per Common Share (assuming reinvestment of all dividends) increased 17.3% for the year ended December 31, 2012. The U.S. stock market was up 16.0% for the year, as measured by our benchmark, the Standard & Poor's 500 Stock Index (including income). The return to our Common Stockholders increased by 19.8% and the discount at which our shares traded to their NAV continued to fluctuate and on December 31, 2012, it was 14.9%.

The table that follows provides a comprehensive presentation of our performance and compares our returns on an annualized basis with the S&P 500.

The U.S. economy generated modest economic growth in 2012, owing to improvements in employment,

Thus reasonable valuations in equity markets, particularly when compared to bond yields, should provide for continued performance from equities as an asset class. Our focus remains on finding well-managed businesses at reasonable valuations and with opportunities for growth and successful capital allocation.

As part of an ongoing effort to maximize shareholder value, over 4% of the Company's shares were repurchased in 2012 at an average discount to NAV of 14.5%. The Board of Directors has authorized repurchases of Common Shares when they are trading at a discount to NAV of at least 8%.

In December 2012, the Board of Directors renewed authority originally granted in 2008 to repurchase up to 1 million outstanding shares of its 5.95% Cumulative Preferred Stock when the shares are trading at a market price below the liquidation preference of \$25.00 per share.

As announced on December 12, 2012, Spencer Davidson, President and Chief Executive Officer of the Company, retired effective December 31, 2012 after eighteen years of service as Chief Executive Officer. Effective January 1, 2013, Jeffrey W. Priest was appointed Chief Executive

Officer and Portfolio Manager of the Company.

housing, and consumer spending. This performance occurred in the face of concerns over the increasing national debt—as reflected in the fiscal cliff debates, the coming debt-ceiling negotiations, and the budget sequestration battles in Congress—the effects of Hurricane Sandy, and a general worldwide economic malaise that has lingered for all too long. The upticks in growth, in conjunction with diminished fear over Europe’s economic future and the adoption of the fourth series of quantitative easing by the Fed, enabled world and U.S. equity markets to improve substantially during the past year, especially in the last quarter.

Ironically, reported earnings for 2012 appear to be lower than many analysts had assumed earlier in the last year, leaving U.S. markets with higher than anticipated earnings multiples. Simultaneously, forecasts for earnings of companies in the S&P 500 this year are back-end loaded, reflecting the political and fiscal uncertainties still present both in the U.S. and Europe. Conversely, Asia, particularly China, appears to be maintaining positive momentum, via a number of fiscal and monetary policy levers, following a weaker performance in the first half of 2012.

Given the magnitude of the budget and fiscal problems in most of the Organization of Economic Cooperation and Development, the rising inflationary implications of policies in the emerging markets, and the policy responses adopted to date by most countries, we continue to look for only modest improvements in real economic growth both here in the US and abroad. But

Also announced on December 12, 2012, Carole Anne Clementi, an employee of the Company for more than thirty-nine years and Corporate Secretary since October 1994, retired effective December 31, 2012. Effective January 1, 2013, Maureen E. LoBello, who has been an employee of the Company since 1992 and Assistant Corporate Secretary since 2005, was appointed Corporate Secretary.

In addition, the Company is pleased to report that on January 1, 2013, Craig A. Grassi, an employee of the Company since 1991 and Assistant Vice-President since 2005, was appointed Vice-President.

Information about the Company, including our investment objectives, operating policies and procedures, investment results, record of dividend payments, financial reports and press releases, etc., is available on our website, which can be accessed at www.generalamericaninvestors.com.

we remain guardedly optimistic that the improvements seen in markets and economies since the financial crisis of 2008 will continue.

On December 10, 2008, the Board of Directors authorized the repurchase of up to 1 million Preferred Shares in the open market at prices below \$25 per share and that authority remains available to the Company.

**Dividend
and
Distribution
Policy**

The Company's dividend and distribution policy is to distribute to stockholders before year-end substantially all ordinary income estimated for the full year and capital gains realized during the ten-month period ended October 31 of that year. If any additional capital gains are realized and available or ordinary income is earned during the last two months of the year, a "spill-over" distribution of these amounts may be paid. Dividends and distributions on shares of Preferred Stock are paid quarterly. Distributions from capital gains and dividends from ordinary income are allocated proportionately among holders of shares of Common Stock and Preferred Stock.

Dividends from income have been paid continuously on the Common Stock since 1939 and capital gain distributions in varying amounts have been paid for each of the years 1943-2012 (except for the year 1974). (A table listing dividends and distributions paid during the 20-year period 1993-2012 is shown at the bottom of page 4.) To the extent that shares can be issued, dividends and distributions are paid to Common Stockholders in additional shares of Common Stock unless the stockholder specifically requests payment in cash.

*Total return on \$10,000
investment for 20 years
ended December 31, 2012*

The investment return for a Common Stockholder of General American Investors (GAM) over the 20 years ended December 31, 2012 is shown in the table below and in the accompanying chart. The return based on GAM's net asset value (NAV) per Common Share in comparison to the change in the Standard & Poor's 500 Stock Index (S&P 500) is also displayed. Each illustration assumes an investment of \$10,000 at the beginning of 1993.

Stockholder Return is the return a Common Stockholder of GAM would have achieved assuming reinvestment of all dividends and distributions at the actual reinvestment price and of all cash dividends at the average (mean between high and low) market price on the ex-dividend date.

Net Asset Value (NAV) Return is the return on shares of the Company's Common Stock based on the NAV per share, including the reinvestment of all dividends and distributions at the reinvestment prices indicated above.

Standard & Poor's 500 Return is the time-weighted total rate of return on this widely-recognized, unmanaged index which is a measure of general stock market performance, including dividend income.

Past performance may not be indicative of future results.

The graph and tables below do not reflect the deduction of taxes that a stockholder would pay on Company distributions or the sale of Company shares.

1. SIGNIFICANT ACCOUNTING POLICIES

General American Investors Company, Inc. (the "Company"), established in 1927, is registered under the Investment Company

Act of 1940 as a closed-end, diversified management investment company. It is internally managed by its officers under the

direction of the Board of Directors.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States

("U.S. GAAP") requires management to make estimates and assumptions that affect the amounts reported in the financial state-

ments and accompanying notes. Actual results could differ from those estimates.

a. SECURITY VALUATION Equity securities traded on a national securities exchange are valued at the last reported sales price on

the last business day of the period. Equity securities reported on the NASDAQ national market are valued at the official closing

price on that day. Listed and NASDAQ equity securities for which no sales are reported on that day and other securities traded

in the over-the-counter market are valued at the last bid price (asked price for options written) on the valuation date. Equity

securities traded primarily in foreign markets are valued at the closing price of such securities on their respective exchanges or

markets. Corporate debt securities, domestic and foreign, are generally traded in the over-the-counter market rather than on a

securities exchange. The Company utilizes the latest bid prices provided by independent dealers and information with respect

to transactions in such securities to determine current market value. If, after the close of foreign markets, conditions change

significantly, the price of certain foreign securities may be adjusted to reflect fair value as of the time of the valuation of the

portfolio. Investments in money market funds are valued at their net asset value. Special holdings (restricted securities) and

other securities for which quotations are not readily available are valued at fair value determined in good faith pursuant to spe-

cific procedures appropriate to each security as established by and under the general supervision of the Board of Directors. The

determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price

materially different from the price used by other investors or the price that may be realized upon the actual sale of the security.

b. OPTIONS The Company may purchase and write (sell) put and call options. The Company typically purchases put options or

writes call options to hedge the value of portfolio investments while it typically purchases call options and writes put options

to obtain equity market exposure under specified circumstances. The risk associated with purchasing an option is that the

Company pays a premium whether or not the option is exercised. Additionally, the Company bears the risk of loss of the pre-

mium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. Premiums received from writing options are reported as a liability on the Statement of Assets and Liabilities. Those that expire unexercised are treated by the Company on the expiration date as realized gains on written option transactions in the Statement of Operations. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss on written option transactions in the Statement of Operations. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Company has realized a gain or loss on investments in the Statement of Operations. If a put option is exercised, the premium reduces the cost basis for the securities purchased by the Company and is parenthetically disclosed under cost of investments on the Statement of Assets and Liabilities. The Company as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option. See Note 4 for written option activity.

c. SECURITIES TRANSACTIONS AND INVESTMENT INCOME Securities transactions are recorded as of the trade date. Dividend income and distributions to stockholders are recorded as of the ex-dividend dates. Interest income, adjusted for amortization of discount and premium on investments, is earned from settlement date and is recognized on the accrual basis. Cost of short-term investments represents amortized cost.

d. FOREIGN CURRENCY TRANSLATION AND TRANSACTIONS Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies versus U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Company's Board of Directors. The Company does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign

exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than

investments in securities held at the end of the reporting period.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of

U.S. companies as a result of, among other factors, the possibility of political or economic instability or the level of government-

tal supervision and regulation of foreign securities markets.

e. DIVIDENDS AND DISTRIBUTIONS The Company expects to pay dividends of net investment income and distributions of net real-

ized capital and currency gains, if any, annually to common shareholders and quarterly to preferred shareholders. Dividends

and distributions to common and preferred shareholders, which are determined in accordance with Federal income tax regula-

tions are recorded on the ex-dividend date. Permanent book/tax differences relating to income and gains are reclassified to

paid-in capital as they arise.

f. FEDERAL INCOME TAXES The Company's policy is to fulfill the requirements of the Internal Revenue Code applicable to regu-

lated investment companies and to distribute substantially all taxable income to its stockholders. Accordingly, no provision for

Federal income taxes is required. In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income

taxes, management has analyzed the Company's tax positions taken or expected to be taken on federal and state income tax

returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is

required in the Company's financial statements.

1. SIGNIFICANT ACCOUNTING POLICIES - (Continued from previous page.)

g. CONTINGENT LIABILITIES Amounts related to contingent liabilities are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. Management evaluates whether there are incremental legal or other costs directly associated with the ultimate resolution of a matter that are reasonably estimable and, if so, they are included in the accrual.

h. INDEMNIFICATIONS In the ordinary course of business, the Company enters into contracts that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, the Company has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

2. FAIR VALUE MEASUREMENTS

Various data inputs are used in determining the value of the Company's investments. These inputs are summarized in a hierarchy consisting of the three broad levels listed below:

Level 1 - quoted prices in active markets for identical securities (including money market funds which are valued using amortized cost and which transact at net asset value, typically \$1 per share),

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, credit risk, etc.), and

Level 3 - significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Company's net assets as of December 31, 2012:

Assets	Level 1	Level 2	Level 3	Total
Common stocks	\$1,025,685,007	—	\$21,218,125	\$1,046,903,132

Transfers, if any, are reported as of the end of the reporting period. There were no transfers between Levels during the year ended December 31, 2012.

3. PURCHASES AND SALES OF SECURITIES

Purchases and sales of securities (other than short-term securities and options) during 2012 amounted to \$99,438,407 and \$226,293,234, on long transactions, respectively.

4. WRITTEN OPTIONS

The level of activity in written options varies from year to year based upon market conditions. Transactions in written call

options and collateralized put options during the year ended December 31, 2012 were as follows:

	COVERED CALLS		COLLATERALIZED PUTS

5. CAPITAL STOCK AND DIVIDEND DISTRIBUTIONS

The authorized capital stock of the Company consists of 50,000,000 shares of Common Stock, \$1.00 par value, and

10,000,000 shares of Preferred Stock, \$1.00 par value. With respect to the Common Stock, 29,233,972 shares were issued

and outstanding; 8,000,000 Preferred Shares were originally issued and 7,604,687 were outstanding on December 31, 2012.

On September 24, 2003, the Company issued and sold 8,000,000 shares of its 5.95% Cumulative Preferred Stock,

Edgar Filing: GENERAL AMERICAN INVESTORS CO INC - Form N-CSR

Series B in an underwritten offering. The Preferred Shares were noncallable for the 5 year period ended September 24, 2008

and have a liquidation preference of \$25.00 per share plus accumulated and unpaid dividends to the date of redemption.

On December 10, 2008, the Board of Directors authorized the repurchase of up to 1 million Preferred Shares in the open

market at prices below \$25.00 per share. To date, 395,313 shares have been repurchased.

The Company is required to allocate distributions from long-term capital gains and other types of income proportionately

among holders of shares of Common Stock and Preferred Stock. To the extent that dividends on the shares of Preferred

Stock are not paid from long-term capital gains, they will be paid from ordinary income or net short-term capital gains or

will represent a return of capital.

5. CAPITAL STOCK AND DIVIDEND DISTRIBUTIONS - (Continued from previous page.)

Under the Investment Company Act of 1940, the Company is required to maintain an asset coverage of at least 200% of the Preferred Stock. In addition, pursuant to Moody's Investor Service, Inc. Rating Agency Guidelines, the Company is required to maintain a certain discounted asset coverage for its portfolio that equals or exceeds a Basic Maintenance Amount. The Company has met these requirements since the issuance of the Preferred Stock. If the Company fails to meet these requirements in the future and does not cure such failure, the Company may be required to redeem, in whole or in part, shares of Preferred Stock at a redemption price of \$25.00 per share plus accumulated and unpaid dividends. In addition, failure to meet the foregoing asset coverage requirements could restrict the Company's ability to pay dividends on shares of Common Stock and could lead to sales of portfolio securities at inopportune times.

The holders of Preferred Stock have voting rights equivalent to those of the holders of Common Stock (one vote per share) and, generally, vote together with the holders of Common Stock as a single class.

Holders of Preferred Stock will elect two members to the Company's Board of Directors and the holders of Preferred and Common Stock, voting as a single class, will elect the remaining directors. If the Company fails to pay dividends on the Preferred Stock in an amount equal to two full years' dividends, the holders of Preferred Stock will have the right to elect a majority of the directors. In addition, the Investment Company Act of 1940 requires that approval of the holders of a majority of any outstanding Preferred Shares, voting separately as a class, would be required to (a) adopt any plan of reorganization that would adversely affect the Preferred Stock and (b) take any action requiring a vote of security holders, including, among other things, changes in the Company's subclassification as a closed-end investment company or changes in its fundamental investment policies.

The Company presents its Preferred Stock, for which its redemption is outside of the Company's control, outside of the net assets applicable to Common Stock in the Statement of Assets and Liabilities.

Transactions in Common Stock during 2012 and 2011 were as follows:

	SHARES		AMOUNT

The tax basis distribution during the year ended December 31, 2012 is as follows:

ordinary distributions of \$7,830,635, long-term capital gains distributions of \$60,426,840. As of December 31, 2012, distributable earnings on a tax basis included \$295,371 from undistributed net long-term capital gains, \$378,924 from undistributed ordinary income and \$390,366,710 from net unrealized appreciation on investments if realized in future years.

Reclassifications arising from permanent "book/tax" differences reflect non-tax deductible expenses and redesignation of dividends incurred during the year ended December 31, 2012. As a result,

undistributed net investment income was increased by \$2,804, additional paid-in capital was decreased by \$1,318 and

accumulated net realized gain on investment transactions was decreased by \$1,486. Net assets were not affected by this

reclassification.

of office improvements, and incurs escalations annually relating to operating costs and real property taxes and to annual rent charges

beginning in February 2013. The Company has the option to renew the lease after February 2018 for five years at market rates. Rental

These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We were not engaged to perform an audit of the Company's internal control over financial reporting. ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

General American Investors Company, Inc.

PROXY VOTING POLICIES AND PROCEDURES

General American Investors Company, Inc. (the "Company") is uniquely structured as an internally managed closed-end investment company. Our research efforts, including the receipt and analysis of proxy material, are focused on the securities in the Company's portfolio, as well as alternative investment opportunities. We vote proxies relating to our portfolio securities in the best long-term interests of the Company.

Our investment approach stresses fundamental security analysis, which includes an evaluation of the integrity, as well as the effectiveness of management personnel. In proxy material, we review management proposals and management recommendations relating to shareholder proposals in order to, among other things, gain assurance that management's positions are consistent with its integrity and the long-term interests of the company. We generally find this to

be the case and, accordingly, give significant weight to the views of management when we vote proxies.

Proposals that may have an impact on the rights or privileges of the securities held by the Company would be reviewed very carefully. The explanation for a negative impact could justify the proposal; however, if such justification were not present, we would vote against a significant reduction in the rights or privileges associated with any of our holdings.

Proposals relating to corporate governance matters are reviewed on a case-by-case basis. When they involve changes in the state of incorporation, mergers or other restructuring, we would, if necessary, complete our review of the rationale for the proposal by contacting company representatives and, with few exceptions, vote in favor of management's recommendations. Proposals relating to anti-takeover provisions, such as staggered boards, poison pills and supermajorities could be more problematic. They would be considered in light of our assessment of the capability of current management, the duration of the proposal, the negative impact it might have on the attractiveness of the company to future "investors," among other factors. We can envision circumstances under which we would vote against an anti-takeover provision.

Generally, we would vote with management on proposals relating to changes to the company's capital structure, including increases and decreases of capital and issuances of preferred stock; however, we would review the facts and circumstances associated with each proposal before finalizing our decision.

Well-structured stock option plans and management compensation programs are essential for companies to attract and retain high caliber management personnel. We generally vote in favor of proposals relating to these issues; however, there could be an occasion on which we viewed such a proposal as over reaching on the part of management or having the potential for excessive dilution when we would vote against the proposal.

Corporations should act in a responsible manner toward their employees, the communities in which they are located, the customers they serve and the world at large. We have observed that most stockholder proposals relating to social issues focus on a narrow issue and the corporate position set forth in the proxy material provides a well-considered response demonstrating an appropriate and responsible action or position. Accordingly, we generally support management recommendations on these types of proposals; however, we would consider each proposal on a case-by-case basis.

We take voting proxies of securities held in our portfolio very seriously. As indicated above, it is an integral part of the analytical process at General American Investors. Each proposal and any competing interests are reviewed carefully on a case-by-case basis. Generally, we support and vote in accordance

with the recommendations of management; however, the overriding basis for the votes we cast is the best long-term interests of the Company.

Item 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

As of the close of business on December 31, 2012, the date of this filing, Mr. Jeffrey W. Priest, President, became the Chief Executive Officer and will serve as the Portfolio Manager of the registrant. He is responsible for the day-to-day management of the registrant. Mr. Priest has been employed by the registrant since October, 2010, becoming its President in February 2012. Prior thereto he was the Managing Member and President of Amajac Capital Management, LLC, an investment advisory company he founded in 1999. Mr. Priest does not provide such services for any other registered investment companies, pooled investment vehicles, or other accounts. For performing such responsibilities, Mr. Priest receives cash compensation in the form of a fixed salary and an annual performance bonus. The annual performance bonus is principally based upon the absolute performance of the registrant and its relative performance to a closed-end management investment company peer group (comprised of core equity funds) and the S&P 500 Index. Performance is evaluated in December by the Compensation Committee of the Board of Directors (the members of which are independent and consult with the full Board of Directors), based upon the registrant's net asset value return and total investment return during the twelve months ended October 31. Additional consideration is given to performance during the subsequent intervening period and to market compensation data provided by a noted industry compensation consulting firm. Mr. Priest beneficially owns in excess of \$1 million of the registrant's outstanding equity securities.

Through December 31, 2012, Spencer Davidson served as Chief Executive Officer and Portfolio Manager as he has done since 1995. He continues to serve as Chairman. Mr. Davidson does not provide such services for any other registered investment companies, pooled investment vehicles, or other accounts. For performing such responsibilities, Mr. Davison received cash compensation in the form of a fixed salary and an annual performance bonus. The annual performance bonus was principally based upon the absolute performance of the registrant and its relative performance to a closed-end management investment company peer group (comprised of core equity funds) and the S&P 500 Index. Performance was evaluated in December by the Compensation Committee of the Board of Directors (the members of which are independent and consult with the full Board of Directors), based upon the registrant's net asset value return and total investment return during the twelve months ended October 31.
