DEERE THIRD-QUARTER EARNINGS INCREASE 68 PERCENT

Results boosted by improved profitability in Construction & Forestry and Commercial & Consumer Equipment Divisions.

New customers and company's focus on operating efficiencies help produce strong quarter.

As previously forecasted, company reports lower production levels in agricultural equipment.

MOLINE, Illinois (August 12, 2003) -- Deere & Company today reported worldwide net income of \$247.5 million, or \$1.02 per share, for the third quarter ended July 31, a 68 percent increase over last year's \$147.6

Edgar Filing: DEERE & CO - Form 8-K

million, or \$0.61 per share. For the first nine months, net income was \$572.4 million, or \$2.37 per share, compared with \$251.2 million, or \$1.04 per share, last year.

"These results build on the success of prior quarters and reflect strong sales of new products and the company's ongoing efforts to hold down costs and operate more efficiently at lower asset levels," said Robert W. Lane, chairman and chief executive officer. "We have achieved increased profitability in our construction and forestry and commercial and consumer operations, which more than offset our planned lower production volumes in the agricultural equipment division."

Worldwide net sales and revenues grew 11 percent to \$4.402 billion for the third quarter compared with a year ago and increased 11 percent to \$11.595 billion for the nine months. Net sales were \$3.833 billion for the quarter and \$9.974 billion for the nine months, compared with \$3.410 billion and \$8.756 billion, respectively, last year.

Net sales for both periods increased primarily due to higher physical volumes of commercial and consumer equipment and construction and forestry equipment. Exchange rates and price realization also had a favorable impact on this year's sales. Overseas net sales increased 9 percent for the quarter and 16 percent for nine months. Excluding the impact of changes in currency-exchange rates, overseas sales were down 3 percent for the quarter but up 5 percent year-to-date.

Deere's equipment operations reported operating profit of \$288 million for the quarter and \$669 million for nine months, compared with \$247 million and \$329 million, respectively, last year.

Page 5

(Operating results exclude the impact of external interest expense, taxes and certain other corporate expenses.) The increases for both periods were primarily due to improved price realization and higher physical volume of sales. Partially offsetting these factors were higher postretirement benefit costs of \$68 million for the quarter and \$211 million for the nine months. Last year's results for both periods were negatively affected by the costs of closing certain facilities. Both periods last year also were affected by higher costs associated with the company's minority investment in Nortrax Inc., a venture involved in the ownership and development of several Deere construction-equipment dealer locations.

Deere's equipment operations had net income of \$152.5 million for the quarter and \$329 million for the nine months, compared with \$91.3 million and \$75.6 million, respectively, last year. The same operating factors mentioned above affected these results. In addition, last year's quarterly and year-to-date net income was negatively impacted by a higher tax rate.

Summary of Equipment Operating Profit

Agricultural Equipment.

Compared with last year, division sales increased 4 percent for the quarter and 9 percent for nine months. The increase for both periods was primarily due to the impact of stronger foreign-exchange rates and improved price realization. Partially offsetting the increase in the third quarter was a lower physical volume of sales. Operating profit was \$127 million for the quarter and \$329 million for the nine months, compared with \$205 million and \$362 million, respectively, last year. The decrease for the quarter was primarily due to higher postretirement benefit costs of \$52 million as well as lower North American production volumes of tractors and combines. Lower nine-month operating profit was primarily due to higher postretirement benefit costs of \$147 million. Offsetting these factors in both periods was the impact of improved price realization.

Commercial and Consumer Equipment.

Compared with last year, division sales were up 18 percent for the quarter and 19 percent for the nine months. The increases were primarily due to strong retail demand for recently introduced products and the impact of expanded distribution channels. Operating profit increased to \$104 million for the quarter and \$237 million for nine months, compared with \$61 million and \$97 million, respectively, last year. The improved results were primarily due to higher sales and production volumes. Partially offsetting these factors were higher promotional and support costs related to new products, as well as higher postretirement benefit costs of \$7 million for the quarter and \$23 million for nine months. Results for both periods last year were negatively affected by restructuring costs related to the closure of certain facilities.

Construction and Forestry.

Division sales rose 29 percent for the quarter and 25 percent for the nine months. Excluding sales from the Deere-Hitachi marketing relationship in the U.S. and Canada, division sales rose 24 percent and 17 percent, respectively, for the third quarter

and year-to-date. These increases were primarily due to higher physical volumes, reflective of improved retail activity.

The division's operating profit improved to \$59 million for the quarter and \$111 million for the nine months, compared with operating losses of \$10 million and \$97 million, respectively, last year. The improvement for both periods was primarily due to higher sales and production volumes. Improved price realization also had a favorable impact on this year's results. Partially offsetting these factors were higher postretirement benefit costs of \$10 million for the quarter and \$41 million for the nine months. Last year's third quarter results were negatively affected by higher costs related to the company's investment in Nortrax, which also had an impact on the company's year-to-date results a year ago as did costs related to the closing of a factory.

Special Technologies.

Lower costs and expenses and the absence of goodwill amortization led to improvements in these operations, which reported operating losses of \$2 million for the quarter and \$8 million for the nine months, compared with operating losses of \$9 million and \$33 million, respectively, last year.

Consistent with the company's asset management goals, trade receivables and inventories remained at favorable levels. Trade receivables at the end of third-quarter 2003 were \$3.355 billion, representing 26 percent of the previous 12-month sales, compared with \$3.302 billion a year ago, equal to 29 percent of prior 12-month sales. Based on constant exchange rates, trade receivables were down by \$67 million. Inventories were \$1.711 billion, representing 16 percent of the previous 12-month cost of sales, compared with \$1.607 billion a year ago, or 17 percent of the previous 12-month cost of sales. Approximately \$64 million of the inventory increase was due to the fluctuation of foreign exchange rates.

Summary of Financial Services Net Income

Credit.

Net income of the credit operations increased to \$85.5 million for the quarter and \$227.3 million for the nine months, compared with \$56.9 million and \$180.2 million, respectively, last year. The increase in quarterly net income was primarily due to higher gains resulting from an increased volume of retail note sales, growth in the portfolio and lower loan losses. The year-to-date increase was primarily due to lower loan losses, growth in the portfolio, and the absence of losses from Argentina, partially offset by lower gains on a lower volume of note sales and narrower financing spreads.

Health Care.

Health care operations reported net income of \$5.7 million for the quarter and \$13.4 million for the nine months, compared with \$4.9 million and \$13.2 million, respectively, last year. Both periods benefited from increases in administrative service fee income. Investment income for the quarter was also higher.

Market Conditions and Outlook

Based on the conditions outlined below, Deere's net equipment sales for the fourth quarter of 2003 are currently forecast to be up approximately 5 percent. Excluding the impact of currency and price, sales are forecast to be slightly lower for the fourth quarter, as previously projected. Also consistent with earlier forecasts, production volumes are expected to be down about 5 percent in the fourth quarter from the low levels of last year. For the full year, net income is now projected in a range of \$575 to \$625 million.

Agricultural Equipment.

Retail sales of farm machinery in the U.S. and Canada have moved higher in recent weeks due to increased farmer cash flow and crop conditions that are more favorable than last year. New tax legislation that includes expanded depreciation and expense-write-off provisions is also expected to be supportive of higher farm machinery sales in coming months. As a result, industry retail sales in the U.S. and Canada are now expected to be flat to down 5 percent for the year. In other areas, industry retail sales in Western Europe are expected to be down by 5 to 7 percent for the year mainly due to dry weather and lower farm income. Paced by a strong improvement in Argentina, industry retail sales in South America are now expected to be about 5 percent higher for the year. On a worldwide basis, net sales of John Deere agricultural equipment are now forecast to be up 7 to 9 percent for the year. The physical volume of sales is expected to be down slightly. Production in the

U.S. and Canada will be down about 7 percent in the fourth quarter, as inventories are reduced in line with our asset management objectives.

Commercial and Consumer Equipment.

John Deere commercial and consumer equipment sales are expected to continue to benefit from the success of recently introduced products, particularly compact tractors and lawn tractors. As a result, sales are expected to be up over 15 percent for the year. As previously projected, fourth quarter production levels are expected to be down by more than 25 percent, consistent with the division's build-to-demand strategy.

Construction and Forestry.

Retail activity in the construction and forestry sectors has increased dramatically in recent months from depressed year-ago levels mainly as a result of improved replacement demand. Deere sales have risen strongly in virtually all market categories, including forestry and rental. As a result, sales of Deere construction and forestry equipment are now expected to be up 18 percent for the year (up 13 percent without the inclusion of sales from the Deere-Hitachi marketing relationship).

Page 8

Credit.

Credit results for the full year are expected to benefit from lower write-offs and further growth in the loan portfolio. On this basis, the division continues to expect net income for the year of about \$300 million.

Gaining Through Greater Efficiency and New Customers

"

Deere's success in simultaneously making major gains in operating efficiency and attracting new customers throughout the world, is helping the company achieve much higher financial results despite softness in the crucial U.S. and Canadian farm sector," Lane said. "Our performance to date is on track and we are delivering higher value for investors. However, we know there is more work to be done to achieve the improvements necessary to reach our goals."

John Deere Capital Corporation

The following is disclosed on behalf of the company's credit subsidiary, John Deere Capital Corporation (JDCC), in connection with the disclosure requirements applicable to its periodic issuance of debt securities in the public market.

JDCC's net income was \$79.8 million for the third quarter and \$209.6 million for the first nine months of 2003, compared with \$58.9 million and \$173.4 million, respectively, last year. The increase in quarterly net income was primarily due to higher gains resulting from an increased volume of retail note sales and growth in the portfolio. The year-to-date increase was primarily due to lower loan losses, growth in the portfolio and the absence of losses from Argentina, partially offset by

lower gains on the sales of retail notes and narrower financing spreads.

Net receivables and leases financed by JDCC were \$11.971 billion at July 31, 2003, compared with \$10.747 billion one year ago. The increase resulted from acquisitions exceeding collections during the last twelve months partially offset by sales of retail notes. Net receivables and leases administered, which include receivables previously sold, totaled \$14.750 billion at July 31, 2003 compared with \$13.576 billion one year ago.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

Statements herein that relate to future operating periods are subject to important risks and uncertainties that could cause actual results to differ materially. Some of these risks and uncertainties could affect particular lines of business, while others could affect all of the company's businesses.

Forward-looking statements involve certain factors that are subject to change, including for the company's agricultural equipment segment the many interrelated factors that affect farmers' confidence, including worldwide demand for agricultural products, world grain stocks, prices realized for commodities and livestock, crop production expenses (most notably fuel and fertilizer costs), weather and soil conditions, real estate values, available acreage for farming, the level, complexity and distribution of government farm programs, animal diseases (including further outbreaks or the

Page 9

spread of "mad cow" and "foot-and-mouth" diseases), crop pests, harvest yields and the level of farm product exports (including concerns about genetically modified organisms). The outlook for harvest prices and the size and condition of the crop especially affect retail sales of agricultural equipment in the fall.

Factors affecting the outlook for the company's commercial and consumer equipment segment include general economic conditions in the United States, consumer confidence, consumer borrowing patterns and weather conditions. Another important assumption is continued consumer acceptance of the company's new products, including the new 100-series lawn tractors.

The number of housing starts is especially important to sales of the company's construction equipment. The levels of public and non-residential construction also impact the results of the company's construction and forestry segment. Prices for pulp, lumber and structural panels are important to sales of forestry equipment.

All of the company's businesses are affected by general economic conditions in and the political stability of the global markets in which the company operates (including Brazil, Argentina and other South American countries); monetary and fiscal policies of various countries; wars and other international conflicts and the threat thereof; actions by the United States Federal Reserve Board and other central banks; actions by the United States Securities and Exchange Commission and other regulatory bodies; actions by rating agencies; capital market disruptions; investor sentiment; inflation and deflation rates; interest rate levels and currency exchange rates; customer borrowing and repayment

practices, and the number of customer loan delinquencies and defaults; actions of competitors in the various industries in which the company competes, particularly price discounting; dealer practices, especially as to levels of new and used field inventories; production and technological difficulties, including capacity and supply constraints; oil and energy prices and supplies; labor relations; changes to accounting standards; the effects of terrorism and the response thereto; and legislation affecting the sectors in which the company operates. Company results are also affected by significant changes in health care costs and in market values of investment assets, which impact post-retirement benefit and pension expenses. In addition, further outbreaks or the spread of severe diseases such as Severe Acute Respiratory Syndrome (SARS) could affect the company's businesses and results.

The company's outlook is based upon assumptions relating to the factors described above, which are sometimes based upon estimates and data prepared by government agencies. Such estimates and data are often revised. The company, however, undertakes no obligation to update or revise its outlook, whether as a result of new developments or otherwise. Further information concerning the company and its businesses, including factors that potentially could materially affect the company's financial results, is included in the company's most recent annual report on Form 10-K and other filings with the Securities and Exchange Commission.

Cash and Cash Equivalents at End of Period	<u>\$ 3,757.2</u>	<u>\$ 2,327.5</u>

See Notes to Interim Financial Statements.

- (1) Dividends declared and paid on a per share basis were as follows:

	Three Months Ended July 31		Nine Months Ended July 31	
	2003	2002	2003	2002
Dividends declared	\$.22	\$.22	\$.66	\$.66
Dividends paid	\$.22	\$.22	\$.66	\$.66

- (2) The calculation of basic net income per share is based on the average number of shares outstanding during the nine months ended July 31, 2003 and 2002 of 239.4 million and 238.0 million, respectively. The calculation of diluted net income per share recognizes primarily the dilutive effect of the assumed exercise of stock options.

- (3) Comprehensive income, which includes all changes in the Company's equity during the period except transactions with stockholders, was as follows in millions of dollars:

	Three Months Ended July 31		Nine Months Ended July 31	
	2003	2002	2003	2002
Net income	\$ 247.5	\$ 147.6	\$ 572.4	\$ 251.2
Other comprehensive income (loss), net of tax:				
Change in cumulative translation adjustment	46.3	.3	163.2	32.4
Unrealized gain (loss) on investments	(6.6)	1.9		2.3
Unrealized gain (loss) on derivatives	5.8	(10.6)	7.2	22.1

Comprehensive income	\$ 293.0	\$ 139.2	\$ 742.8	\$ 308.0
----------------------	----------	----------	----------	----------

- (4) The consolidated financial statements represent the consolidation of all Deere & Company's subsidiaries. In the supplemental consolidating data in Note 5 to the financial statements, "Equipment Operations" (Deere & Company with Financial Services on the Equity Basis) include the Company's agricultural equipment, commercial and consumer equipment, construction and forestry and special technologies operations, with Financial Services reflected on the equity basis. The supplemental consolidating "Financial Services" data in Note 5 include Deere & Company's credit and health care operations.

The Company evaluates its business results on the basis of generally accepted accounting principles. In addition, it uses a metric referred to as Shareholder Value Added (SVA), which management believes is an appropriate measure for the performance of its businesses. SVA is, in effect, the pretax profit left over after subtracting the cost of enterprise capital. The Company is aiming for a sustained creation of SVA and is using this metric for various performance goals. Certain compensation is also determined on the basis of performance using this measure. For purposes of determining SVA, each of the equipment segments is assessed a pretax cost of assets, which on an annual basis is 12 percent of the segment's average identifiable operating assets during the applicable period with inventory at standard cost. Management believes that valuing inventories at standard cost more closely approximates the current cost of inventory and the Company's investment in the asset. Financial Services is assessed a pretax cost of equity, which on an annual basis is approximately 19 percent of its average equity during the period excluding the allowance for doubtful receivables. The cost of assets or equity, as applicable, is deducted from the operating profit or added to the operating loss of the equipment segments or Financial Services to determine the amount of SVA. For this purpose, the operating profit of Financial Services is net income before income taxes and changes to the allowance for doubtful receivables. The average equity and operating profit of Financial Services is adjusted for the allowance for doubtful receivables in order to more closely reflect credit losses on a write-off basis.

To create SVA using metrics relevant to their daily operations, the Company's equipment segments are targeting an annual operating return on operating assets (OROA) of 20 percent at normal sales volumes, and other returns at other points in the cycle. For purposes of this OROA calculation, operating assets consist of average identifiable assets during the applicable period with inventory at standard cost. Refer to Deere & Company's annual report on Form 10-K for additional information.
