Item 7.01 Regulation FD Disclosure.

On May 2, 2014 we filed a provisional patent application covering enhancements to our proprietary “Airstream” curved reflectors used in grow lights that are expected to become an integral part of our commercial production of cannabis. The reflectors provide an improved uniform light distribution over plants, with minimal light distribution outside the desired target area, compared to conventional reflectors. We believe that by incorporating this new technology at a commercial scale we will be able to increase production and ensure uniform growth rates and consistent quality plants while conserving valuable natural resources for indoor gardens. This Surna-owned provisional patent was developed by our recently acquired subsidiary, Safari Resource Group, Inc.

We issued a press release regarding the filing of this provisional patent application on May 8, 2014. The press release is attached hereto as Exhibit 99.1 and incorporated herein by this reference. The information contained in the press release attached hereto is being furnished and shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended.
