SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF
1934

For the year ended December 31, 2014

Commission file number: 000-31380

APPLIED
MINERALS,
INC.
(Exact name
of registrant
as specified
in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

82-0096527
(I.R.S. Employer Identification No.)

110 Greene Street – Suite 1101, New York, NY 10012
(Address of principal executive offices) (Zip Code)

(800) 356-6463
Issuer's telephone number, including area code

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

YES NOX

Edgar Filing: Applied Minerals, Inc. - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act:

YES NOX

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YESXNO

Indicate by check mark whether the registrant submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YESXNO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulations S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller-reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer XNon-accelerated Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NOX

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant on June 30, 2014, based on the last sales price on the OTC Bulletin Board on that date, was approximately \$51,003,024.

As of February 28, 2015, there were 95,331,128 common shares outstanding.

NOTE REGARDING FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are based on our current expectations, assumptions, estimates and projections about our business and our industry. Words such as "believe," "anticipate," "expect," "intend," "plan," "will," "may," and other similar expressions identify forward-looking statements. In

addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements.

In the discussion under "Item 1 – Business" and in particular under "Business Review- 2014", the Company discusses a wide range of forward-looking information, including the Company's beliefs and expectations concerning business opportunities, potential customer interest, customer activities (including but not limited to testing, scale-ups, production trials, field trials, product development), and the Company's expectations as to sales, the amount of sales, and the timing of sales. Whether any of the foregoing will actually come to fruition, occur, be successful, or result in sales and the timing and amount of such sales is uncertain.

More generally, all forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those reflected in the forwardlooking statements. Factors that might cause such a difference include, but are not limited to, those discussed in the section of this Annual Report entitled "1A. RISK FACTORS."

PART I

ITEM 1. BUSINESS

Applied Minerals, Inc. (the "Company" or "we" or "us") is focused primarily on (i) the development and marketing of our halloysite clay-based DRAGONITE™ line of products for use to improve the performance of end-products in application markets such as flame retardant additives for plastics, nucleation, thermosets and adhesives, reinforcement, molecular sieves and catalysts, ceramics, binders, cosmetics, controlled release carriers and environmental remediation and (ii) the development and marketing of our AMIRON™ line of iron oxide products for pigmentary and technical applications.

The Company owns the Dragon Mine, which has significant deposits of high-quality halloysite clay and iron oxide. The 267-acre property is located in southwestern Utah and its resource was mined for halloysite on a large-scale, commercial basis between 1949 and 1976 for use as a petroleum cracking catalyst. The mine was idle until 2001 when the Company leased it to develop its halloysite resource for advanced, high-value applications. We purchased 100% of the property in 2005.

Halloysite is an aluminosilicate clay that possesses a tubular morphology with a hollow lumen (pore). Traditionally, halloysite has been used to manufacture porcelain, bone china and catalysts used in the petroleum cracking process. A significant amount of academic and industrial research has been performed on the commercial uses of halloysite clay beyond porcelain products and ceramic catalysts. This research has identified a wide array of application areas in which the unique morphology of halloysite can be utilized to either enhance the performance of existing applications or create new high-performance ones. Since 2009, management has been primarily focused on developing halloysite-based products for advanced applications, such as, but not limited to, reinforcement additives for polymer composites, flame retardant additives for polymers, controlled release carriers for paints and coatings, environmental remediation media, and carriers of agricultural agents. The clays used in these advanced applications sell for significantly higher prices than those used in more traditional applications. Nanoclays have been used as additives to develop high performance plastic composites. These nanoclays provide functionality to polymer matrices that cannot be replicated using traditional fillers. Nanoclays, such as treated montmorillonite, sell for up to \$5,000 per ton due, in large part, to the cost associated with exfoliating the clay so it may be properly dispersed within a polymer matrix. Halloysite has been shown to be as effective a polymer additive as nanoclay without requiring a costly exfoliation to disperse it within a polymer matrix. The Company has and continues to utilize a number of employees and consultants to research and develop the use of halloysite for advanced applications.

In addition to the development of its halloysite resource, management has also developed a line of iron oxide-based products for the pigmentary and technical markets. The Dragon Mine has a resource of 3.3 million tons of natural iron oxide mineralized material, which is comprised primarily of goethite and hematite. Initially, the resource was considered to be utilizable as only an input of the steel-manufacturing process but, upon additional analysis, the iron resource was found to be a high-quality natural iron oxide due to its high Fe₂O₃ content, exceptional chemical purity, good dispersability, good tinting strength and color saturation, low color variation, and low content of heavy metals. High-quality iron oxides have commercial uses in a number of higher value applications such as the aforementioned pigmentary and technical markets. The Company's AMIRON product line includes semi-transparent and opaque pigments for the construction, concrete, paints and coatings, and plastics and rubber industries. AMIRON's technical oxides, due to their particularly high surface area of 25 m²/g – 125 m²/g and reactivity, can be used as the media for the removal of toxins from waste and drinking water, as a catalyst for desulfurization, and a foundry sand additive. The Company currently has 24,229 tons of mined iron ore in stockpiles on the surface of the mine property.

The Company has carried out an extensive drilling program to characterize the mineralized material at the Dragon Mine. In January 2014, the Company commissioned a mineral processing plant with a capacity of up to 45,000 tons per annum for certain applications. Currently, this facility is dedicated to the iron oxide resource except for occasional processing of halloysite. Additionally, the Company has small processing facility with a capacity of 5,000 – 10,000 tons per annum that is dedicated to its halloysite resource.

Table Of Contents

The following table discloses (i) the number of tons of halloysite clay and iron oxide extracted by the Company from the Dragon Mine and (ii) the number of tons of finished product produced by the Company during the 12 months ended December 31, 2013 and 2014, respectively:

	2014	2013
Tons extracted		
Halloysite clay	650	450
Iron oxide	2,200	3,300
Products produced (tons)		
Halloysite clay	69	22
Iron oxide	166	13

The table below discloses the percentage of total revenue by product category for the twelve months ended December 31, 2014 and 2013. “Testing” represents revenue generated from the sale of products used for laboratory testing by customers or potential customers. “Scale-Ups” represents revenue generated from the sale of products to customers or potential customers to determine whether our products perform successfully within a production-scale environment. “Commercial Production” represents revenue generated from the sale of products to customers that are either consumed by the customer or incorporated into a product that is sold by a customer to a third-party. “Other” represents revenue generated from the sale of products for which the Company is not aware of the use by a potential customer.

	Percentages of Sales Classified by Customer Use	
Sales for:	2014	2013
Commercial Production	70	69
Scale-Ups	26	17
Testing	2	4
Other	2	10
	100	100

Applied Minerals is a publicly traded company incorporated in the state of Delaware. The common stock trades on the OTCQB under the symbol AMNL. BUSINESS REVIEW - 2014

BUSINESS REVIEW - 2014

Financing

On November 4, 2014, the Company raised \$12,500,000 through the sale of \$19,848,483 principal amount of 10% Convertible-Elect PIK Notes due 2018 (the “ Series A Notes”). The Series A Notes are mandatorily convertible by the Company after two years under certain conditions and the maturity of the Notes may be extended if certain conditions are met.

Technical Ceramics and Porcelain

During 2014 the Company continued to supply a well-known producer of ceramic formulations. This customer utilizes DRAGONITE as a binder for use in high-value ceramic tiles. DRAGONITE, among other things, provides increased strength, whiteness, and translucency for certain ceramic applications.

Table Of Contents

A large manufacturer of sanitaryware products has carried out a product development scale-up of an application that utilizes DRAGONITE as an additive that both improves the green strength of the ceramic body and reduces the manufacturing time of the ceramic-based product. The Company continues to focus on the conversion of this opportunity. Management is marketing such functionality of its DRAGONITE to the two other leading global sanitaryware producers.

OPF Enterprises, LLC, a sales agent of the Company, continues to introduce the Company's DRAGONITE to potential customers focused on ceramic applications. The purity and physical characteristics of the Dragon Mine's halloysite continue to attract significant attention from potential customers.

Plastics, Adhesives and Coatings

The Company continued to receive orders in 2014 for its DRAGONITE HP nucleating agent from a leading producer of plastic lawn and garden equipment. DRAGONITE HP, for this customer, is being utilized in two separate products primarily to (i) improve product strength, (ii) reduce structural defects and shrinkage of molded parts, resulting in lower scrap rates, and (iii) reduce cycle time of its molded plastic components, which results in a decrease in manufacturing costs.

Beginning in 2015, this customer has decided to outsource the molding of one of its two products utilizing Dragonite-HP to an injection molding contractor. As part of this transition, the injection molding contractor was introduced Dragonite HP. After seeing the benefits of Dragonite-HP in the products produced for the lawn and garden customer, the contractor communicated to the Company its intention to utilize Dragonite-HP for certain other of its customers. During the first quarter of 2015, this customer ordered 10 tons of Dragonite-HP.

During the latter half of 2014, the Company received a purchase order for 20 tons of DRAGONITE from a leading manufacturer and marketer of foaming agents for plastics. DRAGONITE, when combined with a foaming agent, both enhances foaming properties and reduces cycle time for the foamed plastic part. The Company expects this customer to aggressively market its foaming agent with DRAGONITE and believes the order rate for DRAGONITE will increase in 2015.

Management continues to market its DRAGONITE HP as a nucleating agent additive to companies with large injection molding operations, promoting the decrease in cycle time that can be achieved from using the additive. The Company was able to secure a number of customer trials in 2014 and plans to secure additional trials in 2015. Only DRAGONITE HP and one other product, which sells for \$30,000 per ton, can nucleate polyethylene. Currently, a very small amount of the 50 million tons of polyethylene produced annually is nucleated, which presents a large opportunity for the Company's DRAGONITE product. The Company also sells DRAGONITE as a nucleating agent for polypropylene.

During 2014, a leading global producer of structural acrylic adhesives launched its next generation of structural acrylic products containing our DRAGONITE XR product. The volumes sold for this new acrylic adhesive product

were small in 2014 but demand for this new product is expected to grow in 2015, which could lead to an increase in the volume of DRAGONITE sold for this application. Additionally, this manufacturer is developing a number of new products utilizing DRAGONITE as an additive.

Mitsui Plastics continues to market DRAGONITE as an additive for reinforcement, cycle time reduction, and flame retardancy. Two customers, an adhesives manufacturer and a wire-and-cable manufacturer, experienced positive testing results using DRAGONITE for reinforcement and as a dispersant for certain flame retardant additives, respectively. It is expected that a product, utilizing DRAGONITE for reinforcement, is to be commercialized in 2016.

A large manufacturer of automotive tires has tested DRAGONITE for the reinforcement of rubber. During the latter half of 2014, the Company shipped DRAGONITE to the tire manufacturer to be used in a scale-up trial. The trial is scheduled to complete sometime during the first half of 2015.

Table Of Contents

During 2014 one of the world's largest manufacturers of building products developed a flame retardant coating application utilizing DRAGONITE. The product has been commercialized and small amounts are being sold. Volumes are expected to grow once this customer completes the required industry registration process for this product.

The Lorama Group, Inc. ("Lorama") continues to market DRAGONITE to potential customers as a high value additive for flame retardant paints and coatings as well as for the UV curing of coatings. During the fourth quarter of 2014, Lorama ordered 20 tons of DRAGONITE for delivery in the first quarter of 2015.

During 2014, Lorama introduced DRAGONITE to one of the largest wood coatings manufacturers in South America, which has utilized it in a flame retardant formulation for wood coatings. The product has been tested and meets industry requirements. The customer will run a plant trial in early 2015. If the trial is successful, the Company expects to realize sales of DRAGONITE to this customer during 2015.

The Company continues to sell DRAGONITE to Sigma-Aldrich, which, in turn, continues to receive interest in the material from corporate R&D departments as well as academic research organizations. These sales, in certain instances, have led to development projects with our Company once the initial lab sample evaluation has taken place.

Catalysts and Molecular Sieves

A high quality manufacturer of molecular sieves commenced scale-up trials using DRAGONITE as a binder for a catalyst product. A production trial is scheduled for early 2015. If successful the Company believes a commercialization of the product could occur sometime during the latter half of 2015 or in 2016.

A global supplier of molecular sieves performed a successful bench-scale trial using DRAGONITE to manufacture a synthetic zeolite. Approximately 10 metric tons were shipped in October to conduct a production scale-up trial. If successful, sales of DRAGONITE to this customer could start sometime during 2015.

Cosmetics

In early 2015 the Company signed a term sheet to form a joint venture with a leading developer and retailer of cosmetic products. The joint venture will own and market a brand of cosmetic products utilizing the unique characteristics of DRAGONITE-PUREWHITE. A significant amount of work related to the development and branding of these products has occurred over the last 18 months. The Company will own a significant equity stake in the joint venture. The Company expects the joint venture agreement to be executed sometime in the latter half of 2015.

Advanced Natural Iron Oxides

Pigmentary

During the fourth quarter of 2014, Lorama ordered 20 tons of AMIRON™ for pigment applications for delivery in the first quarter of 2015. Lorama is currently acting as a customer and a non-exclusive distributor for the AMIRON line of iron oxide pigments. Lorama is aggressively introducing AMIRON to its paints and coatings customers located in Europe, Asia and South America and North America. These customers have indicated strong interest in the product and Lorama's marketing efforts resulted in a number of scale-up trials conducted during 2014 by potential customers.

During 2014 a leading producer of mulch colorants began developing a number of products using AMIRON, focusing, in part, on developing a range of natural colors that synthetic pigments cannot provide. This producer is also looking to use AMIRON as an extender for its current line of colorants. Production scale-ups are expected for 2015. Management continues to market its AMIRON to other mulch colorant producers.

Table Of Contents

Technical

During 2014 the Company worked with a division of an oilfield services company with the goal to commercialize a gas desulphurization application utilizing the Company's AMIRON iron oxide as the active media in a scrubber to remove hydrogen sulfide from flue gas. After a year of product development and scale-up trials, this potential customer is field-testing the scavenger product with certain of its customers. Twenty tons of AMIRON were purchased for these trials. If these field tests prove successful, this potential customer has communicated to the Company that it will commercialize this desulphurization product in 2015.

During the latter half of 2014, the Company began marketing its AMIRON as a desulphurization agent for the biogas manufacturing process. Due to AMIRON's purity, large surface area, and strong reactivity, it effectively removes hydrogen sulfide from the decomposition process of organic waste, reducing corrosion of the fermentation reactor and, consequently, maximizing the yield of the fermentation process. The majority of the biogas market is in Europe. The market in the U.S. is emerging. Interest in product has come from potential customers in Germany, Denmark, United States, South Korea and Brazil.

A large international producer of foundry molding additives validated the efficacy of AMIRON for use as a foundry sand additive for iron casting. This potential customer has approved AMIRON for iron casting. Additionally, product scale-up trials are being carried out by this potential customer for AMIRON as a foundry sand additive for steel casting. Sales of AMIRON for iron casting are expected in 2015.

Intellectual Property Development

Many patented technologies based on halloysite have been granted to third parties over the years. A number of these patents have used the Company's DRAGONITE. Two significant patents granted that use halloysite from the Dragon Mine were granted in 2014. They include one that utilizes DRAGONITE to enhance the strength of a structural acrylic adhesive (US WO 2013126377 A1) and one that utilizes halloysite from the Dragon Mine to improve the performance of cement compositions used in a variety of subterranean operations such as oil & gas wells (US 20140090842 A1/WO 2014052757 A1).

The customer that filed the patent to utilize DRAGONITE in a structural acrylic application has commercialized a product that utilizes the patent and is developing additional applications that utilize the patent. The Company has begun working with a company on assessing the commercial viability of a high-performance cement product for subterranean wells that utilizes the technology described in the patent identified as US 20140090842 A1/WO 2014052757 A1.

Table Of Contents

New rules, established by the U.S. Department of the Interior, governing hydraulic fracturing operations include requiring strong cement barriers between wells and any water zones through which they may pass. The widespread use of hydraulic fracturing to reach deep oil and gas reserves, and the risks associated with the potential of contaminating ground water, will place a continually greater emphasis on the use of high performing cements in the construction of wells.

In addition to the two patents granted to third parties mentioned above, Applied Minerals has been granted a patent for the nucleation of polyethylene polymers using halloysite in Great Britain, Denmark and France. A patent is pending in the United States, Canada, China and Thailand. Only a small percentage of the 50 million ton polyethylene market is nucleated, which creates a potentially large opportunity for the technology covered by this patent.

DRAGON MINE

The Dragon Mine is located in the Tintic Mining District south of Eureka, Utah and approximately 75 miles southwest of Salt Lake City, Utah. The Dragon Mine property covers approximately 267 acres with a large mining permit from the state of Utah allowing for the extraction of minerals throughout the property. The mine can be operated year-round.

Exploration Stage

The Company is classified as an exploration stage company for purposes of Industry Guide 7 of the U.S. Securities and Exchange Commission.

Under Industry Guide 7, companies engaged in significant mining operations are classified into three categories, referred to as “stages” exploration, development, and production. Exploration stage includes all companies engaged in the search for mineral deposits (reserves) which are not in either the development or production stage. In order to be classified as a development or production stage company, the company must have already established reserves. Unless a company has established reserves, it cannot be classified as a development or production stage company, notwithstanding the nature and extent of development-type or production-type activities that have been undertaken or completed. Under Industry Guide 7, a “reserve” is “that part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination.” Generally speaking, a company may not declare reserves, unless, among other requirements, competent professional engineers conduct a detailed engineering and economic study and prepare a “bankable” or “final” feasibility study that “demonstrates that a mineral deposit can be mined profitably at a commercial rate.”

The Company commissioned a study of “resources” under the JORC Code of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves. That study indicated the existence of JORC “resources” of halloysite clay and iron oxide. A JORC resource is defined as a “mineral deposit in such form, grade...and quantity that there are reasonable prospects for eventual economic extraction,” a lower standard than that used for a final feasibility study.

Significant additional steps, including the demonstration of the Company’s ability to penetrate markets, would be necessary before a “bankable” or “final” feasibility study can be prepared.

Despite the fact that the Company has not established reserves, the Company has mined, processed and sold, and intends to continue to mine, process, and sell, halloysite clay and iron oxide from the Dragon Mine.

A consequence of the absence of reserves under Industry Guide 7 is that the mining company, such as the Company, is deemed to lack an objective basis to assert that it has a deposit with mineralization that can be economically and legally extracted or produced and sold to produce revenue.

Dragon Pit

The Dragon Pit area covers 4.95 acres and is mined underground. There are three separate types of mineralized material in the Dragon Pit area. The first type is comprised of clay with a relatively high concentration (~ 94%) of halloysite. The Dragon Pit contains 625,650 tons of this type of mineralized material.

The second grade found in the Dragon Pit is comprised of a mix of kaolinite, illite-smectite, and halloysite clays. Clays constitute approximately 73.4% of this mineralization, of which halloysite constitutes approximately 42.6%, kaolinite constitutes 19.2% and illite-smectite constitutes 11.6%. The Dragon Pit contains 565,575 tons of this type of mineralized material.

The third type of mineralized material found in the Dragon Pit is comprised of iron-bearing materials. This mineralization contains goethite (an iron hydroxide) and hematite (an iron oxide). We will refer to both minerals as “iron oxide.” The mineralization is approximately 94% iron oxide, of which goethite accounts for 69.7% and hematite 24.3%. There exist separate areas of goethite and hematite but the majority of the iron-bearing mineralization in the Dragon Pit exists as a goethite-hematite mix. The Dragon Pit contains 2,631,825 tons of this iron-bearing mineralization.

Table Of Contents

The table below describes the clay resource in the Dragon Pit:

Area	Acres	Resource	Clay (tons)	Clay Type	Average Clay Content (%)			Total
					Halloysite	Kaolinite	Illite-Smectite	
Dragon Pit	4.95	Measured ¹	629,650	Pure Halloysite	94.0	N/A	N/A	94.0
			565,575	Mix	42.6	19.2	11.6	73.4

1. A measured resource, according to JORC, is an indicated resource that has undergone enough further sampling that a 'competent person' (defined by the norms of the relevant mining code; usually a geologist) has declared them to be an acceptable estimate, at a high degree of confidence, of the grade, tonnage, shape, densities, physical characteristics and mineral content of the mineral occurrence. An indicated resource is an economic mineral occurrence that has been sampled (from locations such as outcrops, trenches, pits and boreholes) to a point where an estimate has been made, at a reasonable level of confidence, of its contained metal, grade, tonnage, shape, densities, and physical characteristics.

The table below describes the iron oxide resource in the Dragon Pit:

Area	Acres	Resource	Iron (tons)	Average Content of Hematite, Goethite and LOI (%)			LOI
				Hematite	Goethite	Hematite + Goethite	
Dragon Pit	4.95	Measured	2,631,825	24.3	69.7	94.0	11.4

Western Area

The Western area covers 6.33 acres and is mined underground. There are two different types of mineralization in the Western Area.

One type of mineralization in the Western Area is comprised primarily of a mix of kaolinite, illite-smectite, and halloysite clays. The clay content of this mineralization is approximately 71.4%, of which kaolinite constitutes 47.2%, illite-smectite constitutes 17.5% and halloysite constitutes 6.7%. The Western Area contains 862,903 tons of this type of mineralization.

The other type of mineralization is iron-bearing. The Western Area contains goethite and hematite. The mineralization is approximately 96% iron oxide on a mineralogical basis, of which hematite accounts for 75.9% and

goethite 20.1%. There exist separate areas of goethite and hematite but the majority of the iron-bearing mineralization in the Western Area exists as a goethite-hematite mix. The Western Area contains 670,450 tons of this iron-bearing mineralization.

The table below describes the clay resource in the Western Mine:

Area	Acres	Resource Clay (tons) ¹	Average Clay Content (%)			
			Halloysite	Kaolinite	Illite-Smectite	Total
Western Area	6.3	Measured 862,903	6.7	47.2	17.5	71.3

1. Reported in situ. Clay extracted and refined to < 45 microns, after removing certain non-clay material, is considered salable.

Table Of Contents

The table below describes the iron oxide resource in the Western Mine:

Area	Acres	Resource	Average Content of Hematite, Goethite and LOI (%)			Hematite + Goethite LOI	
			Iron (tons)	Hematite	Goethite		
Western Area	6.33	Measured	670,450	75.9	20.2	96.1	6.8

Surface Piles

There are five surface piles that were created during the mining of halloysite clay by Filtrol between 1949 and 1976. Filtrol mined the Dragon Mine's halloysite resource for use as a petroleum cracking catalyst. Any clay that contained more than a minimal amount (~ 2%) of iron oxide was not usable for petroleum cracking and was discarded into one of five surface piles. We view the surface piles as a possible source of revenue. The Company is not actively marketing the minerals in the surface piles.

The following sets forth information about the mineralized material by surface pile:

Surface Pile	Clay (tons)	Average Clay Content (%)			Total
		Halloysite	Kaolinite	Illite- Smectite	
1	154,500	41.8	25.8	9.4	77.0
2	127,100	19.0	33.6	27.8	80.4
3	298,900	9.4	30.7	24.9	65.4
4	33,280	13.2	31.7	31.7	76.7
5	144,100	13.5	13.5	31.8	81.8

In addition to the surface pile material described above, 24,229 tons of mined iron oxide is located on the surface of the Dragon Mine property.

Procedures Used to Develop the Tonnage and Grade Results

The following describes sample collection, sample preparation, and the analytical procedures used to develop analytical results set forth above for the Dragon Pit, the Western Area, and the Surface Piles.

Surface surveying positioning of holes was carried out using sub-centimetre Trimble GPS Receivers (base station and Rover) with accuracy within 5mm. Underground surveying utilized a Topcon GTS3 Total Station, which measures angle to one second and measures distances to parts per million. A DSI (Deviation Survey Instrument) SRG (Surface Recording Gyro) was utilized to measure deviation of the hole. A Brunton compass is used to determine a reference line. Readings are taken every 50' during the survey and a final reference reading is used to calculate the hole's overall drift. When run correctly, the instrument is accurate to within 1 foot per 1000' of depth.

Core drilling was carried out and for all boreholes the driller placed the core into a box, which was carefully labeled with borehole number, depth reached and any voids noted. A LCF (Lithology Control File) was established for each area and it included all rock types identified. The borehole number, coordinates, elevation, inclination, azimuth, and depths drilled were entered into a log showing the LCF.

Services on the clay extracted from the drill holes: Moisture Content; XRD identification; XRPD quantitative analysis; XRPD Formamide test; SEM imaging; FTIR analysis; BET Surface Area / Porosity; Qualitative EDS; XRF; ICP—MS for trace elements; MINOLTA – Color and brightness measurements. For analysis of the iron oxide, XRD, ICP-MS, BET Surface Area, Color and Brightness measurements were carried out by James Hutton Institute. ALS Minerals Laboratory in Reno, Nevada carried out analytical procedures ME-XRF21u, Iron oxide by XRF Fusion – normalized (XRF Instrument), OA-CRAE05x, LOIS for XRF (WST-SEQ) AND Au-ICP21, Au 30g FA ICP-AES Finish (ICP-AES Instrument)

Table Of Contents

Logging was carried out in line with the Lithology Control File. All of the data was then entered into a spreadsheet to show Borehole Number, coordinates, elevation and individual test results for each of the increments sampled and tested.

The Company utilized the PC/Core software package to convert raw borehole data and assumptions by the Company into a mathematical model using block model interpolation. The program provides for the production of "Quality Array Reports," each of which shows the correlation between one variable and all of the other variables in the model.

Description of Minerals at the Dragon Mine

Clays

Kaolinite and halloysite are clays and members of the kaolin group of clays. Both are aluminosilicate clays. Kaolinite and halloysite are essentially chemically identical, but have different morphologies (shapes). Kaolinite typically appears in plates or sheets. Halloysite, in contrast, typically appears in the shape of hollow tubes. On average, the halloysite tubes have a length in the range of 0.5 - 3.0 microns, an exterior diameter in the range of 50 - 70 nanometers and an internal diameter (lumen) in the range of 15 - 30 nanometers. Formation of halloysite occurs when kaolinite sheets roll into tubes due to the strain caused by a lattice mismatch between the adjacent silicon dioxide and aluminum oxide layers.

Kaolinite is one of the world's most common minerals. U.S. production in 2011 was 5.5 million tons.

Halloysite is by comparison is a rare mineral, with worldwide production of less than about 30,000 tons.

Illite refers to a group of clays that includes hydrous micas, phengite, brammalite, celadonite, and glauconite. Illite clays are common and large amounts are produced each year.

Smectite refers to a group of clays that includes montmorillonite, bentonite, nontronite, hectorite, saponite and saucanite. Smectite clays are common clay and large amounts are produced each year.

Iron Oxide

Hematite is the mineral form of iron oxide exists in a range of colors, including black to steel or silver-gray, brown to reddish brown, or red.

Goethite is an iron hydroxide oxide mineral exists in a range of colors, including yellowish to reddish to dark brown. If goethite is sufficiently heated to eliminate the water, it is transformed into hematite.

Table Of Contents

Mixtures of goethite and hematite are color brown.

Processing Facilities

All of the mineralization extracted from the Dragon Pit, Western Area and surface piles requires processing before it can be commercially sold. In January 2014, the Company commissioned a 45,000 tpa Hosokawa Alpine mineral processing facility. This mill enables the Company to control the processing of its mineral resource for qualities such as particle size, moisture and purity. Currently, this facility is dedicated to the iron oxide resource and will be used occasionally to process halloysite. Additionally, the Company has a small processing facility with a capacity of 5,000 – 10,000 tons per annum that is dedicated to its halloysite resource.

HALLOYSITE-BASED PRODUCTS

DRAGONITE

The Company primarily markets the following four grades of halloysite-based products under the DRAGONITE trademark:

DRAGONITE-XR
DRAGONITE-HP
DRAGONITE-Pure White
DRAGONITE

The Company has other product grades for application markets such as, but not limited to, technical ceramics and ceramic binders.

All subsequent references to DRAGONITE imply all grades of our halloysite product.

Table Of Contents

Application Markets for DRAGONITE

The following is a description of the application markets to which the Company is marketing its halloysite-based DRAGONITE products:

Flame retardant additives for plastics. Flame retardants are widely used in flammable and flame resistant plastics and are found in electronics, building insulation, polyurethane foam, and wire and cable. There are three types of flame retardants used in plastics:

Minerals, including halloysite, aluminum trihydrate (ATH), magnesium dihydrate (MDH), glass fiber, organoclays, and a number of other less important minerals;

Halogenated compounds (compounds containing bromine or chlorine)

Halogenated flame retardants are used in conjunction with a synergist (something that enhances the effectiveness of an active agent) to enhance their efficiency. Antimony trioxide (ATO) is widely used as a synergist for halogenated fire retardants; and

Halogenated fire retardants have been associated with health concerns due to the potential toxicity of the decomposition products, namely dioxins and furans, as well as environmental and bioaccumulation concerns and there has been action, in the form of treaties and federal and state legislation, to restrict certain uses of halogenated fire retardants.

Organophosphorus compounds.

DRAGONITE can be used as a partial replacement for ATH and MDH in certain applications and as a synergist to ATH and MDH in other applications. At typical loadings, ATH and MDH can adversely affect certain mechanical properties of plastics. DRAGONITE, in conjunction with ATH and MDH, exhibits a synergistic performance without degrading the mechanical properties of a polymer matrix.

Our research and development demonstrates that DRAGONITE can be used to replace 50% - 75% of ATO in plastic without affecting flame retardancy, retaining the same rating under UL 94, the Standard for Safety of Flammability of Plastic Materials for Parts in Devices and Appliances testing. The price of ATO is approximately \$9,200 per ton, a significant premium to DRAGONITE.

Generally speaking, the use of DRAGONITE instead of other FR products should allow a manufacturer to use less fire retardant, which, in turn, would result in the light-weighting of a product.

The Company estimates the global demand for flame retardant additives to be approximately 2.2 million metric tons.

Nucleation of Polymers. Plastics and polymers are composed of long molecular chains which form irregular, entangled coils in a melted resin, the phase in which a resin is liquid and its molecules can move about freely.

Some plastics, namely amorphous types, retain such a disordered structure upon freezing, the state in which a liquid resin becomes solid and its molecules are frozen, or locked, in place and cannot move. In other plastics, such as semi-crystalline polymers, the chains rearrange upon freezing and form partly ordered regions. Examples of semi-crystalline polymers are polyethylene (PE), polypropylene (PP), Nylon 6 and Nylon 6-6.

Crystallization of a polymer occurs as a result of nucleation, a process that starts with small, nanometer-sized domains upon which the polymer chains arrange in an orderly manner to develop larger crystals. The overall rate of crystallization of a polymer can be increased by a nucleating agent.

Table Of Contents

In plastic molding processes, especially in injection molding, the plastic part must remain in the mold until freezing. To the extent that crystallization is accelerated, the time in the mold can be reduced, thereby resulting in productivity enhancement.

DRAGONITE added to a resin at a loading of just 1% can significantly speed up the process of crystallization.

DRAGONITE is one of only two products that can nucleate polyethylene. The other product is estimated to cost \$15 per lb. A very small portion of the polyethylene market is nucleated, which offers an attractive opportunity for a product such as DRAGONITE.

A very small portion of the 50 million tons of polyethylene produced annually is nucleated. A relatively modest penetration of this market would result in significant demand for DRAGONITE.

DRAGONITE can also nucleate polypropylene.

In addition to nucleating a polymer, DRAGONITE acts as an effective reinforcing filler as described below.

Reinforcement Fillers for Polymers. Many plastics are reinforced with a filler to meet the increasing performance requirements of advanced polymer applications. Plastics filled with some type of particulate or fibrous filler are classified as polymer composites. The primary purpose of reinforcement is to enhance the mechanical properties of a polymer. Reinforced plastics, in certain instances, can compete with stiffer materials like metal while also offering an opportunity to reduce the weight of a manufactured part ("light-weighting").

The utilization of DRAGONITE as a reinforcing filler results in the improvement of one or more mechanical properties of a polymer such as modulus (the measure of how well a polymer resist breaking when pulled apart), strength (the measure of the stress needed to break a polymer), and impact resistance (the measure of a polymer's resistance when impacted by a sharp and sudden stress).

DRAGONITE, at a 1% loading, creates the following effects on polyethylene: an increase in modulus of 20% - 25%; an increase in strength of up to 15%; and retention of impact resistance. DRAGONITE, at a 1% loading, creates the following effects on polypropylene: an increase in modulus of 20-25%; an increase in strength of up to 20%; and retention of impact resistance.

DRAGONITE, due to the improvements it imparts at such low loading rates, can offer a value proposition when compared to certain traditional fillers.

We estimate the value of the high performance filler market to be approximately \$17.2 billion.

Molecular Sieves and Catalysts. A molecular sieve is a material with very small holes of precise and uniform size. These holes are small enough to block large molecules while allowing small molecules to pass. Many molecular sieves are used as desiccants (substances that induce or sustain a state of dryness). Zeolites are a form of molecular sieve that are crystalline with a skeletal composed of aluminosilicates. DRAGONITE mixes very well with zeolites and helps entrap water and impurities both within the hollow tubular structure as well as the porous outer walls, enhancing the drying of natural gas and air, the separation of liquid from product streams, and the separation of impurities from a gas stream.

The global market for molecular sieves and other adsorbents is approximately \$2.9 billion.

Crude oil petroleum must be processed in order to make it into gasoline and other fuels. Part of that process includes cracking, whereby large hydrocarbons are broken into smaller ones. There are two general types of cracking, thermal and catalytic. Catalytic cracking involves the addition of a catalyst to speed up the cracking. The reactive nature of halloysite lends itself to be an effective catalyst especially for high sulfur oil. Halloysite can also be used as a support for catalysts, which are applied to the halloysite as a coating.

Halloysite from the Dragon Mine was mined and processed as a catalyst for petroleum cracking from 1949 to 1976.

Ceramics. A ceramic is any of various hard, brittle, heat-resistant and corrosion-resistant materials made by shaping and then firing a nonmetallic mineral, such as clay, at a high temperature. We intend to market our halloysite to two ceramic markets: whiteware and technical ceramics. Whiteware is a broad class of ceramic products that are white to off-white in appearance and frequently contain a significant vitreous, or glassy, component. Including products as diverse as fine china dinnerware, lavatory sinks and toilets, dental implants, and spark-plug insulators. Whitewares depend for their utility upon a relatively small set of properties: imperviousness to fluids, low conductivity of electricity, chemical inertness, and an ability to be formed into complex shapes. Examples of technical ceramics include ceramic disc brakes, missile nose cones, gas burner nozzles, and ballistic protection.

Table Of Contents

Binders. DRAGONITE is an effective binder for traditional ceramic products. Binders are substances that improve the mechanical strength of green ceramic bodies so they can pass through production steps, before firing, without breakage. In many cases, binder additions to ceramic bodies are essential. Without them some production processes would be impossible. DRAGONITE, when used as a binder, also effectuates an improvement in the casting rate of the ceramic manufacturing process. This equates to an increase in manufacturing efficiency.

Cosmetics. The halloysite in DRAGONITE has a tubular shape that may be suited for an array of cosmetic applications. The adsorptive nature of the halloysite found in DRAGONITE clay can serve as a hypoallergenic skin cleanser capable of removing unwanted toxins and oils from the skin without the need for harsh chemicals. DRAGONITE, due primarily to its presence of halloysite, is also capable of exfoliating the skin. DRAGONITE has been shown to be capable of functioning as a non-irritating carrier and release mechanism of cosmetic ingredients for a long lasting application.

In early 2015 the Company signed a term sheet to form a joint venture with a leading developer and retailer of cosmetic products. The joint venture will own and market a brand of cosmetic products utilizing the unique characteristics of DRAGONITE-PUREWHITE. A significant amount of work related to the development and branding of these products has occurred over the last 18 months. The Company will own a significant equity stake in the joint venture. The Company expects the joint venture agreement to be executed sometime in the latter half of 2015.

Controlled Release Carriers. The halloysite present in DRAGONITE clay can act as an effective carrier of active ingredients, enabling an agent to be released from the carrier over an extended time frame. This controlled release capability can be utilized in a wide array of applications including, but not limited to, anti-corrosive and anti-mold paint applications, agricultural applications, cosmetics, and certain pharmaceutical products, which would require the prevention of overdosing. In agriculture applications

DRAGONITE can provide a delivery system for often-toxic agricultural agents. Utilizing the inner lumen of the clay as a natural reservoir, DRAGONITE is able to load, store, and control the release of a range of agents, which, in turn, allows for a lower loading of substances, such as pesticides or herbicides, without sacrificing efficacy. DRAGONITE release rates can be controlled to match the duration of a growth or reproductive cycle, resulting in a reduction of the frequency of applications of an agent. DRAGONITE can be used to control the release of the following agents: pesticides, fertilizers, insecticides, fungicides, herbicides, nutrients, and growth stimulants.

According to BCC Research, the market for materials used as carriers for controlled release applications is approximately \$1.0 billion.

Environmental Remediation. DRAGONITE, due to its high selectivity of toxic compounds, high porosity, high surface area, fine particle size, fast adsorption rate and high absorption capacity, can act as a sorbent in environmental remediation and emissions capture. DRAGONITE can be utilized to facilitate the remediation of environments polluted with oil, PCB's, toluene, phenols, methylene blue, chromium-6, ammonium, heavy and alkali metals, and uranium. In a deepwater environment, DRAGONITE performs as an effective sieve to sequester pollutants released from a variety of sources such as oil spills, power plant and mine site run-off. DRAGONITE also works as a hydrocarbon remediation material through its ability to adsorb, de-emulsify and disperse micro-droplets of oil.

Sales Process for DRAGONITE

The Company sells its DRAGONITE products using employees, agents, and distributors, selling on a global basis.

The Company markets its DRAGONITE into two general types of application markets. The first type is a market in which DRAGONITE has not been previously used, or is to be used as a substitute for another additive, to enhance certain functionality of an application. This type of market requires a number of steps before a sale can be consummated. Like any new material that will be incorporated into a commercial manufacturing process, a significant amount of testing must be performed before DRAGONITE can be incorporated into both a manufacturing process and a product.

Table Of Contents

During this process we frequently must work collaboratively with the potential customer to appropriately orient its manufacturing process to successfully incorporate our material. The length of the sales process is difficult to predict given the number of variables involved. In some instances we're creating a distinctly new market for our product. However, once we successfully obtain a customer, we believe that customer relationship will extend for a number of years.

The second type of market is one in which halloysite clay is currently being used in traditional application markets. Within these established markets, we believe our DRAGONITE products offer an enhanced value proposition with respect to purity and other properties sought by customers. The pricing of our products relative to those of our competitors, however, will always be a significant factor in determining our ability to penetrate these markets.

Non-Halloysite Clays

The mineralized clay material in the surface piles and, except to the extent that the Company uses them in DRAGONITE, the mixed clays in the Dragon Pit and Western areas may be offered for sale for the typical uses of such clays. The Company has not attempted to sell any such clays for such uses.

IRON OXIDE-BASED PRODUCTS

AMIRON

The Company markets its AMIRON line of advanced natural iron oxide-based products to the pigmentary and technical application markets. The iron oxide resource at the Dragon Mine has a high content of Fe_2O_3 , is of exceptional chemical purity, possesses high surface area, fine grains, good dispersability, good tinting strength, enhanced color saturation, low color variation, and a low level of heavy metals content. For these reasons the Dragon Mine's iron oxide resource is considered an advanced natural and has applications in markets traditionally served by more expensive synthetic oxides.

For pigmentary applications the Company markets

For technical applications the Company markets:

AMIRON:OH
AMIRON:H

AMIRON:ST is an oxide-based product formulated as semi-transparent pigment to be used in applications such as artistic paint and as an interior and exterior wood stain. Demand for semi-transparent iron oxide pigments is currently constrained as they are traditionally difficult to stabilize and disperse and are very high in cost. AMIRON, in contrast, is a natural, cost-competitive solution that offers desirable dispersibility, color consistency, and UV protection. AMIRON also offers an opaque pigment product.

The global iron oxide pigment market is approximately 1.34 million tons (\$1.35 billion). Synthetic pigments account for 84.5% of the market with naturals accounting for the remaining 14.5%. Domestic consumption of iron oxide pigments in 2014 was 210,000 metric tons of which 170,000 were imported. The average price realized domestically was ~ \$1,454 per ton.

We currently market our AMIRON line of advanced natural iron oxide pigments to the construction, wood coatings, paints and industrial coatings, plastic and rubber markets. Traditionally, natural iron oxides, due to their variance in quality, have not been able to compete with synthetic in the pigment market. The consistency of purity (high level of Fe_2O_3) and other characteristics of our iron oxide resource qualify AMIRON as an advanced natural iron oxide, enabling it to compete with higher cost synthetic iron oxides.

Table Of Contents

AMIRON:HP is an iron oxide-based product manufactured for use in applications such as semi-transparent cosmetics, food contact colorants, and pharmaceutical applications. These industries maintain strict quality requirements, resulting in most suppliers being forced to utilize synthetic products. AMIRON:HP presents a natural alternative that complies with the cosmetics industry standards, such as FDA 21 CFR 73.2250 subpart C.

AMIRON:OH and **AMIRON:H** are iron oxide-based products manufactured for use in applications such as arsenic absorption from waste and drinking water and the desulfurization of gases and certain industrial by-products. The relatively large surface area and high reactivity make AMIRON:OH and AMIRON:H an effective adsorptive material for a number of environmental remediation applications.

AMIRON has been shown to be an effective catalyst for the removal of hydrogen sulfide from both natural gas and biogas. In a natural gas drilling operation, iron oxide is used to neutralize hydrogen sulfide before much of it can escape into the atmosphere. The anaerobic conversion of biomass (i.e. manure, municipal waste and agricultural waste) produces a biogas called methane, which is used as fuel. Hydrogen sulfide is a byproduct of the production of biogas and must be neutralized to prevent the corrosion of the reactor of a biogas facility. Demand for natural gas desulphurization catalysts will continue to grow in line with the growth in natural gas drilling. The biogas industry is centered in Europe where there are approximately 10,000 biogas plants. The estimated market in Europe for biogas desulphurization catalysts is approximately \$24 million (33,000 tons). The market in the United States, while smaller than that in Europe, continues to develop.

Sales Process for AMIRON

The Company sells its AMIRON products using employees, agents, and distributors, selling on global basis.

For the most part, we are marketing our AMIRON products into established markets. In some instances we believe AMIRON outperforms some competing natural iron oxide products or is a feasible replacement for a synthetic iron oxide product currently being used. We believe the pricing of our product will, in large part, be a significant factor in its adoption by customers. Currently, Lorama is marketing and distributing AMIRON on a non-exclusive basis to the paints and coatings industry. Lorama is recognized as the leading global supplier of paint emulsion technologies and products.

RESEARCH & DEVELOPMENT

The Company's research and developments efforts are focused on the continued creation of commercial applications for our halloysite-based products and our iron oxides.

Halloysite

The Company carries on significant research and development for halloysite applications internally.

We currently engage a well-regarded contract R&D firm to conduct product development activities involving the use of DRAGONITE in advanced polymer applications. This firm has a particular expertise in product development for plastics. At times, we use OPF Enterprises, LLC to conduct certain product development work focused on the traditional ceramic markets.

In 2009 we entered into a development agreement with Yuri M. Lvov, Ph.D., a professor of chemistry at Louisiana Tech University and the T.C. Pipes Eminent Endowed Chair on Micro and Nanosystems at the Institute for Micromanufacturing (Louisiana Tech University). The scope of the agreement includes, among other things, the development of the Dragon Mine halloysite as part of an anti-corrosion paint application in addition to the development of other emerging applications. Dr. Lvov is still consulting for the Company.

Iron Oxide

The Company carries on significant research and development for iron oxide applications internally.

Table Of Contents

Certain product development activities within the pigments and coatings application areas are also carried out in conjunction with Lorama.

Geological

In 2008, we engaged Ian Wilson, Ph.D. as our consulting geologist. Dr. Wilson has supervised our drilling program and has played a critical role in classifying the mineralization of the Dragon Mine property, which is essential to the successful commercialization of the mine's deposit. Dr. Wilson is a member of ion³ (Institute of Materials, Minerals and Mining of the UK). His Ph.D. was carried out on wall rock alteration and trace element dispersion patterns around gold and tin ore bodies in Ashanti Gold Mine, Ghana and Geevor Tin Mine, Cornwall, respectively. From 1974 to 2001 he worked with English China Clays/Imerys mainly as a geologist and with management roles in Brazil, Spain, Sweden and China. Since his retirement in 2001, he has worked as an independent consultant dealing with many industrial minerals including halloysite.

Technical and Other Markets. There is significant competition in the technical markets based on performance and price.

EXPENSES FOR RESOURCE DEVELOPMENT/EXPLORATION DRILLING AND TESTING & RESEARCH

In 2014, the Company spent \$3,768,034 for resource development and exploration drilling and \$858,105 for testing and research.

Table Of Contents

TRADEMARKS & PATENTS

We have trademarked the name DRAGONITE and AMIRON. We believe these trademarks are important to the successful marketing of our product offering. We do not believe that patents are material to the business. We filed a Provisional Application for Patent in October, 2010 related to the use of nucleating agents in polyethylene. As of December 31, 2014, we have been granted this patent in Great Britain, Denmark and France. A Patent is pending approval in the United States, Canada, China and Thailand.

REGULATION

The Utah Department of Natural Resources sets the guidelines for exploration and other mineral related activities based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules and Rules of Practice and Procedures, R647-1 through R647-5. We have received a large mine permit from the Department. The Company does not believe that such regulations, including environmental regulations, have or will adversely affect the Company's business or have a material impact on capital expenditures, earnings and competitive position of the Company.

We carry a Mine Safety and Health Administration (MSHA) license (#4202383) for the Dragon Mine and report as required to MSHA. The Company is subject to extensive regulation by the Mine Safety and Health Administration, which was created by the Mine Safety and Health Act of 1977. The regulations generally are designed to assure the health and safety of miners and our mine is periodically inspected by MSHA inspectors. While the inspectors have from time to time found violations, the violations have not been serious and have been quickly corrected. The Company does not believe that such regulations have or will adversely affect the Company's business or have a material impact on capital expenditures, earnings and competitive position of the Company.

The clays that the Company mines, including halloysite, may contain various levels of crystalline silica when mined. Crystalline silica is considered a hazardous substance under regulations promulgated by the U.S. Occupational Health and Safety Administration (OSHA) and U.S. Mine Health and Safety Administration (MSHA) and as a result is subject to permissible exposure limits (PELs), both in the mine and at the workplaces of our customers. The Company is required to provide Material Safety Data Sheets (MSDS) at the mine and accompanying sales of products to customers. The Company must also apply hazard warning to labels of containers of the product sold to customers. Kaolin and halloysite are also subject to PELs.

On September 12, 2013, the Occupational Safety and Health Administration (OSHA) released a proposed standard on respirable crystalline silica. The proposed rule would lower to the PEL to 50 micrograms per cubic meter of air

($\mu\text{g}/\text{m}^3$), which is 50% of the current PEL and consistent with the NIOSH PEL. The agency also proposed an action level of 25 $\mu\text{g}/\text{m}^3$. The Company cannot predict whether OSHA will adopt a rule and what, if any, adverse affect such rules may have on the Company's business.

The EPA has stated that it is developing a test rule under the Toxic Substances Control Act (TSCA) to require manufacturers (which would include the Company) of certain nanoscale materials including kaolin, halloysite, and alumina (which is present in the clays mined by the company) to conduct testing for health effects, ecological effects, and environmental fate, as well as provide material characterization data. The impact of such a rule on the Company cannot be determined at this time. It seems clear, however, that if the results of the testing of particular nanomaterials indicate adverse health, ecological, or environmental effects, the EPA may seek to regulate those nanomaterials more extensively. Such regulation could include, among other things, limiting the uses of the nanoscale materials; requiring the use of personal protective equipment, such as impervious gloves and NIOSH approved respirators, and limiting environmental releases. The EPA is developing a SNUR for nanoscale materials under TSCA.

Table Of Contents

EMPLOYEES

As of December 31, 2014, Applied Minerals, Inc. and its subsidiary had 41 employees. None of our employees were covered by a collective bargaining agreement, we have never experienced a work stoppage, and we consider our labor relations to be excellent.

OTHER PROPERTIES

We own approximately 900 acres of fee simple property and patented mining claims, and 260 acres of mineral rights and unpatented claims, including the Atlas Mine, located in the Coeur d'Alene mining district in Shoshone County, Idaho. Several attempts were made over time to commercialize the Atlas Mine as a producer of silver, lead and other minerals, but none of those efforts were successful. No attempts at mining have been undertaken since 1980. The Company continues to own the Atlas Mine property, but has no present intention to recommence mining efforts and has listed the property for sale. The cost basis of the property is \$495,000. The properties contain harvestable timber and are being marketed to potential buyers for recreational, mining, and/or timber uses.

ITEM 1A. RISK FACTORS

RISK FACTORS

AN INVESTMENT IN OUR SECURITIES IS VERY SPECULATIVE AND INVOLVES A HIGH DEGREE OF RISK. YOU SHOULD CAREFULLY CONSIDER THE FOLLOWING RISK FACTORS, ALONG WITH THE OTHER MATTERS REFERRED TO IN THIS ANNUAL REPORT, BEFORE YOU DECIDE TO BUY OUR SECURITIES. IF YOU DECIDE TO BUY OUR SECURITIES, YOU SHOULD BE ABLE TO AFFORD A COMPLETE LOSS OF YOUR INVESTMENT.

Our business activities are subject to significant risks, including those described below. Every investor or potential investor in our securities should carefully consider these risks. If any of the described risks actually occurs, our business, financial position and results of operations could be materially and adversely affected. Such risks are not the only ones we face and additional risks and uncertainties not presently known to us or that we currently deem immaterial may also affect our business.

SPECIFIC RISKS APPLICABLE TO APPLIED MINERALS

FINANCIAL HISTORY

Losses. We have experienced annual operating losses since our reactivation in September 1997. For the years ended December 31, 2014 and 2013, the Company sustained losses from continuing operations of \$10,316,317 and \$13,063,526, respectively.

Accumulates Deficits. At December 31, 2014 and 2013, the Company had accumulated deficits of \$72,138,289 and \$61,821,972, respectively, in addition to limited cash and unprofitable operations.

NO SIGNIFICANT SALES.

From January 1, 2009 when current management took over until December 31, 2014, the Company sold \$547,740 of clay and iron oxide, and in 2014 the Company had sales of \$234,221.

Table Of Contents

RELIANCE OF EQUITY AND DEBT SALES TO FINANCE OPERATIONS; DILUTION

The Company has had to rely mainly on the proceeds of from the sale of stock and convertible debt to fund its operations. There is no assurance that the Company will be able to raise capital in the future. If the Company is unable to raise capital or fund its operations through the commercialization of its minerals at the Dragon Mine, it may have to file bankruptcy. If the Company is able to raise capital, the terms of such capital raise may be significantly dilutive to existing stockholders.

SURVIVAL IS DEPENDENT ON PENETRATING MARKETS

Obviously, in order for the Company to survive, we must penetrate our target markets and achieve sales levels, and generate sufficient cash flow, to break even and to be a success we must do better than that. As outlined below, there is uncertainty that we will be able to do so.

Many of the applications for which we are selling for our halloysite-based material are applications for which halloysite has not been used previously. As a result, there are a number of special obstacles that we need to overcome to achieve sales in these markets. It maybe necessary to convince manufacturers to change their manufacturing processes and substitute our halloysite-based material for the product they are currently using, and in some cases, to use our halloysite-based material where no product was used before. The process beginning with introducing our halloysite-based material to manufacturers and ending with the manufacturers using our products in their production (i) can encounter inertia, skepticism, and different corporate priorities, (ii) requires educating potential customers on the benefits of our material and how to use our material (how much to add, when to add, and so forth), and (iii) often requires working with potential customers to assure that the potential customers test the materials under proper conditions. In summary, while we believe that our halloysite-based material often adds significant value, we can say two things about the process that ends with manufacturers using our halloysite-based material: it can take a long time and there is no certainty that we will be able to convince enough manufacturers to use our halloysite-base material.

Similarly, we are trying to sell our iron oxides, which are natural, into markets where synthetic iron oxides have been used in the past. In trying to make such sales, we encounter the some of the same types of problems described in the preceding paragraph

Other applications for which we are selling for our halloysite-based material and our iron oxides are applications for which halloysite or natural iron oxides has been used previously. To penetrate these markets, we face the difficulties encountered by any company trying to enter an established market competing against established players that may be in better financial condition that we are and are already familiar to, and in many cases have relationships with, the

potential customers, which may make such competitors more attractive than us. While we believe that in many cases, our products are superior to those already in the market, there is uncertainty that we will be able to penetrate those markets to a sufficient degree.

COMPETITION

Competition from Other Miners of Halloysite

Currently we know of no companies competing with us in any significant respect in connection with the sale of halloysite-based products in our advanced applications target markets. For our DRAGONITE to penetrate advanced application target markets, we face significant competition from non-halloysite solutions often sold by larger, more established companies. The basis for competition is performance and price. If we are successful in penetrating our advanced applications target markets, we may face competition from operators of halloysite clay deposits in other locations around the world.

We do face limited direct competition in the connection with the sale of halloysite-based products in traditional markets. Depending on the location of the customer (principally customers located in Asia and South America), we may face competition from the commercial mine in New Zealand and if we are successful in penetrating the traditional markets, we may face competition from operators of halloysite clay deposits in other locations around the world. For our DRAGONITE to penetrate traditional markets, we face significant competition from non-halloysite solutions often sold by larger, more established companies. The basis for competition is performance and price.

We believe that our Dragon Mine property is one of only two large-sized halloysite deposits in the world. There are a number of other smaller deposits of halloysite in the U.S. and other parts of the world, some of which produce halloysite commercially.

The degree or extent to which the halloysite other deposits can or will compete with our halloysite-based products is subject to a variety of factors, including the following:

Deposits of halloysite are formed under a variety of geological conditions of hydrothermal alteration and weathering. As a result, the nature and extent of impurities, the length of the tube, thickness of the walls, and the size of the pore or lumen can all vary. In many deposits, the halloysite is mixed with other clays, limiting its usefulness for certain applications. Other deposits contain significant amounts of crystalline silica, which may limit the usefulness for certain applications and/or require additional processing. Other deposits contain more iron oxide than is acceptable, requiring additional processing.

Some deposits are subject to difficulties relating to mining. Some deposits are located in geographically-isolated areas and some deposits can only be mined by hand-picking.

Nevertheless, there are many other deposits of halloysite around the world and in the U.S, including one adjacent to the Dragon Mine property that is of questionable quality (the halloysite, apparently mixed with impurities, is being sold as an ingredient in cement at a very low price) . There is a commercial halloysite mine in New Zealand. There are other small production mining operations in China and Turkey. There are other small mines known to us. Whether halloysite from any of these deposits will compete with our advanced halloysite-based products, or the extent to which they can compete, is not clear. While, based on what is known to the Company at this point, the Company does not believe that competition from the other halloysite mines known to us will significantly adversely affect sales or margins in advanced applications, such competition could arise and could adversely affect sales and margins.

Iron Oxide

We expect to compete with companies that, in some cases, may be larger and better capitalized than us.

Pigments. There is significant competition within the iron oxide pigment market. We will try to compete directly with synthetic iron oxide pigments in the coatings markets by selling our pigments at a lower price. In other iron oxide pigment markets, there is very little product differentiation with competition focused primarily on price.

Table Of Contents

THE COMPANY'S SUCCESS DEPENDS ON OUR CEO

Andre Zeitoun is the President and CEO of the Company. Mr. Zeitoun has played a critical role in leading the effort to commercialize our halloysite-based products and iron oxides. If the Company loses the service of Mr. Zeitoun, there is no assurance that the Company would be able to attract and retain a qualified replacement.

MORE GENERALIZED RISKS

UNCERTAINTIES

The actual Dragon Mine profitability or economic feasibility may be adversely affected by any of the following factors, among others:

- Changes in tonnage, grades and characteristics of mineralization to be mined and processed;
- Higher input and labor costs;
- The quality of the data on which engineering assumptions were made;
- Adverse geotechnical conditions;
- Availability of adequate and skilled labor force and supply and cost of water and power;
- Availability and terms of financing;
- Environmental or other government laws and regulations related to the Dragon Mine;
- Changes in tax laws;
- Weather or severe climate impacts;
- Potential delays relating to social and community issues;
- Industrial accidents, including in connection with the operation of mining transportation equipment and accidents associated with the preparation and ignition of blasting operations, milling equipment and conveyor systems;
- Underground fires or floods;
- Unexpected geological formations or conditions (whether in mineral or gaseous form);
- Ground and water conditions;
- Accidents in underground operations;
- Failure of mining pit slopes;
- Seismic activity; and
- Other natural phenomena, such as lightning, cyclonic or tropical storms, floods or other inclement weather conditions.

THERE IS COMPREHENSIVE FEDERAL, STATE AND LOCAL REGULATION OF THE EXPLORATION INDUSTRY THAT COULD HAVE A NEGATIVE IMPACT OUR MINING OPERATIONS.

Exploration and mining operations are subject to federal, state and local laws relating to the protection of the environment, including laws regulating removal of natural resources from the ground and the discharge of materials into the environment. Exploration and mining operations and some of the products we sell are also subject to federal, state and local laws and regulations that seek to maintain health and safety standards. No assurance can be given that environmental standards imposed by federal, state or local authorities will not be changed or that any such changes would not have material adverse effects on our activities. Moreover, compliance with such laws may cause substantial delays or require capital outlays in excess of those anticipated, thus causing an adverse effect on our financial position. Additionally, we may be subject to liability for pollution or other environmental damages that we may elect not to insure against due to prohibitive premium costs and other reasons.

ITEM 2. PROPERTIES

PRINCIPAL OFFICE

The corporate office is located at 110 Greene Street, Suite 1101, New York, N.Y., 10012.

MINING PROPERTIES

The following section describes our right, title, or claim to our properties and each property's location. This section also discusses our present plans for exploration of the properties.

JUAB COUNTY, UTAH

Dragon Mine

The Dragon Mine property, located in Juab County, Utah near the City of Eureka (Tintic Mining District), has been principally exploited for halloysite clay and iron oxide. It is located approximately 2 miles southwest of Eureka, Utah and can be accessed via state highway and county road. The Union Pacific Railroad has a spur approximately 2 miles from the property. Electrical power is located approximately 1.5 miles from the site and there was no evidence of a water source on the property except in the mine shaft.

The property consists of 38 patented mining claims, approximately 230 acres, located in the following sections: T10S, R2W, sections 29, 30, 31, and T10S, R3W, Section 36, all relative to the Salt Lake Meridian. We leased the property

in 2001 and on August 18, 2005, we purchased the property for approximately \$500,000 in cash. As more fully explained in the “Business” section, the property has two mining areas, the Dragon Pit, which is mined for High Purity Halloysite, Dragon Mixed Clays and iron oxide and the Western Area, which is mined for Western Area Mixed Clays and iron oxides. On the property, there are also five large waste piles containing significant amounts of clay.

The property is located in the Tintic District of Utah, covering approximately 230 acres with a large mining permit covering 40 acres allowing for the extraction of minerals. The property consists of 38 patented and six unpatented mining claims located in the following sections: T10S, R2W, sections 29, 30, 31, and T10S, R3W, Section 36, all relative to the Salt Lake Base Meridian. The Company pays approximately \$800 in annual maintenance fees to the U.S. Department of Interior Bureau of Land Management to maintain rights to its unpatented claims. The BLM Claim Numbers are: UMC385543, UMC 385544, UMC394659, UMC394660, UMC408539, and UMC408540. The Company has no underlying royalty agreements with any third-party with respect to the Dragon Mine.

The Company has two dry-process facilities at its Dragon Mine property. One facility, dedicated primarily to the iron oxide resource and occasionally used to process halloysite, has a capacity of up to 45,000 ton per year for certain types of processing and includes a Hosokawa Alpine mill. The other facility, dedicated to the halloysite clay resource. The facility dedicated to the halloysite clay resources has an annual capacity of up to 10,000 tons for certain types of processing.

We believe the physical plant and equipment utilized at the Dragon Mine are in satisfactory condition to continue our current mining activity. The Company continually reviews the adequacy of its physical plant and equipment inventory and expects to invest accordingly to ensure that the size and quality of its physical plant and equipment can meet its needs. Currently, our physical plant includes, but is not limited to, two processing mills, a dry house, a site office, a general storage facility, an equipment repair facility, and a structure housing three IR compressors, which are used to power the mill and certain drilling equipment used underground. Our mining equipment includes, but is not limited to, a road header, an underground drill, a deep drill, a Scooptrans, a skid steer, a front-end loader and a number of other pieces traditionally used to mine underground. There are some pieces of equipment we choose to rent on a daily basis rather than own or lease to own. The Company uses diesel fuel as its primary source of power and has water transported to the property from an external source. The property has sufficient access to roads to enable the transportation of materials and products.

As of the filing of this report, the Company was classified as an exploration stage company for purposes of Industry Guide 7 of the U.S. Securities and Exchange Commission. The Company believes that once it generates a material level of revenue from the sale of either its DRAGONITE or AMIRON products it will be able to take the steps necessary to move out of the exploration stage with respect Industry Guide 7.

Under Industry Guide 7, companies engaged in significant mining operations are classified into three categories, referred to as “stages”- exploration, development, and production. Exploration stage includes all companies engaged in the search for mineral deposits (reserves). In order to be classified as a development or production stage company, a company must have already established reserves. Unless a company has established reserves, it cannot be classified as a development or production stage company, notwithstanding the nature and extent of development-type or

production- type activities that have been undertaken or completed.

Under Industry Guide 7, a “reserve” is “that part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination.” Generally speaking, a company may not declare reserves, unless, among other requirements, competent professional engineers conduct a detailed engineering and economic study and prepare a “bankable” or “final” feasibility study that “demonstrates that a mineral deposit can be mined profitably at a commercial rate.”

The Company commissioned a study of “resources” under the JORC Code of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves. That study indicated the existence of JORC “resources” of halloysite clay and iron oxide. A JORC resource is defined as a “mineral deposit in such form, grade and quantity that there are reasonable prospects for eventual economic extraction,” a lower standard than that used for a final feasibility study.

Significant additional steps, including the demonstration that the Company has and can penetrate markets, will be necessary before a “bankable” or “final” feasibility study can be prepared for the Company.

Table Of Contents

Despite the fact that the Company has not established reserves, the Company has mined, processed and sold, and intends to continue to mine, process, and sell, halloysite clay and iron oxide from the Dragon Mine.

For purposes of Industry Guide 7, a consequence of the absence of reserves is that the mining company, such as the Company, is deemed to lack an objective basis to assert that it has a deposit with mineralization that can be economically and legally extracted or produced and sold to produce revenue.

Shoshone County, ID

We own approximately 900 acres of fee simple property and patented mining claims, and 260 acres of mineral rights and unpatented claims, including the Atlas Mine, located in the Coeur d'Alene mining district in Shoshone County, Idaho, commonly referred to as the Silver Valley of North Idaho. On February 18, 2014, the Company listed the property for sale. The Company permanently discontinued its contract mining operations at the Atlas Mine as of December 31, 2008.

ITEM 3. LEGAL PROCEEDINGS

The Company was named as the defendant in a lawsuit filed on April 18, 2014 in state district court in Salt Lake City, Utah. The plaintiff is Tekko Enterprises, Inc., which was hired in 2012 as project manager for the construction of a processing plant at the Company's Dragon Mine property and terminated in 2013 before the completion of the plant. The complaint seeks damages of \$346,000, unpaid amounts that the plaintiff claims it is entitled to under the project management agreement and two purchase orders. The Company intends to vigorously defend against the claims and to counterclaim.

In addition to the matter described above, we may become involved in or subject to, routine litigation, claims, disputes, proceedings and investigations in the ordinary course of business, could have a material adverse effect on our financial condition, cash flows or results of operations.

ITEM 4. MINE SAFETY DISCLOSURES

Edgar Filing: Applied Minerals, Inc. - Form 10-K

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and this Item is included in exhibit 95 to this 10-K.

Table Of Contents**PART II****ITEM MARKET PRICE FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDERS
5. MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**Market Prices for Our Common Stock

Our common stock is quoted on the OTCBB under the symbol "AMNL." The following quotations reflect inter-dealer prices, without retail mark-up, mark-down, or commission, and may not represent actual transactions.

	<i>Year 2014</i>		<i>Year 2013</i>	
	High	Low	High	Low
First Quarter	\$1.09	\$0.69	\$1.72	\$1.40
Second Quarter	\$0.85	\$0.60	\$1.47	\$1.11
Third Quarter	\$0.86	\$0.67	\$1.19	\$0.98

Record Holders

As of December 31, 2014, there were approximately 929 holders of record of our common stock. This number does not include an indeterminate number of shareholders whose shares are held by brokers in street name.

Dividends

Since we became a reporting company in 2002, we have never declared or paid any cash dividend on our common stock. We have no current plans to declare dividends and we are subject to any restrictions or limitations under note agreement relating to the declaration or payment of dividends.

Equity Compensation Plans

On November 20, 2012, the shareholders of the Company approved the adoption of the Applied Minerals, Inc. 2012 Long-Term Incentive Plan ("LTIP") and the Short-Term Incentive Plan (STIP) and the performance criteria used in setting performance goals for awards intended to be performance-based under Code Section 162(m). Under the LTIP, 8,900,000 shares are authorized for issuance. The STIP does not refer to a particular number of shares, but would use the shares authorized in the LTIP for issuance under the STIP. The CEO, the CFO, named executive officers, and

directors, among others, are eligible to participate in the LTIP and STIP. Prior to the adoption of the LTIP and STIP, stock options were granted under individual arrangements between the Company and the grantees, and approved by the Board of Directors.

Table Of Contents

**ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
7. OF OPERATIONS**

OVERVIEW

Applied Minerals, Inc. is a leading global producer of DRAGONITE halloysite clay and AMIRON advanced natural iron oxides. We are a vertically integrated operation focused on developing grades of DRAGONITE and AMIRON that can be utilized for both traditional and advanced end-market applications. We have mineral production capacity of up to 55,000 tons per year. See "ITEM 1. BUSINESS" for further details regarding both our business strategy and our recent developments.

CRITICAL ACCOUNTING POLICIES

The following accounting policies have been identified by management as policies critical to the Company's financial reporting:

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. In these consolidated financial statements, the derivative liability, stock compensation, impairment of long-lived assets and valuation allowance on income taxes involve extensive reliance on management's estimates. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all highly-liquid investments with a maturity of three months or less at the date of purchase. The Company minimizes its credit risk by investing its cash and cash equivalents, which sometimes exceeds FDIC limits, with major financial institutions located in the United States with a high credit rating. The Company's management believes that no concentration of credit risk exists with respect to the investment of its cash and cash equivalents.

Property and Equipment

Property and equipment are carried at cost. Depreciation and amortization is computed on the straight-line method over the estimated useful lives of the assets, or the life of the lease, whichever is shorter, as follows:

	Estimated Useful Life *
Building and Building Improvements	5 – 40 years
Mining equipment	2 – 7 years
Office and shop furniture and equipment	3 – 7 years
Vehicles	5 years

* See Note 4 of the Company's financial statements for explanation of change in useful life in 2014.

Fair Value

ASC Topic 820, *Fair Value Measurement and Disclosures*, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This topic also establishes a fair value hierarchy, which requires classification based on observable and unobservable inputs when measuring fair value. The fair value hierarchy distinguishes between assumptions based on market data (observable inputs) and an entity's own assumptions (unobservable inputs). The hierarchy consists of three levels:

Level 1 – quoted prices in active markets for identical assets and liabilities

Level 2 – observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3 –significant unobservable inputs

The recorded value of certain financial assets and liabilities, which consist primarily of cash and cash equivalents, accounts receivable, other current assets, and accounts payable and accrued expenses approximate the fair value at December 31, 2014 and 2013 based upon the short-term nature of the assets and liabilities. Based on borrowing rates currently available to the Company for loans with similar terms, and the remaining short term period outstanding, the carrying value of notes payable materially approximate fair value. For the Company's warrant and PIK note derivative liabilities fair value was estimated using a Monte Carlo Model.

Revenue Recognition

Revenue includes sales for halloysite and iron oxide and is recognized when title passes to the buyer and when collectability is reasonably assured. Title passes to the buyer based on terms of the sales contract. Product pricing is determined based on contractual arrangements with the Company's customers.

Mining Exploration and Development Costs

Land and mining property are carried at cost. The Company expenses prospecting and mining exploration costs. At the point when a property is determined to have proven and probable reserves, subsequent development costs are capitalized. When these properties are developed and operations commence, capitalized development costs will be charged to operations using the units-of-production method over proven and probable reserves. Upon abandonment or sale of a mineral property, all capitalized costs relating to the specific property are written off in the period abandoned or sold and a gain or loss is recognized.

Through December 31, 2014 all costs associated with prospecting and exploration of the Company's mines have been deemed to have indeterminable recoverability and therefore have been expensed.

Table Of Contents

Impairment of Long-Lived Assets

Long-lived assets are tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. When such events occur, the Company compares the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset to its carrying amount. If this comparison indicates that there is impairment, the amount of the impairment is typically calculated using discounted expected future cash flows where observable fair values are not readily determinable.

Provision for Income Taxes

We use the asset and liability method of accounting for income taxes. Deferred income taxes are provided for the temporary difference between the financial reporting basis and tax basis of our assets and liabilities. Deferred tax benefits result principally from certain tax carryover benefits and from recording certain expenses in the financial statements that are not currently deductible for tax purposes and from differences between the tax and book basis of assets and deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax liabilities result principally from deductions recorded for tax purposes in excess of that recorded in the financial statements or income for financial statement purposes in excess of the amount for tax purposes. The effect of changes in tax rates is recognized in the period the rate change is enacted.

Stock Options and Warrants

The Company follows ASC 718 (Stock Compensation) and 505-50 (Equity-Based Payments to Non-employees), which provide guidance in accounting for share-based awards exchanged for services rendered and requires companies to expense the estimated fair value of these awards over the requisite service period. The Company instituted a formal long-term and short-term incentive plan on November 20, 2012, which was approved by its shareholders. Prior to that date, we did not have a formal equity plan, but all equity grants, including stock options and warrants, were approved by our Board of Directors. We determine the fair value of the stock-based compensation awards granted as either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. If the fair value of the equity instruments issued is used, it is measured using the stock price and other measurement assumptions as of the earlier of either of (1) the date at which a commitment for performance by the counterparty to earn the equity instruments is reached, or (2) the date at which the counterparty's performance is complete. During the quarter ended June 30, 2013 the Company employed the simplified method to determine the expected term for any options granted because the Company did not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term. The Company previously utilized the contractual term as the expected term.

RECENT ACCOUNTING PRONOUNCEMENTS

In August 2014, the FASB issued Accounting Standards Update ("ASU") No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern" ("ASU 2014-15"). ASU 2014-15 is intended to define management's responsibility to evaluate

whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. Specifically, ASU 2014-15 provides a definition of the term substantial doubt and requires an assessment for a period of one year after the date that the financial statements are issued. It also requires certain disclosures when substantial doubt is alleviated as a result of consideration of management's plans and requires an express statement and other disclosures when substantial doubt is not alleviated. The new standard will be effective for reporting periods beginning after December 15, 2016, with early adoption permitted. Management is currently evaluating the impact of the adoption of ASU 2014-14 on our financial statement disclosures.

On June 2014, the FASB issued ASU No. 2014-12, *Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*, which clarifies that entities should treat performance targets that can be met after the requisite service period of a share-based payment award as performance conditions that affect vesting. Under the ASU, an entity would not record compensation expense related to an award for which transfer to the employee is contingent on the entity's satisfaction of a performance target until it becomes probable that the performance target will be met. The adoption of this ASU will be required, either on a retrospective basis or prospective basis, beginning with our Quarterly Report on Form 10-Q for the quarter ending March 31, 2016. The adoption of this ASU is not expected to have a material impact on our consolidated financial statements.

In June 2014, the FASB issued Accounting Standards Update (“ASU”) ASU 2014-10 *Development Stage Entities*. The amendments in ASU 2014-10 remove the definition of a development stage entity from Topic 915 *Development Stage Entities*, thereby removing the distinction between development stage entities and other reporting entities from US GAAP. In addition, the amendments eliminate the requirements for development stage entities to (1) present inception-to-date information in the statements of operations, cash flows, and shareholder's equity, (2) label the financial statements as those of a development stage entity, (3) disclose a description of the development stage activities in which the entity is engaged, and (4) disclose in the first year in which the entity is no longer a development stage entity that in prior years it had been in the development stage. The amendments also clarify that the guidance in Topic 275, *Risks and Uncertainties*, is applicable to entities that have not commenced planned principal operations. ASU 2014-10 is effective for annual reporting periods beginning after December 15, 2014, and interim periods therein. The Company could early adopt ASU 2014-10 for any annual reporting period or interim period for which the entity's financial statements have not yet been issued. The Company has elected to adopt this ASU effective with the Quarterly Report on Form 10-Q for the quarter ended June 30, 2014 and its adoption resulted in the removal of inception-to-date information in the Company's statements of operations and cash flows.

In May 2014, the FASB issued ASU 2014-09 *Revenue from Contracts with Customers*. The amendments in ASU 2014-09 affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (e.g., insurance contracts or lease contracts). This ASU will supersede the revenue recognition requirements in Topic 605 *Revenue Recognition*, and most industry-specific guidance, and creates a Topic 606 *Revenue from Contracts with Customers*.

The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps:

Step 1: Identify the contract(s) with a customer.

Step 2: Identify the performance obligations in the contract.

Step 3: Determine the transaction price.

Step 4: Allocate the transaction price to the performance obligations in the contract.

Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The Company is currently evaluating these new requirements to determine the method of implementation and any resulting estimated effects on the financial statements.

Table Of Contents**Results of Operations- 2014 Compared to 2013**

The following sets forth, for the periods indicated, certain components of our operating earnings, including such data stated as percentage of revenues:

	Twelve Months Ended December 31,				Variance	
	2014	% of Rev.	2013	% of Rev.	Amount	%

Gain on revaluation of stock awards	110,000	47 %	44,000	80 %	66,000	150 %
Gain (Loss) on revaluation of PIK Notes	1,470,798	628 %	(195,000)	(356 %)	1,665,798	854 %
Other (expense)	(258,252)	(110 %)	(6,789)	(12 %)	(251,463)	3,704%
Total Other Income (Expense)	485,261	207 %	340,024	620 %	145,237	43 %
Net Loss	\$ (10,316,317)	(4405%)	\$ (13,063,526)	(23828%)	\$2,747,209	(21%)

* Includes \$865,716 and \$4,707,381 of noncash stock compensation expense for 2014 and 2013, respectively, relating to employee and consultant stock options.

Revenue generated during 2014 was \$234,221, compared to \$54,825 of revenue generated during the same period in 2013. Sales of halloysite clay increased to existing and new customers for various uses, including as a nucleating agent, a binder for ceramic-based sanitary ware, and a binder for clay-based molecular sieves. The increase in iron oxide sales stems mainly from usage as a hydrogen sulfide scavenger. We believe that a number of potential customers are at various stages of the commercialization process and there are positive indications (but no assurances) that such potential customers may commercialize the use of our halloysite or iron oxide.

Total operating expenses for 2014 were \$11,035,799 compared to \$13,458,375 of expenses incurred during the same period in 2013, a decrease of \$2,422,576 or 18%. The decrease was due primarily to a \$3,373,583, or 39%, decrease in general and administrative expenses due primarily from lower stock compensation expense incurred from the vesting of stock options, partially offset by increases in exploration costs and depreciation expense from the new mill plant, which was commissioned in 2014.

Exploration costs incurred during 2014 were \$4,626,139 compared to \$4,551,666 of costs incurred during the same period in 2013, an increase of \$74,473 or 2%. The majority of our exploration expenses were related to the continued exploration activities at our Dragon Mine property and the mineralogical analysis of the material mined from the property. The Company hired new mining personnel in 2014 to facilitate the sorting and processing of our minerals, leading to increased personnel costs, including health benefits and workers compensation. The new mill plant constructed also increased utilities, maintenance, insurance and property taxes. These increases were offset by reduced laboratory testing expenses as the Company utilized the newly constructed laboratory and the absence of exploratory drilling cost.

General and administrative expenses for 2014 totaled \$5,195,830 compared to \$8,569,413 of expense incurred during the same period in 2013, a decrease of \$3,373,583 or 39%. The reduction was driven primarily by a \$3,841,665 decrease in noncash stock compensation expense due primarily to the absence of expense associated with the vesting of certain management options, partially offset by expenses associated with the hiring of additional personnel in late 2013, including the head of our iron oxide business, increased shareholder expenses relating to additional meetings held during 2014 to increase awareness of the company stock, increased travel-related expenditures, and increased expenses related to the election of two additional directors.

Net Loss for 2014 was \$10,316,317 compared to a loss of \$13,063,526 incurred during 2013, a decrease of \$2,747,209 or 21%. The reduction in the Net Loss was mainly due to reduced stock compensation expense, as described above, and an increase in Other Income, mainly due to a reduction in the derivative liability during 2014.

Table Of Contents**Results of Operations- 2013 compared to 2012**

The following sets forth, for the periods indicated, certain components of our operating earnings, including such data stated as percentage of revenues:

	Twelve Months Ended December 31,				Variance

Net Loss	\$(13,063,526)	(23828%)	\$(9,732,399)	(5872%)	\$(3,331,127)	34 %

Revenue for 2013 was \$54,825, compared to \$165,742 generated during the same period in 2012. The Company originated and increased sales of its Dragonite™ product to select customers for use as a reinforcing additive for certain plastic applications in the past year. We are in various stages of product development, ongoing trials and building our stockpile levels. In 2012, we were approved as vendors for approximately 23 potential customers, which we believe can materialize into future business.

Total operating expenses for 2013 were \$13,458,375 compared to \$10,478,162 of expenses incurred during 2012, an increase of \$2,980,213 or 28%. The increase was due primarily to a \$867,960, or 32%, increase in exploration costs, and a \$2,284,184, or 54%, increase in general and administrative expense.

Exploration costs incurred during 2013 were \$4,551,666 compared to \$3,542,977 of costs incurred during the same period in 2012, an increase of \$1,008,689 or 28%. The majority of our exploration costs during the respective periods were related to the continued exploration activities at our Dragon Mine property and the mineralogical analysis of the material mined from the property. The increase in exploration costs was related, primarily, to management's decision to further expand its drilling and testing program, both for clay and iron ore, to additional areas of the Dragon Mine property, the testing of which has indicated the presence of clay mineral and an iron ore deposit. The additional mining activity was also performed to prepare for potential client visits and to break ground on a more innovative and efficient mining facility with more cutting-edge technology. The Company has invested in its minesite as it continues its commercialization and research efforts. See Property, Plant and Equipment schedule in the Liquidity and Capital Resources section below for further details. The primary drivers of the increase in exploration costs included a \$332,712, or 46%, increase in employee wages primarily due to an increase in the number of miners from 15 to 20 and additional overtime required for the additional mining activity described above; the incurrence of \$153,227 of employee health insurance expense not incurred during the same period in 2011 as the health insurance plan was not previously offered; a \$146,097, or 41% increase in geologist consulting and sample testing activity; a \$99,052, or 97%, increase in materials and supplies due to the increase in drilling and development activity at the mine; and a \$159,660, or 270%, increase in equipment rentals utilized for the new facility.

General and administrative expenses incurred during 2013 totaled \$8,569,413 compared to \$6,541,043 of expense incurred during the same period in 2012, an increase of \$2,028,370 or 31%. The increase was driven primarily by performance bonus payments to key management totaling \$1,150,000; a \$111,705, or 5% increase, in expense related to the issuance of options to certain employees; a \$267,395, or 89%, increase in wage expense due to the addition of a Chief Technology Officer, General Counsel and Chief Financial Officer; a \$112,853 increase in travel and related expense due primarily to a change in the terms of the Management Agreement with Material Advisors, LLC- prior to 2012, under the Management Agreement, Material Advisors was required to pay all travel, entertainment, office and marketing expenses and all other ordinary and necessary business expenses incurred by the Material Advisors and the Management Personnel in connection with the performance of the Management Agreement ("Expenses"); the incurrence of \$132,533 of additional rent expense related to the lease of the corporate office; a \$111,942 increase in legal, audit and accounting service fees; and a \$322,828 increase in consulting partially relating to financial and investment banking services.

Other Income decreased by \$239,997, or 41%. About \$500,000 of this variance was due to additional interest expense recorded in 2011 due to an increase in the average balance of our PIK Notes, which we converted into common stock in October 2011. In addition, the Company also recorded an additional \$405,000 gain on the revaluation of our warrant derivative liability in 2012 when compared to 2011.

Table Of Contents

Net loss for 2013 was \$13,063,526 compared to a loss of \$9,732,399 incurred during 2012, an increase of \$3,331,127 or 34%.

Table Of Contents

LIQUIDITY AND CAPITAL RESOURCES

The Company has incurred material recurring losses from operations while in the process of developing and commercializing halloysite clay and iron oxide. At December 31, 2014, we had a total accumulated deficit of \$72,138,289. For the year ended December 31, 2014 and 2013, we sustained losses from continuing operations of \$10,316,317 and \$13,063,526, respectively. From December 2008 through December 2014, our activities have been financed primarily through the sale of convertible debt and equity securities. During the first quarter of 2013, the Company raised \$5,560,000 of cash proceeds through the sale of common stock, and in August 2013, the Company raised \$10,500,000 of financing through the private placement of 10% Mandatorily Convertible PIK Notes due 2023. In November 2014, the Company raised \$12,500,000 of financing through the private placement of 10% Mandatorily Convertible PIK Notes due 2018, but containing various terms that may effectively reduce or increase the maturity. We believe that we have sufficient resources to fund operations for the next 12 months and are continuing to evaluate our strategic direction aimed at achieving profitability and positive cash flow.

Cash used in operating activities in 2014 was \$8,003,851 compared to \$8,205,101 of cash used during the same period in 2013. The key difference is in the timing of certain payments made over both periods.

Cash used in investing activities during 2014 was \$2,039,562 compared to a use of \$2,046,358 during the same period in 2013. The costs during both periods mainly relate to the construction of the new mill.

Cash provided by financing activities during 2014 was \$12,059,527 compared to \$15,580,908 of cash generated during the same period in 2013. The following capital raises occurred over the last two years:

January 2013- Sale of 3,756,757 shares of its common stock at \$1.48 per share for gross proceeds of \$5,560,000.

August 2013- the Company announced that it successfully raised an additional \$10,500,000 of financing through the private placement of 10% Mandatorily Convertible PIK Notes due 2023. The Series 2023 Notes have a strike price of \$1.40 per share and convert into 7,500,000 shares of the common stock of Applied Minerals, Inc.

November 2014- the Company raised \$12,500,000 of financing through the private placement of \$19,848,486 10% Series A Convertible Notes due 2018 with a strike price of \$0.92. The Series A Notes are mandatorily convertible by the Company after the second anniversary of their issuance, if certain conditions are satisfied. Additionally, under certain conditions, the Company has an option to extend the maturity date of the Notes.

No broker was used and no commission was paid for any of the foregoing transactions.

Our total assets as of December 31, 2014 were \$18,457,702 compared to \$15,215,287 as of December 31, 2013, or an increase of \$3,242,415. As described above, the Company raised \$12.5 million in financing in November 2014 and plans to utilize this cash in operational investments into the corporate infrastructure. The Company also utilized part of its proceeds from the August 2013 capital raise to fund its new mill plant. Total liabilities were \$25,974,467 at December 31, 2014 compared to \$13,728,720 at December 31, 2013. The increase is mainly due to the establishment of a new PIK Note liability and related derivative resulting from the issuance of PIK Notes in November 2014 (See next section- Issuance of Convertible Debt).

ISSUANCE OF CONVERTIBLE DEBT

The Company raised \$23 million of financing through the issuance of two series of Paid-In-Kind (“PIK”)-Election Convertible Notes in 2013 and 2014, with key terms highlighted in the table below:

Key Terms	Series 2023 Notes	Series A Notes
Inception Date	08/05/2013	11/03/2014
Cash Received	\$10,500,000	\$12,500,000
Principal	\$10,500,000	\$19,848,486
Original Issue Discount (OID)	N/A	\$7,348,486
Maturity (Term)	10 years, but convertible after 1 year based on the market price of the Company’s stock	4 years, but may range between 2 years to the full maturity of the Series 2023 Notes, depending on whether a Specified Event occurs and/or an Extension Option is elected (see below for further details)
Exercise Price	\$1.40 at inception, adjusted downward based on antidilution provisions/downround protection	\$0.92 at inception, adjusted downward based on antidilution provisions; also may be reduced by \$0.10 if Extension Option is elected (see below)
Stated Interest	10% per annum, due semiannually	10% per annum, due semiannually, may be reduced to 1% if Specified Event (see below) occurs
Derivative Liability	\$2,055,000 established at inception due to existence of antidilution provisions; revalued every quarter using Monte Carlo model	\$9,212,285 established at inception due to existence of antidilution provisions; revalued every quarter using Monte Carlo model

Series A Notes

On November 3, 2014 (“Issue Date”), the Company issued, in a private placement pursuant to investment agreements, \$19,848,486 principal amount of 10% PIK-Election Convertible Notes due 2018 (“Series A Notes”) in exchange for \$12,500,000 in cash and the cancellation of previously-issued warrants held by one investor.

Table Of Contents

Below are key terms of the Series A Notes:

Maturity- November 3, 2018, provided that the Stated Maturity Date may be extended to November 3, 2019 at the option of the Company (the “Extension Option”) if (i) the Company has delivered written notice of its exercise of the Extension Option to the Holder not more than ninety (90) nor less than thirty (30) days prior to November 3, 2018 and (ii) the Company has delivered a certificate, dated as of November 3, 2018, certifying that no Default or Event of Default has occurred and is continuing; provided, further that the Stated Maturity Date shall be extended to the maturity date of the Series 2023 Notes or any Replacement Financing, as applicable, upon the occurrence of a Specified Event (“Specified Extension”).

Exercise Price- initially \$0.92 per share and will be (i) adjusted from time to time pursuant antidilution provisions and (ii) reduced by \$0.10 per share if the Company elects to exercise its Extension Option.

Stated Interest: 10% payable semiannually in arrears, provided that the interest rate shall be reduced to 1% per annum on the principal amount of the Note upon the occurrence of the Specified Event, as defined below.

Specified Event- means the event that may occur after the second anniversary of the Issuer Date if: (i) any amounts under the Series 2023 Notes or any Replacement Financing are outstanding, (ii) the VWAP for the preceding 30 consecutive Trading Days as determined by the Board of Directors of the Issuer in good faith is in excess of the Exercise Price, (iii) the closing Market Price of the Common Stock is in excess of the Exercise Price on the date immediately preceding the date on which the Specified Event occurs, (iv) no Default or Event of Default has occurred and is continuing and (v) the Issuer has delivered a certificate to each holder of Series A Notes certifying that the conditions set forth in clauses (i) through (iv) above have been met.

Extension Option- If stock price is lower than current exercise price (\$0.92) prior to the stated maturity (November 3, 2018), then the Company can elect an Extension Option, whereby the maturity is extended by one year (see Maturity definition), but with a reduction in exercise price by \$0.10.

Liquidated Damages- The company is required to pay the noteholders 1% of the principal amount of the Series A Notes if a Registration statement is not filed and effective within 90 days of the inception date (and further damages for every 30 days thereafter). The Company has accrued \$200,000 as Other Expense as of December 31, 2014 due to a delay in such filing.

The number of shares issuable under the Notes may be affected by the antidilution provisions of the Notes. The antidilution provisions adjust the Exercise Price of the Notes in the event of stock dividends and splits, issuance below the market price of the Common Stock, issuances below the conversion price of the Notes, pro rata distribution of assets, rights plans, tender offers, and exchange offers.

Series 2023 Notes

In August 2013, the Company received \$10,500,000 of financing through the private placement of 10% mandatory convertible Notes due 2023 ("Series 2023 Notes"). The principal amount of the Notes is due on maturity. The Company can elect to pay semi-annual interest on the Series 2023 Notes with additional PIK Notes containing the same terms as the Series 2023 Notes, except interest will accrue from issuance of such notes. The Company can also elect to pay interest in cash. In February 2014 and August 2014, the Company issued \$525,000 and \$551,250, respectively, in additional PIK Notes to the holders to pay the semi-annual interest.

The Series 2023 Notes convert into the Company's common stock at a conversion price of \$1.40 per share, which is subject to customary anti-dilution adjustments; these antidilution adjustments reduced the conversion price to \$1.36 after the issuance of the Series A Notes. As of issuance, the Series 2023 Notes were convertible into 7,500,000 shares of the common stock. The holders may convert the Series 2023 Notes at any time. The Series 2023 Notes are mandatorily convertible after one year when the weighted average trading price of a share of the common stock for the preceding ten trading days is in excess of the conversion price. The Series 2023 Notes contain customary representations and warranties and several covenants. The proceeds are being used for general corporate purposes. No broker was used and no commission was paid in connection with the sale of the Series 2023 Notes.

OFF-BALANCE SHEET ARRANGEMENTS

There are no off-balance sheet arrangements between the Company and any other entity that have, or are reasonably likely to have, a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources that is material to investors.

CONTRACTUAL OBLIGATIONS

The following table summarizes our contractual obligations as of December 31, 2014 that require us to make future cash payments. For contractual obligations, we included payments that we have an unconditional obligation to make:

	Payment due by period				
	Total	< 1 year	1 – 3 years	3 – 5 years	> 5 years
Contractual Obligations:					
Rent obligations	\$ 309,871	\$ 152,296	\$ 157,575	--	--
Total	\$ 309,871	\$ 152,296	\$ 157,575	--	--

Rent expense for the years ended December 31, 2014, 2013 and 2012 was \$174,091, \$164,961 and \$138,100, respectively. Facility lease obligation is under a 2-year extension period and does not contain escalation clauses.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

Applied Minerals, Inc.

We have audited the accompanying consolidated balance sheets of Applied Minerals, Inc. (the “Company”) as of December 31, 2014 and 2013, and the related consolidated statements of operations, changes in stockholders’ equity (deficit), and cash flows for each of the years in the three-year period ended December 31, 2014. Our audits also included the financial statement schedule of Valuation and Qualifying Accounts included in Item 15(a)(2). We also have audited the Company’s internal control over financial reporting as of December 31, 2014, based on criteria established in the 2013 Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). The Company’s management is responsible for these consolidated financial statements and financial schedule, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management’s Annual Report on Internal Control over Financial Reporting appearing under Item 9A of the Company’s December 31, 2014 annual report on Form 10-K. Our responsibility is to express opinions on these consolidated financial statements, financial schedule and the Company’s internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of the internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that

transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Applied Minerals, Inc. as of December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial schedule referred to above, when considered in relation to the consolidated financial statements taken as a whole, presents fairly, in all material respects, the information stated therein. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in the 2013 Internal Control - Integrated Framework issued by COSO.

Table Of Contents

APPLIED MINERALS, INC.

(An Exploration Stage Mining Company)

Notes to the Consolidated Financial Statements

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

Applied Minerals, Inc. (the “Company”) is the owner of the Dragon Mine located in the Tintic Mining District of the State of Utah from where it produces halloysite clay and iron oxide. The Company is currently in various phases of commercial scale trials with several organizations in various markets with respects to uses of halloysite clay and iron oxide.

Applied Minerals, Inc. is a publicly traded company incorporated in the state of Delaware. The common stock trades on the OTC Bulletin Board under the symbol AMNL.

NOTE 2 – LIQUIDITY

The Company has incurred recurring losses from operations and used cash in operating activities while in the process of developing and commercializing halloysite clay and iron oxide. The Company's activities have been financed primarily through the sale of convertible debt and equity securities. In November 2014, the Company raised \$12,500,000 of financing through the private placement of 10% Mandatorily Convertible PIK Notes due 2018, but containing various terms that may effectively reduce or increase the maturity. At December 31, 2014, the Company has working capital of approximately \$8,200,000, which management believes should fund its operations through December 31, 2015. Besides continuing its strategic business plan on generating revenue, the Company intends to explore various strategic alternatives, including the sale of equity, debt or the disposal of certain non-core assets to raise additional capital. Management can also take steps to reduce the Company's future operating expenses as needed.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Exploration-Stage Company

From 1997 through 2008, the Company’s sole source of revenue and income was derived from its contract mining business through which it provided shaft sinking, underground mine development and mine labor services. At

December 31, 2008, the Company discontinued its contract mining efforts due to economic conditions and the desire to concentrate its efforts on the commercialization of the halloysite clay deposit at the Dragon Mine.

Effective January 1, 2009, the Company was, and still is, classified as an exploration company as the existence of proven or probable reserves have not been demonstrated and no significant revenue has been earned from the mine. Under the SEC's Industry Guide 7, a mining company is considered an exploration stage company until it has declared mineral reserves determined in accordance with the guide and staff interpretations thereof.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Applied Minerals, Inc. and its inactive subsidiary, which holds 100 acres of timber and mineral property in northern Idaho.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. In these consolidated financial statements, the warrant and PIK note derivative liabilities, stock compensation, impairment of long-lived assets and valuation allowance on income taxes involve extensive reliance on management's estimates. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all highly-liquid investments with a maturity of three months or less. The Company minimizes its credit risk by investing its cash and cash equivalents, which sometimes exceeds FDIC limits, with major financial institutions located in the United States with a high credit rating.

Receivables

Trade receivables are reported at outstanding principal amounts, net of an allowance for doubtful accounts.

Management evaluates the collectability of receivable account balances to determine the allowance, if any. Management considers the other party's credit risk and financial condition, as well as current and projected economic and market conditions, in determining the amount of the allowance. Receivable balances are written off when management determines that the balance is uncollectable. No allowance was required at December 31, 2014 and 2013.

Property and Equipment

Property and equipment are carried at cost net of accumulated depreciation and amortization. Depreciation and amortization is computed on the straight-line method over the estimated useful lives of the assets, or the life of the lease, whichever is shorter, as follows:

	Estimated Useful Life *
Building and Building Improvements	5 – 40 years
Mining equipment	2 – 7 years
Office and shop furniture and equipment	3 – 7 years
Vehicles	5 years

* See Note
4 for
explanation
of a change
in useful
life in 2014.

Depreciation expense for the years ended December 31, 2014, 2013 and, 2012 totaled \$1,164,366, \$317,570, and \$280,991, respectively.

Impairment of Long-lived Assets

The Company periodically reviews the carrying amounts of long-lived assets to determine whether current events or circumstances warrant adjustment to such carrying amounts. Long-lived assets are tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. When such events occur, the Company compares the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset to its carrying amount. If this comparison indicates that there is an impairment, the amount of the impairment is typically calculated using discounted expected future cash flows where observable fair values are not readily determinable. Considerable management judgment is necessary to estimate the fair value of assets. Assets to be disposed of are carried at the lower of their financial statement carrying amount or fair value, less cost to sell.

Table Of Contents

Revenue Recognition

Revenue includes sales of halloysite clay and iron oxide, and is recognized when title passes to the buyer and when collectability is reasonably assured. Title passes to the buyer based on terms of the sales contract. Product pricing is determined based on contractual arrangements with the Company's customers.

Mining Exploration and Development Costs

Land and mining property are carried at cost. The Company expenses prospecting and mining exploration costs. At the point when a property is determined to have proven and probable reserves, subsequent development costs will be capitalized and will be charged to operations using the units-of-production method over proven and probable reserves. Upon abandonment or sale of a mineral property, all capitalized costs relating to the specific property are written off in the period abandoned or sold and a gain or loss is recognized.

Income taxes

The Company uses an asset and liability approach which results in the recognition of deferred tax liabilities and assets for the expected future tax consequences or benefits of temporary differences between the financial reporting basis and the tax basis of assets and liabilities, as well as operating loss and tax credit carry forwards, using enacted tax rates in effect in the years in which the differences are expected to reverse.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of its deferred tax assets will not be realized. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. A valuation allowance has been provided for the portion of the Company's net deferred tax assets for which it is more likely than not that they will not be realized.

The Company is subject to U.S. federal income tax as well as income tax of various state jurisdictions. Federal income tax returns subsequent to 2010 are subject to examination by major tax jurisdictions.

Authoritative guidance provides that the tax effects from an uncertain tax position taken or expected to be taken in a tax return can be recognized in our financial statements only if the position is more likely than not of being sustained on audit based on the technical merits of the position. As of December 31, 2014 no benefit from uncertain tax positions was recognized in our financial statements. The Company has elected to classify interest and/or penalties related to income tax matters in income tax expense.

Stock Options and Warrants

The Company follows ASC 718 (Stock Compensation) and 505-50 (Equity-Based Payments to Non-employees), which provide guidance in accounting for share-based awards exchanged for services rendered and requires companies to expense the estimated fair value of these awards over the requisite service period. The Company instituted a formal long-term and short-term incentive plan on November 20, 2012, which was approved by its shareholders. Prior to that date, we did not have a formal equity plan, but all equity grants, including stock options and warrants, were approved by our Board of Directors. We determine the fair value of the stock-based compensation awards granted to non-employees as either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. If the fair value of the equity instruments issued is used, it is measured using the stock price and other measurement assumptions as of the earlier of either of (1) the date at which a commitment for performance by the counterparty to earn the equity instruments is reached, or (2) the date at which the counterparty's performance is complete. Beginning in the quarter ended June 30, 2013 the Company began using the simplified method to determine the expected term for any options granted because the Company did not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term. The Company previously utilized the contractual term as the expected term.

Environmental Matters

Expenditures for ongoing compliance with environmental regulations that relate to current operations are expensed or capitalized as appropriate. Expenditures resulting from the remediation of existing conditions caused by past operations that do not contribute to future revenue generations are expensed. Liabilities are recognized when environmental assessments indicate that remediation efforts are probable and the costs can be reasonably estimated.

Estimates of such liabilities are based upon currently available facts, existing technology and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors, and include estimates of associated legal costs. These amounts also reflect prior experience in remediating contaminated sites, other companies' clean-up experience and data released by The Environmental Protection Agency or other organizations. Such estimates are by their nature imprecise and can be expected to be revised over time because of changes in government regulations, operations, technology and inflation. Recoveries are evaluated separately from the liability and, when recovery is assured, the Company records and reports an asset separately from the associated liability.

Based upon management's current assessment of its environmental responsibilities, it does not believe that any reclamation or remediation liability exists at December 31, 2014.

Table Of Contents

Recent Accounting Pronouncements

On June 2014, the FASB issued ASU No. 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period, which clarifies that entities should treat performance targets that can be met after the requisite service period of a share-based payment award as performance conditions that affect vesting. Under the ASU, an entity would not record compensation expense related to an award for which transfer to the employee is contingent on the entity's satisfaction of a performance target until it becomes probable that the performance target will be met. The adoption of this ASU will be required, either on a retrospective basis or prospective basis, beginning with our Quarterly Report on Form 10-Q for the quarter ending March 31, 2016. The adoption of this ASU is not expected to have a material impact on our consolidated financial statements.

In June 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) ASU 2014-10 Development Stage Entities. The amendments in ASU 2014-10 remove the definition of a development stage entity from Topic 915 Development Stage Entities, thereby removing the distinction between development stage entities and other reporting entities from US GAAP. In addition, the amendments eliminate the requirements for development stage entities to (1) present inception-to-date information in the statements of operations, cash flows, and shareholder's equity, (2) label the financial statements as those of a development stage entity, (3) disclose a description of the development stage activities in which the entity is engaged, and (4) disclose in the first year in which the entity is no longer a development stage entity that in prior years it had been in the development stage. The amendments also clarify that the guidance in Topic 275, Risks and Uncertainties, is applicable to entities that have not commenced planned principal operations. ASU 2014-10 is effective for annual reporting periods beginning after December 15, 2014, and interim periods therein. The Company could early adopt ASU 2014-10 for any annual reporting period or interim period for which the entity's financial statements have not yet been issued. The Company has elected to adopt this ASU effective with the Quarterly Report on Form 10-Q for the quarter ended June 30, 2014 and its adoption resulted in the removal of inception-to-date information in the Company's financial statements.

In May 2014, the FASB issued ASU 2014-09 *Revenue from Contracts with Customers*. The amendments in ASU 2014-09 affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (e.g., insurance contracts or lease contracts). This ASU will supersede the revenue recognition requirements in Topic 605 *Revenue Recognition*, and most industry-specific guidance, and creates a Topic 606 *Revenue from Contracts with Customers*.

The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps:

Step 1: Identify the contract(s) with a customer.

Step 2: Identify the performance obligations in the contract.

Step 3: Determine the transaction price.

Step 4: Allocate the transaction price to the performance obligations in the contract.

Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. The Company is currently evaluating these new requirements to determine the method of implementation and any resulting estimated effects on the consolidated financial statements.

In August 2014, the FASB issued Accounting Standards Update ("ASU") No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern" ("ASU 2014-15"). ASU 2014-15 is intended to define management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. Specifically, ASU 2014-15 provides a definition of the term substantial doubt and requires an assessment for a period of one year after the date that the financial statements are issued. It also requires certain disclosures when substantial doubt is alleviated as a result of consideration of management's plans and requires an express statement and other disclosures when substantial doubt is not alleviated. The new standard will be effective for reporting periods beginning after December 15, 2016, with early adoption permitted. Management is currently evaluating the impact of the adoption of ASU 2014-14 on our financial statement disclosures.

NOTE 4 – PROPERTY AND EQUIPMENT

The following is a summary of property, plant, and equipment – at cost, less accumulated depreciation:

	2014	2013
Land (a)	\$945,180	\$945,180
Land improvements	164,758	164,758
Buildings	3,308,465	631,299
Mining equipment	1,684,197	1,569,635
Milling equipment	2,620,300	333,594
Laboratory equipment	594,451	65,934
Office equipment	72,174	60,992
Vehicles	148,673	140,002
	9,538,198	3,911,394
Less: Accumulated depreciation	2,482,324	1,317,958

	7,055,874	2,593,436
Construction in progress (b)	-	3,438,113
Total	\$7,055,874	\$6,031,549

- (a) Includes the Atlas Mine near Mullan, Idaho with a carrying value of \$445,180 (Note 3), and the Dragon Mine with a carrying value of \$500,000.
- (b) Represents investments in a new plant facility and related equipment at the mine site, which were transferred to the respective accounts in 2014.

The Company is using a five-year depreciation schedule with respect to its new processing plant that was commissioned in 2014. The five-year depreciation schedule is a change from the 40 years utilized for the building and 7 years utilized for the equipment relating to the new processing plant in the quarterly financial statements for the quarters ended March 31, June 30 and September 30, 2014. This change in useful life resulted in \$587,427 of additional depreciation expense, which was recorded during the fourth quarter of 2014. The impact of the change in the depreciation schedule did not have a material impact on the consolidated financial statements for the three quarters previously reported on Form 10-Q.

NOTE 5 – STOCK AWARD PAYABLE

The stock award payable amount of \$110,000 at December 31, 2013 relates to 100,000 shares of the Company's common stock issuable, but not issued, under a 2007 employment agreement. The Company recorded the stock grant as a liability which was revalued based on the quoted price of the Company's stock at the end of each period. During the second quarter of 2014, the Company received a release in writing from the former employee absolving the Company of the stock award and accordingly the \$72,000 balance of the liability was reversed into Other Income.

Table Of Contents**NOTE 6 – FAIR VALUE MEASUREMENTS AND FINANCIAL INSTRUMENTS**

ASC Topic 820, *Fair Value Measurement and Disclosures*, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This topic also establishes a fair value hierarchy, which requires classification based on observable and unobservable inputs when measuring fair value. The fair value hierarchy distinguishes between assumptions based on market data (observable inputs) and an entity's own assumptions (unobservable inputs). The hierarchy consists of three levels:

Level 1 – Quoted prices in active markets for identical assets and liabilities;

Level 2 – Inputs other than level one inputs that are either directly or indirectly observable; and

Level 3 – Unobservable inputs developed using estimates and assumptions, which are developed by the reporting entity and reflect those assumptions that a market participant would use.

Liabilities measured at fair value on a recurring basis are summarized as follows:

	Fair value measurement using inputs			Carrying amount	
	Level 1		Level 3	December 31, 2014	December 31, 2013
	1	2			
Financial instruments:					
Warrant derivative *	--			--	\$950,000
Series 2023 PIK Note Derivative			\$478,149	\$478,149	\$2,250,000
Series A PIK Note Derivative			\$9,557,476	\$9,557,476	--

* The warrant was cancelled in November 2014. See Note 10.

The following table summarizes the activity for financial instruments at fair value using Level 3 inputs:

Balance at December 31, 2013	\$-
Transfer into Level 3 ^(a)	2,250,000
Issuance of Series A PIK Note	9,212,285
Issuance of additional Series 2023 PIK Note	44,138

Edgar Filing: Applied Minerals, Inc. - Form 10-K

Net unrealized losses included in earnings (loss)	(1,470,798)
Balance at December 31, 2014	\$ 10,035,625

In the course of preparing its financial statements for the year ended December 31, 2014, the Company (a)reclassified the Series 2023 PIK note derivative to Level 3 fair value hierarchy to match with the Series A PIK note derivative since it based off of a similar model.

The recorded value of certain financial assets and liabilities, which consist primarily of cash and cash equivalents, receivables, other current assets, and accounts payable and accrued expenses approximate the fair value at December 31, 2014 and 2013 based upon the short-term nature of the assets and liabilities. Based on borrowing rates currently available to the Company for loans with similar terms, and the remaining short term period outstanding, the carrying value of notes payable other than PIK notes materially approximate fair value. Estimated fair value of the PIK Notes Payable approximate \$27,488,811 and \$10,500,000, respectively, at December 31, 2014 and 2013 (Level 2).

For the Company's warrant and PIK note derivative liabilities, Level 3 fair value hierarchy was estimated using a Monte Carlo Model using the following assumptions:

Series 2023 PIK Note derivative liability	Fair Value Measurements Using Inputs		
	December 31, 2014	December 31, 2013	
Market price and estimated fair value of stock	\$0.73	\$ 1.10	
Exercise price	\$1.36	\$ 1.40	
Term (years)	8.58	9.58	
Dividend yield	\$--	\$ --	
Expected volatility *	52.0%	76.9	%
Risk-free interest rate	2.08%	2.96	%

Series A PIK Note derivative liability	Fair Value Measurements Using Inputs		
	December 31, 2014		
Market price and estimated fair value of stock	\$	0.73	
Exercise price	\$	0.92	
Term (years)		3.83	
Dividend yield	\$	--	

Expected volatility	52.0	%
Risk-free interest rate	2.08	%

Warrant derivative liability	Fair Value Measurements Using Inputs December 31, 2013	
Market price and estimated fair value of stock	\$	1.10
Exercise price	\$	1.93
Term (years)		3
Dividend yield	\$	--
Expected volatility *		76.9 %
Risk-free interest rate		0.78 %

* During the first quarter of 2014, the Company revised its assumption for expected volatility by switching from a peer-group average volatility to the Company's three-year historical volatility in measuring the value of the derivative liabilities mentioned above. Prior to 2011, the occurrence of certain corporate events would not have made the historical volatility calculations meaningful or accurate if included. This reduction in volatility led to a reduced valuation for both the Warrant and Series 2023 PIK Note derivative liabilities of approximately \$118,500 and \$126,000, respectively. The remaining decrease in the valuation is attributable to the decline in stock price.

Table Of Contents**NOTE 7 - NOTES PAYABLE**

Notes payable at December 31, 2014 and 2013 consist of the following:

	December 31,	
	2014	2013
Note payable for mining equipment, payable \$5,556 monthly, including interest (a)	\$--	\$42,927
Note payable for mining equipment, payable \$950 monthly, including interest (b)	14,057	23,302
Note payable for mining equipment, payable \$6,060 monthly, including interest (c)	6,033	76,313
Note payable for lab equipment, payable \$9,122 monthly, including interest (d)	18,246	--
Note payable for mining equipment, payable \$1,339 monthly, including interest (e)	55,720	--
Note payable for mine site vehicle, payable \$628 monthly (f)	20,736	28,276
Note payable for mining equipment, payable \$5,000 monthly, including interest (g)	--	9,932
Note payable for mining equipment, payable \$2,250 monthly, including interest (h)	--	8,898
Note payable to an insurance company, payable \$21,531 monthly, including interest (i)	149,036	--
Note payable to an insurance company, payable \$6,094 monthly, including interest (j)	42,211	--
Note payable to an insurance company, payable \$4,447 monthly, including interest (k)	--	132,576
Note payable to an insurance company, payable \$4,447 monthly, including interest (l)	--	29,767
	306,039	351,991
Less: Current Portion	(246,894)	(311,165)
Notes Payable, Long-Term Portion	\$59,145	\$40,826

On July 7, 2011, the Company purchased mining equipment for \$198,838 by issuing a note with an implicit (a) interest rate of 9.34%. The note is collateralized by the mining equipment with payments of \$5,556 for 36 months, which started on August 15, 2011.

On April 17, 2012, the Company purchased mining equipment for \$40,565 by issuing a note with an effective (b) interest rate of 11.279%. The note is collateralized by the mining equipment with payments of \$950 for 48 months, which started on May 1, 2012.

On July 23, 2012, the Company purchased mining equipment for \$169,500 by issuing a note with an interest rate (c) of 5.5%. The note is collateralized by the mining equipment with payments of \$6,060 for 30 months, which started on August 25, 2012.

On April 16, 2014, the Company purchased lab equipment for \$109,493 by depositing and issuing a non-interest (d) bearing note in the amount of \$91,229. The note is collateralized by the lab equipment with payments of \$9,122 for ten months, which started in May 2014.

On October 31, 2014, the Company purchased mining equipment for \$65,120 by depositing and issuing a note in (e) the amount of \$57,900 with an interest rate of 5.2%. The note is collateralized by the mining equipment with payments of \$1,339 for 48 months, which started on November 30, 2014.

On September 20, 2012, the Company purchased a vehicle for the mine site for \$37,701 by issuing a non-interest (f) bearing note. The note is collateralized by the vehicle with payments of \$628 for 60 months, which started on October 20, 2012.

Edgar Filing: Applied Minerals, Inc. - Form 10-K

On November 16, 2012, the Company purchased a piece of mining equipment that had been leased for \$67,960 by (g) issuing a note with an effective interest rate of 5.5%. The note is collateralized by the mining equipment with payments of \$3,518 for three months, then \$5,000 for twelve months.

On November 16, 2012, the Company purchased a piece of mining equipment that had been leased for \$33,748 by (h) issuing a note with an effective interest rate of 5.5%. The note is collateralized by the mining equipment with payments of \$1,632 for five months, then \$2,250 for twelve months

(i) The Company signed a note payable with an insurance company dated October 31, 2014 for directors' and officers' insurance, due in monthly installments, including interest at 3.15%. The note will mature on July 2015.

(j) The Company signed a note payable with an insurance company dated October 31, 2014 for liability insurance, due in monthly installments, including interest at 3.15%. The note will mature on July 2015.

(k) The Company signed a note payable with an insurance company dated October 17, 2012 for directors' and officers' insurance, due in monthly installments, including interest at 3.15%. The note matured in September 2013 and was repaid.

(l) The Company signed a note payable with an insurance company dated October 17, 2012 for liability insurance, due in monthly installments, including interest at 4.732%. The note matured in July 2013 and was repaid.

The following is a schedule of the principal maturities on these notes for the next four years:

2015	\$246,894
2016	25,457
2017	20,615
2018	13,073
Total Notes Payable	\$306,039

During the 2014 and 2013, the Company's interest payments totaled \$10,460 and \$23,180, respectively.

Table Of Contents**NOTE 8 – CONVERTIBLE DEBT (PIK NOTES)**

The Company raised \$23 million of financing through the issuance of two series of Paid-In-Kind (“PIK”)-Election Convertible Notes in 2013 and 2014, with key terms highlighted in the table below:

Key Terms	Series 2023 Notes	Series A Notes
Inception Date	08/05/2013	11/03/2014
Cash Received	\$10,500,000	\$12,500,000
Principal (Initial Liability)	\$10,500,000	\$19,848,486
Original Issue Discount (OID)	N/A	\$7,348,486
Maturity (Term)	10 years, but convertible after 1 year based on the market price of the Company’s stock	4 years, but may range between 2 years to the full maturity of the Series 2023 Notes, depending on whether a Specified Event occurs and/or an Extension Option is elected (see below for further details)
Exercise Price	\$1.40 at inception, adjusted downward based on antidilution provisions/downround protection	\$0.92 at inception, adjusted downward based on antidilution provisions; also may be reduced by \$0.10 if Extension Option is elected (see below)
Stated Interest	10% per annum, due semiannually	10% per annum, due semiannually, may be reduced to 1% if Specified Event (see below) occurs
Derivative Liability	\$2,055,000 established at inception due to existence of antidilution provisions; revalued every quarter using Monte Carlo model	\$9,212,285 established at inception due to existence of antidilution provisions; revalued every quarter using Monte Carlo model

As of 12/31/2014, the liability components of the PIK Notes on the Company’s balance sheet are listed in the following table:

(in \$\$)	Series 2023 Notes	Series A Notes	Total
PIK Note Payable, Gross	11,576,250	19,848,486	31,424,736
Less: Discount	(1,949,555)	(16,450,742)	(18,400,297)
PIK Note Payable, Net	9,626,695	3,397,744	13,024,439
PIK Note Derivative Liability	478,149	9,557,476	10,035,625

As of 12/31/2013, the liability components of the PIK Notes on the Company's balance sheet are listed in the following table:

(in \$\$)	Series 2023 Notes	Series A Notes	Total
PIK Note Payable, Gross	10,507,333	--	10,507,333
Less: Discount	(2,020,750)	--	(2,020,750)
PIK Note Payable, Net	8,486,583	--	8,486,583
PIK Note Derivative Liability	2,250,000	--	2,250,000

Series A Notes

On November 3, 2014 ("Issue Date"), the Company issued, in a private placement pursuant to investment agreements, \$19,848,486 principal amount of 10% PIK-Election Convertible Notes due 2018 ("Series A Notes") in exchange for \$12,500,000 in cash and the cancellation of previously-issued warrants held by one investor.

Below are key terms of the Series A Notes:

Maturity- November 3, 2018, provided that the Stated Maturity Date may be extended to November 3, 2019 at the option of the Company (the "Extension Option") if (i) the Company has delivered written notice of its exercise of the Extension Option to the Holder not more than ninety (90) nor less than thirty (30) days prior to November 3, 2018 and (ii) the Company has delivered a certificate, dated as of November 3, 2018, certifying that no Default or Event of Default has occurred and is continuing; provided, further that the Stated Maturity Date shall be extended to the maturity date of the Series 2023 Notes or any Replacement Financing, as applicable, upon the occurrence of a Specified Event ("Specified Extension").

Exercise Price- initially \$0.92 per share and will be (i) adjusted from time to time pursuant antidilution provisions and (ii) reduced by \$0.10 per share if the Company elects to exercise its Extension Option.

Stated Interest: 10% payable semiannually in arrears, provided that the interest rate shall be reduced to 1% per annum on the principal amount of the Note upon the occurrence of the Specified Event, as defined below.

Specified Event- means the event that may occur after the second anniversary of the Issuer Date if: (i) any amounts under the Series 2023 Notes or any Replacement Financing are outstanding, (ii) the VWAP for the preceding 30 consecutive Trading Days as determined by the Board of Directors of the Issuer in good faith is in excess of the Exercise Price, (iii) the closing Market Price of the Common Stock is in excess of the Exercise Price on the date immediately preceding the date on which the Specified Event occurs, (iv) no Default or Event of Default has occurred and is continuing and (v) the Issuer has delivered a certificate to each holder of Series A Notes certifying that the conditions set forth in clauses (i) through (iv) above have been met.

Table Of Contents

- o Extension Option- If stock price is lower than current exercise price (\$0.92) prior to the stated maturity (November 3, 2018), then the Company can elect an Extension Option, whereby the maturity is extended by one year (see Maturity definition), but with a reduction in exercise price by \$0.10.

Liquidated Damages- The company is required to pay the noteholders 1% of the principal amount of the Series A Notes if a Registration statement is not filed and effective within 90 days of the inception date (and further damages^o for every 30 days thereafter). The Company has accrued \$200,000 as Other Expense as of December 31, 2014 due to a delay in such filing.

The number of shares issuable under the Notes may be affected by the antidilution provisions of the Notes. The antidilution provisions adjust the Exercise Price of the Notes in the event of stock dividends and splits, issuance^o below the market price of the Common Stock, issuances below the conversion price of the Notes, pro rata distribution of assets, rights plans, tender offers, and exchange offers.

These Series A Notes were not issued with the intent of effectively hedging any future cash flow, fair value of any asset, liability or any net investment in a foreign operation. In addition to the customary antidilution provisions the notes contain a down-round provision whereby the conversion price would be adjusted downward in the event that additional shares of the Company's common stock or securities exercisable, convertible or exchangeable for the Company's common stock were issued for cash consideration (e.g. a capital raise) at a price less than the conversion price. Therefore, the estimated fair value of the conversion feature of \$9,212,285 (based on observable inputs using a Monte Carlo model) was bifurcated from the Series A Notes and accounted for as a separate derivative liability, which resulted in a corresponding amount of debt discount on the Series A Notes. In addition, an additional debt discount of \$7,348,486 was recorded as a result of the difference between the \$12,500,000 of cash received and the \$19,848,486 of principal on the Series A Notes. This combined debt discount of \$16,560,771 is being amortized using the effective interest method over the 4-year term of the Notes as Interest Expense, while the PIK Note Derivative is carried at fair value (using a Monte Carlo model) until the Notes are converted or otherwise extinguished. Any changes in fair value are recognized in earnings.

At December 31, 2014, the fair value of the Series A PIK Note Derivative was estimated to be \$9,557,476, an increase in valuation of \$345,191 from the November 3, 2014 inception date. In addition, the Company amortized \$110,031 of debt discount relating to the Series A PIK Notes Payable, increasing the Series A PIK Notes Payable carrying value to \$3,397,744 as of December 31, 2014.

Series 2023 Notes

In August 2013, the Company received \$10,500,000 of financing through the private placement of 10% mandatory convertible Notes due 2023 ("Series 2023 Notes"). The principal amount of the Notes is due on maturity. The Company can elect to pay semi-annual interest on the Series 2023 Notes with additional PIK Notes containing the same terms as the Series 2023 Notes, except interest will accrue from issuance of such notes. The Company can also elect to pay interest in cash. In February 2014 and August 2014, the Company issued \$525,000 and \$551,250, respectively, in additional PIK Notes to the holders to pay the semi-annual interest.

The Series 2023 Notes convert into the Company's common stock at a conversion price of \$1.40 per share, which is subject to customary anti-dilution adjustments; these antidilution adjustments reduced the conversion price to \$1.36 after the issuance of the Series A Notes. As of issuance, principal amount of the Series 2023 Notes were convertible into 7,500,000 shares of the common stock and into 7,720,588 shares after the issuance of the Series A Notes. The holders may convert the Series 2023 Notes at any time. The Series 2023 Notes are mandatorily convertible after one year when the weighted average trading price of a share of the common stock for the preceding ten trading days is in excess of the conversion price. The Series 2023 Notes contain customary representations and warranties and several covenants. The proceeds are being used for general corporate purposes. No broker was used and no commission was paid in connection with the sale of the Series 2023 Notes. As of December 31, 2014, the Company was in compliance with the covenants.

These Series 2023 Notes were not issued with the intent of effectively hedging any future cash flow, fair value of any asset, liability or any net investment in a foreign operation. In addition to the customary anti-dilution provisions the notes contain a down-round provision whereby the conversion price would be adjusted downward in the event that additional shares of the Company's common stock or securities exercisable, convertible or exchangeable for the Company's common stock were issued for cash consideration (e.g. a capital raise) at a price less than the conversion price. Therefore, the estimated fair value of the conversion feature of \$2,055,000 (based on observable inputs using a Monte Carlo model) was bifurcated from the Series 2023 Notes and accounted for as a separate derivative liability, which resulted in a corresponding amount of debt discount on the Series 2023 Notes. The debt discount is being amortized using the effective interest method over the 10-year term of the Series 2023 Notes as Interest Expense, while the PIK Note Derivative is carried at fair value (using a Monte Carlo model) until the Series 2023 Notes are converted or otherwise extinguished. Any changes in fair value are recognized in earnings.

At December 31, 2014, the fair value of the PIK Note Derivative was estimated to be \$478,149, which includes the value of the additional PIK Notes issued in February and August 2014, for the semi-annual interest payments due. Total gain from the revaluation of the original PIK Notes derivative was \$1,815,989 for 2014. In addition, during 2014, the Company recorded \$48,075 of additional debt discount from the February 2014 and August 2014 issuances above, and also amortized \$119,270 of debt discount relating to the Series 2023 PIK Notes Payable, resulting in a total debt discount of \$1,949,555 as of December 31, 2014, and increasing the Series 2023 PIK Notes Payable carrying value to \$9,626,695 as of December 31, 2014.

NOTE 9 – STOCKHOLDERS' EQUITY

Preferred Stock

The Company is authorized to issue 10,000,000 shares of noncumulative, non-voting, nonconvertible preferred stock, \$0.001 par value per share. At December 31, 2014 and 2013, no shares of preferred stock were outstanding.

Common Stock

On November 20, 2012, stockholders of the Company approved to increase the authorized shares of common stock from 120,000,000 to 200,000,000 shares, \$0.001 par value per share. At December 31, 2014 and 2013, 95,054,552 and 94,646,013 shares were issued and outstanding, respectively.

Table Of Contents

2014

During 2014 the Company issued a total of 408,539 shares of common stock valued at \$327,269 to directors and consultants as payments of fees.

2013

During 2013 the Company issued a total of 269,812 shares of common stock valued at \$316,475 to directors and consultants as payments of fees. In addition, on January 23, 2013 the Company sold, in a privately negotiated transaction, 3,756,757 shares of its common stock at \$1.48 per share for gross proceeds of \$5,560,000. No broker was used and no commission was paid as part of this transaction.

2012

During the year ended December 31, 2012, the Company issued a total of 103,574 shares of common stock to directors and consultants as payment of fees. The value of the restricted shares was recorded at \$151,059. During the year ended December 31, 2012, warrant holders received 106,774 shares of the Company's common stock through cashless exercises. During the year ended December 31, 2012 option holders received 39,685 shares of the Company's common stock through a cashless exercise. Also during the year ended December 31, 2012 the Company sold a total of 1,250,000 shares of common stock priced at \$1.30 per share, at the then current share price.

NOTE 10 – OPTIONS AND WARRANTS TO PURCHASE COMMON STOCK

Derivative Instruments - Warrants

The Company issued 5,000,000 warrants ("Samlyn warrants") in connection with the December 22, 2011 private placement of 10,000,000 shares of common stock. The strike price of these warrants was \$2.00 per share at the date of grant. These warrants were not issued with the intent of effectively hedging any future cash flow, fair value of any asset, liability or any net investment in a foreign operation. In addition to the customary antidilution provisions the notes contain a down-round provision whereby the exercise price would be adjusted downward in the event that additional shares of the Company's common stock or securities exercisable, convertible or exchangeable for the Company's common stock were issued at a price less than the exercise price. Therefore, the fair value of these warrants (based on observable inputs using a Monte Carlo model) was recorded as a liability in the balance sheet until they are exercised or expire or are otherwise extinguished. During the first quarter of 2013, the Company issued 3,756,757 shares of its common stock for gross proceeds of \$5,560,000, which triggered a down-round adjustment of

\$0.03 from \$2.00 to \$1.97 in the strike price of the Samlyn warrants at that time. As discussed in Note 8, during August 2013, the Company issued \$10,500,000 of 10% mandatorily convertible Series 2023 PIK Notes in a private placement, which triggered a down-round adjustment of \$0.04 from \$1.97 to \$1.93 in the strike price of the Samlyn warrants. On November 3, 2014, the Company cancelled the warrant arrangement, resulting in the fair value of the warrant at such date of \$120,000 being credit to equity.

During 2014, 2013 and 2012, the Company recorded other income of \$830,000, \$995,000 and \$630,000, respectively, resulting from the changes in the fair value of the warrant liability, mainly due to a lower stock price and a change in the volatility utilized by the Company, as discussed in Note 6.

Outstanding Stock Warrants

A summary of the status of the warrants outstanding and exercisable at December 31, 2014 is presented below:

Exercise Price	Warrants Outstanding and Exercisable		
	Number Outstanding	Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price
\$ 0.75	139,340	0.75	\$ 0.75
\$ 0.78	213,402	1.09	\$ 0.78
\$ 0.80	124,481	1.00	\$ 0.80
\$ 1.00	180,000	0.81	\$ 1.00
\$ 1.15	461,340	6.33	\$ 1.15
\$ 2.00	54,367	1.59	\$ 2.00
	1,172,930	3.08	\$ 1.01

No warrants were issued during 2013 and 2014. The intrinsic value of the outstanding warrants at December 31, 2014 was \$0. Compensation expense of \$210,067 has been recognized for the vesting of warrants in the accompanying consolidated statements of operations for the year ended December 31, 2012.

Outstanding Stock Options

On November 20, 2012, the shareholders of the Company approved the adoption of the Applied Minerals, Inc. 2012 Long-Term Incentive Plan ("LTIP") and the Short-Term Incentive Plan ("STIP") and the performance criteria used in setting performance goals for awards intended to be performance-based. Under the LTIP, 8,900,000 shares are authorized for issuance. The STIP does not refer to a particular number of shares under the LTIP, but would use the shares authorized in the LTIP for issuance under the STIP. The CEO, the CFO, and named executive officers, and directors, among others are eligible to participate in the LTIP and STIP. Prior to the adoption of the LTIP and STIP, stock options were granted under individual arrangements between the Company and the grantees, and approved by

the Board of Directors.

46

Table Of Contents

The fair value of each of the Company's stock option awards is estimated on the date of grant using the Black-Scholes option-pricing model that uses the assumptions noted in the table below. Expected volatility is based on an average of historical volatility of the Company's common stock. The risk-free interest rate for periods within the contractual life of the stock option award is based on the yield curve of a zero-coupon U.S. Treasury Bond on the date the award is granted with a maturity equal to the expected term of the award.

The significant assumptions relating to the valuation of the Company's options issued for 2014 and 2013 were as follows on a weighted average basis:

	2014	2013
Dividend Yield	0%	0%
Expected Life (years)	5.5	4.4
Expected Volatility	56.1%	63.5%
Risk Free Interest Rate	1.79%	1.48%

A summary of the status and changes of the options granted under stock option plans and other agreements for 2014 and 2013 is as follows:

	December 31, 2014		December 31, 2013	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding at beginning of period	15,878,116	\$ 1.03	15,455,471	\$ 1.04
Issued	1,175,000	0.84	760,867	1.19
Exercised	--	--	--	--
Forfeited	--	--	(338,222)	\$ 1.73
Outstanding at end of period	17,053,116	\$ 1.02	15,878,116	\$ 1.03

During the year ended December 31, 2014, the Company granted 1,175,000 options to purchase the Company's common stock with a weighted average exercise price of \$0.84. Of the 1,175,000 options granted, the options vest immediately or monthly as follows:

Vesting Information

Edgar Filing: Applied Minerals, Inc. - Form 10-K

Shares	Frequency	Begin Date	End Date
200,000	Quarterly	03/31/2014	12/31/2014
375,000	Immediately	06/10/2014	06/10/2014
600,000	Monthly	06/10/2014	06/09/2017

A summary of the status of the options outstanding at December 31, 2014 is presented below:

125,000	3.09	\$ 1.45	125,000	\$ 1.45
330,000	6.95	\$ 1.55	296,667	\$ 1.55
7,645	3.09	\$ 1.58	7,645	\$ 1.58
3,077,060	7.89	\$ 1.66	3,077,060	\$ 1.66
900,000	6.64	\$ 1.90	900,000	\$ 1.90
17,053,116	5.87	\$ 1.02	16,169,783	\$ 1.02

The weighted-average grant date fair value of options granted during 2014, 2013 and 2012 was \$0.43, \$0.64 and \$1.33, respectively.

Compensation expense of \$865,716, \$4,707,381, and \$2,314,154 has been recognized for the vested options for the years ended December 31, 2014, 2013 and 2012, respectively. The aggregate intrinsic value of the outstanding options at December 31, 2014 was \$220,748. At December 31, 2014, \$474,645 of unamortized compensation expense for unvested options is expected to be recognized over the next 1.85 years on a weighted average basis.

Table Of Contents**NOTE 11 - PER SHARE DATA**

The computation of basic earnings (loss) per share of common stock is based on the weighted average number of shares outstanding during the years. The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the year plus the common stock equivalents that would arise from the exercise of stock options and warrants outstanding under the treasury method and the average market price per share during the year as well as the conversion of notes. As of December 31, 2014, common stock equivalents aggregated 48,312,435 shares consisting of outstanding options and warrants to purchase 17,053,116 and 1,172,930 shares of Company common stock, respectively and notes payable which were convertible into 30,086,389 shares of Company common stock. Common stock equivalents at December 31, 2013 aggregated 29,583,046 shares of which 15,878,116 consisted of options and 6,204,930 were in warrants and notes payable which were convertible into 7,500,000 shares of Company common stock. Common stock equivalents at December 31, 2012 aggregated 21,660,400 shares of which 15,455,470 consisted of options and 6,204,930 were in warrants. Common stock equivalents during 2012 through 2014 were not included in the computation of loss per share because they would have been anti-dilutive.

	Net Loss (Numerator)	Shares (Denominator)	Per-Share Amount
For the year ended December 31, 2014:			
Basic and Diluted EPS			
Net loss	\$(10,316,317)	94,895,194	\$ (0.11)
For the year ended December 31, 2013:			
Basic and Diluted EPS			
Net loss	\$(13,063,526)	94,303,264	\$ (0.14)
For the year ended December 31, 2012:			
Basic and Diluted EPS			
Net loss	\$(9,732,399)	89,552,788	\$ (0.11)

NOTE 12 – INCOME TAXES

At December 31, 2014, the Company had deferred tax assets principally arising from net operating loss carry-forwards and stock based compensation for income tax purposes. The Company calculates its deferred tax assets using the federal tax rate of 35% and the following effective state rates, net of federal benefits: Idaho (0.1%), Utah (2.3%), and New York State/New York City (0.45%). Due to operating losses and the uncertainty of future profitability, a valuation allowance has been recorded to fully offset the Company's deferred tax assets.

The tax effect of items that give rise to the deferred tax assets and liabilities are as follows:

	December 31, 2014	December 31, 2013
Deferred tax assets:		
Net operating loss carryforward	\$23,246,809	\$18,454,164
Stock-based compensation	4,121,311	3,685,646
Stock Award Payable	--	40,792
Total deferred tax assets	27,368,120	22,180,602
Deferred tax liabilities:		
Property and equipment	(673,241)	(421,025)
Less: valuation allowance	(26,694,879)	(21,759,577)
	\$--	\$--

In assessing the realization of deferred tax assets, management determines whether it is more likely than not some, or all, of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the carryforward period as well as the period in which those temporary differences become deductible. Management considers the reversal of taxable temporary differences, projected taxable income and tax planning strategies in making this assessment. Based upon historical losses and the possibility of continued losses over the periods that the deferred tax assets are deductible, management believes it is more likely than not that the Company will not realize the benefits of these deferred tax assets and thus recorded a valuation allowance against the entire deferred tax asset balance. The valuation allowance increased by \$4,935,303, \$5,034,877, and \$3,903,777 in the years ended December 31, 2014, 2013, and 2012, respectively.

At December 31, 2014, the Company had net operating loss carry-forwards of \$62,196,737 for federal income tax purposes and \$39,533,764 for state and local income tax purposes. The federal net operating loss carry-forwards are available to be utilized against future taxable income through fiscal year 2034 and state loss carry-forwards expire from 2024 through 2034, subject to substantial restrictions on the utilization of net operating losses in the event of an “ownership change” as defined by the Internal Revenue Code. Utilization of the Company’s federal and state net operating loss carry-forwards are subject to limitations as a result of these restrictions. No amounts were provided for unrecognized tax benefits attributable to uncertain tax positions as of December 31, 2014 and 2013. All tax years prior to 2011 are not subject to IRS and state tax authorities’ audit, except for examination of the net operating loss carryforward, which dates back to 2003.

Table Of Contents

A reconciliation of the differences between the effective and statutory income tax rates is as follows:

	December 31, 2014		December 31, 2013		December 31, 2012	
Federal statutory rate	\$(3,610,711)	35.0 %	\$(4,572,234)	35.0 %	\$(3,406,340)	35.0 %
State income taxes – Idaho	(11,016)	0.1 %	(14,264)	0.1 %	(37,982)	0.4 %
State income taxes - Utah	(239,093)	2.3 %	(199,166)	1.5 %	(227,169)	2.3 %
State and local income taxes - NY	(46,372)	0.4 %	(58,721)	0.5 %	--	--
Change in valuation allowance	4,935,302	(47.8%)	5,034,877	(39.0%)	3,903,777	(40.1%)
Net nontaxable gain on derivative	(843,861)	8.2 %	(290,623)	2.2 %	(232,286)	2.4 %

	\$--	0 %	\$--	0 %	\$--	0 %

NOTE 13 – RELATED PARTIES

David A. Taft, a director, is the president of IBS Capital LLC (“IBS”), a Massachusetts limited liability company, whose principal business is investing in securities. IBS is the general partner of the IBS Turnaround Fund (QP), which is a Massachusetts limited partnership, IBS Turnaround Fund (LP), which is a Massachusetts limited partnership and the IBS Opportunity Fund, Ltd.

Mr. Taft participated in the Series A PIK Note financing described in Note 8, with the following investments, which were utilized by the Company to fund its operations:

Investor	Investment	OID/Discount	Principal	Shares Issuable @0.92, excluding interest
IBS Turnaround Fund (A Limited Partnership)	531,960	\$ 0.66	806,000	876,087
IBS Turnaround Fund QP (A Limited Partnership)	1,118,040	\$ 0.66	1,694,000	1,841,304
IBS Opportunity Fund, Ltd.	350,000	\$ 0.66	530,303	576,416
	\$2,000,000		\$3,030,303	3,293,807

Material Advisors LLC

On December 30, 2008, the Company entered into a Management Agreement with Material Advisors LLC, a management services company (“Manager”). The Management Agreement had a term ending on December 31, 2010 with automatic renewal for successive one-year periods unless either Manager or Company provided 90 days prior notice of cancellation to the other party or pursuant to the termination provisions of the Management Agreement. Under the Management Agreement, Manager would perform or engage others, including Andre Zeitoun, a principal of Manager, Chris Carney and Eric Basroon (“Management Personnel”), to perform senior management services including such services as are customarily provided by a chief executive officer but not (unless otherwise agreed) services customarily provided by a chief financial officer. Pursuant to the Management Agreement, Andre Zeitoun would serve as Company’s Chief Executive Officer and would be appointed as a member of the Company’s Board of Directors.

The services provided by Manager included, without limitation, consulting with the Board of Directors and the Company’s management on business and financial matters. Manager was paid an annual fee of \$1,000,000 per year, payable in equal monthly installments of \$83,333. Manager was solely responsible for the compensation of the Management Personnel, including Mr. Zeitoun and the Management Personnel was not entitled to any direct compensation or benefits from the Company (including, in the case of Mr. Zeitoun, for service on the Board). In January 2009, the Company granted Manager non-qualified stock options to purchase, for \$0.70 per share, up to 6,583,277 shares of the Company’s stock. In February 2011, the Company’s Board of Directors extended the Management Agreement for one additional year, thus extending the termination date of the agreement to December 31, 2012. As part of the extension of the Management Agreement, the Company’s Board of Directors approved the issuance of 2,904,653 warrants to purchase shares of common stock of the Company at \$0.83 per share. The warrants have a term of 5 years and vest equally on a monthly basis beginning January 2012. On January 2012, the Company’s Board of Directors unanimously agreed to pay a performance bonus of \$750,000 to the Manager.

On November 20, 2012, it was decided that effective January 1, 2013 the Company would engage the three members of Material Advisors individually rather than through Material Advisors.

NOTE 14 – COMMITMENTS AND CONTINGENCIES

Contingencies

The Company was named as the defendant in a lawsuit filed on April 18, 2014 in state district court in Salt Lake City, Utah. The plaintiff is Tekko Enterprises, Inc., which was hired in 2012 as project manager for the construction of a processing plant at the Company’s Dragon Mine property and terminated in 2013 before the completion of the plant. The complaint seeks damages of \$346,000, unpaid amounts that the plaintiff claims it is entitled to under the project management agreement and two purchase orders. The Company intends to vigorously defend against the claims and to counterclaim.

In accordance with ASC Topic 450, when applicable, we record accruals for contingencies when it is probable that a liability will be incurred and the amount of loss can be reasonably estimated. In addition to the matter described above, we may become involved in or subject to, routine litigation, claims, disputes, proceedings and investigations in the ordinary course of business, could have a material adverse effect on our financial condition, cash flows or results of operations.

Table Of Contents**Office Lease**

The Company extended their lease agreement for office space through December 31, 2015 at a monthly rent of \$12,691 and intends to extend it further for an additional year through 2016 for an aggregate commitment of approximately \$309,871 at December 31, 2014, payable over the next two years.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

During the years ended December 31, 2014 and 2013, there were no disagreements with our independent registered public accounting firms.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act, as of December 31, 2014. Our principal executive and financial officers supervised and participated in the evaluation. Based on the evaluation, our principal executive and financial officers each concluded that our disclosure controls and procedures were effective in providing reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's forms and rules as of December 31, 2014.

Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with GAAP. Our internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our consolidated financial statements.

Management's Annual Report on Internal Control over Financial Reporting

Our management, including the chief executive officer and principal financial officer, concluded that the Company's internal control over financial reporting was effective as of December 31, 2014. In arriving at that conclusion, we considered the criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") and we performed a complete assessment as outlined in *Commission Guidance Regarding Management's Report on Internal Control Over Financial Reporting Under Section 13(a) or 15(d) of the Exchange Act* ("SOX"). The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by EisnerAmper LLP, our independent registered public accounting firm, as stated in their report, which is included herein.

In performing our assessment, we identified the risks that most likely affect reliable financial reporting and are most likely to have a material impact on the company's consolidated financial statements, documented each business process within the risk area, determined the control points related to the business process and tested the design and effectiveness of each control. In addition to process (transactional) level controls, we evaluated entity level controls to determine if compensating controls mitigated any process level risks. Entity level controls include a broad range of non-transactional activities including account reconciliations, management review of results, the company's Code of Conduct and Audit Committee review of practices and results.

SEC Release 33-8809 defines "material weakness" as a deficiency, or a combination of deficiencies in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the registrant's financial statement will not be prevented or detected on a timely basis. SEC release 33829 defines "significant deficiency" as a deficiency, or combination of deficiencies in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting.

Changes in Internal Controls over Financial Reporting

There were no significant changes in internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

Table Of Contents**PART III****ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE****Identification of Directors and Officers**

The following table provides the names, positions, ages and principal occupations of our current directors and our executive officers.

Name and Position with The Company	Age	Director¹/Officer Since	Principal Occupation
John F. Levy	59	Non-executive Chairman since 2009, Director since 2008	CEO of Board Advisory
David A. Taft	58	Director since 2008	President, IBS Capital LLC
Mario Concha	74	Director since 2013	President, Mario Concha & Associates, LLC
Robert T. Betz	73	Director since 2014	Owner, Personal Care Ingredients
Ali Zamani	35	Director since 2014	Portfolio Manager, Gefinor Capital
Andre M. Zeitoun	42	Chief Executive Officer, President and Director since 2009	President, Chief Executive Officer and Director of Company
Nat Krishnamurti	43	Officer since 2012	Chief Financial Officer
William Gleeson	72	Officer since 2011	General Counsel

(1) The directors are elected to serve until the next annual meeting of shareholders. Officers serve at the pleasure of the Board.

Background of Directors and Officers

John F. Levy, Non-Executive Chairman and Director

Since May 2005, Mr. Levy has served as the Chief Executive Officer of Board Advisory, a consulting firm that advises public companies in the areas of corporate governance, corporate compliance, financial reporting, and financial strategies. Mr. Levy currently serves on the board of directors of three public companies including Applied Minerals. Mr. Levy has been a director of China Commercial Credit, a publicly-held Chinese micro-lender, since 2013. Mr. Levy has been a director and audit committee member of Applied Energetics, Inc. (AERG), a publicly-traded company that specializes in the development and application of high power lasers, high voltage electronics, advanced optical systems, and energy management systems technologies, since 2009. From 2006 to 2013, Mr. Levy was a director and chair of the audit committee of Gilman Ciocia, Inc. (GTAX), a publicly traded financial planning and tax preparation firm and served as lead director from 2007 to 2013. From 2010 to 2012, he served as director of Brightpoint, Inc. (CELL), a publicly-traded company that provides supply chain solutions to leading stakeholders in the wireless industry. From 2008 through 2010, he served as a director of Applied Natural Gas Fuels, Inc. (formerly PNG Ventures, Inc.). From 2006 to 2010, Mr. Levy served as a director and Audit Committee chairman of Take Two Interactive Software, Inc., a public company which is a global developer and publisher of video games best known for the Grand Theft Auto franchise. Mr. Levy served as Interim Chief Financial Officer from 2005 to 2006 for Universal Food & Beverage Company, which filed a voluntary petition under the provisions of Chapter 11 of the United States Bankruptcy Act on August 31, 2007. Mr. Levy is a frequent speaker on the roles and responsibilities of Board members and audit committee members. He has authored *The 21st Century Director: Ethical and Legal Responsibilities of Board Members; Acquisitions to Grow the Business: Structure, Due Diligence, Financing; Creating the Best Projections You Can: Insights Techniques;* and *Ethics and Sustainability: A 4-way Path to Success and Finance and Innovation: Reinvent Your Department and Your Company*. All five courses have initially been presented to various state accounting societies.

Mr. Levy is a Certified Public Accountant with nine years experience with the national public accounting firms of Ernst & Young, Laventhol & Horwath, and Grant Thornton. Mr. Levy has a B.S. degree in economics from the Wharton School of the University of Pennsylvania and received his M.B.A. from St. Joseph's University (PA).

Key attributes, experience and skills: Mr. Levy has over 30 years of progressive financial, accounting, and business experience, including having served as Chief Financial Officer of both public and private companies for over 13 years. Mr. Levy brings to the board expertise in corporate governance and compliance matters along with extensive experience gained from numerous senior executive positions with public companies. Further, Mr. Levy's service on the boards of directors of public companies in a variety of industries also allows him to bring a diverse blend of experiences to the Company's board.

David A. Taft, Director

Mr. Taft is the President of IBS Capital LLC, a private investment company based in Boston, Massachusetts, which he founded in 1990. Prior to founding IBS Capital LLC, Mr. Taft spent ten years working in corporate finance with Drexel Burnham Lambert, Winthrop Financial and Merrill Lynch. Mr. Taft is a graduate of Amherst College and Amos Tuck School of Business Administration at Dartmouth College.

Key attributes, experience and skills: Mr. Taft has over 30 years experience as a corporate investment banker and the manager of IBS Capital LLC, a private investment fund. Mr. Taft brings significant leadership, financial expertise, business development skills, and corporate restructuring experience to the Company's Board of Directors. The

investments Mr. Taft has made through his management of the IBS Turnaround Fund has, on occasion, required him to advise companies on issues such as corporate governance, capital raising, balance sheet restructuring, and general business strategy. IBS Capital LLC, under Mr. Taft's direction, has been a large shareholder of Applied Minerals, Inc. for a number of years.

Table Of Contents

Mario Concha, Director

Mr. Concha is the President of Mario Concha and Associates, LLC, a firm providing consulting services to senior executives and members of boards of directors. In addition to providing consulting services, he has served as a director of The Plaza Group, a chemical marketer; Arclin, Ltd., a manufacturer of specialty resins; and Auro Resources, Corp, a mineral exploration company with holdings in Colombia's gold region. Prior to founding Mario Concha and Associates in 2005, Mr. Concha was an officer of Georgia Pacific Corporation and president of its Chemical Division from 1998 to 2005. Prior to Georgia Pacific, Mr. Concha participated in the formation of GS Industries, a manufacturer of specialty steels for the mining industry, through a leveraged buyout of Armco Inc's Worldwide Grinding Systems Division. He then served as President of its International Division from 1992 to 1998. From 1985 to 1992, Mr. Concha was Vice President-International for Occidental Chemical Corporation. Prior to OxyChem, he served in several senior management positions at Union Carbide Corporation in the United States and overseas.

Mr. Concha is a graduate of Cornell University with a degree in Chemical Engineering. He is a member of the American Chemical Society and of the American Institute of Chemical Engineers.

Key attributes, experience and skills: Mr. Concha has over 40 years experience as a hands-on corporate executive. He has first-hand industry knowledge, gained from senior executive positions in various industries, including chemicals, plastics, forest products, metals, and mining. In addition to manufacturing operations, he has had extensive involvement in marketing, sales, and finance. Mr. Concha also brings corporate governance experience, having served on both public and private company boards.

Robert T. Betz

From 2000 through his retirement in 2002, Mr. Betz was the President of Cognis Corp., the North American division of Cognis GmbH, a \$4 billion worldwide supplier of specialty chemicals and nutritional ingredients spun off from Henkel AG & Company ("Henkel"). From 1989 through 2000, Mr. Betz held a number of management positions at Henkel including Executive VP and President of its Emery Group, a leading manufacturer of oleochemicals, and President of its Chemicals Group for North America.

From 1979 through 1989, Mr. Betz worked in a number of manufacturing and operations capacities for the Emery Division of National Distillers and Chemicals Corp., eventually rising to President of the division. Mr. Betz began his career in the specialty chemicals industry by joining Emery Industries in 1963. Between 1963 and 1979 he worked for the company as Market Development Representative, Manager of Corporate Planning, Vice President of Operations - Emery (Canada), Manager of Commercial Development, and General Manager of Business Groups. Emery Industries was sold to National Distillers and Chemicals Corp. in 1979.

Since 2003, Mr. Betz has been the owner of Personal Care Ingredients, LLC, a privately-owned marketer of natural products to the personal care industry. Mr. Betz also serves as a director for Bio-Botanica, a manufacturer of natural extracts, and The Plaza Group, a marketer of petrochemicals.

Mr. Betz holds a B.S. in Chemical Engineering and an M.B.A. from the University of Cincinnati. He's also attended the Program for Management Development at Harvard University.

Key attributes experience and skills. During Mr. Betz's career, he has been involved in developing new products or new markets for existing products. Several of these products grew into sizeable businesses. He managed multiple chemical manufacturing facilities and managed a multi-billion dollar polyethylene business. He was responsible for profit and loss for businesses with sales of \$900 million. While heading the chemical operations, he was responsible for all aspects of the business: manufacturing, sales, R&D, IT, HS&E, HR, purchasing, engineering, and legal. His career has continuously involved developing, manufacturing, and selling products directed at most of the markets that Applied Minerals is attempting to penetrate. Since his retirement, he has served on the boards of three chemical-related, private companies: Plaza, Syrgis, and Bio-Botanica and is currently the Chair of the Plaza Audit Committee.

Ali Zamani, Director

Ali Zamani has served as a Portfolio Manager at Gefinor Capital Management since February 2014 and as Chief Investment Officer of the GEF Opportunities Fund, an opportunistic, value-oriented, liquid public markets fund. Prior to Gefinor, Ali Zamani was a Principal at SLZ Capital Management, a New York-based asset management firm, from July 2012 to December 2013. Prior thereto, he was a Portfolio Manager at Goldman Sachs from 2004 to 2012 where he focused on the energy, materials, utilities and industrials sectors. From 2002 to 2004, Mr. Zamani was a mergers and acquisitions analyst at Dresdner Kleinwort Wasserstein, a boutique New York-based investment bank focused on the energy and utilities sectors.

Mr. Zamani holds a B.S. in Economics from the Wharton School at the University of Pennsylvania, where he graduated magna cum laude.

Key attributes, experience and skills: Mr. Zamani has over 13 years of financial industry experience, including 8 years as a senior investment professional at Goldman Sachs & Co. Mr. Zamani brings significant capital markets expertise, including extensive mining and industrial sector investing experience. Additionally, Mr. Zamani brings a unique shareholder/investor perspective to the board having been a major shareholder in numerous similar companies over his career.

Andre M. Zeitoun, Chief Executive Officer, President, Director

Mr. Zeitoun is President and CEO and has served in those positions since January 1, 2009.

Table Of Contents

Mr. Zeitoun was a Portfolio Manager at SAC Capital/CR Intrinsic Investors from March 2007 through December 2008. At SAC, he led a team of six professionals and managed a several hundred million dollar investment portfolio focused on companies that required a balance sheet recapitalization and/or operational turnaround. Many of these investments required Mr. Zeitoun to take an active role in the turnaround process. From 2003 to 2006, Mr. Zeitoun headed the Special Situations Group at RBC Dain Rauscher as a Senior Vice President and head of the division. He managed all group matters related to sales, trading, research and the investment of the firm's proprietary capital. From 1999 to 2003 Mr. Zeitoun was a Senior Vice President at Solomon Smith Barney. In this role, Mr. Zeitoun led a Special Situations sales trading research team serving middle market institutions. Mr. Zeitoun is a graduate of Canisius College.

Key attributes, experience and skills: Mr. Zeitoun has over 15 years experience identifying, allocating capital to, and taking an active role in corporate situations requiring a balance sheet recapitalization and/or operational restructuring. Since January 2009, Mr. Zeitoun has spearheaded effort to stabilize the Company's balance sheet, raise critically needed capital, engage industry-leading consultants to quantify and characterize the Company's Dragon Mine resource, increase processing capabilities, establish a marketing infrastructure, and lead the marketing effort. During his time as President and Chief Executive Officer of Applied Minerals, Inc., Mr. Zeitoun has developed a level of expertise in the area of the commercialization of halloysite and iron oxide applications.

Nat Krishnamurti, Chief Financial Officer

Mr. Krishnamurti is a CPA with two decades of experience as a financial management and audit professional. He was previously employed by inVentiv Health, Inc. ("inVentiv"), a provider of clinical, communications, and commercial services to the global pharmaceutical, life sciences, and biotechnology industries. inVentiv was a publicly traded company until acquired by Thomas H. Lee Partners, LP in August 2010. During his 11-year tenure at inVentiv, Mr. Krishnamurti served in various management roles, including Chief Accounting Officer. Prior to inVentiv, Mr. Krishnamurti worked in public accounting firms, including PriceWaterhouseCoopers, LLP and Feldman Sherb Erlich & Co., PC. While at PriceWaterhouseCoopers, LLP he focused on consumer and industrial products clients, which included mining companies.

William Gleeson, General Counsel

Prior to joining the Company, Mr. Gleeson was a partner at K&L Gates, LLP for eleven years, focusing on various areas of corporate and securities law. From January, 2008 until September, 2011 when he joined the Company, he served as Applied Minerals, Inc.'s outside counsel, a time during which he acquired an in-depth understanding of the Company's business. Mr. Gleeson received his J.D. from the University of Michigan, from which he also received his undergraduate degree.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires our officers, directors, and any person who beneficially owns more than 10% of our common stock to file reports of ownership and changes in ownership with the Securities and Exchange Commission. Executive officers, directors, and more than 10% shareholders are required by regulation to furnish us with copies of all Section 16(a) forms which they file. To the best of our knowledge, except for one filing for Mario Concha and one filing by IBS Capital, LLC, all filings were made timely in 2014.

Code of Ethics

We have adopted a Code of Conduct and Ethics for our Chief Executive Officer and our senior financial officers. A copy of our Code of Conduct and Ethics is posted on our website at www.appliedminerals.com and can be obtained at no cost by mail at: Applied Minerals, Inc., 110 Greene Street, Suite 1101, New York, New York, 10012. We believe our Code of Conduct and Ethics is reasonably designed to deter wrongdoing and promote honest and ethical conduct; provide full, fair, accurate, timely, and understandable disclosure in public reports; comply with applicable laws; ensure prompt internal reporting of code violations; and provide accountability for adherence to the code.

Board Meetings

There were eight meetings of the Board of Directors held in 2014. Every director attended all board meetings and also attended all committee meetings of which that director was a member. It is the policy of the Board that all Board members attend the annual meeting of shareholders, if possible.

Committees of the Board

The following sets forth the Committees of the Board and membership of the committees. The charters of the committees are available at the Company's website, appliedminerals.com. The Board of Directors has determined that all committee members are independent under the independence definition used by NASDAQ.

	Audit Committee	Nominating Committee	Compensation Committee
John Levy	X	X	X
Mario Concha	X	X	X
Robert Betz		X	X
Ali Zamani	X		

In 2014, the Audit Committee and the Compensation Committee each met four times. The Nominating Committee met once.

Table Of Contents

Audit Committee Financial Expert

The Board of Directors has determined that Mr. Levy is an audit committee financial expert as this term is defined in the rules of the Securities and Exchange Commission and is independent under the independence standards of Nasdaq and the enhanced independence standards of Section 10A-3 of the Securities Exchange Act.

Audit Committee Report

The audit committee has reviewed and discussed the audited financial statements included elsewhere in this Annual Report with management;

The audit committee has discussed with the independent auditors the matters required to be discussed by the Auditing Standards AU Section 380 – The Auditor’s Communication with those charged with Governance as adopted by the Public Company Accounting Oversight Board in Rule 3200T;

The audit committee has received the written disclosures and the letter from the independent accountant required by applicable requirements of the Public Company Accounting Oversight Board regarding the independent accountant's communications with the audit committee concerning independence and has discussed with the independent accountant the independent accountant's independence; and

Based on the review and discussions referred to in three preceding paragraphs, the audit committee recommended to the board of directors that the audited financial statements be included in the Company's annual report on Form 10-K (17 CFR 249.310) for the last fiscal year for filing with the Commission.

Audit Committee

John Levy, Chairman

Mario Concha

Ali Zamani

The Nomination Process

The general criteria that our Board uses to select nominees includes the following: reputation for integrity, honesty and adherence to high ethical standards; demonstrated business acumen, experience, and ability to exercise sound judgments in matters that relate to the current and long-term objectives of the Company; willingness and ability to contribute positively to the decision-making process of the Company; commitment to understand the Company and its industry and to regularly attend and participate in meetings of the Board and its committees; interest and ability to understand the sometimes conflicting interests of the various constituencies of the Company, which include stockholders, employees, customers, creditors and the general public; ability to act in the interests of all stakeholders; and absence of, and the absence of, and the absence of any appearance of, a conflict of interest that would impair the nominee's ability to represent the interests of all of the Company's stockholders and to fulfill the responsibilities of a director. There are, however, no specific minimum qualifications that nominees must have in order to be selected. The Board will consider director candidates recommended by our stockholders. In evaluating candidates recommended by our stockholders, the Board of Directors applies the same criteria discussed above. Any stockholder recommendations for director nominees proposed for consideration by the Board should include the nominee's name and qualifications for Board membership and should be addressed in writing to the President, Applied Minerals, Inc., 110 Greene St., Suite 1101, NY, NY 10012. There have been no changes in the procedures by which shareholders may recommend candidates for director.

Compensation Committee

The Board of Directors established a Compensation Committee and adopted a committee charter in November, 2013. The Committee is to meet at least twice a year. The Committee charter states that the committee will have the resources and authority necessary to discharge its duties and responsibilities and the committee has sole authority to retain and terminate outside counsel, compensation consultants, or other experts or consultants, as it deems appropriate, including sole authority to approve the fees and other retention terms for such persons.

The principal responsibilities of the Compensation Committee are as follows:

1. Board Compensation. Periodically review the compensation paid to non-employee directors and make recommendations to the Board for any adjustments.

2. Chief Executive Officer Compensation.
 - a. Conduct an annual CEO evaluation
 - b. Assist the Board in establishing CEO annual goals and objectives, if appropriate.
 - c. Recommend CEO compensation to the other independent members of the Board for approval.

The CEO may not be present during deliberations or voting concerning the CEO's compensation.

3. Other Executive Officer Compensation.

- a. Oversee an evaluation of the performance of the Company's executive officers and approve the annual compensation, including salary and incentive compensation, for the executive officers.
Review the structure and competitiveness of the Company's executive officer compensation programs considering
- b. the following factors: (i) the attraction and retention of executive officers; (ii) the motivation of executive officers to achieve the Company's business objectives; and (iii) the alignment of the interests of executive officers with the long-term interests of the Company's shareholders.
- c. Review and approve compensation arrangements for new executive officers and termination arrangements for executive officers.

Table Of Contents

The Compensation Committee may form and delegate authority to subcommittees and may delegate authority to one or more designated members of the Committee. The Committee may delegate to the Chief Executive Officer the authority to make grants of equity-based compensation in the form of rights or options to eligible officers and employees who are not executive officers, such authority including the power to (i) designate officers and employees of the Company or of any of its subsidiaries to be recipients of such rights or options created by the Company, and (ii) determine the number of such rights or options to be received by such officers and employees; provided, however, that the resolution so authorizing the Chief Executive Officer shall specify the total number of rights or options the Chief Executive Officer may so award. If such authority is delegated, the Chief Executive Officer shall regularly report to the Committee grants so made and the Committee may revoke any delegation of authority at any time. The Compensation Committee has not delegated any authority to the Chief Executive Officer.

Compensation Committee Interlocks and Insider Participation

Mr. Zeitoun participated in deliberations of the board of directors concerning executive officer compensation other than his own.

There were no interlocks during 2014.

Shareholder Communications to the Board of Directors

Stockholders may communicate with the Board of Directors by sending a letter to Applied Minerals, Inc. Board of Directors, c/o President & CEO, 110 Greene Street, Suite 1101, New York, New York, 10012. The President will receive the correspondence and forward it to the individual director or directors to whom the communication is directed or to all directors, if not directed to one or more specifically.

Pursuant to SEC rules, the amounts shown exclude the impact of estimated forfeitures related to service-based vesting conditions. For additional information, refer to Note 10 to the Notes to Consolidated Financial Statements (1) found in Item 8, Part II of this document. These amounts reflect the Company's accounting expense for these awards, and do not correspond to the actual value that will be recognized by the named executive officers. The options awards granted were valued using the Black Scholes Option Valuation Model.

(2) Mr. Zeitoun's salary and option award for 2012 and \$450,000 of his 2012 bonus are his allocable share of the compensation paid to Material Advisors, LLC, of which he is a member. An additional \$400,000 bonus was awarded directly to Mr. Zeitoun in November, 2011 for services in 2012. See Compensation Analysis & Discussion for further information.

(4) Mr. Krishnamurti was appointed Chief Financial Officer on May 17, 2012. Other Compensation consists of a car allowance.

Pensions

The Company does not have any pension plan nor does it have any nonqualified defined contribution and other nonqualified deferred compensation plans.

Potential payments upon termination or change-in-control.

In the event Mr. Zeitoun is terminated without Cause or terminates for Good Reason, he will receive, in addition to the accrued obligations, (i) six months of base salary (that is, \$300,000), (ii) one-half of bonus amounts not yet earned, and (iii) an amount equal to six months of COBRA payments. For 2015, Mr. Zeitoun's base salary is \$600,000 and he is eligible to receive a bonus of up to \$400,000 upon achievement of predetermined performance goals.

Table Of Contents

Mr. Gleeson. In the event Mr. Gleeson terminated by the Company without Cause or he terminates his employment for Good Reason, he shall receive not less than two months of his base salary and (ii) continuation of benefits (including his family) on the same terms as in effect immediately prior to the date of termination for a period of two months. Mr. Gleeson's base salary is \$300,000.

Mr. Krishnamurti. In the event is terminated by the Company without Cause or he terminates his employment for Good Reason, Mr. Krishnamurti shall receive, in addition to the accrued obligations, immediate vesting in (i.e., exercisability for) such number of unvested shares (including any option shares, option shares of restricted stock) under any equity grants that would otherwise be vested as of the next anniversary date of his employment if his employment had continued through the next anniversary date.

Table Of Contents

The following table lists the plan-based awards granted under the Long-Term Incentive Plan to Named Executive Officers in 2014:

Grants of Plan-Based Awards

Name	Grant date	All other option awards: Number of securities underlying options (#)	Exercise or base price of option awards (\$/Share)	Grant date fair value of stock and option awards (\$)
Nat Krishnamurti, CFO (1)	06-10-2014	75,000	0.84	31,055
William Gleeson (1)	06-10-2014	600,000	0.84	270,486

(1) Options were granted to Mr. Krishnamurti and Mr. Gleeson in June of 2014 under the Company's Long-Term Incentive Plan, which was approved by shareholders in November, 2012.

Table Of Contents**Outstanding Equity Awards at December 31, 2014**

Beginning November 20, 2012, all awards were made under the Company's Long Term Incentive Plan approved by stockholders on November 20, 2012.

Director Compensation for the Year Ended December 31, 2014

The following sets forth compensation to the persons who served as directors in 2014. Every member of the Board can elect to receive any combination of cash and/or common stock for director compensation

Name	Fees Earned or Paid in Cash	Common Stock Awards	Options Awards (1)	Total (\$)
John Levy (1)	\$70,000	\$--	\$21,288	\$91,288
David Taft (2)	\$71,288	\$--	\$--	\$71,288
Mario Concha (1)	\$58,750	\$--	\$21,288	\$80,038
Robert Betz (1) (3)	\$38,733	\$16,600	\$21,288	\$76,621
Ali Zamani (1) (4)	\$--	\$45,278	\$21,288	\$66,566
Andre Zeitoun	\$--	\$--	\$--	\$--

On March 14, 2014, as part of the annual grant process, each member of the Board, except for Mr. Taft and Mr. (1)Zeitoun, was granted 50,000 options to purchase common shares with a strike price of \$0.83, vesting quarterly starting on March 31, 2014 and ending on December 31, 2014.

(2) In lieu of the annual 50,000 option grant described above to other Board members, Mr. Taft received \$21,288 of cash compensation, which was the Black Scholes value of the option grant.

(3) Mr. Betz joined the Board on January 29, 2014.

(4) Mr. Zamani joined the Board on February 4, 2014.

Compensation analysis and discussion

Objectives and Strategy

The Company's objectives are to develop a range of commercial applications for its halloysite clay and to market those applications to industries seeking enhanced product functionality and to market its iron oxides for pigment and other uses. We believe the successful marketing of such applications will generate material profits for the Company, which, in turn, will create significant value for its stockholders. To realize this objective, the Company must attract and retain individuals, including our Named Executive Officers ("*Named Executive Officers*" or "*NEOs*"), who possess the skill sets and experience needed to effectively develop and implement the business strategies and corporate governance infrastructure necessary to achieve commercial success.

Accordingly, compensation for the Named Executive Officers is designed to:

Attract, motivate, and retain qualified Named Executive Officers;

Incentivize the Named Executive Officers to lead the Company to profitable operations and to increase stockholder value;

Assure that over time a significant part of NEO compensation is linked to the Company's long-term stock price performance, which aligns the Named Executive Officers' financial interests with those of the Company's stockholders

Motivate the Named Executive Officers to develop long-term careers at the Company and contribute to its future prospects; and

Permit the Named Executive Officers to remain focused on the development of the Company's business in the midst of actual or potential change-in-control transactions.

The Company does not have a policy concerning minimum ownership or hedging by officers of Company securities.

Compensation of Mr. Zeitoun

Mr. Zeitoun has been president and CEO of the Company since 2009.

Management Agreements with Material Advisors

From 2009-2012, the Company was managed pursuant to management agreements with a limited liability company, Material Advisors LLC (“*Material Advisors*”), organized solely for the purpose of supplying senior management services to the Company. Material Advisors was required to provide to the Company three senior managers who were the sole members of Material Advisors. One of these individuals was Mr. Zeitoun. The three members of Material Advisors insisted that the Company engage them indirectly through the entity Material Advisors because the members believed that Material Advisors would provide them an added layer of protection when in 2009 they assumed the management responsibilities of a company that faced a challenging liquidity situation, an SEC investigation, and a stockholder class action lawsuit.

Table Of Contents

Allocations by Material Advisors

Material Advisors, in its sole discretion, allocated amounts of the compensation it received from the Company to its three members. Material Advisors was under no obligation to tell the Company how allocations were made to its three members and, until January, 2012, the Company did not know such allocations. With the exception of the bonus granted to Mr. Zeitoun in November, 2012 for 2012 performance (granted to him directly and not to Material Advisors), the members used Material Advisors as a means of bargaining as a group and they made allocations of cash and stock options by agreement among themselves. The Board's inability to control allocations effectively took the issue of internal pay equity out of the hands of the Board.

2012 Compensation

In February, 2011, the Company desired to lock in an agreement for the future services of Material Advisors in order to assure continuity of management. At the same time, Material Advisors was anxious to resolve any uncertainty about its future role with the Company. Both sides agreed that it would be appropriate and more efficient to model, with appropriate changes, the 2012 compensation package on the 2009 Management Agreement, which covered the years 2009-2011.

Under the 2009 Management Agreement, the cash compensation to Material Advisors in 2011 was \$1 million per year. From that amount, Material Advisors was required to pay certain of the Company's 2011 expenses (marketing, office rent, travel, and entertainment, among others) ("*Company Expenses*") amounting to \$478,000. The Board did not know the amount of these expenditures until January, 2012. Material Advisors allocated the cash compensation it received from the Company (after payment of Company Expenses) to its members. In 2011, Mr. Zeitoun was allocated \$282,000. Under the 2009 Management Agreement, Material Advisors was granted options to purchase 10% of the total outstanding shares of Common Stock determined as of January 1, 2009, on a fully diluted basis (including the shares subject to the grant of options to Material Advisors). The option vested over a three-year period. The options were granted with an exercise price that was well out of the money.

In February 2011, the Board agreed to a management agreement with Material Advisors for the year 2012 ("*2012 Management Agreement*"). The 2012 Management Agreement provided for cash compensation of \$1 million. The \$1 million for 2012 was the same annual cash compensation as was paid in the 2009-2011 period. The 2012 Management Agreement required Material Advisors to pay Company Expenses (just as Material Advisors had done under the 2009 Management Agreement), but Material Advisors was subsequently relieved of the responsibility, as described below.

The 2012 Management Agreement also provided for the grant of an option to acquire 2,907,653 shares of the Company's Common Stock to Material Advisors. Mr. Zeitoun was allocated 1,742,792 options. The Black-Scholes value of the options allocated to Mr. Zeitoun was \$1,181,637 on the grant date. The per share exercise price was the current market price on the date of grant (\$0.83 per share). The number of shares subject to the grant to Material

Advisors was equivalent to 3.5% of the number of fully diluted outstanding shares of Common stock on the date of grant (including the grant under the 2009 Management Agreement but not the grant under the 2012 Management Agreement). The February, 2011 option grant was priced at-the-money as compared to the significantly out-of-the-money option granted in 2009 Agreement. Given the Company's operational progress and its improved financial status that was produced by management's efforts, the Board and Material Advisors agreed there would be no reason to grant a deep out-of-the-money option to Material Advisors in order for Material Advisors to demonstrate its commitment to the Company (as it had in connection with the 2009 Management Agreement).

In considering the number of options to be granted, the Board focused primarily on the number of options as a percentage of the fully diluted shares as opposed to the Black-Scholes value.

Table Of Contents

In February 2011, the Board did not know how Material Advisors allocated cash and stock options to its members or the amount of Company Expenses borne by Material Advisors.

Although significant progress had been made by Material Advisors in resolving some of the many problems facing the Company, benchmarking compensation against peers continued to appear inappropriate because of the difficulties in finding not only other companies managed under an agreement to supply senior executives to the Company but also other companies facing the same or a similar array of problems.

Although management had significantly resolved many of the legacy issues that had burdened the Company, it was still a pre-revenue operation focused on creating products that were to be sold into new markets. As such, establishing specific performance goals and associated timelines to evaluate management was deemed not to be feasible. Accordingly, the compensation package did not link compensation, including vesting of stock options, to the achievement of predetermined performance goals.

The Board believed that the compensation package was designed to reward short-term performance and to encourage employee retention through the salary portion of the compensation package and to reward long-term performance and sustained growth in stock price through the significant amount of shares of Common Stock available for purchase under the options granted to Material Advisors. Nevertheless, the cash portion was considered inadequate for the efforts and skill that the three members of Material Advisors would bring to the task.

In January, 2012, the Board learned for the first time the amounts of Company Expenses that Material Advisors had been responsible for in 2009-2011 and the allocations that had been made by Material Advisors to its members. It also learned that an amount of the 2012 compensation to Material Advisors would be allocated 60% to Mr. Zeitoun.

In December, 2011, the Company had raised \$10 million through the sale of Common Stock and warrants, without the use of an investment banker, in a complex transaction designed to limit dilution. Thereafter, the Board believed that for the first time there were sufficient funds to reward Material Advisors appropriately for its past efforts. In January, 2012, a bonus of \$750,000 in respect of outstanding performance in the 2009-2011 period was awarded to Material Advisors. The size of the cash bonus granted in January, 2012 was determined, in large part, on the amount of money Material Advisors saved the Company through (i) the assumption of the CFO position, thereby saving the Company the expense of having to hire and compensate a CFO not affiliated with Material Advisors and (ii) the fees the Company avoided paying as a result of the members of Material Advisors raising approximately \$21.6 million of capital for the Company without the aid of an agent or broker. The bonus was discretionary and was not based on the achievement of any pre-determined performance standards. Of the \$750,000 bonus, 60% was allocated to Mr. Zeitoun (\$450,000).

After negotiations with Mr. Zeitoun on behalf of Material Advisors, the Board agreed that it was appropriate to relieve Material Advisors of its obligation to continue to pay Company Expenses (which are noted above). Relieving Material Advisors of this obligation had the effect of increasing the amount of cash distributable in 2012 by Material Advisors to its three members from approximately \$550,000 (based on 2009-2011 experience) to \$1 million.

In making these compensation decisions, the Board took into account the substantial progress that the Company had made during the 2009-2011 period, the fact that the market price of the Common Stock had increased 500% during the period of the 2009 Management Agreement, and the Company's improved financial condition (having raised \$10 million in December 2011 through the sale of stock and warrants). The Board believed that it was important to make up for what had seemed to be inadequate past compensation in order to further motivate the members of Material Advisors to perform services for the Company in the future. For largely the same reasons as noted above in connection with compensation decisions in February, 2011, the Board did not believe that use of a compensation consultant or benchmarking or tying any part of cash compensation to the achievement of performance goals was appropriate.

Table Of Contents

On November 20, 2012, the Board and Material Advisors decided that the Company would deal with the three members of Material Advisors individually and, beginning in 2013, would not engage them through Material Advisors.

On November 20, 2012, the Board determined to grant Mr. Zeitoun a \$400,000 cash bonus for exceptional 2012 performance, payable in the first week of 2013. The Board believed that the additional cash bonus was an appropriate means of motivating and retaining Mr. Zeitoun. The bonus was discretionary and was not based on the achievement of any pre-determined performance standards. On Mr. Zeitoun's recommendation, no bonuses for 2012 were awarded to the other members of Material Advisors.

In February 2011, the Board believed that the structure of the compensation package was heavily weighted toward "pay-for-performance" in that the options incentivized the members of Material Advisors to manage the Company in a manner such that the market price of the Common Stock would increase. The Board did not believe that either (i) actions in January, 2012 (the bonus to Material Advisors 2012 and the relief from paying Company Expenses) or (ii) the bonus to Mr. Zeitoun awarded in November, 2012 undermined the essential incentive structure of the compensation package because such a significant percentage of his future compensation was represented by his option grants. The Board believed that actions discussed above did bring the cash component more in line with the contribution and efforts of management.

2013 Compensation

On November 20, 2012, the Board agreed to compensate the three members of Material Advisors directly beginning with calendar year 2013 and determined the 2013 compensation for such persons. The 2013 cash compensation for Mr. Zeitoun would be \$600,000. Options to purchase 1,742,581 shares of Common Stock were granted to Mr. Zeitoun (with a Black-Scholes value of \$2,408,539). The options vested over the period of the employment agreement (2013), vesting on the first day of the month following a month of the employment agreement beginning February 1, 2013 with the last vesting on January 1, 2014. The options have an exercise price equal to market price of the Common Stock on the date of grant (\$0.83). The Board also agreed that Mr. Zeitoun would be eligible for a target bonus for 2013 of \$400,000 but that the amount could be more or less depending on Mr. Zeitoun's 2013 performance. The criteria for determining performance would be decided at the time the Board made a decision as to whether to award a bonus. These criteria could include quantitative and qualitative considerations such as sales, entering to arrangements with joint ventures and similar "reach through" arrangements, increases in market capitalization, development of corporate staff, management of plant expansions.

To assist in determining 2013 compensation for Mr. Zeitoun, the Compensation Committee sought advice from a compensation consultant from Hay Associates.

The compensation consultant used market data in his analysis that was drawn from the following sources: public peer group in the mining and metals sector (13 companies; Comstock Mining Inc., General Moly Inc., Gold Reserve Inc., Golden Minerals Co., Midway Gold Corp, Mines Management Inc, Paramount Gold and Silver, Prospect Global Resources, Rare Element Resources Ltd , Revett Minerals Inc. Ruby Creek Resources Inc., Searchlight Minerals Corp, and Vista Gold Corp) and specialty chemical sector (7 companies; Monarch Cement Co, Northern Tech Intl, ADA-ES Inc, Chase Corp, Material Sciences Corp, Senonyx Corp, and Zoltek Cos Inc); the 2012 Hay Group Global Mining Compensation Review for pay-mix purposes; and a sample of companies recently completing an initial public offering as set forth in the Hay Group IPO Reporter (Matador Resources Company, Bonanza Creek Energy, Inc., Carbonite, Inc, C&J Energy, SunCoke Energy, KiOR, Compressco Partners, L.P., Solazyme, Inc., Energy Partners LP, International Corp., Kinder Morgan, Inc., Gevo, Inc., Primo Water Corporation, Amyris, Inc., Molycorp, Inc., Oasis Petroleum LLC, Aluminum Holding Corporation, Douglas Dynamics, Inc., Global Geophysical Services, Inc., Metals USA Holdings Corp., Graham Packaging Company Inc., Cellu Tissue Holdings, Inc.) The consultant stated that the analysis focused on annual compensation mix and levels relative to market as well as CEO equity ownership relative to other companies recently completing an initial public offering. The basis for selecting peer group companies consisted of the following factors: assets, market capitalization, nature of the business, the talent market, complexity, and the market share.

Table Of Contents

Compared to the peer group companies in the mining sector as well as the specialty chemicals sector and the IPO Reporter sample, the Board determined that Mr. Zeitoun's 2012 compensation was above the 75th percentile. It also determined that Mr. Zeitoun's 2012 pay mix (as among salary, bonus, and options) was generally well aligned with the pay mixes in the samples noted above.

The consultant stated that there is no perfect model for determining what the appropriate compensation for a CEO should be. He said that the Compensation Committee would have to review the data presented in his report and use its business judgment to create a package that would be motivational to the CEO and also retain him, as the Board believed that the CEO is key to the success of the business. The compensation consultant also said that while the Company's CEO position may have a certain "market value," it is imperative that the Committee should also consider the contribution and value that Mr. Zeitoun brings to the position and, in particular, the facts that (i) Mr. Zeitoun had raised substantial sums of money without the Company having to use investment bankers thereby saving substantial commissions, (ii) Mr. Zeitoun is leading the Company's technology development to further commercialize its products, and (iii) Mr. Zeitoun was serving multiple roles (CEO and COO).

Members of the Board noted differences between the Company and many of the mining companies in the peer group. In particular, many of the peer group companies were gold companies. They noted that entities involved in the gold-mining business are not engaged in businesses that have anywhere near the complexity of the Company's business. In particular, the Board noted that gold companies have a product with a ready market; thus, they do not have to develop a market, as the Company must do for halloysite. The Board also noted that the stockholder return under Mr. Zeitoun's leadership and, in particular, the Company's market capitalization, had increased from \$10 million to \$150 million under Mr. Zeitoun's leadership. Mr. Zeitoun indicated that he believed that for peer-group comparison purposes, the Company was more like a developmental pharmaceutical company. Other members of the Board also agreed that the Company was more like developmental pharmaceutical, biotech and software companies.

2014 Compensation

Compensation Consultant. In November, 2013, the Compensation Committee retained Compensation Resources, Inc. ("CRI"), a compensation consultant located in Upper Saddle River, New Jersey, as a compensation consultant regarding the 2014 compensation of Andre Zeitoun, the President and CEO of the Company.

Interactions of CRI with the Compensation Committee and the Board. Representatives of CRI attended meetings of the Board and/or the Compensation Committee in December, 2013 and February and March, 2014, met (telephonically or in person) with members of the Compensation Committee on four occasions, met with Mr. Zeitoun twice, and met with the Company's General Counsel (in his capacity of as agent for the Compensation Committee in due diligence matters) four times.

Summary of CRI's Report to the Compensation Committee. CRI's "Executive Compensation Study: Report of Findings" was delivered to the Compensation Committee and the Board in March, 2014. Below is a summary of the report.

65

Table Of Contents

While the company has previously been identified as a mining company, its operations are much more diversified than what would be considered as typical mining activities. The Company engages in significant research and development activities that are aimed at producing uses for its products with broader applications and thus considers itself more of a specialty chemical company rather than a traditional mining company. Based on the nature of the halloysite clay and its "exclusivity," the Company believes itself more closely aligned with the pharmaceutical industry, which itself has significant research and development activities associated with the development and marketing of proprietary pharmaceuticals. Given that the nature of the Company's business, and the talent needed to expand the business and make it successful, extends into various industry sectors. CRI considered the nature of Applied Minerals' operations in the identification of a relevant peer group for purposes of executive compensation benchmarking.

The process of selecting a group of related peers was based on the nature of the Company's operations and future strategic direction. The selection was based on the following parameters:

Industry -- comparable industry sectors, from a business perspective, as well as other industries that cultivate a similar level of talent and ability. CRI identified companies within the following industry sectors: specialty chemical manufacturing ; biotech and pharmaceuticals; software; mining ; and environmental/sustainable.

Geographic location -- based on national averages, but in this case, however, CRI applied a geographic differential to the peer data to account for differences in the cost of living between the geographic locations of the peer companies and that of Applied Minerals, which is located in an area with a high cost of living (New York City);

Market Cap -- Guidelines set forth by ISS indicate that the generally accepted approach is to identify companies that are approximately 0.2x to 5.0x of the Market Cap of the target company being analyzed. CRI utilized Applied Minerals' Market Cap of approximately \$100 million; this would place the Market Cap range of peer companies between \$20 million and \$500 million. Market Cap, rather than revenue, was utilized as the financial metric for peer selection, as the Company is considered more of a startup with very limited revenue. CRI reviewed the list of peer group companies with the Compensation Committee, the CEO, and the General Counsel, and the list was further refined to reflect more closely a group of companies that would be considered competitors for similar talent.

The peer group consisted of the following companies: Accelrys Inc., American Pacific Corp., Amyris, Inc. Amicus Therapeutics Inc., Authentidate Holding Corp., Biodelivery Sciences, Cytokinetics Inc. International Inc., Energy Recovery, Inc., General Moly Inc., Hemispherx Biopharma Inc., Kior Inc., Metabolix Inc., Pmfg Inc., Pozen Inc., Simulations Plus Inc., Streamline Health Solutions Inc., U S Lime & Minerals, and United-Guardian Inc.

This compensation study analyzed the position of CEO of the Company, comparing it against other top executives within the identified peer marketplace. Based on the discussion of peer selection above, CRI concluded that the larger context of Mr. Zeitoun's responsibilities, based on his knowledge and ability to translate his ideas into creative uses for the Company's products, validated the use of a broader industry view of competitive compensation. CRI found that (I) Mr. Zeitoun's commitment to the Company's success was evidenced through his ability to gain financing for the Company through his personal connections, which enabled him to secure \$10 million of capital in 2013 and (ii) Mr. Zeitoun also had become totally conversant in the chemical properties of the clay and its potential commercial applications, and realized the value of its iron oxide deposits and thus developed a new business for this product over the prior two years. CRI indicated that the Company was then at a transition point, where its operations had to move from "process" to "results"; therefore, the CEO's compensation package needed to be structure in a way that recognized the competitive marketplace, with sufficient financial motivation to reward the CEO to move forward with the Company's strategic direction.

Table Of Contents

CRI presented its findings with respect to the competitive marketplace for the components of Base Salary and Total Cash Compensation (Base Salary and Annual Bonus/Incentive), along with the value of Total Direct Compensation (Total Cash Compensation, the value of equity, and any other compensation). It said that compensation theory suggests that a Market Range of Compensation around the Market Consensus, rather than a fixed number, is appropriate. CRI said that typically, the Market Range of Base Salary is conservatively considered to be $\pm 10\%$ of the Market Consensus, while the range for Total Cash Compensation varies by $\pm 20\%$ of the Market Consensus, while the range for Total Direct Compensation is wider and usually varies by $\pm 25\%$ of the Market Consensus. Therefore, CRI's comparative analysis of actual compensation to the marketplace was based on the identified Market Range for the indicated component.

For Mr. Zeitoun's actual compensation, CRI represented the following figures: Base Salary of \$600,000, equivalent to his 2013 fixed compensation; Total Cash Compensation which includes Base Salary of \$600,000 plus an annual target incentive opportunity of 100% of Base Salary, or \$600,000, for a total of \$1,200,000; and Total Direct Compensation, which typically includes Base Salary and Total Cash Compensation, plus the three year average of equity compensation, in order to conduct a preliminary comparative analysis with the market findings. However, the Compensation Committee indicated to CRI that (i) the most recent equity grant was specifically provided to Mr. Zeitoun as a one-time award, with the clear understanding that future at-risk compensation will be in the form of short-term incentives; (ii) the short-term incentive opportunity is intended to drive performance towards the Company's most immediate goals of revenue generation and is commensurate with the Compensation Committee's short-term incentive target and (iii) over the next two to three years, it is anticipated that additional equity will not be provided; therefore, CRI's analysis did not include or provide for any long-term compensation. In this connection, it was noted that the beneficial stock ownership for the majority of the CEO among the peer companies ranged between 1.10% and 6.80% (excluding the outliers which are 13.7% to 38.03%). Mr. Zeitoun's beneficial ownership is 8.6%.

CRI noted that at market average (50% percentile) without equity compensation, Mr. Zeitoun's represented Base Salary and Total Cash Compensation were above the Market Range and the Total Direct Compensation was within the Market Range, but that at the 75% percentile without equity compensation, Mr. Zeitoun's represented Base Salary and Total Cash Compensation were within the Market Range and the Total Direct Compensation was below the Market Range.

CRI noted that the methodology used to conduct the competitive market analysis was based on the typical duties and responsibilities associated with the top executive position within the competitive marketplace, and the comparative analysis did not take into consideration the incumbent or any factors relating to that incumbent. CRI noted, however, that it was at the Compensation Committee's discretion to consider Mr. Zeitoun in determining whether his value to the Company was considerable and therefore would justify a higher level of compensation as compared to the marketplace. CRI said that in some cases, a premium can be applied to the market findings to reflect on the incumbent's knowledge, expertise, and contributions (both past and anticipated in the future), and therefore would reflect on a higher percentile positioning due to these factors. CRI noted that in discussions with the Compensation Committee, the Committee believed that it had a significant level of confidence in Mr. Zeitoun's abilities to drive the Company. CRI noted that based on multiple in-depth discussions with the Compensation Committee and their strong belief that Mr. Zeitoun is a crucial and extremely valuable asset to the Company, CRI presented both the Market

Average and 75th percentile calculations so that the Compensation Committee would have a broader perspective of the marketplace for pay in consideration of the peer group examined herein.

Compensation Committee Actions. The Compensation Committee met four times regarding Mr. Zeitoun's compensation and the Board met three times. At its meeting on June 9, 2014, the Compensation Committee determined to recommend to the Board that

Mr. Zeitoun's salary for 2014 would be \$600,000, which was the same salary as in 2013 and was justified by Mr. Zeitoun's exceptional knowledge and accomplishments.

Table Of Contents

Mr. Zeitoun's annual target incentive for 2014 would be \$400,000 rather than \$600,000 (as represented in CRI's report) and that this would bring the Total Direct Compensation at Market Average (no equity) within the Market Range and Total Cash Compensation at the 75th percentile would still be within the Market Range, but would be below the Market Consensus. The Compensation Committee further determined that the bonus would be payable in cash in two tranches: (i) \$200,000 payable if there were a commercial sale of iron oxide in 2014 and (ii) \$200,000 payable if one of the following three were accomplished in 2014: cumulative revenue (accrued or realized) and/or backlog of \$1 million; sale of all or a substantial portion of Idaho properties; raising at least \$2 million of capital by sale of equity and/or sale of PIK Notes;

Mr. Zeitoun would not be awarded any equity compensation for 2014 because he already beneficially owned (through direct ownership and options) 8.6% of the equity of the Company and that ownership provide him with sufficient long-term incentive.

On the same day, the Board adopted the recommendations of the Compensation Committee.

In December, 2014, the Nominating and Governance Committee determined that Mr. Zeitoun had satisfied the conditions of both tranches for payment of the bonus and recommended that the Board approve payment of the bonus. Thereafter, the Board approved payment of a \$400,000 bonus.

Compensation of Mr. Gleeson

William Gleeson, the General Counsel, was hired as of September 15, 2011. Mr. Gleeson's three-year employment agreement provides for annual cash compensation of \$200,000 plus a 10-year option to purchase up to 900,000 shares of Common Stock at an exercise price of \$1.90 per share, which was above the \$1.74 market price on the date of grant, September 15, 2011. The Black-Scholes value of the options was \$1,370,340 on the date of grant. The options vested in 36 monthly installments beginning September 15, 2011. Mr. Gleeson's employment may be terminated at will. The Company did not use a compensation consultant in connection with the employment agreement.

The compensation package in the employment agreement reflected Mr. Gleeson's familiarity with the Company and its legal issues resulting from his representation of the Company beginning in January, 2008. The relative mix of cash and options reflected the Company's strained cash position and its near-term revenue prospects at the time of the hiring, with the number of options designed to compensate for the relatively low cash compensation. The vesting of the options was not tied to any performance standards because at the time, given the Company's limited amount of sales and its lack of profitability, it was deemed that meaningful performance standards could not be established. For the same reason, the Company did not establish performance standards for bonus awards. No cash bonus was awarded

to Mr. Gleeson.

On November 20, 2012, the Board, on the recommendation of Mr., Zeitoun, awarded Mr. Gleeson 72,406 stock options having an exercise price equal to market price on the date of grant with a Black-Scholes value of \$100,065 and increased his compensation to \$250,000 per year for 2013 because of exemplary performance.

For 2014, as a result of exceptional performance, Mr. Gleeson's salary was increased to \$300,000 and he was awarded 600,000 options to purchase common stock at \$.83 per share, such options vesting monthly over a three-year period and having an exercise price equal to the market price on the date of grant..

The Company has not used compensation consultants in connection with Mr. Gleeson's compensation and has not benchmarked his compensation.

Table Of Contents

Compensation of Mr. Krishnamurti

In May, 2012, the Company, on the recommendation of Mr. Zeitoun, hired Mr. Krishnamurti under a three year employment agreement calling for an annual salary \$180,000 and an option grant to purchase 300,000 shares of the Company's Common Stock with a exercise price equal to the market price on the day of grant. The options had a Black-Scholes value of \$400,200 determined as of the date of grant. The terms, including the compensation amounts and the number of options, as well as the mix between those elements, were negotiated by the parties and the Board believed that the compensation package reflected Mr. Krishnamurti's expertise and experience and gave him appropriate long-term incentive through the stock options.

In May 2013, the Board, on the recommendation of Mr. Zeitoun due to Mr. Krishnamurti's excellent performance, increased Mr. Krishnamurti's cash compensation to \$225,000 and granted a 10-year option vesting immediately to purchase 65,000 shares of Common Stock with an exercise price equal to the market price on the day of grant. The options had a Black-Scholes value of \$49,686 of the date of grant.

Mr. Krishnamurti's 2014 cash compensation remained the same as in 2013, but he was awarded options to purchase 75,000 shares of common stock at \$.84 per share, and the options vested immediately and had an exercise price equal to the market price on the day of grant. The options had a Black-Scholes value of \$31,055 of the date of grant.

The Company has not used compensation consultants in connection with Mr. Krishnamurti's compensation and has not benchmarked his compensation.

Tax and Accounting Treatment of Compensation

Deductibility Cap on Executive Compensation

The Compensation Committee is aware that Section 162(m) of the Internal Revenue Code treats certain elements of executive compensation in excess of \$1 million a year as an expense not deductible by the Company for federal income tax purposes. Depending on the market price of the Company's Common Stock on the date of exercise of options that are not performance-based, the compensation of certain executive officers in future years may be in excess of \$1 million for purposes of Section 162(m). The Compensation Committee reserves the right to pay compensation that may be non-deductible to the Company if it determines that it would be in the best interests of the Company.

Tax and Accounting Treatment of Options

We are required to recognize in our financial statements compensation cost arising from the issuance of stock options. GAAP requires that such that compensation cost is determined using fair value principles (we use the Black-Scholes method of valuation) and is recognized in our financial statements over the requisite service period of an instrument. However, the tax deduction is only recorded on our tax return when the option is exercised. The tax benefit received at exercise and recognized in our tax return is generally equal to the intrinsic value of the option on the date of exercise.

Compensation of Policies and Practices as they relate to Risk Management

The Company does not believe that its compensation policies and practices (cash compensation and at-the-market or above-market five- and ten-year options without or without performance standards and with or without vesting schedules) are reasonably likely to have a material adverse effect on the Company as they relate to risk management practices and risk-taking incentives.

Table Of Contents

Compensation Committee Report

The Compensation Committee has reviewed and discussed the Compensation Discussion and Analysis with management. Based on such review and discussions, the Compensation Committee recommended to the Board that the Compensation Discussion and Analysis be included in the Annual Report on Form 10-K and the Company's next proxy statement for the election of director.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Security Ownership of Certain Beneficial Owners and Management

As of February 28, 2015 the Company had:

200,000,000 authorized shares of Common Stock;

95,331,128 issued shares of Common Stock

8,937,546 issuable shares of Common Stock, the number of shares issuable on conversion of 10% PIK Election Convertible Notes Due 2023 ("Series 2023 Notes") as of February 28, 2015.

21,574,441 issuable shares of Common Stock, the number of shares issuable on the conversion of 10% PIK Election Convertible Notes Due 2018 ("Series A Notes") the number of shares issuable as of February 28, 2015.

144,501,161 issued shares of Common Stock on a fully diluted basis as of February 28, 2015.

Ownership Tables

The following table sets forth, as of February 28, 2015, information regarding the beneficial ownership of our common stock with respect to each of the named executive officers, each of our directors, each person known by us to own beneficially more than 5% of the common stock, and all of our directors and executive officers as a group. Each individual or entity named has sole investment and voting power with respect to shares of common stock indicated as beneficially owned by such person, subject to community property laws, where applicable, except where otherwise noted. The percentage of common stock beneficially owned is based on 95,331,128 shares of common stock outstanding as of February 28, 2015 plus the shares that a person has a right to acquire within 60 days of February 28, 2015.

Number of Shares of	Percentage of Common
------------------------	-------------------------

Edgar Filing: Applied Minerals, Inc. - Form 10-K

Name and Address (1)	Common Stock Beneficially Owned (2)	Stock Beneficially Owned	
Andre Zeitoun (3) (4) (10)	8,762,899	8.5	%
John Levy (3) (5)	630,957	*	
David Taft (3) (8)	25,624,957	26.9	%
Mario Concha (3) (7)	155,275	*	
Robert Betz (3) (6)	142,036	*

Berylson Capital Partners, LLC (14)	5,620,170	5.9	%
James Berylson (14)	6,893,170	7.2	%

* Less than 1%

(1) Unless otherwise indicated, the address of the persons named in this column is c/o Applied Minerals, Inc., 110 Greene Street, Suite 1101, New York, NY 10012.

(2) Included in this calculation are shares deemed beneficially owned by virtue of the individual's right to acquire them within 60 days of the date of February 28, 2015 as determined pursuant to Rule 13d-3 of the Securities Exchange Act of 1934.

(3) Director.

(4) Executive officer.

Mr. Levy's holdings include: (i) options to purchase 62,500 shares at \$0.70 per share 31,250 expiring in March, 2015 and 31,250 expiring in June, 2015; (ii) options to purchase 60,000 shares of common stock at \$1.00 per share expiring in October 2015; (iii) options to purchase 100,000 shares of common stock at \$1.00 per share expiring in June 2016; (iii) options to purchase 100,000 shares of common stock at \$0.83 per share expiring November 2016; (iv) options to purchase 100,000 shares of common stock at \$1.24 per share expiring in January 2018; (v) options to purchase 100,000 shares of common stock at \$1.66 per share expiring November 2022; (vi) options to purchase 50,000 shares of common stock at \$0.83 per share expiring in March 2024; (vii) options to purchase 12,500 shares of common stock at \$0.66 per share expiring in February 2025.

Mr. Betz's holdings include: options to purchase 50,000 shares of Common Stock at \$0.83 per share expiring in March, 2024 and options to purchase 12,500 shares of common stock at \$0.66 per share expiring in February 2025.

Mr. Concha's holdings include options to purchase 50,000 shares of Common Stock at \$0.83 per share expiring in March, 2024 and options to purchase 12,500 shares of common stock at \$0.66 per share expiring in February, 2025.

(8) Mr. Taft is President of IBS Capital LLC and deemed to be the beneficial owner of shares held by the funds it manages by virtue of the right to vote and dispose of such securities. Based on an SEC Form 13D filed on November 12, 2014, the IBS Turnaround Fund (QP) (A Limited Partnership) owns 15,621,354 shares, including 1,841,304 shares of Common Stock issuable upon conversion of 10% PIK Election Convertible Notes due 2018 ("Series A Notes"). The IBS Turnaround Fund (A Limited Partnership) owns 7,432,596, including 876,087 shares of Common Stock issuable upon conversion of the Series A Notes. The IBS Opportunity Fund, Ltd. owns

2,571,007 shares, including 576,413 shares of Common Stock issuable upon conversion of the Series A Notes.

Table Of Contents

Mr. Zamani's holdings include options to purchase 50,000 shares of Common Stock at \$0.83 per share expiring in (9) March, 2024 and options to purchase 12,500 shares of common stock at \$0.66 per share expiring in February 2025.

Mr. Zeitoun's holdings include (i) options (held through Material Advisors) to purchase 3,949,966 shares of (10) common stock at \$0.70 per share expiring in January 2019; (ii) options (held through Material Advisors) to purchase 1,742,792 shares of common stock at \$0.83 per share expiring in January 2021; and (ii) options to purchase 1,742,792 shares of common stock at \$1.66 per share expiring in November 2022.

Mr. Krishnamurti's holdings include options to purchase 300,000 shares of common stock at \$1.55 per share (11) expiring in May 2022, 65,000 shares of common stock at \$1.35 per share expiring in May, 2023, and 75,000 shares of common stock at \$0.84 per share expiring in May 2024.

Mr. Gleeson's holdings include options to purchase 900,000 shares of common stock at \$1.90 per share expiring (12) in September, 2021, options to purchase 72,406 shares of common stock at \$1.66 per share expiring in November, 2022, and options to purchase 183,337 shares of common stock at \$0.84 per share expiring in June 2024.

Based upon the Schedule 13D filed with the Securities and Exchange Commission on November 6, 2014, Samlyn Capital, LLC, 500 Park Avenue, 2nd Floor, New York, N.Y. 10022, is the beneficial owner of shares of (13) held by funds it manages by virtue of the right to vote and dispose of the securities. The 13D indicated that Samlyn Onshore Fund, L.P. owned 7,632,609 shares, including 3,782,609 shares of common stock issuable upon conversion of the Series A Notes and Samlyn Offshore Master Fund, Ltd., owned 13,236,956 shares of Common Stock, including 7,086,956 shares of common stock issuable upon conversion of the Series A Notes. Robert Pohly is the president of Samlyn Capital, LLC. He has beneficial ownership of shares owned by funds of which Samlyn Capital, LLC is the general partner or investment manager, Mr. Pohly having sole voting and investment power.

Based on a Form 13G filed with the SEC on February 13, 2015, James Berylson beneficially owns 5,620,170 (14) shares beneficially owned by Berylson Capital Partners, including 3,150,000 shares issuable on conversion of PIK Notes, and an additional 1,273,000 shares. The address of Berylson Capital Partners is 33 Arch Street, 31st Floor, Boston, MA 02110.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Review, approval or ratification of transactions with related persons.

Our Board of Directors reviews any transaction, except for ordinary business travel and entertainment, involving the Company and a related party before the transaction or upon any significant change in the transaction or relationship. For these purposes, the term "related-party transaction" includes any transaction required to be disclosed pursuant to Item 404 of Regulation S-K of the SEC.

Transactions with Related Persons

In 2014, the funds managed by IBS Capital LLC, of which Mr. Taft, a director is president, purchased \$3,030,303 of Series A Notes for \$2,000,000. The Series A Notes purchased by such funds are convertible into common stock at the rate of \$.66 per share. In 2014, funds managed by Samlyn Capital, LLC purchased \$10,000,000 of Series A Notes in exchange for \$6,000,000 and the cancellation of a warrant to purchase five million shares of common stock of \$2.00 per share. The Series A Notes purchased by the Samlyn funds are convertible into common stock at the rate of \$.60 per share.

Eric Basroon, Mr. Zeitoun's brother-in-law, was employed by the Company in 2014 as Vice President of Business Development. In 2012-2014, he received an annual salary of \$200,000. During 2012, Mr. Basroon was granted 580,930 stock options with a Black-Sholes value of \$802,847. In 2014, Mr. Basroon was granted 75,000 options with a Black-Sholes value of \$31,055. The options had an exercise price equal to the market price as of the date of grant.

Director Independence

The directors who are deemed to be independent under the independence standards of NASDAQ are Messrs. Levy, Concha, Betz, and Zamani. They are also independent under the enhanced independence standards of Section 10A-3 of the Securities Exchange Act. Messrs. Zeitoun and Taft are not independent under the NASDAQ standards of independence. Mr. Zeitoun is an employee. Mr. Taft is deemed not independent because of the size of his security holdings.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

EisnerAmper LLP was selected by our Board of Directors as the Company's independent accountant for the years ending December 31, 2014 and 2013.

The following table presents fees for audit services rendered by EisnerAmper, the independent auditor for the audits of the Company's annual consolidated financial statements for the years ended December 31, 2014 and 2013, respectively.

	December 31, 2014	December 31, 2013
Audit Fees	\$ 117,500	\$ 117,500
S-1 filing review	4,000	8,000
Tax Fees (1)	7,500	7,500
All Other Fees	--	--
Total	\$ 129,000	\$ 133,000

(1) Tax fees represent the aggregate fees paid for professional services, principally including fees for tax compliance and tax advice.
