Table of Contents

THE MOSAIC COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Tables in millions, except per share amounts and as otherwise designated)

(Unaudited)

1. Organization and Nature of Business

The Mosaic Company ("Mosaic", and, with its consolidated subsidiaries, "we", "us", "our", or the "Company") produces and markets concentrated phosphate and potash crop nutrients. We conduct our business through wholly and majority owned subsidiaries as well as businesses in which we own less than a majority or a noncontrolling interest, including consolidated variable interest entities and investments accounted for by the equity method.

We are organized into the following business segments:

Our Phosphates business segment owns and operates mines and production facilities in Florida which produce concentrated phosphate crop nutrients and phosphate-based animal feed ingredients, and processing plants in Louisiana which produce concentrated phosphate crop nutrients. Included in the Phosphates segment is our 35% economic interest in a joint venture that owns the Miski Mayo Phosphate Mine in Peru and our 25% interest in the Ma'aden Wa'ad Al Shamal Phosphate Company (the "MWSPC") to develop, own and operate integrated phosphate production facilities in the Kingdom of Saudi Arabia. Once operational, we will market approximately 25% of the MWSPC production.

Our Potash business segment owns and operates potash mines and production facilities in Canada and the U.S. which produce potash-based crop nutrients, animal feed ingredients and industrial products. Potash sales include domestic and international sales. We are a member of Canpotex, Limited ("Canpotex"), an export association of Canadian potash producers through which we sell our Canadian potash outside the U.S. and Canada.

Our International Distribution business segment consists of sales offices, crop nutrient blending and bagging facilities, port terminals and warehouses in several key non-U.S. countries, including Brazil, Paraguay, India and China. Our International Distribution segment serves as a distribution outlet for our Phosphates and Potash segments, but also purchases and markets products from other suppliers.

Intersegment eliminations, unrealized mark-to-market gains/losses on derivatives, and debt expenses are included within Corporate, Eliminations and Other. See Note 14 of our Condensed Consolidated Financial Statements in this report for segment results.

2. Summary of Significant Accounting Policies

Statement Presentation and Basis of Consolidation

The accompanying unaudited Condensed Consolidated Financial Statements of Mosaic have been prepared on the accrual basis of accounting and in accordance with the requirements of the Securities and Exchange Commission ("SEC") for interim financial reporting. As permitted under these rules, certain footnotes and other financial information that are normally required by accounting principles generally accepted in the United States ("GAAP") can be condensed or omitted. The Condensed Consolidated Financial Statements included in this document reflect, in the opinion of our management, all adjustments (consisting of only normal recurring adjustments) necessary for a fair statement of the results for the interim periods presented. The following notes should be read in conjunction with the accounting policies and other disclosures in the Notes to the Consolidated Financial Statements included in our Annual Report on Form 10-K filed with the SEC for the year ended December 31, 2015 (the "10-K Report"). Sales, expenses, cash flows, assets and liabilities can and do vary during the year as a result of seasonality and other factors. Therefore, interim results are not necessarily indicative of the results to be expected for the full fiscal year.

The accompanying Condensed Consolidated Financial Statements include the accounts of Mosaic, its majority owned subsidiaries, and certain variable interest entities in which Mosaic is the primary beneficiary. Certain investments in companies where we do not have control but have the ability to exercise significant influence are accounted for by the equity method.

Table of Contents

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

#### Accounting Estimates

Preparation of the Condensed Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of net sales and expenses during the reporting periods. The most significant estimates made by management relate to the estimates of fair value of acquired assets and liabilities, the recoverability of non-current assets including goodwill, the useful lives and net realizable values of long-lived assets, environmental and reclamation liabilities including asset retirement obligations ("ARO"), the costs of our employee benefit obligations for pension plans and postretirement benefits, income tax related accounts, including the valuation allowance against deferred income tax assets, inventory valuation and accruals for pending legal and environmental matters. Actual results could differ from these estimates.

#### Structured Accounts Payable Arrangements

In Brazil, we finance some of our potash-based fertilizer and other raw material product purchases through third-party financing arrangements. These arrangements provide that the third-party intermediary advance the amount of the scheduled payment to the vendor, less an appropriate discount, at a scheduled payment date and Mosaic makes payment to the third-party intermediary at a later date, stipulated in accordance with the commercial terms negotiated. At June 30, 2016 and December 31, 2015, these structured accounts payable arrangement liabilities were \$195.5 million and \$481.7 million, respectively.

We have corrected the presentation of certain previously-reported balances related to the structured accounts payable arrangements in the Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Cash Flows. The error resulted in an understatement of net cash provided by operating activities and a corresponding understatement of net cash used in financing activities of \$93.6 million for the six months ended June 30, 2015. We evaluated the effects of these errors in the previously issued consolidated financial statements for both the annual and interim periods of the prior years and concluded, based on the relevant quantitative and qualitative factors that the errors were not material, individually or in the aggregate, in relation to the consolidated financial statements taken as a whole.

### 3. Recently Issued Accounting Guidance

#### Recently Adopted Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board ("FASB") issued guidance which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying amount of the associated debt liability, consistent with the presentation of a debt discount. In August 2015, the FASB issued additional guidance which clarified that an entity may defer and present debt issuance costs related to a line-of-credit arrangement as an asset and subsequently amortize those costs ratably over the term of the arrangement, regardless of whether there are any outstanding borrowings on it. This guidance became effective for us beginning January 1, 2016 and has been implemented retroactively. Accordingly, we reclassified \$22.9 million of deferred financing fees against outstanding long-term debt accounts within the December 31, 2015 balance sheet. Our deferred financing fees of \$2.9 million related to our revolving credit facility will remain recorded as an asset.

In March 2016, the FASB issued guidance which simplifies several aspects of the accounting for share-based payment transactions, including certain income tax consequences, classifications on the statement of cash flows, and accounting for forfeitures. The guidance is effective for us beginning January 1, 2017, and early application is permitted. We adopted this standard in the second quarter of 2016 with an effective date of January 1, 2016. The effect of this adoption was not significant to our consolidated balance sheet, statements of earnings or statements of cash flows.

Table of Contents

THE MOSAIC COMPANY  
NOTES TO CONDENSED CONSOLIDATED  
FINANCIAL STATEMENTS - (Continued)

Pronouncements Issued But Not Yet Adopted

In May 2014, the FASB issued guidance addressing how revenue is recognized from contracts with customers and related disclosures. This standard supersedes existing revenue recognition requirements and most industry-specific guidance. This standard was initially expected to be effective for us beginning January 1, 2017, and provides for either full retrospective adoption or a modified retrospective adoption by which the cumulative effect of the change is recognized in retained earnings at the date of initial application. In July 2015, the FASB approved the deferral of the effective date of this standard by one year, and allows for adoption either at January 1, 2017 or January 1, 2018. We intend to utilize the full retrospective adoption method and to elect the deferred adoption date of January 1, 2018. We are currently evaluating the requirements of this guidance, and have not yet determined the impact on our consolidated financial statements.

In January 2016, the FASB issued guidance which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This guidance is effective for us beginning January 1, 2018, and early adoption is not permitted. We are currently evaluating the impact that this guidance will have on our consolidated financial statements.

In February 2016, the FASB issued guidance which requires recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. This guidance is effective for us beginning January 1, 2019, with early adoption permitted. The provisions of this guidance are to be applied using a modified retrospective approach, which requires application of the guidance for all periods presented. We are currently evaluating the impact that this guidance will have on our consolidated financial statements.

 FINANCIAL STATEMENTS - (Continued)

## 4. Other Financial Statement Data

The following provides additional information concerning selected balance sheet accounts:

	June 30, 2016	December 31, 2015
Other current assets		
Final price deferred <sup>(a)</sup>	\$ 119.6	\$ 175.6
Income and other taxes receivable	244.4	249.4
Prepaid expenses	142.6	123.1
Other	124.9	80.5
	\$631.5	\$ 628.6
Other assets		
MRO inventory	\$ 115.8	\$ 118.1
Restricted cash <sup>(b)</sup>	857.5	851.4
Other	283.8	287.9
	\$1,257.1	\$ 1,257.4
Accrued liabilities		
Non-income taxes	\$37.6	\$ 24.9
Payroll and employee benefits	135.3	162.9
Asset retirement obligations	107.0	91.9
Customer prepayments	360.5	121.2
Future capital commitment <sup>(c)</sup>	120.0	120.0
Other	227.9	456.6
	\$988.3	\$ 977.5
Other noncurrent liabilities		
Asset retirement obligations	\$727.2	\$ 749.7
Accrued pension and postretirement benefits	65.8	69.6
Unrecognized tax benefits	25.9	79.2
Other	126.8	132.1
	\$945.7	\$ 1,030.6

<sup>(a)</sup> Final price deferred is product that has shipped to customers, but the price has not yet been agreed upon. This has not been included in inventory as risk of loss has passed to our customers. Amounts in this account are based on inventory cost.

<sup>(b)</sup> Included in restricted cash, as of June 30, 2016 and December 31, 2015, is \$630 million that is committed to be placed in trust following the effectiveness of the consent decrees discussed under "EPA RCRA Initiative" in Note 9 of our Notes to Condensed Consolidated Financial Statements, as financial assurance to support certain estimated future asset retirement obligations.

<sup>(c)</sup> This amount was paid on July 1, 2016.

Table of Contents

THE MOSAIC COMPANY  
NOTES TO CONDENSED CONSOLIDATED  
FINANCIAL STATEMENTS - (Continued)

## 5. Earnings Per Share

The numerator for basic and diluted earnings per share ("EPS") is net earnings attributable to Mosaic. The denominator for basic EPS is the weighted average number of shares outstanding during the period. The denominator for diluted EPS also includes the weighted average number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued, unless the shares are anti-dilutive.

The following is a reconciliation of the numerator and denominator for the basic and diluted EPS computations:

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Net earnings (loss) attributable to Mosaic	\$(10.2)	\$390.6	\$246.7	\$685.4
Basic weighted average number of shares outstanding	349.8	361.3	350.6	363.6
Dilutive impact of share-based awards	—	2.0	1.2	1.9
Diluted weighted average number of shares outstanding	349.8	363.3	351.8	365.5
Basic net earnings (loss) per share attributable to Mosaic	\$(0.03)	\$1.08	\$0.70	\$1.89
Diluted net earnings (loss) per share attributable to Mosaic	\$(0.03)	\$1.08	\$0.70	\$1.88

A total of 4.1 million and 3.1 million shares of Common Stock subject to issuance upon exercise of stock options for the three and six months ended June 30, 2016 and 1.3 million shares for the three and six months ended June 30, 2015, respectively, have been excluded from the calculation of diluted EPS as the effect would have been anti-dilutive.

## 6. Income Taxes

During the six months ended June 30, 2016, gross unrecognized tax benefits decreased by \$75.6 million to \$23.0 million as a result of the resolution of audit activity. If recognized, approximately \$7.0 million of the \$23.0 million in unrecognized tax benefits would affect our effective tax rate and net earnings in future periods.

We recognize interest and penalties related to unrecognized tax benefits as a component of our income tax provision. We had accrued interest and penalties totaling \$1.5 million and \$17.1 million as of June 30, 2016 and December 31, 2015, respectively, that were included in other noncurrent liabilities in the Condensed Consolidated Balance Sheets.

For the three months ended June 30, 2016, tax expense specific to the period included an expense of \$4.8 million, which primarily related to distributions from certain non-U.S. subsidiaries. For the six months ended June 30, 2016, tax expense specific to the period included a benefit of \$59.1 million, which includes a domestic benefit of \$85.8 million related to the resolution of an Advanced Pricing Agreement, which is a tax treaty-based process, partially offset by a \$20.5 million expense related to distributions from certain non-U.S. subsidiaries and \$6.2 million of expense primarily related to changes in estimates from prior periods.

For the three and six months ended June 30, 2016, our income tax rate was favorably impacted by the mix of earnings across the jurisdictions in which we operate and by a benefit associated with depletion when compared to the three and six months ended June 30, 2015. In addition, for the three months ended June 30, 2016, the benefit from income taxes was favorably impacted by approximately \$14 million from the cumulative adjustment resulting from the change in our estimated annual tax rate.

For the three months ended June 30, 2015, tax expense specific to the period included a benefit of \$9.7 million. This benefit is primarily related to changes in estimates associated with an Advanced Pricing Agreement, which is a tax treaty-based process. For the six months ended June 30, 2015, tax expense specific to the period included a benefit of \$38.0 million, which is primarily related to the resolution of certain state tax matters, resulting in a benefit of \$18.4 million, and a reduction in the tax rate change for one of our equity method investments, resulting in a benefit of \$7.5 million.

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

## 7. Inventories

Inventories consist of the following:

	June 30, 2016	December 31, 2015
Raw materials	\$43.4	\$ 68.1
Work in process	387.1	435.9
Finished goods	1,193.2	991.0
Operating materials and supplies	78.4	68.5
	\$1,702.1	\$ 1,563.5

## 8. Goodwill

The changes in the carrying amount of goodwill, by reporting unit, are as follows:

	Phosphates	Potash	International Distribution	Total
Balance as of December 31, 2015	\$ 492.4	\$984.7	\$ 118.2	\$1,595.3
Foreign currency translation	—	64.8	7.4	72.2
Balance as of June 30, 2016	\$ 492.4	\$1,049.5	\$ 125.6	\$1,667.5

We review goodwill for impairment annually in October or at any time events or circumstances indicate that the carrying value may not be fully recoverable, which is based on our accounting policy and GAAP. We continue to monitor events and circumstances in 2016 and we do not believe there has been a triggering event that would indicate it is more likely than not that a goodwill impairment loss has been incurred, although declining selling prices and forecasted selling prices have likely reduced the excess fair value in certain reporting units.

## 9. Contingencies

We have described below judicial and administrative proceedings to which we are subject.

We have contingent environmental liabilities that arise principally from three sources: (i) facilities currently or formerly owned by our subsidiaries or their predecessors; (ii) facilities adjacent to currently or formerly owned facilities; and (iii) third-party Superfund or state equivalent sites. At facilities currently or formerly owned by our subsidiaries or their predecessors, the historical use and handling of regulated chemical substances, crop and animal nutrients and additives and by-product or process tailings have resulted in soil, surface water and/or groundwater contamination. Spills or other releases of regulated substances, subsidence from mining operations and other incidents arising out of operations, including accidents, have occurred previously at these facilities, and potentially could occur in the future, possibly requiring us to undertake or fund cleanup or result in monetary damage awards, fines, penalties, other liabilities, injunctions or other court or administrative rulings. In some instances, pursuant to consent orders or agreements with governmental agencies, we are undertaking certain remedial actions or investigations to determine whether remedial action may be required to address contamination. At other locations, we have entered into consent orders or agreements with appropriate governmental agencies to perform required remedial activities that will address identified site conditions. Taking into consideration established accruals of approximately \$23.6 million and \$25.6 million as of June 30, 2016 and December 31, 2015, respectively, expenditures for these known conditions currently are not expected, individually or in the aggregate, to have a material effect on our business or financial condition. However, material expenditures could be required in the future to remediate the contamination at known sites or at other current or former sites or as a result of other environmental, health and safety matters. Below is a discussion of the more significant environmental matters.

**EPA RCRA Initiative.** In 2003, the U.S. Environmental Protection Agency ("EPA") Office of Enforcement and Compliance Assurance announced that it would be targeting facilities in mineral processing industries, including phosphoric acid producers, for a thorough review under the U.S. Resource Conservation and Recovery Act ("RCRA")

and related state

11

---

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

laws. Mining and processing of phosphate rock generates residual materials that must be managed both during the operation of a facility and upon a facility's closure. Certain solid wastes generated by our phosphate operations may be subject to regulation under RCRA and related state laws. EPA rules exempt "extraction" and "beneficiation" wastes, as well as 20 specified "mineral processing" wastes, from the hazardous waste management requirements of RCRA. Accordingly, certain of the residual materials which our phosphate operations generate, as well as process wastewater from phosphoric acid production, are exempt from regulation as hazardous wastes under RCRA. However, the generation and management of other solid wastes from phosphate operations may be subject to hazardous waste regulation if the waste is deemed to exhibit a "hazardous waste characteristic." As part of its initiative, we understand that EPA has inspected all or nearly all facilities in the U.S. phosphoric acid production sector, including ours, to ensure compliance with applicable RCRA regulations and to address any "imminent and substantial endangerment" found by EPA under RCRA. In addition to EPA's inspections, our phosphates concentrates facilities have entered into consent orders to perform analyses of existing environmental data, to perform further environmental sampling as may be necessary, and to assess whether the facilities pose a risk of harm to human health or the surrounding environment. We received Notices of Violation ("NOVs") from EPA related to the handling of hazardous waste at our Riverview (September 2005), New Wales (October 2005), Mulberry (June 2006), Green Bay (August 2006) and Bartow (September 2006) facilities in Florida. EPA issued similar NOVs to our competitors, including with respect to the Plant City facility acquired in our March 2014 acquisition of the Florida phosphate assets and assumption of certain liabilities (the "CF Phosphate Assets Acquisition") of CF Industries, Inc. ("CF"), and referred the NOVs to the U.S. Department of Justice ("DOJ") for further enforcement.

Following negotiations with the DOJ, EPA and state agencies, on September 30, 2015, we and our wholly owned subsidiary, Mosaic Fertilizer, LLC, reached agreements with EPA, the DOJ, the Florida Department of Environmental Protection ("FDEP") and the Louisiana Department of Environmental Quality (the "LDEQ") on the terms of two consent decrees to resolve claims relating to our management of certain waste materials onsite at our Riverview, New Wales, Mulberry, Green Bay, South Pierce and Bartow fertilizer manufacturing facilities in Florida and our Faustina and Uncle Sam facilities in Louisiana. The consent decrees do not cover the Plant City, Florida phosphate concentrates facility that we acquired as part of the CF Phosphate Assets Acquisition (the "Plant City Facility"). As discussed below, a separate consent decree was previously entered into with EPA and the FDEP with respect to RCRA compliance at Plant City.

The consent decree relating to our Louisiana facilities was entered by the United States District Court for the Eastern District of Louisiana on July 6, 2016, in substantially the form lodged on September 30, 2015. Upon the entry by the United States District Court for the Middle District of Florida of the consent decree relating to our Florida facilities, both consent decrees (collectively, the "2015 Consent Decrees") will become effective. Under the 2015 Consent Decrees we have agreed to the following:

• Payment of a cash penalty of approximately \$8 million, in the aggregate.

• Payment of up to \$2.2 million to fund specific environmental projects unrelated to our facilities.

• Modification of certain operating practices and undertaking certain capital improvement projects over a period of several years that are expected to result in capital expenditures likely to exceed \$200 million in the aggregate.

• Provision of additional financial assurance for the estimated costs of closure and long term care ("Gypstack Closure Costs") of our phosphogypsum management systems ("Gypstacks"). For financial reporting purposes, we recognize our estimated asset retirement obligations ("ARO"), including Gypstack Closure Costs, at their present value. This present value determined for financial reporting purposes is reflected on our Consolidated Balance Sheets in accrued liabilities and other noncurrent liabilities. As of December 31, 2015, the undiscounted amount of our Gypstack Closure Costs ARO, determined using the assumptions used for financial reporting purposes, was approximately \$1.7 billion and the present value of our Gypstack Closure Costs ARO reflected in our Consolidated Balance Sheet was

approximately \$535 million. Following the effectiveness of the 2015 Consent Decrees, we will deposit cash, in the total amount of \$630 million, into two trust funds which are expected to increase over time with reinvestment of earnings. The amount to be deposited corresponds to a material portion of our estimated Gypstack Closure Costs ARO. At December 31, 2015 and June 30, 2016, amounts to be held in such trust funds (including reinvested earnings) are classified as restricted cash and are included in other assets

Table of Contents

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

on our Condensed Consolidated Balance Sheets. We will also issue a \$50 million letter of credit in 2017 to further support our financial assurance obligations under the Florida 2015 Consent Decree. In addition, we have agreed to guarantee the difference between the amounts held in each trust fund (including earnings) and the estimated closure and long-term care costs. Our actual Gypstack Closure Costs are generally expected to be paid by us in the normal course of our Phosphates business over a period that may not end until three decades or more after a Gypstack has been closed.

In light of the amount of restricted cash referenced above, together with our operating cash flows, liquidity and capital resources, we believe that we have sufficient liquidity and capital resources to be able to fund the capital expenditures, financial assurance requirements and civil penalties provided for in the 2015 Consent Decrees.

As part of the CF Phosphate Assets Acquisition, we assumed certain ARO related to Gypstack Closure Costs at both the Plant City Facility and a closed Florida phosphate concentrates facility in Bartow, Florida (the "Bonnie Facility") that we acquired. Associated with these assets are two related financial assurance arrangements for which we became responsible and that hold in trust the estimated Gypstack Closure Costs for these facilities, pursuant to federal or state law, which the government can draw against in the event we cannot perform such closure activities. One is a trust (the "Plant City Trust") established to meet the requirements under a consent decree with EPA and the FDEP with respect to RCRA compliance at Plant City that also satisfies Florida financial assurance requirements at that site. The other is a trust fund (the "Bonnie Facility Trust") established to meet the requirements under Florida financial assurance regulations (the "Florida Financial Assurance Requirement") that apply to the Bonnie Facility. In the CF Phosphate Assets Acquisition, we deposited \$189.2 million into the Plant City Trust as a substitute for funds that CF had deposited into trust. Based on our updated closure cost estimates, an additional \$7 million was added to the Plant City Trust in the fourth quarter of 2014 and an additional \$1.7 million was deposited in the third quarter of 2015 to correspond to that site's then estimated Gypstack Closure Costs. In addition, in July 2014, the FDEP approved our funding of \$14.5 million into the Bonnie Facility Trust, which substituted funds that CF had deposited into an escrow account. We deposited an additional \$3 million in the Bonnie Facility Trust in the second quarter of 2015. Both financial assurance funding obligations require estimates of future expenditures that could be impacted by refinements in scope, technological developments, new information, cost inflation, changes in regulations, discount rates and the timing of activities. Under our current approach to satisfying applicable requirements, additional financial assurance would be required in the future if increases in cost estimates exceed the amounts held in the Plant City Trust or the Bonnie Facility Trust. We are also permitted to satisfy our financial assurance obligations with respect to the Bonnie and Plant City Facilities by means of alternative credit support, including surety bonds or letters of credit.

At June 30, 2016, the aggregate amount of AROs associated with the Plant City Facility and the Bonnie Facility included in our consolidated balance sheet was \$92.0 million. The aggregate amount held in the Plant City Trust and the Bonnie Facility Trust exceeds the aggregate amount of AROs associated with the Plant City Facility and the Bonnie Facility because the amount required to be held in the Plant City Trust represents the aggregate undiscounted estimated amount to be paid by us in the normal course of our Phosphates business over a period that may not end until three decades or more after the Gypstack has been closed, while the AROs included in our Consolidated Balance Sheet reflect the discounted present value of those estimated amounts. As part of the acquisition, we also assumed ARO related to land reclamation.

EPA EPCRA Initiative. In July 2008, DOJ sent a letter to major U.S. phosphoric acid manufacturers, including us, stating that EPA's ongoing investigation indicates apparent violations of Section 313 of the Emergency Planning and Community Right-to-Know Act ("EPCRA") at their phosphoric acid manufacturing facilities. Section 313 of EPCRA requires annual reports to be submitted with respect to the use or presence of certain toxic chemicals. DOJ and EPA also stated that they believe that a number of these facilities have violated Section 304 of EPCRA and Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") by failing to provide

required notifications relating to the release of hydrogen fluoride from the facilities. The letter did not identify any specific violations by us or assert a demand for penalties against us. We cannot predict at this time whether EPA and DOJ will initiate an enforcement action over this matter, what its scope would be, or what the range of outcomes of such a potential enforcement action might be.

Florida Sulfuric Acid Plants. On April 8, 2010, EPA Region 4 submitted an administrative subpoena to us under Section 114 of the Federal Clean Air Act (the "CAA") regarding compliance of our Florida sulfuric acid plants with the "New Source Review" requirements of the CAA. The request received by Mosaic appears to be part of a broader EPA

Table of Contents

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

national enforcement initiative focusing on sulfuric acid plants. On June 16, 2010, EPA issued an NOV to CF (the “CF NOV”) with respect to "New Source Review" compliance at the Plant City Facility's sulfuric acid plants and the allegations in that NOV were not resolved before our 2014 acquisition of the Plant City Facility. CF has agreed to indemnify us with respect to any penalty EPA may assess as a result of the allegations in that NOV. We are negotiating the terms of a settlement with EPA that would resolve both the violations alleged in the CF NOV, and violations which EPA may contend, but have not asserted, exist at the sulfuric acid plants at our other facilities in Florida. Based on the current status of the negotiations, we expect that our commitments will include an agreement to reduce our sulfur dioxide emissions over the next five years to comply with a sulfur dioxide ambient air quality standard enacted by EPA in 2010. In the event we are unable to finalize agreement on the terms of the settlement, we cannot predict at this time whether EPA and DOJ will initiate an enforcement action with respect to “New Source Review” compliance at our Florida sulfuric acid plants other than the Plant City Facility or what its scope would be, or what the range of outcomes might be with respect to such a potential enforcement action or with respect to the CF NOV.

Other Environmental Matters. Superfund and equivalent state statutes impose liability without regard to fault or to the legality of a party’s conduct on certain categories of persons who are considered to have contributed to the release of “hazardous substances” into the environment. Under Superfund, or its various state analogues, one party may, under certain circumstances, be required to bear more than its proportionate share of cleanup costs at a site where it has liability if payments cannot be obtained from other responsible parties. Currently, certain of our subsidiaries are involved or concluding involvement at several Superfund or equivalent state sites. Our remedial liability from these sites, alone or in the aggregate, currently is not expected to have a material effect on our business or financial condition. As more information is obtained regarding these sites and the potentially responsible parties involved, this expectation could change.

We believe that, pursuant to several indemnification agreements, our subsidiaries are entitled to at least partial, and in many instances complete, indemnification for the costs that may be expended by us or our subsidiaries to remedy environmental issues at certain facilities. These agreements address issues that resulted from activities occurring prior to our acquisition of facilities or businesses from parties including, but not limited to, ARCO (BP); Beatrice Fund for Environmental Liabilities; Conoco; Conserv; Estech, Inc.; Kaiser Aluminum & Chemical Corporation; Kerr-McGee Inc.; PPG Industries, Inc.; The Williams Companies; CF; and certain other private parties. Our subsidiaries have already received and anticipate receiving amounts pursuant to the indemnification agreements for certain of their expenses incurred to date as well as future anticipated expenditures. We record potential indemnifications as an offset to the established accruals when they are realizable or realized.

#### MicroEssentials® Patent Lawsuit

On January 9, 2009, John Sanders and Specialty Fertilizer Products, LLC filed a complaint against Mosaic, Mosaic Fertilizer, LLC, Cargill, Incorporated and Cargill Fertilizer, Inc. in the United States District Court for the Western District of Missouri (the "Missouri District Court"). The complaint alleges that our production of MicroEssentials® SZ, one of several types of the MicroEssentials® value-added ammoniated phosphate crop nutrient products that we produce, infringes on a patent held by the plaintiffs since 2001 and which would expire in 2018. Plaintiffs have since asserted that other MicroEssentials® products also infringe the patent. Plaintiffs seek to enjoin the alleged infringement and to recover an unspecified amount of damages and attorneys’ fees for past infringement. Our answer to the complaint responds that the plaintiffs’ patent is not infringed, is invalid and is unenforceable because the plaintiffs engaged in inequitable conduct during the prosecution of the patent.

Through an order entered by the court on September 25, 2014, Cargill was dismissed as a defendant, and the two original plaintiffs were replaced by a single plaintiff, JLSMN LLC, an entity to whom the patents were transferred.

The Missouri District Court stayed the lawsuit pending an ex parte reexamination of plaintiff's current patent claims by the U.S. Patent and Trademark Office (the "PTO"). That ex parte reexamination has now ended. On September 12, 2012, however, Shell Oil Company ("Shell") filed an additional reexamination request which in part asserted that the claims as amended and added in connection with the ex parte reexamination are unpatentable. On October 4, 2012, the PTO issued an Ex Parte Reexamination Certificate in which certain claims of the plaintiff's patent were cancelled, disclaimed and amended, and new claims were added. Following the PTO's grant of Shell's request for an inter parties reexamination, on December 11, 2012, the PTO issued an initial rejection of all of plaintiff's remaining patent claims. On September 12, 2013, the PTO reversed its initial rejection of the plaintiff's remaining patent claims and allowed them to stand. Shell appealed

Table of Contents

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

the PTO's decision, and on June 7, 2016, the Patent Trial and Appeal Board, the highest appellate authority within the PTO, issued a final decision holding that all claims initially allowed to the plaintiff by the PTO examiner should instead have been found invalid. Although appeal to the United States Court of Appeals for the Federal Circuit remains available to the plaintiff, the PTO decision, if sustained, would result in no remaining claims against us. Although no Federal Circuit appeal has yet been filed, such an appeal may occur, resulting in further delays. The stay in the Missouri District Court litigation is expected to remain in place during further PTO and any appellate proceedings.

We believe that the plaintiff's allegations are without merit and intend to defend vigorously against them. At this stage of the proceedings, we cannot predict the outcome of this litigation, estimate the potential amount or range of loss or determine whether it will have a material effect on our results of operations, liquidity or capital resources.

#### Brazil Tax Contingencies

Our Brazilian subsidiary is engaged in a number of judicial and administrative proceedings relating to various non-income tax matters. We estimate that our maximum potential liability with respect to these matters is approximately \$95 million. Approximately \$65 million of the maximum potential liability relates to a Brazilian federal value added tax, PIS and Cofins, tax credit cases for the period from 2004 to 2011; while the majority of the remaining amount relates to various other non-income tax cases such as value-added taxes. Based on Brazil legislation and the current status of similar tax cases involving unrelated taxpayers, we believe we have recorded adequate accruals, which are immaterial, for the probable liability with respect to these Brazilian judicial and administrative proceedings.

#### Other Claims

We also have certain other contingent liabilities with respect to judicial, administrative and arbitration proceedings and claims of third parties, including tax matters, arising in the ordinary course of business. We do not believe that any of these contingent liabilities will have a material adverse impact on our business or financial condition, results of operations, and cash flows.

#### 10. Accounting for Derivative Instruments and Hedging Activities

We periodically enter into derivatives to mitigate our exposure to foreign currency risks and the effects of changing commodity prices. We record all derivatives on the Condensed Consolidated Balance Sheets at fair value. The fair value of these instruments is determined by using quoted market prices, third party comparables, or internal estimates. We net our derivative asset and liability positions when we have a master netting arrangement in place. Changes in the fair value of the foreign currency and commodity derivatives are immediately recognized in earnings because we do not apply hedge accounting treatment to these instruments. As of June 30, 2016 and December 31, 2015, the gross asset position of our derivative instruments was \$35.6 million and \$6.8 million, respectively, and the gross liability position of our liability instruments was \$18.0 million and \$79.3 million, respectively.

Unrealized gains and (losses) on foreign currency exchange contracts used to hedge cash flows related to the production of our products are included in cost of goods sold in the Condensed Consolidated Statements of Earnings. Unrealized gains and (losses) on commodities contracts are also recorded in cost of goods sold in the Condensed Consolidated Statements of Earnings. Unrealized gains or (losses) on foreign currency exchange contracts used to hedge cash flows that are not related to the production of our products are included in the foreign currency transaction gain/(loss) caption in the Condensed Consolidated Statements of Earnings.

As of June 30, 2016 and December 31, 2015, the following is the total absolute notional volume associated with our outstanding derivative instruments:

(in millions of Units)			June 30, December 31,	
Derivative Instrument	Derivative Category	Unit of Measure	2016	2015
Foreign currency derivatives	Foreign currency	US Dollars	901.6	1,230.6

Edgar Filing: MOSAIC CO - Form 10-Q

Interest rate derivatives	Interest rate	US Dollars	—	175.0
Natural gas derivatives	Commodity	MMbtu	18.9	32.4

15

---

Table of Contents

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

Credit-Risk-Related Contingent Features

Certain of our derivative instruments contain provisions that are governed by International Swap and Derivatives Association agreements with the counterparties. These agreements contain provisions that allow us to settle for the net amount between payments and receipts, and also state that if our debt were to be rated below investment grade, certain counterparties could request full collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position as of June 30, 2016 and December 31, 2015, was \$5.6 million and \$53.4 million, respectively. We have no cash collateral posted in association with these contracts. If the credit-risk-related contingent features underlying these agreements were triggered on June 30, 2016, we would have been required to post \$4.3 million of collateral assets, which are either cash or U.S. Treasury instruments, to the counterparties.

Counterparty Credit Risk

We enter into foreign exchange and certain commodity and interest rate derivatives, primarily with a diversified group of highly rated counterparties. We continually monitor our positions and the credit ratings of the counterparties involved and limit the amount of credit exposure to any one party. While we may be exposed to potential losses due to the credit risk of non-performance by these counterparties, material losses are not anticipated. We closely monitor the credit risk associated with our counterparties and customers and to date have not experienced material losses.

11. Fair Value Measurements

Following is a summary of the valuation techniques for assets and liabilities recorded in our Consolidated Balance Sheets at fair value on a recurring basis:

**Foreign Currency Derivatives-**The foreign currency derivative instruments that we currently use are forward contracts and zero-cost collars, which typically expire within eighteen months. Most of the valuations are adjusted by a forward yield curve or interest rates. In such cases, these derivative contracts are classified within Level 2. Some valuations are based on exchange-quoted prices, which are classified as Level 1. Changes in the fair market values of these contracts are recognized in the Condensed Consolidated Financial Statements as a component of cost of goods sold in our Corporate, Eliminations and Other segment, or foreign currency transaction (gain) loss. As of June 30, 2016 and December 31, 2015, the gross asset position of our foreign currency derivative instruments was \$33.3 million and \$5.7 million, respectively, and the gross liability position of our foreign currency derivative instruments was \$11.5 million and \$59.6 million, respectively.

**Commodity Derivatives-**The commodity contracts primarily relate to natural gas. The commodity derivative instruments that we currently use are forward purchase contracts, swaps, and three-way collars. The natural gas contracts settle using NYMEX futures or AECO price indexes, which represent fair value at any given time. The contracts' maturities and settlements are scheduled for future months and settlements are scheduled to coincide with anticipated gas purchases during those future periods. Quoted market prices from NYMEX and AECO are used to determine the fair value of these instruments. These market prices are adjusted by a forward yield curve and are classified within Level 2. Changes in the fair market values of these contracts are recognized in the Condensed Consolidated Financial Statements as a component of cost of goods sold in our Corporate, Eliminations and Other segment. As of June 30, 2016 and December 31, 2015, the gross asset position of our commodity derivative instruments was \$2.3 million and \$1.0 million, respectively, and the gross liability position of our commodity instruments was \$5.0 million and \$16.7 million, respectively.

Table of Contents

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

## Financial Instruments

The carrying amounts and estimated fair values of our financial instruments are as follows:

	June 30, 2016		December 31, 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	\$ 1,059.3	\$ 1,059.3	\$ 1,276.3	\$ 1,276.3
Receivables, net	399.6	399.6	675.0	675.0
Accounts payable	622.6	622.6	520.6	520.6
Structured accounts payable arrangements	195.5	195.5	481.7	481.7
Short-term debt	54.0	54.0	25.5	25.5
Long-term debt, including current portion	3,814.9	4,107.6	3,811.2	3,860.4

For cash and cash equivalents, receivables, net, accounts payable, structured accounts payable arrangements, and short-term debt, the carrying amount approximates fair value because of the short-term maturity of those instruments. The fair value of long-term debt, including the current portion, is estimated using quoted market prices for the publicly registered notes and debentures, classified as Level 1 and Level 2, respectively, within the fair value hierarchy, depending on the market liquidity of the debt.

## 12. Share Repurchases

In February of 2014, our Board of Directors authorized a \$1 billion share repurchase program ("2014 Repurchase Program"), allowing the Company to repurchase Class A Shares or shares of our Common Stock ("Common Stock"), through direct buybacks or in open market transactions. During the six months ended June 30, 2015, under the 2014 Repurchase Program, 2,560,277 shares of Common Stock were repurchased in the open market for an aggregate of approximately \$123.3 million. In total, 18,339,060 shares of stock were repurchased under the 2014 Repurchase program for an aggregate total of \$850.6 million. The remaining authorized amount of \$149.4 million was terminated in connection with the authorization of the 2015 Repurchase Program discussed below.

On May 14, 2015, our Board of Directors authorized a new \$1.5 billion share repurchase program ("2015 Repurchase Program"), with no set expiration date, allowing the Company to repurchase shares of our Common Stock, through open market purchases, accelerated share repurchase arrangements, privately negotiated transactions or otherwise. During 2015, we repurchased 1,891,620 shares of Common Stock in the open market under the 2015 Repurchase Program for approximately \$74.9 million.

In May 2015 and February 2016, under the 2015 Repurchase Program, we entered into separate accelerated share repurchase transactions ("ASRs") with financial institutions to repurchase shares of our Common Stock for up-front payments of \$500 million and \$75 million, respectively. For each ASR, the total number of shares ultimately delivered, and therefore the average price paid per share, were determined at the end of the ASR's purchase period based on the volume-weighted average price of our Common Stock during that period, less an agreed discount. The shares received were retired in the period they were delivered, and each up-front payment is accounted for as a reduction to shareholders' equity in our Condensed Consolidated Balance Sheet in the period the payment was made. Neither ASR was dilutive to our earnings per share calculation from its execution date through its settlement date. The unsettled portion of each ASR during that period met the criteria to be accounted for as a forward contract indexed to our Common Stock and qualified as an equity transaction. Additional information relating to each ASR is shown below:

	Settlement Date	Shares Delivered	Average Price Per Share	ASR Amount
May 2015 ASR	July 28, 2015	11,106,847	\$45.02	

				\$500.0 million
February 2016 ASR	March 29, 2016	2,766,558	\$27.11	\$75.0 million

 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

As of June 30, 2016, 15,765,025 shares of Common Stock have been repurchased under the 2015 Repurchase Program for an aggregate total of approximately \$650 million, bringing the remaining amount that could be repurchased under this program to \$850 million.

The extent to which we repurchase our shares and the timing of any such repurchases depend on a number of factors, including market and business conditions, the price of our shares, and corporate, regulatory and other considerations.

#### 13. Related Party Transactions

We enter into transactions and agreements with certain of our non-consolidated companies from time to time. As of June 30, 2016 and December 31, 2015, the net amount due to our non-consolidated companies totaled \$118.5 million and \$26.4 million, respectively.

The Condensed Consolidated Statements of Earnings included the following transactions with our non-consolidated companies:

	Three months ended June 30, 2016		Six months ended June 30, 2015	
Transactions with non-consolidated companies included in net sales	\$141.2	\$358.2	\$288.4	\$622.1
Transactions with non-consolidated companies included in cost of goods sold	208.6	368.2	327.5	480.9

#### 14. Business Segments

The reportable segments are determined by management based upon factors such as products and services, production processes, technologies, market dynamics, and for which segment financial information is available for our chief operating decision maker.

For a description of our business segments see Note 1 to the Condensed Consolidated Financial Statements in this report. We evaluate performance based on the operating earnings of the respective business segments, which includes certain allocations of corporate selling, general and administrative expenses. The segment results may not represent the actual results that would be expected if they were independent, stand-alone businesses. Intersegment eliminations, including profit on intersegment sales, mark-to-market gains/losses on derivatives, debt expenses and our legacy Argentina and Chile results are included within Corporate, Eliminations and Other.

THE MOSAIC COMPANY  
 NOTES TO CONDENSED CONSOLIDATED  
 FINANCIAL STATEMENTS - (Continued)

Certain intercompany sales within the Phosphates segment are recognized as revenue before the final price is determined. During the three and six months ended June 30, 2015 these transactions had the effect of increasing (a) Phosphate segment revenues and gross margin by \$75.0 million and \$21.4 million, respectively. There were no intersegment sales of this type outstanding at June 30, 2016. Revenues and cost of goods sold on these Phosphates sales are eliminated in the "Corporate and Other" category similar to all other intercompany transactions.

## 15. Guarantee

## Guarantee of Payments

Mosaic has entered into an agreement (as amended to date, the "Bridge Loan") to provide bridge funding to Gulf Marine Solutions, LLC ("GMS") to finance the purchase and construction of two articulated tug and barge units (the "ATBs") intended to transport anhydrous ammonia, primarily for Mosaic's operations. In May 2015, the parties agreed to increase the Bridge Loan from \$75 million to \$185 million. GMS is a wholly owned subsidiary of Gulf Sulphur Services Ltd., LLLP ("Gulf Sulphur Services"), an entity in which Mosaic owns a 50% equity interest and which is operated by Mosaic's joint venture partner. Mosaic's joint venture partner is arranging for construction of the ATBs, utilizing funds borrowed from GMS, and will enter into a long-term transportation contract with a subsidiary of Mosaic to transport anhydrous ammonia. During the quarter ended June 30, 2016, at Mosaic's instruction, Mosaic's joint venture partner notified the barge builder of its election under the construction contract to cancel construction of the second barge unit, resulting in a charge of \$47 million during the quarter ended June 30, 2016, which is included in other operating expense. Construction of the first barge unit and the two tugs will continue as planned. At June 30, 2016, \$97.0 million was outstanding under the Bridge Loan, and GMS had received additional loans from Gulf Sulphur Services in the aggregate amount of \$51.8 million for the ATB project, which are included in long-term debt in our Condensed Consolidated Balance Sheets. These loans obtained by GMS were in turn lent to Mosaic's joint venture partner for use in constructing the ATBs. The parties are seeking third-party financing for the ATB project, with proceeds to be utilized to repay outstanding Bridge Loans and loans from Gulf Sulphur Services. In connection with the ATB project, Mosaic has also agreed to guarantee up to \$100 million of payment obligations to the barge builder. The guarantee will remain in effect until final payment under the construction agreement.

Beginning in the quarter ended December 31, 2015, we determined we are the primary beneficiary of GMS, a variable interest entity, and have consolidated its balance sheet and statement of earnings within our consolidated financial statements in our Phosphates segment.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the material under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Annual Report on Form 10-K of The Mosaic Company filed with the Securities and Exchange Commission for the year ended December 31, 2015 (the "10-K Report") and the material under Item 1 of Part I of this report.

Throughout the discussion below, we measure units of production, sales and raw materials in metric tonnes, which are the equivalent of 2,205 pounds, unless we specifically state we mean long ton(s), which are the equivalent of 2,240 pounds. In the following tables, there are certain percentages that are not considered to be meaningful and are represented by "NM".

## Results of Operations

The following table shows the results of operations for the three and six months ended June 30, 2016 and 2015:

	Three months ended				Six months ended

## Overview of Consolidated Results for the three months ended June 30, 2016 and 2015

Net sales decreased to \$1.7 billion for the three months ended June 30, 2016, compared to \$2.5 billion in the prior year period. Net loss attributable to Mosaic for the three months ended June 30, 2016 was \$(10.2) million, or \$(0.03) per diluted share, compared to net earnings of \$390.6 million, or \$1.08 per diluted share, for the year ago period.

Reflected in current period results are the impacts of actions we have taken to lower spending on capital projects and reduce expenses, including a loss on the write-off of construction in process of approximately \$47 million, or \$(0.12) per diluted share, the write-off of a capital project at one of our equity investments, of which our share was approximately \$24 million, or \$16 million after tax and \$(0.05) per diluted share, and restructuring expenses of \$11 million, or \$(0.03) per diluted share.

Significant factors affecting our results of operations and financial condition are listed below. Certain of these factors are discussed in more detail in the following sections of this Management's Discussion and Analysis of Financial Condition and Results of Operations.

In addition to the items noted above, our net sales and operating results for the three months ended June 30, 2016 were negatively impacted by a significant decline in phosphates average selling prices and a decrease in sales volumes compared to the same period in the prior year. Phosphates average selling prices in the current year period were unfavorably impacted by cautious purchasing behavior as North American customers signaled an unwillingness to carry inventory following the spring season, and increased competitors' shipments into North America and Brazil. Current period selling prices were also influenced by lower raw material prices in the current year period. In addition, sales volumes were negatively impacted by the cautious purchasing behavior in North America and lower exports to third parties as we chose not to match aggressive pricing by other global producers.

Net sales and operating results were also unfavorably impacted by significantly lower potash average selling prices and sales volumes in the current year period compared to the same period in the prior year. In 2016, potash average selling prices have been negatively impacted by lower prices primarily the result of a strong U.S. dollar, which has impacted the global competitive environment. Delays in settlement of the Chinese potash contract have also added pressure on potash selling prices. Despite strong demand for potash in North America and Brazil in the quarter ended June 30, 2016, overall potash sales volumes decreased compared to the prior year period due to the delay in settlement of the China contract, which impacted the timing of sales to major contract markets.

We continued to see additional declines in potash and phosphate average selling prices in the third quarter of 2016.

**Other Highlights**

During the three months ended June 30, 2016:

• We continued to execute against our cost saving initiatives in ways that are positively impacting financial results. We are on track to meet the goal we set three years ago to achieve \$500 million in cost savings by the end of 2018. We are targeting an additional \$75 million in savings in our support functions and expect to realize most of these savings in 2017.

We are managing our capital through reducing or eliminating certain capital spending as noted above.

Subsequent to quarter-end, on July 13, 2016, we announced that we will idle our Colonsay, Saskatchewan potash mine for the remainder of 2016 in light of reduced customer demand while adapting to challenging potash market conditions. Our lower-cost Esterhazy and Belle Plaine mines, in combination with current inventory, will allow us to meet our short-term potash supply needs.

We made an equity contribution of \$100 million to the Ma'aden Wa'ad Al Shamal Joint Venture. We estimate the cost to develop and construct the integrated phosphate production facilities to be approximately \$8 billion. We and our joint venture partners expect the remaining amount to be funded through external debt facilities and investments by the joint venture members.

• Our Esterhazy K3 mine development remained on track to start producing ore in 2017.

• We recorded a foreign currency transaction gain of \$14.7 million, or \$0.04 per diluted share, compared with a loss of \$16.0 million, or \$(0.04) per diluted share, in the prior year period.

Table of Contents

We recorded unrealized mark-to-market gains on derivatives of \$29.8 million, or \$0.08 per diluted share, compared with gains of \$27.2 million, or \$0.06 per diluted share, in the same period a year ago.

Subsequent to the quarter end we made an equity contribution of \$120 million to the Ma'aden Wa'ad Al Shamal Joint Venture.

During the three months ended June 30, 2015:

Our Board of Directors approved, on May 14, 2015, a new share repurchase authorization in the amount of \$1.5 billion, allowing Mosaic to repurchase shares of our Common Stock, through open market purchases, accelerated share repurchase arrangements, privately negotiated transactions or otherwise (the "2015 Repurchase Program"). The 2015 Repurchase Program has no set expiration date. In connection with the authorization of the 2015 Repurchase Program, the remaining amount of \$149.4 million under our \$1 billion share repurchase program authorized in February 2014 (the "2014 Repurchase Program") was terminated.

As an initial repurchase under the 2015 Repurchase Program, in May 2015 we entered into an accelerated share repurchase transaction ("ASR") to repurchase shares of our Common Stock for a payment of \$500 million. In connection with the ASR, we received an initial delivery of 8,333,333 shares of Common Stock. These shares were accounted for as a reduction to shareholders' equity in our Condensed Consolidated Balance Sheet and are reflected in our EPS calculation for the three and six months ended June 30, 2015. We received an additional 2,773,514 shares upon closing of the transaction on July 28, 2015, bringing the total shares received under this program to 11,106,847 shares. The final average price per share was \$45.02.

Overview of Consolidated Results for the six months ended June 30, 2016 and 2015

Net earnings attributable to Mosaic for the six months ended June 30, 2016 were \$246.7 million, or \$0.70 per diluted share, compared to \$685.4 million, or \$1.88 per diluted share, for the same period a year ago. Net earnings for the six months ended June 30, 2016, included the items discussed above and discrete income tax benefits of \$59 million, or \$0.17 per diluted share. Included in net earnings for the six months ended June 30, 2015 are discrete income tax benefits of \$38 million, or \$0.10 per diluted share.

Results for the six months ended June 30, 2016 and 2015 reflected the factors discussed above for the three months ended June 30, 2016 and 2015, in addition to those noted below. Certain of these factors are discussed in more detail in the following sections of this Management's Discussion and Analysis of Financial Condition and Results of Operations.

Lower phosphates average selling prices and sales volumes, partially offset by lower raw material costs, negatively impacted operating earnings for the six months ended June 30, 2016, compared to the same period in the prior year. Selling prices were impacted by cautious purchasing behavior and lower raw material costs as discussed above and increased pricing pressure from other global producers. Sales volumes were impacted by cautious behavior as discussed above.

Operating earnings for the six months ended June 30, 2016, were also unfavorably impacted by lower potash selling prices and sales volumes, when compared to the same period in the prior year. Lower potash average selling prices were driven by the reasons mentioned above in the three-month period discussion as well as increased supply from other North American producers in the first quarter of 2016. Potash sales volumes decreased in the current year compared to the same period of the prior year due to a decline in international sales volumes primarily due to the delay in settling the China contract as discussed above. This was partially offset by strong demand in North America driven by a strong spring application season.

Other noteworthy matters during the six months ended June 30, 2016 included:

We entered into an accelerated share repurchase transaction in February 2016 (the "2016 ASR") to repurchase shares of our Common Stock for a payment of \$75 million under the 2015 Repurchase Program. The 2016 ASR was settled on March 29, 2016 and we received a total of 2,766,558 shares of Common Stock. The final average price per share was \$27.11.

We received insurance proceeds of \$28 million related to the collapse of a warehouse roof at our Carlsbad, New Mexico location in 2014, which are included in other operating income.

We recorded a foreign currency transaction gain of \$102.6 million, or \$0.26 per diluted share, compared with a gain of \$29.1 million, or \$0.06 per diluted share, in the prior year period.

Table of Contents

We recorded unrealized mark-to-market gains on derivatives of \$82.6 million, or \$0.21 per diluted share, compared with a loss of \$11.2 million, or \$(0.02) per diluted share, in the same period a year ago.

During the six months ended June 30, 2015:

- Our Board of Directors approved an increase in our annual dividend to \$1.10 from \$1.00 per share, which was effective in May 2015.

During the first six months of 2015, we completed the integration of our December 2014 purchase of Archer Daniels Midland Company's ("ADM") fertilizer distribution business and working capital in Brazil and Paraguay (the "ADM Acquisition").

(a) Excludes MicroEssentials®.

(b) Includes sales volumes to our International Distribution segment.

Three months ended June 30, 2016 and 2015

The Phosphates segment's net sales decreased to \$1.0 billion for the three months ended June 30, 2016, compared to \$1.4 billion for the three months ended June 30, 2015. Lower average selling prices and sales volumes in the current year period resulted in decreased net sales of approximately \$240 million and \$170 million, respectively.

Our average diammonium phosphate ("DAP") selling price was \$343 per tonne for the three months ended June 30, 2016, a decrease of 24% from the same period a year ago, due to the factors discussed in the Overview.

The Phosphates segment's sales volumes declined to 2.4 million tonnes for the three months ended June 30, 2016, compared to 2.8 million tonnes for the same period in the prior year, due to the factors discussed in the Overview.

These sales volume declines were partially offset by an increase in sales volumes to our International Distribution business, primarily in Brazil.

Gross margin for the Phosphates segment decreased to \$100.4 million for the three months ended June 30, 2016, from \$295.9 million for the three months ended June 30, 2015. Lower average selling prices and sales volumes negatively

Table of Contents

impacted gross margin by approximately \$240 million and \$40 million, respectively. These were partially offset by the benefit of lower raw material costs of approximately \$80 million, as further discussed below. As a result of these factors, gross margin as a percentage of net sales was 10% for the three months ended June 30, 2016, compared to 21% for the same period in the prior year.

The average consumed price for ammonia for our North American operations decreased to \$320 per tonne for the three months ended June 30, 2016, from \$417 in the same period a year ago. The average consumed sulfur price for our North American operations decreased to \$112 per long ton for the three months ended June 30, 2016, from \$161 in the same period a year ago. The purchase prices of these raw materials are driven by global supply and demand. The consumed ammonia and sulfur prices also include transportation, transformation, and storage costs. The average consumed cost of purchased and produced phosphate rock increased to \$65 per tonne for the three months ended June 30, 2016 compared to \$61 per tonne for the three months ended June 30, 2015 due to rock production as discussed below. The percentage of phosphate rock purchased from the Miski Mayo Mine consumed in our North American operations was 8% for the three months ended June 30, 2016, compared to 7% for the prior year period. The Phosphates segment's production of crop nutrient dry concentrates and animal feed ingredients decreased slightly to 2.4 million tonnes for the three months ended June 30, 2016, from 2.5 million tonnes in the prior year period. Our operating rate for processed phosphate production decreased to 82% for the quarter ended June 30, 2016, compared to 86% in the same period of the prior year.

Our North American phosphate rock production was 3.3 million tonnes for the three months ended June 30, 2016 compared with 3.8 million tonnes during the same period a year ago. The decrease from the prior year period is primarily due to moving into areas of lower rock grade at one of our mines. We generally manage our rock production consistent with our long term mine plans.

Six months ended June 30, 2016 and 2015

The Phosphates segment's net sales were \$1.9 billion for the six months ended June 30, 2016 compared to \$2.6 billion for the six months ended June 30, 2015. Lower average selling prices and sales volumes had unfavorable impacts on net sales of approximately \$460 million and \$210 million, respectively, for the current year period when compared to the prior year period.

Our average DAP selling price was \$349 per tonne for the six months ended June 30, 2016, a decrease of \$105 per tonne from the same period a year ago, due to the factors discussed in the Overview.

The Phosphates segment's sales volumes of 4.7 million tonnes for the six months ended June 30, 2016 decreased by 0.4 million tonnes over the same period a year ago, due to the reasons noted above in the three-month discussion.

Gross margin for the Phosphates segment decreased to \$165 million for the six months ended June 30, 2016, from \$517.6 million in the six months ended June 30, 2015. Lower average selling prices and sales volumes resulted in a decrease to gross margin of approximately \$460 million and \$45 million, respectively. This was partially offset by lower raw material costs of approximately \$160 million. The decrease in raw material costs was primarily related to lower overall commodity prices. As a result of these factors, gross margin as a percentage of net sales decreased to 9% for the six months ended June 30, 2016, from 20% for the six months ended June 30, 2015.

The average consumed price for ammonia for our North American operations was \$343 per tonne for the six months ended June 30, 2016, compared to \$463 in the same period a year ago. The average consumed price for sulfur for our North American operations decreased to \$121 per long ton for the six months ended June 30, 2016, from \$154 in the same period a year ago. The purchase prices of these raw materials are driven by global supply and demand. The average consumed cost of purchased and produced phosphate rock increased to \$62 per tonne for the six months ended June 30, 2016, from \$61 per tonne for the same period in the prior year. The percentage of phosphate rock purchased from the Miski Mayo Mine consumed in our North American operations was comparable, at 8%, for the six months ended June 30, 2016 and 2015.

Phosphates production of crop nutrient dry concentrates and animal feed ingredients decreased to 4.6 million tonnes for the six months ended June 30, 2016, from 4.8 million tonnes for the same period of the prior year due to our previously announced curtailment in the first quarter of 2016.

Our North American phosphate rock production decreased to 6.8 million tonnes for the six months ended June 30, 2016 compared to 7.1 million for the six months ended June 30, 2015 due to the factor noted above in the three-month discussion.

Table of Contents

## Potash Net Sales and Gross Margin

The following table summarizes the Potash segment's net sales, gross margin, sales volume and selling price:

	Three months ended				Six months ended			
	June 30,		2016-2015		June 30,		2016-2015	
(in millions, except price per tonne or unit)	2016	2015	Change	Percent	2016	2015	Change	Percent
Net sales:

<sup>(a)</sup> Gross margin (excluding CRT), a non-GAAP measure, is calculated as GAAP gross margin less Canadian resource taxes ("CRT"). Gross margin (excluding CRT) as a percentage of net sales is calculated as GAAP gross margin less CRT, divided by net sales. Gross margin (excluding CRT) and gross margin (excluding CRT) as a percentage of net sales provide measures that we believe enhance the reader's ability to compare our GAAP gross margin with that of other companies that incur CRT expense and classify it in a manner differently than we do in their statements of earnings. Because securities analysts, investors, lenders and others use gross margin, our management believes that our presentation of gross margin (excluding CRT) and gross margin (excluding CRT) as a percentage of sales for our Potash segment affords them greater transparency in assessing our financial performance against competitors' gross margin (excluding CRT). A reconciliation of the GAAP and non-GAAP measures is found on page 33.

<sup>(b)</sup> Includes sales volumes to our International Distribution segment.

<sup>(c)</sup> This price excludes industrial and feed selling prices which are typically at a lag due to the nature of the contracts.

<sup>(d)</sup> This price includes industrial and feed sales.

Table of Contents

## Three months ended June 30, 2016 and 2015

The Potash segment's net sales decreased to \$456.9 million for the three months ended June 30, 2016, compared to \$730.2 million in the same period a year ago. The decrease was due to lower average selling prices and lower sales volumes that resulted in unfavorable impacts of approximately \$250 million and \$20 million, respectively.

Our average MOP selling price was \$178 per tonne for the three months ended June 30, 2016, a decrease of \$102 per tonne compared to the same period a year ago due to the factors discussed in the Overview. Average selling prices were also impacted by an increase in sales volumes in North America which suffered larger price declines in the current year period compared to the prior year.

The Potash segment's sales volumes decreased to 2.0 million tonnes for the three months ended June 30, 2016, compared to 2.3 million in the same period a year ago, due to the factor discussed in the Overview.

Gross margin for the Potash segment decreased to \$53.0 million for the three months ended June 30, 2016, from \$295.0 million in the same period of the prior year. Gross margin was negatively impacted by approximately \$250 million due to lower average selling prices. Gross margin was also unfavorably impacted by lower fixed cost absorption due to lower production as described below, offset by favorable foreign exchange rates and the benefit of cost savings initiatives. Other factors affecting gross margin and costs are further discussed below. As a result of these factors, gross margin as a percentage of net sales decreased to 12% for the three months ended June 30, 2016, compared to 40% for the same period a year ago.

We incurred \$38.1 million in Canadian resource taxes for the three months ended June 30, 2016, compared with \$54.9 million in the same period a year ago. These taxes decreased due to lower profitability in the current year, partially offset by a catch up accrual of \$10 million. Royalty expense decreased to \$4.9 million for the three months ended June 30, 2016, compared to \$9.0 million for the three months ended June 30, 2015 due to lower selling prices and lower production.

We incurred \$42.3 million in expenses, including depreciation on brine assets, at our Esterhazy mine during the three months ended June 30, 2016, compared to \$45.0 million for the three months ended June 30, 2015. We have been effectively managing the brine inflows at Esterhazy since 1985, and from time to time we experience changes to the amounts and patterns of brine inflows. Inflows continue to be within the range of our historical experience. Brine inflow expenditures continue to reflect the cost of addressing changing inflow patterns, including inflows from below our mine workings, which can be more complex and costly to manage, as well as costs associated with horizontal drilling. The mine has significant brine storage capacity. Depending on inflow rates, pumping and disposal rates, and other variables, the volume of brine stored in the mine may change significantly from period to period. In general, the higher the level of brine stored in the mine, the less time available to mitigate new or increased inflows that exceed our capacity for pumping or disposal of brine outside the mine, and therefore the less time to avoid flooding and/or loss of the mine. Our past investments in remote injection and increased pumping capacities facilitate our management of the brine inflows and the amount of brine stored in the mine.

For the three months ended June 30, 2016, potash production was 1.8 million tonnes, compared to 2.4 million tonnes for the three months ended June 30, 2015. Our operating rate for potash production was 67% for the current year period as we scaled operations to meet demand. In the prior year period, our operating rate was 90% as we were rebuilding previously depleted inventory levels. On July 13, 2016, we announced that we will idle our Colonsay, Saskatchewan potash mine for the remainder of 2016 due to challenging potash market conditions.

## Six months ended June 30, 2016 and 2015

The Potash segment's net sales decreased to \$0.9 billion for the six months ended June 30, 2016, compared to \$1.4 billion in the same period a year ago. The decrease was primarily due to lower average selling prices and lower sales volumes that resulted in a decrease in net sales of approximately \$400 million and \$130 million, respectively.

Our average MOP selling price was \$191 per tonne for the six months ended June 30, 2016, a decrease of \$93 per tonne compared with the same period a year ago due to the factors discussed in the Overview.

The Potash segment's sales volumes decreased to 3.6 million tonnes for the six months ended June 30, 2016, compared to 4.4 million tonnes in the same period a year ago, due to the factors discussed in the Overview.

Gross margin for the Potash segment decreased to \$151.1 million for the six months ended June 30, 2016, from \$536.9 million for the same period in the prior year. Gross margin was unfavorably impacted by approximately \$400 million related

Table of Contents

to lower selling prices and \$50 million due to the decrease in sales volumes. Costs, excluding resource taxes and royalties which are separately discussed below, unfavorably impacted gross margin by approximately \$20 million from lower fixed costs absorption as a result of lower production, partially offset by the benefit of a weaker Canadian dollar and the benefit of cost-saving initiatives. These and other factors affecting gross margin and costs are further discussed below. As a result of these factors, gross margin as a percentage of net sales decreased to 18% for the six months ended June 30, 2016, compared to 39% for the same period a year ago.

We incurred \$56.4 million in Canadian resource taxes for the six months ended June 30, 2016, compared with \$133.0 million in the same period a year ago. These taxes decreased due to lower profitability in the current year. Royalty expense decreased to \$11.3 million for the six months ended June 30, 2016, compared to \$20.2 million for the six months ended June 30, 2015 due to lower selling prices and lower production.

We incurred \$79.3 million in expenses, including depreciation on brine assets, related to managing the brine inflows at our Esterhazy mine during the six months ended June 30, 2016, compared to \$89.0 million in the six months ended June 30, 2015.

For the six months ended June 30, 2016, potash production decreased to 3.8 million tonnes compared to 4.8 million tonnes for the six months ended June 30, 2015, as we scaled operations to meet demand. Subsequent to June 30, 2016, we took additional steps to scale our operations, with our announcement to idle our Colonsay mine, as noted above in the three-month discussion.

<sup>(a)</sup> Average price of all products sold by International Distribution.

## Three months ended June 30, 2016 and 2015

The International Distribution segment's net sales decreased to \$533.9 million for the three months ended June 30, 2016, from \$637.4 million in the same period a year ago. The decrease in net sales was primarily due to lower average selling prices and lower sales volumes that resulted in unfavorable impacts of approximately \$80 million and \$30 million, respectively.

The overall average selling price decreased \$53 per tonne to \$374 per tonne in the current quarter, primarily due to lower crop nutrient prices. The International Distribution segment's sales volume of 1.4 million tonnes for the three months ended June 30, 2016 was slightly lower than sales volume in the same period a year ago.

Total gross margin for the three months ended June 30, 2016, decreased to \$4.7 million from \$28.5 million in the prior year period, due to decreased average selling price as discussed above. Gross margin per tonne decreased to \$3 per tonne for the three months ended June 30, 2016 from \$19 per tonne for the same period in the prior year, primarily due to lower margins in Brazil. The margins in Brazil in the current quarter were impacted by unfavorable inventory positions as a result of foreign currency impacts and competitive pricing pressure.

## Six months ended June 30, 2016 and 2015

The International Distribution segment's net sales decreased to \$1.0 billion for the six months ended June 30, 2016, from \$1.1 billion in the same period a year ago. The decrease was primarily due to lower average selling prices that resulted in an unfavorable impact on net sales of approximately \$170 million, partially offset by higher sales volumes, which had a positive impact of approximately \$100 million, compared to the same period in the prior year.

The overall average selling price decreased \$64 per tonne to \$370 per tonne for the six months ended June 30, 2016 primarily due to declines in global crop nutrient prices.

Table of Contents

The International Distribution segment's sales volume increased to 2.7 million tonnes for the six months ended June 30, 2016, compared to 2.5 million tonnes in the same period a year ago, primarily driven by an overall increase in demand in Brazil supported by stronger farmer economics.

Our total gross margin for the six months ended June 30, 2016, decreased to \$16.5 million from \$49.0 million in the same period in the prior year. The gross margin per tonne decreased to \$6 per tonne from \$20 per tonne for the same period in the prior year, due to the factors discussed above.

**Corporate, Eliminations and Other**

In addition to our three operating segments, we assign certain costs to Corporate, Eliminations and Other, which is presented separately in Note 14 to our Notes to Condensed Consolidated Financial Statements. Corporate, Eliminations and Other includes intersegment eliminations, including profit on intersegment sales, unrealized mark-to-market gains and losses on derivatives, and debt expenses.

For the three months ended June 30, 2016, gross margin for Corporate, Eliminations and Other was a loss of \$4.1 million, compared to a loss of \$11.5 million for the same period in the prior year. The change was driven by \$29.8 million in net unrealized gains in the current quarter, primarily on foreign currency derivatives, compared to gains of \$27.2 million in the prior year period, primarily on foreign currency derivatives. In addition, a lower elimination of profit on intersegment sales in 2016 contributed a change of approximately \$9 million.

For the six months ended June 30, 2016, gross margin was a gain of \$58.1 million compared to a loss of \$76.4 million in the same period of the prior year. The change was driven by \$82.6 million in net unrealized gains in the current year, primarily on foreign currency derivatives, compared to a loss of \$11.2 million in the prior year period, primarily on foreign currency derivatives. In addition, a lower elimination of profit on intersegment sales in 2016 contributed a change of approximately \$40 million.

**Other Income Statement Items**

(in millions)	Three months ended				Six months ended			
	June 30, 2016	2015	2016-2015 Change	Percent	June 30, 2016	2015	2016-2015 Change	Percent
Selling, general and administrative expenses	\$72.9	\$89.3	\$(16.4)	(18 )%	\$162.7	\$189.8	\$(27.1)	(14 )%
Other operating expense	68.8	8.6	60.2	NM	52.3	8.8	43.5	NM
Interest (expense)	(38.9 )	(31.8 )	(7.1 )	22 %	(70.7 )	(66.6 )	(4.1 )	6 %
Interest income	5.4	8.3	(2.9 )	(35 )%	11.0	11.8	(0.8 )	(7 )%
Interest expense, net	(33.5 )	(23.5 )	(10.0 )	43 %	(59.7 )	(54.8 )	(4.9 )	9 %
Foreign currency transaction gain (loss)	14.7	(16.0 )	30.7	NM	102.6	29.1	73.5	NM
Other expense	(0.7 )	(7.8 )	7.1	(91 )%	(0.2 )	(13.4 )	13.2	(99 )%
Provision for (benefit from) income taxes	(9.8 )	72.6	(82.4 )	NM	(38.5 )	103.3	(141.8 )	NM
Equity in net earnings (loss) of nonconsolidated companies	(13.7 )	0.9	(14.6 )	NM	(11.0 )	(0.5 )	(10.5 )	NM

**Selling, General and Administrative Expenses**

For the three and six months ended June 30, 2016, selling, general and administrative expenses were \$72.9 million and \$162.7 million, respectively, compared to \$89.3 million and \$189.8 million for the same periods of the prior year. The lower expense in the current year periods is primarily due to lower incentive compensation in the current year periods and the effect of cost reduction initiatives.

**Other Operating Expense**

For the three months ended June 30, 2016, we had other operating expense of \$68.8 million compared with \$8.6 million for the same period in the prior year. The three months ended June 30, 2016 include a loss of \$47 million related to the cancellation of construction of a barge intended to transport ammonia as further explained in Note 15 of our Notes to Condensed Consolidated Financial Statements. The current year period also includes approximately \$11 million of severance costs related to organizational restructuring.

Table of Contents

For the six months ended June 30, 2016, we had other operating expense of \$52.3 million compared with \$8.8 million for the same period in the prior year. The increase is attributable to the items described above, partially offset by the receipt of approximately \$28 million in insurance proceeds in the first quarter of 2016 related to a warehouse roof collapse at our Carlsbad, New Mexico location in 2014. In addition, the prior year period includes a use tax refund of approximately \$8 million.

**Foreign Currency Transaction Gain (Loss)**

For the three and six months ended June 30, 2016, we recorded a foreign currency transaction gain of \$14.7 million and \$102.6 million, respectively, compared with a loss of \$16.0 million and gain of \$29.1 million, respectively, for the same periods in the prior year. For the three months ended June 30, 2016, the gain was mainly the result of the effect of the weakening of the U.S. dollar relative to the Brazilian Real on significant U.S. dollar-denominated payables. For the six months ended June 30, 2016, the gain was mainly the result of the weakening of the U.S. dollar relative to the Canadian dollar on significant U.S. dollar-denominated intercompany loans and the weakening of the U.S. dollar relative to the Brazilian Real on significant U.S. dollar-denominated payables, partially offset by the loss on our U.S. dollar-denominated cash held by our Canadian affiliates.

For the three months ended June 30, 2015, the loss was mainly the result of the effect of the weakening of the U.S. dollar relative to the Canadian dollar on significant U.S. dollar denominated intercompany receivables and U.S. dollar cash held by our Canadian affiliates, and the strengthening of the U.S. dollar relative to the Brazilian Real on significant U.S. dollar-denominated payables. For the six months ended June 30, 2015, the gain was mainly the result of the effect of the strengthening of the U.S. dollar relative to the Canadian dollar on significant U.S. dollar denominated intercompany receivables and U.S. dollar cash held by our Canadian affiliates, and the strengthening of the U.S. dollar relative to the Brazilian Real on significant U.S. dollar-denominated payables.

**Other Expense**

For the three and six months ended June 30, 2016, we had other expense of \$0.7 million and \$0.2 million, respectively, compared with \$7.8 million and \$13.4 million, respectively, for the same periods in the prior year. The prior year periods include the write down of an equity investment of approximately \$8 million.

**Equity in Net Earnings (Loss) of Nonconsolidated Companies**

For the three months ended June 30, 2016, we had a loss from equity of nonconsolidated companies of \$13.7 million, net of tax compared to income of \$0.9 million, net of tax for the same period in the prior year. For the six months ended June 30, 2016 and 2015, we had losses of \$11.0 million, net of tax and \$0.5 million, net of tax, respectively. The loss in the current year periods is due to the decision by Canpotex Limited ("Canpotex") not to proceed with construction of a new export terminal at the Port of Prince Rupert in British Columbia, as Canpotex determined it currently has sufficient port access and terminal capacity options to meet its needs. Mosaic's share of the loss was \$24 million, or \$16 million net of tax.

**Provision for (Benefit from) Income Taxes**

	Effective Tax Rate	Provision for Income Taxes
Three months ended		
June 30, 2016	(136.1)%	\$ (9.8 )
June 30, 2015	15.7 %	72.6

	Effective Tax Rate	Provision for Income Taxes
Six months ended		
June 30, 2016	(17.6 )%	\$ (38.5 )
June 30, 2015	13.1 %	103.3

Income tax benefit was \$9.8 million and \$38.5 million and the effective tax rates were (136.1%) and (17.6%) for the three and six months ended June 30, 2016.

Table of Contents

For the three months ended June 30, 2016, tax expense specific to the period included an expense of \$4.8 million, which primarily related to distributions from certain non-U.S. subsidiaries. For the six months ended June 30, 2016, tax expense specific to the period included a benefit of \$59.1 million, which includes a domestic benefit of \$85.8 million related to the resolution of an Advanced Pricing Agreement, which is a tax treaty-based process, partially offset by a \$20.5 million expense related to distributions from certain non-U.S. subsidiaries and \$6.2 million of expense primarily related to changes in estimates from prior periods.

For the three and six months ended June 30, 2016, our income tax rate was favorably impacted by the mix of earnings across the jurisdictions in which we operate and by a benefit associated with depletion when compared to the three and six months ended June 30, 2015. In addition, for the three months ended June 30, 2016, the benefit from income taxes was favorably impacted by approximately \$14 million from the cumulative adjustment resulting from the change in our estimated annual tax rate.

For the three and six months ended June 30, 2015, our income tax expense was \$72.6 million and \$103.3 million and the effective tax rates were 15.7% and 13.1%, respectively. For the three months ended June 30, 2015, tax expense specific to the period included a benefit of \$9.7 million primarily related to changes in estimates associated with an Advanced Pricing Agreement, which is a tax treaty-based process. For the six months ended June 30, 2015, tax expense specific to the period included a benefit of \$38.0 million, which is primarily related to the resolution of certain state tax matters that resulted in a benefit of \$18.4 million and the reduction in the tax rate for one of our equity method investments that resulted in a benefit of \$7.5 million.

## Non-GAAP Reconciliation

(in millions)	Three months		Six months ended	
	ended June 30,		June 30,	
	2016	2015	2016	2015
Sales	\$456.9	\$730.2	\$851.1	\$1,383.0
Gross margin	53.0	295.0	151.1	536.9
Gross margin as a percentage of net sales	12	% 40	% 18	% 39
Canadian resource taxes	38.1	54.9	56.4	133.0
Gross margin, (excluding CRT)	\$91.1	\$349.9	\$207.5	\$669.9
Gross margin (excluding CRT) as a percentage of net sales	20	% 48	% 24	% 48

In addition to gross margin for the Potash segment, we have presented in the Management's Analysis above, gross margin (excluding CRT), calculated as GAAP gross margin less CRT, and gross margin (excluding CRT) as a percentage of net sales, calculated as GAAP gross margin less CRT, divided by sales. Each is, or is calculated based on, a non-GAAP financial measure. Generally, a non-GAAP financial measure is a supplemental numerical measure of a company's performance, financial position or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with U.S. generally accepted accounting principles ("GAAP"). Neither gross margin (excluding CRT) nor gross margin (excluding CRT) as a percentage of net sales is a measure of financial performance under GAAP. Because not all companies use identical calculations, investors should consider that Mosaic's calculation may not be comparable to other similarly titled measures presented by other companies.

Gross margin (excluding CRT) and gross margin (excluding CRT) as a percentage of net sales provide measures that we believe enhance the reader's ability to compare our gross margin with that of other peer companies that incur CRT expense and classify it in a manner differently than we do in their statements of earnings. Because securities analysts, investors, lenders and others use gross margin (excluding CRT), our management believes that our presentation of gross margin (excluding CRT) for our Potash segment affords them greater transparency in assessing our financial performance against competitors. When measuring the performance of our Potash business, our management regularly utilizes gross margin before CRT. Neither gross margin (excluding CRT) nor gross margin (excluding CRT) as a percentage of net sales should be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP.

Table of Contents**Critical Accounting Estimates**

The Condensed Consolidated Financial Statements are prepared in conformity with U.S. GAAP. In preparing the Condensed Consolidated Financial Statements, we are required to make various judgments, estimates and assumptions that could have a significant impact on the results reported in the Condensed Consolidated Financial Statements. We base these estimates on historical experience and other assumptions believed to be reasonable by management under the circumstances. Changes in these estimates could have a material effect on our Condensed Consolidated Financial Statements.

The basis for our financial statement presentation, including our significant accounting estimates, is summarized in Note 2 to the Condensed Consolidated Financial Statements in this report. A detailed description of our significant accounting policies is included in Note 2 to the Consolidated Financial Statements in our 10-K Report. Further information regarding our critical accounting estimates is included in Management's Discussion and Analysis of Results of Operations and Financial Condition in our 10-K Report.

**Liquidity and Capital Resources**

As of June 30, 2016, we had cash and cash equivalents of \$1.1 billion, restricted cash to fund future obligations of \$857.5 million, including the amount committed to be placed into trust funds as discussed under "EPA RCRA Initiative" in Note 9 of our Notes to Condensed Consolidated Financial Statements, long-term debt of approximately \$3.8 billion, and stockholders' equity of approximately \$10.0 billion. We have a target liquidity buffer of \$2.5 billion, including cash and available committed credit lines. We also target debt leverage ratios that are consistent with investment grade credit ratings. Our capital allocation priorities include maintaining our financial strength and flexibility, maintaining our assets, paying our dividend, investing to grow our business, taking advantage of strategic opportunities and returning excess cash to shareholders in order to maintain an efficient balance sheet. During the six months ended June 30, 2016, we invested \$437.3 million in capital expenditures, \$100.0 million in the Ma'aden Wa'ad Al Shamal Joint Venture and \$90.0 million in an affiliate as further discussed in Investing Activities below. We also returned cash to shareholders through share repurchases of \$75.0 million (through the ASR as discussed in Note 12 of our Condensed Consolidated Financial Statements in this report) and cash dividends of \$192.4 million. In July 2016, we made an additional equity contribution of \$120 million to the Ma'aden Wa'ad Al Shamal Joint Venture. This amount represent the final payment for mineral rights and was included in accrued liabilities and our investment at June 30, 2016.

Funds generated by operating activities, available cash and cash equivalents, and our credit facilities continue to be our most significant sources of liquidity. We believe funds generated from the expected results of operations and available cash, cash equivalents and borrowings under the credit facility, as needed, will be sufficient to finance our operations, including our expansion plans, existing strategic initiatives and expected dividend payments, for the next 12 months. There can be no assurance, however, that we will continue to generate cash flows at or above current levels. At June 30, 2016, we had \$1.48 billion available under our \$1.5 billion credit facility. Our credit facility and term loan facility require us to maintain certain financial ratios, as discussed in Note 10 of our Notes to Consolidated Financial Statements in our 10-K Report. We were in compliance with these ratios as of June 30, 2016.

All of our cash and cash equivalents are diversified in highly rated investment vehicles. Approximately \$1.2 billion of cash and cash equivalents are held by non-U.S. subsidiaries and are not subject to significant foreign currency exposures, as the majority are held in investments denominated in U.S. dollars as of June 30, 2016. These funds may create foreign currency transaction gains or losses, however, depending on the functional currency of the entity holding the cash. In addition, there are no significant restrictions that would preclude us from bringing these funds back to the U.S.; however, there would be an income tax expense impact on repatriating approximately \$400 million of cash balances associated with certain undistributed earnings, which are part of the permanently reinvested earnings discussed in Note 12 of our Notes to Consolidated Financial Statements in our 10-K Report. We currently intend to use the \$400 million in cash for non-U.S. expansions and other investments outside the U.S.

Table of Contents

The following table represents a comparison of the net cash provided by operating activities, net cash used in investing activities, and net cash used in financing activities for the six months ended June 30, 2016 and 2015:

(in millions)	Six months ended			
	June 30,	2016-2015		
	2016	2015	Change	Percent
Cash Flow				
Net cash provided by operating activities	\$849.1	\$1,332.2	\$(483.1)	(36)%
Net cash used in investing activities	(630.4)	(526.3)	(104.1)	20%
Net cash used in financing activities	(522.5)	(897.8)	375.3	(42)%

**Operating Activities**

During the six months ended June 30, 2016, net cash provided by operating activities decreased by \$483.1 million to \$849.1 million, from \$1,332.2 million for the six months ended June 30, 2015. Our results of operations, after non-cash adjustments to net earnings, contributed \$580.5 million to cash flows from operating activities during the six months ended June 30, 2016, compared to a contribution of \$1,162.6 million as computed on the same basis for the prior year period. During the six months ended June 30, 2016, we had a favorable working capital change of \$268.6 million from December 31, 2015, compared to a favorable change of \$169.6 million during the six months ended June 30, 2015.

The change in working capital for the six months ended June 30, 2016, was primarily driven by a favorable impact from the change in accounts receivable of \$257.0 million, partially offset by an unfavorable impact from the change in inventories of \$36.6 million. The change in accounts receivable was due to the seasonal timing of sales as we had lower sales volumes in June 2016 compared to December 2015 and our average selling prices have also declined. The increase in inventories was primarily due to building inventories in our International Distribution segment for its upcoming high season.

In the prior year period, the change in working capital was primarily driven by favorable impacts from the change in accounts receivable and accounts payable partially offset by the change in other current and noncurrent assets. The decrease in accounts receivable was primarily due to seasonal timing of sales as we had lower sales volumes in June of 2015 compared to December 2014. The increase in accounts payable was primarily due to the timing of purchases in our International Distribution segment in preparation for its high season. Other current and noncurrent assets increased due to an increase in our final price deferred product, which is product shipped to customers not yet priced.

**Investing Activities**

Net cash used in investing activities was \$630.4 million for the six months ended June 30, 2016, compared to \$526.3 million for the same period a year ago. Included in net cash used in investing activities in the current year period is an investment of \$100.0 million in the Ma'aden Wa'ad Al Shamal Joint Venture compared to \$125.0 million during the six months ended June 30, 2015. In addition, we invested \$90.0 million in an affiliate for the construction of vessels intended to transport anhydrous ammonia, primarily for Mosaic's operations, as discussed in Note 15 of our Condensed Consolidated Financial Statements in this report. In the current year period, we had capital expenditures of \$437.3 million, compared to \$456.9 million in the prior year period. Also, in the prior year period, we received \$47.9 million related to a working capital adjustment from the ADM Acquisition.

**Financing Activities**

Net cash used in financing activities for the six months ended June 30, 2016, was \$522.5 million, compared to \$897.8 million for the same period in the prior year. Cash used in financing activities reflected shares repurchased during the six months ended June 30, 2016, of approximately \$75.0 million under our 2015 Repurchase Program, and dividends paid of \$192.4 million. The difference from the prior year was primarily due to higher share repurchases in the prior year period, partially offset by higher net payments of structured payables in the current year period.

**Debt Instruments, Guarantees and Related Covenants**

See Note 10 to the Consolidated Financial Statements in our 10-K Report and Note 15 to our Condensed Consolidated Financial Statements in this report.

Table of Contents

Financial Assurance Requirements

In addition to various operational and environmental regulations related to our Phosphates segment, we are subject to financial assurance requirements. In various jurisdictions in which we operate, particularly Florida and Louisiana, we are required to pass a financial strength test or provide credit support, typically in the form of surety bonds, letters of credit, certificates of deposit or trust funds. Further information regarding financial assurance requirements is included in Management's Discussion and Analysis of Results of Operations and Financial Condition in our 10-K Report, under "EPA RCRA Initiative", and in Note 9 to our Condensed Consolidated Financial Statements in this report.

Off-Balance Sheet Arrangements and Obligations

Information regarding off-balance sheet arrangements and obligations is included in Management's Discussion and Analysis of Results of Operations and Financial Condition in our 10-K Report and Note 15 to our Condensed Consolidated Financial Statements in this report.

Contingencies

Information regarding contingencies is hereby incorporated by reference to Note 9 to our Condensed Consolidated Financial Statements in this report.

Table of Contents

## Cautionary Statement Regarding Forward Looking Information

All statements, other than statements of historical fact, appearing in this report constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements include, among other things, statements about our expectations, beliefs, intentions or strategies for the future, including statements about MWSPC and its nature, impact and benefits, statements concerning our future operations, financial condition and prospects, statements regarding our expectations for capital expenditures, statements concerning our level of indebtedness and other information, and any statements of assumptions regarding any of the foregoing. In particular, forward-looking statements may include words such as "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "potential", "predict", "project" or "should". These statements involve certain risks and uncertainties that may cause actual results to differ materially from expectations as of the date of this filing.

Factors that could cause reported results to differ materially from those expressed or implied by the forward-looking statements include, but are not limited to, the following:

- business and economic conditions and governmental policies affecting the agricultural industry where we or our customers operate, including price and demand volatility resulting from periodic imbalances of supply and demand;
- changes in farmers’ application rates for crop nutrients;
- changes in the operation of world phosphate or potash markets, including continuing consolidation in the crop nutrient industry, particularly if we do not participate in the consolidation;
- pressure on prices realized by us for our products;
- the expansion or contraction of production capacity or selling efforts by competitors or new entrants in the industries in which we operate, including the effects of proving runs by members of Canpotex, Limited (“Canpotex”) to prove the production capacity of potash expansion projects;
- the expected cost of MWSPC and our expected investment in it, the amount, terms, availability and sufficiency of funding for MWSPC from us, Saudi Arabian Mining Company, Saudi Basic Industries Corporation and existing or future external sources, the ability of MWSPC to obtain additional planned funding in acceptable amounts and upon acceptable terms, the timely development and commencement of operations of production facilities in the Kingdom of Saudi Arabia, political and economic instability in the region, and in general the future success of current plans for the joint venture and any future changes in those plans;
- build-up of inventories in the distribution channels for our products that can adversely affect our sales volumes and selling prices;
- the effect of future product innovations or development of new technologies on demand for our products;
- seasonality in our business that results in the need to carry significant amounts of inventory and seasonal peaks in working capital requirements, and may result in excess inventory or product shortages;
- changes in the costs, or constraints on supplies, of raw materials or energy used in manufacturing our products, or in the costs or availability of transportation for our products;
- declines in our selling prices or significant increases in costs that can require us to write down our inventories to the lower of cost or market, or require us to impair goodwill or other long-lived assets, or establish a valuation allowance against deferred tax assets;
- the effects on our customers of holding high cost inventories of crop nutrients in periods of rapidly declining market prices for crop nutrients;
- the lag in realizing the benefit of falling market prices for the raw materials we use to produce our products that can occur while we consume raw materials that we purchased or committed to purchase in the past at higher prices;
- customer expectations about future trends in the selling prices and availability of our products and in farmer economics;

Table of Contents

disruptions to existing transportation or terminaling facilities, including those of Canpotex or any joint venture in which we participate;

shortages or other unavailability of railcars, tugs, barges and ships for carrying our products and raw materials;

the effects of and change in trade, monetary, environmental, tax and fiscal policies, laws and regulations;

foreign exchange rates and fluctuations in those rates;

tax regulations, currency exchange controls and other restrictions that may affect our ability to optimize the use of our liquidity;

other risks associated with our international operations, including any potential adverse effects related to our joint venture interest in the Miski Mayo mine in the event that protests against natural resource companies in Peru were to extend to or impact the Miski Mayo mine;

adverse weather conditions affecting our operations, including the impact of potential hurricanes, excessive heat, cold, snow or rainfall, or drought;

difficulties or delays in receiving, challenges to, increased costs of obtaining or satisfying conditions of, or revocation or withdrawal of required governmental and regulatory approvals, including permitting activities;

changes in the environmental and other governmental regulation that applies to our operations, including federal legislation or regulatory action expanding the types and extent of water resources regulated under federal law and the possibility of further federal or state legislation or regulatory action affecting greenhouse gas emissions or of restrictions or liabilities related to elevated levels of naturally-occurring radiation that arise from disturbing the ground in the course of mining activities or possible efforts to reduce the flow of nutrients into the Gulf of Mexico, the Mississippi River basin or elsewhere;

the potential costs and effects of implementation of federal or state water quality standards for the discharge of nitrogen and/or phosphorus into Florida waterways;

the financial resources of our competitors, including state-owned and government-subsidized entities in other countries;

the possibility of defaults by our customers on trade credit that we extend to them or on indebtedness that they incur to purchase our products and that we guarantee, particularly when we are exiting our business operations or locations that produced or sold the products to that customer;

any significant reduction in customers' liquidity or access to credit that they need to purchase our products;

the effectiveness of our risk management strategy;

the effectiveness of the processes we put in place to manage our significant strategic priorities, including the expansion of our Potash business and our investment in MWSPC, and to successfully integrate and grow acquired businesses;

actual costs of various items differing from management's current estimates, including, among others, asset retirement, environmental remediation, reclamation or other environmental obligations and Canadian resource taxes and royalties, or the costs of MWSPC, its existing or future funding and our commitments in support of such funding;

the costs and effects of legal and administrative proceedings and regulatory matters affecting us, including environmental, tax or administrative proceedings, complaints that our operations are adversely impacting nearby farms, businesses, other property uses or properties, settlements thereof and actions taken by courts with respect to approvals of settlements, resolution of global tax audit activity, and other further developments in legal proceedings and regulatory matters;

the success of our efforts to attract and retain highly qualified and motivated employees;

strikes, labor stoppages or slowdowns by our work force or increased costs resulting from unsuccessful labor contract negotiations;

Table of Contents

• brine inflows at our Esterhazy, Saskatchewan potash mine as well as potential inflows at our other shaft mines;

• accidents or other incidents involving our properties or operations, including potential fires, explosions, seismic events, sinkholes, unsuccessful tailings management or releases of hazardous or volatile chemicals;

• terrorism or other malicious intentional acts, including cybersecurity risks such as attempts to gain unauthorized access to, or disable, our information technology systems, or our costs of addressing malicious intentional acts;

• other disruptions of operations at any of our key production and distribution facilities, particularly when they are operating at high operating rates;

• changes in antitrust and competition laws or their enforcement;

• actions by the holders of controlling equity interests in businesses in which we hold a noncontrolling interest;

• changes in our relationships with other members of Canpotex or any joint venture in which we participate or their or our exit from participation in Canpotex or any such export association or joint venture, and other changes in our commercial arrangements with unrelated third parties;

• the adequacy of our property, business interruption and casualty insurance policies to cover potential hazards and risks incident to our business, and our willingness and ability to maintain current levels of insurance coverage as a result of market conditions, our loss experience and other factors;

• difficulties in realizing the benefits of our long-term natural gas based pricing ammonia supply agreement with CF Industries, Inc., which will commence in 2017, including the risks that the cost savings initially anticipated from the agreement may not be fully realized over its term or that the price of natural gas or the market price for ammonia during the agreement's term are at levels at which the agreement's natural gas based pricing is disadvantageous to us, compared with purchases in the spot market; and

• other risk factors reported from time to time in our Securities and Exchange Commission reports.

Material uncertainties and other factors known to us are discussed in Item 1A, "Risk Factors," of our annual report on Form 10-K for the year ended December 31, 2015 and incorporated by reference herein as if fully stated herein. We base our forward-looking statements on information currently available to us, and we undertake no obligation to update or revise any of these statements, whether as a result of changes in underlying factors, new information, future events or other developments.

Table of Contents

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to the impact of fluctuations in the relative value of currencies, the impact on interest rates, fluctuations in the purchase price of natural gas, ammonia and sulfur consumed in operations, and changes in freight costs as well as changes in the market value of our financial instruments. We periodically enter into derivatives in order to mitigate our foreign currency risks, interest rate risks and the effects of changing commodity prices, but not for speculative purposes. See Note 13 to the Consolidated Financial Statements in our 10-K Report and Note 10 to the Condensed Consolidated Financial Statements in this report.

## Foreign Currency Exchange Contracts

As of June 30, 2016 and December 31, 2015, the fair value of our major foreign currency exchange contracts was \$21.8 million and (\$54.0) million, respectively. The table below provides information about Mosaic's significant foreign exchange derivatives.

(in millions US\$)	As of June 30, 2016		As of December 31, 2015

Further information regarding commodities and derivatives is included in Management's Discussion and Analysis of Financial Condition and Results of Operations in our 10-K Report and Note 10 to the Condensed Consolidated Financial Statements in this report.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in our filings under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) accumulated and communicated to management, including our principal executive officer and our principal financial officer, to allow timely decisions regarding required disclosures. Our management, with the participation of our principal executive officer and our principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this quarterly report on Form 10-Q. Our principal executive officer and our principal financial officer have concluded, based on such evaluations, that our disclosure controls and procedures were effective for the purpose for which they were designed as of the end of such period.

(b) Changes in Internal Control Over Financial Reporting

Our management, with the participation of our principal executive officer and our principal financial officer, have evaluated any changes in our internal control over financial reporting that occurred during the three months ended June 30, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. Our management, with the participation of our principal executive officer and principal financial officer, did not identify any such changes during the three months ended June 30, 2016.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We have included information about legal and environmental proceedings in Note 9 to our Condensed Consolidated Financial Statements in this report. This information is incorporated herein by reference.

We are also subject to the following legal and environmental proceeding in addition to those described in Note 9 of our Condensed Consolidated Financial Statements in this report:

Nutrient Discharges into the Gulf of Mexico and Mississippi River Basin. On March 13, 2012, the Gulf Restoration Network, the Missouri Coalition for the Environment, the Iowa Environmental Council, the Tennessee Clean Water Network, the Minnesota Center for Environmental Advocacy, Sierra Club, the Waterkeeper Alliance, Inc., the Prairie Rivers Network, the Kentucky Waterways Alliance, the Environmental Law & Policy Center and the Natural Resources Defense Council, Inc. brought a lawsuit in the U.S. District Court for the Eastern District of Louisiana (the "Louisiana District Court") against EPA, seeking to require it to establish numeric nutrient criteria for nitrogen and phosphorous in the Mississippi River basin. In July 2011, EPA had denied the plaintiffs' July 2008 petition seeking such standards. On May 30, 2012, the Louisiana District Court granted our motion to intervene in this lawsuit.

On September 20, 2013, the Louisiana District Court issued a decision in this matter, holding that while EPA was required to respond directly to the petition and find that numeric nutrient criteria either were or were not necessary for the Mississippi River watershed, EPA had the discretion to decide this issue based on non-technical factors, including cost, policy considerations, administrative complexity and other issues. EPA appealed this decision to the Fifth Circuit Court of Appeals (the "Court of Appeals") in November 2013. The Court of Appeals issued a decision on April 7, 2015, holding in substantial part that EPA was not obligated to make a determination that numeric nutrient criteria are or are not necessary, provided EPA gives a reasonable explanation for its conclusion. The Court of Appeals remanded the case to the Louisiana District Court to decide whether EPA can meet that burden. On November 20, 2015 EPA filed a motion with the Louisiana District Court seeking summary judgment and on January 14, 2016, non-state intervenors including Mosaic filed a brief supporting EPA's motion.

We intend to defend vigorously EPA's decision. In the event that EPA were to establish numeric nutrient criteria for nitrogen and phosphorous in the Mississippi River basin and the Gulf of Mexico, we cannot predict what its requirements would be or the effects it would have on us or our customers.

Table of Contents

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

Pursuant to our employee stock plans relating to the grant of employee stock options, stock appreciation rights, restricted stock unit awards, and other equity-based awards, we have granted and may in the future grant employee stock options to purchase shares of our Common Stock for which the purchase price may be paid by means of delivery to us by the optionee of shares of our Common Stock that are already owned by the optionee (at a value equal to market value on the date of the option exercise). During the periods covered by this report, no options to purchase shares of our Common Stock were exercised for which the purchase price was so paid.

**ITEM 4. MINE SAFETY DISCLOSURES**

Information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 to this report.

**ITEM 6. EXHIBITS**
