UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

[X] ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: **December 31, 2014**

or

[] TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: **1-10346**

EMRISE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware	77-0226211
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

2530 Meridian Parkway,

Durham, NC 27713

(Address of principal executive offices)

(919) 806-4722

(Registrant's telephone number, including area code)

Securities registered under Section 12(b) of the Exchange Act: **None**

Securities registered under Section 12(g) of the Exchange Act: **Common Stock, par value \$0.0033 per share**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Edgar Filing: EMRISE Corp - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.:

Large accelerated filer ☐ Non-accelerated filer ☐

Accelerated filer ☐ Smaller reporting company ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the voting common equity held by non-affiliates, computed by reference to the \$0.88 closing sale price of such stock on June 30, 2014, the last business day of the registrant’s most recently completed second fiscal quarter, was approximately \$9,500,000. The registrant has no non-voting common equity.

The number of shares outstanding of the registrant’s common stock, par value \$0.0033 per share, as of March 27, 2015, was 10,816,337.

Documents Incorporated By Reference: **None.**

CAUTIONARY STATEMENT

All statements included or incorporated by reference in this Annual Report on Form 10-K (the “Report”), other than statements or characterizations of historical fact, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act, as amended. Examples of forward-looking statements include, but are not limited to, statements concerning projected net sales, costs, expenses and gross margins; our accounting estimates, assumptions and judgments; the demand for our products; the competitive nature of and anticipated growth in our industries; our ability to sell assets, pay down debt and increase our per share common stock price; our ability to identify and consummate (a) acquisitions and integrate their operations successfully and (b) dispositions, both on terms favorable to us; and our prospective needs for additional capital. These forward-looking statements are based on our current expectations, estimates, approximations and projections about our industries and business, management’s beliefs, and certain assumptions made by us, all of which are subject to change. Forward-looking statements can often be identified by words such as “anticipates,” “expects,” “intends,” “plans,” “predicts,” “believes,” “seeks,” “estimates,” “may,” “will,” “should,” “would,” “could,” “potential,” “continue,” “ongoing,” similar expressions, and variations or negatives of these words. These statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, our actual results could differ materially and adversely from those expressed in any forward-looking statements as a result of various factors, some of which are listed under “Risk Factors” in Item 1A of this Report. These forward-looking statements speak only as of the date of this Report. We undertake no obligation to revise or update any forward-looking statement for any reason.

Business and Industry Description

EMRISE Corporation (including our subsidiaries, referred to collectively in this Report as “EMRISE,” the “Company,” “we,” “us” or “our”) designs, manufactures and markets electronic devices, sub-systems and equipment for aerospace, defense, industrial and communications markets. Our products perform key functions such as power supply and power conversion; radio frequency (“RF”) and microwave signal conditioning; and network access and timing and synchronization of communications networks. We conduct our business through two operating segments: electronic devices and communications equipment. Our two electronic devices segment business units, XCEL Power Systems Ltd. (“XPS”) and Pascall Electronics Limited (“PEL”), are located in the UK (United Kingdom). At the start of 2014 we owned two communications equipment business units, CXR Larus Corporation (“CXR Larus”), based in the United States, and CXR Anderson-Jacobson (“CXR AJ”), which is located in France. In October 2014, we sold the business and assets of CXR Larus which had become an immaterial subsidiary. During 2014, our electronic devices segment contributed approximately 68% of overall net sales, while the communications segment contributed approximately 32% of overall net sales. EMRISE serves the worldwide base of customers it has built, primarily in North America, Europe, North Africa and Asia.

Electronic Devices

Within our electronic devices segment, we produce a range of power systems, RF and microwave devices, and sub-system assemblies. The following is a description of the major product categories within this segment:

Power Systems. Our power systems business is comprised of high and low voltage, high specification, high reliability custom and standard power conversion products designed for hostile environments. These products are used predominately in the defense, commercial aerospace, industrial, and communications markets.

RF and Microwave Devices. Our RF and microwave devices business is comprised of RF and microwave devices, including frequency control products, together with custom integrated assemblies and sub-systems. These products are used in applications that include communications, air traffic control, navigation and location equipment, radar and signal jamming devices, and weather radar, among others.

Sub-system Assemblies. Our sub-system assemblies business consists of the design and manufacture of assemblies that incorporate our own products from the other two categories combined with third-party equipment and devices into a completed unit.

The electronic devices segment is primarily “project” driven, with the majority of revenues being derived from custom products with long development cycles, long life cycles and high barriers to entry. Manufacturing and testing is performed in-house or through sub-contract manufacturers. Our electronic devices are used in a wide range of military airborne, seaborne and land-based systems, and Civil Aerospace systems such as in-flight entertainment and connectivity (“IFE&C”) systems - such as applications for mobile phone, Wi-Fi internet communications and on-board satellite and broadcast TV - which are being installed in new commercial aircraft as well as being retrofitted into existing commercial aircraft.

The electronic device market we serve is comprised predominantly of military and commercial aerospace applications. Large military programs, including land and seaborne military platforms, are high revenue generating opportunities, but are few in number and often more likely to be affected by budgetary constraints. As a result, we also focus on multiple smaller defensive aids and force protection projects in the 4C market (command, control, communication and computers) and commercial aerospace opportunities.

Communications Equipment

Within our communications equipment segment, we produce a range of network access products and network timing and synchronization products for public and private communications networks. The following is a description of the major product categories within this segment:

Network Access. Our network access product category is comprised of a wide range of LAN/WAN interconnection equipment and systems over copper, fiber or wireless networks, to industry standards as required by our customers. We provide a combination of proprietary products and third party products to meet customer requirements. Products are targeted to key markets such as the military, utilities and other private networks, government administration, point of sale and public communications service providers primarily in Europe, North Africa and, more recently, in the United States.

Timing and Synchronization. Our timing and synchronization product category is comprised of a range of timing products primarily for the outer edges of service provider networks, which we refer to as an “Edge Network.” Products are targeted to key markets such as telephone companies, cable carriers, government administration, utility companies, and other defense and homeland security related applications primarily in the United States, but also, to a lesser extent, in Europe.

The communications equipment segment is “end user product” based with typically internally funded development and marketing prior to selling via direct and indirect sales channels. Manufacturing is primarily outsourced.

Strategy and Business Developments

In our Annual Report on Form 10-K for December 31, 2013, we reported on the steps that the Company was taking to reduce and restructure debt, invest in our electronic devices businesses, reduce overhead costs and increase our revenues. We also noted that the Board of Directors of the Company (the “Board”) had initiated a strategic review to determine the best route to increase shareholder value, engaging investment bankers to evaluate the options. We anticipated that the electronic devices segment would drive the growth and future profitability of the Company. During 2014, we started to see the benefits of this strategy with increasing revenues, a significant uplift in the backlog to underpin our future growth plans for 2015 and beyond and encouraging levels of profitability, particularly at our electronic devices segment. We also redeemed expensive loan notes that had been originally issued to certain former owners of a subsidiary, benefited from the elimination of a significant obligation to a former owner of another subsidiary and negotiated a new debt facility with our principal UK bank. In October we rationalized our communications segment by closing our unprofitable subsidiary in California. The terms of the sale are described in greater detail below. Throughout the year we maintained rigorous control over costs. These steps helped us achieve an improvement in our results of operations during the year and placed the Company in a stronger position to exploit opportunities during 2015 and subsequent years. Against this background, the Board continued to examine the strategic options available to the Company throughout the year and in February 2015 having received an offer of \$22 million, net of debt and certain other adjustments, the Board authorized management to enter into detailed discussions for the sale of the electronic devices segment of the business.

Recent Developments

On March 22, 2015, the Company executed a purchase agreement (the “Purchase Agreement”) with an affiliate of Data Device Corporation (“DDC”) to sell all of the issued and outstanding shares of the common stock of the Company’s wholly owned subsidiary, EMRISE Electronics Ltd. (“EEL”), for a gross purchase price of \$22 million (the “Transaction”). This figure will be reduced by debt and transaction expenses, will be adjusted for the level of working capital at the date of completion and will be subject to an escrow sum that will be held back by the purchaser for twelve months. EEL is the holding company for the electronic devices segment of the business. This segment constituted 68% of the Company’s sales in both 2014 and 2013 and \$3.8 million and \$2.7 million operating profit in the years ended December 31, 2014 and 2013, respectively. The sale has been unanimously approved by the Board but is subject to shareholder approval with a vote through a proxy to be sent to shareholders. In connection with the Purchase Agreement, the Company and purchaser have agreed to deposit \$900,000 of the purchase price into escrow at the closing of the Transaction (the “Closing”) to secure certain indemnification obligations of the Company under the Purchase Agreement. This escrow amount will remain available for satisfaction of any indemnification claims until twelve months following the Closing, at which time any remaining balance not subject to outstanding and unresolved claims will be distributed to the Company. Net proceeds from the sale, after holding back the sums in escrow and other associated costs, are expected to be approximately \$11 million.

The Board also determined that, assuming the Transaction receives shareholder approval, the Company’s communications business should also be sold and Emrise Corporation should be dissolved and liquidated completely after the consummation of the Transaction. In this respect, the Board approved a Plan of Liquidation and Dissolution (the “Plan of Dissolution”). It is anticipated that under Delaware law that the execution of the Plan of Dissolution may take up to three years. It is intended that liquidated distributions to shareholders will be made during this time. Further details can be found in the Company’s Current Report on Form 8-K, as filed with the United States Securities and Exchange Commission (the “SEC”) on March 23, 2015.

Customers

We sell our commercial and military electronic devices primarily to original equipment manufacturers (“OEMs”), including manufacturers of aerospace and defense systems and industrial equipment. During 2014, our top five electronics devices customers in terms of revenues were EMS Technologies Inc., MBDA (UK), Panasonic Avionics, Rockwell Collins and Selex ES. Four of these companies were among our top five customers in 2013. We sell our communications equipment to public, private and corporate telecommunications service providers and end users, including telephone companies, cable service providers, utility companies and numerous other communications service providers. During 2014, our top five communications equipment customers, including distributors, in terms of revenues, were Cherry & White, Thales Communications, Ineo, Ansaldo and Power & Telephone. Two of these customers were also among our top five customers in 2013.

We have a diversified customer base for both our electronic device products and our communications equipment products. During 2014, one customer accounted for 10.7% of our total net sales. In 2013, our largest customer, a company which was not the largest in 2014, accounted for 11.6% of our total net sales.

Sales, Marketing and Customer Support

We market and sell our products through our operating subsidiaries within both of our operating segments. Our sales force and marketing staff consists primarily of engineers and technical professionals including a direct sales force and, in some cases, a network of independent sales representatives or distributors. Our sales professionals in each country within which we operate are experienced and highly knowledgeable about their respective markets, customer operations and strategies and regulatory environments. We believe this extensive experience and knowledge significantly enhances the ability of our sales and marketing staff to build long-standing customer relationships, as such relationships are more consultative in nature and, as a result, our sales and marketing staff can communicate back to us valuable input on systems and features that our customers desire in future products.

Our electronic devices products are sold through a combination of direct sales and independent representatives. We sell our electronic devices primarily to OEMs and system integrators in the military and commercial aerospace and industrial electronics industries. We typically have long-term relationships with our customers within our electronic devices segment and projects and programs in this segment often span multiple years, with military programs sometimes in excess of five years. We obtain revenues through long-term purchase orders and repeat business from our existing customers, by marketing subsystem assemblies that incorporate our own and third party equipment and devices to our existing customers, and by entering new product markets, such as Civil Aerospace Cabin Electronics market and new geographic markets.

Military and defense customers generally require our products to be formally qualified for their application. The total system will then typically undergo flight qualification or the equivalent on a land or sea based system. A further development or prototyping phase may follow to meet additional requirements. This can lead to lengthy development and approval cycles and very long prototype phases, sometimes spanning several years, prior to the product entering production. As a result of these long development and approval cycles, the overall program is subject to external political and economic constraints over which we have little control and which makes sales forecasting difficult. Further, delays associated with customer internal approval processes, contracting procedures and/or procurement practices may cause potential sales of our electronic device products to be delayed. After a customer has approved our product for purchase, any new prospective supplier will have considerable barriers to entry due to the need to re-qualify the application. As a result, once qualified, our products typically enjoy a long product lifecycle.

Our communications equipment is sold primarily through a combination of our local in-house sales force, independent representatives, and third-party distributors. We sell our communications equipment primarily to private network operators and to large communication service providers as well as resellers and value added resellers and, in Europe, to military customers. Communications service providers generally commit significant resources to an evaluation of our products and our competitors' products and require each vendor to expend substantial time, effort and money educating them about the value of our solutions and, in many cases, to qualify products for their networks. Consequently, sales to this type of customer generally require an extensive sales effort throughout the prospective customer's organization and final approval by an executive officer or other senior level employee. The result is lengthy sales and approval cycles, which make sales forecasting difficult. In addition, even after a customer has approved our product for purchase, future purchases are uncertain because while we generally enter into long-term supply agreements with our customers, these agreements do not require specific levels of purchases.

Delays associated with potential customers' internal approval and contracting procedures, procurement practices, testing and acceptance processes are common and may cause potential sales of our communications products to be delayed or foregone. As a result of these and related factors, the sales cycle of new products for large customers typically ranges from six to twelve months or more. In addition, we have some distribution channels that generally are box-stocking distributors with significant independent sales forces selling our products to final customers, integrators and other resellers on a regional and nationwide basis. We perform periodic product applications training for our distributor and reseller workforce and we funnel many of the leads we generate to the distribution channels for their follow-up and closure.

Competition

We believe that our competitive advantage is founded on the application of leading edge technology, the quality of our products, our ability to quickly address and adapt to individual customer requirements and to the overall marketplace, the strength of our distribution channels, and our compliance with government and industry standards.

The electronic devices market is highly fragmented, competitive and is comprised of a diverse group of OEMs. Nonetheless, we believe that our many years serving this market and significant experience in the industry and the customized nature of our products have acted and will continue to act as barriers to entry for potential competitors. This is particularly true in the military and defense markets that have high barriers to entry after a product has been qualified. Competition for development programs includes multinational and local engineering and manufacturing companies containing customer in-house capabilities. Competitors in this segment include Astronics, Crane, Vicor, ITT and Martek, among others. Our RF devices and power supplies are similarly positioned in the IFE&C markets. Significant competitors in this market include the in-house manufacturing capability of Panasonic, Rockwell Collins and Thales, all of which are also our customers.

The communications equipment market is intensely competitive and subject to rapid technological change, evolving industry standards and regulatory developments. Our principal competitors within this segment include Micro Semi, Frequency Electronics Inc. and ADVA for timing and synchronization products and RAD, Zhone/Paradyne, Adtran, Patton Electronics Corporation for network access products. The design of many of our network access products enables us to offer numerous product combinations to our customers and to serve both central site data communications needs and remote access sites on both the enterprise-wide and single location level. We believe that this design flexibility gives us a competitive advantage by enabling us to offer quality products that meet and are adaptable to evolving customer requirements, technologies and government and industry standards.

Most of our competitors have greater sales, marketing, technological, research and financial resources than we do. Our competitors' advantage with regard to these resources may reduce our ability to obtain or maintain market share for our products in cases where our competitors are better able than we are to satisfy customer needs.

Backlog

For a significant portion of our business, customers issue binding purchase orders or enter into other binding purchase arrangements for the products to be produced and shipped over time in the future. Our "backlog" represents these orders and provides a partial view into potential shipments and revenues. The amount of backlog orders represents revenue that we anticipate recognizing in the future, as evidenced by purchase orders and other purchase commitments received from customers, but on which work has not yet been initiated or work is currently in progress. At December 31, 2014, our backlog of firm, unshipped orders was approximately \$36.8 million compared to \$25.7 million a year ago (an increase of 43%). Our electronic devices business represented approximately 92% of the backlog. The electronic devices business has long lead-times for our manufacturing processes due to the custom nature of the products. Approximately 8% of the backlog is represented by our communications equipment business. At \$3.1 million this is the equivalent of 27% of the level of sales achieved by the communications equipment business in 2014. We believe that the majority of our current backlog will be shipped within the next 12 months. However, we cannot provide assurance that we will be successful in fulfilling these orders in a timely manner or that we will ultimately recognize as revenue the amounts reflected as backlog. At February 28, 2015, our backlog was approximately \$38.7 million, compared to \$26.8 million at March 31, 2014. This majority of this backlog is scheduled for production and delivery over the next two years but some orders stretch further into the future. The backlog would transfer to the purchaser in the event of a sale of the business.

Warranties

The Company's electronic devices products are generally bespoke in nature and these carry a limited parts and labor warranty that is specific to each contract. These warranties usually vary in length from one to two years. In certain circumstances, the Company provides a two-year, limited parts and labor warranty on communications test instruments and network access products but these are more normally of one year duration. The Company also offers an extended parts and labor warranties beyond the standard one or two year warranty, as may be applicable, for an additional cost to its customers. Products returned under warranty typically are tested and repaired or replaced at our option. Historically, we have not experienced significant warranty costs or returns. However, it is possible that disputes over specifications, materials or workmanship could arise in the future.

Product Development and Engineering

We are making investments in product development and engineering which are designed to increase our range of product offerings to our customers, stay current with the technological and regulatory changes in our industry and anticipate and satisfy our customers' preferences and requirements on existing and/or future anticipated orders. Our product development and engineering activities focused on product development for network access, timing and synchronization products, RF frequency control products and power conversion devices. We continually review and evaluate technological and regulatory changes that may affect our products and we seek to offer products and capabilities that solve our customers' operational challenges and improve their efficiency. Development costs are charged to expense as incurred. The cost of development expensed in 2014 and 2013 was \$1,265,000 and \$1,132,000, respectively.

Manufacturing, Assembly and Quality Assurance

Our communications equipment, including network access products and communication timing and synchronization products, generally are assembled from outsourced sub-assemblies, with final assembly, configuration and quality testing typically performed in house. We believe that outsourcing certain aspects of manufacturing, especially full assemblies, lowers our manufacturing costs, in particular our components and labor costs, provides us with more flexibility to scale our operations to meet changing demand, and allows us to focus our engineering resources on new product development and product enhancements.

We manufacture our electronic devices through a combination of in-house and external outsource manufacturing processes depending on the product, application and volume. We maintain broad mechanical and electronic assembly capabilities such as machining, surface mount technology, through-hole assembly, cable harness assembly and general assembly, all of which are primarily utilized to maintain our flexibility to produce small volume batch products and quick turnaround prototypes. Many of the remaining portions of manufacturing, including assembly of our more standardized and/or large volume production orders are outsourced. Although many of our electronic devices incorporate our standard techniques and intellectual property, most of our products are nevertheless built to meet customer specifications. This approach of incorporating proprietary standard modular designs into custom products allows us to reduce lead time to delivery and minimize material inventory. Our electronic devices segment produces products in one-piece to several hundred-piece batches, with a typical lead time between 12 and 50 weeks. The lead-time is predominantly to source electronic component piece parts. Typical build time is six to eight weeks from receipt of external components, but can, at times, extend to 26 weeks or more. It is not unusual for customers to place orders 12 months or more ahead of their desired delivery date.

We operate four manufacturing and assembly facilities worldwide. The European subsidiaries are certified to ISO 9001 and ISO 14000 while our electronics devices companies are also ISO 9100.

The purchased components we use to build our products are generally available from a number of suppliers. As a result of the global economic situation, many suppliers have reduced their inventory levels, requiring longer lead times to obtain raw materials and complete existing orders. We rely on a few limited or sole source suppliers for certain specific components and parts. We do not have long-term supply agreements with these vendors. In general, we make advance purchases of some critical components to ensure an adequate supply, particularly for components that have long lead-times, sometimes of up to 50 weeks. If we were required to locate new suppliers or additional sources of supply, we could experience a disruption in our operations or incur additional costs in procuring required materials.

Intellectual Property

We regard certain of our own software, hardware and manufacturing processes as proprietary and we rely primarily on trade secrets, confidentiality agreements and contractual provisions to protect our proprietary rights. Where applicable, we seek to protect our software, documentation and other written materials under trade secret and copyright laws, although due to the standardized nature of the underlying technology of our products, this protection is often not applicable. Our product development and manufacturing process typically involves the use and development of a variety of forms of intellectual property and proprietary technology. In addition, in some cases, we incorporate technology and software that we obtain from third party sources. Sometimes we obtain this technology by means of a license. These licenses generally involve a one-time fee and no time limit, but in some cases may involve on-going licensing fees or royalties based on future sales. If these third party sources were to cease doing business, or to cease doing business with us, we would need to obtain the technology and software from another source. We recognize the importance of having alternative sources and believe that alternatives to these third party technologies are available both domestically and internationally and we intend to expand these alternative technological opportunities in the

future.

We may receive, in the future, notices from holders of patents that raise issues as to possible infringement by our products. Questions of infringement and the validity of patents in the fields of electronic devices, communications and information technology involve highly technical and subjective analyses. These types of proceedings are time consuming and expensive to defend or resolve, result in substantial diversion of management resources, cause product shipment delays or could force us to enter into royalty or license agreements rather than dispute the merits of the proceeding initiated against us. At this time, we are not aware of any infringement notices.

Government Regulation and Industry Standards and Protocols

We design our products to comply with a significant number of industry standards and regulations, some of which are evolving as new technologies are deployed. In the United States, our products must comply with various regulations defined by the U.S. Federal Communications Commission, ("FCC") and Underwriters Laboratories, as well as industry standards such as the Network Electronic Build Standards, ("NEBs") established by Telcordia Technologies, Inc., formerly Bellcore, and those developed by the American National Standards Institute. Internationally, our products must comply with standards established by the European Committee for Electrotechnical Standardization, the European Committee for Standardization, the European Telecommunications Standards Institute and telecommunications authorities in various countries, as well as with recommendations of the International Telecommunications Union. Any failure of our products to comply, or delays in compliance, with the various existing and evolving standards could negatively affect our ability to sell our products. Our products for the military markets are typically type tested and require the production of a first article and other prototypes, which are subject to testing to meet specific customer and government regulations governing operating environment, performance and operational capability.

Our facilities and product lines are subject to statutes governing safety and environmental protection. We believe that we are in compliance with these statutes and are not aware of any proposed or pending safety or environmental rule or regulation that, if adopted, would have a material effect on our business or financial condition.

Many of our military related products are subject to national or international trade import and/or export restrictions. We are subject to the International Traffic in Arms Regulations (“ITAR”) and similar protocols in Europe. In many cases, we are also required to obtain export and/or “end-use” permits when we are asked by our customers to ship certain products outside our native countries where the products are manufactured. We maintain and operate the appropriate controls and security as required for the commercial and military work that we undertake. For example, we must certify certain facilities to specific defense requirements which are subject to regular audit and includes access control and restrictions to personnel. We believe that we are in compliance with all of these statutes and regulations.

Seasonality

There are no significant seasonal aspects to our business, except that purchases of our communications equipment by public communications carriers tend to be higher than average at the end of the year and lower than average during the first quarter of each year because their capital equipment budgets typically are not approved until late in the first quarter. Furthermore, shipments within our electronic devices segment can vary significantly quarter to quarter due to variances in the nature and timing of customer orders, especially as they relate to high-volume, long term production contracts. The timing of such contracts can dramatically affect the volume of shipments and our profitability from one quarter to the next or even from year to year.

Employees

As of March 20, 2015, we employed 194 individuals, of which 185 were full time, in our various divisions and subsidiaries. At March 31, 2014, we employed 203 individuals, of which 192 were full time. None of our employees are represented by labor unions, and there have not been any work stoppages at any of our facilities. We believe that our relationship with our employees is good.

Corporate Information and Securities Filings

EMRISE is a Delaware corporation that was formed in 1989. Our principal executive offices are located at 2530 Meridian Parkway, Durham, NC 27713. Our website address is www.emrise.com. We do not intend our website

address to be an active link or to otherwise incorporate by reference the contents of the website into this Report. The public may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549, on official business days during the hours of 10:00 am to 3:00 pm, or electronically through the SEC website (www.sec.gov). The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Within the Corporate Governance section of our website, we provide information concerning corporate governance, including our charters of the committees of the Board, Codes of Conduct and other information.

Item 1A. Risk Factors.

The following summarizes material risks that investors should carefully consider before deciding to buy or maintain an investment in our common stock. Any of the following risks, if they actually occur, would likely harm our business, financial condition and results of operations. As a result, the trading price of our common stock could decline, and investors could lose the money they paid to buy our common stock or not profit from their investment.

Risks Related to Our Business

During 2014 we examined the strategies available to the Company. The Board recognized that our products were well regarded in the global market-place but further investment was required to exploit the opportunities. Although we generated net income in 2014 our profits remain inconsistent and it is several years since the Company last generated significant profits. We need investment in our business and products to generate and increase future profits and we need to manage cash to fund working capital and fund loan repayments. The fragility of our annual profit flow favored a sale of the electronic devices segment provided the price was high enough to increase shareholder value. The Company entered into an agreement to sell the electronic devices segment in March 2015; which is subject to shareholder approval through the proxy process. Many of the risks faced by the Company which have been set out below will be mitigated or eliminated if the sale and subsequent liquidation take place in accordance with the Company's plan but if the plan fails many risks remain. If we do not sell the electronic devices segment we will need to secure new business loans during 2015 or 2016 to fund and support legal and other costs incurred during the sale negotiations and fund new product development. Even with effective cash management, if the sale of the electronic devices segment fails to complete, we are unlikely to generate profits or experience positive cash flow during 2015 and this may necessitate additional cost reductions. If we incur losses, we are likely to experience negative cash flow, which may hamper our operations and may prevent us from expanding or even maintaining our business.

We generated profits of \$877,000 after tax from operations in 2014 after sustaining a small loss in 2013, a small profit in 2012, a \$2 million loss from operations in 2011, and a \$6 million loss in 2010. We expect to rely on cash on hand, cash generated from our operations, existing financing arrangements and a new loan facility to fund the cash requirements of our business and the scheduled repayment of loans. If our profits do not continue to grow, we are likely to experience negative cash flow, which may hamper current operations and may prevent us from investing in and expanding our business. We may be unable to attain, sustain or increase profitability on a quarterly or annual basis in the future. The Company needs cash to grow and this investment and consequent cash outflow may not result in an immediate or indeed, any increases in profit. If we do not achieve, sustain or increase profitability, our stock price may decline.

We have outstanding debt which the Company must repay.

At the beginning of 2014 we had debt in the form of promissory notes totaling \$2.3 million originally issued to former shareholders of Advanced Control Components (the "Former Shareholders of ACC"). These notes were redeemed from a combination of existing cash generated from within the business and an additional loan from our principal lender. The new borrowings generated net new cash of \$1.2 million at a lower rate of interest than we were paying for the promissory notes. This money together with cash generated from operations was used to redeem the promissory notes and meet liabilities associated with the redemption of these notes. We continue to have credit facilities available to us under separate financing arrangements for our UK and French operations. The cost of carrying and servicing this debt affects our profitability. If we suffer a decline in the current levels of profitability and cash generation, we will need to seek new financing to ensure we can meet scheduled loan repayments as they come due, which there is no assurance

that any new financing could be at favorable terms. If we are unable to do this we may have to consider the future sale of assets or sell equity to raise the capital needed to pay these debts.

We rely on our foreign subsidiaries to generate cash to meet Company liabilities.

We rely on our foreign subsidiaries to generate profits and cash with which to finance our US corporate liabilities. EMRISE does not have any facility in the United States to generate cash to pay its liabilities beyond dividends and loans from its subsidiaries and management charges imposed on those same companies. This could be alleviated in the short-term by the sale of the electronic devices segment but this would not, on its own, be a long-term solution. In the event that the overseas trading entities were unable to support EMRISE, through a the sale of one or both operating segments, through a lack of cash or through limitations on cash transfers imposed through bank covenants, loan conditions or tax factors then EMRISE would need to seek funds elsewhere. In the event that the overseas subsidiaries are unable to generate and repatriate cash to the parent Company it is likely that it would be very difficult to raise new loans in the United States to meet obligations as they fall due. There is no guarantee that generating new loans would be possible or at favorable terms to the Company.

We have limited cash resources which limits investment in new products, people or working capital.

We have bank borrowing facilities for each of our subsidiaries which are sufficient to meet our normal levels of activity within those subsidiaries. Our plans anticipate moderate growth but we cannot guarantee that this growth will be self-financing in the short term. New products and new orders require additional working capital and delays in design, production, delivery or payment from customers will put a strain on this working capital which could result in the Company running out of cash. We monitor our cash resources and cash availability against existing bank facilities very carefully but as a small company we do not have the resources to cover the eventuality of a lengthy delay in the working capital cycle. Some of our borrowing facilities are specific to individual subsidiaries and there are limitations, imposed by banking covenants, on the ability to transfer cash between these subsidiaries. In the event that one or more subsidiary requires cash in excess of its borrowing facility to meet its obligations we may be unable to transfer cash to that subsidiary even if the Company as a whole has adequate borrowing facilities.

Our previous strategy included organic growth, which would not necessarily result in increased revenues or profitability and may have depleted our limited cash reserves without return on investment. Our acceptance of the offer to buy our electronic devices segment changes this risk but if the sale fails to complete we would need to revert to our previous organic growth strategy.

If we revert to our strategy to grow our business organically, focusing on sales to further increase our revenues and backlog, and ramping up manufacturing to meet the increased demand we may encounter difficulties caused by a number of factors, some of which are out of our control, including operational or personnel issues; delays in obtaining (or failure to obtain) required parts, supplies, or third-party technology; global unrest; access to credit by our customers, our suppliers, or ourselves; and our competitors may be more successful than we are technologically or in terms of sales generation. We are using cash reserves to make up-front investments in engineering and inventory. We may invest in the wrong technologies or products or the investment may not yield improved products and sales as anticipated. Our competition may make similar investments with greater success. If we fail to develop significant sales of products, it will negatively impact our business, our ability to become profitable, and results of operations. We would also expect such failure to cause fluctuations or decreases in our common stock price.

If we are unable to fulfill backlog orders due to circumstances involving us or one or more of our suppliers or customers, our anticipated results of operations will suffer.

As of December 31, 2014, we had \$36.8 million in backlog orders for our products. This represents more than 100% of our 2014 annual revenues but not all of this backlog will be scheduled for production or delivery in 2015. Backlog orders represent revenue that we anticipate recognizing in the future, as evidenced by purchase orders and other purchase commitments received from customers, but on which work has not yet been initiated or with respect to which work is currently in progress. Our backlog orders are due, in large part, to the long lead-times associated with our electronic device products, which products generally are custom built to order. We may encounter difficulties in

fulfilling these orders and commitments, which could lead to failing to deliver them in a timely manner. We may not ultimately recognize as revenue the amounts reflected as backlog. Factors that could affect our ability to fulfill backlog orders include difficulty we may experience in obtaining raw materials or sub-assemblies from suppliers, whether due to obsolescence, production difficulties on the part of suppliers, including the longer lead times we have recently seen with many suppliers, or customer-induced delays and product holds. If we were required to locate new suppliers or additional sources of supply, we could experience a disruption in our operations or incur additional costs in procuring required materials. Our anticipated results of operations and cash flows will suffer to the extent we are unable to fulfill backlog orders within established timeframes, particularly if delays in fulfilling backlog orders cause our customers to reduce or cancel their orders. Analysts and investors are likely to view us negatively if we fail to recognize as revenue the amounts reflected as backlog, which could lead to a decrease in our common stock price.

We may not sustain these backlog amounts in the future, particularly if we are not successful in continuing to grow our sales or if our investment in technologies and products or acquisitions fails to translate into increased sales. In the event that the electronic devices segment is sold, the backlog related to such segment would be transferred to the purchaser.

The sales cycles of many of our products are lengthy, exposing us to the risks of delays, foregone orders and fluctuations in operating results.

Sales of many of our products depend upon potential customers' internal approval and contracting procedures, procurement practices, and testing and acceptance processes, all of which require a significant amount of time. As a result of these and related factors, the sales cycle of many of our products, especially for large customers, typically ranges from six to twelve months. Lengthy sales cycles subject us to risks of delays, foregone orders and fluctuations in operating results. Coupled with the lack of long-term purchase orders or commitments described above, our sales revenues can fluctuate from period to period and such unpredictability could negatively affect our stock price.

The high costs of being a U.S. public registrant places pressure on our cash facilities.

The Company adopts rigorous procedures in connection with corporate governance, embracing measures that go beyond the minimum standards required by the OTCQB, Delaware State law or our own by-laws. We observe such procedures because we consider this to be in the best interest of our stakeholders, including employees, customers, suppliers, financiers and shareholders. These measures carry a cost and these costs plus those of maintaining the quotation for our stock relative to the size of our business are high. The Company relies on its subsidiaries to generate sufficient cash to meet their own operating costs in addition to collectively meeting the costs of maintaining a public entity. A shortfall in cash generation by the subsidiaries would restrict the ability of EMRISE to meet its liabilities as they fall due.

We rely heavily on our management, and the loss of their services could adversely affect our business.

Our success is highly dependent upon the continued services of key members of our management, including Carmine T. Oliva, our Chairman of the Board and Chief Executive Officer, and Graham Jefferies, our President and Chief Operating Officer. Mr. Oliva co-founded Emrise Electronics Corporation ("EEC") and has developed personal contacts and other skills that we rely upon in connection with our general business strategies. Mr. Jefferies is a long-time employee of EMRISE whom we have relied upon in connection with our acquisitions and operations in England and France and who fulfills significant operational responsibilities in connection with our foreign and domestic operations. The loss of Mr. Jefferies or one or more other key members of management could adversely affect us. Although we have entered into employment or severance agreements with each of our executive officers, those agreements do not guarantee continued employment of these individuals. We maintain key-man life insurance on Messrs. Oliva and Jefferies. However, this insurance covers termination due to death and not due to any other potential reasons for their employment termination. Even if this insurance can be continued in full effect and a claim paid, the coverage may not be sufficient to compensate us for the loss of the services of Mr. Jefferies.

Many of our competitors have greater resources than we do. If we are unable to keep pace with our competitors in anticipating and responding to the rapid changes involving the electronic devices and communications equipment industries, we may not be able to compete successfully with them and thereby possibly causing our stock price to decline.

Our future success depends, in part, upon our ability to enhance our current products and services and to develop and introduce new products and services that keep pace with technological developments, respond to the growth in the electronic devices and communications equipment markets in which we compete, encompass evolving customer requirements, and provide a broad range of products and achieve market acceptance of our products. Our subsidiary companies would benefit from the additional resource that a new owner could bring.

Most of our existing and potential competitors have larger technical staffs, more established and larger marketing and sales organizations and significantly greater financial resources than we do. Our lack of resources relative to our competitors may cause us to fail to anticipate or respond adequately to technological developments and customer requirements or to experience significant delays in developing or introducing new products and services. These failures or delays could reduce our competitiveness, revenues, profit margins or market share, cash flow and stock price.

The fragile global economy:

has had and may continue to have significant negative effects on our customers and our suppliers;

has had and may continue to have significant negative effects on our access to credit and our ability to raise capital;

may prevent us from accurately forecasting demand for our product;

may increase the risk that we could suffer unrecoverable losses on our customers' accounts receivable; or

may increase the risk that we cannot sell inventory that is on hand, resulting in excess inventory levels; and may therefore negatively affect our business, market share, results of operations, and financial condition.

The Company operates in a global market which is sensitive to oil prices, world unrest and economic uncertainty. Confidence in the world economy since the global financial crisis has been fragile and this manifested itself, among other things, in significant reductions in available capital and liquidity from banks and other providers of credit, substantial reductions and/or fluctuations in equity and currency values worldwide, and concerns that the worldwide economic recession may be prolonged. This has had and may continue to have a significant negative effect on our business and operating results. The potential effects of the fragile global economy are difficult to forecast and mitigate. As a consequence, our operating results for a particular period are difficult to predict, and, therefore, prior results are not necessarily indicative of results to be expected in future periods.

The economic crisis and recession has affected and may continue to affect our direct and indirect customers' access to capital or willingness to spend capital on our products, and/or their levels of cash liquidity or willingness to pay for products that they will order or have already ordered from us. The effect of the current economic conditions on our customers may therefore lead to decreased demand, including order delays or cancellations, which in turn may result in lower revenue and may materially adversely affect our business, results of operations and financial condition.

Likewise, the current global economy may negatively affect our suppliers' access to capital and liquidity with which to maintain their inventories and production levels and could cause them to raise prices or lower production levels, or result in their ceasing operations. The challenges that our suppliers may face in selling their products or otherwise in operating their businesses may lead to our inability to obtain the materials we use to manufacture our products. Indeed, we have observed a trend among our suppliers to have decreased inventory and therefore longer lead times in obtaining parts, supplies and other goods. These actions could cause us to have longer lead times in producing products for delivery to our customers, reductions in our revenue, increased price competition and increased operating costs, which could materially adversely affect our business, results of operations and financial condition.

The current economy and related market instability has made it difficult for us, our customers and our suppliers to accurately forecast future product demand trends, particularly in our communications equipment segment. If, as a result, we produce excess products, our inventory carrying costs will increase and result in obsolete inventory. Alternatively, due to the forecasting difficulty caused by the unstable economic conditions, we may be unable to satisfy demand for our products, which may in turn result in a loss of business opportunities and market share.

We finance a portion of our sales through trade credit. While we perform ongoing credit evaluations of our customers' financial condition, we could suffer significant losses if our customers are unable or unwilling to pay us. Our record of losses from being unable to recover accounts receivable has been good but while global economic conditions continue, there is a risk of losses of accounts receivable that may have a negative impact on our financial results.

Our defense and aerospace programs are highly dependent on economic and political factors which are outside of our control. Changes in defense budgets in countries around the world and/or changes in priorities on such spending could materially adversely affect our business.

We sell our commercial and military electronic devices primarily to OEMs, including manufacturers of aerospace and defense systems and industrial instruments. We are highly dependent on defense budgets to utilize our products in various electronic warfare applications. Changes in defense budgets and/or changes in priorities of defense budgets may reduce or redirect defense spending. If defense spending is reduced or redirected, it may affect our current contracts as well as our ability to procure additional defense contracts, which could have a negative effect on our business, results of operations and financial condition.

We are exposed to various legal, business, political and economic risks associated with our international operations, which could negatively affect our business.

We undertake various sales and marketing activities through our facilities in England and France. Sales by these foreign business units accounted for 97% our net sales in 2014 and will account for 100% of our sales in 2015 and beyond. International operations are subject to many other inherent risks, including but not limited to:

fluctuations in currency exchange rates;

import and export license requirements and restrictions of the U.S. and each other country in which we operate;

exposure to different business practices and legal standards, particularly with respect to intellectual property;

repatriation of profits;

the imposition or changes to regulations, governmental controls and restrictions;

burdens of complying with a variety of foreign laws;

changes in taxation and tariffs; and

the reliance of the U.S. business on foreign governments.

Any of the factors described above may have a material adverse effect on our ability to increase or maintain our foreign sales. Many of the factors described above, particularly currency exchange rates, have an impact on our financial results and/or on our liquidity and working capital position, which can be negative and can be material.

If our products fail to comply with evolving government and industry standards and regulations, we may have difficulty selling our products and/or we may incur significant warranty liabilities associated with existing products.

We design our products to comply with a significant number of industry standards and regulations, some of which are evolving as new technologies are deployed. Our products must comply with various regulations defined by the Federal Communications Commission and Underwriters Laboratories, the American National Standards Institute, among others, as well as industry standards such as those established by Telcordia Technologies, Inc. (communications), Federal Aviation Authority (aerospace) and The Boeing Company, among others. Internationally, our products must comply with standards established by the European Committee for Electro technical Standardization, the European Committee for Standardization, the European Telecommunications Standards Institute, and telecommunications authorities in various countries as well as with recommendations of the International Telecommunications Union,

Airbus and various civil aviation authorities, among others. Our products for the military markets are typically tested and require the production of a first article and other prototypes, which are subject to testing to meet specific customer and government regulations. The failure of our products to comply, or delays in compliance, with the various existing and evolving standards could negatively affect our ability to manufacture and/or sell our products in the future and/or may result in significant warranty liability for noncompliance on existing products.

Financial statements of our foreign subsidiaries are prepared using the relevant foreign currency that must be converted into U.S. dollars for inclusion in our consolidated financial statements. As a result, exchange rate fluctuations have historically and may in the future materially adversely affect our reported results of operations.

Our subsidiaries in England and France prepare their financial statements in the relevant local foreign currency. In order to be included in our consolidated financial statements, the balance sheets are converted, at the then current exchange rate, into U.S. dollars, and the statements of operations are converted using average exchange rates for the applicable period. Fluctuations of the foreign currencies relative to the U.S. dollar have materially affected and may in the future materially affect our consolidated financial statements. Sales of our products and services from these subsidiaries outside of the U.S. accounted for approximately 97% of our net sales in 2014 and 95% of our sales in 2013. Our ultimate realized gain or loss with respect to currency fluctuations will depend on the currency exchange rates and other factors in effect as the contracts mature.

The magnitude of these gains or losses depends upon movements in the exchange rates of the foreign currencies in which we transact business as compared to the value of the U.S. dollar. During 2014, these currencies included the euro and the British pound sterling. Any future translation gains or losses could be significantly higher or lower than those we recorded for these periods. The relevant rates for 2014 and 2013 were:

U.S. Dollar equivalent		
At December 31,	2014	2013
Year-end rate		
£ Sterling	1.56	1.65
Euro	1.21	1.38
Average for the year		
£ Sterling	1.65	1.56
Euro	1.33	1.33

Net foreign exchange translation gains and losses included in other income and expense in our consolidated statements of operations resulted in a profit of \$283,000 for 2014 and a loss of \$130,000 for 2013. We cannot control currency fluctuations and future losses could be greater than in the past.

Our results of operations could be adversely affected as a result of impairments of goodwill and other intangible assets, which may cause the price of our common stock to fluctuate or decline.

When we acquire a business, we assign estimated values to certain intangible assets and we also record an asset called “goodwill” equal to the excess amount we pay for the business, including liabilities assumed, over the fair value of the tangible and intangible assets of the business we acquire. Guidance issued by the Financial Accounting Standards Board (“FASB”) under the FASB Accounting Standards Codification (the “Codification”) provides that goodwill and other intangible assets that have indefinite useful lives not be amortized, but instead be tested at least annually for impairment, and intangible assets that have finite useful lives continue to be amortized over their useful lives. The Codification provides specific guidance for testing goodwill and other non-amortized intangible assets for impairment. This guidance requires management to make certain estimates and assumptions when allocating goodwill to reporting units and determining the fair value of reporting unit net assets and liabilities, including, among other things, an assessment of market conditions, projected cash flows, investment rates, cost of capital and growth rates, which could significantly impact the reported value of goodwill and other intangible assets. Fair value is determined using a combination of the discounted cash flow, market multiple and market capitalization valuation approaches. Absent any impairment indicators, we perform our impairment tests annually at year end. As part of our 2014 and 2013 annual tests for impairment to goodwill and other intangible assets, we noted no events of impairment. Any future impairment, could negatively impact our results of operations for the period in which the impairment is recognized which, in turn, may cause our stock price to fluctuate or decline.

Because we believe that proprietary rights are material to our success, misappropriation of these rights could materially adversely affect our financial condition.

Our future success is highly dependent on proprietary technology, particularly in our communications equipment business. However, we do not hold any patents and we currently rely on a combination of contractual rights, copyrights, trademarks and trade secrets to protect our proprietary rights in this area. Our management believes that because of the rapid pace of technological change in the industries in which we operate, the legal intellectual property protection for our products is a less significant factor in our success than the knowledge, abilities and experience of our employees; the frequency of our product enhancements; the effectiveness of our marketing activities; and the timeliness and quality of our support services. Consequently, we rely to a great extent on trade secret protection for much of our technology. However, there can be no assurance that our means of protecting our proprietary rights will be adequate or that our competitors or customers will not independently develop comparable or superior technologies or obtain unauthorized access to our proprietary technology, which can be difficult and expensive to monitor and enforce. Our financial condition would be materially adversely affected if we were to lose our competitive position due to our inability to adequately protect our proprietary rights as our technology evolves.

Breaches of data security could negatively impact our business.

Our products, services, and systems may affect critical third party operations. Breaches in security could expose the Company, our customers or others to risks of loss, resulting in litigation and potential liability for us, as well as the loss of existing or potential customers and damage to our brand and reputation. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Because we depend on computer and telecommunications systems we do not own or control, we are potentially subject to the adverse effects of third party operational system failures.

We have entered into agreements with third parties for hardware, software, telecommunications and database services in connection with the operation of our facilities. We have several licenses from third parties. We may be subject to disruptions of our operational systems arising from events that are wholly or partially beyond our control (for example, natural disasters, acts of terrorism, epidemics, computer viruses and telecommunications outages). These third party systems and licenses on which we rely could also suffer operational system failure. Any interruptions to our arrangements with third parties, to our computing and communications infrastructure, or our information systems could significantly disrupt our business operations and result in potential liability or reputational damage or otherwise have an adverse impact on our financial results.

Risk Factors Relating to the Proposal to Approve the Transaction

If we fail to complete the Transaction, our business may be harmed.

We cannot provide assurances that the Transaction will be completed. The closing of the Transaction is subject to a number of conditions, including but not limited to shareholder approval and the absence of a material adverse effect on EEL's business. If the Transaction is terminated because the Company fails to hold a special meeting to approve the Transaction within a specified time period or if the Transaction is not approved by stockholders, we will be required to pay up to \$300,000 of DDC's expenses incurred in connection with the Transaction. In certain other circumstances (as described in further detail in the Purchase Agreement), we will be required to pay to DDC up to \$800,000 of DDC's expenses incurred in connection with the Transaction.

As a result of our announcement of the Transaction, third parties may be unwilling to enter into material agreements with respect to the electronic devices business segment. New or existing customers and business partners may prefer to enter into agreements with our competitors who have not expressed an intention to sell their business because customers and business partners may perceive that such new relationships are likely to be more stable. If we fail to complete the Transaction, the failure to maintain existing business relationships or enter into new ones could adversely affect our business, results of operations and financial condition. In addition, if the Transaction is not completed, the market price for our common stock may decline.

Our announcement of the Transaction may cause employees working for EEL and its subsidiaries to become concerned about the future of the business and lose focus or seek other employment.

In addition, if the Transaction is not completed, our directors, executive officers and other employees will have expended extensive time and effort and experienced significant distractions from their work during the pendency of the Transaction and we will have incurred significant third party transaction costs, in each case, without any commensurate benefit, which may have a material and adverse effect on our stock price and results of operations.

If the Transaction is not completed, we may explore other potential transactions involving the Company and its electronic devices business segment. The terms of such an alternative transaction may be less favorable to us than the terms of the Transaction and there can be no assurance that we will be able to reach agreement with or complete such an alternative transaction with another party.

The failure to complete the Transaction may result in a decrease in the market value of our common stock and limit our ability to implement our business strategies.

The completion of the Transaction is subject to a number of contingencies, including approval by our stockholders and other closing conditions set forth in the Purchase Agreement. We cannot predict whether we will succeed in obtaining the approval of our stockholders or whether the other conditions to closing the Transaction pursuant to the Purchase Agreement will be satisfied. As a result, we cannot offer assurance that the Transaction will be completed. In the event that the Transaction is not completed, this may have a material adverse effect on our business prospects, operating results and financial condition and the market value of our common stock may decline.

Risk Factor Related to the Plan of Dissolution

If our stockholders vote against the Plan of Dissolution proposal, our business could be harmed.

If we do not obtain stockholder approval of the Plan of Dissolution, we would have to continue our business operations despite the sale of substantially all of our assets and our announced dissolution. Assuming the completion of the Transaction, we would have limited assets with which to generate operating revenue and likely will have retained only those employees required to wind-up our corporate existence.

Risks Related to Our Common Stock

There is limited trading and investor interest in our stock which creates risks for investors when trying to sell our stock and limits the Company's ability to raise cash for expansion or working capital by placing our stock.

Our stock is quoted on the OTCQB trading venue but trading volumes are low due to limited investor interest in Micro Cap stocks, lack of liquidity in the stock, a negative stock price trend and a very low market capitalization. The stock price is volatile and responds to relatively small blocks of shares being bought or sold with disproportionate price swings. This limits the Company's ability to use the stock to raise capital or to fund any strategic growth initiatives including mergers or acquisitions without a significant dilution of existing stockholders.

Our common stock price has been volatile, which has resulted in substantial losses for some investors purchasing shares of our common stock and could result in further losses or litigation against the Company.

The market prices of securities of technology-based companies have been and will likely continue to be highly volatile. The market price of our common stock has fluctuated significantly in the past. During 2014, the high and low closing sale prices of a share of our common stock were \$1.10 and \$0.55, respectively, and the average closing price across the year was \$0.84. Our stock price has exhibited volatility and may continue to do so in the future. In addition, the market price of our common stock may continue to fluctuate in response to the following factors, many of which are beyond our control:

our success or failure to execute on our business strategy;

whether the Company can become profitable and whether it can sustain profitability;

additions or departures of key personnel;

foreign currency translations gains or losses;

fluctuations in our quarterly or annual operating results and whether such results meet investor expectations;

changes in market valuations of similar companies and stock market price and volume fluctuations generally;

general global economic weakness;

economic conditions specific to the electronic devices or communications equipment industries;

announcements by us or our competitors of new or enhanced products, technologies or services or significant contracts, acquisitions, strategic relationships, joint ventures or capital commitments;

delays in our introduction of new products or technological innovations or problems in the functioning of these new products or innovations;

third parties' infringement of our intellectual property rights, or our potential infringement of another party's intellectual property rights;

changes in our pricing policies or the pricing policies of our competitors;

regulatory developments;

future sales of our common stock or other securities; and

perception and confidence of investors regarding future prospects for the Company.

The price at which you purchase shares of common stock may not be indicative of the price of our stock that will prevail in the trading market. You may be unable to sell your shares of common stock at or above your purchase price, which may result in substantial losses to you. Moreover, in the past, securities class action litigation has often been brought against a company following periods of volatility in the market price of its securities. We may in the future be the target of similar litigation. Securities litigation could result in substantial costs and divert management's attention and resources and could have a significant impact on profitability, future cash flows and stock price.

Future sales of shares of our common stock by our stockholders could cause our stock price to decline.

We cannot predict the effect, if any, that market sales of shares of our common stock or the availability of shares of common stock for sale will have on the market price prevailing from time to time. As of March 27, 2015, we had approximately 10.8 million shares of common stock outstanding and 0.3 million outstanding options. A substantial number of these shares are eligible for public resale. Sales of shares of our common stock in the public market, or the perception that those sales may occur, could cause the trading price of our common stock to decrease or to be lower than it might be in the absence of those sales or perceptions.

Because our market capitalization is small, we could remain a target for a buyer or subject to a hostile takeover at a value that is less than the value that could be realized in a planned sale and liquidation.

Because of the Company's current common stock price, aggregate market capitalization and potential market value of its assets, and its annual revenue, the Company may be an attractive target to a buyer or subject to a hostile takeover at a depressed value. Such price could be at a premium to the market price at the time of the transaction and still be significantly below the purchase price paid by most stockholders. The Company's stock is concentrated in the hands of a limited number of groups of independent shareholders which could exercise their rights to influence the strategic direction of the Company to the detriment of the existing plans. If a takeover attempt occurred, it might cause distractions for our management and our Board and this might prevent us from executing on our strategic plans, preserving the value of the Company for creditors and stockholders and growing the Company. In addition, a successful takeover attempt might result in a change of the Company's management and directors.

The volatility of our quarterly and annual operating results may cause the price of our common stock to fluctuate or decline.

Our quarterly operating results have varied significantly in the past and will likely continue to do so in the future due to a variety of factors, many of which are not within our control. Sometimes these factors can cause more prolonged periods of increased or decreased operating results, measured in quarters or years.

The cyclical nature of the communications equipment business due to the budgetary cycle of many of our key customers in this segment has had and will likely continue to have, for the foreseeable future, an effect on our quarterly operating results. Companies that utilize our communication equipment generally obtain approval for their annual budgets during the first quarter of each calendar year. If a company's annual budget is not approved early in the calendar year or is insufficient to cover its desired purchases for the entire calendar year, then we are unable to sell products to the company during the period of the delay or shortfall. In addition, these budgets historically tend to vary significantly year by year, depending on a variety of factors, including overall economic conditions. A significant

reduction in any one customer's or group of customer's budgets could reduce our overall sales, profits and cash flows in the future.

Sales of our electronic devices are often made in conjunction with large military or commercial aerospace contracts. The timing of required deliveries under these contracts can be delayed based on issues related to the overall contract, which can cause delays in our shipment schedules, revenue recognition, profits and cash flows. In periods between completion of one long term contract and commencement of sales under a new contract, our revenues could be reduced. The impact of these periods between contracts can last for months, quarters or, occasionally, years.

Quarter-to-quarter fluctuations may also result from the uneven pace of technological innovation, the development of products responding to these technological innovations by us and our competitors, our customers' acceptance of these products and innovations, the varied degree of price, product and technological competition and our customers' and competitors' responses to these changes.

Due to these and other factors, including changes in general economic conditions, we believe that period-to-period comparisons of our operating results will not necessarily be meaningful in predicting future performance. If our operating results do not meet the expectations of investors, our stock price may fluctuate or decline.

Not applicable.

Item 2. Properties.

As of March 27, 2015, we leased or owned approximately 75,000 square feet of administrative, engineering, production, storage and shipping space. 36% of this space, being the site in Ashford, England, was leased from a third party. The following table represents our properties as of March 27, 2015:

Business Unit	Location	Segment	Use	Approximate Size
The Company leases the following premises:				
XCEL Power Systems, Ltd. and EMRISE Electronics Ltd.	Ashford, Kent, England	Electronic Devices	Administration, Engineering and Manufacturing and Testing	27,000 sq. feet
The Company owns the following premises:				
Pascall Electronics Limited	Ryde, Isle of Wight, England	Electronic Devices	Administration, Engineering and Manufacturing and Testing	35,000 sq. feet
CXR AJ	Abondant, France	Communications Equipment	Administration, Engineering and Manufacturing and Testing	13,000 sq. feet

We believe that these facilities are suitable for the purposes for which we use them. We believe that we have sufficient facilities to conduct our operations during 2014. The majority of our facilities have warehouse space that can be converted to production areas in the event that expansion is necessary without purchasing or leasing of additional property. We recognize the importance of flexibility to adjust our property to match the business requirements.

Item 3. Legal Proceedings.

We are not currently involved in any litigation that we believe could have a materially adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our Company or any of our subsidiaries, threatened against or affecting our Company, our common stock, any of our subsidiaries or of our Company's or our Company's subsidiaries' officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.*****(a) Market Information***

Our common stock is currently trading on the OTC Markets Group Inc. trading venue in their OTCQB category under the symbol "EMRI". The table presented below shows, for each fiscal quarter, the high and low closing prices for shares of our common stock on the OTCQB. The prices shown reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not necessarily represent actual transactions.

	High	Low
Year ended December 31, 2014		
First	\$1.10	\$0.79
Second	\$1.00	\$0.72
Third	\$0.88	\$0.65
Fourth	\$0.88	\$0.55
Year ended December 31, 2013		
First	\$0.60	\$0.47
Second	\$0.55	\$0.44
Third	\$0.55	\$0.44
Fourth	\$0.84	\$0.46

(b) Holders

As of March 27, 2015, we had 10,816,337 shares of common stock outstanding held of record by approximately 480 stockholders in addition to numerous stockholders whose holdings are held in 'Street Name'. These holders of record include depositories that hold shares of stock for brokerage firms which, in turn, hold shares of stock for numerous beneficial owners. On March 27, 2015, the closing sale price of our common stock on the OTCQB was \$0.92 per share.

(c) Dividends

We have not declared or paid any cash dividends on our capital stock in the past. We will pay dividends on our common stock only if and when declared by our Board. Our Board's ability to declare a dividend is subject to restrictions imposed by Delaware law. In determining whether to declare dividends, the board of directors will consider these restrictions as well as our financial condition, results of operations, working capital requirements, future prospects and other factors it considers relevant.

(d) Securities Authorized for Issuance under Equity Compensation Plans

Information regarding securities authorized for issuance under our existing equity compensation plans can be found in Part III, Item 12 herein.

Recent Sales of Unregistered Securities

During the year ended December 31, 2014, there were no sales of unregistered securities.

Rule 10B-18 Transactions

During the year ended December 31, 2014, there were no repurchases of the Company's common stock by the Company.

Item 6. Selected Financial Data.

Not applicable.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with our consolidated financial statements and the related notes thereto contained elsewhere in this Report. This Report and the following discussion contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, which generally include the plans and objectives of management for future operations, including plans and objectives relating to our future economic performance and our current beliefs regarding revenues we might generate, expenses we might incur and profits we might earn if we are successful in implementing our business and growth strategies. The forward-looking statements and associated risks may include the risk factors described in detail in this Report and relate to or are qualified by other important factors, including, without limitation:

our ability to pay outstanding debt as it comes due;

our ability to successfully support the working capital needs of our company;

our ability to maintain our cost management activities implemented over the past years and to otherwise contain costs;

our ability to increase revenues through additional sales, customers, products and pricing;

our ability to reach sustained profitability;

our ability to continue to borrow funds under the financing arrangements currently in place (see “-Liquidity and Capital Resources”) or to secure additional financing in the future;

exposure to and impacts of various international risks including legal, business, political and economic risks associated with our international operations, also including the impact of foreign currency translation (see “-Foreign Currency Translation”);

the projected growth or contraction in the electronic devices and communications equipment markets in which we operate, including military and defense spending across the globe;

our strategies for expanding, maintaining or limiting our presence in these markets;

anticipated trends in our financial condition and results of operations;

our ability to distinguish ourselves from our current and future competitors;

our ability to secure long term purchase orders;

our ability to deliver against our existing or future book of shippable orders (backlog);

technical or quality issues experienced by us, our suppliers and/or our customers;

failure to comply with existing or future government or industry standards and regulations;

our ability to successfully locate, acquire and integrate any possible future acquisitions;

the impact of current and/or future economic conditions, including but not limited to, the overall condition of the stock market, the overall credit market, the global recession, political, economic and/or other constraints which are or may negatively impact the industries in which we participate and/or the ability for us to market the products which we sell; and

our ability to successfully compete against competitors that in many cases are larger than us, have access to significantly more working capital than we do and have significant resources in comparison to us.

We do not undertake to update, revise or correct any forward-looking statements.

Any of the factors described above or in the “Risk Factors” sections contained in this Report could cause our financial results, including our net income or loss or growth in net income or loss, to differ materially from prior results, which in turn could, among other things, cause the price of our common stock to fluctuate substantially and/or decline.

Recent Transactions

Dispositions

On October 8, 2014, CXR Larus Corporation (“CXR Larus”), a wholly-owned subsidiary of EMRISE located in California, entered into an agreement with LDDF Incorporated, doing business as TesCom, to sell the business and specific assets of CXR Larus, which formed part of our communications equipment segment. Under the agreement, the Company retained the remaining accounts receivable and retained the cash in the business at the date of sale. The initial net cash settlement was \$174,000 but the agreement allows for a small royalty on sales made in the ensuing twelve months. The Company incurred a loss on disposal of \$200,000 against the carrying value of the inventory and incurred severance costs of \$103,000 and professional fees of \$25,000 as a result of the sale. Since the year end the remaining accounts receivable have been collected, liabilities paid, the business closed and the employees have left the Company.

Post Year-end Proposed Sale of The Electronic Devices Segment

On March 22, 2015, the Company entered into a purchase agreement with DDC (United Kingdom) Ltd., a subsidiary of Data Device Corporation (“DDC” or the “Purchaser”), to sell all of the issued and outstanding shares of the common stock of the Company’s wholly owned subsidiary, EMRISE Electronics Ltd. (“EEL”), for a purchase price of \$22 million, net of debt and transaction expenses and subject to a working capital adjustment (the “Transaction”). EEL is the holding company for the electronic devices segment of the business. This segment constituted 68% of the Company’s sales in both 2014 and 2013 and \$3.8 million and \$2.7 million operating profit in the years ended December 31, 2014 and 2013 respectively. The sale has been unanimously approved by the Board but is subject to shareholder approval with a vote through a proxy process.

In connection with the Purchase Agreement, the Company and Purchaser have agreed to deposit \$900,000 of the purchase price into escrow at the closing of the Transaction (the “Closing”) to secure certain indemnification obligations of the Company under the Purchase Agreement. This escrow amount will remain available for satisfaction of any indemnification claims until twelve months following the Closing, at which time any remaining balance not subject to outstanding and unresolved claims will be distributed to the Company.

In connection with the Company’s entry into the Purchase Agreement, certain individuals specified in the Purchase Agreement, including Graham Jefferies, our President and Chief Operating Officer, have entered into employment agreements with Purchaser to become effective at Closing. Further details of the Transaction can be found in the Company’s Current Report on Form 8-K, as filed with the SEC on March 23, 2015.

Business Description

We design, manufacture and market proprietary electronic devices and communications equipment for aerospace, defense, industrial, and communications applications. We have operations in the United States, England, and France. We organize our business in two operating segments: electronic devices and communications equipment. In 2014, our electronic devices segment contributed 68% of overall net sales while the communications segment contributed 32% of overall net sales. Our subsidiaries within our electronic devices segment design, develop, manufacture and market power supplies, RF, and microwave devices for defense, aerospace and industrial markets. Our French subsidiary which, since October 2014, has been the only Company within our communications equipment segment, designs, develops, manufactures and markets network access equipment, including network timing and synchronization products, for communications applications in public and private networks, defense and industrial markets, including utilities and transportation.

Within our electronic devices segment, we produce a range of power systems and RF and microwave devices. This segment is primarily “project” driven, with the majority of revenues being derived from custom products with long life cycles and high barriers to entry. The majority of manufacturing and testing is performed in-house or through sub-contract manufacturers. Our electronic devices are used in a wide range of military airborne, seaborne and land-based systems, and in-flight entertainment systems, including the latest next generation In-Flight Entertainment and Connectivity (“IFE&C”) systems, such as applications for mobile phone, e-mail and internet communications and real time, on-board satellite and broadcast TV, which are being installed in new commercial aircraft as well as being retrofitted into existing commercial aircraft.

Within our communications equipment segment, we produce a range of network access equipment, including network timing and synchronization products, for public and private communications networks. This segment is “end-user product” based with a traditional cycle of internally funded development and marketing prior to selling via direct and indirect sales channels. Manufacturing is primarily outsourced. Our communications equipment is used in a broad range of network applications primarily for private communications networks, public communications carriers, and also for utility companies and military applications, including homeland security.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of net sales and expenses for each period. The following represents a summary of our critical accounting policies, defined as those policies that we believe are the most important to the portrayal of our financial condition and results of operations and that require management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.

Revenue Recognition

We derive revenues from sales of electronic devices and communications equipment products and services and extended warranty contracts. Our sales are based upon written agreements or purchase orders that identify the type and quantity of the item and/or services being purchased and the purchase price. We recognize revenues when shipment of products has occurred or services have been rendered, no significant obligations remain on our part, and collectability is reasonably assured based on our credit and collections practices and policies and our experience of prior dealings with our customers.

We recognize revenues from domestic sales at the point of shipment of those products. An estimate of warranty cost is recorded at the time the revenue is recognized. Product returns are infrequent and require prior authorization because our sales are final and we quality test our products prior to shipment to ensure the products meet the specifications of the binding purchase orders under which those products are shipped. Normally, when a customer requests and receives authorization to return a product, the request is accompanied by a purchase order for a repair or for a replacement product.

Revenue recognition for products and services provided by our subsidiaries in United Kingdom depends upon the type of contract involved. Engineering/design services contracts generally entail design and production of a prototype over a term of up to several years, with revenue deferred until recognized over the term of the contract on a percentage of completion basis. Production contracts provide for a specific quantity of products to be produced over a specific period of time. Customers issue binding purchase orders or enter into binding agreements for the products to be produced. We recognize revenues on these orders as the products are shipped. Returns are infrequent and permitted only with prior authorization because these products are custom made to order based on binding purchase orders and are quality tested prior to shipment. An estimate of warranty cost is recorded at the time revenue is recognized. We offer extended warranty contracts for an additional cost to our customers, which we recognize ratably over the term of the extended warranty contract under either the milestone method or percentage of completion method, whichever is

most appropriate under GAAP.

We recognize revenues for products sold by our subsidiary in France at the point of shipment. Customer discounts are included in the product price list provided to the customer. Returns are infrequent and permitted only with prior authorization because these products are shipped based on binding purchase orders and are quality tested prior to shipment. An estimate of warranty cost is recorded at the time revenue is recognized.

Revenues from services such as repairs and modifications are recognized when the service is completed and invoiced. For repairs that involve shipment of a repaired product, we recognize repair revenues when the product is shipped back to the customer. Service revenues contribute less than 5% of total revenue and, therefore, are considered to be immaterial to overall financial results.

Product Warranty Liabilities

The Company's electronic devices products are generally bespoke in nature and these carry a limited parts and labor warranty that is specific to each contract. These warranties usually vary in length from one to two years. In certain circumstances, the Company provides a two-year, limited parts and labor warranty on communications test instruments and network access products but these are more normally of one year duration. The Company also offers extended warranties beyond two years for an additional cost to its customers. Products returned under warranty typically are tested and repaired or replaced at our option. Historically, we have not experienced significant warranty costs or returns.

We record a liability for estimated costs that we expect to incur under our basic limited warranties when product revenue is recognized. Factors affecting our warranty liability include the number of units sold, the types of products involved, historical and anticipated rates of claim and historical and anticipated costs per claim. We periodically assess the adequacy of our warranty liability accrual based on changes in these factors.

Inventory Valuation

Our finished goods electronic devices inventories generally are built to order. Our communications equipment inventories generally are built to forecast, which requires us to produce a larger amount of finished goods in our communications equipment business so that our customers can be served promptly. Our products consist of numerous electronic and other materials, which necessitate that we exercise detailed inventory management. We value our inventory at the lower of the actual cost to purchase or manufacture the inventory (first-in, first-out) or the current estimated market value of the inventory (net realizable value). We perform cycle counts of inventories using an ABC inventory methodology, which groups inventory items into prioritized cycle counting categories, or we conduct physical inventories at least once a year. We regularly review inventory quantities on hand and record a provision for excess and obsolete inventory based primarily on our estimated forecast of product demand and production requirements for the next 12 to 24 months. Additionally, to determine inventory write-down provisions, we review product line inventory levels and individual items as necessary and periodically review assumptions about forecasted demand and market conditions. Any inventory that we determine to be obsolete, either in connection with the physical count or at other times of observation, is specifically reserved for and subsequently written-off.

The electronic devices and communications equipment industries are characterized by rapid technological change, frequent new product development, and rapid product obsolescence that could result in an increase in the amount of obsolete inventory quantities on hand. Also, our estimates of future product demand may prove to be inaccurate, in which case we may have understated or overstated the provision required for excess and obsolete inventory. Although we make every effort to ensure the accuracy of our forecasts of future product demand, any significant unanticipated changes in demand or technological developments could have a significant impact on the value of our inventory and our reported operating results.

Foreign Currency Translation

We have foreign subsidiaries that together accounted for approximately 97% of our net revenues in the fiscal year ended December 31, 2014 and 95% in the fiscal year ended 2013. At December 31, 2014 and 2013, our foreign subsidiaries contributed 99% and 96% of our total assets, respectively. In preparing our consolidated financial statements, we are required to translate the financial statements of our foreign subsidiaries from the functional currencies in which they keep their accounting records into U.S. dollars, our reporting currency. The assets and liabilities of the foreign entities have been translated to U.S. dollars at the current rate of exchange as of the balance sheet date and an average exchange rate for the period is used to translate the statement of operations. Translation

adjustments are included in other comprehensive income/(loss).

If we dispose of any of our subsidiaries, any cumulative translation gains or losses would be realized into our statement of operations. If we determine that there has been a change in the functional currency of a subsidiary to U.S. dollars, then any translation gains or losses arising after the date of the change would be included within our statement of operations.

Long-Lived Assets and Amortizing Intangible Assets

The Company reviews the carrying amount of its long-lived assets and other amortizing intangible assets, for possible impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Amortizing intangible assets are stated at cost, less accumulated amortization, and are amortized on the straight-line method over their estimated useful lives ranging from two to twenty years. At December 31, 2014, the cost of these assets had been reduced to a carrying value of nil through the regular annual amortization charge. The Company periodically reviews the original estimated useful lives of long-lived assets and makes adjustments when appropriate.

Goodwill and Indefinite Lived Intangible Assets

At December 31, 2014, our reported goodwill totaled \$5.0 million and our reported indefinite-lived assets totaled \$0.37 million, all of which belonged to the electronic devices reporting unit. The indefinite-lived assets consist of trademarks and trade names which are essential to our business and future income streams.

The Company evaluates goodwill and indefinite lived intangibles in accordance with FASB's Accounting Standard Codification ("ASC") Topic Number 350, Intangibles-Goodwill and Other. The Company assesses the qualitative factors to determine whether the existence of events or circumstances might lead to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If there are any factors that indicate that there could be an impairment then the Company tests for impairment of goodwill and indefinite lived intangible on an annual basis and tests more frequently if a specific event occurs or circumstances change that suggest that there is an indicator of impairment. When testing for goodwill impairment the Company adopts a two-step approach whereby in step one if the carrying value of the reporting unit exceeds the fair value of the reporting unit, an impairment is indicated and the amount of impairment is then calculated by the amount the carrying value of the goodwill exceeds the implied fair value of the goodwill. The Company's reporting units have been identified as electronic devices and communications equipment. The Company performs its annual required tests of impairment as of December 31. In performing the valuation, the Company uses cash flows that reflect management's forecasts and discount rates that reflect the risks associated with the current market. The Company considers the results of an income approach in determining the fair value of the reporting units.

At December 31, 2014 and 2013, reported goodwill totaled \$5.0 million and \$5.3 million, respectively, all of which belonged to the electronic devices reporting unit. After assessing the totality of events or circumstances, the Company determined that it is not more likely than not that the fair value of the electronic devices reporting unit is less than its carrying amount at December 31, 2014.

Overview

Overall net sales rose 12% in 2014 compared to 2013. This sales growth has encompassed notable increases in volumes at both the electronic devices and communications equipment segments. This extra volume has driven increased efficiency, reaping economies of scale leading to improved gross margin and an Income from operations of

\$1.5 million compared with an operating loss of \$0.25 million in 2013.

In addition the backlog of confirmed orders continued to climb and at December 31, 2014 stood at the highest level for many years, 43% ahead of the level twelve months earlier.

Against this background and to obtain a full understanding of the year and the progress that the Company has made in that time we believe it is helpful to detail certain specific events that have affected the Company's finances for the twelve months ended December 31, 2014 and the financial position at that date. Some of these items were first reported in the Quarterly Reports on Form 10-Q as filed with the SEC during 2014. The pertinent events and the associated costs were as follows:

On April 1, 2014, the Company drew down a new, fixed interest rate, three-year term loan from Lloyds Bank for \$1.8 million. This loan replaced the existing term loan from Lloyds Bank that at the time it was replaced had a balance of approximately \$0.7 million outstanding. The new term loan increased the Company's borrowing capacity by approximately \$1.1 million. The loan has a fixed interest rate of 6.6% and repayments of capital are due over 36 equal monthly installment sums. This new loan also replaced existing cash that was used to repay the Amended Subordinated Contingent Notes (as defined below) with a value of \$1.977 million. Such notes had been scheduled for redemption in December 2014 but the loan enabled the Company to redeem the notes early without penalty on April 7, 2014.

- On April 7, 2014, the Company repaid promissory notes with a principal value of \$1.977 million together with accrued interest and expenses due to the agent appointed by the note holder. This payment cleared the outstanding balance due under the notes issued to former owners of ACC in May 2008 (the “Amended Subordinated Contingent Notes”) with the exception of an amount due by the Company to the holders of such notes for certain Federal taxes
2. owed by such note holders as a result of long-term capital gains. Under the terms of the agreement, the Company was obligated to pay a sum equal to any additional Federal taxes payable by the holders of such notes as a result of any increase in capital gains tax rates between the date that such notes were initially issued and the date of redemption. On September 30, 2014, the Company agreed to pay \$279,000 in full and final settlement of the outstanding sums.
 3. Also at September 30, 2014, the liens over certain assets owned by the Company’s subsidiary, CXR Larus as well as its subsidiaries in the United Kingdom, in favor of the former note holders were released.

In December 2013, the Company received notification of an assessment from the Direction Generale des Finances Publiques in France challenging the basis of claims made by the Company’s French subsidiary, CXR Anderson Jacobson (“CXR AJ”), in respect of research and development activity for the years 2009 and 2010. The amount being challenged was the sum of 187,000 euros (approximately \$227,000 using the exchange rate at December 31, 2014) representing grants received in the two year period. The Company took independent advice at that time which supported the Company’s view that claims had been made in accordance with the applicable rules and regulations and the Company’s claims were defensible in their entirety. In June 2014, the Company received notification from the Direction Generale des Finances Publiques that it was requesting a further repayment of 167,000 euros (approximately \$202,000) for the two years 2011 and 2012, and in September 2014, a claim of 4. 17,000 euros (approximately \$21,000) in respect of 2013 was received. The Company, taking further independent advice continued to challenge the ruling of the Direction Generale des Finances Publiques. Initial appeals were rejected and recognizing this, at September 30, 2014 management accrued for the full amount of the claim of approximately \$451,000 (using the rate of exchange at December 31, 2014). Since the year end the Company has continued to appeal against the ruling and on March 13, 2015 the Generale des Finances Publiques accepted that its rejection of the claims was incorrect in a number of areas resulting in a reduction of the claim for repayment of the research and development grants from \$451,000 to \$62,000. The charge for the potential reclaim of had been recognized in the second and third quarters of 2014 but the release of this charge following the successful appeal, amounting \$389,000, is reflected in the fourth quarter. The liability of \$62,000 is recorded in the consolidated Balance Sheet at December 31, 2014.

- During September 2014, Raymond Jacobson passed away. The Company extends its condolences to Mr. Jacobson’s family. Mr. Jacobson was a former owner of a company that was subsequently sold to the Company. The Company
5. had an obligation to pay an inflation linked monthly sum to Mr. Jacobson for the duration of his life. The liability, which was calculated on actuarial data relating to life expectancy, discounted by the Company’s weighted average cost of capital was \$704,000, at the date of Mr. Jacobson’s death. This accrual was released to the Consolidated Statement of Comprehensive Income.

- On October 8, 2014, the Company reached agreement with a third party to sell the inventory, plant, equipment and machinery, order book and trade of its subsidiary, CXR Larus. Under the agreement the Company collected the remaining accounts receivable and retained the cash in the business at the date of sale. The initial net cash
6. settlement was \$174,000 but the agreement allowed for a small royalty on sales made in the ensuing twelve months. The Company recorded a loss on disposal of \$200,000 against the carrying value of the inventory and incurred severance costs of \$103,000 and professional fees of \$25,000 as a result of the sale.

As noted above, the year witnessed increased sales revenues and a significant up-turn in profitability. In the electronic devices segment, extra sales of In-flight entertainment products and orders for RF products that had been received in 2013 were delivered in 2014. Sales of network access products at our French communications equipment business unit improved in 2014 over 2013 but this was partially offset by lower sales in our U.S. communications equipment business unit as a result of a weak infrastructure spending in the U.S. by telecommunications companies and the U.S. government. As reported above, the assets and trade of the loss making U.S. operation were sold in October 2014.

Overall gross profit as a percentage of sales (“gross margin”) was 31.4% in 2014. In 2013, the comparable gross margin was 30.5% yielding an extra \$1.5 million of gross profit in 2014. The Company pursues a policy of only taking on orders where it is anticipated that the long-term gross margin percentage will meet its defined parameters. This requires the Company to evaluate the long-term opportunities that can result in developing and producing a particular product in collaboration with our customers, but it can also lead to turning away orders where we do not believe the payback is commensurate with the risk.

Tight control of overhead costs, coupled with the increase in gross profit, resulted in a \$1.9 million increase in operating income compared with 2013. The income before tax of \$1.3 million compares with a loss of \$0.3 million in 2013.

The following is a more detailed discussion of our results of operations by business segment.

Results of Operations

Comparison of the Year Ended December 31, 2014 to the Year Ended December 31, 2013

Net Sales

(in thousands)	Year Ended December 31,		Variance Favorable (Unfavorable)		
	2014	2013	Dollar	Percent	
Electronic devices	\$24,227	\$21,717	\$2,510	11.6	%
as % of net sales	67.9 %	68.1 %			
Communications equipment	11,438	10,181	1,257	12.3	%
as % of net sales	32.1 %	31.9 %			
Total net sales	\$35,665	\$31,898	\$3,767	11.8	%

Electronic Devices

In 2013, the Company reported that the order book had increased steadily through the year and this larger backlog translated into sales in 2014. 2013 sales had been hampered by the sporadic inflow of orders for RF products through

2012 which although expected were delayed with the consequence that although the orders did eventually arrive they were too late in the year to translate into production and therefore income in 2013. However, 2014 sales benefited as a result. The current order book for both IFE&C and RF products is particularly strong and the customer base robust. The segment has a relatively small number of large customers each of which has long term projects. This gives the Company visibility to orders and likely future demand stretching over years in the future ensuring stability but it is also a feature of the customer base and the projects that they work on that delays and rescheduling frequently occur and that the lead time on procurement of materials is lengthy. The Company is currently working on power systems for in-flight entertainment, deep-sea oil applications and a number of defense projects. These contracts all extend for a number of years into the future.

At February 28, 2015, we had a backlog of \$36.8 million compared with a backlog at March 31, 2014 of \$24 million for the electronic devices business, but the Company recognizes that there is a risk that customers may seek to delay production and delivery while the world economy continues to remain weak.

Communications Equipment

Net sales within our communications equipment segment increased principally as a result of increased demand for our network access products at our French business unit. Although we sold the assets and trade of the Company's US subsidiary in October 2014, the French business exceeded budget and made up for the loss of business in North America. Throughout the year, demand for the Company's products in Europe and Africa consistently exceeded the comparable period in 2013 and for products for which the lead time is typically just a few weeks the year-end backlog was unusually strong. 2014 sales at CXR AJ, our French subsidiary, increased by 12% to \$11.4 million compared with 2013. In local currency, sales from CXR AJ in 2014 increased by 17% over the sales figure for 2013 but a significant fall in the value of the euro against the US dollar dampened the increase once the figures were translated in to our reporting currency of US dollars. The strong sales performance was driven by the Company's network access products. The Company noted a decline in demand for point of sale projects but increasing strength for projects involving utility companies and the defense sector. The strong performance in France was offset by a 17% (\$250,000) decrease in sales from our U.S. business unit which closed in October 2014. We continued to actively work to expand the market reach for our French access products and this resulted in new orders not only across Europe but also deeper into Africa. This segment of the business has a shorter lead time on orders than the electronic devices segment so the backlog would not be expected to be as buoyant but the backlog at December 31, 2014 was \$3.1 million, compared with a figure of \$2.5 million at December 31, 2013.

Gross Profit

	Year Ended		Variance		
	December 31,		Favorable/(Unfavorable)		
(in thousands)	2014	2013	Dollar	Percent	
Electronic devices	\$7,489	\$6,280	\$ 1,209	19.3	%
as % of net sales	30.9 %	28.9 %			
Communications equipment	3,692	3,435	257	7.5	%
as % of net sales	32.3 %	33.7 %			
Total gross profit	\$11,181	\$9,715	\$ 1,466	15.1	%
Total gross margin	31.4 %	30.5 %			

The gross margins in the Company's segments are formed on different bases and therefore it is difficult to directly compare the two segments. The gross margin in the electronic devices segment reflects engineering costs and attributable overheads within cost of sales because this work is integral to specific customer design and production contracts whereas in the communications segment engineering costs and attributable overheads fall outside the gross profit calculations because these costs are not necessarily specific to individual customer contracts.

Electronic Devices

Gross margin, as a percentage of net sales, for our electronic devices segment increased by two (2) percentage points to 30.9% in 2014 compared with 28.9% in 2013. The gross margin is heavily influenced by the sales mix, the competitive tendering for design and production contracts and the ability of our team to deliver the design according to specification. The custom-nature of our products makes year by year comparison difficult but the margins are in line with internal guidelines. The electronic devices segment's production for the military market tend to benefit from overall higher margins than the Company's products for the commercial market but often the military market requires high specification engineering design work where costs and outcomes are uncertain and this requires an element of risk in tendering and estimating costs. 2014 featured a number of engineering design contracts that completed or were nearing completion. Margins on this engineering work tend to be lower than military production contracts but are a requirement in order to secure the future production contract. The backlog reflects the future production contracts. The commercial market-place where volumes can be higher tends to be more competitive and hence margins are usually tighter but volumes are generally larger.

Communications Equipment

The communications equipment segment has traditionally been able to command higher gross margins for its products than the electronic devices segment. This is partially due to the basis on which costs are allocated across the various cost headings. The Company's gross margin in the communications equipment segment remained relatively steady at 32.3% in 2014 compared with 33.7% in 2013. Increasingly, our French business is getting the opportunity to tender for larger contracts but these tend to have lower gross margins and the expansion into Africa carries additional risk and costs in terms of advancing credit, supply chains and unforeseeable delays. Despite this, our French company maintained a gross margin of 35.2% compared with 35.4% in 2013 and the increased volumes yielded \$0.5 million additional gross profit compared with the prior year. The relatively weak demand for the communication products in the U.S. marketplace put additional pressure on margins in this territory and in October 2014, we closed our US operations resulting in a loss on disposal of the inventory as discussed above.

Operating Expenses

	Year Ended December 31,		Variance Favorable (Unfavorable)	
	2014	2013	Dollar	Percent
(in thousands)				
Selling, general and administrative	8,968	8,334	(634)	(7.6)
Annuity accrual release	(704)	-	704	-
Total Selling, general and administrative	\$8,264	\$8,334	\$70	0.8 %
as % of net sales	23.2 %	26.1 %		
Engineering and product development	1,265	1,132	(133)	(11.8)%
as % of net sales	3.5 %	3.5 %		
Total operating expenses from continuing operations	\$9,529	\$9,466	\$(63)	(0.6)%

Selling, General and Administrative

Selling, general and administrative (“SG&A”) expenses for 2014 decreased for a fourth successive year as the Company continued to focus on containing costs. The significant increase in sales activity led to additional selling costs but these were offset by the release of the annuity accrual on the death of Mr. Jacobson referred to above. Without the benefit of the accrual release the increase in SG&A costs was \$634,000, eight percent (8%) greater than 2013.

Engineering and product development

Engineering and product development costs are focused in the Company’s communications equipment segment rather than the electronics device segment where project driven engineering and product development costs are absorbed within the costs charged to customers. The net cost of engineering and product development costs charged against income increased by \$133,000 in 2014 compared with 2013. This was principally due to new product development in our French communications business which has allowed this business to increase sales. As a result of the successful appeal against assessments received in France related to prior research and development claims, the provision totaling \$240,000 that was recognized over the second and third quarters of 2014 was substantially reversed in the fourth quarter.

Interest expense

Interest expense was \$396,000 in 2014, as compared with \$534,000 for the equivalent period in 2013. The 2014 charge included a full year of interest cost attributable to the mortgage for the building housing Pascall’s operations, which was acquired during 2013 and in previous years had been rented. The Company also benefited from a reduction in interest payable as a result of redeeming the promissory notes and replacing this borrowing with a smaller term loan at a lower interest rate.

Other income and expense

The expense recognized under this heading in 2014 comprised of \$284,000 of short-term exchange rate gains, principally arising in the U.K. and a charge of \$279,000 to expunge the final liability arising on the redemption of the promissory notes. The \$87,000 charge in 2013 principally related to short term exchange rate losses arising at Pascall.

Income tax provision

There was an income tax expense of \$384,000 for 2014 compared to a charge in the comparable period of 2013 of \$112,000. This sum is calculated on the basis of current United Kingdom Corporation tax rates on profits generated by the Company's U.K. subsidiaries. In both 2014 and 2013 the U.K. companies benefitted from R&D tax credits which offset the Corporation tax arising on the business activities. There were no tax liabilities elsewhere in the group for 2014 or 2013 and the group is able to carry forward substantial tax losses in the US and France but has recorded a full valuation allowance against the value of these deferred tax assets. There are no tax losses to carry forward in the U.K. As a result of the successful appeal against assessments received in France related to prior research and development claims, the tax expense totaling \$149,000 that was recognized over the second and third quarters of 2014 was reversed in the fourth quarter.

Net income/(loss)

There was a \$1.3 million improvement in net income between 2014 and 2013. The net income for 2014 was \$877,000 compared with a net loss for 2013 of \$392,000. The 2014 result was after absorbing costs of \$0.3 million in relation the redemption of the promissory notes and the benefit of \$0.7 million arising from the release of an annuity accrual in respect of Mr. Jacobson.

Liquidity and Capital Resources

Liquidity

The Company relies on a combination of anticipated cash flows from operations and financing arrangements, to ensure that there is sufficient funding to support our working capital requirements for the next 12 months. We have a substantial backlog as of December 31, 2014, of which substantially all is for our foreign operations and a substantial proportion of the backlog is expected to ship within the next 12 months. In order to support our future expected growth, we will need to reinvest a substantial amount of cash from operations back into the business for inventory purchases, engineering and product development, and personnel. If the sale of the electronic devices segment of our business, referred to above, is approved and concluded this will generate significant cash sums but if the sale does not complete for any reason it will be necessary for the Company to continue to closely manage cash and monitor the repatriation of cash from foreign subsidiaries to meet the Company's corporate costs, the operational needs of the business and satisfy debt service obligations. Our ability to support our business plan is dependent upon our ability to achieve profitable operations and positive cash flow.

In making an assessment of our liquidity, we believe that the items in our financial statements that are most relevant to our on-going operations are working capital, positive cash flow generated from operating activities and cash available from financing activities. We have a variety of financing arrangements to support working capital.

Working Capital

The Company funds its daily cash flow requirements through funds provided by operations and through borrowings under various financing arrangements. The cycle of inventory purchases, sales, invoice discounting and cash collection relies on a consistent flow of demand for the Company's products and 2014 proved to be a strong year in the operating subsidiaries with a backlog that climbed steadily through the year through increasing order intake which translated into a record level of sales. This enabled the production facilities to run more efficiently reaping some economies of scale. The Company benefits from good relationships with customers. This minimizes the potential for bad debts and ensures accounts receivable are collected quickly. Trade debtors reduced from \$7.4 million at December 31, 2013 to \$5.8 million at December 31, 2014, despite sales in the last quarter of the year being especially strong. This was principally due to the swift translation into cash. Inventory also reduced, reflecting the ability to plan production more efficiently. The Company continued to manage its working capital tightly, translating inventory into sales and collecting receivables promptly. Strong cash collection from customers has funded increased purchases to meet the increasing production demanded by the Company's order book. As of December 31, 2014, the Company had cash and cash equivalents of \$2.4 million as compared with \$1.2 million at December 31, 2013. This stemmed from the particularly strong cash collection from the Company's customers in the last quarter of the year.

As of December 31, 2014, approximately 89% of the total \$2.4 million of cash and cash equivalents were held by the Company's foreign subsidiaries. The majority of the foreign cash balances are associated with earnings that have been represented to the Company's lenders as permanently reinvested and which the Company plans to use to support continuing growth plans outside of the U.S. through funding of capital expenditures, engineering, operating expenses or other similar cash needs of the foreign operations. From time to time, cash is repatriated from the foreign subsidiaries to the U.S. for normal corporate operating needs through inter-company dividends and service and brand charges, but only from those earnings that have not been asserted to be permanently reinvested or which qualify as previously taxed income as defined by the United States Internal Revenue Code. However, the foreign subsidiaries previously issued guarantees to lenders on certain financing arrangements and, as a result, under the United States Internal Revenue Code, have been deemed to have distributed these earnings to fund U.S. operations. There are no tax liabilities arising from the repatriation of cash from foreign subsidiaries to the U.S. for the year to date. In addition, the Company has significant U.S. tax losses brought forward that will be sufficient to offset any U.S. tax liability arising from U.S. trading operations for the foreseeable future.

The Company recognizes that cash flow will continue to be challenging throughout 2015 but will control its working capital tightly. The ability to generate cash from operations has been and will continue to be, impacted by the requirement to acquire inventory to satisfy increasing shipments associated with the Company's substantial order book, as well as the timing of these shipments and the timing related to the collection of customer receivables accounts associated with these shipments. The Company continually monitors its need to invest in engineering and personnel to support such growth but it does not currently foresee any need to increase its headcount. There are no significant capital expenditure plans that will require funding from current working capital. In the event that the proposed sale of the electronic devices segment completes in the second or third quarter of 2015, the Company will receive net cash, after repaying debt and meeting legal and other transaction costs and will commence a plan of liquidation.

Backlog

The Company's future book of shippable orders (the "Backlog") was \$36.8 million as of December 31, 2014; this represents a 43% increase compared to \$25.7 million as of December 31, 2013. The amount of Backlog orders represents revenue that the Company anticipates recognizing in the future, as evidenced by purchase orders and other purchase commitments received from customers, but on which work has not yet been initiated or is currently in progress. As of December 31, 2014, approximately 92% of the Backlog related to the electronic devices business which has variable lead times for its manufacturing processes due to the custom nature of its products. Approximately \$3.1 million of the Backlog is related to the communications equipment business, which tends to deliver standard or modified standard products from stock as orders are received. The continuing demand for the Company's electronic devices products for the commercial aerospace market is encouraging and the order book for the segment remains very strong. The uncertainty from customers over when they will schedule the delivery of these orders is less prevalent than it has been in recent years but the Company recognizes that the fragility of global markets can make the Company susceptible to changes in the timing of orders. International orders, including the strengthening of demand from North Africa for the Company's French network access products have continued to provide a solid backlog of orders which remains substantially higher than in previous years.

The custom nature of the majority of the Company's electronic devices products, frequently results in long lead times between orders and requested delivery dates. This makes revenues and gross profit difficult to forecast and comparability of results between periods very sensitive to fluctuations influenced by specific large orders. Shipments of products can be accelerated or delayed due to many reasons including, but not limited to, not meeting customer contract requirements, a change in customer timing or specifications, technology related issues, delays in acquiring component parts, and other production related issues. For a significant portion of the Company's business, customers issue binding purchase orders or enter into binding agreements for the products to be produced and shipped over time in the future. The Company's Backlog represents these orders and provides an insight into potential shipments and revenues. The Company believes that a significant portion of its current Backlog will be shipped within the next 12 months. However, there can be no assurance that the Company will be successful in fulfilling such orders and commitments in a timely manner or that it will ultimately recognize as revenue the amounts reflected as Backlog. The Backlog is an essential part of the business and in the event of a sale of the electronic devices segment, the Backlog of such segment at that time would transfer to the purchaser.

Financing Arrangements

The improved working capital position discussed above enabled management to evaluate the options surrounding the refinancing of the promissory notes scheduled for repayment in December 2014 and a decision was made to redeem the notes in April 2014 using a combination of existing cash and new borrowing. At December 31, 2014, we had total debt obligations of \$4.9 million. Total debt includes a loan secured by a mortgage of \$2.1 million on a property owned and occupied by one of the Company's UK subsidiaries, capital lease obligations of \$0.6 million, a term loan with Lloyds TSB Bank plc of \$1.3 million and financing facilities linked to accounts receivable held by each of the Company's trading subsidiaries.

The Company's UK subsidiaries, Pascall Electronics Limited ("Pascall") and XCEL Power Systems, Ltd. ("XCEL"), each have a Receivables Finance Agreement with Lloyds TSB Commercial Finance Limited ("Lloyds") pursuant to which Lloyds provide Pascall and XCEL with a credit facility to support their UK operations in the aggregate principal amount of £2.75 million (\$4.28 million based on the exchange rate on December 31, 2014). The facility is secured by a debenture covering all the assets of the respective subsidiaries. As of December 31, 2014, outstanding borrowings under the Receivable Finance Agreements were \$381,000 and unutilized capacity for borrowing was \$2.4 million.

The Company's French subsidiary, CXR AJ, has an accounts receivable financing arrangement (the "CIC Agreement") with FACTOCIC S.A., pursuant to which CIC provides CXR AJ with the aggregate principal amount of €1.35 million (\$1.63 million based on the exchange rate on December 31, 2014) at an advance rate of 90% of presented receivables. As of December 31, 2014, CXR AJ had the equivalent of \$381,000 of outstanding borrowings under the CIC Agreement (2013, \$753,000). The total of accounts receivable at the year-end was \$1.43 million.

BPIFrance Loan

In March 2014, CXR AJ, the Company's French operating subsidiary, was granted an innovation loan by BPIFrance. The loan is for 200,000 euros (approximately \$243,000 using the exchange rate at December 31, 2014) and is specifically for the development of new products and processes. The loan is repayable in 20 quarterly installments of \$13,000 starting in December 2016. The loan is interest free. As of December 31, 2014, CXR AJ had \$243,000 of outstanding borrowings under this loan agreement.

Lloyds TSB Bank Term Loan

In prior years, EMRISE Electronics Limited ("EEL"), a wholly-owned subsidiary of the Company, has had a term loan with Lloyds TSB Bank plc ("Lloyds Bank") in the amount of £750,000 ("Lloyds Term Loan"). On April 1, 2014, the Company replaced this loan with a new three-year loan with Lloyds Bank of £1.1 million (approximately \$1.7 million, using the exchange rate at December 31, 2014). The loan is repayable in monthly installments over the three year term. The loan carries a fixed rate of interest of 6.6% per annum. At December 31, 2014, the balance outstanding under the loan was \$1,316,000.

Lloyds TSB Property loan secured by Mortgage

In March 2013, the Company entered into a mortgage with Lloyds Bank for the sum of £1.4 million (approximately \$2.2 million at the rate of exchange on December 31, 2014) to purchase the property occupied by Pascall. This loan, which is secured by a fixed mortgage over the property, is repayable over 20 years. Interest is fixed at an annual rate of 4.8% for 15 years. As of December 31, 2014, the loan balance outstanding was \$2.1 million and the property has a carrying value of \$3.0 million.

Promissory Notes payable

The promissory notes were amended subordinated contingent promissory notes, which were issued to former owners of ACC in May 2008 and were originally scheduled to mature on August 31, 2013. The notes were subordinated to a term loan from Lloyds Bank described above. Since the date of issuance, the terms of the notes were amended numerous times, most recently, with effect from November 1, 2012 (the "Amended Subordinated Contingent Notes"). The Amended Subordinated Contingent Notes bore interest at the prime rate as reported in The Wall Street Journal plus 4% (previously prime rate plus 1%) and were scheduled to mature on December 15, 2014 (the "Maturity Date") (previously August 31, 2013). Subsequent to December 31, 2013, the payment of principal of \$300,000, due on March

15, 2014, was paid on schedule and the balance of the principal and accrued interest was paid on April 7, 2014. Under the terms of the agreement with the holders of the Amended Subordinated Contingent Notes, on the redemption of such notes, the holders are entitled to indemnification for additional tax paid if the rate of capital gains tax increased between the dates such notes were originally issued and the date of redemption. The rate of capital gains tax did increase from 15% to 20% with effect from January 1, 2013 and, in addition, a capital gains tax surcharge of 3.8% was introduced. The holders of the Amended Subordinated Contingent Notes were therefore entitled to indemnification by the Company for the additional tax payable on their gains. On September 30, 2014, the Company entered an agreement with the former holders of the Amended Subordinated Contingent Notes making a full and final settlement of \$279,000 plus \$10,000 of legal costs charging the settlement sum to other expenses in the Statement of Comprehensive Income. The amounts due were settled on that date. The former note holders have no further claim over the Company or its assets as a result of this agreement.

Effects of Inflation

The impact of inflation and changing prices has not been significant on the financial condition or results of operations of either our company or our operating subsidiaries.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

We do not hold any derivative instruments and do not engage in any hedging activities.

Item 8. Financial Statements and Supplementary Data.

Our financial statements are contained in pages F-1 through F-28 which appear at the end of this Annual Report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

There are no reportable events under this item for the year ended December 31, 2014.

Item 9A. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and our Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of December 31, 2014, the Company carried out an assessment, under the supervision of and with the participation of the Company's Principal Executive Officer and the Principal Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)). The Principal Executive Officer and the Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective at a reasonable assurance level as of December 31, 2014.

(b) Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control system over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The Company's internal control over financial reporting includes those policies and procedures that:

(i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

(iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in condition, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including the Company's Principal Executive Officer and Principal Financial Officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting based on the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included an assessment of the design of the Company's internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Based on this evaluation, our Principal Executive Officer and our Principal Financial Officer concluded as of December 31, 2014, that our internal controls over financial reporting were effective.

This Report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to rules of the SEC that permit the Company to provide only management's report in this Report.

Inherent Limitations on the Effectiveness of Controls

Management does not expect that their disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control systems are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, no evaluation of internal control over financial reporting can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, have been or will be detected.

These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of a simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

(c) Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Directors and Executive Officers

The names, ages and positions held by our directors and executive officers as of March 27, 2015, and their business experience are as follows:

Name	Age	Titles
Carmine T. Oliva	72	Chairman of the Board, Chief Executive Officer, and Director
Graham Jefferies	57	Director, President and Chief Operating Officer
Timothy Blades	58	Chief Financial Officer
Otis W. Baskin (1)	69	Director
Frank P. Russomanno (1)	67	Director
Julie A. Abraham (1)	57	Director

(1) Member of the Compensation Committee, Nominating and Corporate Governance Committee, Special Committee and Audit Committee.

Carmine T. Oliva is the founder of EMRISE Corporation and has been Chairman of the Board, Chief Executive Officer and a Class III director of EMRISE Corporation since March 1997 and of our subsidiary, EEC, since he founded EEC Electronics Corporation in 1983. From March 1997 until July 2009, he was President of EMRISE. Mr. Oliva served as Acting Chief Financial Officer and Secretary of EMRISE Corporation from April to July 2005 and again from August 2006 to May 2007. Mr. Oliva has been Chairman of the Board of EMRISE Electronics Ltd. since 1985. In 2002, Mr. Oliva obtained a French government work permit and assumed responsibility as President of our CXR-AJ subsidiary. From 1980 to 1983, Mr. Oliva was Senior Vice President and General Manager, ITT Asia Pacific Inc. Prior to holding that position, Mr. Oliva held a number of executive positions with ITT Corporation and its subsidiaries over an eleven-year period. Mr. Oliva attained the rank of Captain in the United States Army and is a veteran of the Vietnam War. Mr. Oliva earned a B.A. degree from Seton Hall University and an M.B.A. degree from The Ohio State University. This, in addition to his business acumen and experience in the aerospace and defense and communications equipment industries for over 40 years along with his judgment, integrity, reputation and his international business background, including his extensive acquisition and divestiture expertise, makes Mr. Oliva an important director of the Company as well as its chairman.

Graham Jefferies joined the Board as a Class II director on March 1, 2011. He was appointed as President in July 2009. He served as Executive Vice President from October 1999 until July 2009. Mr. Jefferies was also appointed as our President and Chief Operating Officer in January 2005, after having served as Chief Operating Officer of our Telecommunications Group since October 1999. Mr. Jefferies served as Executive Vice President of EMRISE from April 1999 through October 1999. Mr. Jefferies has served CXR-AJ as a director since March 1997 and as General Manager since July 2002, has served as Managing Director of Belix Power Conversions Ltd., Belix Wound Components Ltd. and Belix Company Ltd. since our acquisition of those companies in April 2000, as Managing Director of XCEL Power Systems, Ltd. since September 1996 and as Managing Director of EMRISE Electronics Ltd. since March 1992. Prior to joining us in 1992, he was Sales and Marketing Director of Jasmin Electronics PLC, a major United Kingdom software and systems provider, from 1987 to 1992. Mr. Jefferies held a variety of project management positions at GEC Marconi from 1978 to 1987. Mr. Jefferies earned a B.Sc. degree in Engineering from Leicester University and has experience in mergers and acquisitions. Mr. Jefferies is a citizen and resident of the United Kingdom. We believe Mr. Jefferies' education and experience in several leadership roles, such as Chief Operating Officer and Managing Director, as well as his business acumen, judgment, integrity and reputation, make him an essential member of the Board of directors.

Timothy J. Blades serves as the Company's Chief Financial Officer and having served as the Company's interim Director of Finance from April 11, 2012. In the period from March 6, 2012 to April 10, 2012, he provided accounting services to the Company. He became an employee of the Company on December 1, 2012 and was appointed as Chief Financial Officer on February 5, 2013. He is the Company's Principal Accounting Officer and Corporate Secretary. Mr. Blades is based in England, where the Company's primary business units, operations management and financial teams are located. He is a Chartered Accountant and an experienced international financial executive who has led multidisciplinary teams focused on profit improvement, fundraising, mergers and acquisitions and a range of essential finance and accounting functions throughout his career. He has extensive expertise in international finance, particularly in the U.S., Europe, the UK, and the Far East. During a career with Grant Thornton UK LLP of more than 30 years Mr. Blades was Managing Partner of Grant Thornton's Northamptonshire and Cambridge offices, overseeing a staff of 250 and prior to that was the partner in charge of audit in Grant Thornton's London office. From 2002 to 2010, he was a regional managing partner leading a 12-partner team directing a staff of 300, responsible for accounting, tax and financial planning. During this period, he built the Grant Thornton Cambridge office from a staff of 30 to more than 100 professionals. Mr. Blades graduated from the University of Sheffield in England earning a BA in Business. He has extensive training in U.S. and UK GAAP, IFRS (International Financial Reporting Standards), due diligence reporting and a range of regulatory matters. Mr. Blades is a trustee of a large defined benefit pension fund, a non-executive director and Chairman of the Audit Committee of a trade and research organization, a member of the Court of Northampton University in England and is active in a number of charitable organizations.

Otis W. Baskin has served as a Class I director since February 2004. He was a Professor of Management at The George L. Graziadio School of Business and Management at Pepperdine University in Malibu, California from June 1995 to 2012 and also served as dean from 1995 to 2001. As dean at Pepperdine he was responsible for all aspects of the management of an organization with 200 employees and \$47 million in annual revenue. He has been a member of the full-time faculty of the University of Houston - Clear Lake (1975-1987), where he served as Coordinator of the Management Faculty and Director of the Center for Advanced Management Programs. He has also been Professor of Management at Arizona State University, West Campus (1987-1991) and The University of Memphis (1991-1995), in addition to serving as dean at both universities. In each of these assignments he has had responsibilities for recruitment and setting compensation of both professional and support personnel. Dr. Baskin worked with AACSB International (Association for the Advancement of Collegiate Schools of Business) as Special Advisor to the President and as Chief Executive Officer from July 2002 to June 2004. He is an Associate with the Family Business Consulting Group, where he advises family owned and closely held businesses. He has served as an advisor to Exxon/Mobile Research and Engineering Corporation, NASA and the United States Air Force. Dr. Baskin is an expert in international business who has worked with companies and business schools in more than 40 countries. He earned a Ph.D. in Management, Public Relations and Communication Theory from The University of Texas at Austin, an M.A. degree in Speech Communication from the University of Houston, and a B.A. degree in Religion from Oklahoma Christian University. Dr. Baskin brings a unique blend of business, management, communications and leadership skills, experience and education, as well as his judgment, integrity and reputation, to his role as director and chair of the Compensation Committee.

Frank P. Russomanno joined the Board as a Class I director in March 2011. He served as Vice Chairman of Imaton from March 2009 and a member of the board of directors and Chief Executive Officer of Imaton from April 2007 until he retired from the company in May 2010. He also served as President of Imaton from April 2007 to March 2009. Previously, Mr. Russomanno was Chief Operating Officer of Imaton from November 2003 to April 2007 and from November 2006 to April 2007 was also acting Chief Executive Officer and President. Prior to November 2003,

Mr. Russomanno was president of Imation's Data Storage and Information Management business. Mr. Russomanno is active in industry and nonprofit organizations. Mr. Russomanno is a member of the board of directors of Hutchinson Technologies Incorporated. Mr. Russomanno is the former chairman of the board of the Content Delivery & Storage Association and is a former member of the board of directors of Merrick Community Services in St. Paul, MN. Mr. Russomanno has a Bachelor of Arts degree in history from Seton Hall University. He has taken graduate courses at the University of Oklahoma and Monmouth College and served in the U.S. Army as an artillery officer in Vietnam, achieving the rank of Captain. Mr. Russomanno's background and direct experience leading the operations of a large, diverse organization can be applied to helping the management of the Company and makes him an ideal director and chairman of our Nominating and Corporate Governance Committee.

Julie A. Abraham joined the Board as a Class II director on February 2011. Since November 2013, Ms. Abraham has been the Chief Operating Officer and Chief Financial Officer of Essex, CT-based Structural Graphics LLC, a high-impact dimensional print company where she had previously served as a consulting Chief Financial Officer since July 2010. In 2008, Ms. Abraham began as a principal with Westbrook, CT-based The Edbraham Group LLC, a privately-held, national direct and digital marketing recruiting firm that she co-founded. During 2007 to 2008, she also served as a financial consultant to the Magnet Group LLC, a promotional products marketing firm. From 2004 to 2007, Ms. Abraham was CEO and majority owner of Newington, CT-based DMJ Search, an executive recruiting firm specializing in the direct marketing, print and mail industries. From 1985 to 2002, Ms. Abraham was employed at ADVO, Inc., a New York Stock Exchange-traded, national direct mail marketing firm, with her most recent position being Senior Vice President, Chief Financial Officer and Operating Committee Member, participating in running the day-to-day operations of the company. During her career at ADVO, she also held the titles of Senior Vice President of Finance and Controller and Operating Committee Member, Vice President and Controller, Vice President Financial Planning and Investor Relations and Vice President Shared Financial Services. Ms. Abraham earned a bachelor's degree in accounting from the University of Vermont, and she became a certified public accountant in 1982. Ms. Abraham's financial expertise in the public company arena and experience in strategic financial planning, as well as her direct knowledge of regulatory affairs, particularly with the SEC, financial controls and financial systems, Sarbanes-Oxley and financial due diligence in preparation for acquisitions will provide valuable insight and guidance to the Company and the Board and makes her an ideal director and chairperson of our Audit Committee.

Term of Office and Family Relationships

Our officers are appointed by, and serve at the discretion of, the Board. There are no family relationships among our executive officers and directors.

Board of Directors

Board Composition, Responsibilities and Leadership Structure

Our business, property and affairs are managed under the direction of our Board. Directors are kept informed of our business through discussions with our executive officers, by reviewing materials provided to them and by participating in meetings of our Board and its committees.

Our bylaws provide that our Board shall consist of at least four directors. Our Board is divided into three classes of directors: Class I, Class II and Class III. The term of office of each class of directors is three years, with one class expiring each year at our annual meeting of stockholders. We currently have five directors on our Board, with no vacancies. Our current Board consists of two Class I directors whose terms expire at our 2015 annual meeting, two Class II directors whose term expires at our 2016 annual meeting, and one Class III director whose term expires at our 2017 annual meeting.

During 2014, our Board held 9 meetings by telephone or in person. During 2014, none of our directors attended fewer than 75% of the aggregate of: (1) the total number of meetings of the Board (held during the period for which he/she has been a director); and (2) the total number of meetings held by all committees of the Board on which he/she served (during the periods that he/she served).

The independent members of our Board are selected because of their independence from management; depth of understanding of technology, manufacturing, sales and marketing, finance and/or other elements directly relevant to the technology and business of the Company; education and professional background; and judgment, skill, integrity and reputation.

The leadership of our Company and our Board is split between the executive and chairman leadership of Mr. Oliva, our founder, on the one hand, and our independent directors, which make up 60% of the Board, on the other hand. Mr.

Oliva has over 40 years of experience in the electronics and communications industry. His in-depth knowledge of each of our businesses and the competitive challenges each business faces, as well as his extensive experience as a director and senior member of management, make him the best qualified director to serve as Chairman. Our independent directors are strong leaders with diverse educations, skills and backgrounds. They are appropriately skeptical, leading to thorough review and oversight of the strategies and actions proposed by the chairman and management. The independent members meet regularly in executive session, with the most qualified member taking the lead in such sessions based on the issues being discussed. The Board may subsequently decide to change its leadership structure, as there is no formal policy that requires the Chief Executive Officer and Chairman to be served by one person.

We believe the combination of Mr. Oliva, as our Chief Executive Officer and Chairman, in combination with our strong independent members of the Board has provided an effective leadership structure for EMRISE. The division of duties and the level of communication between the Board and our management provide the basis for the proper functioning of our Board and its oversight of management.

Risk Oversight

Our Board provides consideration and oversight of risks facing the Company and its subsidiaries in the ordinary course of operating the businesses. Together with the Board's standing committees, the Board is responsible for ensuring that material risks are identified and managed appropriately. The Board and its committees regularly review material strategic, operational, financial, compensation and compliance risks with senior management and discuss the key risks to our business. The committees communicate the risks they oversee with the other committees and the Board, as a whole. The Audit Committee is responsible for discussing overall risk assessment and risk management practices, as set forth in the Audit Committee's charter. For example, the Audit Committee assists the Board in its risk oversight function by reviewing and discussing with management our system of disclosure controls and our internal controls over financial reporting. The Audit Committee also performs a central oversight role with respect to financial and compliance risks and meets at least quarterly with our independent auditor, BDO LLP. The Nominating and Corporate Governance Committee assists the board in its risk oversight function by periodically reviewing and discussing with management important compliance and quality issues. The Compensation Committee considers risk in connection with its design of compensation programs for our executives.

Board Committees

Our Board currently has an Audit Committee, a Compensation Committee, a Nominating and Corporate Governance Committee and a Special Committee.

Audit Committee

The Audit Committee selects our independent registered public accountants; reviews the results and scope of the audit and other services provided by our independent registered public accountants; reviews our financial statements for each interim period and for our year end and our internal financial and accounting controls; and recommends, establishes and monitors our disclosure controls and procedures. All of our independent directors, Ms. Abraham, Mr. Baskin and Mr. Russomanno served on our Audit Committee throughout 2014, with Ms. Abraham serving as chairperson. Our Board has determined that Ms. Abraham is an audit committee financial expert. The Audit Committee operates pursuant to a charter approved by our Board and Audit Committee, according to the rules and regulations of the SEC. The Audit Committee held ten meetings in 2014.

Compensation Committee

The Compensation Committee is responsible for establishing and administering our policies involving the compensation of all of our executive officers and establishing and recommending to our Board the terms and conditions of all employee and consultant compensation and benefit plans. Our entire Board also may perform these functions with respect to our employee stock option plans. Messrs. Baskin, and Russomanno have served on the Compensation Committee throughout 2014. Mr. Baskin serves as chairman. The Compensation Committee operates pursuant to a charter approved by our Board and Compensation Committee. The Compensation Committee held four meetings in 2014.

Compensation Committee Interlocks and Insider Participation

None of the current members of the Compensation committee have served as an officer or employee of EMRISE. No executive officer of EMRISE served as a director or Compensation Committee member of any entity in which the members of the Compensation Committee or the Board were an executive officer or director.

Nominating and Corporate Governance Committee

The Nominating and Corporate Governance Committee reviews and provides oversight with regard to our corporate governance related policies and procedures and also recommends nominees to our Board and committees of our Board, develops and recommends to our Board corporate governance principles, and oversees the evaluation of the Board and management. Messrs. Baskin and Russomanno and Ms. Abraham have served on the Nominating and Corporate Governance Committee throughout 2014. Mr. Russomanno serves as chairman of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee utilizes a variety of methods for identifying and evaluating nominees for director, including candidates that may be referred by stockholders. The Nominating and Corporate Governance Committee held four meetings in 2014.

The Nominating and Corporate Governance Committee will consider candidates for director recommended by any stockholder that is the beneficial owner of shares representing more than 1.0% of the then-outstanding shares of our common stock and that has beneficially owned those shares for at least one year. The Nominating and Corporate Governance Committee will evaluate those recommendations by applying its regular nominee criteria and considering the additional information described in the Nominating and Corporate Governance Committee's below-referenced charter. Stockholders that desire to recommend candidates for the board for evaluation may do so by contacting EMRISE in writing, identifying the potential candidate and providing background and other information in the manner described in the Nominating and Corporate Governance Committee's charter. Candidates may also come to the attention of the Nominating and Corporate Governance Committee through current board members, professional search firms and other persons. In evaluating potential candidates, the Nominating and Corporate Governance Committee will take into account a number of factors, including, among others, the following:

independence from management;

depth of understanding of technology, manufacturing, sales and marketing, finance and/or other elements directly relevant to the technology and business of our company;

education and professional background;

judgment, skill, integrity and reputation;

existing commitments to other businesses as a director, executive or owner;

personal conflicts of interest, if any; and

size and composition of the Board of Directors.

In addition, prior to nominating a sitting director for re-election at an annual meeting of stockholders, the Nominating and Corporate Governance Committee considers the director's past attendance at, and participation in, meetings of our Board and its committees and the director's formal and informal contributions to their respective activities.

The Nominating and Corporate Governance Committee strives to maintain a Board with a diverse set of skills and qualifications, to ensure that the Board is adequately serving the needs of our stockholders. Before evaluating director candidates, the committee reviews the skills and qualifications of the directors currently serving on the board and identifies any areas of weakness or skills of particular importance. On the basis of that review, the committee will evaluate director candidates with those identified skills. While the Nominating and Corporate Governance Committee does not have a formal policy on board diversity, the committee takes into account a broad range of diversity considerations when assessing director candidates, including individual backgrounds and skill sets, professional experiences and other factors that contribute to our board having an appropriate range of expertise, talents, experiences and viewpoints, and considers those diversity considerations, in view of the needs of the board as a whole, when making decisions on director nominations.

Special Committee

In 2013, the Board authorized the creation of the Special Committee to monitor and oversee the strategic direction of the Company. The Board appointed Messrs. Baskin and Russomanno and Ms. Abraham as members. Mr. Russomanno serves as the Chairman and Mr. Baskin serves as the Secretary. This committee meets as often as is deemed appropriate. In 2014 there were regular meetings of this committee to review the strategic direction of the Company.

Committee Charters

The charters of our Audit, Compensation and Nominating and Corporate Governance Committees, and our Codes of Business Conduct and Ethics, are included on our website at www.emrise.com. The foregoing information is also available in print to any stockholder who requests it. All such requests should be in writing and should be sent to “c/o Secretary” at 2530, Meridian Parkway, Durham, North Carolina, 27713 or secretary@emrise.com.

Security Holder Communications with the Board of Directors

The Board has established a process to receive communications from security holders. Security holders and other interested parties may contact any member (or all members) of the Board, or the independent directors as a group, any committee of the Board or any chair of any such committee, by mail or electronically. To communicate with the Board, any individual directors or any group or committee of directors, correspondence should be addressed to the Board or any such individual directors or group or committee of directors by either name or title. All such correspondence should be sent “c/o Secretary” at 2530, Meridian Parkway, Durham, North Carolina, 27713.

All communications received as set forth in the preceding paragraph will be opened by the Secretary for the sole purpose of determining whether the contents represent a message to our Board. Any contents that are not in the nature of advertising, promotions of a product or service, patently offensive material or matters deemed inappropriate for the Board will be forwarded promptly to the addressee. In the case of communications to the Board or any group or committee of directors, our Secretary will make sufficient copies (or forward such information in the case of e-mail) of the contents to send to each director who is a member of the group or committee to which the envelope or e-mail is addressed.

Code of Ethics

Our Board has a Code of Business Conduct and Ethics that is regularly reviewed and updated to meet current best practices. This code applies to all of our directors, officers and employees and an additional Code of Business Ethics that applies to our Chief Executive Officer and senior financial officers. These codes are available on our website, located at www.emrise.com.

We intend to satisfy the disclosure requirement under Item 5.05 of Form 8-K relating to amendments to or waivers from provision of these codes that relate to one or more of the items set forth in Item 406(b) of Regulation S-K by describing on our website within four business days following the date of a waiver or a substantive amendment, the date of the waiver or amendment, the nature of the amendment or waiver, and the name of the person to whom the waiver was granted.

Information on our Internet website is not, and shall not be deemed to be, a part of this Report or incorporated into any filings we make with the SEC.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our executive officers and directors, and persons who beneficially own more than 10% of a registered class of our common stock, to file initial reports of ownership and reports of changes in ownership with the SEC. These officers, directors and stockholders are required by the SEC regulations to furnish us with copies of all reports that they file.

Based solely upon a review of copies of the reports furnished to us during the year ended December 31, 2014 and thereafter, or any written representations received by us from directors, officers and beneficial owners of more than 10% of our common stock that no other reports were required, we believe that, during 2014, (i) all Section 16(a) filing

requirements applicable to our directors and officers were met and (ii) except for any Form 5 filings that may have been required, all Section 16(a) filing requirements applicable to the beneficial owners of more than 10% of our common stock were met.

Legal Proceedings

There are no material proceedings to which any director or officer, or any associate of any such director or officer, is a party that is adverse to our Company or any of our subsidiaries or has a material interest adverse to our Company or any of our subsidiaries. No director or executive officer has been a director or executive officer of any business which has filed a bankruptcy petition or had a bankruptcy petition filed against it during the past ten years. No director or executive officer has been convicted of a criminal offense or is the subject of a pending criminal proceeding during the past ten years. No director or executive officer has been the subject of any order, judgment or decree of any court permanently or temporarily enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities or banking activities during the past ten years. No director or officer has been found by a court to have violated a federal or state securities or commodities law during the past ten years.

Item 11. Executive Compensation.

The following table provides information concerning the compensation for the previous two fiscal years for our principal executive officer, our current principal accounting officer and our chief operating officer, who served as executive officers during 2014 (collectively, the “Named Executive Officers”).

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Share based Compensation (\$)	All other Compensation (\$)	Total (\$)
Carmine T. Oliva Chairman and Chief Executive Officer	2014	373,486	-	-	26,715	(1) 400,201
	2013	405,567	-	-	24,078	(2) 429,645
Graham Jefferies (3) Director, President, and Chief Operating Officer	2014	261,524	149,457	23,100	81,225	(4) 515,306
	2013	272,461	-	-	74,251	(5) 346,712
Timothy J. Blades (6) Principal Accounting Officer	2014	187,136	73,361	13,750	33,082	(7) 307,329
	2013	192,741	-	19,095	7,849	(8) 219,685

(1) In 2014 the amount included (i) \$4,640 in insurance premiums we paid with respect to a \$1.0 million term life insurance policy for the benefit of Mr. Oliva’s spouse, and (ii) perquisites or personal benefits provided, including an auto allowance and medical insurance none of which individually exceeded the greater of \$25,000 or 10% of the total amount of these benefits provided to Mr. Oliva.

(2) In 2013 the amount included \$4,640 in insurance premiums paid with respect to a \$1.0 million term life insurance policy for the benefit of Mr. Oliva’s spouse and other perquisites or personal benefits including Medicare and a car allowance, none of which individually exceed the greater of \$25,000 or 10% of the total amount of these benefits provided to Mr. Oliva.

(3) Mr. Jefferies is based in the United Kingdom and receives his remuneration in British pounds sterling. The compensation amounts listed for Mr. Jefferies are shown in U.S. Dollars (“USD”), converted from British pounds sterling using the average of the daily conversion rates in effect in the years under review. Mr. Jefferies’ base salary in British pounds sterling was approximately £180,000 for both 2014 and 2013 and has remained unchanged since his appointment to the Board. Under the terms of his contract, Mr. Jefferies has the option to convert a proportion of this salary into contributions to a pension scheme. In 2014 Mr. Jefferies received a retention bonus of 42,000 shares of restricted stock and \$31,500 and accrued an annual bonus based on the profitability of the business and an assessment of performance against objectives of \$117,957. The restricted stock cannot be transferred before March 31, 2015.

(4) In 2014 the amount included (i) \$54,743 in Company contributions to Mr. Jefferies' retirement account, (ii) \$12,996 of auto allowance benefits, and (iii) other perquisites or personal benefits provided, none of which individually exceed the greater of \$25,000 or 10% of the total amount of these benefits provided to Mr. Jefferies.

(5) In 2013 the amount included (i) \$50,902 in Company contributions to Mr. Jefferies' retirement account, (ii) 11,126 in auto allowance benefits, and (iii) other perquisites or personal benefits provided, none of which individually exceed the greater of \$25,000 or 10% of the total amount of these benefits provided to Mr. Jefferies.

(6) Mr. Blades is based in the United Kingdom. Compensation, for his services is paid in British pounds sterling. The compensation amounts listed for Mr. Blades are shown in USD, converted from British pounds sterling using the average of the daily conversion rates in effect for the each year. Mr. Blades' annual salary in British pounds sterling was at the rate of £120,000.

(7) In 2014 Mr. Blades received a bonus of 25,000 shares of restricted stock and \$18,750 and accrued an annual bonus based on the profitability of the business and an assessment of performance against objectives of \$54,611. The restricted stock cannot be transferred before March 31, 2015. Other benefits included pension contributions of \$18,916, an auto allowance of \$11,908 and other perquisites or personal benefits provided, none of which individually exceed the greater of \$25,000 or 10% of the total amount of these benefits.

(8) In 2013 Mr. Blades was granted 50,000 options to purchase shares of the Company's common stock in connection with his appointment as Chief Financial Officer on February 5, 2013. Other benefits included pension contributions and the provision of a car. None of the other personal benefits provided exceeded the greater of \$25,000 or 10% of the total amount of these benefits provided to Mr. Blades.

Termination Payments

Carmine T. Oliva

The Company has a two year employment agreement with Mr. Oliva which commenced on December 12, 2013. This agreement is automatically renewable thereafter for periods of one year unless Mr. Oliva has been given written notice of non-renewal. The Company may terminate Mr. Oliva's employment at any time, with or without due cause. "Due cause" includes any intentional misapplication of our funds or other material assets, or any other act of dishonesty injurious to us, or conviction of a felony or a crime involving moral turpitude. "Due cause" also includes abuse of controlled substances or alcohol and breach, non-performance or non-observance of any of the terms of the agreement, provided that Mr. Oliva fails to satisfactorily remedy the performance problem within 60 days following 30 days' written notice.

Mr. Oliva may terminate his employment at any time, with or without good reason. However, termination for good reason must occur within 90 days of the occurrence of an event constituting good reason, and Mr. Oliva must furnish the Company with written notice of the event within 30 days after the initial existence of the event and provide the Company with at least a 60-day cure period. "Good reason" includes: a material diminution in his authority, duties, responsibilities, titles or offices; a purported reduction in Mr. Oliva's base salary amounting to an enforced material diminution in his salary to an amount more than 10% below the base salary in effect at the time of the reduction; the Company's failure to timely cure or diligently initiate a cure of any material breach within 60 days after Mr. Oliva gives us written notice of the breach.

If the Company terminates Mr. Oliva's employment for due cause or due to Mr. Oliva's breach of his employment agreement by refusing to continue his employment, or if Mr. Oliva terminates his employment without good reason, then all compensation and benefits for Mr. Oliva will cease, other than amounts under retirement and benefit plans and programs that were earned and vested by the date of termination, pro rata annual salary through the date of termination, any stock options that were vested as of the date of termination, and accrued vacation.

If Mr. Oliva dies, the agreement shall terminate immediately. If Mr. Oliva becomes incapacitated, subject to the terms of the employment agreement, the Company may terminate his employment upon 30 days' written notice to Mr. Oliva or his legal representative. If Mr. Oliva's employment terminates due to his incapacity or death, Mr. Oliva or his estate or legal representative will be entitled to receive benefits under our retirement and benefits plans and programs that were earned and vested at the date of termination, a prorated incentive bonus for the fiscal year in which incapacity or death occurred (to the extent he would otherwise be eligible), and a lump sum cash payment in an amount equal to one year of his then current, annual salary.

If Mr. Oliva's employment terminates for good reason, or because the contract is not- renewed or for reasons other than as a result of due cause, incapacity, death or retirement at Mr. Oliva's own choice this will be deemed to be 'constructive termination'. Under such circumstances Mr. Oliva will be entitled to his salary through the end of the month in which termination occurs plus credit for accrued vacation, and a prorated incentive bonus, if eligible, for the fiscal year during which termination occurred. In addition, under those circumstances, if Mr. Oliva enters into a separation and release agreement with us, then he will be entitled to receive the following:

- (i) a severance payment equal to two times his then current annual salary (paid, with interest, over a three year period);

all medical insurance benefits to which he was entitled immediately prior to the date of termination for a period of eighteen months or the date that Mr. Oliva's continued participation in our medical insurance plan was not possible under the plan, whichever was earlier; If the Company's medical insurance plan does not allow Mr.
- (ii) Oliva's continued participation in the plan, then Mr. Oliva will receive the estimated monthly COBRA premiums at the time of termination (taking into account all known or anticipated premium increases) to be used by Mr. Oliva to maintain his medical insurance coverage for an additional eighteen months;

a lump-sum cash payment equal to twenty-four times the estimated monthly life insurance premiums at the time
- (iii) of termination (taking into account all known or anticipated premium increases) to be used by Mr. Oliva to maintain his existing group life insurance coverage and the \$1,000,000 life insurance policy on his life for two years;
- (iv) 250,000 warrants (exercisable over a four year period) to purchase stock in the Company at the share price prevailing on the date of termination; and

other benefits, including an automobile allowance, charitable donations and contributions towards the cost of a
- (v) personal assistant for a period of twelve months. Full details are set out in Mr. Oliva's employment agreement dated December 12, 2013 as filed as an exhibit to the Company's Current Report on Form 8-K as filed with the SEC on December 17, 2013.

In the event of a Change of Control (as defined in the agreement) in the Company, the above benefits due to Mr. Oliva will become payable immediately.

Graham Jefferies

Mr. Jefferies may terminate his employment at any time, with or without good reason. However, termination for good reason must occur within 30 days of the occurrence of an event constituting good reason. The term “good reason” has the same meaning as in Mr. Oliva’s employment agreement described above.

The Company may terminate Mr. Jefferies’ employment at any time, immediately upon written notice, with or without due cause. The term “due cause” has the same meaning as in Mr. Oliva’s employment agreement described above, except that Mr. Jefferies may satisfactorily remedy the performance problem following 90 days’ written notice. If the Company terminates Mr. Jefferies’ employment for due cause or due to Mr. Jefferies’s breach of his employment agreement by refusing to continue his employment, or if Mr. Jefferies terminates his employment without good reason, then all compensation and benefits for Mr. Jefferies will cease, other than amounts under retirement and benefit plans and programs that were earned and vested by the date of termination, pro rata annual salary through the date of termination, and any stock options that were vested as of the date of termination, and accrued vacation as required by applicable law.

If Mr. Jefferies becomes mentally or physically incapable of performing the services required under the agreement for a period of 180 consecutive days, the agreement terminates; provided, however, that Mr. Jefferies will remain an employee of EMRISE Electronics Ltd. and be entitled to remuneration in an amount equal to the amount paid under EMRISE Electronics Ltd.’s permanent health insurance scheme, subject to the paragraph immediately below. Upon Mr. Jefferies’ death, the agreement terminates immediately.

If Mr. Jefferies’ employment terminates due to his incapacity or death, Mr. Jefferies or his estate or legal representative will be entitled to receive benefits under our retirement and benefits plans and programs that were earned and vested at the date of termination, a prorated incentive bonus for the fiscal year in which incapacity or death occurred (to the extent he would otherwise be eligible), and a lump sum cash payment in an amount equal to one year of his then current annual salary, grossed up to cover applicable taxes that are deducted from such amount.

If Mr. Jefferies’ employment terminates for good reason or other than as a result of due cause, incapacity, death or retirement, Mr. Jefferies will be entitled to his salary through the end of the month in which termination occurs plus credit for accrued vacation, and a prorated incentive bonus, if eligible, for the fiscal year during which termination occurred. In addition, under those circumstances, if Mr. Jefferies enters into a separation and release agreement with us, then he will be entitled to receive a severance payment equal to two times his then current annual salary (to be paid, with interest, over thirty-six months), to receive all medical and life insurance benefits to which he was entitled immediately prior to the date of termination (or at the election of Mr. Jefferies in the event of a change in control, immediately prior to the date of the change in control) for a period of two years or the date or dates that Mr. Jefferies’ continued participation in our medical and/or life insurance plans was not possible under the plans, whichever was earlier. If our medical and/or life insurance plans did not allow Mr. Jefferies’ continued participation, then we will be

required to pay to Mr. Jefferies, in monthly installments, the monthly premium or premiums that had been payable by us covering the two-year period.

Timothy J. Blades

Mr. Blades' contract requires notice by either the Company or Mr. Blades of three months. During this three month period, the Company is required to pay Mr. Blades his salary at the rate pertaining at that time plus such other benefits that are provided under his employment contract. No other sums are payable.

Outstanding Equity Awards at December 31, 2014

The following table sets forth information about outstanding equity awards held by our Named Executive Officers as of December 31, 2014:

	Option Awards		Option Exercise Price (\$)	Option Expiration Date
	Number of Securities Underlying Exercisable Options (#)	Number of Securities Underlying Unexercised Options (#)		
Carmine T. Oliva	13,334	-	7.50	12/29/2015
	20,000	-	2.18	8/22/2018
	20,000	-	3.06	8/22/2018
	20,000	-	1.53	3/24/2019
Graham Jefferies	13,334	-	7.50	12/29/2015
	20,000	-	2.18	8/22/2018
	20,000	-	3.06	8/22/2018
	20,000	-	1.53	3/24/2016
Timothy J. Blades	50,000	-	0.55	2/5/2023

Director Compensation

Each non-employee director is entitled to receive \$1,000 per month as compensation for his or her services. In addition, each member of the Board chairing a standing committee is entitled to receive \$500 per month as compensation for his or her services. Additional compensation is provided to each member of the Board for attendance in person at meetings or attendance of teleconference meetings. The rates for this compensation are \$1,000

plus 2,000 shares in restricted stock issued for in-person attendance at meetings and \$750 for attendance of teleconference meetings of thirty minutes or longer in duration. We reimburse all directors for out-of-pocket expenses incurred in connection with attendance at Board and committee meetings. We may periodically award options or warrants to our directors under our existing option and incentive plans.

The following table provides information concerning the compensation of our non-employee directors for the year ended December 31, 2014:

Name	Fees Earned or Paid in Cash (\$)	Restricted		2014 Total (\$)	2013 Total (\$)
		Stock Awards (\$)(1)	Option Awards (\$)		
Otis W. Baskin (2)	32,750	7,820	-	40,570	33,280
Frank Russomanno	33,875	7,820	-	41,695	33,280
Julie Abraham	33,875	7,820	-	41,695	33,280

- (1) The dollar amount reflected is the value of the restricted shares issued on the date of issue. Awards are restricted to transfer for a six month vesting period.
- (2) At December 31, 2014, Mr. Baskin held vested options to purchase an aggregate of 39,334 shares of common stock (2013 52,668).

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Beneficial Ownership Table

Except as otherwise indicated in the related footnotes, the following table sets forth information with respect to the beneficial ownership of our common stock as of March 27, 2015, by:

each person known by us to beneficially own more than 5% of the outstanding shares of our common stock;

each of our directors;

each of the Named Executive Officers in the summary compensation table contained above; and

all of our directors and our executive officers as a group.

Beneficial ownership is determined in accordance with the rules of the SEC, and includes voting or dispositive power with respect to the securities. To our knowledge, except as indicated by footnote, and subject to community property laws where applicable, the persons named in the table below have sole voting and dispositive power with respect to all shares of common stock shown as beneficially owned by them. Except as indicated in the discussion of contractual beneficial ownership limitations below and except as indicated in the footnotes to the table below, shares of common stock underlying derivative securities, if any, that currently are exercisable or convertible or are scheduled to become exercisable or convertible for or into shares of common stock within 60 days after the date of the table are deemed to be outstanding in calculating the percentage ownership of each listed person or group but are not deemed to be outstanding as to any other person or group. Percentage of beneficial ownership is based on 10,816,337 shares of common stock outstanding as at March 27, 2015.

The address of each of the following stockholders, unless otherwise indicated in the footnotes to the table, is c/o EMRISE Corporation, 2530, Meridian Parkway, Durham, North Carolina, 27713. Messrs. Oliva, Jefferies, Baskin and Russomanno and Ms. Abraham are current directors of EMRISE. Messrs. Oliva and Jefferies and Blades are Named Executive Officers and current executive officers of EMRISE.

Name of Beneficial Owner	Amount and Nature of Beneficial Ownership	Percentage of Class
Carmine T. Oliva	461,318 (1)	3.6% (2)

Edgar Filing: EMRISE Corp - Form 10-K

Otis W. Baskin	92,121	(3)	*	
Frank P. Russomanno	52,659		*	
Julie A. Abraham	48,000		*	
Graham Jefferies	119,780	(4)	*	
Timothy J. Blades	75,000	(5)	*	
All executive officers and directors as a group (6 persons)	848,878	(6)	4.8%	(7)

* Less than 1.00%

(1) Includes 21,837 shares held individually by Mr. Oliva's spouse, and 73,334 shares underlying vested options.

(2) Current percentage of ownership is based on Mr. Oliva's current holdings. If all Mr. Oliva's current options are exercised, Mr. Oliva's percentage of ownership would be 4.2%

(3) Includes 39,334 shares underlying vested options.

(4) Includes 73,334 shares underlying vested options.

(5) Includes 50,000 shares underlying vested options.

(6) Includes 236,002 shares underlying vested options and 21,837 outstanding shares held individually by Mr. Oliva's wife.

(7) Current percentage of ownership is based on the current holdings of the directors and officers. If all current options held by the directors and officers are exercised holding is 7.7%.

Securities Authorized for Issuance under Equity Compensation Plans

The following table gives information about our common stock that may be issued upon the exercise of options, warrants and rights under all of our existing equity compensation plans as of December 31, 2014:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
2000 plan	(a)	(b)	(c)
Equity compensation plans approved by security holders	76,006	\$ 7.50	1,882,389
Equity compensation plans not approved by security holders	-	-	-
2007 plan			
Equity compensation plans approved by security holders	233,336	1.94	4,766,664
Equity compensation plans not approved by security holders	-	-	-
Total	309,342	\$ 3.31	6,649,053

(1) Represents shares of common stock underlying options that are outstanding under our Amended and Restated 2000 Stock Option Plan and our 2007 Stock Incentive Plan. The material features of these plans are described in note 11 to our consolidated financial statements for the year ended December 31, 2014.

Item 13. Certain Relationships and Related Transactions, and Director Independence.**Director Independence**

The Company recognizes the importance and value of having independent directors and maintains a high level of Corporate Governance. Independent directors are not a prerequisite of the OTC Markets Board, on which the Company's stock is quoted, but the Company has appointed three independent directors because we believe that they can bring additional skills, control and experience to the Board. The following information concerning director independence is based on the director independence standards of the NYSE.

The Board has determined that each of Messrs. Baskin and Russomanno and Ms. Abraham is independent in accordance with the definition of independence of the NYSE exchange because none of those directors has, or during the past three years has had, a material relationship with us, either directly or as a partner, stockholder or officer of an organization that has a relationship with us, and none of those directors is disqualified from being deemed independent under the NYSE rules. The Board has also determined that each member of the Audit Committee is independent.

The non-management members of the Board must meet at regularly scheduled executive sessions without management, with a non-management director presiding over each executive session. A presiding director for each session is selected by the board members in attendance at the session based upon the topics to be discussed at the session. The non-management directors can be contacted by calling the chairperson of the audit committee.

Transactions with Related Persons

We are party to indemnification agreements with each of our directors and executive officers. The indemnification agreements and our certificate of incorporation and bylaws require us to indemnify our directors and officers to the fullest extent permitted by Delaware law. The Nominating and Corporate Governance Committee reviews, approves and ratifies any transactions between the Company and related persons.

Item 14. Principal Accounting Fees and Services.

Fees and Services

Our principal accountants for the audit of our consolidated financial statements for the years ended December 31, 2014 and 2013 were BDO LLP, based in the United Kingdom. The following table sets forth the aggregate fees billed to us by BDO LLP, and BDO USA, LLP, in 2014 and 2013, for professional services:

Fee Category	BDO LLP		BDO USA LLP	
	2014	2013	2014	2013
Audit Fees	\$354,000	\$283,000	-	-
Audit-Related Fees	-	-	-	-
Tax Fees	\$17,000	\$16,000	\$32,000	\$41,000
All Other Fees	-	-	-	-
Total	\$371,000	\$299,000	\$32,000	\$41,000

Audit Fees. Audit fees consist of fees billed for professional services for (i) audit of our 2014 and 2013 consolidated financial statements, (ii) review of the interim consolidated financial statements included in our 2014 and 2013 quarterly reports, and (iii) services that are normally provided by an independent registered public accounting firm in connection with statutory and regulatory filings or engagements.

Tax Fees. Tax fees for 2014 and 2013 consisted of fees billed for professional services for tax compliance, tax advice and tax planning and equity transaction related activities. These services include assistance regarding federal, state and international tax compliance, tax audit defense, customs and duties, mergers and acquisitions, and international tax planning.

Pre-Approval Policies and Procedures

Our audit committee pre-approves all services provided by our principal accountant. Our audit committee also considers in advance whether or not to approve any non-audit services to be performed by the independent accounting firm required to be approved by the audit committee pursuant to any applicable rules and regulations.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

Exhibit No.	Description of Exhibit
2.1	Stock Purchase Agreement dated July 13, 2004 between MicroTel International Inc.; Noel C. McDermott; Warren P. Yost; Noel C. McDermott, as Trustee of the Noel C. McDermott Revocable Living Trust dated December 19, 1995; and Warren P. Yost and Gail A. Yost, as Co-Trustees Under Declaration of Trust dated March 9, 1988 (Filed as an exhibit to the Registrant's current report on Form 8-K for July 13, 2004 and incorporated herein by reference)

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

EMRISE Corporation

Durham, North Carolina

We have audited the accompanying consolidated balance sheets of EMRISE Corporation (the “Company”) as of December 31, 2014 and 2013 and the related consolidated statements of comprehensive income/(loss), stockholders’ equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of EMRISE Corporation at December 31, 2014 and 2013, and the results of its operations and its cash flows the years then ended, in conformity with accounting principles generally accepted in the United States of America.

EMRISE CORPORATION

Notes to Consolidated Financial Statements

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Business

EMRISE Corporation (the “Company”) designs, manufactures and markets proprietary electronic devices and communications equipment for aerospace, defense, industrial, and communications applications. The Company has operations in the United States, England and France. The Company conducts its business through two operating segments: electronic devices and communications equipment. The subsidiaries within the electronic devices segment design, develop, manufacture and market electronic devices for defense, aerospace and industrial markets and operate out of facilities located in England. The subsidiaries within the communications equipment segment design, develop, manufacture and market network access equipment, including network timing and synchronization products and operated in the year out of facilities located in the United States and France. In October 2014, the Company disposed of its communication equipment business in the United States. Further details are provided below in Note 3. Since the year end, the Company has announced that, subject to shareholder approval, it intends to sell its electronic devices business segment and enter into a plan of liquidation. Further details are given below in Note 20 and in the Current Report on Form 8-K filed by the Company with the United States and Exchange Commission (the “SEC”) on March 23, 2015.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with the rules and regulations of the SEC and accounting principles generally accepted in the United States of America (“GAAP”). The financial statements include the accounts of the Company and each of its subsidiaries, after elimination of intercompany accounts and transactions.

Comprehensive (Loss)/Income

Comprehensive (loss)/income includes all changes in equity during a period except those that resulted from investments by or distributions to the Company’s stockholders. Other comprehensive (loss) income refers to revenues, expenses, gains and losses that, under GAAP, are included in comprehensive income, but excluded from net income

(loss), as these amounts are recorded directly as an adjustment to stockholders' equity. The Company's other comprehensive (loss) income consists of foreign currency translation adjustments.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Cash and Cash Equivalents

The Company considers cash and cash equivalents to include cash in banks, commercial paper and deposits with financial institutions that can be liquidated without prior notice or penalty. The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Accounts Receivable

Accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company determines the allowance based on historical write-off experience, customer payment history, and current economic data. The Company reviews its allowance for doubtful accounts monthly. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. Accounts receivable are generally due within 30 days in the Company's U.S. and France operations and 60 days in its England operations and are stated net of an allowance for doubtful accounts. Accounts outstanding for longer than the contractual payment terms are considered past due. Provisions for uncollectible accounts are made based on the Company's specific assessment of the collectability of all past due accounts. Credit losses are provided for in the financial statements and consistently have been within management's expectations. The activity in the allowance for bad debts and doubtful accounts was as follows:

	2014	2013
Opening balance	\$70	\$75
Provision for bad debts	73	40
Amounts written off	-	(19)
Amounts subsequently recovered	(27)	(29)
Translation adjustment	(7)	3
Closing balance	\$109	\$70

Fair Value of Financial Instruments

The carrying amount of cash and cash equivalents, accounts receivable and accounts payable are reasonable estimates of their fair value because of the short maturity of these items. The Company believes the carrying amounts of its notes payable and long-term debt approximate fair value because the interest rates on these instruments are subject to change with, or approximate, market interest rates.

Inventories

The Company's finished goods inventories for its electronic devices segment are generally built to order. The Company's communications equipment inventories generally are built to forecast, which requires production of a larger amount of finished goods in the communications equipment business so that customers can be served promptly. The Company's products consist of numerous electronic parts and other materials, which necessitates the exercise of detailed inventory management. The Company values its inventory at the lower of the actual cost to purchase or manufacture the inventory (first-in, first-out) or the current fair value less selling cost or net realizable value. The

Company performs cycle counts of inventories using an ABC inventory methodology, which groups inventory into cycle counting categories, or conducts physical inventories at least once a year. The Company regularly reviews inventory quantities on hand and records a provision for excess and obsolete inventory based primarily on its estimated forecast of product demand and production requirements for the next 12 to 24 months. Additionally, to determine inventory write-down provisions, the Company reviews product line inventory levels and individual items as necessary and periodically reviews assumptions about forecasted demand and market conditions. Any inventory that the Company determines to be obsolete, either in connection with the physical count or at other times of observation, are reserved for and subsequently written-off.

Property, Plant and Equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed principally using the straight-line method over the useful lives of the assets (or lease term, if shorter) as follows:

Buildings	40-50 years
Machinery, equipment and fixtures	3-7 years
Leasehold improvements	5 years

Maintenance and repairs are expensed as incurred, while renewals and betterments are capitalized.

Long-Lived Assets and Amortizing Intangible Assets

The Company reviews the carrying amount of its long-lived assets and other amortizing intangible assets, for possible impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets and an adjustment is recorded to reduce the carrying amount accordingly. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Amortizing intangible assets are stated at cost, less accumulated amortization, and are amortized on the straight-line method over their estimated useful lives ranging from two to twenty years. The Company periodically reviews the original estimated useful lives of long-lived assets and makes adjustments when appropriate.

Goodwill and Indefinite Lived Intangible Assets

The Company evaluates goodwill and indefinite lived intangibles in accordance with Financial Accounting Standards Board's ("FASB") Accounting Standard Codification ("ASC") Topic Number 350, Intangibles-Goodwill and Other. The Company assesses the qualitative factors to determine whether the existence of events or circumstances might lead to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If there are any factors that indicate that there could be an impairment then the Company tests for impairment of goodwill and indefinite lived intangible on an annual basis and tests more frequently if a specific event occurs or circumstances change that suggest that there is an indicator of impairment. When testing for goodwill impairment the Company adopts a two-step approach whereby in step one if the carrying value of the reporting unit exceeds the fair value of the reporting unit, an impairment is indicated and the amount of impairment is then calculated by the amount the carrying value of the goodwill exceeds the implied fair value of the goodwill. The Company's reporting units have been identified as electronic devices and communications equipment. The Company performs its annual required tests of impairment as of December 31. In performing the valuation, the Company uses cash flows that reflect management's forecasts and discount rates that reflect the risks associated with the current market. The Company considers the results of an income approach in determining the fair value of the reporting units.

At December 31, 2014 and 2013, reported goodwill totaled \$5.0 million and \$5.3 million, respectively, all of which belonged to the electronic devices reporting unit. After assessing the totality of events or circumstances, the Company determined that it is not more likely than not that the fair value of the electronic devices reporting unit is less than its carrying amount at December 31, 2014.

At December 31, 2013, results of the first step in testing for goodwill impairment indicated that the fair values of the electronic devices reporting unit exceeded its book values of the goodwill and therefore there was no indication of impairment and accordingly no impairment adjustment was recorded in 2013.

The provisions of Accounting Standards Update 2012-02, “Intangibles-Goodwill and Other (Topic 350)” (“ASU 2012-02”), allows us to use qualitative factors to determine whether it is more likely than not that the fair values of our indefinite-lived intangible assets are less than their carrying values. At December 31, 2014 and 2013, our reported indefinite lived intangible assets totaled \$0.37 million and \$0.39 million, respectively, all of which belonged to the electronic devices reporting unit. Based on the results of the qualitative assessment, it was concluded that it was more likely than not that the fair values of our indefinite-lived intangible assets exceeded their carrying values and therefore there was no indication of impairment and accordingly no impairment adjustments were recorded in 2014 or 2013. In the qualitative assessment we considered such factors as industry and market considerations, macroeconomic conditions and the underlying financial performance to which the value of the indefinite-lived assets is linked.

Product Warranty Liabilities

The Company’s electronic devices products are generally bespoke in nature and these carry a limited parts and labor warranty that is specific to each contract. These warranties usually vary in length from one to two years. In certain circumstances, the Company provides a two-year, limited parts and labor warranty on communications test instruments and network access products but these are more normally of one year duration. The Company also offers extended warranties beyond two years for an additional cost to its customers. Products returned under warranty typically are tested and repaired or replaced at the Company’s option. Historically, the Company has not experienced significant warranty costs or returns.

The Company records a liability for estimated costs that it expects to incur under the basic limited warranties when product revenue is recognized. Factors affecting the warranty liability include the number of units sold, historical and anticipated rates of claim and costs per claim. The Company periodically assesses the adequacy of its warranty liability accrual based on changes in these factors.

Stock-Based Compensation

The Company estimates the fair value of its stock option plans using the Black-Scholes option pricing model (the “Option Model”). The Option Model requires the use of subjective and complex assumptions, including the option’s expected term and the estimated future price volatility of the underlying stock, which determine the fair value of the stock-based awards. In accordance with FASB guidance on fair value, stock-based compensation expense recognized during a period is based on the value of the portion of the stock-based awards that are expected to vest with employees. Accordingly, the recognition of stock-based compensation expense has been reduced for estimated future forfeitures. FASB guidance requires forfeitures to be estimated at the time of grant with adjustments recorded in subsequent period compensation expense if actual forfeitures differ from those estimates.

Earnings/(Loss) Per Share

Earnings/(Loss) per share is calculated according to FASB guidance which requires that basic earnings per share includes no dilution and is computed by dividing net income available to common stockholders by the weighted average number of shares outstanding during the year. Diluted loss per share reflects the potential dilution of securities that could share in the earnings of the Company. The average exercise price of the outstanding options was greater than the market price of the common stock throughout 2014 and 2013. As a result of this, the potentially dilutive common shares have been excluded from the earnings per share computation because their inclusion would have been anti-dilutive.

Foreign Currency Translation

The accounts of foreign subsidiaries have been translated using the local currency as the functional currency. Accordingly, foreign currency denominated assets and liabilities have been translated to U.S. dollars at the current rate of exchange on the balance sheet date and at the average for the period reported for the statement of operations. The effects of translation are recorded as a separate part of our net equity under the caption “accumulated other comprehensive loss.” Exchange gains and losses arising from transactions denominated in foreign currencies are translated at the exchange rates applicable on the dates of the transactions and are included in operations.

Foreign Currency Transactions

The Company evaluates the impact of currency fluctuations on a periodic basis and, from time to time, participates in currency hedging activities when the need arises. The Company currently uses foreign currency forward contracts, which do not meet hedge accounting requirements, to manage currency exposures related to foreign operation sales in U.S. dollars. These instruments are generally short-term in nature, with typical maturities of less than one year, and are subject to fluctuations in foreign exchange rates. The Company adjusts the value of the hedging instruments at the end of the reporting period to reflect the market value of the instrument. Transactions in currencies other than the functional currency of the underlying operation are recorded at the rates of exchange prevailing at the date of the transactions and recorded as a realized foreign currency gain or loss in the Statement of Operations. Unrealized and realized gains or losses, from foreign currency transactions are reflected in the consolidated statements of operations in accordance with the provision of FASB ASC 830 "Foreign Currency Matters". Included in other income/(expense) were net gains of \$283,000 and net losses of \$130,000 for the years ended December 31, 2014 and 2013, respectively.

Concentration of Credit Risk

Financial instruments, which potentially expose the Company to concentration of credit risk, consist primarily of cash and accounts receivable. The Company places its cash with high quality financial institutions.

The Company's accounts receivable result from sales to a broad customer base. The Company extends credit to its customers based upon an evaluation of the customer's financial condition and credit history and generally does not require collateral. One customer represented 10.7% of total net sales in 2014 and in 2013 the largest customer represented 11.6% of the Company's total net sales.

Revenue Recognition

The Company derives revenues from sales of electronic devices and communications equipment products. The Company's sales are based upon written agreements or purchase orders that identify the type and quantity of the items being purchased and the purchase price.

Communications Equipment - The Company recognizes revenues from its communications equipment business segment based in France and the U.S., until its closure in October 2014, at the point of shipment of those products. An estimate of warranty cost is recorded at the time the revenue is recognized. Customer discounts are included in the product price list provided to the customer. Product returns are infrequent and require prior authorization because sales are final and the Company tests its products for quality prior to shipment to ensure products meet the specifications of the binding purchase orders under which those products are shipped. Normally, when a customer requests and receives authorization to return a product, the request is accompanied by a purchase order for a repair or for a replacement product for which the customer pays.

Electronic Devices - The Company's subsidiaries in England comprise the electronic devices segment of the business. Revenue recognition for products and services provided by the Company's subsidiaries in England depends upon the type of contract involved. Engineering/design services contracts generally entail design and production of a prototype over a term of up to several years, with revenue recognized over the term of the contract on a percentage of completion basis. Production contracts provide for a specific quantity of products to be produced over a specific period of time. Customers issue binding purchase orders or enter into binding agreements for the products to be produced. The Company recognizes revenues on these orders as the products are shipped. Returns are infrequent and permitted only with prior authorization because these products are custom made to order based on binding purchase orders and are quality tested prior to shipment. An estimate of warranty cost is recorded at the time revenue is recognized. The Company offers extended warranty contracts for an additional cost to its customers, which are recognized ratably over the term of the extended warranty contract.

Revenues from services such as repairs and modifications are recognized when the service is completed and invoiced. For repairs that involve shipment of a repaired product, the Company recognizes repair revenues when the product is shipped back to the customer. Service revenues contribute less than 5% of total revenue and, therefore, are considered to be immaterial to overall financial results.

Research and Development Costs

Research and development costs are charged to expense as incurred. The Company maintains engineering departments which develop products, processes and techniques. The cost of research and development in 2014 was \$1,595,000 and in 2013 the comparable cost was \$1,132,000.

Shipping and Handling Costs

Shipping and handling costs recorded in cost of goods sold were \$448,000 and \$367,000 in 2014 and 2013, respectively.

Advertising Costs

Advertising costs are charged to expense as incurred. Because of the custom nature of the Company's products and the high quality of the reputation that the Company enjoys there is minimal advertising spend for product promotion. Advertising costs for 2014 and 2013 were immaterial.

Income Taxes

Income taxes are accounted for using an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial statement and tax bases of assets and liabilities at the applicable tax rates. A valuation allowance is provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company evaluates the realizability of its deferred tax assets by assessing its valuation allowance and by adjusting the amount of such allowance, if necessary. The factors used to assess the likelihood of realization are the Company's forecast of future taxable income and available tax planning strategies that could be implemented to realize the net deferred tax assets. Failure to achieve forecasted taxable income in applicable tax jurisdictions could affect the ultimate realization of deferred tax assets and could result in an increase in the Company's effective tax rate on future earnings. The provision for income taxes represents the tax payable for the year and the change during the year in deferred tax assets and liabilities.

The Company adopted ASC topic 740-10-05, Income Tax, which provides guidance for recognizing and measuring uncertain tax positions, it prescribes a threshold condition that a tax position must meet for any of the benefits of the uncertain tax position to be recognized in the financial statements. It also provides accounting guidance on derecognizing, classification and disclosure for these uncertain tax positions. As of December 31, 2014 and 2013, the Company had recorded no net unrecognized tax benefits associated with uncertain income tax positions.

New Accounting Pronouncements

On April 10, 2014, the FASB issued Accounting Standards Update ("ASU") No. 2014-08, *Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*. Under this amendment, requirements for reporting discontinued operations have changed. Discontinued operations may include disposals of a business, nonprofit activity and component of an entity upon meeting certain other criteria. Disposals representing components of an entity must reflect a strategic shift that has a major effect on the entity's operations and financial results. Previous conditions prohibiting the entity from having significant continuing involvement in the disposal group and requiring the elimination of operations and cash flows from ongoing operations of the entity have been removed. The ASU is effective for annual periods beginning on or after December 15, 2014 but early adoption is permitted, but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously available for issuance. The Company has early adopted this standard at December 31, 2014.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09"), which supersedes nearly all existing revenue recognition guidance under GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the

revenue recognition process than are required under existing GAAP. The standard is effective for annual periods beginning after December 15, 2016, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). We are currently evaluating the impact of our pending adoption of ASU 2014-09 on our consolidated financial statements and have not yet determined the method by which we will adopt the standard in 2017.

Management has assessed the potential impact of other recently issued, but not yet effective, accounting standards and determined that the provisions are either not applicable to our company, or are not anticipated to have a material impact on our consolidated financial statements.

NOTE 2 - LIQUIDITY

The Company's liquidity is closely monitored by management. The Company uses cash flow forecasting linked to production forecasts and existing and projected credit and bank facilities, to ensure there are sufficient resources to fulfil its short term needs and strategic plans. At December 31, 2014, the Company had a three-year term loan in the U.K. with Lloyds Bank on which the balance reduces each month until it is extinguished in April 2017. The original loan was for \$1.8 million (\$1.7 million using the exchange rates as at December 31, 2014) and at December 31, 2014, the balance outstanding was \$1.3 million. This loan has a covenant that links to the net worth of the UK holding company. The Company was in compliance with the covenants existing at both December 31, 2014 and 2013.

Short-term credit facilities are heavily dependent upon the sales and underlying profitability of the Company's subsidiaries. Credit facilities for the operating subsidiaries are a function of accounts receivable. There are no major capital expenditure plans which will absorb working capital and management considers that the current level of working capital is adequate for the Company's current requirements. The majority of the Company's cash is held by its foreign subsidiaries. The net worth covenant which pertains to the Lloyds Bank loan, described above, imposes practical limitations on the amounts that may be repatriated for use in paying corporate expenses and paying corporate debt. The overseas companies pay management charges to the parent Company for management services and brand name use and also pay dividends if and when appropriate.

As a result of the combination of forecasted cash flows from operations and existing financing arrangements, the Company believes that as a stand-alone business it has sufficient funding to support its working capital requirements during the next 12 months. The Company has a substantial backlog as of December 31, 2014 and March 21, 2015 and the Company continues to experience good booking levels to support future shipments. In order to support future expected growth, the Company plans to reinvest a substantial amount of cash from operations back into the business for inventory purchases, engineering and product development. The Company recognizes the need to closely manage cash from operations to meet the operational needs of the business and satisfy near-term debt service obligations. The Company's ability to support its business plan is dependent upon its ability to achieve profitable operations, manage costs and satisfy long-term debt service obligations. Taking these factors into consideration, management believes the Company will be able to satisfy its long-term debt service obligations for the next twelve months from the date of issuance of these financial statements, and meet its short term obligations and commitments. As explained below in Note 20, since the year end the Company has agreed to sell its electronic devices segment for a gross sale price of \$22 million. These proceeds will be reduced by the requirement to repay debt and settle other liabilities but the cash remaining is expected to be sufficient to meet any other liabilities and ensure a dividend to shareholders. This sale and plan for a subsequent liquidation dividend to shareholders requires shareholder approval.

NOTE 3 - DISPOSAL OF CXR LARUS CORPORATION

During the three months ended September 30, 2014, management determined that CXR Larus Corporation (“CXR Larus”), a wholly-owned subsidiary of the Company, no longer represented a major component of the group, either strategically or in terms of its contribution to the group’s performance, and accordingly took the decision to divest of this business. In September 2014, management committed to the sale of certain assets and liabilities relating to the CXR Larus Network Access and Synchronization and Timing product lines. Following the sale of the test product line in 2012, this constituted the remaining business activities of CXR Larus. The sale of these assets was completed on October 8, 2014. The activities of CXR Larus were previously included in the Company’s communications equipment segment. The sale agreement also allows for a small royalty on sales made by the purchaser in the ensuing twelve months, however, the Company does not expect to have any significant continuing involvement with the business following the disposal. The Company closed the business in the final three months of 2014 and has continued to collect the remaining receivables. A loss on disposal of \$9,000 has been recognized in the consolidated statements of comprehensive income/(loss). As this was not a major component of the group nor determined to be a strategic shift, the disposal was not classified as discontinued operations in the consolidated statements of comprehensive income/(loss).

The table below reflects the major classes of assets and liabilities at December 31, 2013 (in thousands).

\$	December 31, 2013
Inventory	456
Property, plant and equipment	13
Total assets sold	469

In preparation for the sale of the assets the Company incurred an impairment charge of \$202,000 against the carrying value of the inventory. At the date of sale, the Company incurred severance costs of \$103,000 and professional fees of \$25,000 in connection with the sale.

The following tables summarize certain components of the statements of operations generated by CXR Larus, which is included as part of income/(loss) from operations, as the disposal did not meet the discontinued operations criteria, for the year ended December 31, 2014 and 2013 (in thousands):

	Year ended December 31, 2014	Year ended December 31, 2013
Net Sales	1,206	1,465
Pre-tax loss	(465)	(425)

NOTE 4 - INVENTORIES

Inventories are stated at the lower of cost (first-in, first-out method) or market (net realizable value) and consisted of the following at December 31, (in thousands):

	December 31, 2014	December 31, 2013
Gross Inventory		
Raw materials	\$ 5,896	\$ 6,697
Work-in-process	1,703	1,553
Finished goods	1,839	2,799
Total gross inventories	\$ 9,438	\$ 11,049
Inventory Reserve		
Raw materials	\$ 2,582	\$ 3,150
Work-in-process	435	431
Finished goods	382	1,111
Total reserve	\$ 3,399	\$ 4,692
Net Inventory		
Raw materials	\$ 3,314	\$ 3,547
Work-in-process	1,268	1,122
Finished goods	1,457	1,688
Total net inventories	\$ 6,039	\$ 6,357

The movement in the Inventory reserve was as follows:

Inventory reserve at January 1	\$4,692	\$4,464
Current year reserve	611	583
Written off in year	(1,660)	(438)
Foreign currency translation	(244)	83
Inventory reserve at December 31	\$3,399	\$4,692

F-14

NOTE 5 - PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consisted of the following as of December 31, (in thousands):

	2014	2013
Land and buildings	\$3,172	\$3,401
Machinery, equipment and fixtures	2,969	3,407
Leasehold improvements	740	731
	6,881	7,539
Accumulated depreciation and amortization	(2,496)	(3,064)
Total property, plant and equipment	\$4,385	\$4,475

The net book value of assets held under capital leases at December 31, 2014 and 2013 totaled \$842,000 and \$318,000, respectively, after accounting for depreciation in the year of \$171,000 and \$117,000, respectively. The Company recorded depreciation expense associated with its property, plant and equipment of \$0.4 million and \$0.3 million for the years ended December 31, 2014 and 2013, respectively.

NOTE 6 - GOODWILL AND INTANGIBLE ASSETS

The Company had goodwill of \$5.0 million and \$5.3 million at December 31, 2014 and 2013, respectively, all of which was associated with its electronic devices reporting unit.

As of December 31, 2014, the Company assessed the qualitative factors to determine whether the existence of events or circumstances might lead to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. After assessing the totality of events or circumstances, including reviewing the offers received for the segment that are described in the in Note 20 below, we determined that it is not more likely than not that the fair value of the electronic devices reporting unit is less than its carrying amount. The Company performed a detailed annual impairment test for goodwill for the electronic devices reporting unit as of December 31, 2013. In performing the valuations, the Company used cash flows that reflected management's forecasts, an assessment of the current backlog and anticipated orders and discount rates that reflect the risks associated with the current market. The Company considered the results of an income approach in determining the fair value of the reporting unit discounting the projected cash flows at the Company's weighted average cost of capital to determine the fair value for the electronic devices reporting unit. For the income approach, growth at rates between 3% and 5% per annum was assumed as a result of expected shipments on existing contracts and future opportunities. The projected cash flows were discounted at the Company's weighted average cost of capital of 15% to determine the fair value for the electronic devices reporting unit. Based on the results of this testing at December 31, 2013, the fair values of the electronic devices reporting unit exceeded its book values and the qualitative testing since that date indicate that there

has been no diminution in the value since that date.

The following table reflects changes in the Company's goodwill balances for continuing operations, for the year ended December 31, 2014 and 2013 (in thousands):

	Electronic Devices
Balance at December 31, 2012	5,146
Foreign currency translation	137
Balance at December 31, 2013	\$ 5,283
Foreign currency translation	303
Balance at December 31, 2014	\$ 4,980

F-15

Other intangible assets consist primarily of trademarks, trade names and technology acquired. The original cost and accumulated amortization of these intangible assets from continuing operations consisted of the following at December 31, (in thousands):

	2014			2013		
	Electronic Devices	Communications Equipment	Total	Electronic Devices	Communications Equipment	Total
Intangibles with definite lives:						
Technology acquired	\$-	\$ 1,150	\$ 1,150	\$-	\$ 1,150	\$ 1,150
Customer relationships	-	200	200	-	200	200
Covenant-not-to-compete	200	-	200	200	-	200
Backlog	200	-	200	200	-	200
	400	1,350	1,750	400	1,350	1,750
Accumulated amortization	(400)	(1,350)	(1,750)	(400)	(1,282)	(1,682)
Carrying value	-	-	-	-	68	68
Intangibles with indefinite lives:						
Trademarks and trade names	500	-	500	500	-	500
Foreign currency translation	(133)	-	(133)	(111)	-	(111)
Trademarks and trade names	367	-	367	389	-	389
Total intangible assets, net	\$367	\$ -	\$367	\$389	\$ 68	\$457

In accordance with FASB guidance for accounting for the impairment or disposal of long-lived assets, the Company re-evaluates the carrying value of identifiable intangible and long-lived assets, except for trademarks and trade names, for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. No events or changes in circumstances occurred during 2014 or 2013 that would have required an impairment analysis to be performed. The carrying value of the trademarks and trade names is annually reviewed using a qualitative approach. The trademarks and trade names are integral to the success of the electronic devices segment. Management is satisfied that there has been no diminution in value during the year. This is supported by the offer received for the business since the year end and explained in the post balance sheet note below.

NOTE 7 - ACCRUED LIABILITIES

Accrued expenses as of December 31, consisted of the following (in thousands):

	2014	2013
Accrued payroll and benefits	\$834	\$1,136

Edgar Filing: EMRISE Corp - Form 10-K

Retirement reserve (see note 16)	521	455
Advance payments from customers, current portion	758	694
Warranty reserve	581	675
Foreign currency exposure provision	414	321
Accrued taxes (other than income taxes)	486	125
Accrued engineering contract costs	244	501
Research & Development grant reclaim accrual (see note 20)	62	-
Other accrued expenses	524	352
Total accrued expenses	\$4,424	\$4,259

No other individual item represented more than 5% of total current liabilities.

F-16

NOTE 8 - OTHER LIABILITIES- ANNUITY ACCRUAL RELEASE

An agreement with a retired, former owner of a company that was subsequently purchased by the Company, obliged the Company to pay an inflation-linked monthly annuity to this former owner, for the duration of his life. The liability was calculated based on actuarial data relating to life expectancy, discounted by the Company's weighted average cost of capital. As of December 31, 2013, the Company had accrued a liability of \$697,000 which was included in Other Liabilities on the Company's balance sheet. During September 2014, the individual passed away and the Company was relieved of its obligation. The release of this obligation totaling \$704,000 was included in selling, general and administrative expenses, and separately identified, on the Consolidated Statement of Comprehensive Income/(Loss).

NOTE 9 - FINANCING ARRANGEMENTS

The Company has a variety of debt and credit facilities to satisfy the financing requirements of its operations and the countries within which it operates. These arrangements are tabulated below.

	All amounts are in \$ thousands	
	December	
Lines of credit	31, 2014	December 31, 2013
Lloyds TSB Commercial Finance	328	443
FACTOCIC	381	753
Total lines of credit	\$709	\$ 1,196
Long-term debt	December 31, 2014	December 31, 2013
Lloyds TSB term loan	1,316	711
Lloyds TSB property loan secured by mortgage	2,056	2,255
BPIFrance Loan	243	-
Promissory notes payable	-	2,277
Capital lease obligations	584	93
	4,199	5,336
Current portion of long-term debt	(776)	(2,672)
Long-term debt	\$ 3,423	\$ 2,664

Details of the borrowings set out in the table above are explained below.

Lloyds TSB Commercial Finance

On August 31, 2010, two of the Company's UK subsidiaries, Pascall Electronics Limited ("Pascall") and XCEL Power Systems, Ltd. ("XCEL"), each entered into a Receivables Finance Agreement with Lloyds TSB Commercial Finance Limited ("Lloyds") (each, a "Receivables Finance Agreement" and, collectively, the "Receivables Finance Agreements"), pursuant to which Lloyds agreed to provide Pascall and XCEL with a credit facility to support their UK operations in the aggregate principal amount of £2.75 million (\$4.28 million based on the exchange rate on December 31, 2014), in each case at an advance rate of 88% for UK customers and 85% for invoices issued to customers outside the UK. The facility carries a discount charge of 2.5% above the base rate, and a service fee of 0.2%. The interest and service charge are paid monthly. The Receivables Finance Agreement between Pascall and Lloyds is secured by the All Assets Debenture, dated August 31, 2010, given by Pascall in favor of Lloyds and the Receivables Finance Agreement between XCEL and Lloyds is secured by the All Assets Debenture, dated August 31, 2010, given by XCEL in favor of Lloyds. As of December 31, 2013, outstanding borrowings under the Receivable Finance Agreements were \$443,000 and unutilized capacity for borrowing was \$2,498,000. As of December 31, 2014, outstanding borrowings under the Receivable Finance Agreements were \$381,000 and unutilized capacity for borrowing was \$2.4 million.

FACTOCIC

On September 20, 2010, the Company's French subsidiary, CXR AJ, entered into an accounts receivable financing arrangement (the "CIC Agreement") with FACTOCIC S.A., a subsidiary of CIC Group ("CIC"), pursuant to which CIC agreed to provide CXR AJ a financing arrangement to support its French operations in the aggregate principal amount of €1.35 million (\$1.63 million based on the exchange rate on December 31, 2014) at an advance rate of 90% of presented receivables. The CIC Agreement bears interest at the three month EURIBOR (currently 0.5%) plus 1.4%. As of December 31, 2014, CXR AJ had the equivalent of \$381,000 of outstanding borrowings under the CIC Agreement (2013, \$753,000). The total of accounts receivable at the year-end was \$1.43 million. The accounts receivable which had been financed under this arrangement were \$423,000 and \$920,000 at December 31, 2014 and 2013, respectively.

NOTE 10 - DEBT

Lloyds TSB Bank Term Loan

On August 2, 2011, EMRISE Electronics Limited ("EEL"), a wholly-owned subsidiary of the Company, entered into an agreement for a term loan with Lloyds TSB Bank plc ("Lloyds Bank") in the amount of £750,000 ("Lloyds Term Loan"). As of December 31, 2013, £431,000 (\$711,000 based on the exchange rate at December 31, 2013) was outstanding under the Lloyds Term Loan. On April 1, 2014, the Company replaced this loan with a new three-year loan with Lloyds Bank of £1.1 million (approximately \$1.7 million, using the exchange rate at December 31, 2014). The loan is repayable in monthly installments over the three year term. The loan carries a fixed rate of interest of 6.6% per annum and includes a covenant which requires the net worth of EEL, after deducting inter-company balances, to not fall below £2 million (approximately \$3.2 million using the exchange rate at December 31, 2014). The value of this net worth covenant increases by approximately \$400,000 each calendar year. At December 31, 2014, the balance outstanding under the loan was \$1,316,000. The Company was in compliance with the covenants as of December 31, 2014.

Lloyds TSB Property loan secured by Mortgage

On March 4, 2013, the Company entered into a mortgage with Lloyds Bank for the sum of £1.4 million (approximately \$2.2 million at the rate of exchange on December 31, 2014) to purchase the property occupied by Pascall. This loan, which is secured by a fixed mortgage over the property, is repayable over 20 years. Interest is fixed at an annual rate of 4.8% for 15 years. Thereafter the interest reverts to a rate linked to the London Inter-bank lending rate. The loan is secured by a fixed lien over the property and any fixed plant and machinery within the building. The loan agreement contains financial covenants (assessed annually), requiring the loan to value ratio to be a minimum of

80%, the net worth of EEL, the immediate parent company of Pascall, to be at least £4,776,000 and annual retained profits not to fall below £300,000 (approximately \$7.5 million and \$0.5 million using the exchange rate at December 31, 2014). At December 31, 2014, the Company was in compliance with these covenants as the net worth of EEL, as defined by the loan agreement, was £7.8 million (approximately \$12.2 million using the exchange rate at December 31, 2014) and the profit for the year ended December 31, 2014 was £1,456,000 (approximately \$2.3 million using the exchange rate at December 31, 2014). This compares with profits of \$1.1 million in 2013. As of December 31, 2014, the loan balance outstanding was \$2.1 million and the property had a carrying value of \$3.0 million. At December 31, 2013, the loan balance was \$2.3 million and the carrying value of the property was \$3.1 million.

BPIFrance Loan

In March 2014, CXR AJ, the Company's French operating subsidiary, was granted an innovation loan by BPIFrance. The loan is for 200,000 euros (approximately \$243,000 using the exchange rate at December 31, 2014) and is specifically for the development of new products and processes. The loan is repayable in 20 quarterly installments of \$13,000 starting in December 2016. The loan is interest free. As of December 31, 2014, CXR AJ had \$243,000 of outstanding borrowings under this loan agreement.

Promissory Notes payable

The promissory notes were amended subordinated contingent promissory notes, which were issued to former owners of ACC in May 2008 and were originally scheduled to mature on August 31, 2013. The notes were subordinated to the term loan from Lloyds Bank described above. Since the date of issuance, the terms of the notes were amended numerous times, most recently, with effect from November 1, 2012 (the “Amended Subordinated Contingent Notes”). The Amended Subordinated Contingent Notes bore interest at the prime rate as reported in The Wall Street Journal plus 4% (previously prime rate plus 1%) and were scheduled to mature on December 15, 2014 (the “Maturity Date”) (previously August 31, 2013). Subsequent to December 31, 2013, the payment of principal of \$300,000, due on March 15, 2014, was paid on schedule and the balance of the principal and accrued interest was paid on April 7, 2014. Under the terms of the agreement with the holders of the Amended Subordinated Contingent Notes, on the redemption of such notes, the holders are entitled to indemnification for additional tax paid if the rate of capital gains tax increased between the dates such notes were originally issued and the date of redemption. The rate of capital gains tax did increase from 15% to 20% with effect from January 1, 2013 and, in addition, a capital gains tax surcharge of 3.8% was introduced. The holders of the Amended Subordinated Contingent Notes were therefore entitled to indemnification by the Company for the additional tax payable on their gains. On September 30, 2014, the Company entered an agreement with the former holders of the Amended Subordinated Contingent Notes making a full and final settlement of \$279,000 plus \$10,000 of legal costs charging the settlement sum to other expenses in the Statement of Comprehensive Income. The amounts due were settled on that date. The former note holders have no further claim over the Company or its assets as a result of this agreement.

Capital Leases

The Company has capital leases relating to capital equipment. The leases generally contain purchase options and expire at various dates through January 31, 2019. Capitalized lease obligations have interest rates appropriate at the inception of the lease and range from 6% to 18%. Leases are amortized over the lease term using the effective interest method. At December 31, 2014, the present value of obligations under non-cancelable capital leases were \$581,000 (\$93,000 at December 31, 2013).

Principal maturities related to long-term debt, including the obligations under capital leases, as of December 31, 2014, were as follows (in thousands):

Year ending December 31,	Lloyds loan linked to mortgage	Lloyds Term Loan	BPI Loan	Capitalized Lease Obligations	Total
2015	72	561	-	143	776

2016	77	599	12	131	819
2017	80	156	49	126	411
2018 and beyond	1,828	-	182	181	2,191
	\$ 2,057	\$ 1,316	\$ 243	\$ 581	\$ 4,197

NOTE 11 - STOCK-BASED COMPENSATION

At December 31, 2014, a variety of the Company's stock-based compensation grants or awards were outstanding for employees (including executive officers) and members of the Board of Directors (the "Board") of the Company. All stock-based compensation plans were approved by the Board.

Description of Stock Option Plans

The Company has five stock option plans, the following two of which continue to be available for issuance:

The 2000 Stock Option Plan was adopted by the Board in November 2000 and approved by the stockholders on January 16, 2001. The Board adopted the Amended and Restated 2000 Stock Option Plan (the “2000 Plan”) effective as of August 3, 2001. Under the 2000 Plan, options granted may be either incentive or nonqualified options. Incentive options must have an exercise price of not less than the fair market value of a share of common stock on the date of grant. Nonqualified options must have an exercise price of not less than 85% of the fair market value of a share of common stock on the date of grant. Up to 2,000,000 options may be granted under the 2000 Plan. No option may be exercised more than ten years after the date of grant. The Board does not intend to issue any additional options under this plan.

The 2007 Stock Incentive Plan (the “2007 Plan”) was adopted by the Board in November 2007 and approved by the stockholders on December 12, 2007. Under the 2007 Plan, the administrator may grant or issue stock options (incentive or nonqualified), stock appreciation rights (“SARs”), restricted stock, restricted stock units, performance awards and stock payments, or any combination thereof. Up to 5,000,000 shares of common stock may be granted pursuant to awards under the 2007 Plan. Incentive and nonqualified options must have an exercise price of not less than the fair market value of a share of common stock on the date of grant and may not be exercised more than ten years after the date of grant. However, incentive options granted to an individual who owns (or is deemed to own) more than 10% of the total combined voting power of all class of the Company’s stock must have an exercise price of not less than 110% of the fair market value of a share of common stock on the date of grant and may not be exercised more than five years after the date of grant. The base price of any SAR granted under the 2007 Plan must be at least 100% of the fair market value of a share of common stock on the date of grant. SARs will be settled in shares of common stock. Restricted stock may have a price as determined by the administrator. Restricted stock units entitle the holder to receive vested shares of common stock. Neither restricted stock or restricted stock units may be sold or otherwise hypothecated or transferred. Performance awards will be paid in shares of common stock and may be granted to employees, consultants or independent directors based on specific performance criteria. Stock payments may be issued to employees, independent directors or consultants in the form of common stock or an option or other right to purchase common stock and may be issued as part of a deferred compensation arrangement that would otherwise be paid in cash.

Stock option activity for the years ended December 31, 2014 and 2013 was as follows:

	2014		2013	
	Shares	Weighted	Shares	Weighted
	(in	Average	(in	Average
	000’s)	Exercise Price	000’s)	Exercise Price
Outstanding, beginning of year	351	\$ 3.36	449	\$ 3.56
Granted	-	\$ -	50	\$ 0.55
Exercised	-	\$ -	-	\$ -

Edgar Filing: EMRISE Corp - Form 10-K

Forfeited (including expirations)	(42)	\$ 3.75	(148)	\$ 3.01
Outstanding, end of year	309	\$ 3.31	351	\$ 3.36
Exercisable, end of year	309	\$ 3.31	351	\$ 3.36

As of December 31, 2014, the Company had 309,000 fully-vested stock options, with a weighted average exercise price of \$3.31 and remaining term of 3.8 years.

The following table summarizes information about stock options outstanding at December 31, 2014:

Range of Exercise Prices	Options Outstanding and Exercisable		Weighted Average Exercise Price
	Option (in 000's)	Weighted Average Remaining Life in Years	
\$0.01 to \$1.00	50	8.1	\$ 0.55
\$1.01 to \$2.00	50	4.23	\$ 1.53
\$2.01 to \$3.00	67	3.64	\$ 2.18
\$3.01 to \$5.00	66	3.64	\$ 3.06
\$5.01 to \$7.50	76	1.0	\$ 7.50
Total options	309		\$ 3.31

All current options are exercisable. There are no options that are not exercisable at December 31, 2014.

Total stock-based compensation expense included in wages, salaries and related costs was \$60,000 and \$28,000 for the year ended December 31, 2014 and 2013, respectively. These compensation expenses were charged to selling, general and administrative expenses. As of December 31, 2014, the Company had no unrecognized compensation expense related to stock option grants.

Included within the stock-based compensation expense, in accordance with the Company's compensation arrangements, restricted stock issued under the 2007 Plan was awarded to the members of the Board as partial compensation for Board meeting attendance. In addition Mr. Jefferies and Mr. Blades in their capacity as officers of the Company were awarded 42,000 and 25,000 shares of restricted stock respectively in October 2014. These shares are restricted for 6 months from the date of issue.

A summary of the restricted stock activity in the year ended December 31, 2014, is as follows:

	2014 Restricted Shares (in 000's)
Outstanding, beginning of year	9
Granted	97
Vested in year	(21)
Outstanding, end of year	85

The average vesting period of the outstanding restricted shares at December 31, 2014 is 3.5 months.

A stock compensation expense in respect of these awards of \$37,000 has been included in the total stock compensation charge for 2014. Total restricted stock compensation expense of \$60,000 was recorded during the year ended December 31, 2014. In 2013 the equivalent expense was \$8,000. The stock option charge for 2014 and 2013 was \$nil and \$19,000, respectively.

NOTE 12 - WARRANTS

There were no warrants outstanding at December 31, 2014 or 2013.

NOTE 13 - EARNINGS/(LOSS) PER SHARE

Basic earnings/(loss) per share is computed by dividing net income/(loss) by the weighted average common shares outstanding during a period. Diluted income/(loss) per share is based on the treasury stock method and includes the dilutive effect of stock options outstanding during the period. Common share equivalents have been excluded where their inclusion would be anti-dilutive. There are 50,000 stock options in issue at the year-end that are at a lower option price than the market value but the average stock option price of options outstanding at the year- end exceeds the market value. The dilutive impact of the 50,000 stock options that have an exercise price that is below the current market value would not be material.

	2014	2013
NUMERATOR:		
Net income/(loss)	\$877	\$(392)
DENOMINATOR:		
Basic weighted average common shares outstanding	10,740	10,703
Effect of dilutive securities:		
Dilutive stock options and warrants	-	-
Diluted weighted average common shares outstanding	10,740	10,703
Basic and diluted earnings/(loss) per share	0.08	(0.04)

The following table shows the common stock equivalents that were outstanding as of December 31, 2014 and 2013, but were not included in the computation of diluted earnings per share because their impact would have been anti-dilutive and as a result of the loss incurred by the Company in 2013:

	Number of Shares	Range of Exercise Price Per Share
Anti-dilutive common stock options:		
As of December 31, 2014	309,342	\$0.55 - 7.50
As of December 31, 2013	351,000	\$ 0.55 - 7.50

NOTE 14 - INCOME TAXES

The Company files a consolidated U.S. federal income tax return. State tax returns are filed on a consolidated, combined or separate basis depending on the applicable laws relating to the Company and its domestic subsidiaries. Additionally, the Company files tax returns in England and France.

The Company's income before provision for income taxes was generated from the U.S. and foreign operations for the years ended December 31, as follows (in thousands):

	2014	2013
Earnings (loss) before income taxes:		
U.S.	\$(2,298)	\$(2,040)
Foreign	3,559	1,760
Earnings (loss) before income taxes	\$1,261	\$(280)

The Company's provision for income taxes consisted of the following for the years ended December 31 (in thousands):

	2014	2013
Current:		
Federal	\$-	\$-
State	(10)	-
Foreign	371	172

Total current	361	172
---------------	-----	-----

Deferred:

Federal	-	-
State	-	-
Foreign	23	(60)
Total deferred	23	(60)
Total provision for income taxes	\$384	\$112

Income tax expense differed from the amount obtained by applying the statutory federal income tax rate of 34% to income before income taxes as follows for the years ended December 31 (in thousands):

	2014	2013
Federal income tax at statutory rates	\$429	\$(121)
State income taxes, net of federal benefit	(10)	-
Foreign income taxes	(836)	(461)
Changes in valuation allowances	666	521
Foreign income inclusion - IRC 956	134	165
Permanent differences	1	8
	\$384	\$112

F-22

As a result of the Company's extensive net operating loss carry-forwards in the United States and France and certain tax credits for research and development expense in the United Kingdom and France the Company paid no United States federal income tax in 2014 or 2013 and no foreign income tax in France in 2014 or 2013. The Company paid foreign income taxes in the United Kingdom for 2014 and 2013.

The Company's business is subject to regulations under a wide variety of U.S. federal, state and foreign tax laws, regulations and policies. The majority of the earnings and profits of the Company's foreign subsidiaries are deemed to have been distributed to the United States, with the exception of undistributed earnings of approximately \$0.3 million which have not been taxed in the U.S. and which are deemed to have been reinvested indefinitely outside the United States. These earnings will continue to be indefinitely reinvested but could become subject to an additional tax charge if they were remitted as dividends or were loaned to the Company. No deferred taxes have been provided on these earnings.

Under the terms of the promissory notes described in Note 10 above, the Company's foreign subsidiaries had issued guarantees on U.S. credit facilities and, as a result, under Section 956 of the Code, had been deemed to have distributed some of their earnings to fund U.S. operations. Subsequent to December 31, 2013, the promissory notes have been redeemed and these guarantees no longer apply. Further, certain of the Company's foreign subsidiaries have advanced cash funds to the U.S. entities to meet cash needs. This has resulted in U.S. federal taxable income and an increase in U.S. tax liability, which has been reduced through the utilization of available net operating loss carry-forwards and foreign tax credits.

The Company had U.S. federal net operating loss carry-forwards of approximately \$17.4 million as of December 31, 2014 which will expire at various dates beginning in 2018 through 2033. The use of the net operating carry-forwards for state tax purposes is governed by rules specific to each state. As of December 31, 2014 and 2013, the Company recorded a valuation allowance on the deferred tax asset. Management believes sufficient uncertainty exists regarding the realizability of the deferred tax asset items and that a valuation allowance is required. Management considers projected future taxable income and tax planning strategies in making this assessment. The amount of the deferred tax assets considered realizable, however, could materially change in the near future if estimates of future taxable income during the carry-forward period are changed.

In addition, the Company has approximately €1.3 million in net operating loss carry forwards at CXR AJ, its French operating unit, which can be used to offset tax arising on future profits at this subsidiary.

As a result of the Company's extensive net operating loss carry-forwards and certain tax credits for research and development expense both in the United States and abroad apart from Delaware taxes the Company paid no United States federal income tax in 2014 and no foreign income tax in France in 2014, 2013 or 2012. The Company paid foreign income taxes in the United Kingdom for 2014 and 2013.

Utilization of the Company's net operating loss and tax credit carry-forwards may be subject to substantial annual limitation should the Company experience an ownership change triggering limitations provided by the Code and similar state provisions. Such an annual limitation could result in the expiration or elimination of the net operating loss and tax credit carry-forwards before utilization.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities were as follows as of December 31 (in thousands):

	2014	2013
Current deferred tax assets:		
Allowance for doubtful accounts	\$1	\$5
Inventory reserves and uniform capitalization	321	982
Other accrued liabilities	62	91
	384	1,078
Valuation allowance-current deferred tax assets	(354)	(1,032)
Total current deferred tax assets	30	46
Long-term deferred tax assets:		
Depreciation on property, plant & equipment	25	26
Non-qualified stock option expense	13	13
Deferred compensation	-	240
Deferred income	3	3
Tax credits	55	55
Net operating loss carry-forwards	6,715	6,900
Other, net	-	448
	6,811	7,685
Valuation allowance-long-term deferred tax assets	(6,786)	(7,632)
Total long-term deferred tax assets	25	53
Deferred tax liabilities:		
Intangible assets other than goodwill	-	(17)
Total deferred tax assets (long-term)	25	36
Net deferred tax assets	\$55	\$82

The adoption of ASC 740-10 Income Taxes-Tax Positions did not result in a material adjustment to the Company's liability for unrecognized income tax benefits. The Company has not recognized benefits for any uncertain tax positions that it believes would be more-likely-than-not upheld in an examination by any tax authorities. The Company currently has no open matters with tax authorities nor is it engaged in an examination by any tax authority. The Company's policy on classification of any interest and penalties relating to unrecognized income tax positions, is to classify interest as interest expense and penalties as other expenses. No interest or penalties were recognized during

2014 or 2013.

The Company files income tax returns in the United States federal jurisdiction, the United Kingdom and France, and in the state jurisdictions of California, Texas, Pennsylvania and New Jersey. The Company is no longer subject to United States federal and state tax examinations for years before 2009 and 2008, respectively, and is no longer subject to tax examinations for the United Kingdom for years prior to 2012, and for France for years prior to 2009.

F-24

NOTE 15 - OPERATING SEGMENTS

The Company has two reportable operating segments: electronic devices and communications equipment. The electronic devices segment manufactures and markets electronic power supplies, RF and microwave devices and subsystem assemblies. The electronic devices segment consists of the Company's two electronic device subsidiaries, located in England, both of which offer the same or similar products to the same or similar customers.

The communications equipment segment designs, manufactures and distributes network access products including timing and synchronization products. The communications equipment segment consists of operating entities CXR Larus located in the United States (which closed in October 2014) and CXR AJ located in France, both of which offered the same or similar products to similar customers. Both segments operate primarily in the U.S., European and North African markets, but they have distinctly different customers, design and manufacturing processes and marketing strategies. Each segment has discrete financial information and a separate management structure.

The Company evaluates performance based upon contribution margin of the segments and also upon profit or loss from operations before income taxes exclusive of nonrecurring gains and losses. The Company accounts for intersegment sales at pre-determined prices negotiated between the individual segments.

Included in the Company's reconciliation of segment financial data to the consolidated amounts is unallocated corporate expenses. Selected financial data for each of the Company's operating segments reconciled to the consolidated totals is shown below (in thousands):

	Year ended December 31,	
	2014	2013
Net sales		
Electronic devices	\$24,227	\$21,717
Communications equipment	11,438	10,181
Total	\$35,665	\$31,898
Gross profit		
Electronic devices	\$7,489	\$6,280
Communications equipment	3,692	3,435
Total	\$11,181	\$9,715
Depreciation and amortization		
Electronic devices	\$380	\$288
Communications equipment	132	176
All other	-	10
Total	\$512	\$474

Edgar Filing: EMRISE Corp - Form 10-K

Operating income (loss)		
Electronic devices	\$3,856	\$2,681
Communications equipment	25	46
Corporate and other	(2,229)	(2,478)
Total	\$1,652	\$249

	December	December
	31, 2014	31, 2013
Total assets		
Electronic devices	\$ 18,817	\$ 20,134
Communications equipment	5,763	6,266
Corporate and other	275	59
Total	\$ 24,855	\$ 26,459

One customer of the electronic devices segment accounted for 10.7% of total sales in 2014. The largest customer in 2013 accounted for 11.6% of sales. No other customer in either segment accounted for 10% or more of net sales during 2014 or 2013.

The Company's segments operate in different geographic areas. The following table is a summary of the Company's net sales by geographic area of origination for the year ended December 31, (in thousands):

	2014		2013	
	Electronic Communications		Electronic Communications	
	Devices	Equipment	Devices	Equipment
United States	\$-	\$ 1,218	\$-	\$ 1,465
United Kingdom	24,227	-	21,717	-
France	-	10,220	-	8,716
Total net sales	\$24,227	\$ 11,438	\$21,717	\$ 10,181

Sales and purchases between geographic areas have been accounted for on the basis of prices set between the geographic areas, generally at cost plus 40%. Net sales by geographic area have been determined based upon the country from which the product was shipped.

The following table is a summary of the Company's total assets by geographic area at December 31, (in thousands):

	2014	2013
United States	\$375	\$1,022
United Kingdom	18,817	20,134
France	5,663	5,303
Total assets	\$24,855	\$26,459

NOTE 16 - RETIREMENT PLANS

The Company contributes to 401K deferred tax defined contribution pension plans covering substantially all U.S. domestic employees. The Company's contributions to these plans were \$7,000 and \$3,000 in the years ended December 31, 2014 and 2013, respectively. In the UK, the Company contributes to certain defined contribution pension plans for eligible employees who choose to join the schemes. The rates of the Company contributions range from 2% to 8% of eligible earnings. The Company's contributions to these UK pension plans were \$600,000 in 2014 and \$550,000 in 2013.

The Company's subsidiary in France has a retirement plan. Employee benefits are based on years of service and the employees' compensation during their employment. The plan does not have specifically identified, segregated assets but the projected cost has been accrued in these accounts and the projected benefit obligation is included in accrued liabilities. The liabilities are calculated by external actuarial consultants. No contributions were paid in either of the

periods presented. The actuarially computed components of net periodic benefit cost included the following components for the years ended December 31, (in thousands):

	2014	2013
Service costs	\$ 20	\$ 20
Interest costs	14	13
Amortization of unrecognized prior service cost	3	4
Net periodic pension expense	\$ 37	\$ 37

The following table sets forth the funded status and amounts recognized in the Company's consolidated balance sheet and consolidated statements of comprehensive income/(loss) for the years ended December 31, (in thousands):

	2014	2013
Change in benefit obligation:		
Projected benefit obligation, beginning of year	\$455	\$453
Service cost	20	20
Interest cost	14	13
Exchange rate movement	(66)	20
Actuarial loss/(gain)	98	(51)
Projected benefit obligation, end of year	\$521	\$455
Unfunded status	\$521	\$455
Unrecognized loss	-	-
Net amount recognized	\$521	\$455

The weighted average assumptions used to determine pension benefit obligations at December 31, were as follows:

	2014		2013	
Discount rate	1.5	%	3.15	%
Average remaining service life at year end	12.5 yrs.		13.1 yrs.	
Average rate of future compensation increase	2.0	%	2.0	%

NOTE 17 - COMMITMENTS AND CONTINGENCIES

Leases

The Company conducts its operations from freehold sites and from leased facilities under operating leases that expire at various dates from 2015 through 2033. The leases generally require the Company to pay all maintenance, insurance, property tax costs, and contain provisions for rent increases. Total rent expense, net of sublease income, was \$0.2 million for 2014 and \$0.3 million for 2013.

At the year end the future minimum rental payments required under operating leases that have initial or remaining non-cancellable lease terms in excess of one year were as follows:

Year ending December 31,	Amount
2015	\$ 326
2016	294
2017	263
Thereafter	2,539
Total	\$ 3,422

Research and Development grants

In December 2013, the Company received notification of an assessment from the Direction Generale des Finances Publiques in France challenging the basis of claims made by the Company's French subsidiary, CXR AJ, in respect of research and development activity for the years 2009 and 2010. The amount being challenged was the sum of 187,000 euros (approximately \$227,000 using the exchange rate at December 31, 2014) representing grants received in the two year period. The Company took independent advice at that time which supported the Company's view that claims had been made in accordance with the applicable rules and regulations and the Company's claims were defensible in their

entirety. In June 2014, the Company received notification from the Direction Generale des Finances Publiques that it was requesting repayment of 354,000 euros (approximately \$430,000) for the four years from 2009 to 2012 and in September 2014, a claim of 17,000 euros (approximately \$21,000) in respect of 2013 was received. The Company, after taking further independent advice, continued to challenge the ruling and since the year end, on March 13, 2015, received notification that the repayment claim was to be reduced to \$62,000. The write back to income in the fourth quarter of the year was \$389,000.

Litigation

The Company and its subsidiaries are, from time to time, involved in legal proceedings, claims and litigation arising in the ordinary course of business. While the amounts claimed may be substantial, the ultimate liability cannot presently be determined because of considerable uncertainties that exist. Therefore, it is possible the outcome of such legal proceedings, claims and litigation could have a material effect on quarterly or annual operating results or cash flows when resolved in a future period. The Company is not involved in any litigation that we believe could have a material adverse effect on our financial condition or results of operations.

NOTE 18 - RELATED PARTIES

Notes payable to Former Shareholders of ACC

Promissory notes were issued in May 2008 in connection with the acquisition of ACC, a company acquired and subsequently sold by the Company. The total balance of the Amended Subordinated Contingent Notes at December 31, 2013 was \$2.3 million. As disclosed in Note 10 above, on April 7, 2014, the Company repaid the final outstanding balance due under the terms of the Amended Subordinated Contingent Notes. There were no penalties or settlement discount arising from redeeming the promissory notes ahead of schedule.

Other related parties

There are no guarantees by, fees paid to, or loans to or from officers or directors of the Company other than the compensation disclosed in Part III of this Report.

NOTE 19 - FAIR VALUE MEASUREMENTS

FASB guidance for fair value measurements defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants and also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The fair value hierarchy distinguishes between three levels of inputs that may be utilized when measuring fair value as follows:

Level 1 - Inputs are unadjusted quoted prices in active markets for identical assets or liabilities available at the measurement date.

Level 2 - Inputs are unadjusted quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs derived from or corroborated by observable market data.

Level 3 - Inputs that are unobservable inputs which reflect the reporting entity's own assumptions on what assumptions the market participants would use in pricing the asset or liability based on the best available information.

Cash, accounts receivable and accounts payable reflected in the Consolidated Balance Sheets are a reasonable estimate of their fair value due to the short term nature of these instruments. The carrying value of the Company's borrowings is a reasonable estimate of its fair value as borrowings under the Company's credit arrangements have variable rates that reflect currently available terms and conditions for similar debt. As of December 31, 2014, the Company did not have any material financial assets and liabilities measured at fair value on a recurring basis that would be subject to the disclosure provisions of FASB guidance noted above.

Fair values used in the Company's goodwill impairment reviews are measured mostly by using Level 3 inputs as defined in the fair value hierarchy.

NOTE 20 - SUBSEQUENT EVENTS

As explained above in Note 18, on March 13, 2015, the Company received notification that the repayment demand in respect of French research and development claims for the years from 2009 to 2012 was to be reduced from \$451,000

to \$62,000. The charge for the reclaim had been established in the second and third quarters of 2014 but following the successful appeal \$389,000 was released to income in the final quarter of the year.

On March 22, 2015, the Company entered into a Stock Purchase Agreement (the “Purchase Agreement”) with DDC (United Kingdom) Ltd., a subsidiary of Data Device Corporation (“DDC” or the “Purchaser”), to sell all of the issued and outstanding shares of the common stock of the Company’s wholly owned subsidiary, EMRISE Electronics Ltd. (“EEL”), for a gross purchase price of \$22 million, net of debt and transaction expenses and subject to a working capital adjustment (the “Transaction”). EEL, is the holding company for the electronic devices segment of the business. This segment constituted 68% of the Company’s sales in both 2014 and 2013 and operating profit of \$3.8 million and \$2.7 million in the year ended December 31, 2014 and 2013 respectively.

In connection with the Purchase Agreement, the Company and Purchaser have agreed to deposit \$900,000 of the purchase price into escrow at the closing of the Transaction (the “Closing”) to secure certain indemnification obligations of the Company under the Purchase Agreement. This escrow amount will remain available for satisfaction of any indemnification claims until twelve months following the Closing, at which time any remaining balance not subject to outstanding and unresolved claims will be distributed to the Company.

In connection with the Company’s entry into the Purchase Agreement, certain individuals specified in the Purchase Agreement, including Graham Jefferies, our President and Chief Operating Officer, have entered into employment agreements with the Purchaser which shall become effective at Closing. The sale has been unanimously approved by the Board but will be subject to shareholder approval with a vote through a proxy process. Full details of the proposed transaction are contained in the Current Report on Form 8-K filed by the Company with the SEC on March 23, 2015. Shareholders will receive full details of the proxy and voting procedures in due course. The proposed sale followed a strategic review carried out by the Company over the preceding year. The Board also determined that, assuming the transaction receives shareholder approval, the Company’s communications business should also be sold and Emrise Corporation should be dissolved and liquidated completely after the consummation of the transaction. In this respect, the Board approved a Plan of Liquidation and Dissolution (the “Plan of Dissolution”). It is anticipated that under Delaware law that the execution of the Plan of Dissolution may take up to three years.
