Carbonite, Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Nature of Business

Carbonite, Inc. ("we" or the "Company") was incorporated in the State of Delaware on February 10, 2005 and is a provider of cloud backup and restore solutions. The Company's solutions provide powerful features packaged in a cost-effective, simple and secure manner and are designed to address the specific needs of small and medium-sized businesses ("SMBs") and individuals.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") and include the accounts of the Company and its wholly owned subsidiaries. All intercompany accounts and transactions between the Company and its subsidiaries have been eliminated in consolidation.

The accompanying unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the United States Securities and Exchange Commission ("SEC"), the instructions to Form 10-Q, and the provisions of Regulation S-X pertaining to interim financial statements. Accordingly, certain information and footnote disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. These condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto, included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, as filed with the SEC on March 8, 2016.

In the opinion of management, the condensed consolidated financial statements reflect all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of the Company's financial position for the periods presented. The results for the periods presented are not necessarily indicative of future results.

During 2016, the Company recorded an adjustment for payments owed to foreign tax authorities inclusive of any interest and penalties that were not accrued for in prior fiscal years. This adjustment was recorded as an increase to accrued liabilities for approximately \$1.2 million with a corresponding expense recorded in general and administrative expenses in the condensed consolidated statements of operations. Of this \$1.2 million adjustment, approximately \$0.2 million, \$0.2 million, \$0.2 million and \$0.6 million related to the years ended December 31, 2015, 2014, 2013 and prior, respectively. The Company concluded the effect of these adjustments were not material to its consolidated financial statements for the current period, the forecasted fiscal year, or any of the prior periods and, as such, these consolidated financial statements are not materially misstated.

Reclassifications

The Company has reclassified certain amounts in its condensed consolidated statements of cash flows as of September 30, 2015 to conform to the condensed consolidated statements of cash flows presentation as of September 30, 2016.

The reclassification relates to the merger of the provision for (reduction of) reserves on accounts receivable caption into the change in accounts receivable caption.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Although the Company regularly assesses these estimates, actual results could differ materially from these estimates. Changes in estimates are recorded in the period in which they become known. The Company bases its estimates on historical experience and various other assumptions that it believes to be reasonable under the circumstances. Actual results may differ from management's estimates if past experience or other assumptions do not turn out to be substantially accurate, even if such assumptions are reasonable when made.

Table of Contents

Translation of Foreign Currencies

The functional currency of the Company's foreign subsidiaries is generally the local currency in which they operate. The Company translates foreign subsidiaries' assets and liabilities at the exchange rates in effect at period-end and revenues and expenses at the average exchange rates in effect during the period. Gains and losses from foreign currency translation are recorded as a component of other comprehensive loss.

Foreign currency transaction gains and losses are included in interest and other income (expense), net in the consolidated statements of operations, net of losses and gains from any related derivative financial instruments.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to credit risk primarily consist of cash and cash equivalents, marketable securities, derivatives, and accounts receivable. The Company maintains its cash and cash equivalents, marketable securities, and derivatives with high-quality financial institutions and, consequently, the Company believes that such funds are subject to minimal credit risk. Cash equivalents and marketable securities consist of investment grade debt securities or money market funds investing in such securities.

The Company regularly reviews its accounts receivable related to customers billed on traditional credit terms and provides an allowance for expected credit losses. Due to these factors, no additional credit risk beyond amounts provided for collection losses is believed by management to be probable in the Company's accounts receivable. At September 30, 2016, one customer represented 10% or more of the Company's accounts receivable balance, and at December 31, 2015, no customer represented 10% or more of the Company's accounts receivable balance. At September 30, 2016 and December 31, 2015, no customer represented 10% or more of the Company's revenue for the periods presented.

Revenue Recognition

The Company derives revenue from Software-as-a-Service ("SaaS") arrangements and multiple element arrangements. Generally, the Company recognizes revenue when (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred, (iii) the fee is fixed or determinable and (iv) collectability is probable. Our revenue recognition policies for these revenue streams are discussed below.

The Company derives the majority of its revenue from cloud backup and restore solutions subscription services. These services are standalone independent service solutions, which are generally contracted for a one- to three-year term. Subscription arrangements include access to use the Company's services via the internet. The Company recognizes revenue in accordance with Accounting Standards Codification ("ASC") 605-10, Overall Revenue Recognition. Subscription revenue is recognized ratably on a daily basis upon activation of service over the subscription period, when persuasive evidence of an arrangement with a customer exists, the subscription period has been activated, the price is fixed or determinable, and collection is reasonably assured. Amounts received prior to satisfying the above revenue recognition criteria are recorded as deferred revenue in the accompanying condensed consolidated balance sheets.

For multiple element arrangements, including those containing a subscription arrangement, the Company follows the multiple element guidance in accordance with ASC 605-25, Revenue Recognition - Multiple-Element Arrangements. The Company allocates revenue to each element based on the relative selling price method to the overall arrangement consideration. The selling price for a deliverable is based on vendor-specific objective evidence ("VSOE"), if available, Third Party Evidence ("TPE"), if VSOE is not available, or Best Estimate of Selling Price ("BESP"), if neither VSOE nor TPE are available. Typically, the Company uses BESP for these arrangements.

For its software arrangements, which often contain multiple revenue elements, such as software licenses, hardware, professional services and post-contract customer support ("PCS"), the Company recognizes and defers revenue using the residual method in accordance with ASC 985-605, Software. Revenue is allocated to each element, excluding the software license, based on VSOE. VSOE is limited to the price charged when the element is sold separately or, for an element not yet being sold separately, the price established by management having the relevant authority. The Company does not have VSOE for its software licenses since they are seldom sold separately. Accordingly, revenue is allocated to the software license using the residual value method. Under the residual value method, revenue equal to VSOE of each undelivered element is initially deferred and any remaining arrangement fee is then allocated to the software license.

Hardware revenues are generally recognized upon delivery or upon installation, if required. Professional services are generally provided on a time and materials basis and revenue from professional services, including installation services, is recognized as services are performed, or upon installation if required.

Table of Contents

The Company excludes any taxes assessed by a governmental authority that are directly imposed on a revenue-producing transaction (i.e., sales, use and value added) from its revenue and costs. Reimbursement received for shipping costs is recorded as revenue.

Deferred product costs represent deferred cost of revenue for product shipments to customers prior to satisfaction of the Company's revenue recognition criteria. Such costs are classified as prepaid expense and other current assets if the related deferred revenue is initially classified as current. Deferred product costs are recorded in other assets if the related deferred revenue is initially classified as long-term, and remain a component of noncurrent assets until such costs are recognized in the consolidated statement of operations. In certain cases these costs are recognized ratably over the customer contract term.

Cash Equivalents and Marketable Securities

The Company considers all highly liquid investments purchased with an original purchase maturity of 90 days or less to be the equivalent of cash for the purpose of balance sheet and statement of cash flows presentation.

Marketable securities consist of time deposits and U.S. treasury securities with initial maturities of more than 90 days. Short-term investments in marketable securities are classified as available-for-sale and are recorded at fair value with unrealized gains and losses (excluding other-than-temporary impairments) reported as a separate component of accumulated other comprehensive loss. Realized gains and losses and declines in value judged to be other-than-temporary are included in income based on the specific identification method. Fair value is determined based on quoted market prices. At September 30, 2016, the Company did not have any marketable securities. At December 31, 2015, the Company's marketable securities had remaining maturities within one year and had a total cost basis of \$1.0 million.

The Company reviews its investments for other-than-temporary impairment whenever evidence indicates that an investment's carrying amount is not recoverable within a reasonable period of time.

Business Combinations

In accordance with ASC 805, Business Combinations ("ASC 805"), the Company recognizes tangible and intangible assets acquired and liabilities assumed based on their estimated fair values. Determining these fair values requires management to make significant estimates and assumptions, especially with respect to intangible assets.

The fair value of identifiable intangible assets is based on detailed valuations that use information and assumptions provided by management, which reflect management's best estimates of inputs and assumptions that a market participant would use. The Company's identifiable intangible assets consist of developed technology, customer relationships, tradenames, and non-compete agreements. Developed technology consists of products that have reached technological feasibility, and tradenames represent both acquired company and product names. Customer relationships represent the underlying relationships and agreements with customers of the acquired company's installed base. Non-compete agreements represent the protection against the loss of business and resultant cash flows from direct competition.

Goodwill and Acquired Intangible Assets

The Company records goodwill when consideration paid in a business acquisition exceeds the value of the net assets acquired. The Company's estimates of fair value are based upon assumptions believed to be reasonable at that time but that are inherently uncertain and unpredictable. Assumptions may be incomplete or inaccurate, and unanticipated events or circumstances may occur, which may affect the accuracy or validity of such assumptions, estimates or actual results.

Goodwill is not amortized, but rather is tested for impairment annually or more frequently at the reporting unit level if facts and circumstances warrant a review. The Company has determined that there is a single reporting unit for the purpose of conducting this goodwill impairment assessment. For purposes of assessing potential impairment, the Company estimates the fair value of the reporting unit (based on the Company's market capitalization) and compares this amount to the carrying value of the reporting unit (as reflected by the Company's total stockholders' equity). If the Company determines that the carrying value of the reporting unit exceeds its fair value, an impairment charge would be required. The Company's annual goodwill impairment test is at November 30th of each year.

Intangible assets acquired in a business combination are recorded at their estimated fair values at the date of acquisition. The Company amortizes acquired intangible assets over their estimated useful lives based on the pattern

of consumption of the economic benefits or, if that pattern cannot be readily determined, on a straight-line basis. The Company reviews its intangible

Table of Contents

assets with definite lives for impairment when events or changes in circumstances indicate that the related carrying amount may not be recoverable.

Internal-use Software and Website Development

The Company accounts for its software and website development costs in accordance with the guidance in ASC 350-40, Internal Use Software and ASC 350-50, Website Development Costs. The costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs are capitalized until the application is substantially complete and ready for its intended use, at which point such costs are amortized over the estimated useful life of the software. At September 30, 2016 and December 31, 2015, approximately \$2.4 million and \$1.8 million of costs associated with internal-use software and website development costs were capitalized on the Company's condensed consolidated balance sheets, respectively. For the three month periods ended September 30, 2016 and 2015, the Company recorded \$0.1 million and \$0.1 million of amortization expense related to capitalized internal-use software and website development costs, respectively. For the nine month periods ended September 30, 2016 and 2015, the Company recorded \$0.4 million and \$0.2 million of amortization expense related to capitalized internal-use software and website development costs, respectively.

Accounts Receivable

Accounts receivable are recorded at the invoiced amount. The allowance for doubtful accounts reflects the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company specifically analyzes historical bad debts, the aging of the accounts receivable, creditworthiness, and current economic trends, to evaluate the allowance for doubtful accounts. Past due balances are reviewed individually for collectability. Account balances are charged against the allowance for doubtful accounts after all means of collection have been exhausted, and the potential for recovery is considered remote. The allowance for doubtful accounts is recorded as a reduction in accounts receivable. The Company also maintains an allowance for sales returns and credits to customers for which the Company has the ability to estimate based upon historical experience. The allowance for sales returns and credits is recorded as a reduction in revenue.

Income Taxes

The Company provides for income taxes under the liability method. Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates in effect when the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to reflect the uncertainty associated with their ultimate realization.

The Company accounts for uncertain tax positions by prescribing a more-likely-than-not threshold for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return.

Segment Information

Operating segments are defined as components of an enterprise engaging in business activities for which discrete financial information is available and regularly reviewed by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Company views its operations and manages its business in one operating segment. The Company does not disclose geographic information for revenue and long-lived assets, excluding deferred tax assets, goodwill and intangible assets. Revenue and long-lived assets, excluding deferred tax assets, goodwill and intangible assets, located outside the United States do not exceed 10% of total revenue and total assets.

Accounting for Stock-Based Compensation

The Company recognizes stock-based compensation as an expense in the financial statements using the estimated grant-date fair value over the individual award's requisite service period, which equals the vesting periods in all cases but for certain market-based awards. The Company uses the straight-line amortization method for recognizing stock-based compensation expense. The Company estimates the fair value of stock options on the date of grant using the Black-Scholes option-pricing model and the fair value of stock options with market-based vesting conditions on the date of grant using a lattice model with a Monte Carlo simulation. These models require the use of highly subjective estimates and assumptions, including expected stock price volatility, expected term of an award, risk-free interest rate, and expected dividend yield. The grant date fair value of restricted stock units granted is based on the fair

value of the underlying common stock on the date of grant.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-9, Revenue from Contracts with Customers ("ASU 2014-9"), updated guidance and disclosure requirements for recognizing revenue. The new revenue recognition standard provides a five-step analysis of transactions to determine when and how revenue is recognized. The revenue standard is based on the principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In March 2016, the FASB issued an amendment to the standard, ASU 2016-8, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net), which clarifies the implementation guidance on principal versus agent considerations. In April 2016, the FASB issued an additional amendment to the standard, ASU 2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing ("ASU 2016-10"), which clarifies the guidance on identifying performance obligations and the implementation guidance on licensing. The collective guidance will be effective for the Company on January 1, 2018, with early adoption permitted, but not earlier than January 1, 2017. The guidance may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial adoption. The Company is currently assessing the potential impact of the adoption of these standards on its consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements — Going Concern: Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern ("ASU 2014-15"). The standard requires that the Company evaluates, at each interim and annual reporting period, whether there are conditions or events that raise substantial doubt about its ability to continue as a going concern within one year after the date the financial statements are issued, and provide related disclosures. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and for annual and interim periods thereafter, and early adoption is permitted. While the adoption of this standard may result in additional disclosures, the Company does not expect that it will have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, Intangibles—Goodwill and Other—Internal-Use Software: Customer's Accounting for Fees Paid in a Cloud Computing Arrangement ("ASU 2015-05"). The standard clarifies the circumstances under which a cloud computing customer would account for the arrangement as a license of internal-use software under ASC 350-40. ASU 2015-05 is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015, and early adoption is permitted. The Company adopted ASU 2015-05 as of January 1, 2016. The adoption of ASU 2015-05 did not have a material impact on our condensed consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases ("ASU 2016-02"). ASU 2016-02 requires lessees to recognize the assets and liabilities on their balance sheet for the rights and obligations created by most leases and continue to recognize expenses on their income statements over the lease term. It will also require disclosures designed to give financial statement users information on the amount, timing, and uncertainty of cash flows arising from leases. The guidance is effective for annual reporting periods beginning after December 15, 2018 and interim periods within those fiscal years, with early adoption permitted. The Company is currently evaluating the effect of the standard on its consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting ("ASU 2016-09"). The amendments in this ASU involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. For public entities, ASU 2016-09 is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, with earlier adoption permitted for all entities. The Company is currently evaluating the effect of the standard on its consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments ("ASU 2016-15"). The amendments in this ASU clarify and provide specific guidance on eight cash flow classification issues that are not currently addressed by current GAAP and thereby reduce the current

diversity in practice. ASU 2016-15 is effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2017, with early application permitted. The Company does not expect any material impact from adoption of this guidance on the Company's consolidated financial statements.

In October 2016, the FASB issued ASU 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory ("ASU 2016-16"). The purpose of ASU 2016-16 is to simplify the income tax accounting of an intra-entity transfer of an asset other than inventory and to record its effect when the transfer occurs. The guidance is effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods and early adoption is permitted. The Company is currently evaluating the effect of the standard on its consolidated financial statements.

Table of Contents

3. Net Income (Loss) Per Share

Basic income (loss) per share is calculated by dividing the net income (loss) by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is calculated by dividing net income (loss) by the sum of the weighted average number of common shares and potentially dilutive securities outstanding during the period using the treasury stock method. For the periods in which the Company incurred a net loss, the effect of the Company's outstanding common stock equivalents were not included in the calculation of diluted loss per share as they were anti-dilutive. Accordingly, basis and diluted net loss per share for those periods were identical.

The following table sets forth the computation of basic and diluted net income (loss) per share:

	Three Months Ended September 30, 2016 2015 (in thousands, except per share amounts)		Nine Months Ended September 30, 2016 2015	
Numerator:				
Net income (loss)	\$ 107	\$(5,966)	\$(3,429)	\$(17,016)
Denominator:				
Weighted average common shares outstanding, basic	26,974	27,173	26,976	27,212
Effect of potential dilutive common shares	559	—	—	—
Weighted average shares outstanding, diluted	27,533	27,173	26,976	27,212
Basic net income (loss) per share	\$0.00	\$(0.22)	\$(0.13)	\$(0.63)
Diluted net income (loss) per share	\$0.00	\$(0.22)	\$(0.13)	\$(0.63)

The following options to purchase common shares and restricted stock units have been excluded from the computation of diluted net income (loss) per share because they had an anti-dilutive impact (in thousands):

	Three Months Ended September 30, 2016 2015		Nine Months Ended September 30, 2016 2015	
Options to purchase common shares	702	3,367	1,753	3,367
Restricted stock units	900	1,400	1,957	1,400
Total	1,602	4,767	3,710	4,767

4. Fair Value of Financial Instruments

Derivative Instruments

Non-designated Foreign Currency Contracts

The Company uses foreign currency forward contracts as part of our strategy to manage exposure related to Euro denominated intercompany monetary assets and liabilities. The Company has not designated these forward contracts as hedging instruments pursuant to ASC 815, Derivatives and Hedging. Accordingly, the Company recorded the fair value of these contracts at the end of each reporting period in the condensed consolidated balance sheets, with changes in the fair value recorded in earnings as interest and other income (expense), net in the consolidated statement of operations. Cash flows from the settlement of these non-designated foreign currency contracts are reported in cash flows from investing activities. These currency forward contracts are entered into for periods consistent with currency transaction exposures, generally less than one year. At September 30, 2016 and December 31, 2015, the Company had

outstanding contracts with a total notional value of \$42.1 million and \$36.7 million, respectively.

Table of Contents

The following table provides a quantitative summary of the fair value of derivative instruments not designated as hedging instruments as of September 30, 2016 and December 31, 2015 (in thousands):

Description	Balance Sheet Classification	Fair Value	
		September 30, 2016	December 31, 2015

Derivative Liabilities:

Non-Designated Hedging Instruments

Foreign currency contracts	Accrued expenses	\$ 217	\$ 400
Total Derivative Liabilities		\$ 217	\$ 400

The following table summarizes the (losses) gains related to derivative instruments not designated as hedging instruments for the three and nine months ended September 30, 2016 and 2015 (in thousands):

Location in Statement of Operations	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Foreign currency contracts Interest and other income (expense), net	\$(380)	\$(71)	\$(1,095)	\$2,331

Other Fair Value Measurements

The Company applies the guidance in ASC 820, Fair Value Measurements and Disclosures, ("ASC 820"), which provides that fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In order to increase consistency and comparability in fair value measurements, ASC 820 establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value into three broad levels, which are described below:

Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.

Level 2: Other inputs that are observable directly or indirectly, such as quoted prices for similar assets and liabilities or market corroborated inputs.

Level 3: Unobservable inputs are used when little or no market data is available, which requires the Company to develop its own assumptions about how market participants would value the assets or liabilities. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible in its assessment of fair value.

The Company's assets and liabilities that are measured at fair value on a recurring basis, by level, within the fair value hierarchy are summarized as follows (in thousands):

	September 30, 2016				December 31, 2015			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets:								
Cash equivalents—money market funds	\$20,718	\$ —	\$ —	\$20,718	\$19,703	\$ —	\$ —	\$19,703
Marketable securities—U.S. treasury securities and time deposits	—	—	—	—	—	1,000	—	1,000
Total	\$20,718	\$ —	\$ —	\$20,718	\$19,703	\$1,000	\$ —	\$20,703
Liabilities:								
Foreign currency exchange contracts	—	217	—	217	—	400	—	400
Total	\$ —	\$ 217	\$ —	\$217	\$ —	\$400	\$ —	\$400

Table of Contents

The Company's investments in money market funds are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. Our marketable securities and foreign currency exchange contracts are classified as Level 2 within the fair value hierarchy as they are valued using professional pricing sources for identical or comparable instruments, rather than direct observations of quoted prices in active markets.

5. Acquisitions

2016 Acquisition

On January 13, 2016, the Company completed the acquisition of the North American cloud-based business continuity and disaster recovery assets of EVault, Inc. ("EVault"). The Company completed the acquisition of the assets used in the European Union operations of EVault on March 31, 2016. The acquisition of EVault has been accounted for as a business combination and, in accordance with ASC 805, the Company has recorded the assets acquired and liabilities assumed at their respective fair values as of the acquisition dates. During the second quarter of 2016, the Company recorded a measurement period adjustment in our condensed consolidated balance sheet. The measurement period adjustment was recorded as a \$1.0 million increase to goodwill, with an offsetting increase to accrued liabilities of \$0.4 million and a decrease to the fair value of the Transaction Services Agreement ("TSA") credit of \$0.6 million. The following table summarizes the preliminary purchase price allocation, including the measurement period adjustments recorded in the second quarter of 2016 (in thousands):

Fair value of consideration transferred:

Cash	\$14,000
Fair value of prepaid transactional services	(2,375)
Fair value of total acquisition consideration	\$11,625
Fair value of assets acquired and liabilities assumed:	
Prepaid expenses	\$1,330
Property and equipment	6,776
Intangible assets	9,150
Other long-term assets	564
Goodwill	989
Total assets acquired	18,809
Deferred revenue	(6,830)
Accrued liabilities	(354)
Net assets acquired	\$11,625

In connection with the acquisition of EVault, the Company negotiated a TSA that provides a credit to be used against future services provided under the terms of the agreement. The Company estimated the fair value of the TSA credit to be \$2.4 million based on expected usage and accounted for it as a reduction in consideration transferred in the preliminary purchase price allocation. The TSA credit was recorded in prepaid expenses and other current assets on the consolidated balance sheet as of the acquisition date. For the nine month period ended September 30, 2016, the Company recognized \$2.4 million in expense, which was recorded as a reduction in the TSA credit. As of September 30, 2016, there was no remaining balance of the TSA credit on the consolidated balance sheet.

In the three months ended September 30, 2016, the Company recorded an immaterial amount of acquisition-related expenses. In the three months ended September 30, 2015, acquisition-related expenses were \$0.4 million. In the nine months ended September 30, 2016 and 2015, acquisition-related expenses were \$3.9 million and \$1.1 million respectively. Acquisition-related expenses have been included primarily in general and administrative expenses in the condensed consolidated statements of operations. The operating results of EVault, which are included in the condensed consolidated statements of operations beginning on their respective acquisition dates, are comprised of

\$16.0 million and \$47.0 million of revenue for the three and nine months ended September 30, 2016, respectively. The Company has determined that disclosing the amount of EVault related expenses included in the condensed consolidated statements of operations is impracticable, as certain operations of EVault were integrated into the operations of the Company.

Table of Contents

The significant intangible assets identified in the preliminary purchase price allocation discussed above include developed technology, trade names and customer relationships, which are amortized over their respective useful lives on a straight line basis. The preliminary allocations of the purchase price are subject to revisions as additional information is obtained about the facts and circumstances that existed at the time of acquisition. Developed technology consists of products that have reached technological feasibility and trade names represent acquired company and product names. To value the developed technology asset, the Company utilized the income approach, specifically a discounted cash-flow method known as the multi-period excess earnings method. The trade name intangible was valued using a relief from royalty method, which considers both the market approach and the income approach. Customer relationships represent the underlying relationships with certain customers to provide ongoing services for products sold. The Company utilized the replacement cost/lost profits methodology to derive the fair value of the customer relationships.

The following table presents the estimated fair values and useful lives of the identifiable intangible assets acquired and risk-adjusted discount rates used in the valuation:

	Amount (in thousands)	Weighted Average Useful Life (in years)	Risk-Adjusted Discount Rates used in Valuation
Developed technology	\$ 5,650	4	15%
Customer relationships	2,500	6	14%
Trade names	1,000	7	14%
Total identifiable intangible assets	\$ 9,150		

Pro Forma Financial Information

The following unaudited pro forma information presents the condensed combined results of operations of the Company and EVault for the three and nine months ended September 30, 2015 as if the acquisition of EVault had been completed on January 1, 2015. These pro forma condensed consolidated financial results have been prepared for comparative purposes only and include certain adjustments that reflect pro forma results of operations, such as increased amortization for the fair value of acquired intangible assets, fair value adjustments (step-downs) for property, plant and equipment and deferred revenue, reversal of revenues and costs directly attributable to assets and products not acquired, and adjustments relating to the tax effect of combining the Company and EVault businesses. The unaudited pro forma results do not reflect any operating efficiencies or potential cost savings which may result from the consolidation of the operations of the Company and EVault. Accordingly, these unaudited pro forma results are presented for informational purposes only and are not necessarily indicative of the results of operations that actually would have been achieved had the acquisition occurred as of January 1, 2015, nor are they intended to represent or be indicative of future results of operations (in thousands):

	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2015
Revenue	\$ 54,825	\$ 164,974
Net loss	\$(17,415)	\$(59,147)
Basic and diluted net loss per share	\$(0.64)	\$(2.17)
Weighted-average number of common shares used in computing basic and diluted net loss per share	27,173,360	27,212,038

2015 Acquisition

On August 11, 2015, the Company acquired certain assets of Rebit, Inc. ("Rebit") for total consideration of approximately \$1.3 million, which included an initial cash payment of \$1.0 million and an estimated fair value of \$0.3 million for additional consideration which was paid one year from the date of acquisition. The Company employs six of Rebit's former employees at its current location in Longmont, Colorado.

The results of operations for the acquisition have been included in the Company's operations since the date of acquisition and were not material for the periods presented.

Table of Contents

The acquisition of Rebit has been accounted for as a business combination and, in accordance with ASC 805, the Company has recorded the assets acquired and liabilities assumed at their respective fair values as of the acquisition date. As a result of the acquisition of Rebit, the Company recorded goodwill in the amount of \$0.6 million and identifiable intangible assets of \$0.7 million. As of the acquisition date, developed technology and customer relationships had weighted-average useful lives of 6.0 years and 4.0 years, respectively. These identifiable intangible assets are amortized over their estimated useful lives based on the pattern of consumption of the economic benefits or, if that pattern cannot be readily determined, on a straight-line basis.

6. Goodwill and Acquired Intangible Assets

As of September 30, 2016 and December 31, 2015, the carrying amount of goodwill was \$24.5 million and \$23.1 million, respectively. The following is a rollforward of our goodwill balance (in thousands):

Goodwill							
Balance as of December 31, 2015		\$ 23,105					
Goodwill acquired		989					
Effect of foreign exchange rates		361					
Balance as of September 30, 2016		\$ 24,455					
Purchased intangible assets consist of the following (in thousands):							
		September 30, 2016			December 31, 2015		
	Weighted-Average Estimated Useful Life (in years)	Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
Developed technology	5.4	\$ 14,005	\$ 4,493	\$ 9,512	\$ 8,167	\$ 2,463	\$ 5,704
Customer relationships	6.5	6,197	1,963	4,234	3,627	1,216	2,411
Trade names	7.0	1,743	402	1,341	726	213	513
Non-compete agreements	3.8	380	380	—	380	368	12
		\$ 22,325	\$ 7,238	\$ 15,087	\$ 12,900	\$ 4,260	\$ 8,640

The Company recorded amortization expense of \$1.0 million and \$0.5 million for the three month periods ended September 30, 2016 and 2015, respectively, and \$2.9 million and \$1.5 million for the nine month periods ended September 30, 2016 and 2015, respectively. Amortization relating to developed technology is recorded within cost of revenue, amortization of customer relationships is recorded within sales and marketing expenses, and amortization of trade names and non-compete agreements is recorded within general and administrative expenses.

Future estimated amortization expense of acquired intangibles as of September 30, 2016 is as follows (in thousands):

Remainder of 2016	\$946
2017	3,713
2018	3,661
2019	3,603
2020	2,008
Thereafter	1,156
	\$ 15,087

Table of Contents

7. Accrued Expenses

Accrued expenses consist of the following (in thousands):

	September 30, 2016	December 31, 2015
Accrued marketing	\$ 1,890	\$ 1,727
Accrued compensation	7,714	3,130
Accrued cost of goods sold	571	—
Accrued tax liabilities	2,208	435
Accrued consulting and professional fees	1,627	3,263
Accrued facilities	989	819
Derivative liability	217	400
Accrued other expenses	2,880	1,785
Total accrued expenses	\$ 18,096	\$ 11,559

8. Stockholders' Equity

Share Repurchase Program

On May 11, 2015, the Company's Board of Directors authorized a \$20.0 million share repurchase program, effective from May 15, 2015 through May 15, 2018. Share repurchases are made from time-to-time in the open market, in privately negotiated transactions or otherwise, in accordance with applicable securities laws and regulations. The timing and amount of any share repurchases are determined by the Company's management based on an evaluation of market conditions, the trading price of the stock, and other factors.

For the three months ended September 30, 2016, the Company did not repurchase any shares of its common stock under the repurchase program. For the nine months ended September 30, 2016, the Company repurchased 574,118 shares of its common stock at an average price of \$7.81 per share for a total cost of approximately \$4.5 million. For the nine months ended September 30, 2015, the Company repurchased 274,700 shares of its common stock at an average price of \$10.88 per share for a total cost of approximately \$3.0 million. At September 30, 2016, approximately \$10.2 million remained available under the Company's share repurchase program.

9. Stock-based Awards

The Company's 2005 Stock Incentive Plan (the "2005 Plan") provided for granting of incentive stock options, non-qualified options, restricted stock, or other awards to the Company's employees, officers, directors, and outside consultants up to an aggregate of 3,601,551 shares of the Company's common stock. In conjunction with the effectiveness of the 2011 Equity Award Plan (the "2011 Plan"), the Company's Board of Directors voted that no further stock options or other equity-based awards would be granted under the 2005 Plan.

The 2011 Plan provides for the issuance of stock options, restricted stock, restricted stock units, and other stock-based awards to the employees, officers, directors, and consultants of the Company or its subsidiaries. In connection with the approval of the 2011 Plan, the Company reserved 1,662,000 shares of common stock for issuance thereunder. On January 1st of each year, beginning January 1, 2012, the number of shares reserved under the 2011 Plan increased or will increase by the lesser of 1,500,000 shares, 4.0% of the outstanding shares of common stock and common stock equivalents, or another amount determined by the Company's Board of Directors. As of September 30, 2016, 1,702,664 shares of common stock were available for future grant under the 2011 Plan.

Stock-based awards granted to employees generally vest over a three- or four-year period, and, in the case of stock options, expire ten years from the date of grant. Certain awards provide for accelerated vesting if there is a change of control, as defined in the 2005 Plan or 2011 Plan, as applicable. The Company has generally granted stock options at exercise prices not less than the fair market value of its common stock on the date of grant.

Table of Contents

Stock Options

The following summarizes stock option activity under stock incentive plans for the nine months ended September 30, 2016:

	Number of Shares	Weighted- Average Exercise Price per Share	Weighted- Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (in thousands) (2)
Outstanding at December 31, 2015	2,975,673	\$ 11.06		\$ 724
Granted	1,500	8.95		
Exercised	(220,691)	9.14		
Forfeited	(1,253,042)	11.21		
Outstanding at September 30, 2016	1,503,440	\$ 11.21	6.98	\$ 6,241
Exercisable as of September 30, 2016	1,016,873	\$ 10.84	6.55	\$ 4,597
Vested and expected to vest as of September 30, 2016 (1)	1,411,783	\$ 11.15	6.90	\$ 5,939

Represents the number of vested stock options as of September 30, 2016, plus the number of unvested stock

(1) options expected to vest as of September 30, 2016, based on the unvested stock options outstanding at September 30, 2016, adjusted for estimated forfeitures.

(2) The aggregate intrinsic value is calculated as the positive difference, if any, between the exercise price of the underlying stock options and the fair market value of the Company's common stock on September 30, 2016.

The Company generally estimates the fair value of stock options on the date of grant using the Black-Scholes option-pricing model. This model requires the use of highly subjective estimates and assumptions, including expected stock price volatility, expected term of an award, risk-free interest rate, and expected dividend yield.

The assumptions used to estimate the fair value of the stock options granted during the three and nine months ended September 30, 2016 and 2015 using the Black-Scholes option-pricing model were as follows:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Weighted-average exercise price	\$—	\$11.81	\$8.95	\$13.27
Weighted-average grant-date fair value	\$—	\$5.69	\$4.03	\$6.50
Black-Scholes Assumptions				
Risk-free interest rate	—%	1.85	% 1.93	% to 1.85%
Expected dividend yield	—%	—	% —	% —
Expected volatility	—%	49	% 44	% 49% to 51%
Expected term (in years)	0	6.1	6.1	5.5 to 6.1

Restricted Stock Units

The Company recognizes non-cash compensation expense over the vesting term of restricted stock units. The fair value is measured based upon the number of units and the closing price of the Company's common stock underlying such units on the dates of grant. Upon vesting and settlement, each restricted stock unit entitles the holder to receive one share of common stock.

The following table summarizes restricted stock unit activity for the nine months ended September 30, 2016:

Number of Weighted Average

Edgar Filing: Carbonite Inc - Form 10-Q

	Shares	Grant Date Fair Value
Unvested restricted stock units as of December 31, 2015	1,001,364	\$ 13.19
Restricted stock units granted	878,763	9.08
Restricted stock units vested	(257,413)	13.12
Restricted stock units forfeited	(209,145)	10.94
Unvested restricted stock units as of September 30, 2016	1,413,569	\$ 10.98

18

Table of Contents

Restricted Stock Awards

The Company grants restricted stock awards to members of the Board of Directors annually. The fair value is measured based upon the number of units and the closing price of the Company's common stock underlying such units on the dates of grant. Awards to directors vest on the first anniversary of the date of grant.

The following table summarizes restricted stock award activity for the nine months ended September 30, 2016:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested restricted stock awards as of December 31, 2015	41,917	\$ 10.90
Restricted stock awards granted	108,497	9.46
Restricted stock awards vested (restriction lapsed)	(32,208)	10.93
Restricted stock awards forfeited	—	—
Unvested restricted stock awards as of September 30, 2016	118,206	\$ 9.57

Equity Awards with Market-Based Vesting Conditions

On February 1, 2016, the Company granted select executive officers 325,000 restricted stock units with market-based vesting conditions. These restricted stock units contain both performance and service vesting conditions. These awards will meet the performance vesting condition if, within three years from the date of grant, the closing price per share of the Company's common stock is at least \$15.00 per share for 20 consecutive trading days. Upon achievement of the applicable performance vesting condition, the award will be subject to service vesting, with vesting to occur in four equal quarterly installments over the one-year period from the date of achieving the performance-based vesting conditions, subject to the recipient's continued service to the Company through the applicable vesting date.

The Company estimated the fair value and derived service period of the restricted stock units with market-based vesting conditions on the date of grant using a Monte-Carlo simulation. The model requires the use of subjective estimates and assumptions, including expected volatility, risk-free interest rate and dividend yield.

The grant-date stock price and assumptions used to estimate the derived service period and fair value of the equity awards with market-based vesting conditions were as follows:

	As of February 1, 2016	
Grant-date stock price	\$ 8.95	
Assumptions		
Risk-free interest rate	1.01	%
Expected dividend yield	—	%
Expected volatility	40	%

In 2015, the Company granted 100,000 restricted stock units with market-based vesting conditions. Of the 100,000 restricted stock units granted, 50,000 shares accrue in four equal, 25% installments on each anniversary of the date of grant based on continued service through the applicable accrual date, provided that no vesting will occur unless the Company maintains a closing stock price of \$14.00 per share for 20 consecutive trading days. The remaining 50,000 shares accrue in four equal, 25% installments on each anniversary date of grant based on continued service through the applicable accrual date, provided that no vesting will occur unless the Company maintains a closing stock price of \$18.00 per share for 20 consecutive trading days.

The Company recognizes the stock-based compensation expense on equity awards with market-based vesting conditions in the consolidated statements of operations over the requisite service period. The achievement of certain market-based vesting conditions may result in the acceleration of recognizing stock-based compensation expense

compared to the original valuation. As of September 30, 2016, no market-based vesting conditions had been achieved which resulted in the acceleration of expense.

Table of Contents

The following table summarizes equity awards with market-based vesting conditions activity for the nine months ended September 30, 2016:

	Options with Market-Based Vesting Conditions	Weighted Average Grant Date Fair Value	Restricted Stock Units with Market-Based Vesting Conditions	Weighted Average Grant Date Fair Value
Unvested market-based vesting awards as of December 31, 2015	250,000	\$ 7.41	100,000	\$ 11.32
Market-based vesting awards granted	—	—	325,000	4.34
Market-based vesting awards vested	—	—	—	—
Market-based vesting awards forfeited	—	—	—	—
Unvested market-based vesting awards as of September 30, 2016	250,000	\$ 7.41	425,000	\$ 5.98

Stock-based Compensation Expense

Stock-based compensation is reflected in the consolidated statement of operations as follows (in thousands):

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Cost of revenues	\$189	\$195	\$600	\$524
Research and development	276	273	790	911
General and administrative	1,388	1,745	4,475	5,074
Sales and marketing	277	332	763	909
Total stock-based compensation expense	\$2,130	\$2,545	\$6,628	\$7,418

10. Income Taxes

The Company's effective income tax rates were 80.0% and (7.3%) for the three months ended September 30, 2016 and 2015, respectively. The Company's effective income tax rates were (31.1%) and (6.3%) for the nine months ended September 30, 2016 and 2015, respectively. Our effective income tax rate is based upon estimated income before provision for income taxes for the year, composition of the income in different countries, and adjustments, if any, in the applicable quarterly periods for potential tax consequences, benefits and/or resolutions of tax audits or other tax contingencies. For the three and nine months ended September 30, 2016, the effective income tax rate varied from the statutory income tax rate principally as a result of significant pre-tax book losses in the U.S. and Switzerland that cannot be benefited.

The Company's effective income tax rate in the three and nine months ended September 30, 2016 differed from the three and nine months ended September 30, 2015 primarily due to an increase in foreign earnings resulting from the EVault acquisition, a decrease in profitable foreign earnings resulting from jurisdictional foreign consolidation, and a worldwide consolidated reduction in losses before income taxes.

The statute of limitations for assessment by the Internal Revenue Service ("IRS") and state tax authorities is open for each of the tax years ending December 31, 2013 through 2015, although carryforward attributes that were generated prior to tax year 2013 may still be adjusted upon examination by the IRS or state tax authorities if they either have been or will be used in a future period. There are currently no federal or state audits in progress in the U.S. or foreign jurisdictions. The statute of limitations for assessments by foreign taxing authorities is generally not open for years prior to 2010, although carryforward attributes that were generated prior to tax year 2010 may still be adjusted upon examinations.

11. Commitments and Contingencies

Operating Leases

The Company leases facilities under leases that expire at varying dates through 2024. Certain of these leases contain renewal options and require the Company to pay operating costs, including property taxes, insurance, and maintenance.

Table of Contents

The Company has lease agreements to rent office space in Boston, Massachusetts (corporate headquarters); Lewiston, Maine; Sunnyvale, California; Longmont, Colorado; Munich, Germany; Viersen, Germany; Salt Lake City, Utah; Oakville, Canada; Emeryville, California; Hertogenbosch, Netherlands; Berkshire, United Kingdom and Anatole, France. The Company has lease agreements to rent data center space in Wakefield, Massachusetts; Phoenix, Arizona; Chandler, Arizona; and Ashburn, Virginia. The Company has data center colocation agreements in place with Iron Mountain and Center 7 to rent colocation space at each of their data centers. The terms of several of these leases include escalating rent and free rent periods. Accordingly, the Company recorded a deferred rent liability related to the free rent and escalating rent payments, such that rent is being recognized on a straight-line basis over the terms of the leases. At September 30, 2016 and December 31, 2015, \$4.6 million and \$4.9 million, respectively, was included in accrued expenses and other long-term liabilities related to the deferred rent.

In September 2016, the Company entered a lease agreement for a new data center in Ashburn, Virginia. The initial term of the lease expires on November 30, 2021, with escalating rent payments throughout the term. The Company has the option to extend the original term of the lease for two successive three-year periods. In accordance with the lease, the Company received an incentive whereby the landlord will pay for a portion of the moving expenses associated with moving equipment from the current data center to the Ashburn location. The rent expense is recorded net of the incentive over the term of the lease.

In May 2014, the Company entered into a lease agreement for its new corporate headquarters in Boston, Massachusetts. The initial term of the lease expires on December 31, 2024, and the Company has the option to extend the original term of the lease for one successive five-year period. Upon execution of the lease agreement, the Company was required to post a security deposit of \$0.8 million, which the Company maintains as a letter of credit. The Company's landlord can draw against this letter of credit in the event of default by the Company. The facility was made available to the Company to begin its build-out on June 1, 2014, and as such, the Company began recording rent expense at that time. In accordance with the lease, the Company received a tenant improvement allowance. The rent expense is recorded net of the allowance over the term of the lease. The leasehold improvements associated with the initial build-out are being amortized over the initial term of the lease. Any additional leasehold improvements made during the course of occupancy will be amortized over the shorter of the useful life or remaining life of the lease.

Future non-cancellable minimum lease payments under all operating leases as of September 30, 2016, are as follows (in thousands):

Years Ended December 31,	Office Leases	Data Center Leases	Total
Remainder of 2016	\$ 1,042	\$ 1,051	\$ 2,093
2017	3,894	3,538	7,432
2018	3,161	1,970	5,131
2019	2,387	872	3,259
2020	2,263	827	3,090
Thereafter	8,666	779	9,445
Total	\$ 21,413	\$ 9,037	\$ 30,450

At September 30, 2016, the Company subleased certain office space to third parties, which sublease income will offset lease payments in the table above. Total sublease income under contractual terms is \$0.3 million, with both the sublease and the underlying lease expiring in December 2016.

Table of Contents

Other Non-cancellable Commitments

As of September 30, 2016, the Company had non-cancellable commitments to vendors primarily consisting of advertising, marketing and broadband services contracts, as follows (in thousands):

Years Ended December 31,

Remainder of 2016	\$2,120
2017	2,207
2018	993
2019	—
2020	—
Total	\$5,320

Litigation

On August 30, 2010, Oasis Research sued the Company and 17 other defendants in the United States Court for the Eastern District of Texas alleging infringement of certain of Oasis Research's patents. In October 2015, the parties entered into a confidential agreement to dismiss all matters in the pending cases with prejudice.

Although results of litigation and claims cannot be predicted with certainty, the Company is not presently involved in any legal proceeding in which the outcome, if determined adversely to the Company, would be expected to have a material adverse effect on our business, operating results, or financial condition. Regardless of the outcome, litigation can have an adverse impact on the Company because of defense and settlement costs, diversion of management resources, and other factors.

12. Retirement Plan

The Company has a 401(k) defined contribution savings plan for its employees who meet certain employment status and age requirements. The plan allows participants to defer a portion of their annual compensation on a pre-tax basis. Effective January 1, 2012, the Company elected to make a matching contribution of up to 4% of each employee's wages. For the three months ended September 30, 2016 and 2015, the Company's matching contributions to the plan were \$0.6 million and \$0.3 million, respectively. For the nine months ended September 30, 2016 and 2015, the Company's matching contributions to the plan were \$1.4 million and \$0.8 million, respectively.

13. Restructuring

In 2016, the Company recorded an immaterial amount of restructuring charges for the three month period ended September 30, 2016 and \$0.8 million for the nine month period ended September 30, 2016. These charges were associated with the reorganization and consolidation of certain operations as well as disposal of certain assets in the first quarter of 2016. In 2014, the Company began a restructuring program to close its Somerville, Massachusetts data center and transition the computer equipment and operations located at the facility to its other Massachusetts data center. Activities related to this effort were completed by the end of the first quarter of 2015. The Company recorded \$0.2 million of restructuring charges for the three month period ended September 30, 2015, and \$0.3 million for the nine month period ended September 30, 2015.

As of September 30, 2016 and December 31, 2015, the Company had \$0.1 million and \$0.4 million accrued related to restructuring, respectively. The remaining amount accrued will be paid in the second half of 2016.

14. Revolving Credit Facility

On May 6, 2015, the Company and certain of our subsidiaries entered into a credit agreement with Silicon Valley Bank (the "Credit Facility"), which provides revolving credit financing of up to \$25.0 million, including a \$5.0 million sub-limit for letters of credit. The Credit Facility may be increased by up to an additional \$25.0 million if the existing or additional lenders are willing to make such increased commitments and subject to other terms and conditions. The Credit Facility is available to the Company on a revolving basis during the period commencing on May 6, 2015 through May 6, 2018 at an interest rate of the Wall Street Journal prime rate plus 75 basis points or LIBOR plus 175 basis points, at the option of the Company.

The Credit Facility is secured by substantially all of the Company's assets and contains customary affirmative and negative covenants, including financial covenants specifying a minimum quick ratio and minimum consolidated free cash flow, in each

Table of Contents

case subject to customary and other exceptions for a credit facility of this size and type, each as further described in the Credit Facility. On May 22, 2015, the Company entered into an amendment to the Credit Facility with Silicon Valley Bank (the "Amendment"). The Amendment eliminates from the events which constitute a change of control and, consequently, an event of default, the replacement, under specified circumstances, of a majority of the Company's board of directors. The Amendment also allows the Company to repurchase its capital stock pursuant to a board of directors approved share repurchase plan, so long as the total of such repurchases does not exceed \$20.0 million during the term of the Credit Facility and the Company remains in pro forma compliance with the financial and other covenants. On October 30, 2015, the Company entered into a second amendment to the Credit Facility with Silicon Valley Bank, which included technical corrections relating to certain definitions and calculations of financial covenants. On July 25, 2016, the Company entered into a third amendment to the Credit Facility with Silicon Valley Bank, which included revised definitions for financial covenant calculations.

As of September 30, 2016, the Company was in compliance with these covenants and there was one letter of credit for \$0.8 million outstanding under the Credit Facility related to the security deposit on the lease for the Company's corporate headquarters. Availability under the Credit Facility as of September 30, 2016 was \$24.2 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our condensed consolidated financial statements and related notes appearing elsewhere in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended December 31, 2015, as filed on March 8, 2016 with the SEC.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains "forward-looking statements" that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. The statements contained in this Quarterly Report on Form 10-Q that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or Exchange Act. Forward-looking statements are often identified by the use of words such as, but not limited to, "anticipate," "believe," "can," "continue," "could," "estimate," "expect," "intend," "may," "will," "plan," "project," "seek," "s," "would," and similar expressions or variations intended to identify forward-looking statements. These statements are based on the beliefs and assumptions of our management based on information currently available to management. Such forward-looking statements are subject to risks, uncertainties and other important factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those identified below, and those discussed in the section titled "Risk Factors" included in this Quarterly Report on Form 10-Q. Furthermore, such forward-looking statements speak only as of the date of this report. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

Overview

We are a provider of cloud backup and restore solutions. Our solutions provide powerful features packaged in a cost-effective, simple, and secure manner and are designed to address the specific needs of SMBs and individuals. We derive the majority of our revenue from subscription fees with a consistently strong customer retention rate and scalable infrastructure to support our growth. The remainder of our revenue is derived from software arrangements, which often contain multiple revenue elements, such as software licenses, hardware, professional services and post-contract customer support. Our customers come from the following primary sources: SMBs who buy our solutions directly from our website, our inside sales team, or from our network of partners, and individuals who sign up for Carbonite backup solutions on our website in response to our direct marketing campaigns. In 2016, we acquired substantially all the assets of EVault for \$14.0 million in cash. We believe the acquisition aligns with our growth strategies, including focusing on SMBs and deepening and strengthening our technology portfolio. We invest in customer acquisition because the market for our solutions is highly competitive. Our sales model is designed to sell large volumes of our solutions to SMBs globally both directly and through our sales network which includes distributors, value-added resellers, and managed service providers. We support our sales network with a marketing approach that leverages our established brand in order to drive market awareness and demand generation among the broad population of SMBs and individuals. Our marketing efforts are designed to attract prospective customers and enroll them as paying customers, either through immediate sales, free trials or communication of the benefits of our solutions and development of ongoing relationships. Our operating costs continue to grow as we invest in strategic acquisitions, customer acquisition, and research and development to grow SMB market share. We expect to continue to devote substantial resources to integration, global expansion, customer acquisition, and product innovation. In addition, we expect to invest heavily in our operations to support anticipated growth and public company reporting and compliance obligations. We generally defer revenue over our customers' subscription periods but expense marketing costs as incurred. As a result of these factors, we expect to continue to incur GAAP operating losses on an annual basis for the foreseeable future. For the three months ended September 30, 2016, we generated revenues of \$51.9 million, compared to \$34.6 million for the three

Table of Contents

months ended September 30, 2015, an increase of 50%. For the nine months ended September 30, 2016, we generated revenues of \$153.5 million, compared to \$101.6 million for the nine months ended September 30, 2015, an increase of 51%.

Our Business Model

As the majority of our business is driven by subscription services, we evaluate the profitability of a customer relationship over its lifecycle. We generally incur customer acquisition costs and capital equipment costs in advance of subscriptions while recognizing revenue ratably over the terms of the subscriptions. As a result, a customer relationship may not be profitable or result in positive cash flow at the beginning of the subscription period, even though it may be profitable or result in positive cash flow over the life of the customer relationship. While we offer monthly, annual and multi-year subscription plans, a majority of our customers are currently on annual subscription plans. The annual or multi-year commitments of our customers enhance management's visibility into revenue, and charging customers at the beginning of the subscription period provides working capital.

Key Business Metrics

Our management regularly reviews a number of financial and operating metrics, including the following key metrics, to evaluate our business:

Bookings. We calculate bookings as revenue recognized during a particular period plus the change in total deferred revenue, excluding deferred revenue recorded in connection with acquisitions, net of foreign exchange during the same period. Our management uses this measure as a proxy for cash receipts. Bookings represent the aggregate dollar value of customer subscriptions and software arrangements, which may include multiple revenue elements, such as software licenses, hardware, professional services and post-contractual support, sold by us during a period. We initially record a subscription fee as deferred revenue and then recognize it ratably, on a daily basis, over the life of the subscription period.

Annual retention rate. We calculate annual retention rate as the percentage of subscription customers on the last day of the prior year who remain customers on the last day of the current year, or for quarterly presentations, the percentage of customers on the last day of the comparable quarter in the prior year who remain customers on the last day of the current quarter. Our management uses these measures to determine the stability of our customer base and to evaluate the lifetime value of our customer relationships.

Renewal rate. We define renewal rate for a period as the percentage of customers who renew annual or multi-year subscriptions that expire during the period presented. Our management uses this measure to monitor trends in customer renewal activity.

Adjusted free cash flow. We calculate adjusted free cash flow by subtracting the cash paid for the purchase of property and equipment and adding the payments related to corporate headquarter relocation, acquisition-related payments, hostile takeover-related payments, CEO transition payments, restructuring-related payments, litigation-related payments and the cash portion of the lease exit charge from net cash provided by operating activities. Our management uses adjusted free cash flow to assess our business performance and evaluate the amount of cash generated by our business.

Subscription renewals may vary during the year based on the date of our customers' original subscriptions. As we recognize subscription revenue ratably over the subscription period, this generally has not resulted in a material seasonal impact on our revenue but may result in material monthly and quarterly variances in one or more of the key business metrics described above.

Table of Contents

Performance Highlights

The following table presents our performance highlights for the three and nine months ended September 30, 2016 and 2015:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
	(in thousands, except percentage data)			
Key metrics (1):				
Bookings	\$49,238	\$34,178	\$155,246	\$106,732
Annual retention rate	86	% 84	% 86	% 83
Renewal rate	83	% 83	% 84	% 82
Adjusted free cash flow	\$4,524	\$1,375	\$11,249	\$7,118

(1) See the Key Business Metrics section for the definition of these key metrics, and refer to the Other Financial Data section for the reconciliation of bookings and adjusted free cash flow to the most directly comparable financial measures presented in accordance with GAAP.

The following table presents our bookings by line of business for the periods presented:

	Three Months Ended September 30,		Change	Nine Months Ended September 30,		Change
	2016	2015	%	2016	2015	%
	(in thousands, except percentage data)					
Consumer	\$20,426	\$21,688	(6)%	\$64,774	\$68,045	(5)%
SMB	28,812	12,490	131 %	90,472	38,687	134 %
Total bookings	\$49,238	\$34,178	44 %	\$155,246	\$106,732	45 %

Our bookings increased by \$15.1 million and \$48.5 million for the three and nine month periods ended September 30, 2016, respectively, compared to the corresponding periods in 2015, primarily due to the inclusion of bookings from the acquisition of EVault which closed during 2016, and increased sales of higher priced SMB solutions. We continue to focus on growing our relationships with active reseller partners, with bookings for our small business solutions representing 59% of total bookings for the third quarter of 2016, up from 37% in the third quarter of 2015. Our total bookings growth rates for the three and nine month periods ended September 30, 2016 were impacted by a decline in our growth rates in consumer bookings. We expect this trend to continue.

Our adjusted free cash flow has increased by \$3.1 million and \$4.1 million for the three and nine month periods ended September 30, 2016 compared to the corresponding periods in 2015, respectively, primarily due to improved operating efficiencies resulting from the acquisition of EVault and a decrease in purchases related to storage equipment for our data centers.

Key Components of our Condensed Consolidated Statements of Operations

Revenue

We derive our revenue principally from subscription fees related to our service solutions as well as the sale of software arrangements, which often contain multiple revenue elements, such as software licenses, hardware, professional services and post-contract customer support. We initially record a customer subscription fee as deferred revenue and then recognize it as revenue ratably, on a daily basis, over the life of the subscription period.

Cost of revenue

Cost of revenue consists primarily of costs associated with our data center operations and customer support centers, including wages and benefits for personnel, depreciation of equipment, amortization of developed technology, rent, utilities and broadband, equipment maintenance, software license fees, and allocated overhead. The expenses related to hosting our services and supporting our customers are related to the number of customers and the complexity of our

services and hosting infrastructure. Our cost of storage has decreased over time due to decreases in storage prices and greater efficiency in our data center operations. We have also experienced a downward trend in the cost of storage equipment and broadband service, which

Table of Contents

we expect will continue in the future. Over the long term, we expect these expenses to increase in absolute dollars, but decrease as a percentage of revenue due to improved efficiencies in supporting customers over the long term.

Gross profit and gross margin

Historically, our gross margins have expanded due to the introduction of higher priced solutions targeting both SMBs and individuals, a downward trend in the cost of storage equipment and services, and efficiencies of our customer support personnel in supporting our customers. We expect these trends to continue over the long term.

Operating expenses

Research and development. Research and development expenses consist primarily of wages and benefits for development personnel, third-party outsourcing costs, hosting fees, consulting fees, rent, and depreciation. Our research and development efforts are focused on the enhancement and ease of use of our solutions. These efforts result in updated versions and new suites of our consumer and SMB solutions, while not changing the underlying technology. The majority of our research and development employees are located in Canada and at our corporate headquarters in the U.S. We expect that research and development expenses will increase in absolute dollars on an annual basis as we continue to enhance and expand our services.

General and administrative. General and administrative expenses consist primarily of wages and benefits for management, finance, accounting, human resources, legal and other administrative personnel, legal and accounting fees, insurance, and other corporate expenses. We expect that general and administrative expenses will increase in absolute dollars on an annual basis as we continue to add personnel and enhance our internal information systems in connection with the anticipated growth of our business and incur costs related to operating as a public company.

Sales and marketing. Sales and marketing expenses consist primarily of wages and benefits for sales and marketing personnel, advertising costs, creative expenses for advertising programs, credit card fees, commissions paid to third-party partners and affiliates, and the cost of providing free trials. We expect that we will continue to commit significant resources to our sales and marketing efforts to grow our business and awareness of our brand and solutions. We expect that sales and marketing expenses will continue to increase in absolute dollars on an annual basis.

Restructuring charges. Restructuring charges consist of charges related to the Company's restructuring efforts associated with the reorganization and consolidation of certain operations as well as disposal of certain assets. See Note 13—Restructuring to our condensed consolidated financial statements included in this Quarterly Report for additional information.

Critical Accounting Policies

Our financial statements are prepared in accordance with GAAP. The preparation of our financial statements and related disclosures requires us to make estimates, assumptions, and judgments that affect the reported amount of assets, liabilities, revenue, costs and expenses, and related disclosures. We base our estimates and assumptions on historical experience and other factors that we believe to be reasonable under the circumstances, but all such estimates and assumptions are inherently uncertain and unpredictable. We evaluate our estimates and assumptions on an ongoing basis. Actual results may differ from those estimates and assumptions, and it is possible that other professionals, applying their own judgment to the same facts and circumstances, could develop and support alternative estimates and assumptions that would result in material changes to our operating results and financial condition.

We consider the assumptions and estimates associated with revenue recognition, business combinations, goodwill and acquired intangible assets, income taxes and stock-based compensation to be our critical accounting policies and estimates. For further information on our critical and other significant accounting policies, see the notes to the condensed consolidated financial statements appearing elsewhere in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K, as filed on March 8, 2016 with the SEC.

Results of Operations

The following table sets forth, for the periods presented, data from our condensed consolidated statements of operations as a percentage of revenue that each line item represents. The period-to-period comparison of financial

results is not necessarily indicative of future results. The information contained in the table below should be read in conjunction with our condensed consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q.

Table of Contents

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2016	
	2015		2015	
	(% of revenue)			
Consolidated statements of operations data:				
Revenue	100.0 %	100.0 %	100.0 %	100.0 %
Cost of revenue	29.8	28.3	30.0	29.1
Gross profit	70.2	71.7	70.0	70.9
Operating expenses:				
Research and development	15.7	20.6	16.5	21.2
General and administrative	17.4	29.7	20.1	25.1
Sales and marketing	36.3	37.2	34.6	40.2
Restructuring charges	0.1	0.7	0.5	0.3
Total operating expenses	69.5	88.2	71.7	86.8
Income (loss) from operations	0.7	(16.5)	(1.7)	(15.9)
Interest and other income (expense), net	0.3	0.4	—	0.1
Income (loss) before income taxes	1.0	(16.1)	(1.7)	(15.8)
Provision for income taxes	0.8	1.2	0.5	1.0
Net income (loss)	0.2	% (17.3)%	(2.2)%	(16.8)%
Comparison of the Three and Nine Months Ended September 30, 2016 and 2015				
Revenue				

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2016	2015	Change	2016	2015	Change
	(in thousands, except percentage data)					
Revenue	\$51,948	\$34,553	\$17,395 50.3 %	\$153,498	\$101,551	\$51,947 51.2 %
Revenue increased for each of the three and nine month periods ended September 30, 2016 as compared to the three and nine month periods ended September 30, 2015, primarily due to the inclusion of revenue from our recently acquired EVault product offerings and increased sales of higher priced SMB solutions.						

Cost of revenue, gross profit, and gross margin

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2016	2015	Change	2016	2015	Change
	(in thousands, except percentage data)					
Cost of revenue	\$15,459	\$9,774	\$5,685 58.2 %	\$46,078	\$29,588	\$16,490 55.7 %
Percent of revenue	29.8	% 28.3	%	30.0	% 29.1	%
Components of cost of revenue:						
Personnel-related costs	\$5,720	\$3,450	\$2,270 65.8 %	\$17,723	\$10,398	\$7,325 70.4 %
Hosting and depreciation costs	5,326	4,903	423 8.6 %	16,641	15,009	1,632 10.9 %
Software, amortization and other	4,413	1,421	2,992 210.6 %	11,714	4,181	7,533 180.2 %
Total cost of revenue:	\$15,459	\$9,774	\$5,685 58.2 %	\$46,078	\$29,588	\$16,490 55.7 %
Gross profit	\$36,489	\$24,779	\$11,710 47.3 %	\$107,420	\$71,963	\$35,457 49.3 %
Gross margin	70.2	% 71.7	%	70.0	% 70.9	%

Our gross margin remained relatively consistent for each of the three and nine month periods ended September 30, 2016 as compared to the three and nine month periods ended September 30, 2015. The increase in total costs of revenue in each of the

Table of Contents

three and nine month periods ended September 30, 2016 is due primarily to an increase in costs associated with revenue related to the acquisition of EVault.

Operating expenses

Research and development

	Three Months Ended September 30,					Nine Months Ended September 30,				
	2016	2015	Change			2016	2015	Change		
	(in thousands, except percentage data)									
Research and development	\$8,156	\$7,123	\$1,033	14.5	%	\$25,272	\$21,500	\$3,772	17.5	%
Percent of revenue	15.7	%	20.6	%		16.5	%	21.2	%	
Components of costs of research and development:										
Personnel-related costs	\$6,294	\$5,312	\$982	18.5	%	\$19,271	\$16,142	\$3,129	19.4	%
Third-party outsourcing costs	331	945	(614)	(65.0)	%	864	2,750	(1,886)	(68.6)	%
Hosting, consulting and other	1,531	866	665	76.8	%	5,137	2,608	2,529	97.0	%
Total research and development:	\$8,156	\$7,123	\$1,033	14.5	%	\$25,272	\$21,500	\$3,772	17.5	%

Research and development expenses increased for each of the three and nine month periods ended September 30, 2016 as compared to the three and nine month periods ended September 30, 2015, primarily as a result of an increase in personnel-related costs associated with additional research and development headcount related to the EVault acquisition and an increase of hosting, consulting and other expenses associated with enhancing the functionality and ease of use of our solutions, offset by a decrease in engineering outsourcing costs.

General and administrative

	Three Months Ended September 30,					Nine Months Ended September 30,				
	2016	2015	Change			2016	2015	Change		
	(in thousands, except percentage data)									
General and administrative	\$9,059	\$10,273	\$(1,214)	(11.8)	%	\$30,868	\$25,473	\$5,395	21.2	%
Percent of revenue	17.4	%	29.7	%		20.1	%	25.1	%	
Components of general and administrative:										
Personnel-related costs	\$5,126	\$4,260	\$866	20.3	%	\$15,659	\$13,009	\$2,650	20.4	%
Professional fees	1,489	5,597	(4,108)	(73.4)	%	8,667	10,343	(1,676)	(16.2)	%
Consulting, taxes and other	2,444	416	2,028	487.5	%	6,542	2,121	4,421	208.4	%
Total general and administrative:	\$9,059	\$10,273	\$(1,214)	(11.8)	%	\$30,868	\$25,473	\$5,395	21.2	%

General and administrative expenses decreased for the three month period ended September 30, 2016 as compared to the three month period ended September 30, 2015, primarily as a result of decreased litigation expenses included in professional fees. This decrease was partially offset by increased personnel-related costs associated with additional headcount related to the EVault acquisition and increased transaction tax expenses included in consulting, taxes and other.

General and administrative expenses increased for the nine month period ended September 30, 2016 as compared to the nine month period ended September 30, 2015, primarily as a result of an increase in personnel-related costs associated with additional headcount related to the EVault acquisition and higher consulting and transaction tax expenses included in consulting, taxes and other. Additionally, professional fees decreased related to a decline in hostile takeover expenses and litigation-related expenses, partially offset by increased acquisition and integration-related expenses associated with the acquisition of EVault.

Table of Contents

Sales and marketing

	Three Months Ended September 30,			Nine Months Ended September 30,				
	2016	2015	Change	2016	2015	Change		
	(in thousands, except percentage data)							
Sales and marketing	\$18,864	\$12,860	\$6,004	46.7 %	\$53,069	\$40,811	\$12,258	30.0 %
Percent of revenue	36.3	% 37.2	%		34.6	% 40.2	%	
Components of sales and marketing:								
Personnel-related costs	\$7,847	\$4,781	\$3,066	64.1 %	\$23,505	\$14,649	\$8,856	60.5 %
Advertising costs	4,676	3,593	1,083	30.1 %	12,736	11,569	1,167	10.1 %
Costs of credit card transactions and offering free trials	1,561	1,846	(285)	(15.4)%	4,871	5,645	(774)	(13.7)%
Agency fees, consulting and other	4,780	2,640	2,140	81.1 %	11,957	8,948	3,009	33.6 %
Total sales and marketing:	\$18,864	\$12,860	\$6,004	46.7 %	\$53,069	\$40,811	\$12,258	30.0 %

Sales and marketing expenses increased for each of the three and nine month periods ended September 30, 2016 as compared to the three and nine month periods ended September 30, 2015, primarily due to increased personnel-related costs associated with increased sales headcount related to the EVault acquisition. Additionally, sales and marketing expenses increased due to an increase in our overall marketing efforts associated with EVault included within advertising costs and an increase in consulting and other expenses related to the inclusion of the EVault business in our consolidated results.

Restructuring

We recorded an immaterial amount of restructuring charges for the three month period ended September 30, 2016 and \$0.8 million for the nine month period ended September 30, 2016, respectively, primarily related to the reorganization and consolidation of certain operations as well as disposal of certain assets in the first quarter of 2016. We recorded \$0.2 million of restructuring charges for the three month period ended September 30, 2015 and \$0.3 million for the nine month period ended September 30, 2015, which was related to the completion of our data center optimization program. See Note 13—Restructuring to our condensed consolidated financial statements included in this Quarterly Report for additional information.

Income Taxes

We recorded income tax expense of \$0.4 million and \$0.4 million for the three month periods ended September 30, 2016 and September 30, 2015, respectively. Our effective income tax rates were 80.0% and (7.3%) for the three month periods ended September 30, 2016 and September 30, 2015, respectively. We recorded income tax expense of \$0.8 million and \$1.0 million for the nine month periods ended September 30, 2016 and September 30, 2015, respectively. Our effective income tax rates were (31.1%) and (6.3%) for the nine month periods ended September 30, 2016 and September 30, 2015, respectively. Our effective income tax rate varied from the statutory income tax rate principally as a result of significant pre-tax book losses in the U.S. and Switzerland that cannot be benefited.

Other Financial Data

In addition to our results discussed above determined under GAAP, we believe that bookings, annual retention rate, renewal rate, and adjusted free cash flow are useful to investors in evaluating our operating performance. See the Performance Highlights section for the table presenting our performance highlights for the three and nine months ended September 30, 2016 and 2015. Management considers these financial and operating metrics critical to understanding our business, reviewing our historical performance, measuring and identifying current and future trends, and for planning purposes. Securities analysts also frequently use bookings and adjusted free cash flow as supplemental measures to evaluate the overall performances of companies.

Bookings and adjusted free cash flow are financial data that are not calculated in accordance with GAAP. The tables below provide reconciliation of bookings and adjusted free cash flow to revenue and cash provided by operating activities, respectively, the most directly comparable financial measures calculated and presented in accordance with GAAP.

Table of Contents

Our management uses annual retention rate to determine the stability of our customer base and to evaluate the lifetime value of our customer relationships. As customers' annual and multi-year subscriptions come up for renewal throughout the calendar year based on the dates of their original subscriptions, measuring retention on a trailing 12 month basis at the end of each quarter provides our management with useful and timely information about the stability of our customer base. Management uses renewal rate to monitor trends in customer renewal activity.

Our management uses bookings as a proxy for cash receipts. Bookings represent the aggregate dollar value of customer subscriptions and software arrangements, which may include multiple revenue elements, such as software licenses, hardware, professional services and post-contractual support, received by us during a period. We initially record a subscription fee as deferred revenue and then recognize it ratably, on a daily basis, over the life of the subscription period. Management uses bookings and adjusted free cash flow as measures of our operating performance; for planning purposes, including the preparation of our annual operating budget; to allocate resources to enhance the financial performance of our business; to evaluate the effectiveness of our business strategies; to provide consistency and comparability with past financial performance; to determine capital requirements; to facilitate a comparison of our results with those of other companies; and in communications with our Board of Directors concerning our financial performance. We also use bookings and adjusted free cash flow as factors when determining management's incentive compensation. Management believes that the use of bookings and adjusted free cash flow provides consistency and comparability with our past financial performance, facilitates period-to-period comparisons of operations, and also facilitates comparisons with other peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results.

Although bookings and adjusted free cash flow are frequently used by investors and securities analysts in their evaluations of companies, these metrics have limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results of operations as reported under GAAP. Some of these limitations are:

• bookings do not reflect our receipt of payment from customers;

• adjusted free cash flow does not reflect our future requirements for contractual commitments to vendors;

• adjusted free cash flow does not reflect the non-cash component of employee compensation or depreciation and amortization of property and equipment; and

• other companies in our industry may calculate bookings or adjusted free cash flow or similarly titled measures differently than we do, limiting their usefulness as comparative measures.

The following tables present reconciliations of our bookings and adjusted free cash flow to revenue and cash provided by operating activities, respectively, the most directly comparable financial measures calculated and presented in accordance with GAAP.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015

Liquidity and Capital Resources

As of September 30, 2016, we had cash and cash equivalents and marketable securities of \$49.1 million, which consisted of cash, money market funds, U.S. agency and treasury securities, and certificates of deposit. We have available borrowings under our revolving credit facility of up to \$25.0 million, which we can draw down on through May 6, 2018.

Sources of funds

We believe, based on our current operating plan, that our existing cash and cash equivalents, marketable securities, cash provided by operations, and borrowings available under our revolving credit facility will be sufficient to meet our anticipated cash needs for at least the next 12 months.

From time to time, we may explore additional financing sources to develop or enhance our solutions, fund expansion, respond to competitive pressures, acquire or to invest in complementary products, businesses or technologies, or to lower our cost of capital, which could include equity, equity-linked, and debt financing. There can be no assurance that any additional financing will be available to us on acceptable terms, if at all. If we raise additional funds through the issuance of equity or convertible debt or other equity-linked securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock.

Our revolving credit facility allows us to borrow up to \$25.0 million, including a \$5.0 million sub-limit for letters of credit, through May 6, 2018. Our revolving credit facility may be increased by up to an additional \$25.0 million if the existing or additional lenders are willing to make such increased commitments and subject to other terms and conditions. Our revolving credit facility shall be available to us at an interest rate of the Wall Street Journal prime rate plus 75 basis points or LIBOR plus 175 basis points, at our option, and is secured by substantially all of our assets and contains customary affirmative and negative covenants, including financial covenants specifying a minimum quick ratio and minimum consolidated free cash flow, in each case subject to customary and other exceptions for a credit facility of this size and type. To date, we were in compliance with these covenants and there was one letter of credit for \$0.8 million outstanding under the credit facility related to the security deposit for our corporate headquarters. As of September 30, 2016, the availability under the credit facility was \$24.2 million.

Uses of funds

We have increased our operating and capital expenditures in connection with the growth in our operations and the increase in our personnel, and we anticipate that we will continue to increase such expenditures in the future. Our future capital requirements may vary materially from those now planned and will depend on many factors, including:

- potential future acquisition opportunities;
- the levels of advertising and promotion required to acquire and retain customers;

- expansion of our data center infrastructure necessary to support our growth;
growth of our operations in the U.S. and worldwide;

Table of Contents

• our development and introduction of new solutions; and
 • the expansion of our sales, customer support, research and development, and marketing organizations.

Future capital expenditures will focus on acquiring additional data storage and hosting capacity and general corporate infrastructure. We are not currently party to any purchase contracts related to future capital expenditures, other than short-term purchase orders.

Cash flows

The following table summarizes our net cash inflows (outflows) for the nine months ended September 30, 2016 and 2015.

	Nine Months Ended	
	September 30,	
	2016	2015
	(in thousands)	
Net cash provided by operating activities	\$3,364	\$8,540
Net cash (used in) provided by investing activities	\$(15,614)	\$8,315
Net cash used in financing activities	\$(2,733)	\$(1,170)

Operating activities

Our cash flows from operating activities are significantly influenced by the amount of our net income (loss), growth in sales and customer growth, changes in working capital accounts, the timing of prepayments and payments to vendors, add-backs of non-cash expense items such as depreciation and amortization, and stock-based compensation expense.

In the nine months ended September 30, 2016, cash provided by operating activities was \$3.4 million, which was driven by a \$1.8 million increase in deferred revenue and a net adjustment for non-cash charges of \$19.5 million, primarily comprised of \$12.2 million of depreciation and amortization, \$6.6 million of stock-based compensation expense, \$0.5 million loss on disposal of equipment and \$0.2 million in other non-cash items. These cash inflows were partially offset by an increase in working capital of \$13.9 million due primarily to timing of payments and customer receipts, our net loss of \$3.4 million and a decrease in other assets and liabilities of \$0.6 million.

In the nine months ended September 30, 2015, cash provided by operating activities was \$8.5 million, which was primarily driven by a \$5.2 million increase in deferred revenue associated with an increase in subscription sales and customer growth. Net cash inflows from operating activities for the nine months ended September 30, 2015 included non-cash charges of \$17.6 million, primarily comprised of \$10.3 million of depreciation and amortization and \$7.4 million of stock-based compensation expense, and an increase in working capital of \$2.5 million and other assets and long-term liabilities of \$0.2 million. These cash inflows were partially offset by our net loss of \$17.0 million.

Investing activities

In the nine months ended September 30, 2016, cash used in investing activities was \$15.6 million, which was primarily driven by our payment of \$11.6 million in connection with the acquisition of EVault, a purchase of marketable securities and derivatives of \$1.5 million, and capital expenditures of \$3.7 million, offset by proceeds from maturities of marketable securities of \$1.2 million.

In the nine months ended September 30, 2015, cash provided by investing activities was \$8.3 million, which was primarily driven by a \$17.5 million increase in cash relating to proceeds from maturities of marketable securities and derivatives, a \$0.7 million increase relating to a decrease in restricted cash, and a \$0.1 million increase related to proceeds from the sale of property, plant, and equipment. These cash inflows were partially offset by capital expenditures of \$8.3 million, a purchase of marketable securities and derivatives of \$0.7 million, and the use of \$1.0 million, net of cash acquired, in connection with the previously disclosed acquisition of certain assets of Rebit, Inc. in August 2015.

Table of Contents

Financing activities

In the nine months ended September 30, 2016, cash used in financing activities was \$2.7 million, which was primarily driven by a \$4.7 million repurchase of common stock, partially offset by net proceeds from the exercise of stock options of \$2.0 million.

In the nine months ended September 30, 2015, cash used in financing activities was \$1.2 million, which was primarily driven by a \$3.0 million repurchase of common stock, partially offset by net proceeds from the exercise of stock options of \$1.8 million.

Off-balance sheet arrangements

As of September 30, 2016, we did not have any off-balance sheet arrangements.

Contractual obligations

The following table summarizes our contractual obligations at September 30, 2016 (in thousands):

	Payment Due by Period (1)				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
	(in thousands)				
Office lease obligations	\$21,413	\$4,108	\$5,985	\$4,482	\$6,838
Data center lease obligations	9,037	3,892	3,336	1,666	143
Other purchase commitments	5,320	3,765	1,555	—	—
Total	\$35,770	\$11,765	\$10,876	\$6,148	\$6,981

(1) The future payments related to uncertain tax positions have not been presented in the table above due to the uncertainty of the amounts and timing of cash settlement with the taxing authorities. There have been no material changes to our uncertain tax positions in the third quarter of 2016.

The commitments under our office lease obligations shown above consist primarily of lease payments for our Boston, Massachusetts corporate headquarters and our Lewiston, Maine customer support facility. In May 2014, we entered into a lease agreement for our new corporate headquarters in Boston, Massachusetts. The initial term of the lease expires on December 31, 2024, and we have an option to extend the original term of the lease for one successive five-year period. Upon execution of the lease agreement, we were required to post a security deposit of \$0.8 million, which we maintain as a letter of credit. Our landlord can draw against this letter of credit in the event of default by us. The facility was made available to us to begin our build-out on June 1, 2014, and as such, we began recording rent expense at that time. In accordance with the lease, we received a tenant improvement allowance. The rent expense is recorded net of the allowance over the term of the lease. The leasehold improvements associated with the initial build-out are being amortized over the initial term of the lease. Any additional leasehold improvements made during the course of occupancy will be amortized over the shorter of the useful life or remaining life of the lease.

In September 2016, we entered a lease agreement for a new data center in Ashburn, Virginia. The initial term of the lease expires on November 30, 2021, with escalating rent payments throughout the term. We have the option to extend the original term of the lease for two successive three-year periods. In accordance with the lease, we received an incentive whereby the landlord will pay for a portion of the moving expenses associated with moving equipment from the current data center to the Ashburn location. The rent expense is recorded net of the incentive over the term of the lease.

Our Lewiston, Maine support facility lease expires in June 2018. We may terminate this lease at any time upon nine months' notice.

We also lease a small amount of general office space in Sunnyvale, California; Munich, Germany; Viersen, Germany; Longmont, Colorado; Salt Lake City, Utah; Oakville, Canada; Emeryville, California; Hertogenbosch, Netherlands; Berkshire, United Kingdom and Anatole, France under lease agreements that expire in March 2020, July 2020, August 2017, August 2017, October 2017, December 2018, March 2022, September 2017, May 2017 and July 2017, respectively.

The commitments under our data center lease obligations shown above consists of Wakefield, Massachusetts; Chandler, Arizona, Phoenix, Arizona and Ashburn, Virginia data centers. Additional commitments within this line consist of data center colocation agreements in place with Iron Mountain and Center 7 to rent colocation space at each of their data centers.

Table of Contents

Other purchase commitments shown above consist of contractual commitments to various vendors primarily for advertising, marketing, and broadband services.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Quantitative and Qualitative Disclosures about Market Risk

For quantitative and qualitative disclosures about market risk affecting us, see Item 7A “Quantitative and Qualitative Disclosures about Market Risk” in our Annual Report on Form 10-K filed with the SEC on March 8, 2016. Our exposure to market risks has not changed materially from that set forth in our Annual Report.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2016. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2016, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Note 11 – Commitments and Contingencies to our condensed consolidated financial statements included in this Quarterly Report for information concerning litigation. From time to time, we have been and may become involved in legal proceedings arising in the ordinary course of our business. Although the results of litigation and claims cannot be predicted with certainty, we are not presently involved in any legal proceeding in which the outcome, if determined adversely to us, would be expected to have a material adverse effect on our business, operating results, or financial condition. Regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources, and other factors.

ITEM 1A. RISK FACTORS

The Company's operations and financial results are subject to various risks and uncertainties that could adversely affect our business, financial condition, liquidity and results of operations. There have been no material changes to the risks and uncertainties previously presented in "Item 1A. Risk Factors", in our Annual Report on Form 10-K filed with the SEC on March 8, 2016.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Sale of Unregistered Securities

Not applicable. The Company did not sell unregistered securities in the three months ended September 30, 2016.

(b) Use of Proceeds

Not applicable. The Company did not receive proceeds for the sale of unregistered securities in the three months ended September 30, 2016.

(c) Issuer Purchases of Equity Securities

The following table is a summary of our repurchases of our common stock in the third quarter of 2016:

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per Share (2)	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares that May be Purchased Under the Plans or Programs (3)
July 1, 2016 - July 31, 2016	—	\$ —	—	\$ 10,178,709
August 1, 2016 - August 31, 2016	—	\$ —	—	\$ 10,178,709
September 1, 2016 - September 30, 2016	8,939	\$ 14.25	—	\$ 10,178,709
	8,939		—	

During the three months ended September 30, 2016, 8,939 shares were withheld by the Company to satisfy tax (1) withholding obligations in connection with the vesting of restricted stock units. We did not repurchase any shares of our common stock pursuant to our previously-announced program.

(2) The average price per share for each of the months in the fiscal quarter was calculated by dividing (a) the sum for the aggregate value of the tax withholding obligations and the aggregate amount we paid for shares acquired under

our share repurchase program, described in Note 8—Stockholders' Equity to our condensed consolidated financial statements, by (b) the sum of the number of shares withheld and the number of shares acquired in our share repurchase program.

- (3) In May 2015, our Board of Directors authorized a \$20.0 million share repurchase program, announced on May 14, 2015 and effective from May 15, 2015 through May 15, 2018.
