September 14, 2006

BOARD APPROVAL GRANTED TO ORDER LONG LEAD TIME EQUIPMENT FOR MIRADOR COPPER - GOLD MINE, ECUADOR

VANCOUVER, BRITISH COLUMBIA, September 14, 2006 - Corriente Resources Inc., announced today that the Board of Directors has reviewed the development status of the Mirador mine and has approved the placement of orders for long lead-time equipment for its Mirador copper-gold mine in southeast Ecuador. This equipment includes the main components of the grinding circuit such as the SAG and Ball Mills. The company is working on a timeline which calls for production at Mirador in the 4th Quarter of 2008 and these items are on the critical path to meet that deadline.

Capital investment budgeted to be spent through the end of 2006 totals approximately CDN \$28 Million and is available from our current cash resources of over CDN\$135 Million. In addition to providing funds for equipment orders, these expenditures include infrastructure work for bridges and roads to provide improved access to the Mirador area and the planned pit and will allow Corriente to continue to grow the mining and construction team from the strong core group in place in Ecuador.

Ken Shannon, CEO of Corriente commented, "We feel the junior copper sector's capacity to complete on new projects and deliver copper concentrate by the end of 2008 is quite low and as a result, we are very focused on maintaining our copper mine development head-start for the benefit of our shareholders. The current forward curve on copper to 2011 averages above US\$2.25 per pound, which compares favorably with the base copper price of \$1.00/lb used in our April 2005 Mirador Feasibility Study. This much higher copper price means that during our planned first full three years of operations, we have a potential cash flow stream that is significantly higher than what we had previously modeled, which will offset capital cost increases that are currently prevalent in our sector."

#### ABOUT CORRIENTE

Corriente has commenced construction of a starter operation at its Mirador copper-gold operation. Mirador is one of the few new, sizeable copper projects available for near-term production. Corriente controls a 100% interest in over 60,000 hectares located within the Corriente Copper Belt, Ecuador. The Belt currently contains four copper and copper-gold porphyry deposits: Mirador, Panantza , San Carlos, and Mirador Norte. Delination drilling is underway at Panantza and additional exploration activities will be ongoing, as six additional copper and copper-gold exploration targets have been identified in the Corriente Copper Belt to date.
