| NOTES TO CONSOLIDATED FINANCIAL STATEMENTS |
| (Dollars in thousands, except per share data) |
| |
| 1. Summary of significant accounting policies: |
| |
| Nature of operations: |
| |
| Peoples Financial Services Corp., a bank holding company incorporated under the laws of Pennsylvania, provides a full range of financial services through its wholly-owned subsidiary, Peoples Security Bank and Trust Company ("Peoples Bank"), including its subsidiaries, Peoples Advisors, LLC and Penseco Realty, Inc. (collectively, the "Company" or "Peoples"). The Company services its retail and commercial customers through twenty-six full-service community banking offices located within the Lackawanna, Lehigh, Luzerne, Monroe, Susquehanna, Wayne and Wyoming Counties of Pennsylvania and Broome County of New York. |
| Basis of presentation: |

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10-01 of Regulation S-X. In the opinion of management, all normal recurring adjustments necessary for a fair presentation of the financial position and results of operations for the periods presented have been included. All significant intercompany balances and transactions have been eliminated in consolidation. Prior-period amounts are reclassified when necessary to conform to the current year's presentation. These reclassifications did not have any effect on the operating results or financial position of the Company. The operating results and financial position of the Company for the three and nine months ended and as of September 30, 2015, are not necessarily indicative of the results of operations and financial position that may be expected in the future.

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates that are particularly susceptible to material change in the near term relate to the determination of the allowance for loan losses, fair value of financial instruments, the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans, the valuation of deferred tax assets, determination of other-than-temporary impairment losses on securities, impairment of goodwill and fair value of

assets acquired and liabilities assumed in business combinations. Actual results could differ from those estimates. For additional information and disclosures required under GAAP, reference is made to the Company's Annual Report on Form 10-K for the period ended December 31, 2014.

The Company has evaluated events and transactions occurring subsequent to the balance sheet date of September 30, 2015, for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

Recent accounting standards:

In April 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-03, "Interest—Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs."

ASU 2015-03 requires that debt issuance costs be reported in the balance sheet as a direct deduction from the face amount of the related liability, consistent with the presentation of debt discounts. Prior to the amendments, debt issuance costs were presented as a deferred charge (i.e., an asset) on the balance sheet. The ASU provides examples illustrating the balance sheet presentation of notes net of their related discounts and debt issuance costs. Further, the amendments require the amortization of debt issuance costs to be reported as interest expense. Similarly, debt issuance costs and any discount or premium are considered in the aggregate when determining the effective interest rate on the debt.

The amendments are effective for public business entities for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. The amendments must be applied retrospectively. The adoption of ASU 2015-03 on January 1, 2016, is not expected to have a material effect on the operating results or financial position of the Company.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

In July 2015, the FASB issued ASU 2015-12, "Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient."

The amendments in ASU 2015-12 (i) require fully benefit-responsive investment contracts to be measured, presented and disclosed only at contract value, not fair value; (ii) simplify the investment disclosure requirements; and (iii) provide a measurement date practical expedient for employee benefit plans.

Part I. Fully Benefit-Responsive Investment Contracts – the amendments designate contract value as the only required measurement for fully benefit-responsive investments contracts within the scope of Topics 962 and 965, eliminating the requirement to measure, present and disclose such contracts also at fair value and reconcile fair value to contract value.

Part II. Plan Investment Disclosures – the amendments eliminate certain disclosure requirements for both participant-directed investments and nonparticipant-directed investments, and also reduce disclosures required specifically for investments using the net asset value per share practical expedient. The amendments also require that both participant-directed and nonparticipant-directed investments be grouped only by general type, eliminating the need to disaggregate the investments in multiple ways (i.e., also on the basis of nature, characteristics, and risks as required by Topic 820, Fair Value Measurement).

Part III. Measurement Date Practical Expedient – the amendments provide a measurement date practical expedient for employee benefit plans similar to the practical expedient allowing employers to measure defined benefit plan assets on a month-end date that is nearest to the employer's fiscal year-end, when the fiscal period does not coincide with a month-end.

The amendments are effective for fiscal years beginning after December 15, 2015. Early adoption is permitted for all three parts individually or in the aggregate. Parts I and II of the ASU should be applied retrospectively, while Part III should be applied prospectively. Only the nature and reason for the change in accounting principle is required to be disclosed in the annual period of adoption. The adoption of ASU 2015-12 on January 1, 2016, is not expected to have a material effect on the operating results or financial position of the Company.

In August 2015, the FASB issued ASU 2015-14, "Revenue from Contracts (Topic 606): Deferral of the Effective Date."

ASU 2015-14 defers the effective date of the new revenue recognition standard by one year. As such, it now takes effect for public entities in fiscal years beginning after December 15, 2017. Early adoption is permitted for any entity that chooses to adopt the new standard as of the original effective date. The adoption of ASU 2015-14 on January 1, 2018, is not expected to have a material effect on the operating results or financial position of the Company.

In August 2015, the FASB issued ASU 2015-15, "Interest – Imputation of Interest (Subtopic 835-30): Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements."

ASU 2015-15 codifies a Securities and Exchange Commission ("SEC") staff announcement that entities are permitted to defer and present debt issuance costs related to line-of-credit arrangements as assets. ASU 2015-15 clarifies that the SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. ASU 2015-15 is effective immediately. The adoption of ASU 2015-15 did not have a material effect on the operating results or financial position of the Company.

In September, 2015, the FASB issued ASU 2015-16, "Business Combination (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments."

ASU 2015-16 requires adjustments to provisional amounts that are identified during the measurement period to be recognized in the reporting period in which the adjustment amounts are determined. This includes any effect on earnings

of changes in depreciation, amortization, or other income effects as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date.

In addition, the amendments in the proposed Update would require an entity to disclose, either on the face of the income statement or in the notes, the nature and amount of measurement-period adjustments recognized in the current period, including separately the amounts in current-period income statement line items that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date.

The amendments are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The amendments in this Update should be applied prospectively to measurement-period adjustments that occur after the effective date of this ASU. The adoption of ASU 2015-16 on January 1, 2016, is not expected to have a material effect on the operating results or financial position of the Company.

2. Other comprehensive income (loss):

The components of other comprehensive loss and their related tax effects are reported in the Consolidated Statements of Income and Comprehensive Income. The accumulated other comprehensive income (loss) included in the Consolidated Balance Sheets relates to net unrealized gains and losses on investment securities available-for-sale and benefit plan adjustments.

The components of accumulated other comprehensive loss included in stockholders' equity at September 30, 2015 and December 31, 2014 is as follows:

3. Earnings per share:

Basic earnings per share represent income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding stock options, and are determined using the treasury stock method.

There were no shares considered anti-dilutive for the three and nine month periods ended September 30, 2015 and 2014.

The Company had 97 investment securities, consisting of 76 tax-exempt state and municipal obligations, one taxable state and municipal obligation, one U.S. Government-sponsored enterprise security, and 19 mortgage-backed securities that were in unrealized loss positions at September 30, 2015. Of these securities, one taxable state and municipal obligation, eight mortgage-backed securities and three tax-exempt state and municipal securities were in a continuous unrealized loss position for twelve months or more. Management does not consider the unrealized losses on the debt securities, as a result of changes in interest rates, to be OTTI based on historical evidence that indicates the cost of these securities is recoverable within a reasonable period of time in relation to normal cyclical changes in the market rates of interest. Moreover, because there has been no material change in the credit quality of the issuers or other events or circumstances that may cause a significant adverse impact on the fair value of these securities, and management does not intend to sell these securities and it is unlikely that the Company will be required to sell these securities before recovery of their amortized cost basis, which may be maturity, the Company does not consider the unrealized losses to be OTTI at September 30, 2015. There was no OTTI recognized for the three or nine months ended September 30, 2015 and 2014.

The Company had 52 investment securities, consisting of 16 tax-exempt state and municipal obligations, one taxable state and municipal obligation, nine U.S. Government-sponsored enterprise securities and 26 mortgage-backed securities that were in unrealized loss positions at December 31, 2014. Of these securities, two U.S. Government-sponsored enterprise securities, four tax-exempt state and municipal securities, and one taxable state and municipal obligation were in a continuous unrealized loss position for twelve months or more.

The Company segments loans into risk categories based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. Loans are individually analyzed for credit risk by classifying them within the Company's internal risk rating system. The Company's risk rating classifications are defined as follows:

- · Pass- A loan to borrowers with acceptable credit quality and risk that is not adversely classified as Substandard, Doubtful, Loss nor designated as Special Mention.
- · Special Mention- A loan that has potential weaknesses that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan

or in the institution's credit position at some future date. Special Mention loans are not adversely classified since they do not expose the Company to sufficient risk to warrant adverse classification.

- Substandard- A loan that is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the bank will sustain some loss if the deficiencies are not corrected.
- Doubtful A loan classified as Doubtful has all the weaknesses inherent in one classified Substandard with the added characteristic that the weaknesses make the collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.
- · Loss- A loan classified as Loss is considered uncollectible and of such little value that its continuance as bankable loan is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future.
