UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington D.C. 20549

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended

June 30, 2014

OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-34762

FIRST FINANCIAL BANCORP.

(Exact name of registrant as specified in its charter)

Ohio

(State or other jurisdiction of
incorporation or organization)

31-1042001

(I.R.S. Employer
Identification No.)

255 East Fifth Street, Suite 700

Cincinnati, Ohio

(Address of principal executive offices)

45202

(Zip Code)

Registrant's telephone number, including area code (877) 322-9530

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Edgar Filing: FIRST FINANCIAL BANCORP /OH/ - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of Exchange Act).
Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at August 5, 2014
Common stock, No par value	57,713,480

FIRST FINANCIAL BANCORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014
(Unaudited)

NOTE 1: BASIS OF PRESENTATION

The Consolidated Financial Statements of First Financial Bancorp. (First Financial or the Company), a bank holding company principally serving Ohio, Indiana and Kentucky, include the accounts and operations of First Financial and its wholly-owned subsidiary – First Financial Bank, N.A. (First Financial Bank or the Bank). All significant intercompany transactions and accounts have been eliminated in consolidation. Certain reclassifications of prior periods' amounts have been made to conform to the current period's presentation and had no effect on net earnings.

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP) requires management to make estimates, assumptions and judgments that affect the amounts reported in the Consolidated Financial Statements and accompanying Notes. These estimates, assumptions and judgments are inherently subjective and may be susceptible to significant change. Actual realized amounts could differ materially from these estimates.

These interim financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and serve to update the First Financial Bancorp. Annual Report on Form 10-K (Form 10-K) for the year ended December 31, 2013. These interim financial statements may not include all information and notes necessary to constitute a complete set of financial statements under GAAP applicable to annual periods and accordingly should be read in conjunction with the financial information contained in the Form 10-K. Management believes these unaudited consolidated financial statements reflect all adjustments of a normal recurring nature which are necessary for a fair presentation of the results for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the full year or any other interim period. The Consolidated Balance Sheet as of December 31, 2013 has been derived from the audited financial statements in the Company's 2013 Form 10-K.

NOTE 2: RECENTLY ADOPTED AND ISSUED ACCOUNTING STANDARDS

In January 2014, the FASB issued an update (ASU 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure) which clarifies when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be de-recognized and the real estate property recognized. The provisions of ASU 2014-04 become effective for First Financial for the interim reporting period ended March 31, 2015. First Financial does not anticipate this update will have a material impact on its Consolidated Financial Statements.

In April 2014, the FASB issued an update (ASU 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity) which redefines what constitutes a discontinued operation. Under the revised standard, a discontinued operation is a component of an entity or group of components that has been disposed of by sale, disposed of other than by sale or is classified as held for sale, that represents a strategic shift that has or will have a major effect on an entity's operations and financial results or an acquired business or nonprofit activity that is classified as held for sale on the date of the acquisition. A strategic shift that has or will have a major effect on an entity's operations and financial results could include the disposal of a major line of business, a major geographic area, a major equity method investment or other major parts of an entity. The new guidance eliminates the criteria prohibiting an entity from reporting a discontinued operation if it has certain continuing cash flows or involvement

with the component after the disposal and requires additional disclosures for discontinued operations and new disclosures for individually material disposal transactions that do not meet the definition of a discontinued operation. The provisions of ASU 2014-08 become effective for all interim and annual periods subsequent to January 1, 2015. First Financial does not anticipate this update will have a material impact on its Consolidated Financial Statements.

In May 2014, the FASB issued an update (ASU 2014-09, Revenue from Contracts with Customers) which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. Under the revised standard, an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification. Certain of the ASU's provisions also apply to transfers of nonfinancial assets, including in-substance nonfinancial assets that are not an output of an entity's ordinary activities, such as sales of property, plant, and equipment; real estate; or intangible assets. The ASU also

Table of Contents

requires significantly expanded disclosures about revenue recognition. The provisions of ASU 2014-09 become effective for interim and annual reporting periods beginning after December 15, 2016. Early application is not permitted. First Financial is currently evaluating the impact of this update on its Consolidated Financial Statements.

In June 2014, the FASB issued an update (ASU 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures) that requires repurchase-to-maturity transactions to be accounted for as secured borrowings rather than as sales with a forward repurchase commitment and eliminates current guidance on repurchase financings. The ASU requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty. If the derecognition criteria are met, the initial transfer will generally be accounted for as a sale and the repurchase agreement will generally be accounted for as a secured borrowing. The ASU requires new disclosures for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions that are accounted for as secured borrowings. The ASU also requires new disclosures for transfers of financial assets that are accounted for as sales that involve an agreement with the transferee entered into in contemplation of the initial transfer that result in the transferor retaining substantially all of the exposure to the economic return on the transferred financial assets throughout the term of the transaction. The provisions of ASU 2014-11 become effective for all interim and annual periods subsequent to December 15, 2014. Early adoption is prohibited. First Financial is currently evaluating the impact of this update on its Consolidated Financial Statements.

NOTE 3: INVESTMENTS

The following is a summary of held-to-maturity and available-for-sale investment securities as of June 30, 2014:

(Dollars in thousands)	Held-to-maturity				Available-for-sale

Gains and losses on debt securities are generally due to fluctuations in current market yields relative to the yields of the debt securities at their amortized cost. All securities with unrealized losses are reviewed quarterly to determine if any impairment is considered other than temporary, requiring a write-down to fair value. First Financial considers the percentage loss on a security, duration of the loss, average life or duration of the security, credit rating of the security as well as payment performance and the Company's intent and ability to hold the security to maturity when determining whether any impairment is other than temporary. At this time First Financial does not intend to sell, and it is not more likely than not that the Company will be required to sell debt securities temporarily impaired prior to maturity or recovery of the recorded value. First Financial had no other than temporary impairment related to its

investment securities portfolio as of June 30, 2014 or December 31, 2013.

For further detail on the fair value of investment securities, see Note 15 – Fair Value Disclosures.

Table of Contents

NOTE 4: LOANS - EXCLUDING COVERED LOANS

First Financial offers clients a variety of commercial and consumer loan and lease products with various interest rates and payment terms. Lending activities are primarily concentrated in Ohio, Indiana and Kentucky, where the Bank currently operates banking centers. Additionally, First Financial provides equipment and leasehold improvement financing for franchisees in the quick service and casual dining restaurant sector throughout the United States.

Credit Quality. To facilitate the monitoring of credit quality for commercial loans, and for purposes of determining an appropriate allowance for loan and lease losses, First Financial utilizes the following categories of credit grades:

Pass - Higher quality loans that do not fit any of the other categories described below.

Special Mention - First Financial assigns a special mention rating to loans and leases with potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or lease or in First Financial's credit position at some future date.

Substandard - First Financial assigns a substandard rating to loans or leases that are inadequately protected by the current sound financial worth and paying capacity of the borrower or of the collateral pledged, if any. Substandard loans and leases have well-defined weaknesses that jeopardize repayment of the debt. Substandard loans and leases are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not addressed.

Doubtful - First Financial assigns a doubtful rating to loans and leases with all the attributes of a substandard rating with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the credit quality of the loan or lease, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition or liquidation procedures, capital injection, perfecting liens on additional collateral and refinancing plans.

The credit grades described above, which are derived from standard regulatory rating definitions, are assigned upon initial approval of credit to borrowers and updated periodically thereafter.

First Financial considers repayment performance as the best indicator of credit quality for consumer loans. Consumer loans that have principal and interest payments that are past due by ninety days or more are generally classified as nonperforming. Additionally, consumer loans that have been modified in a troubled debt restructuring (TDR) are also classified as nonperforming.

Nonaccrual. Loans are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful or when principal or interest payments are ninety days or more past due. Generally, loans are classified as nonaccrual due to the continued failure to adhere to contractual payment terms by the borrower, coupled with other pertinent factors such as insufficient collateral value. When a loan is classified as nonaccrual, the accrual of interest income is discontinued and previously accrued, but unpaid interest is reversed. Any payments received while a loan is on nonaccrual status are applied as a reduction to the carrying value of the loan. A loan may return to accrual status if collection of future principal and interest payments is no longer doubtful.

Troubled Debt Restructurings. A loan modification is considered a TDR when two conditions are met: 1) the borrower is experiencing financial difficulty and 2) concessions are made by the Company that would not otherwise be considered for a borrower with similar credit characteristics. The most common types of modifications include interest rate reductions, maturity extensions and modifications to principal amortization, including interest only structures. Modified terms are dependent upon the financial position and needs of the individual borrower. If the modification agreement is violated, the loan is managed by the Company's credit administration group for resolution, which may result in foreclosure in the case of real estate.

TDRs are generally classified as nonaccrual for a minimum period of six months and may qualify for return to accrual status once they have demonstrated performance with the restructured terms of the loan agreement.

Table of Contents

First Financial had 240 TDRs totaling \$23.6 million at June 30, 2014, including \$12.6 million on accrual status and \$11.0 million classified as nonaccrual. First Financial had an insignificant amount of commitments outstanding to lend additional funds to borrowers whose loan terms have been modified through TDRs at June 30, 2014. At June 30, 2014, the allowance for loan and lease losses included reserves of \$2.5 million related to TDRs. For the three and six months ended June 30, 2014, First Financial charged off \$0.2 million and \$0.9 million, respectively, for the portion of TDRs determined to be uncollectible. Additionally, at June 30, 2014, approximately \$8.2 million of accruing TDRs have been performing in accordance with the restructured terms for more than one year.

First Financial had 217 TDRs totaling \$28.1 million at December 31, 2013, including \$15.1 million of loans on accrual status and \$13.0 million classified as nonaccrual. First Financial had an insignificant amount of commitments outstanding to lend additional funds to borrowers whose loan terms had been modified through TDRs. At December 31, 2013, the allowance for loan and lease losses included reserves of \$4.4 million related to TDRs. For the year ended December 31, 2013, First Financial charged off \$2.8 million for the portion of TDRs determined to be uncollectible. At December 31, 2013, approximately \$9.0 million of the accruing TDRs had been performing in accordance with the restructured terms for more than one year.

The following tables provide information on loan modifications classified as TDRs during the three and six months ended June 30, 2014 and 2013.

(Dollars in thousands)	Three months ended June 30, 2014			June 30, 2013

Total	\$ 1,668	\$ 1,519	\$ 4,214	\$ 11,999

(1) Includes covenant modifications and other concessions, or combination of concessions, that do not consist of interest rate adjustments, forbearance and maturity extensions

(2) Balances are as of period end

First Financial considers repayment performance as an indication of the effectiveness of the Company's loan modifications. Borrowers classified as a TDR that are ninety days or more past due on any principal or interest payments, or that prematurely terminate a restructured loan agreement without satisfying the contractual principal balance (for example, in a deed-in-lieu arrangement), are considered to be in payment default of the terms of the TDR agreement.

The following table provides information on TDRs for which there was a payment default during the period that occurred within twelve months of the loan modification:

(Dollars in thousands)	June 30,		2013	
	2014

Total	7	\$ 273	13	\$ 6,526

Table of Contents

Impaired Loans. Loans classified as nonaccrual and loans modified as TDRs are considered impaired. The following table provides information on nonaccrual loans, TDRs and total impaired loans.

(Dollars in thousands)	June 30, 2014	December 31, 2013
Impaired loans		
Nonaccrual loans ⁽¹⁾		
Commercial	\$7,077	\$7,934
Real estate-construction	223	223
Real estate-commercial	15,288	17,286
Real estate-residential	6,806	8,606
Installment	459	574
Home equity	2,565	2,982
Other	0	0
Nonaccrual loans ⁽¹⁾	32,418	37,605
Accruing troubled debt restructurings	12,607	15,094
Total impaired loans	\$45,025	\$52,699

(1) Nonaccrual loans include nonaccrual TDRs of \$11.0 million and \$13.0 million as of June 30, 2014 and December 31, 2013, respectively.

(Dollars in thousands)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Interest income effect on impaired loans				
Gross amount of interest that would have been recorded under original terms	\$695	\$1,135	\$1,504	\$2,257
Interest included in income				
Nonaccrual loans	86	128	161	342
Troubled debt restructurings	101	100	210	201
Total interest included in income	187	228	371	543
Net impact on interest income	\$508	\$907	\$1,133	\$1,714
Commitments outstanding to borrowers with nonaccrual loans			\$25	\$2,351

First Financial individually reviews all impaired commercial loan relationships greater than \$250,000, as well as consumer loan TDRs greater than \$100,000, to determine if a specific allowance is necessary based on the borrower's overall financial condition, resources and payment record, support from guarantors and the realizable value of any collateral. Specific allowances are based on expected cash flows, discounted using the loan's initial effective interest rate, or the fair value of the collateral for certain collateral dependent loans.

Table of Contents

NOTE 5: COVERED LOANS

Loans acquired in Federal Deposit Insurance Corporation (FDIC)-assisted transactions initially covered under loss sharing agreements whereby the FDIC will reimburse First Financial for the majority of any losses incurred are referred to as covered loans. Pursuant to the terms of each loss sharing agreement, covered loans are subject to a stated loss threshold whereby the FDIC will reimburse First Financial for 80% of losses up to the stated loss threshold and 95% of losses in excess of the threshold. These loss sharing agreements provide for partial loss protection on single-family, residential loans for a period of ten years and First Financial is required to share any recoveries of previously charged-off amounts for the same time period, on the same pro-rata basis with the FDIC. All other loans are provided loss protection for a period of five years and recoveries of previously charged-off amounts must be shared with the FDIC for an additional three year period, again on the same pro-rata basis.

The five year period of loss protection will expire for the majority of First Financial's covered commercial loans and covered OREO during the third quarter of 2014. The ten year period of loss protection on all other covered loans and covered OREO will expire during the third quarter of 2019. The expiration of loss sharing protection will result in a reclassification of loan balances in the Consolidated Balance Sheets from covered loans to uncovered loans, but will not have an effect on the accounting for these loans.

First Financial accounts for the majority of covered loans under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, except loans with revolving privileges, which are outside the scope of this guidance, and loans for which cash flows could not be estimated, which are accounted for under the cost recovery method. Loans accounted for under FASB ASC Topic 310-30 are referred to as purchased impaired loans.

Purchased impaired loans are not classified as nonperforming assets as the loans are considered to be performing under FASB ASC Topic 310-30. Therefore, interest income, through accretion of the difference between the carrying value of the loans and the expected cash flows (accretable difference) is recognized on all covered purchased impaired

loans.

17

Table of Contents

The following table reflects the carrying value of all covered loans:

	June 30, 2014			December 31, 2013		
	Loans accounted for under FASB ASC Topic 310-30	Loans excluded from FASB ASC Topic 310-30	Total covered loans	Loans accounted for under FASB ASC Topic 310-30	Loans excluded from FASB ASC Topic 310-30	Total covered loans

Balance at end of period	\$127,764	\$173,920	\$127,764	\$173,920

(1) Includes the impact of loan repayments and charge-offs

First Financial regularly reviews its forecast of expected cash flows for covered purchased impaired loans. The Company recognized improvement in the cash flow expectations related to certain loan pools resulting in the reclassification from nonaccretable to accretable difference of \$8.9 million during the second quarter of 2014 and \$22.2 million for the first six months of 2014. Conversely, First Financial recognized an \$8.5 million reclassification from accretable to nonaccretable difference during the second quarter of 2013 and \$0.7 million for the first six months of 2013. These reclassifications resulted in yield adjustments on the related loan pools on a prospective basis. For further detail on impairment and provision expense related to covered purchased impaired loans, see "Covered Loans" in Note 6 - Allowance for Loan and Lease Losses.

Table of Contents

Credit Quality. For further discussion of First Financial's monitoring of credit quality for commercial and consumer loans, including discussion of the risk attributes noted below, please see Note 4 - Loans, excluding covered loans.

Total	\$492	\$375	\$3,478	\$4,345	\$53,873	\$58,218	\$0

Nonaccrual. Covered purchased impaired loans are classified as performing, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period covered loan loss provision or prospective yield adjustments.

Similar to uncovered loans, covered loans accounted for outside FASB ASC Topic 310-30 are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful or when principal or interest payments are 90 days or more past due. Generally, loans are classified as nonaccrual due to the continued failure to adhere to contractual payment terms by the borrower coupled with other pertinent factors, such as insufficient collateral value. The accrual of interest income is discontinued and previously accrued, but unpaid interest is reversed when a loan is classified as nonaccrual. Any payments received while a loan is classified as nonaccrual are applied as a reduction to the carrying value of the loan. A loan may be returned to accrual status if collection of future principal and interest payments is no longer doubtful.

Information as to covered nonaccrual loans, excluding loans accounted for under FASB ASC Topic 310-30, was as follows:

(Dollars in thousands)	June 30, 2014	December 31, 2013
Impaired loans		
Nonaccrual loans ⁽¹⁾		
Commercial	\$884	\$540
Real estate-commercial	356	1,349

Installment	0	5

Table of Contents

Covered OREO. Covered OREO is comprised of properties acquired by the Company through the loan foreclosure or repossession process, or other resolution activities that result in partial or total satisfaction of problem covered loans. These properties remain subject to loss sharing agreements whereby the FDIC reimburses First Financial for the majority of any losses incurred.

Changes in covered OREO were as follows:

(Dollars in thousands)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Balance at beginning of period	\$23,048	\$29,345	\$27,120	\$28,862

Balance at end of period	\$19,439	\$22,475	\$19,439	\$22,475

NOTE 6: ALLOWANCE FOR LOAN AND LEASE LOSSES

Loans, excluding covered loans. For each reporting period, management maintains the allowance for loan and lease losses at a level that it considers sufficient to absorb probable loan and lease losses inherent in the portfolio. There were no material changes to First Financial's accounting policies or methodology related to the allowance for loan and lease losses during the first six months of 2014.

The allowance is increased by provision expense and decreased by actual charge-offs, net of recoveries of amounts previously charged-off. First Financial's policy is to charge-off all or a portion of a loan when, in management's opinion, it is unlikely to collect the principal amount owed in full either through payments from the borrower or from the liquidation of collateral.

Changes in the allowance for loan and lease losses were as follows:

(Dollars in thousands)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Balance at beginning of period	\$43,023	\$48,306	\$43,829	\$47,777

Covered Loans. The majority of covered loans are accounted for under FASB ASC Topic 310-30, whereby First Financial is required to periodically re-estimate the expected cash flows on the loans. First Financial updated the valuations related to covered loans during the second quarter 2014 and realized net recoveries of \$2.3 million during the quarter. As a result of improved cash flow expectations from the updated valuations as well as net charge-off activity during the period, First Financial recognized negative provision expense, or impairment recapture, of \$0.4 million during the second quarter, resulting in an allowance for covered loan losses of \$12.4 million as of June 30, 2014. First Financial recognized negative provision expense on covered loans of \$2.6 million and realized net charge-offs of \$3.9 million for the first six months of 2014. For the second quarter of 2013, First Financial recognized negative provision expense, or impairment recapture, on covered loans of \$8.3 million related to net charge-offs of \$4.3 million during the period. For the first six months of 2013, the Company recognized provision expense on covered loans of \$0.8 million and net charge-offs of \$13.0 million.

Table of Contents

First Financial recognized loss sharing expenses of \$1.5 million and \$1.6 million for the second quarters of 2014 and 2013, respectively, primarily related to attorney fees, appraisal costs and delinquent taxes. The Company also recognized losses on covered OREO of \$0.4 million for the second quarter of 2014 and gains on covered OREO of \$2.2 million for the second quarter of 2013. The net receivable due from the FDIC under loss sharing agreements related to covered loan provision expense, gains/losses on covered OREO and loss sharing expenses of \$1.1 million was recognized as FDIC loss sharing income and a corresponding increase to the FDIC indemnification asset during the second quarter of 2014. The net payable due to the FDIC under loss sharing agreements of \$7.4 million for the second quarter of 2013, was recognized as negative FDIC loss sharing income and a corresponding decrease to the FDIC indemnification asset.

On a year-to-date basis, First Financial recognized loss sharing expenses of \$3.0 million and \$3.9 million for 2014 and 2013 respectively, primarily related to attorney fees, appraisal costs and delinquent taxes. Similarly, on a year-to-date basis, First Financial recognized losses on covered OREO of \$0.4 million for 2014 and gains on covered OREO of \$2.4 million for 2013. The receivable due from the FDIC under loss sharing agreements related to covered loan provision expense, gains/losses on covered OREO and loss sharing expenses of \$0.6 million for the first six months of 2014 and \$1.6 million for the comparable period in 2013, was recognized as FDIC loss sharing income and a corresponding increase to the FDIC indemnification asset.

The allowance for loan and lease losses on covered loans is presented in the table below:

(Dollars in thousands)	June 30, 2014	December 31, 2013
Commercial	\$5,255	\$9,400
Real estate - commercial	6,195	8,515
Real estate - residential	747	761
Installment	228	225
Total	\$12,425	\$18,901

Changes in the allowance for loan and lease losses on covered loans were as follows:

Recoveries	5,750	429	6,854	1,377
Balance at end of period	\$12,425	\$32,961	\$12,425	\$32,961

NOTE 7: GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill. Assets and liabilities acquired in a business combination are recorded at their estimated fair values as of the acquisition date. The excess cost of the acquisition over the fair value of net assets acquired is recorded as goodwill. First Financial had goodwill of \$95.1 million as of June 30, 2014 and December 31, 2013.

Table of Contents

Goodwill is not amortized, but is measured for impairment on an annual basis as of October 1 of each year, or whenever events or changes in circumstances indicate that the fair value of a reporting unit may be below its carrying value. First Financial performed its most recent annual impairment test as of October 1, 2013 and no impairment was indicated. As of June 30, 2014, no events or changes in circumstances indicated that the fair value of a reporting unit was below its carrying value.

Other intangible assets. Other intangible assets consist primarily of core deposit intangibles. Core deposit intangibles represent the estimated fair value of acquired customer deposit relationships. Core deposit intangibles are recorded at their estimated fair value as of the acquisition date and are then amortized on an accelerated basis over their estimated useful lives. Core deposit intangibles were \$5.2 million and \$5.9 million as of June 30, 2014 and December 31, 2013, respectively. First Financial's core deposit intangibles have an estimated weighted average remaining life of 6.3 years. Amortization expense for the three months ended June 30, 2014 and 2013 was \$0.3 million and \$0.4 million, respectively. Amortization expense recognized on intangible assets for the six months ended June 30, 2014 and 2013 was \$0.7 million and \$0.8 million, respectively.

NOTE 8: BORROWINGS

Short-term borrowings on the Consolidated Balance Sheets include repurchase agreements utilized for corporate sweep accounts with cash management account agreements in place, overnight advances from the Federal Loan Home Bank (FHLB) and a short-term line of credit. All repurchase agreements are subject to terms and conditions of repurchase/security agreements between First Financial Bank and the client. To secure the Bank's liability to the client, First Financial Bank is authorized to sell or repurchase U.S. Treasury, government agency and mortgage-backed securities.

First Financial had \$686.3 million in short-term borrowings with the FHLB at June 30, 2014 and \$654.0 million as of December 31, 2013. These short-term borrowings are used to manage the Company's normal liquidity needs and support the Company's asset and liability management strategies.

During the second quarter of 2014, First Financial entered into a short-term credit facility with an unaffiliated bank for \$15.0 million. This facility can have a variable or fixed interest rate and provides First Financial additional liquidity, if needed, for various corporate activities, including the repurchase of First Financial shares and the payment of dividends to shareholders. As of June 30, 2014, there was no outstanding balance. The credit agreement requires First Financial to maintain certain covenants related to asset quality and capital levels. First Financial was in compliance with all covenants associated with this line of credit as of June 30, 2014.

Long-term debt primarily consists of FHLB long-term advances and repurchase agreements utilizing investment securities pledged as collateral. These instruments are primarily utilized to reduce overnight liquidity risk and to mitigate interest rate sensitivity on the Consolidated Balance Sheets. First Financial has \$52.5 million in repurchase agreements which have remaining maturities of less than 2 years and a weighted average rate of 3.49%. Securities pledged as collateral in conjunction with the repurchase agreements are included within Investment securities on the Consolidated Balance Sheets.

The following is a summary of long-term debt:

(Dollars in thousands)	June 30, 2014		December 31, 2013		
	Amount	Average rate	Amount	Average rate	
Federal Home Loan Bank	\$6,418	3.71	% \$7,505	3.72	%
National Market Repurchase Agreement	52,500	3.49	% 52,500	3.49	%
Capital loan with municipality	775	0.00	% 775	0.00	%
Total long-term debt	\$59,693	3.47	% \$60,780	3.48	%

Under Federal Reserve Board guidelines, a company can issue qualifying debentures up to 25% of qualifying Tier I capital. First Financial has the capacity to issue approximately \$161.3 million in additional qualifying debentures under these guidelines.

Total reclassifications for the period, before tax	\$(495)	\$(4,815)	\$(938)	\$(4,060)	

(1) Negative amount are reductions to net income.

(2) Included in the computation of net periodic pension cost (see Note 13 - Employee Benefit Plans for additional details).

NOTE 10: DERIVATIVES

First Financial uses derivative instruments, including interest rate caps, floors and swaps, to meet the needs of its clients while managing the interest rate risk associated with certain transactions. First Financial primarily utilizes

interest rate swaps as a means to offer borrowers credit-based products that meet their needs and may from time to time utilize interest rate swaps to manage the interest rate risk profile of the Company. First Financial does not use derivatives for speculative purposes.

Interest rate swap agreements establish the basis on which interest rate payments are exchanged with counterparties, referred to as the notional amount. As only interest rate payments are exchanged, the cash requirements and credit risk associated with interest rate swaps are significantly less than the notional amount and the Company's credit risk exposure is limited to the market value of the instruments. First Financial manages this market value credit risk through counterparty credit policies. These policies require the Company to maintain a total derivative notional position of less than 35% of assets, total credit exposure of less than 3% of capital and no single counterparty credit risk exposure greater than \$20.0 million. The Company is currently well below all single counterparty and portfolio limits. At June 30, 2014, the Company had a total counterparty notional amount outstanding of approximately \$649.0 million, spread among nine counterparties, with an outstanding liability from these contracts of \$12.3 million. At December 31, 2013, the Company had a total counterparty notional amount outstanding of approximately \$561.6 million, spread among nine counterparties, with an outstanding liability from these contracts of \$9.3 million.

Table of Contents

First Financial's exposure to credit loss, in the event of nonperformance by a borrower, is limited to the market value of the derivative instrument associated with that borrower. First Financial monitors its derivative credit exposure to borrowers by monitoring the creditworthiness of the related loan customers through the normal credit review processes the Company performs on all borrowers. Additionally, the Company monitors derivative credit risk exposure related to problem loans through the Company's allowance for loan and lease losses committee. First Financial considers the market value of a derivative instrument to be part of the carrying value of the related loan for these purposes as the borrower is contractually obligated to pay First Financial this amount in the event the derivative contract is terminated.

Fair Value Hedges. First Financial utilizes interest rate swaps designated as fair value hedges as a means to offer commercial borrowers fixed rate funding while providing the Company with floating rate assets. The following table details the location and amounts recognized in the Consolidated Balance Sheets for fair value hedges:

(Dollars in thousands)	Balance sheet location	June 30, 2014			December 31, 2013		
		Notional amount	Estimated fair value		Notional amount	Estimated fair value	
			Gain	Loss		Gain	Loss
Fair value hedges - instruments associated with loans							
Pay fixed interest rate swaps with counterparty	Accrued interest and other liabilities	\$9,445	\$0	\$(676)	\$9,836	\$0	\$(865)
Matched interest rate swaps with borrower	Accrued interest and other assets	414,303	11,976	(702)	451,744	11,710	(1,767)
Matched interest rate swaps with counterparty	Accrued interest and other liabilities	414,303	702	(12,085)	451,744	1,767	(11,799)
Total		\$838,051	\$12,678	\$(13,463)	\$913,324	\$13,477	\$(14,431)

In connection with its use of derivative instruments, First Financial and its counterparties are required to post cash collateral to offset the market position of the derivative instruments under certain conditions. First Financial maintains the right to offset these derivative positions with the collateral posted against them by or with the relevant counterparties. First Financial classifies the derivative cash collateral outstanding with its counterparties as an adjustment to the fair value of the derivative contracts within Accrued interest and other assets or Accrued interest and other liabilities in the Consolidated Balance Sheets.

The following table discloses the gross and net amounts of liabilities recognized in the Consolidated Balance Sheets:

(Dollars in thousands)	June 30, 2014			December 31, 2013		
	Gross amounts of recognized liabilities	Gross amounts offset in the Consolidated Balance Sheets	Net amounts of liabilities presented in the Consolidated Balance Sheets	Gross amounts of recognized liabilities	Gross amounts offset in the Consolidated Balance Sheets	Net amounts of liabilities presented in the Consolidated Balance Sheets
Fair value hedges						
Pay fixed interest rate swaps with counterparty	\$676	\$0	\$676	\$865	\$(663)	\$202
Matched interest rate swaps with counterparty	12,787	(12,430)	357	13,566	(9,533)	4,033

Total \$13,463 \$(12,430) \$1,033 \$14,431 \$(10,196) \$4,235

Table of Contents

The following table details the derivative financial instruments, the average remaining maturities and the weighted-average interest rates being paid and received by First Financial at June 30, 2014:

(Dollars in thousands)	Notional amount	Average maturity (years)	Fair value	Weighted-average rate		
				Receive	Pay	
Asset conversion swaps						
Pay fixed interest rate swaps with counterparty	\$9,445	2.6	\$(676)	2.12	6.85	%
Receive fixed, matched interest rate swaps with borrower	414,303	4.1	11,274	4.83	2.80	%
Pay fixed, matched interest rate swaps with counterparty	414,303	4.1	(11,383)	2.80	4.83	%
Total asset conversion swaps	\$838,051	4.1	\$(785)	3.79	3.85	%

Cash Flow Hedges. First Financial utilizes interest rate swaps designated as cash flow hedges to hedge against interest rate volatility on indexed floating rate deposits, totaling \$200.0 million as of June 30, 2014 and \$100.0 million as of December 31, 2013. These interest rate swaps qualify for hedge accounting and involve the receipt by First Financial of variable-rate interest amounts in exchange for fixed-rate interest payments by First Financial and have a remaining weighted average term of approximately 5 years. Accrued interest and other liabilities included \$1.0 million at June 30, 2014 while accrued interest and other assets included \$0.8 million at December 31, 2013, reflecting the fair value of these cash flow hedges.

Credit Derivatives. In conjunction with participating interests in commercial loans, First Financial periodically enters into risk participation agreements with other counterparties whereby First Financial assumes a portion of the credit exposure associated with an interest rate swap on the participated loan in exchange for a fee. Under these agreements, First Financial will make payments to the counterparty if the loan customer defaults on its obligation to perform under the interest rate swap contract with the counterparty. The total notional value of these agreements totaled \$25.3 million as of June 30, 2014 and \$13.3 million as of December 31, 2013, and the fair value of those agreements resulted in a \$0.1 million and \$28.0 thousand liability recorded on the Consolidated Balance Sheets at June 30, 2014 and December 31, 2013, respectively.

NOTE 11: INCOME TAXES

For the second quarter 2014, income tax expense was \$8.0 million, resulting in an effective tax rate of 33.3%, compared with income tax expense of \$6.5 million and an effective tax rate of 29.0% for the comparable period in 2013. For the first six months of 2014, income tax expense was \$15.0 million, resulting in an effective tax rate of 32.6%, compared with income tax expense of \$12.8 million, and an effective tax rate of 30.2% for the comparable period in 2013. The increase in the effective tax rate for the second quarter 2014 and the six months ended June 30, 2014, as compared to the same periods in 2013, was primarily the result of a favorable tax reversal related to an intercompany tax obligation associated with an unconsolidated former Irwin subsidiary and a favorable change in state tax laws in 2013, partially offset by higher tax-exempt income earned in 2014.

First Financial had no FASB ASC Topic 740-10 unrecognized tax benefits recorded at June 30, 2014, and December 31, 2013. Further, the Company does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months.

First Financial regularly reviews its tax positions and establishes reserves for income tax-related uncertainties based on estimates of whether it is more likely than not that the tax uncertainty would be sustained upon challenge by the

appropriate tax authorities, which would then result in additional taxes, penalties and interest due. Management determined that no reserve for income tax-related uncertainties was necessary as of June 30, 2014 and December 31, 2013.

First Financial and its subsidiaries are subject to U.S. federal income tax as well as state and local income tax in several jurisdictions. Tax years prior to 2010 have been closed and are no longer subject to U.S. federal income tax examinations. Tax years 2010 through 2013 remain open to examination by the federal taxing authority. First Financial is no longer subject to state and local income tax examinations for years prior to 2009. Tax years 2009 through 2013 remain open to state and local examination in various jurisdictions.

Table of Contents

NOTE 12: COMMITMENTS AND CONTINGENCIES

In the normal course of business, First Financial offers a variety of financial instruments with off-balance-sheet risk to assist clients in meeting their requirements for liquidity and credit enhancement. These financial instruments include standby letters of credit and outstanding commitments to extend credit. GAAP does not require these financial instruments to be recorded in the Consolidated Financial Statements.

First Financial's exposure to credit loss, in the event of nonperformance by the other party to the financial instrument for standby letters of credit, and outstanding commitments to extend credit, is represented by the contractual amounts of those instruments. First Financial uses the same credit policies in issuing commitments and conditional obligations as it does for credit instruments recorded on the Consolidated Balance Sheets.

Letters of credit. Letters of credit are conditional commitments issued by First Financial to guarantee the performance of a client to a third party. First Financial's portfolio of standby letters of credit consists primarily of performance assurances made on behalf of clients who have a contractual commitment to produce or deliver goods or services. The risk to First Financial arises from its obligation to make payment in the event of the client's contractual default to produce the contracted good or service to a third party. First Financial issued letters of credit (including standby letters of credit) aggregating \$18.2 million and \$14.0 million at June 30, 2014, and December 31, 2013, respectively. Management conducts regular reviews of these instruments on an individual client basis.

Loan commitments. Loan commitments are agreements to extend credit to a client as long as there is no violation of any condition established in the commitment agreement. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if deemed necessary by First Financial upon extension of credit, is based on management's credit evaluation of the client. The collateral held varies, but may include securities, real estate, inventory, plant or equipment. First Financial had commitments outstanding to extend credit totaling \$1.5 billion and \$1.4 billion at June 30, 2014 and December 31, 2013, respectively.

First Financial utilizes the allowance for loan and lease losses methodology to maintain a reserve that it considers sufficient to absorb probable losses inherent in standby letters of credit and outstanding loan commitments and records the reserve within Accrued interest and other liabilities on the Consolidated Balance Sheets.

Contingencies/Litigation. First Financial and its subsidiaries are engaged in various matters of litigation, other assertions of improper or fraudulent loan practices or lending violations and other matters from time to time, and have a number of unresolved claims pending. Additionally, as part of the ordinary course of business, First Financial and its subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral and foreclosure interests that are incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, First Financial believes that damages, if any, and other amounts relating to pending matters are not probable or cannot be reasonably estimated as of June 30, 2014. Reserves are established for these various matters of litigation, when appropriate, under FASB ASC Topic 450, Contingencies, based in part upon the advice of legal counsel.

NOTE 13: EMPLOYEE BENEFIT PLANS

First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees and uses a December 31 measurement date for the plan.

First Financial made no cash contributions to fund the pension plan during the six months ended June 30, 2014 and does not expect to make cash contributions to the plan through the remainder of the year. First Financial made no cash contributions to fund the pension plan in 2013. As a result of the plan's actuarial projections for 2014, First Financial recorded income related to its pension plan of \$0.5 million for the six months ended June 30, 2014 and \$0.3 million for the second quarter of 2014.

As a result of lump sum distributions from the pension plan during the first half of 2013, First Financial was required to re-measure the plan's assets and liabilities and recognized \$4.3 million of pension settlement charges during the second quarter of 2013. Consistent with FASB ASC Topic 715, Compensation - Retirement Benefits, pension settlement charges are an acceleration of previously deferred costs that would have been recognized in future periods and are triggered when lump sum distributions exceed an annual accounting threshold for the plan. Associates are eligible to request a lump sum distribution from the Company's pension plan at retirement or upon leaving the Company. As a result of the pension plan re-measurement

Table of Contents

and pension settlement charges, First Financial recorded \$17.4 million of pre-tax adjustments to other comprehensive income related to changes in the values of the Company's plan assets and pension obligations for the six months ended June 30, 2013.

Including the pension settlement charges discussed above as well as the impact of the plan's updated actuarial projections, First Financial recorded expenses related to its pension plan of \$4.2 million for the six months and three months ended June 30, 2013.

The accounting threshold for lump sum distributions from the plan reset on January 1, 2014. However, the Company could incur pension settlement charges again if lump sum distributions exceed the annual accounting threshold in future periods. Associates are eligible to request a lump sum distribution from the Company's pension plan at retirement or upon leaving the Company.

The following table sets forth information concerning amounts recognized in First Financial's Consolidated Statements of Income related to the Company's pension plan:

(Dollars in thousands)	Three months ended		Six months ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Service cost	\$1,041	\$898	\$2,082	\$1,873
Interest cost	620	567	1,240	1,186
Expected return on assets	(2,292) (2,230) (4,584) (4,524
Amortization of prior service cost	(103) (107) (206) (212
Net actuarial loss	482	726	963	1,546
Settlement charge	0	4,316	0	4,316
Net periodic benefit (income) cost	\$(252) \$4,170	\$(505) \$4,185

NOTE 14: EARNINGS PER COMMON SHARE

The following table sets forth the computation of basic and diluted earnings per share:

(Dollars in thousands, except per share data)	Three months ended		Six months ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Numerator				
Net income available to common shareholders	\$15,953	\$15,829	\$31,057	\$29,653
Denominator				
Basic earnings per common share - weighted average shares	57,201,494	57,291,994	57,146,853	57,365,105
Effect of dilutive securities —				
Employee stock awards	613,919	735,440	602,863	739,927
Warrants	136,223	100,915	140,552	101,471
Diluted earnings per common share - adjusted weighted average shares	57,951,636	58,128,349	57,890,268	58,206,503
Earnings per share available to common shareholders				
Basic	\$0.28	\$0.28	\$0.54	\$0.52
Diluted	\$0.28	\$0.27	\$0.54	\$0.51

Warrants to purchase 465,117 shares of the Company's common stock were outstanding as of June 30, 2014 and 2013. These warrants, each representing the right to purchase one share of common stock, no par value per share, have an exercise price of \$12.12 and expire on December 23, 2018.

Table of Contents

Stock options and warrants, where the exercise price was greater than the average market price of the common shares, were not included in the computation of net income per diluted share as they would have been antidilutive. These out-of-the-money options were 174,426 and 654,616 at June 30, 2014 and 2013, respectively.

During the second quarter of 2014, the Company received shareholder authorization to issue up to 10,000,000 preferred shares. As of June 30, 2014, no preferred shares were issued or outstanding.

NOTE 15: FAIR VALUE DISCLOSURES

Fair Value Measurement

The fair value framework as disclosed in the Fair Value Measurements and Disclosure Topic of FASB ASC Topic 825, Financial Instruments (Fair Value Topic) includes a hierarchy which focuses on prioritizing the inputs used in valuation techniques. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), a lower priority to observable inputs other than quoted prices in active markets for identical assets and liabilities (Level 2) and the lowest priority to unobservable inputs (Level 3). When determining the fair value measurements for assets and liabilities, First Financial looks to active markets to price identical assets or liabilities whenever possible and classifies such items in Level 1. When identical assets and liabilities are not traded in active markets, First Financial looks to observable market data for similar assets and liabilities and classifies such items as Level 2. Certain assets and liabilities are not actively traded in observable markets and First Financial must use alternative techniques, based on unobservable inputs, to determine the fair value and classifies such items as Level 3. The level within the fair value hierarchy is based on the lowest level of input that is significant in the fair value measurement.

The following methods, assumptions and valuation techniques were used by First Financial to measure different financial assets and liabilities at fair value and in estimating its fair value disclosures for financial instruments.

Cash and short-term investments. The carrying amounts reported in the Consolidated Balance Sheets for cash and short-term investments, such as federal funds sold, approximated the fair value of those instruments. The Company classifies cash and short-term investments in Level 1 of the fair value hierarchy.

Investment securities. Investment securities classified as trading and available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar investment securities. First Financial compiles prices from various sources who may apply such techniques as matrix pricing to determine the value of identical or similar investment securities (Level 2). Matrix pricing is a mathematical technique widely used in the banking industry to value investment securities without relying exclusively on quoted prices for the specific investment securities but rather relying on the investment securities' relationship to other benchmark quoted investment securities. Any investment securities not valued based upon the methods above are considered Level 3.

First Financial utilizes information provided by a third-party investment securities administrator in analyzing the investment securities portfolio in accordance with the fair value hierarchy of the Fair Value Topic. The administrator's evaluation of investment security portfolio pricing is performed using a combination of prices and data from other sources, along with internally developed matrix pricing models and assistance from the administrator's internal fixed income analysts and trading desk. The administrator's month-end pricing process includes a series of quality assurance activities where prices are compared to recent market conditions, previous evaluation prices and between the various pricing services. These processes produce a series of quality assurance reports on which price exceptions are identified, reviewed and where appropriate, securities are repriced. In the event of a materially different price, the administrator will report the variance as a "price challenge" and review the pricing methodology in detail. The results of

the quality assurance process are incorporated into the selection of pricing providers by the portfolio manager.

First Financial reviews the pricing methodologies utilized by the administrator to ensure the fair value determination is consistent with the applicable accounting guidance and that the investments are properly classified in the fair value hierarchy. Further, the Company periodically validates the fair values for a sample of securities in the portfolio by comparing the fair values provided by the administrator to prices from other independent sources for the same or similar securities. First Financial analyzes unusual or significant variances, conducts additional research with the administrator, if necessary, and takes appropriate action based on its findings.

Loans held for sale. Loans held for sale are carried at the lower of cost or fair value. These loans currently consist of one-to-four family residential real estate loans originated for sale to qualified third parties. Fair value is based on the contractual price to be received from these third parties, which is not materially different than cost due to the short duration between origination

Table of Contents

and sale (Level 2). As such, First Financial records any fair value adjustments on a nonrecurring basis. Gains and losses on the sale of loans are recorded as net gains from sales of loans within noninterest income in the Consolidated Statements of Income.

Loans - excluding covered loans. The fair value of commercial, commercial real estate, residential real estate and consumer loans were estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or repricing frequency. The Company classifies the estimated fair value of uncovered loans as Level 3 in the fair value hierarchy.

Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. Impaired loans are valued at the lower of cost or fair value for purposes of determining the appropriate amount of impairment to be allocated to the allowance for loan and lease losses. Fair value is generally measured based on the value of the collateral securing the loans. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed third party appraiser (Level 3). The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable borrower financial statements if not considered significant. Likewise, values for inventory and accounts receivable collateral are based on borrower financial statement balances or aging reports on a discounted basis as appropriate (Level 3). Impaired loans allocated to the allowance for loan and lease losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan and lease losses on the Consolidated Statements of Income.

Covered loans. Fair values for covered loans accounted for under FASB ASC Topic 310-30 are based on a discounted cash flow methodology that considers factors including the type of loan and related collateral, classification status, fixed or variable interest rate, term of the loan and whether or not the loan was amortizing and a discount rate reflecting the Company's assessment of risk inherent in the cash flow estimates. These covered loans are grouped together according to similar characteristics and were treated in the aggregate when applying various valuation techniques. First Financial estimated the cash flows expected to be collected on these loans based upon the expected remaining life of the underlying loans, which includes the effects of estimated prepayments. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change.

Fair values for covered loans accounted for outside of FASB ASC Topic 310-30 were estimated by discounting the future cash flows using current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or repricing frequency. The carrying amount of accrued interest approximates its fair value.

The Company classifies the estimated fair value of covered loans as Level 3 in the fair value hierarchy.

FDIC indemnification asset. Fair value of the FDIC indemnification asset was estimated using projected cash flows related to the loss sharing agreements based on the expected reimbursements for losses and the applicable loss sharing percentages. The expected cash flows are discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change, and may be impacted by the relatively short remaining term of loss sharing coverage on covered commercial assets. The five year period of loss protection will expire for the majority of First Financial's covered commercial loans and covered OREO during the third quarter of 2014. The Company classifies the estimated fair value of the indemnification asset as Level 3 in the fair value hierarchy.

Deposits. The fair value of demand deposits, savings accounts and certain money-market deposits was the amount payable on demand at the reporting date. The carrying amounts for variable-rate certificates of deposit approximated their fair values at the reporting date. The fair value of fixed-rate certificates of deposit was estimated using a discounted cash flow calculation which applies the interest rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest approximates its fair value. The Company classifies the estimated fair value of deposit liabilities as Level 2 in the fair value hierarchy.

Borrowings. The carrying amounts of federal funds purchased and securities sold under agreements to repurchase and other short-term borrowings approximate their fair values. The Company classifies the estimated fair value of short-term borrowings as Level 1 of the fair value hierarchy.

The fair value of long-term debt is estimated using a discounted cash flow calculation which utilizes the interest rates currently offered for borrowings of similar remaining maturities. Third-party valuations are used for long-term debt with embedded

Table of Contents

options, such as call features. The Company classifies the estimated fair value of long-term debt as Level 2 in the fair value hierarchy.

Commitments to extend credit and standby letters of credit. Pricing of these financial instruments is based on the credit quality and relationship, fees, interest rates, probability of funding and compensating balance and other covenants or requirements. Loan commitments generally have fixed expiration dates, are variable rate and contain termination and other clauses which provide for relief from funding in the event that there is a significant deterioration in the credit quality of the client. Many loan commitments are expected to expire without being drawn upon. The rates and terms of the commitments to extend credit and the standby letters of credit are competitive with those in First Financial's market area. The carrying amounts are reasonable estimates of the fair value of these financial instruments. Carrying amounts, which are comprised of the unamortized fee income and, where necessary, reserves for any expected credit losses from these financial instruments, are immaterial.

Derivatives. The fair values of derivative instruments are based primarily on a net present value calculation of the cash flows related to the derivative instruments at the reporting date, using primarily observable market inputs such as interest rate yield curves. The discounted net present value calculated represents the cost to terminate the derivative instrument if First Financial should choose to do so. Additionally, First Financial utilizes the allowance for loan and lease losses methodology to value the credit risk component of both the derivative assets and liabilities. The credit valuation adjustment is recorded as an adjustment to the fair value of the derivative asset or liability on the reporting date. Derivative instruments are classified as Level 2 in the fair value hierarchy.

The estimated fair values of First Financial's financial instruments not measured at fair value on a recurring or nonrecurring basis in the consolidated financial statements were as follows:

(1) Amounts represent the impact of legally enforceable master netting arrangements that allow First Financial to settle positive and negative positions and also cash collateral held with the same counterparties.

Certain financial assets and liabilities are measured at fair value on a nonrecurring basis. Adjustments to the fair market value of these assets usually result from the application of lower of cost or fair value accounting or write-downs of individual assets. The following table summarizes financial assets and liabilities measured at fair value on a nonrecurring basis.

ITEM 2-MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS (MD&A)
FIRST FINANCIAL BANCORP. AND SUBSIDIARIES
(Unaudited)

Reclassifications of prior period amounts, if applicable, have been made to conform to the current period's presentation and had no effect on previously reported net income amounts or financial condition.

SUMMARY

First Financial Bancorp. (First Financial or the Company) is a \$6.5 billion bank holding company headquartered in Cincinnati, Ohio. First Financial, through its subsidiaries, operates primarily in Ohio, Indiana and Kentucky. These subsidiaries include a commercial bank, First Financial Bank, N.A. (First Financial Bank or the Bank) with 105 banking centers and 128 ATMs. First Financial provides banking and financial services products through its four lines of business: commercial, consumer, wealth management and mortgage. The commercial, consumer and mortgage business lines provide credit-based products, deposit accounts, retail brokerage, corporate cash management support and other services to commercial and consumer clients. The Bank also provides lending products, primarily equipment and leasehold improvement financing, for select concepts and franchisees in the quick service and casual dining restaurant sector throughout the United States. First Financial Wealth Management provides wealth planning, portfolio management, trust and retirement plan services and had approximately \$2.5 billion in assets under management as of June 30, 2014.

First Financial acquired the banking operations of Peoples Community Bank (Peoples), and Irwin Union Bank and Trust Company and Irwin Union Bank, F.S.B. (collectively, Irwin), through Federal Deposit Insurance Corporation (FDIC)-assisted transactions in 2009. In connection with these FDIC-assisted transactions, First Financial entered into loss sharing agreements with the FDIC. Under the terms of these agreements the FDIC reimburses First Financial for a percentage of losses with respect to certain loans (covered loans) and other real estate owned (covered OREO) (collectively, covered assets). These agreements provide for loss protection on covered single-family, residential loans for a period of ten years and First Financial is required to share any recoveries of previously charged-off amounts for the same time period, on the same pro-rata basis with the FDIC. All other covered loans are provided loss protection for a period of five years and recoveries of previously charged-off amounts must be shared with the FDIC for an additional three year period, on the same pro-rata basis. The five year period of loss protection will expire for the majority of First Financial's covered commercial loans and covered OREO during the third quarter of 2014. The ten year period of loss protection on all other covered loans and covered OREO will expire during the third quarter of 2019. Covered assets represent approximately 5.9% of First Financial's total assets at June 30, 2014.

MARKET STRATEGY AND BUSINESS COMBINATIONS

On December 17, 2013, First Financial and First Financial Bank entered into a definitive merger agreement with The First Bexley Bank (First Bexley). Founded in 2006 and conducting operations out of one full service branch location in Bexley, Ohio, First Bexley serves commercial and consumer clients throughout Columbus and central Ohio. Under the merger agreement, First Financial will acquire First Bexley in a cash and stock transaction in which First Bexley will merge with and into First Financial Bank. Shareholders of First Bexley will receive \$30.50 for each share of First Bexley common stock consisting of \$24.40 in the Company's common stock and \$6.10 in cash, subject to certain adjustment depending upon changes in the price of the Company's common stock. Including outstanding options on First Bexley common stock, the transaction is valued at approximately \$44.5 million. As of June 30, 2014, First Bexley had total assets of \$330.4 million, total loans of \$303.1 million, total deposits of \$262.9 million and total common shareholders' equity of \$24.9 million.

On December 19, 2013, First Financial and First Financial Bank signed a definitive merger agreement with Insight Bank (Insight). Founded in 2006 and conducting operations out of one full service location in Worthington, Ohio, and a mortgage origination office in Newark, Ohio, Insight provides commercial and consumer banking services to clients throughout Columbus and central Ohio. Under the merger agreement, First Financial will acquire Insight in a cash and stock transaction in which Insight will merge with and into First Financial Bank. Shareholders of Insight will receive \$20.50 for each share of Insight common stock consisting of \$16.40 in the Company's common stock and \$4.10 in cash, subject to certain adjustment depending upon changes in the price of the Company's common stock. Including outstanding options on Insight common stock, the transaction is valued at approximately \$36.6 million. As of June 30, 2014, Insight had total assets of \$249.6 million, total loans of \$210.9 million, total deposits of \$180.2 million and total common shareholders' equity of \$20.8 million.

On April 29, 2014, First Financial entered into a definitive merger agreement with Guernsey Bancorp, Inc. (Guernsey). Additionally, The Guernsey Bank, an Ohio state chartered bank and wholly owned subsidiary of Guernsey, will merge with and into First Financial Bank. Headquartered in Worthington, Ohio, Guernsey conducts operations out of three full service

Table of Contents

branches and serves commercial and consumer clients throughout Columbus and central Ohio. Under the terms of the merger agreements, First Financial will acquire Guernsey for cash consideration of \$13.5 million and the transfer of a single bank-owned property with a book value of \$1.0 million to Guernsey's sole shareholder. As of June 30, 2014, The Guernsey Bank had total assets of \$120.8 million, total loans of \$72.5 million, total deposits of \$98.6 million and total common shareholders' equity of \$8.6 million.

The First Bexley, Insight and Guernsey acquisitions will provide First Financial an entrance into the Columbus, Ohio market, and introduce the Company's diverse product set to commercial and consumer clients of those institutions. When completed, these acquisitions will position First Financial as the largest community bank serving Franklin County in the metropolitan Columbus market. The First Bexley and Insight acquisitions received approval from their respective shareholders in May 2014. Regulatory approval was received for First Bexley, Insight and Guernsey in July 2014 and the transactions are expected to close during the third quarter 2014.

In addition to the Columbus acquisitions discussed above, First Financial also entered the Fort Wayne, Indiana market through the hiring of experienced and well-established commercial and residential mortgage lending teams in January of 2014. On a combined basis, these actions provide First Financial entrance into two new metropolitan markets that it believes have attractive demographics and future growth prospects.

As part of the on-going evaluation of its banking center network, First Financial consolidated one banking center located in Indiana during the second quarter 2014. Customer relationships related to the consolidated banking center were transferred to the nearest First Financial location where those customers continue to receive the same high level of service.

OVERVIEW OF OPERATIONS

Second quarter 2014 net income was \$16.0 million and earnings per diluted common share were \$0.28. This compares with second quarter 2013 net income of \$15.8 million and earnings per diluted common share of \$0.27. For the six months ended June 30, 2014, net income was \$31.1 million, and earnings per diluted common share were \$0.54. This compares with net income of \$29.7 million and earnings per diluted common share of \$0.51 for the first six months of 2013.

Return on average assets for the second quarter 2014 was 0.99% compared to 1.01% for the comparable period in 2013. Return on average shareholders' equity for the second quarter 2014 was 9.19% compared to 9.02% for the comparable period in 2013. Return on average assets for the six months ended June 30, 2014 was 0.97% compared to 0.94% for the same period in 2013. Return on average shareholders' equity was 9.07% and 8.47% for the same periods in 2014 and 2013, respectively.

A discussion of First Financial's results of operations for the three and six months ended June 30, 2014 follows.

NET INTEREST INCOME

Net interest income, First Financial's principal source of income, is the excess of interest received from earning assets over interest paid on interest-bearing liabilities, plus fees for financial services provided to clients. The amount of net interest income is determined by the volume and mix of earning assets, the rates earned on such earning assets and the volume, mix and rates paid for the deposits and borrowed money that support the earning assets.

For analytical purposes, net interest income is also presented in the table that follows, adjusted to a tax equivalent basis assuming a 35% marginal tax rate for interest earned on tax-exempt assets such as municipal loans and investments. This is to recognize the income tax savings that facilitates a comparison between taxable and tax-exempt

assets. Management believes that it is a standard practice in the banking industry to present net interest margin and net interest income on a fully tax equivalent basis as these measures provide useful information to make peer comparisons.

38

Table of Contents

(Dollars in thousands)	Three months ended		Six months ended		
	June 30, 2014	2013	June 30, 2014	2013	
Net interest income	\$54,304	\$58,078	\$109,123	\$116,744	
Tax equivalent adjustment	758	514	1,460	991	
Net interest income - tax equivalent	\$55,062	\$58,592	\$110,583	\$117,735	
Average earning assets	\$5,880,933	\$5,791,715	\$5,851,197	\$5,839,497	
Net interest margin ⁽¹⁾	3.70	% 4.02	% 3.76	% 4.03	%
Net interest margin (fully tax equivalent) ⁽¹⁾	3.76	% 4.06	% 3.81	% 4.07	%

(1) Margins are calculated using annualized net interest income divided by average earning assets.

Net interest income for the second quarter 2014 was \$54.3 million, declining \$3.8 million or 6.5% from second quarter 2013 net interest income of \$58.1 million. Net interest income on a fully tax-equivalent basis for the second quarter 2014 was \$55.1 million compared to \$58.6 million for the second quarter 2013. Net interest margin was 3.70% for the second quarter 2014 compared to 4.02% for the second quarter 2013. The declines in net interest income and net interest margin were primarily related to changes in the composition of the Company's earning assets, including the continued decline in the covered loan portfolio, as well as the prolonged low interest rate environment.

The decline in net interest income for the second quarter 2014, as compared to the second quarter 2013, was the result of a \$3.6 million or 5.8% decrease in total interest income to \$58.7 million in the second quarter of 2014 from \$62.3 million in the second quarter 2013. Also contributing to the decline in net interest income was a \$0.2 million or 4.2% increase in total interest expense to \$4.4 million in the second quarter 2014 from \$4.2 million in the second quarter 2013.

The decline in total interest income resulted from a decrease in interest income and fees earned on loans, primarily as a result of continued paydowns and resolutions in the Company's high-yielding covered loan portfolio, as well as declining portfolio and new origination loan yields. The average balance of covered loans for the second quarter 2014 declined \$266.3 million or 40.7% compared to the second quarter 2013, contributing to the lower interest income earned on covered loans and the related decline in net interest margin. Declines in covered loan balances are a result of payments received, including full payoffs, charge-offs and other loan resolution activities.

The decline in covered loan balances was partially offset by growth in lower yielding assets as average uncovered loan balances increased \$335.0 million or 10.2% from the second quarter of 2013 as a result of strong new loan origination activity in recent periods. However, as a result of the low interest rate environment, new loan originations continue to be recorded at yields significantly lower than the yields on loans that pay off or mature during the period, muting the impact of increased balances on interest income and net interest margin.

The decline in interest income and fees earned on loans was partially offset by higher interest income earned on investment securities during the second quarter 2014. The average balance of investment securities increased \$106.0 million or 6.2% in the second quarter 2014 as compared to the second quarter 2013 and the average yield on investment securities increased 39 bps, to 2.47% in the second quarter 2014 from 2.08% in the second quarter 2013. The increased yield on investment securities is primarily related to higher reinvestment rates and continued stabilization in premium amortization.

Interest expense increased as the average balance of interest-bearing deposits increased \$39.4 million or 1.0% while the cost of funds related to these deposits increased 3 bps to 38 bps for the second quarter 2014 from 35 bps for the comparable quarter in 2013, negatively impacting net interest margin. Interest expense benefited from a decrease in

average long-term borrowings of \$14.3 million or 19.3% from June 30, 2013 to June 30, 2014, which was primarily due to the maturity of a single agreement during the second half of 2013.

For the six month period ended June 30, 2014, net interest income was \$109.1 million, a decline of \$7.6 million, from \$116.7 million for the comparable period in 2013. Net interest income on a fully tax-equivalent basis for the period ended June 30, 2014 was \$110.6 million as compared to \$117.7 million for the comparable period in 2013. Similar to the quarterly year-over-year items discussed above, these declines were primarily related to lower interest income due to covered loan runoff and declining yields on recent loan originations, partially offset by higher investment portfolio balances and yields. Lower interest income was partially offset by a \$0.5 million, or 5.4% decline in interest expense during the six months ended June 30, 2014 as

Table of Contents

compared to the six months ended June 30, 2013. The decline in interest expense for the six month period ended June 30, 2014 was primarily related to a decline in average interest-bearing deposits of \$25.1 million, or 0.7% when compared to the similar period in 2013, as well as a decline in the cost of funds related to those deposits of 1 bp from 38 bps in 2013 to 37 bps in 2014.

NONINTEREST INCOME

Second quarter 2014 noninterest income was \$16.3 million, representing a \$4.7 million or 40.7% increase from noninterest income of \$11.6 million in the second quarter 2013. The increase in noninterest income from the comparable quarter in 2013 was due primarily to an \$8.5 million increase in FDIC loss sharing income, partially offset

by a \$1.3 million decline in accelerated discount on covered loans and a \$1.3 million decline in other noninterest income.

FDIC loss sharing income represents the proportionate share of credit losses on covered assets that First Financial expects to receive from the FDIC. FDIC loss sharing income increased \$8.5 million or 115.0% from negative loss sharing income of \$7.4 million during the second quarter 2013 to \$1.1 million of loss sharing income for the second quarter 2014 as negative covered

Table of Contents

provision expense of \$0.4 million was offset by losses on covered assets and loss sharing expense during the period. Negative FDIC loss sharing income during the second quarter 2013 reflected lower reimbursements expected to be received from the FDIC as a result of negative covered provision expense and covered OREO gains during the period.

Income from the accelerated discount on covered loans decreased \$1.3 million or 67.9% from \$1.9 million during second quarter 2013 to \$0.6 million for the second quarter 2014. Accelerated discounts on covered loans that prepay result from the accelerated recognition of the remaining covered loan discount that would have been recognized over the expected life of the loan had it not prepaid. Lower income from the accelerated discount on covered loans during the second quarter 2014 was related to declines in both the volume and size of covered loans prepaying during the period as well as declines in the size of the remaining discounts on these loans.

The decline in other noninterest income as compared to the second quarter 2013 was primarily related to improved portfolio valuations related to customer derivatives that occurred during the second quarter 2013 as well as a decrease in rental income earned on covered OREO properties and lower income earned on customer derivatives during the second quarter 2014.

Noninterest income for the six months ended June 30, 2014 was \$30.5 million, which represents a \$7.8 million or 20.4% decline from noninterest income of \$38.3 million for the six months ended June 30, 2013. The decline in noninterest income from the comparable period in 2013 was due primarily to a \$1.0 million decline in FDIC loss sharing income, a \$2.2 million decline in accelerated discount on covered loans, a \$1.7 million decline in gain on sale of investment securities, a \$1.5 million decline in other noninterest income and a \$0.7 million decline in net gains from sales of loans.

Similar to the quarterly year-over-year items discussed above, covered loan activity was responsible for the declines in FDIC loss sharing income and accelerated discount on covered loans while client derivative and OREO rental income drove the decline in other noninterest income for the first half of 2014 as compared to the same period in 2013. The decline in gain on sale of investment securities was primarily related to sales of agency mortgage-backed securities and collateralized mortgage obligations during 2013 in order to enhance liquidity and reduce prepayment and premium risks. Lower net gains from sales of loans in 2014 reflect a decline in mortgage lending activity due to rising interest rates and the unusually harsh winter weather during the period.

NONINTEREST EXPENSE

Second quarter 2014 noninterest expense was \$47.1 million compared with \$53.3 million for the second quarter of 2013. The \$6.2 million or 11.6% decrease from the comparable quarter in 2013 was primarily attributable to a \$4.3 million decline in pension settlement charges, a \$1.6 million decline in other noninterest expense, a \$0.9 million decline in net occupancy expense, a \$0.6 million decline in salaries and benefits expense and a \$0.1 million decline in loss sharing expense. These declines were partially offset by a \$2.6 million increase in loss on covered OREO.

During the second quarter of 2013, First Financial recognized \$4.3 million of pension settlement charges as a result of the level of lump sum distributions from the Company's pension plan. The annual threshold for recognizing lump-sum distributions as pension settlement charges reset on January 1, 2014 and no such expense was incurred for the six months ended June 30, 2014. For further discussion of pension settlement charges, see Note 13 to the Consolidated Financial Statements, Employee Benefit Plans.

The decrease in other noninterest expense was primarily due to a \$1.0 million decline in fixed asset-related costs associated with branch consolidations. The declines in net occupancy expense and salaries and benefits expense were primarily attributable to staffing reductions and branch consolidations associated with the Company's previously announced efficiency efforts.

Loss sharing expense represents costs incurred to resolve problem covered assets, including legal fees, appraisal costs and delinquent taxes. The decrease in loss sharing expense relates to a decline in collection costs as the balance of covered assets continues to decline. Losses on covered OREO and loss sharing expense are partially reimbursed by the FDIC.

First Financial views the combination of provision expense on covered loans, gains or losses on covered OREO and loss sharing expense, net of the related reimbursements due under loss sharing agreements recorded as FDIC loss sharing income, as the total net credit costs associated with covered assets during the period. For additional discussion of the credit costs associated with covered assets, see "Allowance for loan and lease losses - covered loans."

Noninterest expense for the six months ended June 30, 2014 was \$95.0 million compared with \$106.4 million in the six months ended June 30, 2013. The \$11.4 million or 10.7% decrease from the comparable period in 2013 was primarily attributable to a

Table of Contents

\$2.7 million decline in salaries and benefits expense and a \$1.8 million decline in net occupancy expense as a result of staffing reductions and branch consolidations throughout 2013 and into 2014. Also contributing to the decline was a \$4.3 million decline in pension settlement charges as discussed above, a \$2.6 million decline in other noninterest expense resulting from lower fixed asset-related costs associated with branch consolidations and a \$0.8 million decline in loss sharing expense. These declines were partially offset by a \$2.8 million increase in losses recorded on covered OREO as the Company recorded gains of \$2.4 million on covered OREO in 2013, as well as a \$0.6 million increase in data processing expenses related to software and system implementations, including internet and mobile banking platforms as well as expenses related to pending acquisitions.

INCOME TAXES

Income tax expense was \$8.0 million and \$6.5 million for the second quarters of 2014 and 2013, respectively. The effective tax rates for the second quarters of 2014 and 2013 were 33.3% and 29.0%, respectively. Income tax expense for the six months ended June 30, 2014 and 2013 was \$15.0 million and \$12.8 million, respectively. The year-to-date effective tax rate through June 30, 2014 was 32.6% compared to 30.2% for the comparable period in 2013.

The increase in the effective tax rates for the second quarter 2014 and the six months ended June 30, 2014, as compared to the same periods in 2013, was primarily the result of a favorable tax reversal related to an intercompany tax obligation associated with an unconsolidated former Irwin subsidiary and a favorable change in state tax laws in 2013, partially offset by higher tax-exempt income earned during 2014. While the Company's effective tax rate may fluctuate from quarter to quarter due to tax jurisdiction changes and the level of tax-enhanced assets, the overall effective tax rate for 2014 is expected to be approximately 32.0% - 34.0%.

LOANS - EXCLUDING COVERED LOANS

First Financial continues to experience strong loan demand in 2014 as a result of the Company's sales efforts, expanded presence in key metropolitan markets and investments in a diversified product suite. Loans, excluding covered loans and loans held for sale, totaled \$3.7 billion as of June 30, 2014, increasing \$157.0 million, or 9.0% on an annualized basis, compared to December 31, 2013. The increase in loan balances from December 31, 2013 was primarily related to a \$108.0 million increase in commercial loans, a \$32.9 million increase in real estate construction loans and a \$19.7 million increase in residential real estate loans.

Second quarter 2014 average loans, excluding covered loans and loans held for sale, increased \$335.0 million or 10.2% from the second quarter of 2013. The increase in average loans, excluding covered loans and loans held for sale, was primarily the result of a \$213.5 million increase in commercial loans, a \$66.1 million increase in commercial real estate loans, a \$30.5 million increase in residential real estate loans, an \$18.1 million increase in lease financing and an \$10.6 million increase in home equity loans, partially offset by an \$8.5 million decline in installment loans.

LOANS - COVERED

Covered loans declined \$92.3 million, or 20.2%, to \$365.6 million at June 30, 2014 from \$457.9 million as of December 31, 2013. Declines in covered loan balances were expected as there were no acquisitions of loans subject to loss sharing agreements during the period. The covered loan portfolio will continue to decline through payoffs, loan sales, charge-offs and termination or expiration of loss sharing coverage unless First Financial acquires additional loans subject to loss sharing agreements in the future.

The five year period of loss protection will expire for the majority of First Financial's covered commercial loans and covered OREO during the third quarter of 2014. The ten year period of loss protection on all other covered loans and covered OREO will expire during the third quarter of 2019. The expiration of loss sharing protection will result in a

reclassification of loan balances in the Consolidated Balance Sheets from covered loans to uncovered loans, but will not have an effect on the accounting for these loans.

ASSET QUALITY

Excluding covered assets. Due to the significant difference in the accounting for covered loans and the loss sharing agreements with the FDIC, management believes that asset quality measures excluding covered assets are generally more meaningful.

At June 30, 2014, loans 30-to-89 days past due decreased to \$5.7 million, or 0.16% of period end loans, as compared to \$13.6 million, or 0.39%, at December 31, 2013. Nonperforming assets, which consist of nonaccrual loans, accruing troubled debt restructurings (TDRs) (collectively, nonperforming loans) and OREO, decreased \$14.1 million, or 19.5%, to \$58.4 million at

Table of Contents

June 30, 2014 from \$72.5 million as of December 31, 2013, due to a \$7.7 million, or 14.6%, decline in nonperforming loans and a \$6.4 million, or 32.5%, decline in OREO balances during the first six months of 2014.

The decline in nonperforming loans compared to December 31, 2013 was primarily related to payments received on six commercial and commercial real estate credits totaling \$9.0 million and \$4.6 million of charge-offs during the period. This activity was partially offset by the addition of two commercial and three commercial real estate credits totaling \$5.5 million in the aggregate. OREO balances declined during the first six months of the period as resolutions and valuation adjustments of \$9.2 million exceeded additions of \$2.7 million. While there were no individually significant additions during the first six months, resolutions during the period included the sale of a single commercial property totaling \$7.9 million which was added to OREO during the fourth quarter 2013.

Classified assets, which are defined by the Company as nonperforming assets plus performing loans internally rated substandard or worse, totaled \$103.8 million as of June 30, 2014 compared to \$110.5 million at December 31, 2013. The declines in nonperforming loans, nonperforming assets and classified assets during the first six months of 2014 continue to reflect the Company's successful resolution efforts as well as modest but steady improvement in economic conditions in the markets in which First Financial operates.

The table that follows shows the categories that are included in nonperforming and underperforming assets, excluding covered assets, as well as related credit quality ratios as of June 30, 2014 and the four previous quarters.

(1) Nonaccrual loans include nonaccrual TDRs of \$11.0 million, \$14.6 million, \$13.0 million, \$13.0 million, and \$19.9 million, as of June 30, 2014, March 31, 2014, December 31, 2013, September 30, 2013 and June 30, 2013, respectively.

Covered assets. Covered loans accounted for under FASB ASC Topic 310-30 were grouped into pools for purposes of periodically re-estimating the expected cash flows and recognizing impairment or improvement in the loan pools. Accordingly, loans accounted for under FASB ASC Topic 310-30 are classified as performing, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period covered loan loss provision or future period yield adjustments.

First Financial had \$3.4 million of covered nonaccrual loans, excluding loans accounted for under FASB ASC Topic 310-30, and \$19.4 million of covered OREO at June 30, 2014. First Financial had \$3.8 million of covered nonaccrual loans, excluding loans accounted for under FASB ASC Topic 310-30, and \$27.1 million of covered OREO at

December 31, 2013. Covered OREO decreased \$7.7 million, or 28.3%, from December 31, 2013 as resolutions and valuation adjustments of \$11.9 million exceeded additions of \$4.2 million during the first six months of 2014.

Classified covered loan balances, which are defined by the Company as nonperforming covered assets plus performing covered loans internally rated substandard or worse, declined \$41.6 million, or 42.9% to \$55.3 million at June 30, 2014 from \$97.0 million at December 31, 2013. The decline in classified covered loan balances during 2014 reflects the Company's continued progress in bringing troubled covered loans to resolution.

Table of Contents

INVESTMENTS

First Financial's investment portfolio totaled \$1.8 billion or 28.2% of total assets at June 30, 2014, compared with a balance of \$1.8 billion or 28.0% of total assets at December 31, 2013. Securities available-for-sale at June 30, 2014 totaled \$897.7 million, compared with a balance of \$913.6 million at December 31, 2013, while held-to-maturity securities totaled \$899.5 million at June 30, 2014 compared to \$837.3 million at December 31, 2013.

The investment portfolio increased \$46.6 million, or 2.6%, during the first six months of 2014 as \$211.7 million of purchases were partially offset by sales, amortizations and other portfolio reductions. The Company sold \$92.5 million of securities during the first quarter consisting primarily of collateralized loan obligations (CLOs) and, to a lesser extent, hybrid securities, collateralized mortgage obligations and corporate securities, resulting in a gain of \$0.1 million. Proceeds from these sales were reinvested primarily in commercial mortgage-backed securities during the period.

The sale of CLOs during the first quarter was due to the potential regulatory impact under the "Volcker Rule" of the Dodd-Frank Wall Street Reform and Consumer Protection Act, which prohibits banks from engaging in short-term proprietary trading activities for their own account and from owning, sponsoring or having certain relationships with hedge funds or private equity funds. Under the original rule approved in December 2013, banks were required to conform investments to the requirements of the Volcker Rule or divest them by July 21, 2015. In order to mitigate risk related to the uncertain application of the Volcker Rule to the Company's CLOs and the broader impact on the CLO market, First Financial sold its CLO holdings during the first quarter 2014. Subsequently, on April 7, 2014, the Federal Reserve announced a two year extension of the deadline for banks to conform their CLO portfolios with the Volcker Rule to July 21, 2017.

The overall duration of the investment portfolio decreased to 3.9 years as of June 30, 2014 from 4.3 years as of December 31, 2013. As in past quarters, First Financial has avoided adding to its portfolio any particular securities that would materially increase credit risk or geographic concentration risk. The Company does, however, include these risks in its evaluation of current market opportunities that would enhance the overall performance of the portfolio.

First Financial recorded, as a component of equity in accumulated other comprehensive income, a \$6.0 million unrealized after-tax loss on the investment portfolio at June 30, 2014, which declined \$10.3 million from \$16.3 million at December 31, 2013 primarily due to investment gains during the period as a result of the tightening of mortgage and fixed income spreads.

First Financial will continue to monitor loan and deposit demand, as well as balance sheet and capital sensitivity, as it manages investment strategies in future periods.

DEPOSITS AND FUNDING

Total deposits as of June 30, 2014 were \$4.9 billion, an increase of \$37.6 million or 0.8% compared to December 31, 2013. The increase in total deposits at June 30, 2014 as compared to December 31, 2013 was driven by a \$44.9 million or 1.2% increase in total interest-bearing deposits offset by a \$7.3 million or 0.6% decrease in total noninterest-bearing deposit balances.

Non-time deposit balances totaled \$3.9 billion as of June 30, 2014, increasing \$16.8 million, or 0.4%, compared to December 31, 2013 as seasonal factors drove increases in public fund balances. Time deposit balances increased \$20.8 million, or 2.2%, due to an increase in consumer balances.

Year-to-date average deposits increased \$22.0 million, or 0.5%, to \$4.9 billion at June 30, 2014 from June 30, 2013 primarily due to a \$47.1 million increase in average noninterest-bearing deposits and a \$39.3 million increase in average savings deposit balances, partially offset by a \$75.8 million decrease in average time deposit balances. The year-over-year decline in average time deposits was a result of the Company's continued focus on growing core deposit relationships and reducing single service and higher-cost time deposits.

As the Company's deposit base continues to shift away from fixed-rate time deposits toward market-priced or indexed deposit products, First Financial has executed interest rate swaps to manage interest rate volatility on indexed floating rate deposits. These interest rate swaps, with a total notional amount of \$200.0 million as of June 30, 2014 and \$100.0 million as of December 31, 2013, involve the receipt by First Financial of variable-rate interest payments in exchange for fixed-rate interest payments by First Financial for approximately 5 years. As a result, First Financial has secured fixed rate funding at a weighted average cost of funds of 1.42% for the duration of the interest rate swaps.

Table of Contents

Borrowed funds increased to \$874.0 million at June 30, 2014 from \$809.5 million at December 31, 2013, primarily due to a \$32.3 million increase in Federal Home Loan Bank (FHLB) short-term borrowings. Short-term borrowings with the FHLB, which are utilized to manage normal liquidity needs, increased primarily as a result of loan growth and investment security purchases in excess of deposit growth during 2014.

LIQUIDITY

Liquidity management is the process by which First Financial manages the continuing flow of funds necessary to meet its financial commitments on a timely basis and at a reasonable cost. These funding commitments include withdrawals by depositors, credit commitments to borrowers, shareholder dividends, share repurchases, operating expenses and capital expenditures. Liquidity is derived primarily from deposit growth, principal and interest payments on loans and investment securities, maturing loans and investment securities, access to wholesale funding sources and collateralized borrowings. First Financial's most stable source of liability-funded liquidity for both long and short-term needs is deposit growth and retention of the core deposit base.

First Financial also utilizes its short-term line of credit and longer-term advances from the FHLB as funding sources. First Financial's total remaining borrowing capacity from the FHLB was \$423.6 million at June 30, 2014. First Financial had pledged certain eligible residential and farm real estate loans, home equity lines of credit and government and agency securities, totaling \$2.9 billion as collateral for borrowings from the FHLB as of June 30, 2014. For ease of borrowing execution, First Financial utilizes a blanket collateral agreement with the FHLB.

During the second quarter of 2014, First Financial entered into a short-term credit facility with an unaffiliated bank for \$15.0 million. This facility can have a variable or fixed interest rate and provides First Financial additional liquidity, if needed, for various corporate activities, including the repurchase of First Financial shares and the payment of dividends to shareholders. As of June 30, 2014, there was no outstanding balance. The credit agreement requires First Financial to maintain certain covenants related to asset quality and capital levels. First Financial was in compliance with all covenants associated with this line of credit as of June 30, 2014.

First Financial's principal source of asset-funded liquidity is marketable investment securities, particularly those of shorter maturities. The market value of investment securities classified as available-for-sale totaled \$897.7 million at June 30, 2014. Securities classified as held-to-maturity that are maturing within a short period of time are also a source of liquidity but totaled only \$0.1 million at June 30, 2014. Other types of assets such as cash and due from banks, interest-bearing deposits with other banks, as well as loans maturing within one year, are also sources of liquidity.

At June 30, 2014, in addition to liquidity on hand of \$162.4 million, First Financial had unused and available overnight wholesale funding of \$1.9 billion, or 28.7% of total assets, to fund loan and deposit activities as well as general corporate requirements.

Certain restrictions exist regarding the ability of First Financial's subsidiaries to transfer funds to First Financial in the form of cash dividends, loans, other assets or advances. The approval of the subsidiaries' respective primary federal regulators is required for First Financial's subsidiaries to pay dividends in excess of regulatory limitations. Dividends paid to First Financial from its subsidiaries totaled \$10.4 million for the first six months of 2014. As of June 30, 2014, First Financial's subsidiaries had retained earnings of \$369.8 million of which \$19.3 million was available for distribution to First Financial without prior regulatory approval. Additionally, First Financial had \$75.9 million in cash at the parent company as of June 30, 2014, which is approximately two times the Company's annual regular shareholder dividend (currently \$0.60 per share) and operating expenses.

First Financial repurchased 40,255 shares of the Company's common stock for \$0.7 million during the first half of 2014 under a previously announced share repurchase plan, with no shares being repurchased during the second quarter as a result of the Company's pending merger agreements. Under this same plan, First Financial purchased 750,145 shares of the Company's common stock for \$11.8 million during 2013.

Capital expenditures, such as banking center expansions and technology investments were \$2.6 million and \$5.4 million for the first six months of 2014 and 2013, respectively. Management believes that First Financial has sufficient liquidity to fund its future capital expenditure commitments.

Management is not aware of any other events or regulatory requirements that, if implemented, are likely to have a material effect on First Financial's liquidity.

Table of Contents

CAPITAL

Risk-Based Capital. First Financial and its subsidiary, First Financial Bank, are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet minimum capital requirements can initiate regulatory action.

Quantitative measures established and defined by regulation to ensure capital adequacy require First Financial to maintain minimum amounts and ratios of Total and Tier 1 capital to risk-weighted assets and to average assets. Management believes, as of June 30, 2014, that First Financial met all capital adequacy requirements to which it was subject. At June 30, 2014, and December 31, 2013, regulatory notifications categorized First Financial as well-capitalized under the regulatory framework for prompt corrective action. To be categorized as well-capitalized, First Financial must maintain minimum Total risk-based capital, Tier 1 risk-based capital and Tier 1 leverage ratios as set forth in the table below. There have been no conditions or events since those notifications that management believes has changed the Company's categorization.

First Financial's Tier I capital is comprised of total shareholders' equity less unrealized gains and losses on investment securities available-for-sale accounted for under FASB ASC Topic 320, Investments-Debt and Equity Securities, and any amounts resulting from the application of FASB ASC Topic 715, Compensation-Retirement Benefits, that is recorded within accumulated other comprehensive income (loss), intangible assets and any valuation related to mortgage servicing rights. Total risk-based capital consists of Tier I capital plus qualifying allowance for loan and lease losses and gross unrealized gains on equity securities.

For purposes of calculating the leverage ratio, average assets represents quarterly average assets less assets not qualifying for total risk-based capital including intangible assets, non-qualifying mortgage servicing rights and the allowance for loan and lease losses.

Consolidated regulatory capital ratios at June 30, 2014, included the leverage ratio of 9.99%, Tier 1 capital ratio of 14.34% and total capital ratio of 15.59%. All regulatory capital ratios exceeded the amounts necessary to be classified as "well capitalized," and total regulatory capital exceeded the "minimum" requirement by \$338.8 million, on a consolidated basis. First Financial's tangible common equity ratio increased to 9.39% at June 30, 2014 as compared to 9.20% at December 31, 2013.

First Financial's Tier I and Total capital ratios were negatively impacted by an increase in risk-weighted assets during 2014 primarily as a result of declines in lower risk-weighted covered assets offset by increases in higher risk-weighted uncovered loans and investment securities. First Financial's Leverage ratio was negatively impacted by an increase in average assets through June 30, 2014.

In July 2013, the Board of Governors of the Federal Reserve System approved a final rule implementing changes intended to strengthen the regulatory capital framework for all banking organizations (Basel III). The final rule includes transition periods to ease the potential burden, with community banks such as First Financial subject to the final rule beginning January 1, 2015. Among other things, Basel III includes new minimum risk-based and leverage capital requirements for all banks. The rule includes a new minimum ratio of common equity tier 1 capital to risk-weighted assets of 4.5% and a new capital conservation buffer of 2.5% of risk-weighted assets that will be phased-in over a transition period ending December 31, 2018. Further, the minimum ratio of tier 1 capital to risk-weighted assets is increased from 4.0% to 6.0% and all banks are now subject to a 4.0% minimum leverage ratio. The required total risk-based capital ratio will not change.

Failure to maintain the required common equity Tier 1 capital conservation buffer will result in potential restrictions on a bank's ability to pay dividends, repurchase stock and/or pay discretionary compensation to its employees. The Basel III requirements also provide strict eligibility criteria for regulatory capital instruments and change the method for calculating risk-weighted assets in an effort to better identify riskier assets requiring higher capital allocations.

While First Financial continues to evaluate this final rule and its potential impact, management expects that the Company will continue to exceed all regulatory capital requirements under Basel III.

Table of Contents

The following tables illustrate the actual and required capital amounts and ratios as of June 30, 2014 and December 31, 2013.

(Dollars in thousands)	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions			
	Amount	Ratio	Amount	Ratio	Amount	Ratio		
June 30, 2014

Tier 1 capital to average assets								
Consolidated	624,850	10.11	% 247,106	4.00	% N/A	N/A		
First Financial Bank	527,712	8.55	% 246,739	4.00	% 308,423	5.00	%	

Shareholder Dividends. First Financial paid a dividend of \$0.15 per common share on July 1, 2014 to shareholders of record as of May 30, 2014. Additionally, First Financial's board of directors authorized a dividend of \$0.15 per common share for the next regularly scheduled dividend, payable on October 1, 2014 to shareholders of record as of August 29, 2014.

Shelf Registrations. On July 31, 2014, First Financial filed a shelf registration on Form S-3 with the Securities and Exchange Commission. This shelf registration allows First Financial to raise capital from time to time through the sale of various types of securities, subject to approval by the Company's board of directors, and expires on July 31, 2017.

Share Repurchases. In October 2012, First Financial's board of directors approved a share repurchase plan under which the Company has the ability to repurchase up to 5,000,000 shares. Under the plan, the Company expects to repurchase approximately 1,000,000 shares annually. This annual target will be subject to market conditions and quarterly evaluation by the board as well as balance sheet composition and growth. The Company generally expects to return to shareholders a target range of 60% - 80% of earnings through a combination of its regular dividend and share repurchases while still maintaining

Table of Contents

capital ratios that exceed internal target thresholds, current regulatory capital requirements and proposed capital requirements under Basel III.

As discussed in the Liquidity section, the Company repurchased 40,255 shares under the 2012 share repurchase plan during the first six months of 2014 at an average price of \$17.32 per share and 750,145 shares at an average price of \$15.70 per share during 2013. First Financial's board of directors suspended further share repurchase activity under this plan during the first quarter 2014 in connection with the Company's pending acquisitions and, as such, no shares were repurchased during the second quarter 2014. The Company expects to continue the suspension of its share repurchase plan for the third quarter 2014.

At June 30, 2014, 3,749,100 common shares remained available for repurchase under the 2012 share repurchase plan.

Preferred Stock. During the second quarter of 2014, the shareholders of First Financial approved an amendment to the Company's Articles of Incorporation authorizing the Company to issue up to 10,000,000 preferred shares. The Company has not issued and has no current plans, arrangements or agreements to issue any of the authorized preferred shares at this time.

RISK MANAGEMENT

First Financial manages risk through a structured enterprise risk management (ERM) approach that routinely assesses the overall level of risk, identifies specific risks and evaluates the steps being taken to mitigate those risks. First Financial continues to enhance its risk management capabilities and has, over time, embedded risk awareness as part of the culture of the Company. First Financial has identified nine types of risk that it monitors in its ERM framework. These risks include information technology, market, legal, strategic, reputation, credit, regulatory (compliance), operational and external/environmental.

For a full discussion of these risks, see the Risk Management section in Management's Discussion and Analysis in First Financial's 2013 Annual Report. The sections that follow provide additional discussion related to credit risk and market risk.

CREDIT RISK

Credit risk represents the risk of loss due to failure of a customer or counterparty to meet its financial obligations in accordance with contractual terms. First Financial manages credit risk through its underwriting process, periodically reviewing and approving its credit exposures using credit policies and guidelines approved by its board of directors.

Allowance for loan and lease losses - excluding covered loans. First Financial records a provision for loan and lease losses (provision) in the Consolidated Statements of Income to maintain the allowance for loan and lease losses (allowance) at a level considered sufficient to absorb probable loan and lease losses inherent in the portfolio.

The allowance was \$42.0 million as of June 30, 2014 compared to \$43.8 million as of December 31, 2013. As a percentage of period-end loans, the allowance was 1.15% as of June 30, 2014 compared to 1.25% as of December 31, 2013. The decrease in the allowance from December 31, 2013 was primarily the result of continued improvement in the Company's historical loss rates as well as paydowns, charge-offs and other resolution activities related to impaired loans that resulted in lower specific reserves during the period. Additionally, the allowance as a percentage of loans continues to be impacted by loan growth, as newly originated loans are generally reserved for at lower rates.

The decline in the allowance during the second quarter of 2014 was consistent with declines in net charge-offs, nonaccrual loans, nonperforming assets and classified assets when compared to December 31, 2013 and continues to

reflect gradual improvement in property values and overall economic conditions across the Company's footprint. The allowance as a percentage of nonaccrual loans, including nonaccrual TDRs was 129.6% at June 30, 2014 compared with 116.6% at December 31, 2013. The allowance as a percentage of nonperforming loans, which include accruing TDRs, was 93.3% at June 30, 2014 compared with 83.2% at December 31, 2013.

Second quarter 2014 net charge-offs were \$1.0 million or 0.11% of average loans and leases on an annualized basis, compared with \$3.7 million or 0.45% of average loans and leases on an annualized basis for the comparable quarter in 2013. The \$2.6 million decrease from the comparable period in 2013 was primarily the result of reduced charge-offs of commercial, commercial real estate and home equity loans, as well as increased recoveries on commercial and commercial real estate loans previously charged-off. Provision expense is a product of the Company's allowance for loan and lease losses model, as well as net charge-off activity during the period. Second quarter 2014 provision expense was \$29 thousand compared to \$2.4 million during the comparable quarter in 2013.

Table of Contents

See Note 6 to the Consolidated Financial Statements, Allowance for Loan and Lease Losses, for further discussion of First Financial's allowance for uncovered loans.

The table that follows includes the activity in the allowance for loan losses, excluding covered loans, for the quarterly periods presented.

Allowance for loan and lease losses - covered loans. The allowance for losses on covered loans was \$12.4 million and \$18.9 million at June 30, 2014 and December 31, 2013, respectively. First Financial updated the valuations related to covered loans during the second quarter 2014 and, as a result of improved cash flow expectations in certain loan pools, recognized negative provision expense, or impairment recapture, of \$0.4 million. First Financial recognized negative provision expense related to covered loans of \$8.3 million for the comparable period in 2013. The related

declines in expected reimbursements on covered loan losses due from the FDIC under loss sharing agreements were recognized as negative FDIC loss sharing income and corresponding decreases in the FDIC indemnification asset during the second quarter of 2014 and 2013.

Table of Contents

First Financial recognized negative provision expense related to covered loans of \$2.6 million for the six months ended June 30, 2014, and provision expense related to covered loans of \$0.8 million for the comparable period in 2013. The Company recognized a related decrease in expected reimbursements on covered loan losses due from the FDIC under loss sharing agreements as negative FDIC loss sharing income and a corresponding decrease in the FDIC indemnification asset during the six months ended June 30, 2014. For the six months ended June 30, 2013, the estimated reimbursement on covered loan losses due from the FDIC under loss sharing agreements was recorded as FDIC loss sharing income and a corresponding increase to the FDIC indemnification asset.

The declines in the allowance for losses on covered loans and covered provision expense reflect continued improvement in credit expectations for the covered loan portfolio and significant declines in classified covered loan balances in recent periods. See Note 6 to the Consolidated Financial Statements, Allowance for Loan and Lease Losses, for further discussion of First Financial's allowance for covered loans.

First Financial views the combination of provision expense on covered loans, losses on covered OREO and loss sharing expense, net of the related reimbursements due under loss sharing agreements recorded as FDIC loss sharing income, as the net credit costs associated with covered assets during the period. Net credit costs increased \$2.1 million or 115.0%, from \$1.8 million of income during the second quarter of 2013 to \$0.3 million of expense during the second quarter of 2014. For the six months ended June 30, 2014, net credit costs decreased \$0.2 million, or 61.3%, to \$0.2 million from \$0.4 million for the comparable period in 2013.

(Dollars in thousands)	Three months ended				Six months ended

Table of Contents

MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, foreign exchange rates and equity prices. The primary source of market risk for First Financial is interest rate risk. Interest rate risk is the risk to earnings and the value of the Company's equity arising from changes in market interest rates and arises in the normal course of business to the extent that there is a divergence between the amount of First Financial's interest-earning assets and the amount of interest-bearing liabilities that are prepaid, withdrawn, re-priced or mature in specified periods. First Financial seeks to achieve consistent growth in net interest income and equity while managing volatility arising from shifts in market interest rates.

First Financial monitors the Company's interest rate risk position using income simulation models and economic value of equity (EVE) sensitivity analyses that capture both short-term and long-term interest rate risk exposure. Income simulation involves forecasting net interest income (NII) under a variety of interest rate scenarios including instantaneous shocks. First Financial uses EVE sensitivity analysis to understand the impact of changes in interest rates on long-term cash flows, income and capital. EVE is calculated by discounting the cash flows for all balance sheet instruments under different interest-rate scenarios. Modeling the sensitivity of NII and EVE to changes in market interest rates is highly dependent on the assumptions incorporated into the modeling process. First Financial continues to refine the assumptions used in its interest rate risk modeling.

Presented below is the estimated impact on First Financial's NII and EVE position as of June 30, 2014, assuming immediate, parallel shifts in interest rates:

	% Change from base case for immediate parallel changes in rates					
	-100 BP ⁽¹⁾		+100 BP		+200 BP	
NII-Year 1	(4.42)%	(1.66)%	(1.07)%
NII-Year 2	(1.66)%	0.23	%	1.50	%
EVE	(6.35)%	(2.32)%	(1.39)%

(1) Because certain current interest rates are at or below 1.00%, the 100 basis point downward shock assumes that certain corresponding interest rates approach an implied floor that, in effect, reflects a decrease of less than the full 100 basis point downward shock.

First Financial's projected results for both NII and EVE became modestly more liability sensitive during the second quarter 2014. This was primarily the result of growth in fixed-rate assets and variable rate assets with extended reset periods in the loan portfolio as well as a continued shift in the Company's deposit mix toward market-driven deposit products, partially offset by growth in longer-term consumer time deposits. First Financial continues to manage its balance sheet with a bias toward asset sensitivity while simultaneously balancing the potential earnings impact of this strategy.

"Risk-neutral position" refers to the absence of a strong bias toward either asset or liability sensitivity. "Asset sensitive position" refers to an increase in interest rates, primarily short-term rates, that is expected to generate higher net interest income as rates earned on our interest-earning assets would reprice upward more quickly or in greater quantities than rates paid on our interest-bearing liabilities would reprice. Conversely, "liability sensitive position" refers to an increase in short-term interest rates that is expected to generate lower net interest income as rates paid on our interest-bearing liabilities would reprice upward more quickly or in greater quantities than rates earned on our interest-earning assets.

See the Net Interest Income section of Management's Discussion and Analysis for further discussion.

Table of Contents

CRITICAL ACCOUNTING POLICIES

First Financial's Consolidated Financial Statements are prepared based on the application of the Company's accounting policies. These policies require the reliance on estimates and assumptions. Changes in underlying factors, assumptions or estimates could have a material impact on First Financial's future financial condition and results of operations. In management's opinion, certain accounting policies have a more significant impact than others on First Financial's financial reporting. For First Financial, these areas currently include accounting for the allowance for loan and lease losses (excluding covered loans), covered loans, the allowance for loan and lease losses - covered loans, the FDIC indemnification asset, goodwill, pension and income taxes. These accounting policies are discussed in detail in the Critical Accounting Policies section of Management's Discussion and Analysis in First Financial's 2013 Annual Report. There were no material changes to these accounting policies during the six months ended June 30, 2014.

ACCOUNTING AND REGULATORY MATTERS

Note 2 to the Consolidated Financial Statements, Recently Adopted and Issued Accounting Standards, discusses new accounting standards adopted by First Financial during 2014 and the expected impact of accounting standards recently issued but not yet required to be adopted. To the extent the adoption of new accounting standards materially affects financial condition, results of operations or liquidity, the impacts are discussed in the applicable section(s) of Management's Discussion and Analysis and the Notes to the Consolidated Financial Statements.

FORWARD-LOOKING INFORMATION

Certain statements contained in this report which are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act (the Act). In addition, certain statements in future filings by First Financial with the SEC, in press releases, and in oral and written statements made by or with the approval of First Financial which are not statements of historical fact constitute forward-looking statements within the meaning of the Act. Examples of forward-looking statements include, but are not limited to, projections of revenues, income or loss, earnings or loss per share, the payment or non-payment of dividends, capital structure and other financial items, statements of plans and objectives of First Financial or its management or board of directors and statements of future economic performances and statements of assumptions underlying such statements. Words such as "believes," "anticipates," "likely," "expected," "intends," and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Management's analysis contains forward-looking statements that are provided to assist in the understanding of anticipated future financial performance. However, such performance involves risks and uncertainties that may cause actual results to differ materially. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

management's ability to effectively execute its business plan;

the risk that the strength of the United States economy in general and the strength of the local economies in which we conduct operations may continue to deteriorate resulting in, among other things, a further deterioration in credit quality or a reduced demand for credit, including the resultant effect on our loan portfolio, allowance for loan and lease losses and overall financial performance;

U.S. fiscal debt and budget matters;

the ability of financial institutions to access sources of liquidity at a reasonable cost;

the impact of recent upheaval in the financial markets and the effectiveness of domestic and international governmental actions taken in response, and the effect of such governmental actions on us, our competitors and counterparties, financial markets generally and availability of credit specifically, and the U.S. and international economies, including potentially higher FDIC premiums arising from increased payments from FDIC insurance funds

as a result of depository institution failures;
the effect of and changes in policies and laws or regulatory agencies (notably the recently enacted Dodd-Frank Wall Street Reform and Consumer Protection Act and the new capital rules promulgated by federal banking regulators);
the effect of the current low interest rate environment or changes in interest rates on our net interest margin and our loan originations and securities holdings;
our ability to keep up with technological changes;
failure or breach of our operational or security systems or infrastructure, or those of our third party vendors or other service providers;
our ability to comply with the terms of loss sharing agreements with the FDIC;
the expiration of loss sharing agreements with the FDIC;
mergers and acquisitions, including costs or difficulties related to the integration of acquired companies and the wind-down of non-strategic operations that may be greater than expected;

Table of Contents

the risk that exploring merger and acquisition opportunities may detract from management's time and ability to successfully manage our business;

expected cost savings in connection with the consolidation of recent acquisitions may not be fully realized or realized within the expected time frames, and deposit attrition, customer loss and revenue loss following completed acquisitions may be greater than expected;

our ability to increase market share and control expenses;

the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies as well as the Financial Accounting Standards Board and the SEC;

adverse changes in the creditworthiness of our borrowers and lessees, collateral values, the value of investment securities and asset recovery values, including the value of the FDIC indemnification asset and related assets covered by FDIC loss sharing agreements;

adverse changes in the securities, debt and/or derivatives markets;

our success in recruiting and retaining the necessary personnel to support business growth and expansion and maintain sufficient expertise to support increasingly complex products and services;

monetary and fiscal policies of the Board of Governors of the Federal Reserve System (Federal Reserve) and the U.S. government and other governmental initiatives affecting the financial services industry;

unpredictable natural or other disasters could have an adverse effect on us in that such events could materially disrupt our operations or our vendors' operations or willingness of our customers to access the financial services we offer;

our ability to manage loan delinquency and charge-off rates and changes in estimation of the adequacy of the allowance for loan losses; and

the costs and effects of litigation and of unexpected or adverse outcomes in such litigation.

In addition, please refer to our Annual Report on Form 10-K for the year ended December 31, 2013, as well as our other filings with the SEC, for a more detailed discussion of these risks and uncertainties and other factors. Such forward-looking statements are meaningful only on the date when such statements are made, and First Financial undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such a statement is made to reflect the occurrence of unanticipated events.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information contained in “Item 2-Management’s Discussion and Analysis of Financial Condition and Results of Operations—Market Risk” of this report is incorporated herein by reference in response to this item.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rule 13a-15 of the Securities Exchange Act of 1934, that are designed to cause the material information required to be disclosed by First Financial in the reports it files or submits under the Securities Exchange Act of 1934 to be recorded, processed, summarized, and reported to the extent applicable within the time periods required by the Securities and Exchange Commission's rules and forms. In designing and evaluating the disclosure controls and procedures, management recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

As of the end of the period covered by this report, First Financial performed an evaluation under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

No changes were made to the Corporation's internal control over financial reporting (as defined in Rule 13a-15 under the Securities Exchange Act of 1934) during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II-OTHER INFORMATION

Item 1. Legal Proceedings.

There have been no material changes to the disclosure in response to "Part I - Item 3. Legal Proceedings" in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Item 1A. Risk Factors.

There are a number of factors that may adversely affect the Company's business, financial results, or stock price. See "Risk Factors" as disclosed in response to "Item 1A. to Part I - Risk Factors" of Form 10-K for the year ended December 31, 2013.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table shows the total number of shares repurchased in the second quarter of 2014.

Issuer Purchases of Equity Securities

Period	(a) Total Number Of Shares Purchased ⁽¹⁾	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans ⁽²⁾	(d) Maximum Number of Shares that may yet be purchased Under the Plans
April 1 to April 30, 2014				
Share repurchase program	0	\$0.00	0	3,749,100
Director Fee Stock Plan	2,430	17.73	N/A	N/A
Stock Plans	3,625	18.42	N/A	N/A
May 1 to May 31, 2014				
Share repurchase program	0	\$0.00	0	3,749,100
Director Fee Stock Plan	0	0.00	N/A	N/A
Stock Plans	0	0.00	N/A	N/A
June 1 to June 30 2014				
Share repurchase program	0	\$0.00	0	3,749,100
Director Fee Stock Plan	0	0.00	N/A	N/A
Stock Plans	1,500	17.37	N/A	N/A
Total				
Share repurchase program	0	\$0.00	0	
Director Fee Stock Plan	2,430	\$17.73	N/A	
Stock Plans	5,125	\$18.11	N/A	

Except with respect to the share repurchase program, the number of shares purchased in column (a) and the average price paid per share in column (b) include the purchase of shares other than through publicly announced plans. The shares purchased other than through publicly announced plans were purchased pursuant to First Financial's Director Fee Stock Plan, 1999 Stock Option Plan for Non-Employee Directors, 1999 Stock Incentive (1) Plan for Officers and Employees, 2009 Employee Stock Plan, Amended and Restated 2009 Non-Employee Director Stock Plan and 2012 Stock Plan (the last five plans are referred to hereafter as the Stock Plans.) The table shows the number of shares purchased pursuant to those plans and the average price paid per share. The purchases for the Director Fee Stock Plan were made in open-market transactions. Under the Stock Plans, shares were purchased from plan participants at the then current market value in satisfaction of stock option exercise prices. First Financial has one previously announced stock repurchase plan under which it is authorized to purchase shares (2) of its common stock. The plan has no expiration date. The table that follows provides additional information regarding this plan.

Announcement Date	Total Shares Approved for Repurchase	Total Shares Repurchased Under the Plan	Expiration Date
10/25/2012	5,000,000	1,250,900	None
