak field to the Kazakh partner KazMunaiGas as part of the settlement agreement. This was partly absorbed by impairment losses recorded at certain oil and gas properties mainly in the United States related to a changed gas pricing environment and downward reserves revision (euro 91 million).

The second-quarter adjusted net profit increased by euro 34 million to euro 1,716 million (up by 2%) from the second quarter of 2011 due to an improved operating performance partly offset by a higher tax rate (up approximately 2.1 percentage points) due to larger taxable profit reported in Countries with higher taxation.

In the **first half of 2012** the Exploration & Production Division recorded an adjusted operating profit of euro 9,325 million, increasing by euro 1,372 million from the first half of 2011 or 17.3%. This trend reflected higher dollar realizations (oil up 4.6%; natural gas up 16.2%); the positive impact of the depreciation of the euro over the dollar (euro 530 million) and growth in production sold, offset in part by higher exploration costs related to higher activity levels.

First-half adjusted net profit increased by euro 186 million to euro 3,708 million (up by 5.3%) from the first half of 2011 due to an improved operating performance partly offset by a higher tax rate (up approximately 3.4 percentage points).

Operating review

Eni reported liquids and gas production of 1,647 kboe/d for the **second quarter of 2012** increasing by 10.6% from the second quarter of 2011. The performance was driven by an ongoing recovery in Libyan production and starting-up and ramping-up new fields in Australia, Russia and Egypt. These positives were partly offset by the shutdown of the Elgin/Franklin field (Eni's interest 21.87%) in the UK due to the accident occurred in the field and crude oil losses in Nigeria due to rapidly escalating acts of sabotage and theft, in addition to mature field declines. The share of oil and natural gas produced outside Italy was 89% (89% in the second quarter of 2011).

Liquids production (856 kbbbl/d) increased by 63 kbbbl/d, or 7.9%, due to the ramp-up of Libyan production and the reaching of full production at the Kitan field (Eni operator with a 40% interest) in Australia. These positives were partly offset by lower production in the United Kingdom and Nigeria as well as mature fields declines.

Natural gas production (4,394 mmcf/d) increased by 527 mmcf/d (up 12.7%) due to the ramp-up of Libyan operations and startups in Russia and Egypt. Main decreases were registered in the United Kingdom, the Gulf of Mexico and Congo due to facility downtimes due to technical reasons and mature field declines.

In the **first half of 2012** Eni reported liquids and gas production of 1,661 kboe/d, increasing by 4.7% from the second half of 2011. The performance was driven by an ongoing recovery in Libyan production and starting-up and ramping-up new fields in Australia, Russia and Egypt. These positives were partly offset by lower production in the UK and Nigeria for the reasons described above and mature field declines. The share of oil and natural gas produced outside Italy was 89% (89% in the second half of 2011).

Liquids production (861 kbbbl/d) increased by 15 kbbbl/d, or 1.8%, due to the ramp-up of Libyan production and organic growth. Production declined in the United Kingdom and Nigeria.

Natural gas production (4,437 mmcf/d) increased by 327 mmcf/d (up 8.6%) due to the ramp-up of Libyan operations and start-ups in Russia and Egypt. The main decreases were registered in the United Kingdom and the Gulf of Mexico.

Results

In the **second quarter of 2012**, the Gas & Power Division reported adjusted operating loss of euro 369 million, deeper than the loss of the second quarter of 2011 (down by euro 55 million). The Marketing business reported almost stable adjusted operating losses (down 3.8%) in spite of declining demand and increasing competitive pressures. International transport results were down by 29.5% due to the divestment finalized in 2011 of the Company's interests in the entities engaged in the international transport of gas in Europe.

Adjusted net loss was euro 90 million, improving by euro 60 million from the second quarter of 2011.

In the **first half of 2012** the Gas & Power Division reported adjusted operating profit of euro 553 million, up euro 532 million from the first half of 2011. The Marketing business reported a euro 578 million increase driven by the economic benefits associated with the renegotiations of gas supply contracts, some of which retroactive to the beginning of 2011, offset in part by the negative effects of an industry downturn. International transport results were down by 20%.

Adjusted net profit for the first half of 2012 was euro 587 million, an increase of euro 399 million from the first half of 2011 due to a better operating performance.

Table of Contents**Operating review***Marketing*

In the **second quarter of 2012**, the Marketing business registered an operating loss of euro 460 million, slightly worse than the second quarter of 2011 (down by euro 17 million, or 3.8%) in spite of continued deteriorating fundamentals and rising competitive pressures due to reduced sales opportunities. Those caused widening spreads between oil-linked supply costs and spot prices of gas. These negative trends were absorbed by the Company's improved cost position due to contract renegotiations and a better supply mix due to the restart of Libyan supplies. Results were also affected by volumes losses incurred in certain profitable market segments due to declining demand, competitive pressures and inter-fuel competition.

In the **first half of 2012**, the Marketing business reported adjusted operating profit of euro 369 million, sharply higher than the first half of 2011 (up by euro 578 million). This reflected the recognition of profit retroactive to the beginning of 2011 associated with the renegotiations of certain gas supply contracts, which occurred in the first quarter of 2012.

In determining adjusted operating profit for the second quarter and first half of 2012, management excluded an impairment loss of euro 849 million relating to the goodwill allocated to the European market cash generating unit. This was based on management's expectations pointing to a reduced profitability outlook in the light of continuing demand weakness and rising competitive pressure that would impact selling margins.

Management tracks an alternative performance measure to assess the underlying performance of the Marketing business, which is the EBITDA pro-forma adjusted (for further details see page 20) that includes Eni's share of results of associates. This performance indicator reported increasing results of Marketing activity in both reporting periods.

Sales of natural gas for the second quarter of 2012 were 20.15 bcm, a decrease of 0.85 bcm from the second quarter of 2011, down 4%, due to a weak demand which was impacted by the downturn and growing competitive pressure. Sales included Eni's own consumption, Eni's share of sales made by equity-accounted entities and upstream sales in Europe and in the Gulf of Mexico.

Sales volumes in the Italian market amounted to 6.52 bcm, a decrease of 0.59 bcm, or 8.3%, from the second quarter of 2011. This was mainly due to sharply lower supplies to the power generation sector (down 0.66 bcm) which were caused by lower demand for electricity and a shift to renewable sources and coal due to their higher competitiveness. Other declines were recorded in sales to wholesalers (down 0.25 bcm) due to increased competitive pressures and industrials (down 0.11 bcm). Increases were recorded in sales at certain Italian exchanges (up 0.30 bcm) and in volumes marketed to residential users (up 0.08 bcm) boosted by colder winter weather.

Sales to importers to Italy posted a steep decline down by 0.32 bcm, or 57.1%, due to the expiration of certain supply contracts, partly offset by the recovered availability of Libyan gas.

Sales in Europe slightly decreased by 0.14 bcm, or 1.3%, in particular in UK/Northern Europe (down 0.45 bcm) and Germany/Austria (down 0.13 bcm). These negative trends were partly offset by growth in Turkey (up 0.21 bcm), France (up 0.17 bcm) and the Iberian Peninsula (up 0.04 bcm).

Sales on markets outside Europe were on a positive trend (up 0.31 bcm) due to greater LNG sales in the Far East, in particular Japan.

Sales of natural gas for the first half of 2012 were 50.76 bcm, a decrease of 2.57 bcm from the first half of 2011, down 4.8%. Sales included Eni's own consumption, Eni's share of sales made by equity-accounted entities and upstream sales in Europe and in the Gulf of Mexico. This decline concerned both Italy and the Rest of Europe due to the drivers described above and Benelux (down 1.38 bcm) due to competitive pressure and, in the first quarter, a weaker seasonal effect on consumption. Sales of LNG increased globally in premium market, especially in Japan and Argentina.

21.00	30.61	20.15	(4.0)	WORLDWIDE GAS SALES	53.33	50.76	(4.8)

Electricity sales were 9.62 TWh in the second quarter of 2012, decreasing by 0.4% from the second quarter of 2011, due to lower volumes traded on the Italian power exchange that offset the increase in wholesalers and retail segment. In the first half of 2012, despite sluggish demand in Italy, sales increased by 2.57 TWh or 13.3%, mostly directed to customers in the free market.

International Transport

This business reported an adjusted operating profit of euro 91 million for the **second quarter of 2012** (euro 184 million in the first half of 2012) representing a decrease of euro 38 million from the second quarter of 2011, down 29.5% (down euro 46 million or 20% in the first half), mainly due to the divestment of the Company's interests in the entities engaged in the international transport of gas from Northern Europe and Russia.

Other performance indicators

Follows a breakdown of the pro-forma adjusted EBITDA by business:

(euro million)

EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization charges) on an adjusted basis is calculated by adding amortization and depreciation charges to adjusted operating profit, which is also modified to take into account the impact associated with certain derivatives instruments as detailed below. This performance indicator includes the adjusted EBITDA of Eni's wholly owned subsidiaries and Eni's share of adjusted EBITDA generated by certain associates which are accounted for under the equity method for IFRS purposes. In order to calculate the EBITDA pro-forma adjusted, the adjusted operating profit of the Marketing business has been modified to take into account the impact of the settlement of certain commodity and exchange rate derivatives that do not meet the formal criteria to be classified as hedges under the IFRS. These are entered into by the Company in view of

Table of Contents

certain amounts of gas and electricity that the Company expects to supply at fixed prices during future periods. The impact of those derivatives has been allocated to the EBITDA pro-forma adjusted relating to the reporting periods during which those supplies at fixed prices are recognized. Management believes that the EBITDA pro-forma adjusted is an important alternative measure to assess the performance of Eni's Gas & Power Division, taking into account evidence that this Division is comparable to European utilities in the gas and power generation sector. This measure is provided in order to assist investors and financial analysts in assessing the divisional performance of Eni Gas & Power, as compared to its European peers, as EBITDA is widely used as the main performance indicator for utilities. The EBITDA pro-forma adjusted is a non-GAAP measure under IFRS.

Results

In the **second quarter of 2012**, the Refining & Marketing business reported an adjusted operating loss amounting to euro 144 million, reflecting shrinking price differentials between light and heavy crudes and weak fuel demand. A negative trading environment was partly counteracted by efficiency enhancement measures mainly designed to reduce

- 21 -

Table of Contents

energy costs, the optimization of plant set-up and lower throughputs at the weakest refineries in the current scenario. Marketing results increased mainly in the wholesale marketing activity thanks to higher margins and contractual pricing schemes adopted in certain business segments. Retail activity reported lower results reflecting the decrease in unit margins which were impacted by the expenses incurred to execute certain marketing initiatives such as full-day discount at fully-automated outlets and a special discount on prices at the pump during the summer week-ends, as well as declining demand for fuels reflecting the economic downturn and mounting competitive pressures.

Special charges excluded from adjusted operating loss amounted to euro 181 million and mainly related to impairment charges (euro 182 million) which were incurred at certain refining plants due to the negative short and medium term prospects for refining margins, and employee redundancy incentives (euro 23 million).

In the second quarter of 2012, adjusted net loss was euro 110 million (up euro 25 million from the second quarter of 2011) mainly due to a lower operating performance and lower results of equity-accounted associates.

In the **first half of 2012** the Refining & Marketing business reported an adjusted operating loss amounting to euro 370 million, up euro 97 million from the first half of 2011 mainly due to a weaker trading environment and lower demand.

Adjusted net loss was euro 253 million, widening by euro 89 million from the first half of 2011.

Operating review

Eni's **refining throughputs** for the second quarter of 2012 were 7.10 mmt tonnes (14.27 mmt tonnes in the first half of 2012), with a 6.9% decline from the second quarter of 2011 (down 9.5% from the first half of 2011). In Italy, processed volumes decreased (down 7.5% and 11.4% in the second quarter and first half, respectively) due to an upset at the Sannazzaro plant, scheduled standstills in order to mitigate the negative impact of a negative trading environment at the Taranto refinery, Venice plant (temporarily shut down from November 2011 to April 2012) and Gela plant (two production line were shut down in June 2012). Outside Italy, Eni's refining throughputs decreased by 4.5% in particular in the Czech Republic due to planned standstills at the Litvinov refinery (production increased by 0.8% in the first half, in particular in Germany).

Retail sales in Italy (1.98 mmt tonnes in the quarter, 3.79 mmt tonnes in the first half of 2012) decreased by approximately 160 ktonnes, down 7.5% (approximately 290 ktonnes, down 7.1% in the first half), driven by lower consumption of gasoil and gasoline of more than 9%. The market share increased by 0.5 percentage points from the second quarter of 2011 to 30.8% in the second half of 2012, peaking at 33% in June 2012, also due to the positive impact of commercial initiatives. The premium segment decreased from the corresponding quarter of 2011.

Wholesale sales in Italy (2.18 mmt tonnes in the quarter, 4.24 mmt tonnes in the first half) declined by approximately 40 ktonnes, down 1.8% (down 3.9% in the first half) from the same quarter of 2011, on the back of a decline in fuel demand higher than 11%. Average market share in the second quarter of 2012 was 29.7% (25.6% in the second quarter of 2011). Lower sales volumes were recorded in bunkering, lower jet fuel sales and special products which reflected lower coke availability.

Retail sales in the rest of Europe (approximately 760 ktonnes in the quarter, 1.48 ktonnes in the first half) were in line with the second quarter of 2011 (up 1.4% in the first half) reflecting increased sales in Austria and Switzerland that offset lower sales in Eastern Europe and in France.

Wholesale sales in the rest of Europe (1.03 mmt tonnes in the second quarter, 1.92 mmt tonnes in the first half) increased by 6.2% from the second quarter of 2011 (up 7.9 in the first half), mainly in Switzerland, Eastern Europe and France.

(a) For a detailed explanation of adjusted operating profit and adjusted net profit see the paragraph "Reconciliation of reported operating profit and reported net profit to results on an adjusted basis".

Table of Contents**NON-GAAP measures****Reconciliation of reported operating profit and reported net profit to results on an adjusted basis**

Management evaluates Group and business performance on the basis of adjusted operating profit and adjusted net profit, which are arrived at by excluding inventory holding gains or losses, special items and, in determining the business segments adjusted results, finance charges on finance debt and interest income. The adjusted operating profit of each business segment reports gains and losses on derivative financial instruments entered into to manage exposure to movements in foreign currency exchange rates which impact industrial margins and translation of commercial payables and receivables. Accordingly also currency translation effects recorded through profit and loss are reported within business segments adjusted operating profit.

The taxation effect of the items excluded from adjusted operating or net profit is determined based on the specific rate of taxes applicable to each of them. The Italian statutory tax rate is applied to finance charges and income (38% is applied to charges recorded by companies in the energy sector, whilst a tax rate of 27.5% is applied to all other companies). Adjusted operating profit and adjusted net profit are non-GAAP financial measures under either IFRS, or US GAAP. Management includes them in order to facilitate a comparison of base business performance across periods, and to allow financial analysts to evaluate Eni's trading performance on the basis of their forecasting models.

The following is a description of items that are excluded from the calculation of adjusted results.

Inventory holding gain or loss is the difference between the cost of sales of the volumes sold in the period based on the cost of supplies of the same period and the cost of sales of the volumes sold calculated using the weighted average cost method of inventory accounting.

Special items include certain significant income or charges pertaining to either: (i) infrequent or unusual events and transactions, being identified as non-recurring items under such circumstances; (ii) certain events or transactions which are not considered to be representative of the ordinary course of business, as in the case of environmental provisions, restructuring charges, asset impairments or write ups and gains or losses on divestments even though they occurred in past periods or are likely to occur in future ones; or (iii) exchange rate differences and derivatives relating to industrial activities and commercial payables and receivables, particularly exchange rate derivatives to manage commodity pricing formulas which are quoted in a currency other than the functional currency. Those items are reclassified in operating profit with a corresponding adjustment to net finance charges, notwithstanding the handling of foreign currency exchange risks is made centrally by netting off naturally-occurring opposite positions and then dealing with any residual risk exposure in the exchange rate market.

As provided for in Decision No. 15519 of July 27, 2006 of the Italian market regulator (CONSOB), non recurring material income or charges are to be clearly reported in the management's discussion and financial tables. Also, special items include gains and losses on re-measurement at fair value of certain non hedging commodity derivatives, including the ineffective portion of cash flow hedges and certain derivatives financial instruments embedded in the pricing formula of long-term gas supply agreements of the Exploration & Production Division.

Finance charges or income related to net borrowings excluded from the adjusted net profit of business segments are comprised of interest charges on finance debt and interest income earned on cash and cash equivalents not related to operations.

Therefore, the adjusted net profit of business segments includes finance charges or income deriving from certain segment-operated assets, i.e., interest income on certain receivable financing and securities related to operations and finance charge pertaining to the accretion of certain provisions recorded on a discounted basis (as in the case of the asset retirement obligations in the Exploration & Production Division). Finance charges or interest income and related taxation effects excluded from the adjusted net profit of the business segments are allocated on the aggregate Corporate and financial companies.

For a reconciliation of adjusted operating profit and adjusted net profit to reported operating profit and reported net profit see tables below.

Table of Contents**Leverage and net borrowings**

Leverage is a measure used by management to assess the Company's level of indebtedness. It is calculated as a ratio of net borrowings which is calculated by excluding cash and cash equivalents and certain very liquid assets from finance debt to shareholders' equity, including non-controlling interest. Management periodically reviews leverage in order to assess the soundness and efficiency of the Group balance sheet in terms of optimal mix between net borrowings and net equity, and to carry out benchmark analysis with industry standards.

(*) Net cash used in investing activities included investments in certain financial assets to absorb temporary surpluses of cash or as a part of our ordinary management of financing activities. Due to their nature and the circumstance that they are very liquid, these financial assets are netted against finance debt in determining net borrowings. Cash flows of such investments were as follows:

(euro million)					
Second Quarter 2011	First Quarter 2012	Second Quarter 2012		First Half 2011	First Half 2012
			Financing investments:

3,343	2,632	3,015	(9.8)		5,958	5,647	(5.2)

In the first half of 2012, capital expenditure amounted to euro 5,647 million (euro 5,958 million in the first half 2011) relating mainly to:

- development activities deployed mainly in Norway, the United States, Congo, Kazakhstan, Italy, Angola and Egypt, and exploratory activities of which 97% was spent outside Italy, primarily in Mozambique, Ghana, Nigeria, Egypt, Indonesia and the United States;
- upgrading of the fleet used in the Engineering & Construction Division (euro 546 million);
- refining, supply and logistics with projects designed to improve the conversion rate and flexibility of refineries (euro 228 million), as well as realization and upgrading of the refined product retail network in Italy and the rest of Europe (euro 47 million);
- initiatives to improve flexibility of the combined cycle power plants (euro 47 million).

Capital expenditure of Snam sector (euro 493 million) mainly related the development and upgrading of Eni's natural gas transport network in Italy, distribution network and increase of storage capacity.
